LETTER OF SUBMITTAL

IOWA CITY, IOWA, May 11, 1907.

*To the Trustees of the State Library  
and Historical Department of Iowa.*

GENTLEMEN: I have the honor to submit herewith a second report on the Public Archives. The date of my first report on the Public Archives being September 18, 1906, I shall confine this my second report to the period from September 18, 1906, to May 11, 1907.

During the year I have been ably assisted by Mr. John C. Parish and Mrs. Clara A. Neidig; and their work, it gives me pleasure to add, has been highly efficient and in every way satisfactory.

The guide to the several administrative departments, offices, boards, commissions, and public institutions, compiled by Mr. Parish and submitted as an appendix to this report, is an especially valuable contribution. To have secured for this difficult undertaking the services of one in whom zeal for historical research is united with scholarship was exceptional good fortune.

Very respectfully,

BENJ. F. SHAMBAUGH

## A SECOND REPORT ON THE PUBLIC ARCHIVES

As a "program for immediate action" the following recommendations were made in *A Report on the Public Archives* which was submitted to the Trustees of the State Library and Historical Department of Iowa under the date of September 18, 1906:—

*First.* That in accordance with Section 4, Chapter 142, of the Laws of the 31st General Assembly the Executive Council be requested "to provide, furnish, and equip" as soon as practicable a room or rooms in the Historical Memorial and Art Building to be used *temporarily* as a Hall of Public Archives.

*Second.* That steps be taken to examine, classify, and remove to the Hall of Public Archives (1) the papers and documents now in the Office of the Governor and (2) the papers and documents now in the Office of the Secretary of State.

*Third.* That the publication of a guide to the several administrative departments, offices, boards, commissions, etc., of the Territory and State of Iowa from 1838 to 1896 (now in preparation) be authorized.

*Fourth.* That a report on the Public Archives embodying such information and recommendations as the circumstances may suggest be submitted by the Trustees of the State Library and Historical Department to the Thirty-second General Assembly.

*Fifth.* That the Thirty-second General Assembly be asked to increase the appropriation for the care and preser-

vation of the Public Archives from \$2,000 annually to \$6,000 annually for the biennial period ending June 30, 1909.

*Sixth.* That plans for the more permanent organization and administration of the Hall of Public Archives be considered and adopted at such time as in the judgment of the Trustees the financial support of the Hall of Archives will make possible an adequate permanent organization.

These recommendations, moreover, having been approved by the Trustees of the State Library and Historical Department, became a guide for subsequent efforts. And so a report of the work since September 18, 1906, will naturally consist of an account of the carrying out of this program of recommendations.

#### FIRST RECOMMENDATION

[That in accordance with Section 4, Chapter 142, of the Laws of the 31st General Assembly the Executive Council be requested "to provide, furnish, and equip" as soon as practicable a room or rooms in the Historical Memorial and Art Building to be used *temporarily* as a Hall of Public Archives.]

Upon a request for a room or rooms the Executive Council assigned House Committee Rooms, Nos. 1, 2, and 3 in the Capitol Building as temporary working quarters. These rooms were occupied from October 10, 1906, to January 5, 1907. A change being necessitated by the convening of the Thirty-second General Assembly, the large room on the second floor of the Historical Memorial and Art Building was thereupon temporarily assigned by the Executive Council. To this room the portion of the Public Archives under examination was removed on January 5,

1907. Unfortunately, however, this room was in an unfinished condition, which made it impracticable to carry on the work of sorting, arranging, and classifying the documents on any considerable scale. Recently the Executive Council has assigned more permanent quarters on the third floor in the west wing of the Historical Memorial and Art Building.

#### SECOND RECOMMENDATION

[That steps be taken to examine, classify, and remove to the Hall of Public Archives (1) the papers and documents now in the Office of the Governor and (2) the papers and documents now in the Office of the Secretary of State.]

The first portion of the Public Archives to be examined was the material preserved in the Office of the Governor. All the papers, letters, records, and documents of this Office were removed first to the rooms assigned in the Capitol Building and then to the room temporarily assigned in the Historical Memorial and Art Building. So great is the undertaking and so limited the resources that little more than a beginning has been made in the direction of sorting, arranging, and classifying the materials taken from the Office of the Governor. But experience thus far amply confirms and justifies the general scheme of classification and arrangement outlined in the first *Report on the Public Archives*.

#### THIRD RECOMMENDATION

[That the publication of a guide to the several administrative departments, offices, boards, commissions, etc., of the Territory and

State of Iowa from 1838 to 1896 (now in preparation) be authorized.]

A reference guide to the several administrative departments, offices, boards, commissions, and public institutions as established by law seemed advisable from the very outset. Accordingly, plans were outlined and work was begun on the compilation of such a guide early in the year. The general plan of the compilation was placed in the hands of Mr. John C. Parish, who, with some assistance from Miss Katherine Hodge, has completed the work. The information contained in this compilation will not only serve as a guide to workers in the Public Archives, but will be of great value as a reference to students of Iowa history and administration. The entire compilation, along with Mr. Parish's letter of transmittal, is submitted as an appendix to this report. (See below p. 9).

#### FOURTH RECOMMENDATION

[That a report on the Public Archives embodying such information and recommendations as the circumstances may suggest be submitted by the Trustees of the State Library and Historical Department to the Thirty-second General Assembly.]

The first *Report on the Public Archives* (bearing date of September 18, 1906) did in fact become a report with recommendations to the Thirty-second General Assembly. By order of the Trustees of the State Library and Historical Department that first *Report on the Public Archives* was published in the *Annals of Iowa* and three hundred reprints thereof were issued.

Copies of these reprints were sent to the several State officers and to members of the Thirty-second General Assembly.

In addition to the Report on the Public Archives, a four page pamphlet on *The Story of the Public Archives* and a pamphlet of eleven pages entitled *At Work on the Public Archives of Iowa* were printed and distributed.

#### FIFTH RECOMMENDATION

[That the Thirty-second General Assembly be asked to increase the appropriation for the care and preservation of the Public Archives from \$2,000 annually to \$6,000 annually for the biennial period ending June 30, 1909.]

In accordance with the recommendation for an increase in the State appropriation for the care and preservation of the Public Archives a bill was prepared and introduced<sup>1</sup> in the Thirty-second General Assembly which read as follows:

A Bill for an act making an additional appropriation for the care and permanent preservation of the Public Archives, additional to the law as it appears in chapter one hundred and forty-two (142) laws of the Thirty-first General Assembly.

*Be it enacted by the General Assembly of the State of Iowa:*

Section 1. That for carrying out the purposes of "an act providing for the care and permanent preservation of the public archives and making an appropriation therefor," there be and is hereby appropriated out of the moneys in the state treasury not otherwise appropriated, and in addition to the sum appropriated in the said act for the care and preservation of the public archives, the sum of four

<sup>1</sup> This bill was drafted by the author of this report and introduced by Senator Ericson.

thousand dollars (\$4,000.00) per annum for two years to be expended under the direction of the board of trustees of the State Library and Historical Department.

The entire sum asked for in the Ericson bill was appropriated in "An Act to amend chapter one hundred forty-two (142) laws of the Thirty-first General Assembly, and increasing the appropriation for carrying its purposes into effect", which was approved April 13, 1907.<sup>1</sup>

In this connection attention should, perhaps, be called to the fact that the act of April 10, 1906, of the Thirty-first General Assembly was very materially modified by the act of April 13, 1907, of the Thirty-second General Assembly increasing the appropriation. The act of the Thirty-second General Assembly reads as follows:—

An Act to amend chapter one hundred forty-two (142) laws of the Thirty-first General Assembly, and increasing the appropriation for carrying its purposes into effect.

*Be it enacted by the General Assembly of the State of Iowa:*

Section 1. That section 2 of said act be repealed and the following enacted in lieu thereof:

"Sec. 2. That the several state executive and administrative departments, officers or offices, councils, boards, bureaus and commissioners are hereby authorized to transfer and deliver to the executive council for arrangement, classification, labeling, filing and calendaring, and then to the state library and historical department for preservation such of the public archives as are designated in section one (1) of this act except such as in the judgment of the executive council should be longer retained in the respective offices."

<sup>1</sup>The bill for this act originated in the Senate Committee on Appropriations.

[Sec. 2.] That section 3 of said act is hereby repealed, and the following enacted in lieu thereof:

"Sec. 3. That the state library and historical department is hereby authorized and directed to receive from the executive council such of the public archives as are designated in section one (1) of this act as rapidly as the same are properly arranged, classified, labeled, filed and calendared."

[Sec. 3.] That section 5 of said act is hereby repealed and the following enacted in lieu thereof:

"Sec. 5. That for carrying out the purposes of this act there is hereby appropriated out of any moneys in the state treasury not otherwise appropriated the sum of six thousand dollars (\$6,000) annually for two years beginning July 1, 1907, to be expended under the direction of said executive council."

Approved April 13, A. D. 1907.

#### SIXTH RECOMMENDATION

[That plans for the more permanent organization and administration of the Hall of Public Archives be considered and adopted at such time as in the judgment of the Trustees the financial support of the Hall of Archives will make possible an adequate permanent organization.]

By the act of the Thirty-second General Assembly making an appropriation of \$12,000 for the work on the Public Archives for the ensuing biennium, the direction of the work of sorting, arranging, and classifying the public documents has been transferred from the Trustees of the State Library and Historical Department to the Executive Council. It would, therefore, be out of place at this time to present for the consideration of the Trustees of the State Library and Historical Department plans for the more per-

manent organization and administration of the Hall of Public Archives.

In conclusion it would not be out of place, perhaps, to express the hope that the work on the Public Archives of Iowa will be carried forward in the spirit of the recommendations already made and along the lines already adopted by the Trustees of the State Library and Historical Department.

## LETTER OF TRANSMITTAL

IOWA CITY, IOWA, August 15, 1907.

To Professor BENJ. F. SHAMBAUGH,

*Superintendent of the Public Archives:*

Pursuant to arrangements entered into for the compilation of a *Guide to the Administrative Departments, Offices, Boards, Commissions, and Public Institutions of Iowa*. I transmit herewith outlines covering the period from the organization of the Territorial government in 1838 to the adoption of the Code of 1897.

The work was undertaken at your request and under your supervision in connection with the classification of the Public Archives of Iowa. Primarily it is intended as a guide to aid in the location, identification, and classification of the Public Archives. It is believed, however, that incidentally it may be of service to students who desire to make a study of Iowa institutions and administration.

It will be noted that the scope of the work extends only to the executive and administrative department of government. It has been found most practicable to classify and arrange the various offices, boards, commissions, and public institutions in three chronological periods: (1) those of the Territorial period, 1838-1846; (2) those of the period of the first State Constitution, 1846-1857; and (3) those of the period of the second State Constitution, 1857-1907.

The adoption of a new Constitution has in each case been taken to inaugurate a new set of offices. Where, however, the office or public institution was not affected by the change in the fundamental law it has seemed best to run the outline across the chronological division lines. For instance, the "Adjutant General" and the "Penitentiary at Ft. Madison" will be found classified and arranged among

the offices and institutions of the Territorial period alone, although both endured through the two subsequent periods down to the present time. Likewise the following will be found classified and arranged in the period of the first State Constitution, although continuing in existence into the next period: State Binder, State Printer, Register of State Land Office, Superintendent of Public Instruction, State Agricultural Society, Iowa College for the Blind, Iowa School for the Deaf, Iowa Hospital for the Insane at Mt. Pleasant, State Library, State University, State Board of Canvassers, Census Board, Des Moines River Improvement, and Geological Survey.

Under each of the three chronological divisions the following subdivisions appear: (1) Offices; (2) Public Institutions; and (3) Boards, Commissions, Agents, and Miscellaneous. Under each of these three subdivisions the classification becomes an alphabetical one.

The compiler frankly admits that the outlines are by no means an exhaustive survey of every function and requirement of the offices and institutions listed. In many ways the limited scope of the work has precluded the gathering (or the use in these outlines if gathered) of information which would have been highly valuable to workers in the Public Archives and to students of Iowa history.

The course pursued in the compilation was (1) an examination of the laws of each session of the legislature of the Territory and the State (including Codes and Revisions) volume by volume and act by act from the first session of the Legislative Assembly of the Territory of Iowa in 1838 down to and including the session of the Twenty-sixth General Assembly of the State of Iowa in 1896, and (2) the making of a chronological record of provisions under the headings determined before entering upon the work. Since the laws give little information concerning the incumbents of the offices, that part of the outlines will be found in many cases incomplete or entirely lacking. The lists of incumbents that are given were taken largely from the

*Iowa Official Register 1907-1908.* The only method of arriving at any complete list of incumbents of all of the administrative departments, offices, boards, commissions, and public institutions would have been to conduct a thorough investigation of the Public Archives of the Territory and State — a thing obviously impossible both because of the lack of time and means at our disposal for this undertaking and because the Public Archives are not at present in a condition to permit of such an investigation. Upon the classification and arrangement of the Public Archives of the Territory and State many lines of research of this nature will be rendered possible.

It will be evident to one who reads the enumeration of powers and requirements of the various offices that an attempt to make specific reference to each repeal of earlier provisions would be not only hopeless but confusing. In most cases later enactments are self explanatory, without the introduction of a statement to the effect that the former provision was thereby repealed.

Finally it will be noted that the dates of establishment and discontinuance are sometimes only approximations. For instance, it might be impossible to name with absolute exactness the date of discontinuance of the offices which lapsed at the end of the Territorial period or at the end of the period of the first State Constitution. A like problem presents itself in naming a date for the beginning of such offices. Hence it was determined in such cases to use the year of the adoption of the new Constitution even though the officer (e. g. the Governor) did not actually assume his office or leave his office until some time in the year following.

In order to reduce the complicated language of the law to a reasonable compass, recourse was had to an abbreviated form of statement; and reference to the laws in each case has been made in order that any one so desiring may investigate the matter in more detail.
