FLOODS IN IOWA:

Stage and Discharge

has been been as a week time as to are by your to diseast plant went is another

Oscar G. Lara

ABSTRACT

This report presents station descriptions and tables of peak stages and discharges for 259 continuous and partial-record gaging stations all of which are located at or within the boundaries of Iowa.

Contained in this report are not only the data for the annual flood series for each gaging station but also for the partial-duration series at those stations for which they could be obtained.

INTRODUCTION

This report has been designed to present a summary of the recorded data concerning floods in Iowa.

In general, the tables of peak stages and discharges which are contained in this report have been compiled from the files of the U.S. Geological Survey. For those few instances in which other sources were used, acknowledgement of the source will be found in the "Remarks" paragraph of the station description.

This report has been prepared in accordance with a cooperative agreement between the Highway Research Board, Highway Division, Iowa Department of Transportation and the U.S. Geological Survey. It supersedes an earlier version prepared by Schwob (1).

Contained in this report are not only the annual flood series for each station, but also partial-duration series at those stations for which it could be obtained. To insure consistency in the compilation of these data, it has been necessary to formulate specific rules for preparing the tables of peak stages and discharges.

The more important of these rules are as follows:

- 1. Within each water year, the maximum momentary discharge must be listed, irrespective of its magnitude.
 - (a) In most cases the maximum gage height will occur simulaneously with the maximum discharge.
- (b) Those cases in which the maximum gage height occurs as a result of an ice jam or other restricted flow condition and is presumed to be unrelated to the maximum discharge, the values are appropriately footnoted.
- 2. For those stations for which partial-duration series are prepared, a base discharge is determined such that it is expected to be equalled or exceeded on an average of

^{1.} Schwob, H. H., 1966, Magnitude and Frequency of Iowa Floods: Iowa Highway Research Board Bull. No. 28, pt. II.

about three to four times a year. The magnitude of this base for peaks is stated in the "Remarks" paragraph of the station description. For each complete water year of the station record, the peaks of independent floods which exceed the base, are recorded. Two flood peaks are considered independent if base flow (see glossary) is reached between them, or if they are more than 48 hours apart and the discharge of the trough between them is 25 percent or more below that of the lower peak.

Explanation of methods used in the computation of streamflow data is given in the annual reports titled "Water Resources Data for Iowa" published by the U.S. Geological Survey.

This report contains station descriptions and tables of peak stages and discharges for 259 continuous and partial-record gaging stations, all of which are located at or within the boundaries of Iowa.

In compliance with a request from the cooperator, the station data are arranged by station name in alphabetic order. This arrangement departs from the standard U.S. Geological Survey system of presenting data by basin in a downstream order. For readers who prefer the latter, an index with the stations listed in downstream order is included in the report. For a detailed explanation of downstream order and the meaning of the station number, the reader is referred to the U.S. Geological Survey annual reports titled "Water Resources Data for Iowa."

Of the data presented for the gaging stations, the station descriptions are self-explanatory. The data contained in the tables has been explained in the preceding section. Statements are required, however, concerning datum of gage, bankfull and flood stage, and the arrangement of data by years.

In reference to datum of gage, the phrase "mean sea level" denotes "Sea Level Datum of 1929" as used by the Topographic Division of the U.S. Geological Survey, unless otherwise qualified.

Flood stage (see glossary) is listed for all stations for which it could be obtained. Bankfull stage (see glossary) is published for stations not having a flood stage available. There are a few stations for which neither of these data are available at this time. Flood stages were compiled from data supplied by the National Weather Service.

Concerning the arrangement by years, the annual flood series is composed of the highest discharge for each water year of record, water year being defined as the twelve-month period ending on September 30 of the stated year. In listing the flood events, each event is designated by its true calendar date, but the events are grouped into water-year units by inserting a blank line between the last event in one water year and the initial event in the following water year. Thus the annual flood series is obtained by selecting the highest discharge from each group rather than the highest discharge for each of the designated calendar years.

The significance of the underlining in the tables is as follows:

- A line under the "water year" column signifies a break or gap in the record of peaks.
- 2. A line beginning at the "date" column and continuing through the "discharge" column indicates a change in site and datum.
 - 3. A line in the "date" and "discharge" columns indicates a change in site without a change in datum.
- 4. A line in the "gage height" column indicates a change in datum only.

No underlines are used for changes in site or datum if peaks have been adjusted to present conditions.

A glossary of selected technical terms and a table of factors for converting English Units to International System (SI) Units follows.

Do polyago a maro vilante de rechnical Terms

Base flow is the sustained or fair weather runoff. In most streams base runoff is composed largely of groundwater effluent. (Not to be confused with base for peaks).

<u>Bank</u> refers to the margins of a channel. Banks are called right or left as viewed facing downstream or in the direction of flow.

Bankfull stage is the stage at which a stream first overflows the natural banks (see also flood stage). Bankfull stage is a hydraulic term, whereas flood stage implies damage).

Cubic foot per second (ft3/s) is the rate of discharge representing a volume of 1 cubic foot passing a given point during 1 second and is equivalent to approximately 7.48 gallons per second or 448.8 gallons per minute or 0.02832 cubic metres per second.

Crest-stage gage is a device which will register the peak stage occurring between inspections of a gage.

<u>Discharge</u> is the volume of water (or more broadly, total fluids) that passes a given point within a given period of time.

Instantaneous discharge is the discharge at a given time.

Drainage area of a stream at a specified location is that area, measured in a horizontal plane, enclosed by a topographic divide from which direct surface runoff from precipitation normally drains by gravity into the stream above the specified point. Figures of drainage area given herein include all closed basins, or noncontributing areas, within the area unless otherwise noted.

Flood stage is the stage at which overflow of the natural banks of the stream begins to cause damage in the reach in which the elevation is measured (National Weather Service).

Gage height (G.H.) is the water-surface elevation referred to some arbitrary gage datum. Gage height is often used interchangeably with the general term "stage", although gage height is more appropriate when used with a reading on a gage.

Gaging station is a particular site on a stream, canal, lake, or reservoir where systematic observations of gage height and/or discharge are obtained. When used in connection with a discharge record, the term is applied only to those gaging stations where a continuous record of discharge is computed.

Partial-record station is a particular site where limited streamflow data are collected systematically over a period of years for use in hydrologic analyses.

Stage-discharge relation is the relation between gage height and the volume of water per unit of time, flowing in a channel.

stage in a hydrenite term, whereas flood stage implies danage).

Factors for converting English Units to International System (SI) Units

The following factors may be used to convert the English units published herein to the International System of Units (SI).

Multiply English units	<u>B</u>	To obtain SI units
	-Length-	
inches (in) feet (ft) miles (mi)	25.4 .3048 1.609	millimeters (mm) meters (m) kilometers (km)

05-4177.00 Bear Creek near Monmouth, Iowa

Location. -- Lat 42°02'18", long 90°52'59", in NE1/4 SE1/4 sec. 31, T.84 N., R.1 E., Jackson County, on right bank 15 ft downstream from bridge on county highway, 1.6 miles upstream from Rat Run, 2.8 miles south of Monmouth, and 8.2 miles upstream from mouth.

Drainage area. -- 61.3 sq mi.

Gage. -- Water-stage recorder and concrete control. Datum of gage is 728.80 ft above mean sea level.

Stage-discharge relation. -- Defined by current-meter measurements.

Remarks. -- Base for partial-duration series, 1,000 cfs.

b About.

05-4585.60 Beaverdam Creek near Sheffield, Iowa

Location.--Lat 42°56', long 93°12', in NW1/4 sec.27, T.94 N., R.20 W., Cerro Gordo County, at bridge on U.S. Highway 65, 3 miles north of Sheffield.

Drainage area. -- 123 sq mi.

Gage. -- Crest-stage gage.

Stage-discharge relation. -- Defined by current-meter measurements.

Remarks. -- Only annual peaks are shown.

a Peak stage did not reach bottom of gage.

b Discharge not determined.

05-4530.00 Big Bear Creek at Ladora, Iowa (Prior to October 1966, published as Bear Creek at Ladora)

Location.--Lat 41°44'58", long 92°10'55", in SW1/4 SW1/4 sec.7, T.80 N., R.11 W., Iowa County, on left bank 10 ft. dcwnstream from bridge on county highway V52, 0.4 mile south of Ladora, 1.2 miles downstream from Coats Creek, 2.8 miles upstream from Little Bear Creek, and 8.1 miles upstream from mouth.

Drainage area. -- 189 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 754.94 ft above mean sea level. Prior to June 26, 1946, nonrecording gage at same site and datum.

Stage-discharge relation. -- Defined by current-meter measurements.

Bankfull stage. -- 10 ft.

Remarks. -- Base for partial-duration series, 2,000 cfs.

PART LAT LAND

a About. d Affected by ice.

06-4855.00 Big Sioux River at Akron, Iowa

Location.--Lat 42°49'42", long 96°33'45", in NW1/4 SW1/4 sec.31, T.93 N., R.48 W., Plymouth County, Iowa, on left bank at west edge of Akron, 0.6 mile downstream from bridge on State Highway 48, and 2.3 miles upstream from Union Creek.

Drainage area. -- 9,030 sq mi, approximately, of which about 1,970 sq mi is probably noncontributing.

Gage. -- Water-stage recorder. Datum of gage is 1,118.90 ft above mean sea level. Prior to Dec. 3, 1934, nonrecording gage at bridge 300 ft upstream at same datum.

Stage-discharge relation. -- Defined by current-meter measurements; subject to extensive changes due to levee breaks in vicinity of gage.

Flood stage. -- 16 ft.

Remarks. -- Base for partial-duration series 3,500 cfs. Only annual peaks are shown prior to 1935.

a Peak stage did not reach bottom of gage.

b Discharge not determined.

c Affected by ice.

05-4810.00 Boone River near Webster City, Iowa

Location.--Lat 42°26'01", long 93°48'12", in NW1/4 SE1/4 sec.18, T.88 N., R.25 W., Hamilton County, on right bank 100 ft upstream from bridge on State Highway 17, 2.5 miles southeast of junction of U.S. Highway 20 and State Highway 17 in Webster City, and 3.2 miles downstream from Brewers Creek.

Drainage area. -- 844 sq mi.

Gage. -- Water-stage recorder and concrete control. Datum of gage is 989.57 ft above mean sea level. Prior to June 26, 1940, nonrecording gage at same site and datum.

Stage-discharge relation. -- Defined by current-meter measurements. Flood stage. -- 10 ft.

Remarks. -- Base for partial-duration series, 2,200 cfs. Base was 2,500 prior to 1961.

a About.

c Affected by ice.

05-4577.00 Cedar River at Charles City, Iowa

Location.--Lat 43°03'45", long 92°40'23", in SE1/4 NE1/4, sec.12, T.95 N., R.16 W., Floyd County, on right bank 800 ft downstream from bridge on U.S. Highway 18 (Brantingham Street) in Charles City, 10.6 miles upstream from Gizzard Creek, and at mile 252.9 upstream from mouth of Iowa River.

Drainage area. -- 1,054 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 973.02 ft above mean sea level. Prior to Oct. 1964, nonrecording gage at same site and datum.

Stage-discharge relation. -- Defined by current-meter measurements.
Flood stage. -- 12 ft.

Remarks. -- Only annual peaks are shown prior to 1965. Base for partial duration series, 2,500 cfs. Occasional minor regulation by dam 0.2 mi above gage. Daily wire-weight gage readings available in district office for period Sept. 13, 1945, to June 30, 1954, at same site and datum. Discharge not published for this period because of extreme regulation of streamflow by power dam 0.2 mi upstream.

c About.

Location.--Lat 41°24°36", long 91°17°06", in SW1/4 SW1/4 sec.2, T.76 N., R.4 W., Muscatine County, on right bank 10 ft downstream from bridge on county highway G28, 3.4 miles northeast of Conesville, 5.2 miles downstream from Wapsinonoc Creek, 10.7 miles upstream from mouth, and at mile 39.8 upstream from mouth of Iowa River.

Drainage area. -- 7,785 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 581.95 ft above mean sea level. Prior to Feb. 2, 1940, and Apr. 11, 1952, to July 1, 1954, nonrecording gage, Feb. 2, 1940, to Apr. 10, 1952, and July 2, 1954, to Sept. 16, 1963, water-stage recorder, at site 150 ft downstream on left bank at same datum.

Stage-discharge relation. -- Defined by current-meter measurements.

Stage stage. -- 9 ft.

Remarks. -- Base for partial duration series, 12,000 cfs.

c About.

05-4585.00 Cedar River at Janesville, Iowa

Location.--Lat 42°38'54", long 92°27'54", in NE1/4 SW1/4 sec.35, T.91 N., R.14 W., Bremer County, on left bank 300 ft downstream from bridge on county highway at Janesville, 3.6 miles upstream from West Fork Cedar River, and at mile 207.7 upstream from mouth of Iowa River.

Drainage area. -- 1,661 sq mi.

Gage.--Water-stage recorder. Datum of gage is 868.26 ft above mean sea level. Prior to July 26, 1919, nonrecording gage at site 1,000 ft downstream at datum 4.0 ft lower. July 26, 1919, to Sept. 30, 1927, Nov. 14, 1932, to Sept. 30, 1942, and Apr. 26, 1946, to Nov. 10, 1949, nonrecording gage at county bridge 300 ft upstream at same datum.

Stage-discharge relation. -- Defined by current-meter measurements. Flood stage. -- 11 ft.

Remarks. -- Base for partial-duration series, 4,000 cfs.

05-4575.00 Cedar River at Mitchell, Iowa

Location. -- Lat 43°18'55", long 92°52'45", in NE1/4 SW1/4 sec. 8, T. 98 N., R. 17 W., in tailrace of hydroelectric plant of Central States Power and Light Corporation at Mitchell, 7.1 miles downstream from Deer Creek, 11.3 miles upstream from Rock Creek, and at mile 282.0 above mouth of Iowa River.

Drainage area. -- 826 sq mi.

Gage. -- Nonrecording. Datum of gage is 1,000 ft above mean sea level (levels by Central States Power and Light Corporation).

Stage-discharge relation. -- Defined by current-meter measurements.

Remarks. -- Only annual peaks are shown.

a Peak stage did not reach bottom of gage.

05-4518.00 Deer Creek at Toledo, Iowa

Location.--Lat 42°00°, long 92°36°, near west quarter corner of sec.15, T.83 N., R.15 W., on county road bridge west of Toledo, Iowa.

Drainage area. -- 76.4 sq mi.

Gage. -- Nonrecording.

Stage-discharge relation. -- Defined by current-meter measurements.

Remarks. -- Records collected by Corps of Engineers. Station is inflow forecasting station for Coralville Reservoir. Only annual peaks are shown.

05-4820.00 Des Moines River at Des Moines, Iowa (Discontinued Sept. 30, 1961)

Location.--Lat 41°36°45°, long 93°37°15°, in NE1/4 NE1/4 sec.34, T.79 N., R. 24 W., on right bank 5 ft upstream from Second Avenue bridge in Des Moines, 1.8 miles upstream from 3enter Street dam, 2.8 miles upstream from Raccoon River, 4.5 miles downstream from Beaver Creek, and at mile 204.3 upstream from mouth.

Drainage area. -- 6,245 sq mi.

Gage. -- Water-stage recorder and concrete multiple-arch control dam. Datum of gage is 773.68 ft above mean sea level and at city datum. Prior to Aug. 21, 1941, nonrecording or recording gages at several sites within 3 miles of the present site and at various datums.

Stage-discharge relation. -- Defined by current-meter measurements for present gage location. Discharge for certain peaks prior to 1933 computed from study of backwater effects available for those peaks only; other peak discharges could not be computed.

Flood stage. -- 23 ft.

Remarks. -- Base for partial-duration series, 10,000 cfs. Gage heights shown price to 1934 are from various gages below Center Street Dam, all of which were at about the same datum but slightly different locations. Gage heights 1936-41 computed for present gage from gage readings at Center Street Dam. Backwater effect of 1.0 ft included in peak cfs. Only annual peaks are shown prior to 1944.

d Greatest flood since flood of May 1892 (magnitude unknown) and may have been the greatest since 1851.

05-4855.00 Des Moines River below Raccoon River, at Des Moines, Iowa

Location.--Lat 41°34°30", long 93°35°48", in NE1/4 SE1/4 sec.10, T.78 N., R.24 W., Polk County, on right bank 10 ft dcwnstream from bridge on Southeast 14th Street at Des Moines, 0.8 mile downstream from Raccoon River and Scott Street Dam, and at mile 200.7.

Drainage area. -- 9,879 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 762.52 ft above mean sea level. Prior to Oct. 1, 1951, and Oct. 1, 1953, to Sept. 30, 1959, water-stage recorder above Scott Street Dam, 0.8 mile upstream at datum 11.16 ft higher. Oct. 1, 1951, to Sept. 30, 1953, and Oct. 1, 1959, to Sept. 30, 1961, nonrecording gage at present site and datum.

Stage-discharge relation. -- Defined by current-meter measurements. Flood stage. -- 21 ft.

Remarks.--Base for partial-duration series, 15,000 cfs. Des Moines municipal water supply is taken from infiltration galleries on Raccoon River, 3.5 miles above station. Average daily pumpage was about 50 cfs. At times, water is pumped from the Raccoon River into recharge basins, or into Waterworks Reservoir. Effluent from sewage treatment plant enters the river 2.3 miles below station. Net effect of diversion not known.

05-4765.00 Des Moines River at Estherville, Iowa (Prior to 1971 published as West Fork Des Moines River at Estherville, Iowa)

Location.--Lat 43°23°51", long 94°50°38", in SW1/4 SE1/4 sec.10, 1.99 N., R.34 W., Emmet County, on right bank in city park, 1,200 ft downstream from bridge on State Highway 9 at Estherville, 0.1 mile upstream from School Creek, 2.3 miles upstream from Brown Creek, and at mile 404.2.

Drainage area. -- 1,372 sq mi.

Gage. -- Water-stage recorder and concrete control. Datum of gage is 1,247.55 ft above mean sea level.

Stage-discharge relation. -- Defined by current-meter measurements. Flood stage. -- 7 ft.

Remarks.--Base for partial-duration series, 1,500 cfs. Diurnal fluctuation at low flow caused by powerplant 0.3 mile above station which discharges an average daily flow of about 0.5 cfs into river from subterranean wells. Base was 2,000 prior to 1961.

eror .ac .em.

Location.--Lat 42°30°22", long 94°12°04", in NW1/4 SW1/4 sec.19, T.89 N., R.28 W., Webster County, on right bank 400 ft upstream from Soldier Creek, 1,800 ft downstream from Illinois Central Railraod bridge in Fort Dodge, 2,000 ft dcwnstream from Lizard Creek, and at mile 314.6.

Drainage area. -- 4,190 sq mi.

Gage.--Water-stage recorder. Datum of gage is 969.38 ft above mean sea level. Apr. 22, 1905, to July 19, 1906, nonrecording at bridge 3,000 ft downstream at different datum. Oct. 18, 1913, to Oct. 20, 1921, June 20 to Sept. 30, 1927, nonrecording, and Oct. 21, 1921, to June 19, 1927, recording, at site 7 miles downstream at Kalo, at different datum. Oct. 1, 1946, to Dec. 7, 1949, nonrecording at bridge 1,800 ft upstream from present site, at present datum.

Stage-discharge relation.--Defined by current-meter measurements. Flood stage.--10 ft.

Remarks. -- Base for partial-duration series, 6,000 cfs.
Occasional minor regulation caused by dam 0.8 mile upstream
from gage. Base was 8,000 cfs prior to 1961.

DOG, EY	June 25,		6.86	3,180

b About.

Location.--Lat 40°43'40", long 91°57'34", in SW1/4 SW1/4 sec.36, T.69 N., R.10 W., Van Buren County, on right bank 10 ft upstream from bridge on State Highway 1 at Keosaugua, 4.0 miles downstream from Chequest Creek, and at mile 51.3.

Drainage area. -- 14,038 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 547.36 ft above mean sea level. Prior to Dec. 24, 1933, nonrecording gage, and Dec. 25, 1933, to Sept. 30, 1972, water-stage recorder, same site at datum 10.00 ft higher.

Stage-discharge relation. -- Defined by current-meter measurements below 125,000 cfs and above by logarithmic plotting.

Flood stage. -- 25 ft.

Remarks.--Base for partial-duration series, 25,000 cfs. Only annual peaks are shown for 1912-15. Peak discharge above base discontinued upon beginning of storage in Lake Red Rock Mar. 12, 1969.

d About.

05-4895.00 Des Moines River at Ottumwa, Iowa (Published as "at Eldon", 1930-35)

Location. -- Lat 41000'39", long 92024'40", in SE1/4 NE1/4 sec. 25, T.72 N., R. 14 W., Wapello County, on right bank 15 ft downstream from Wabash Railroad Bridge at Ottumwa, 0.4 mile downstream from Ottumwa powerplant, 6.5 miles upstream from Village Creek, 9.5 miles downstream from South Avery Creek, and at mile 94.1.

Drainage area. -- 13,374 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 622.00 ft above mean sea level. Prior to Sept. 30, 1930, nonrecording gages at Market Street Bridge half a mile upstream at datum 0.83 ft higher. Oct. 1, 1930, to Mar. 31, 1935, nonrecording gage at Eldon 15 miles downstream at different datum. Apr. 1, 1935, to Oct. 25, 1963, water-stage recorder at site 1,100 ft downstream at Vine Street Bridge at datum 0.77 ft higher.

Stage-discharge relation. -- Defined by current-meter measurements.

Flood stage. -- 10 ft.

Remarks.--Base for partial-duration series, 25,000 cfs. Peak discharge base discontinued upon beginning of storage in Lake Red Rock Mar. 12, 1969.

c About.

05-4813.00 Des Moines River near Stratford, Iowa (published as 05-4815.00 Des Moines River near Boone, Icwa, 1920-67)

Location. -- Lat 42°15°04", lcng 93°59°52", in NW1/4 NE1/4 sec.21, T.86 N., R.27 W., Webster County, on right bank 6 ft downstream from bridge on State Highway 175, C.1 mile downstream from Skillet Creek, 4.0 miles southwest of Stratford, 7.3 miles downstream from Boone River and at mile 276.7.

Drainage area. -- 5,452 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 894.00 ft above mean sea level. Frior to May 1, 1920, nonrecording gage 16.6 miles downstream at datum 23.49 ft lower. Oct. 9, 1924, to Jan. 10, 1933, nonrecording gage 17.6 miles downstream at datum 28.53 ft lower. Jan. 11, 1933, to Sept. 30, 1934, nonrecording gage 17.9 miles downstream at datum 22.25 ft lower. Oct. 1, 1934, to Feb. 6, 1935, nonrecording gage and Feb. 7, 1935, to Sept. 30, 1967, water-stage recorder 17.9 miles downstream at datum 21.84 ft lower.

Flood stage. -- 14 ft.

Stage-discharge relation. -- Defined by current-meter measurements.

Remarks. -- Base for partial-duration series, 7,000 cfs. Peak base prior to 1968 was 11,000 cfs. Only annual peaks are shown prior to 1935. Occasional minor regulation caused by dam at Fort Dodge.

b About.

Apr. 13, 1922 Ney 27, 1922

05-4885.00 Des Moines River near Tracy, Iowa

Location.--Lat 41°16°53", long 92°51°34", in NW1/4 SE1/4 sec.19, T.75 N., R.17 W., Mahaska County, on right bank 250 ft upstream from abandoned Bellefountaine Bridge, C.5 mile downstream from bridge on State Highway 92, O.8 mile east of Tracy, 3.1 miles upstream from Cedar Creek, 6.4 miles downstream from English Creek, and at mile 130.4.

Drainage area. -- 12,479 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 670.91 ft above mean sea level. Prior to June 26, 1940, and June 30, 1952, to Nov. 4, 1960, nonrecording gage, and June 27, 1940, to June 29, 1952, water-stage recorder, at site 250 ft downstream at same datum.

Stage-discharge relation. -- Defined by current-meter measurements.
Flood stage. -- 14 ft.

Remarks.--Base for partial-duration series, 20,000 cfs. Peak discharge above base discentinued upon beginning of storage in Lake Red Rock Mar. 12, 1969.

e Daily.

06-4840.00 Dry Creek at Hawarden, Iowa (Discontinued September 1969)

Location.--Lat 42°59°48", long 96°28°10", in NE1/4 NE1/4 sec.2, T.94 N., R.48 W., Sioux County, on left bank 6 ft dcwnstream from bridge on State Highway 10 at east edge of Hawarden and 2.0 miles upstream from mouth.

Drainage area. -- 48.4 sq mi.

Gage. -- Water-stage recorder and concrete control. Datum of gage is 1,170.42 ft above mean sea level (Corps of Engineers benchmark). Prior to Oct. 30, 1949, nonrecording gage at same site and datum.

Stage-discharge relation. -- Defined by current-meter measurements below 860 cfs, extended above on basis of contracted-opening measurement of peak flow.

Bankfull stage .-- 10 ft.

Remarks. -- Base for partial-duration series, 300 cfs.

a Backwater from ice and/or Fuffalo Creek.

b About.

05-4790.00 East Fork Des Mcines River at Dakota City, Iowa (Published as "near Hardy", 1940-54)

Location.--Lat 42°43°26", lcng 94°11°30", in NW1/4 SE1/4 sec.6, T.91 N., R.28 W., Humboldt County, on right bank 50 ft upstream from old mill dam, in city park at east edge of Dakota City, 500 ft upstream from bridge on county highway P56, 0.6 mile downstream from bridge on State Highway 3, 3.4 miles upstream from confluence with Des Moines River, and at mile 333.8 upstream from mouth of Des Moines River.

Drainage area. -- 1,308 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 1,038.71 ft above mean sea level. Prior to Oct. 1, 1954, nonrecording gage at site 8 miles upstream at different datum.

Stage-discharge relation. -- Defined by current-meter measurements. Flood stage. -- 20 ft.

Remarks.--Flood of June 21, 1954 reached a stage of 24.02 ft (discharge 17,400 cfs) at present site. Base for partial-duration series, 1,500 cfs. Base was 2,200 cfs prior to 1961.

orde de lagor .

05-4206.90 East Fork Wapsipinicon River near New Hampton, Iowa

Location.--Lat 43°05', long 92°18', in SE1/4 sec.31, T.96 N., R.12 W., Chickasaw County, at bridge on U.S. Highway 63, about 2 miles north of New Hampton.

Drainage area. -- 30.3 sq mi.

Gage. -- Crest-stage gage.

Stage-discharge relation. -- Defined by current-meter and indirect measurements.

Remarks. -- Only annual peaks are shown.

Water year	Date		Gage height (feet)	Discharge (cfs)
1966	July 14	1966	86.04	4,350

a Peak stage did not reach bottom of gage.b Discharge not determined.

06-8979.50 Elk Creek near Decatur City, Iowa

Location.--Lat 40°43'18", long 93°56'12", near the SE corner sec.34, T.69 N., R.27 W., Decatur County, at right downstream corner of bridge on county highway, 1,000 ft downstream from West Elk Creek, 5.2 miles upstream from mouth, and 5.7 miles southwest of Decatur City.

Drainage area. -- 52.5 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 924.70 ft above mean sea level. Oct. 1, 1967, to Sept. 30, 1974, at datum 10.00 ft higher.

Stage-discharge relation. -- Defined by current-meter measurements.

Remarks. -- Base for partial-duration series, 500 cfs.

a About.

c Affected by ice.

06-6005.00 Floyd River at James, Iowa

Location.--Lat 42°34°36", long 96°18°43", in SE1/4 SE1/4 sec.30, T.90 N., R.46 W., Plymouth County, on right bank at downstream side of bridge on county highway C70, 0.2 mile east of James, 14.3 miles downstream from West Branch Floyd River, and at mile 9.5.

Drainage area. -- 882 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 1,092.59 ft above mean sea level. Prior to Sept. 11, 1938, June 9 to Nov. 5, 1953, and Oct. 1, 1955, to May 22, 1957, nonrecording gage and May 23, 1957, to Sept. 30, 1970, water-stage recorder at same site at datum 10.0 ft higher.

Flocd stage. -- 26 ft.

Stage-discharge relation. -- Defined by current-meter measurements below 16,000 cfs and extended above on basis of contracted-opening of flow-over-embankment measurement of peak flow.

Remarks. -- Base for partial-duration series, 2,500 cfs.

b Affected by ice.

c About.

Location.--Lat 41°39°24", long 91°32°27", in SE1/4 SE1/4 sec.9, T.79 N., R.6 W., Johnson County, on right bank 25 ft downstream from Hydraulics Laboratory of University of Iowa in Iowa City, 175 ft downstream from University Dam, 0.8 mile upstream from Ralston Creek, 3.6 miles downstream from Clear Creek, and at mile 74.2.

Drainage area. -- 3,271 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 29.00 ft above Iowa City datum, and 617.27 ft above mean sea level. June 1, 1903, to July 21, 1906, nonrecording gage 1,200 ft usptream at datum 3.05 ft higher. Nov. 29, 1907, to Oct. 29, 1913, staff gage 200 ft upstream at different datum. Oct. 30, 1913, to Nov. 18, 1921, chain gage at site 2,600 ft downstream at datum 0.2 ft higher. Nov. 19, 1921 to Sept. 30, 1922, water-stage recorder gage at present site at datum 1.0 ft higher. Oct. 1, 1930, to Sept. 30, 1934, at present site at Iowa City datum. Oct. 1, 1934, to Sept. 30, 1972, at datum 10.00 ft higher.

Stage-discharge relation.--Defined by current-meter measurements. Flood stage.--19 feet.

Remarks.--Base for partial-duration series, 6,000 cfs. Gage heights for peaks prior to Oct. 1, 1922, are equivalent gage heights computed for present recorder installation. Peak discharge 1907-13 estimated by Prof. F. A. Nagler from University Power Plant records. Peak discharge base discontinued upon beginning of storage in Coralville Lake Sept. 17, 1958.

#### 05-4557.00 Iowa River near Lone Tree, Iowa

Location. -- Lat 41°25°15", long 91°28°25", in NW1/4 NE1/4 sec.6, T.76 N., R.5 W., Louisa County, on left bank 10 ft downstream from bridge on county highway W66, 5 miles southwest of Lone Tree, 6.2 miles downstream from English River, and at mile 47.2.

Drainage area. -- 4,293 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 588.16 ft above mean sea level. Prior to Dec. 28, 1956, nonrecording gage at same site and datum.

Stage-discharge relation. -- Defined by current-meter measurements.

Bankfull stage. -- 14 feet.

Remarks. -- Flow regulated by Coralville Lake (capacity 492,000 acre-ft) since Sept. 17, 1958. Only annual peaks are shown.

## 05-4495.00 Iowa River near Rowan, Iowa

Location.--Lat 42°45'36", long 93°37'23", in NW1/4 NE1/4 sec.25, T.92 N., R.24 W., Wright County, on left bank 10 ft downstream from bridge on county highway C38, 0.9 mile downstream from Drainage ditch 123, 3.8 miles northwest of Rowan, 10.7 miles downstream from confluence of East and West Branches, and at mile 316.4.

Drainage area. -- 429 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 1,143.35 ft above mean sea level. Prior to Oct. 14, 1948, nonrecording gage at same site and datum.

Stage-discharge relation. -- Defined by current-meter measurements.

Bankfull stage. -- 10 feet.

Remarks. -- Base for partial-duration series, 1,200 cfs.

b About.

#### 05-4655.00 Iowa River at Wapello, Iowa

Location.--Lat 41°10'48", long 91°10'57", in NW1/4 SE1/4 sec.27, T.74 N., R.3 W., Louisa County, on right bank 30 ft dcwnstream from bridge on State Highway 99 at east edge of Wapello, 13.0 miles downstream from Cedar River, and at mile 16.0.

Drainage area. -- 12,499 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 538.98 ft above mean sea level, adjustment of 1912; Oct. 1, 1914, to Apr. 15, 1934, nonrecording gage and Apr. 16, 1934, to Sept. 30, 1972, water-stage recorder at datum 10 ft higher.

Stage-discharge relation. -- Defined by current-meter measur∈ments.

Flood stage. -- 20 feet. Levees protect lowland.

Remarks.--Peak daily discharge for 1903-1914 was estimated by Corps of Engineers from Mississippi River records. Since peak discharge at this station rarely exceeds the peak daily discharge by more than five percent, these estimates are listed as annual flood peaks. Peak discharge base discontinued upon beginning of storage in Coralville Lake Sept. 17, 1958.

### 06-6073.00 Maple River at Turin, Iowa (Discontinued 1941)

Location.--Lat 42°01', long 95°57', in SW1/4 NE1/4 sec.10, T.83
N., R.44 W., Monona County, at bridge on State Highway 37, 0.7
mile east of Turin.

Drainage area. -- 734 sq mi.

Gage. -- Nonrecording. Datum of gage is 1,028.45 ft above mean sea level.

Stage-discharge relation. -- Defined by current-meter measurements.

Remarks. -- Only annual peaks are shown.

ACOY OF SOME

b About.

c Maximum for period April to September 1939.

d Backwater from Little Sioux River.

### 05-4175.00 Maquoketa River near Delhi, Iowa (Discontinued September 1940)

Location.--Lat 42°24'30", long 91°20'45", in SW1/4 NW1/4 sec.29, T.88 N., R.4 W., Delaware County, in tailrace of Interstate Power Company's hydroelectric plant, 1.5 miles south of Delhi, and 6 miles upstream from Plum Creek.

Drainage area. -- 347 sq mi.

Gage. -- Recording. Datum of gage is 774.32 ft above mean sea level, adjustment of 1912.

Stage-discharge relation. -- Defined by current-meter measurements.

Remarks. -- Flow regulated by reservoir just above station.
Records furnished by Interstate Power Company and reviewed by
the Geological Survey. Only annual peaks are shown.

Water year	Peak stages and d	Gage height (feet)	Discharge (cfs)
1929	Mar. 14, 1929	89.82	7,360 a
1933	Mar. 30, 1933	88.5	5,350
1934	Aug. 11, 23, & Sept. 14, 22, 1934	82.9	531
1935	Mar. 5, 1935	88.0	4,700
1936	Mar. 11, 1936	86.4	2,990
1937	Mar. 4, 1937	89.2	6,740
1938	Feb. 6, 1938	88.0	5,300
1939	May 27, 1939	84.6	1,640
1940	June 23, 1940	86.1	3,330
Discontinu	ed September 1940		

a Discharge measurement.

Note. -- Maxima are mean discharges for period of several hours during the day except that for Mar. 30, 1933, which is momentary maximum discharge.

### 05-4170.00 Maquoketa River near Manchester, Iowa (Discontinued September 1973)

Location.--Lat 42°27°22", long 91°25°56", in NW1/4 NE1/4 sec.9, T.88 N., R.5 W., Delaware County, on left bank 0.6 miles downstream from Sand Creek, 1.5 miles upstream from Spring Branch, 2.3 miles southeast from dam on Maquoketa River in Manchester, and at mile 100.5.

Drainage area. -- 305 sq mi.

Gage.--Water-stage recorder. Concrete control since June 1, 1935. Datum of gage is 895.06 ft above mean sea level, adjustment of 1912.

Stage-discharge relation. -- Defined by current-meter measurements below 10,000 cfs and extended above by velocity-area studies.

Bankfull stage. -- Banks not subject to overflow.

Remarks.--Base for partial-duration series, 2,200 cfs. Data for 1928-30 from Iowa Electric Company dam in Manchester, discharge estimated by Corps of Engineers. Equivalent gage heights on present gage computed for 1933-35 peaks. Ease was 2,600 prior to 1966.

c About.

# 05-4185.00 Maquoketa River near Maquoketa, Iowa (Published as "below North Fork Maquoketa River near Maquoketa" prior to 1940)

Location.--Lat 42°05'05", long 90°38'04", in SW1/4 NE1/4 sec.17, T.84 N., R.3 E., Jackson County, on right bank 500 ft upstream from bridge on State Highway 62, 1,200 ft upstream from Prairie Creek, 2.0 miles northeast of Maquoketa, 2.2 miles downstream from North Fork, and 26.7 miles upstream from mouth.

Drainage area. -- 1,553 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 626.52 ft above mean sea level, adjustment of 1912. Prior to July 14, 1924, nonrecording gage, and July 15, 1924, to Sept. 30, 1972, recording gage at same site at datum 10.00 ft higher.

Stage-discharge relation. -- Defined by current-meter measurements below 45,000 cfs.

Flood stage. -- 23 feet.

Remarks. -- Base for partial-duration series, 9,000 cfs. Diurnal fluctuation caused by powerplant 4 miles above station.

b Discharge not determined.

c Gage removed during bridge construction.

#### 05-4836.00 Middle Raccoon River at Panora, Iowa

Location.--Lat 41°41'14", long 94°22'15", in NE1/4 NW1/4 sec.5, T.79 N., R.30 W., Guthrie County, on left bank 15 ft downstream from bridge on county highway, 0.2 miles southwest of Panora, 1.5 miles upstream from Andy's Branch, and 1.7 miles downstream from Lake Panorama.

Drainage area. -- 440 sq mi.

Gage. -- Water-stage recorder and concrete control. Datum of gage is 991.20 ft above mean sea level.

Stage-discharge relation. -- Defined by current-meter measurements below 4,500 cfs and above by logarithmic plotting.

Remarks. -- Base for partial-duration series, 2,500 cfs. City of Panora diverts approximately 100 acre-ft/yr above station. Flow regulated by dam on Lake Panorama since August 1970.

#### 05-420500 Mississippi River at Clinton, Iowa

Location.--Lat 41°46'53", long 90°15'04", in NW1/4 sec.34, T.81 N., R.6 W., Clinton County, on right bank at foot of Seventh Avenue in Camanche, 5.0 mi upstream from Wapsipinicon River, 6.4 mi downstream from Clinton, 10.6 mi downstream from Dam 13, and at mile 511.8 upstream from Ohio River. Prior to June 6, 1969, at site 400 ft downstream.

Drainage area. -- 85,600 sq mi , approximately, at Fulton-Lyons Bridge where discharge measurements are made.

Gage.--Water-stage recorder. Datum of gage is 562.68 ft above mean sea level. June 1873 to May 31, 1934, staff gage in stone well and June 1, 1934, to Sept. 30, 1939, water-stage recorder 14.8 miles downstream at Le Claire, at datum 6.07 ft lower (revised). Oct. 1, 1939, to Sept. 30, 1955, water-stage recorder 10.6 miles upstream at dam 13, at datum 5.48 ft higher. Auxiliary water-stage recorder at dam 13 since Oct. 1, 1958. Present gage used as auxiliary gage Oct. 1, 1939, to Sept. 30, 1955. Oct. 1, 1955, to June 5, 1969, water-stage recorder at site 400 ft downstream at same datum.

Stage-discharge relation. -- Defined by current-meter measurements. Flood stage. -- 16 ft.

Remarks. -- Flow regulated by reservoirs and navigation dams since about 1935. Only annual peaks are shown.

Ontober 1932 ... furnished .hy Union Electric Company. . Hecords

Juna: 6, 1851

b Occurred Apr. 26, 1969.

Location.--Lat 40°23'37", long 91°22'27", in SE1/4 SW1/4 sec.30, T.65 N., R.4 W., Lee County, near right bank in tailwater of dam and powerplant of Union Electric Co. at Keokuk, 0.2 mi upstream from bridge on U.S. Highway 136, 2.7 mi upstream from Des Moines River, and at mile 364.2 upstream from Ohio River.

Drainage area. -- 119,000 sq mi, approximately.

Gage.--Water-stage recorder. Datum of gage is 477.41 ft above mean sea level (levels by Corps of Engineers); 477.83 ft above mean sea level, adjustment of 1912; 477.34 ft above mean gulf level; and 484.65 ft above Memphis datum. Jan. 1, 1878, to May 1913, nonrecording gage at Galland (formerly Nashville), 8 mi upstream; zero of gage was set to low-water mark of 1864, or 496.94 ft above mean sea level, adjustment of 1912.

Stage-discharge relation. -- Since 1913, discharge computed from records of operation of turbines in powerplant and spillway gates in dam. Flow regulated by powerplant above station since 1913 and reservoirs and navigation dams above station since 1935.

Flood stage. -- 16 ft.

Remarks. -- Keokuk Dam completed in 1913. Records January 1878 to September 1932 from Report of Iowa State Planning; since October 1932, furnished by Union Electric Company. Records for May 1913 to September 1937 adjusted for change in contents in Keokuk Reservoir, those after September 1973 unadjusted. Only annual peaks are shown.

#### 05-3895.00 Mississippi River at McGregor, Iowa

Location.--Lat 43°01'29", long 91°10'21", in SE1/4 SE1/4 sec.22, T.95 N., R.3 W., Clayton County, on right bank in city park at east end of Main Street in McGregor, 2.6 mi upstream from Wisconsin River, 4.3 mi dcwnstream from Yellow River, and at mile 633.4 upstream from Ohio River.

Drainage area. -- 67,500 sq mi, approximately.

Gage. -- Water-stage recorder. Datum of gage is 605.30 ft above mean sea level, adjustment of 1912. Prior to June 1, 1937, and since June 2, 1939, auxiliary water-stage recorder; June 1, 1937, to June 1, 1939, auxiliary nonrecording gage 14.1 ni upstream in tailwater of dam 9, at datum 5.30 ft lower.

Stage-discharge relation. -- Defined by current-meter measurements below 276,000 cfs and is affected by backwater from Wisconsin River and Dam 10. Fall is used as a factor.

Flood stage. -- 18 ft.

Remarks. -- Beginning in 1937 only instantaneous gage heights are listed. Flow regulated by reservoirs and navigation dams since about 1935.

b Maximum stage known since at least 1828.

Location.--Lat 40°40'55", long 95°50'48", in NW1/4 NE1/4 sec.9, T.8 N., R.14 E., Oteo County, on right bank 0.7 mi upstream from Waubonsie Highway Bridge at Nebraska City, and at mile 562.6.

Drainage area. -- 414,400 sq mi, approximately.

Gage. -- Water-stage recorder. Datum of gage is 905.36 ft above mean sea level, datum of 1929, supplementary adjustment of 1954. Aug. 1, 1878, to Oct. 30, 1888, staff gage 1.2 miles downstream and Oct. 31, 1888, to Dec. 31, 1899, cable gage on railroad bridge 0.7 mile downstream, at datum 492.89 ft lower (St. Louis directrix). Aug. 12, 1929, to June 26, 1930, chain gage on railroad bridge, June 27, 1930, to Oct. 21, 1931, wire-weight gage, and Oct. 22, 1931, to Mar. 31, 1963, water-stage recorder, all at site 0.7 mile downstream at datum 1.09 ft lower.

Stage-discharge relation. -- Defined by current-meter measurements. Flood stage. -- 18 ft.

Remarks. -- Flow partly regulated by upstream main-stem reservoirs.
Only annual peaks are shown.

## 06-6100.00 Missouri River at Omaha, Nebraska

Location. -- Lat 41°15°32", long 95°55°20", in SE1/4 NW1/4 sec.23, T. 15 N., R. 13 E., Douglas County, on right bank on left side of concrete floodwall, at foot of Douglas Street, 275 ft downstream from Interstate 480 Highway bridge in Omaha, and at mile 615.9.

Drainage area. -- 322, 800 sq mi, approximately.

Gage. -- Water-stage recorder. Datum of gage is 958.24 ft above mean sea level. Apr. 10, 1872, to Aug. 31, 1928, staff, cable, and chain gages at several sites within 0.6 mile of present site not more than 0.43 ft below present datum. Sept. 1, 1928, to Nov. 30, 1929, chain gage attached to Illinois Central Railroad bridge 2 miles upstream at datum 2.97 ft higher. Dec. 1, 1929, to May 26, 1930, chain gage and May 27, 1930, to Oct. 18, 1931, wire-weight gage, at present site and datum. Oct. 19, 1931, to Sept. 30, 1936, water-stage recorder 0.4 mile downstream at present datum.

Stage-discharge relation. -- Defined by current-meter measurements. Flood stage. -- 19 ft.

Remarks. -- Flow partly regulated by upstream main-stem reservoirs.
Only annual peaks are shown.

#### 06-8135.00 Missouri River at Rulo, Nebraska

Location.--Lat 40°03'14", long 95°25'12", in NW1/4 NW1/4 sec.17, T.1 N., R.18 E., Richardson County, on downstream end of middle pier of bridge on U.S. Highway 159 at Rulo, 3.2 mi upstream from Nemaha River, and at mile 498.0.

Drainage area. -- 418,900 sq mi, approximately.

Gage.--Water-stage recorder. Datum of gage is 837.23 ft above mean sea level. Prior to Sept. 13, 1950, nonrecording gage at site 80 ft upstream at same datum.

Stage-discharge relation. +- Defined by current-meter measurements. Flood stage. -- 17 ft.

Remarks. -- Flow partly regulated by upstream main-stem reservoirs.

c Affected by ice.

191. 2, 1960 May 22, 1960 May 27, 1960 Location.--Lat 41°57°52", lcng 95°59°30", in NW1/4 NE1/4 sec.32, T.83 N., R.44 W., Monona County, on left pier at downstream side of bridge on county highway E54, 1.0 mile west of gaging station on Little Sioux River near Turin, 4 miles southwest of Turin, 5.2 miles northeast of Blencoe, and 12.5 miles upstream from mouth.

Drainage area. -- 900 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 1,020.00 ft above mean sea level (Corps of Engineers bench mark). Prior to May 7, 1942, nonrecording gage at site 4.8 miles downstream at datum 10.40 ft lower. May 7, 1942, to Oct. 13, 1953, nonrecording gage at same site and datum. Records prior to January 1958 not equivalent.

Stage-discharge relation.--Defined by current-meter measurements. Flood stage.--25 ft.

Remarks.--Monona-Harrison ditch is a dug channel and is a continuation of West Fork ditch, paralleling the Little Sioux River, and discharging into the Missouri River 1.5 miles upstream from the mouth of the Little Sioux River. Base for partial-duration series, 2,500 cfs.

. 3 6

Location.--Lat 41°45'10", long 95°27'50", in N1/2 SE1/4 sec.11, T.80 N., R.40 W., Shelby County, on right bank at stream-stabilization structure 1,300 ft downstream from bridge on State Highway 191, 0.5 mile downstream from small left-bank tributary and 2.3 miles southwest of Earling.

Drainage area. -- 32.0 sq mi.

Gage. -- Duplex water-stage recorder. Datum of gage is 1,222.56 ft above mean sea level. Gage heights obtained of headwater (base gage) and tailwater (supplementary gage) elevations at stream-stabilization structure. The stabilization structure is a dam approximately 16 ft high constructed of sheet piling and derrick stone. The crest of the cut-off piling is rectangular in shape at low stages and trapezoidal at high stages.

Stage-discharge relation. -- Defined by current-meter measurements.

Remarks.--Base for partial-duration series, 500 cfs. The stabilization structure is a dam approximately 16 ft high constructed of sheet piling and derrick stone. The crest of the cut-off piling is rectangular in shape at low stages and trapezoidal at high stages. Discharges computed from headwater gage readings.

# 06-8080.00 Mule Creek near Malvern, Iowa (Discontinued Sept. 30, 1969)

Location.--Lat 40°56'36", long 95°35'42", in NE1/4 NE1/4 sec.19, T.71 N., R.41 W., Mills County, on right bank 170 ft upstream from culvert on county highway L63, 0.2 mile downstream from unnamed tributary, 1.8 miles upstream from mouth, and 4.3 miles south of Malvern.

Drainage area. -- 10.6 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 974.20 ft above mean sea level (levels by Soil Conservation Service). Prior to Oct. 1, 1964, water-stage recorder at site 180 ft downstream. Oct. 1, 1964, to Mar. 25, 1965, nonrecording gage with supplemental water-stage recorder at site 180 feet downstream. Mar. 26 to July 13, 1965, nonrecording gages at various locations.

Stage-discharge relation. -- Defined by current-meter measurements below 510 cfs and extended above on basis of slope-area measurement of peak flow.

Remarks. -- Base for partial-duration series, 300 cfs.

#### 06-8170.00 Nodaway River at Clarinda, Iowa

Location.--Lat 40°44'19", long 95°00'47", in SW1/4 NE1/4 sec.32, T.69 N., R.36 W., Page County, on downstream side of center bridge pier on State Highway 2, 0.5 mile downstream from North Branch, 1.2 miles east of city square of Clarinda, and 7.5 miles upstream from East Nodaway River.

Drainage area. -- 762 sq mi.

Gage.--Water-stage recorder. Datum of gage is 960.36 ft above mean sea level. Prior to July 5, 1925, and May 28, 1936, to Mar. 26, 1957, nonrecording gage at same site and datum.

Stage-discharge relation. -- Defined by current-meter measurements below 15,000 cfs and extended above on basis of an overflow profile and extended channel rating.

Flood stage. -- 14 feet.

Remarks. -- Base for partial-duration series, 5,000 cfs.

### 05-4860.00 North River near Norwalk, Iowa

Location.--Lat 41°27°25", long 93°39°10", in NW1/4 SW1/4 sec. 20, T.77 N., R.24 W., Warren County, on left bank 10 ft dcwnstream from bridge on county highway R57, 1.7 miles southeast of Norwalk, 5.2 miles upstream from Middle Creek, and 6.2 miles downstream from Badger Creek.

Drainage area. -- 349 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 788.45 ft above mean sea level (levels by Corps of Engineers). Prior to June 12, 1946, nonrecording gage at same site and datum. Jan. 7 to Oct. 11, 1960, nonrecording gage at site 2.1 miles upstream at different datum.

Stage-discharge relation. -- Defined by current-meter measurements below 9,100 cfs and above on basis of area-velocity studies.

Flood stage. -- 14 feet.

Remarks. -- Base for partial-duration series, 1,700 cfs.

b About.

# 05-4550.00 Ralston Creek at Iowa City, Iowa

Location.--Lat 41°39'50", long 91°30'48", in SE1/4 NW1/4 sec.11, T.79 N., R.6 W., Johnson County, on left bank 10 ft upstream from bridge on Rochester Avenue, 1.0 mile northeast of post office in Iowa City and 2.2 miles upstream from mouth.

Drainage area. -- 3.01 sq mi.

Gage. -- Water-stage recorder and v-notch sharp-crested weir.

Datum of gage is 663.27 ft above mean sea level (University of Iowa bench mark).

Stage-discharge realtion. -- Defined by current-meter measurements.

Bankfull stage. -- Banks are not overtopped at gage.

Remarks. -- Base for partial-duration series, 200 cfs.

## 05-4605.00 Shell Rock River at Marble Rock, Iowa (Published as "at Greene", 1933-42) (Discontinued September 1953)

Location.--Lat 42°58'00", long 92°52'15", in SE1/4 SE1/4 sec.8, T.94 N., R.17 W., Floyd County, on left bank 20 ft above dam at Marble Rock, 1.1 mile upstream from Ackley Creek, 9.5 miles downstream from Winnebago River, and at mile 247.1 above mouth of Iowa River.

Drainage area. -- 1,318 sq mi at site used 1933-42; 1,357 sq mi.

Gage.--Nonrecording prior to Oct. 1, 1942; Mar. 13, 1945, to June 5, 1946; and since June 20, 1950. Recording Oct. 1, 1942, to Mar. 12, 1945, and June 6, 1946, to June 19, 1950. Prior to Oct. 1, 1942, in tailrace of powerplant at Greene, 5.7 miles downstream at different datum. Datum of gage is 960.39 ft above mean sea level.

Stage-discharge relation. -- Defined by current-meter measurements at Marble Rock; extended by logarithmic plotting above 23,000 cfs at Greene.

Flood stage. -- 4 feet.

Remarks. -- Records at two sites not corrected for 29 sq mi difference in drainage area. Base for partial-duration series, 4,000 cfs.

#### 05-4740.00 Skunk River at Augusta, Iowa

Location.--Lat 40°45°13", long 91°16°40", in NE1/4 NE1/4 sec.26, T.69 N., R.4 W., Des Moines County, on left bank 300 ft upstream from bridge on State Highway 394 at Augusta, 2.0 miles upstream from Long Creek, and at mile 12.5.

Drainage area. -- 4,303 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 521.24 ft above mean sea level. Prior to Nov. 15, 1913, nonrecording gage at site 400 ft upstream at datum about 0.7 ft higher. May 27, 1915, to Jan. 14, 1935, nonrecording gage at site 400 ft upstream at present datum.

Stage-discharge relation. -- Defined by current-meter measurements.

Flood stage. -- 15 feet.

Remarks. -- Base for partial-duration series, 15,000 cfs.

a About.
b Affected by ice.

d Stage and discharge for April 1973 flood believed to be greatest known since 1851.

# 05-4730.00 Skunk River at Coppock, Iowa (Station operation discontinued Sept. 30, 1944) (Peak data collected by observer until 1951)

Location.--Lat 41°09'50", long 91°43'05", in NE1/4 NE1/4 sec. 1, T.73 N., R.8 W., Jefferson County, at bridge on State Highway 78, 0.5 mile west of Coppock, 3/4 mile upstream from Crooked Creek, and 66 miles usptream from mouth of Skunk River.

Drainage area. -- 2,916 sq mi.

Gage. -- Nonrecording. Datum of gage is 585.02 ft above mean sea level. At site one-eighth mile upstream prior to Sept. 29, 1937.

Stage-discharge relation. -- Defined by current-meter measurements.

Remarks. -- Base for partial-duration series, 6,000 cfs.

## 06-8118.75 Snake Creek near Yorktown, Iowa

Location.--Lat 40°45', long 95°08', in NW1/4 sec.32, T.69 N., R.37 W., Page County, at bridge on State Highway 2, 1.5 miles NE of Yorktown.

Drainage area. -- 9.10 sq mi.

Gage. -- Crest-stage gage.

Stage-discharge relation. -- Defined by current-meter measurements.

Remarks. -- Only annual peaks are shown.

a Peak stage did not reach bottom of gage.

b Discharge not determined.

#### 06-6085.00 Soldier River at Pisgah, Iowa

Location.--Lat 41°49'52", long 95°55'50", in NW1/4 NE1/4 sec.14, T.81 N., R.44 W., Harrison County, on left bank on downstream side of bridge on county highway F20, at west edge of Pisgah, 0.4 mile downstream from Cobb Creek, 0.5 mile upstream from Mogger Ditch, and 13.1 miles upstream from mouth.

Drainage area. -- 407 sq mi.

Gage.--Water-stage recorder. Datum of gage is 1,036.53 ft above mean sea level. Prior to Oct. 11, 1954, nonrecording gage at same site and datum with supplementary water-stage recorder operating above 8.2 ft gage height Mar. 2, 1946, to Sept. 24, 1953.

Stage-discharge relation. -- Defined by current-meter measurements. Flood stage. -- 28 feet.

Remarks. -- Base for partial-duration series, 5,000 cfs.

#### 05-4874.70 South River near Ackworth, Iowa

Location.--Lat 41°20°14", long 93°29°10", in SE1/4 SE1/4 sec.34, T.76 N., R.23 W., Warren County, on right bank 15 ft downstream from bridge on county highway, 0.5 mile downstream from Otter Creek, and 2.2 miles southwest of Ackworth.

Drainage area. -- 460 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 769.97 ft above mean sea level (levels by Corps of Engineers). Prior to June 12, 1946, nonrecording gage, June 13, 1946, to Apr. 13, 1960, water-stage recorder, and Apr. 14, 1960, to Sept. 30, 1961, nonrecording gage, all at site 4.0 miles downstream at datum 8.06 ft lower.

Stage-discharge relation. -- Defined by current-meter measurements.
Flood stage. -- 19 feet.

Remarks. -- Base for partial-duration series, 5,000 cfs.

05-4710.00 South Skunk River below Squaw Creek near Ames, Iowa (Prior to October 1966, published as Skunk River below Squaw Creek near Ames)

Location.--Lat 42°00°31", long 93°35°37", in NE1/4 NW1/4 sec.13, T.83 N., R.24 W., Story County, on right bank 15 ft downstream from bridge on county highway, 0.2 mi downstream from Squaw Creek, 0.2 mi upstream from bridge on U.S. Highway 30, 2 mi southeast of Ames, and at mile 222.6 upstream from mouth of Skunk River.

Drainage area. -- 556 sq mi.

Gage. -- Water-stage recorder and concrete control. Datum of gage is 867.10 ft above mean sea level.

Stage-discharge relation. -- Defined by current-meter measurements.

Flood stage. -- 20 feet.

Remarks. -- Base for partial-duration series, 2,500 cfs.

05-4715.00 South Skunk River near Oskaloosa, Iowa (Prior to October 1966 published as "Skunk River near Oskaloosa")

Location.--Lat 41°21°19", long 92°39°31", in NW1/4 S21/4 sec.25, T.76 N., R.16 W., Mahaska County, on right bank 400 ft upstream from bridge on U.S. Highway 63, 0.3 mile downstream from Painter Creek, 4.0 miles north of Oskaloosa, 53.7 miles upstream from confluence with North Skunk River, and at mile 147.3 upstream from mouth of Skunk River.

Drainage area. -- 1,635 sq mi.

Gage. -- Water-stage recorder. Datum of gage is 685.50 ft above mean sea level. Prior to Nov. 21, 1947, nonrecording gage at site 400 ft downstream at same datum.

Stage-discharge relation. -- Defined by current-meter measurements below 18,000 cfs and above 18,000 cfs on velocity-area study.

Flood stage. -- 15 feet.

Remarks. -- Base for partial-duration series, 6,600.

a Peak stage did not reach bottom of gage.

b Discharge not determined.

# 06-8082.00 Spring Valley Creek near Tabor, Iowa (Discontinued Sept. 30, 1964)

Location. -- Lat 40°54°35", long 95°36°00", in SW1/4 NE1/4 sec.31, T.71 N., R.41 W., Mills County, on left bank 20 ft downstream from highway bridge, 1.5 miles upstream from mouth and 4.0 miles northeast of Tabor.

Drainage area. -- 7.65 sq miles.

Gage. -- Recording gage and concrete control. Altitude of gage is 975 ft (from topographic map).

Stage-discharge relation. -- Defined by current-meter measurements below 210 cfs and extended above on basis of a slope-area measurement of peak flow.

Remarks. -- Base for partial-duration series, 250 cfs.

### 05-4705.00 Squaw Creek at Ames, Iowa

Location.--Lat 42°01°21", long 93°37°45", in NE1/4 NW1/4 sec.10, T.83 N., R.24 W., Story County, on left bank 65 ft downstream from Lincoln Way Bridge in Ames, 0.1 mile downstream from College Creek, and 1.8 miles upstream from mouth.

Drainage area. -- 204 sq miles.

Gage.--Water-stage recorder and concrete control. Datum of gage is 881.00 ft above mean sea level (levels by Iowa State University). Prior to Mar. 11, 1925, nonrecording gage at site 0.6 mile upstream at different datum. Mar. 11, 1925, to Apr. 30, 1927, nonrecording gage at site 65 ft upstream at datum about 4 ft higher.

Stage-discharge relation. -- Defined by current-meter measurements.
Flood stage. -- 7 feet.

Remarks. -- Base for partial-duration series 1,000 cfs. Prior to 1965 only annual peaks are shown.

### 06-8118.40 Tarkio River at Stanton, Iowa

Location.--Lat 40°58'52", long 95°06'32", in NW1/4 SW1/4 sec.4, T.71 N., R.37 W., Montgomery County, on right bank 10 ft downstream from bridge on county highway, 0.1 mile downstream from Little Tarkio Creek, and 0.5 mile west of Stanton.

Drainage area. -- 49.3 sq miles.

Gage. -- Water-stage recorder and concrete control. Datum of gage is 1,104.67 ft above mean sea level.

Stage-discharge relation. -- Defined by current-meter measurements below 1,550 cfs and extended above on basis of slope-area measurements.

Remarks. -- Only annual peaks are shown prior to 1958. Base for partial-duration series, 1,500 cfs.

a Peak stage did not reach bottom of gage.

Affected by ice.

c Discharge not determined.

# 06-8980.00 Thompson River at Davis City, Iowa (Published as "Grand River" prior to 1918)

Location.--Lat 40°38°25", long 93°48°29", in SE1/4 SE1/4 sec.35, T.68 N., R.26 W., Decatur County, on right bank 15 feet downstream from bridge on U.S. Highway 69 at Davis City, 2.6 miles upstream from Dickersons Branch, and 5.2 miles upstream from Iowa-Missouri State line.

Drainage area. -- 701 sq miles.

Gage. -- Water-stage recorder. Datum of gage is 874.04 feet above mean sea level. May 14, 1918, to July 2, 1925, July 14, 1941, to Feb. 24, 1942, nonrecording gage, and Feb. 25, 1942, to Feb. 8, 1967, water-stage recorder at same site at datum 2.00 ft higher.

Stage-discharge relation. -- Defined by current-meter measurements below 15,000 cfs and extended above on basis of velocity-area study.

Flood stage. -- 11 feet.

Remarks. -- Base for partial-duration series, 4,500 cfs.

## 05-4120.00 Turkey River at Elkader, Iowa (Discontinued September 1942)

Location.--Lat 42°51'05", long 91°24'15", in NW1/4 SE1/4 sec.23, T.93 N., R.5 W., Clayton County, in tailrace of Central States Power and Light Corporation's hydroelectric plant in Elkader, 2.7 miles upstream from Roberts Creek and 15 mile 37.C.

Drainage area. -- 891 sq miles.

Gage. -- Nonrecording. Datum of gage is 701.61 ft above mean sea level.

Stage-discharge relation. -- Defined by current-meter measurements.

Remarks. -- Only annual peaks are shown.

a About.

b Daily mean discharge, from records by Central States Power and Light Corporation.

Location.--Lat 42°44'24", long 91°15'42", in SE1/4 NW1/4 sec.36, T.92 N., R.4 W., Clayton County, on left bank 10 feet downstream from bridge on county highway C43, 800 ft upstream from Wayman Creek, 1,000 ft southeast of Garber, 2,000 ft downstream from Elk Creek, 1 mile downstream from Volga River, and 19.8 miles upstream from mouth.

Drainage area. -- 1,545 sq miles.

Gage. -- Water-stage recorder. Datum of gage is 634.46 ft above mean sea level. Prior to Feb. 7, 1935, nonrecording gage at same site and datum.

Stage-discharge relation. -- Defined by current-meter measurements. Flood stage. -- 17 feet.

Remarks. -- Base for partial-duration series, 8,000 cfs. Prior to 1974, peak base was 10,000.

# 05-3880.00 Upper Iowa River near Decorah, Iowa (Discontinued September 1951)

Location.--Lat 43°18'20", long 91°44'50", in NE 1/4 SE 1/4 sec. 14, T. 98 N., R. 8 W., Winneshiek County, on left bank 500 ft upstream from county highway bridge in Freeport, 1.2 miles downstream from Trout Creek, and 3 miles downstream from Decorah.

Drainage area. -- 568 sq miles.

Gage. -- Nonrecording prior to Aug. 28, 1920 and from July 1, 1933, to Sept. 30, 1936; recording remainder of time. Datum of gage is 829.8 ft above mean sea level (Winneshiek County bench mark). At datum 3.96 ft lower prior to Aug. 28, 1920. July 1, 1933, to Sept. 30, 1936, at site 4 miles downstream at different datum.

Stage-discharge relation. -- Defined by current-meter and slopearea measurements.

Flood stage. -- 12 feet.

Remarks.--Prior to May 24, 1920, gage heights are computed to be equivalent to those for present gage. Base for partial-duration series, 4,500 cfs. Records for period July 1, 1933, to Sept. 30, 1936, furnished by Interstate Power Company.

d About.

# 05-4214.00 Wapsipinicon River at Central City, Iowa (Discontinued Aug. 31, 1950)

Location.--Lat 42°12'20", long 91°31'55", in sec. 3, T. 85 N., R. 6
W., Linn County, on State Highway 13 in Central City, 4.3
miles downstream from Walton Creek.

Drainage area. -- 1, 263 sq miles.

Gage. -- Nonrecording. Datum of gage 812.24 ft above mean sea level.

Stage-discharge relation. -- Defined by current-meter measurements.

Remarks. -- Base for partial-duration series, 3,000 cfs.

b About.

c From high-water mark in well.

Location.--Lat 42°27°49", long 91°53°42", in SE1/4 sec. 4, T.88 N., R.9 W., Buchanan County, on right bank at Sixth Street in Independence, 1,800 ft downstream from dam at abandoned hydroelectric plant, 4.9 miles downstream from Otter Creek, 9.7 miles upstream from Pine Creek, and at mile 142.5.

Drainage area. -- 1,048 sq miles.

Gage. -- Water-stage recorder and concrete control. Datum of gage is 882.85 ft above mean sea level. Prior to May 24, 1941, nonrecording gage in tailrace of powerplant, 1,800 ft upstream at datum 80.00 ft lower.

Stage-discharge relation. -- Defined by current-meter measurements.

Large shift in relation occurred in June 1947.

Flood stage. -- 12 feet.

Remarks. -- Base for partial-duration series, 3,000 cfs. Base revised to 4,000 cfs in 1966.

## 06-8060.00 Waubonsie Creek near Bartlett, Iowa (Discontinued Sept. 30, 1969)

Location.--Lat 40°53'04", long 95°44'47", in NE1/4 NE1/4 sec.11, T.70 N., R.43 W., Fremont County, on left pier on downstream side of highway bridge, 2.5 miles east of Bartlett and 3.5 miles west of Tabor, and 3.6 miles upstream from mouth.

Drainage area. -- 30.4 sq miles.

Gage. -- Recording. Datum of gage is 936.96 ft above mean sea level. Prior to June 16, 1951, nonrecording gage and Jan. 10, 1946, to May 8, 1950, supplementary high-stage recording gage at same site and datum.

Stage-discharge relation. -- Defined by current-meter measurements below 3,900 cfs and extended above on basis of slope-area measurements.

Remarks. -- Base for partial-duration series, 1,200 cfs.

CALL 187 BELL 1007 1 1007 4

c About.

Location. -- Lat 42°37'50", long 92°32'24", in SW1/4 SE1/4 sec. 6, T. 90 N., R. 14 W., Black Hawk County, on left bank 100 ft downstream from bridge on county highway C55 at Finchford, 3.2 miles upstream from Shell Rock River, and 5.0 miles upstream from mouth.

Drainage area. -- 846 sq miles.

Gage.--Water-stage recorder. Datum of gage is 867.54 ft above
mean sea level (revised). Prior to June 10, 1955,
nonrecording gage at same site and datum.

Stage-discharge relation. -- Defined by current-meter measurements. Flood stage. -- 12 feet.

Remarks. -- Base for partial-duration series, 2,500 cfs. An authorized diversion is made into Big Marsh, 16 miles upstream from gage, of about 2,100 acre-ft each year between Sept. 1 and Nov. 15. Net effect on daily flows at gage is unknown.

My 16, 1972 ,5974.30, 1972 06-6020.00 West Fork ditch at Hornick, Iowa (Published as "at Holly Springs April 1939-September 1969)

Location.--Lat 42°13'37", long 96°04'40", in SW1/4 sec.27, T.86 N., R.45 W., Woodbury County, on left bank at upstream side of State Highway 141 bridge, 1.0 mi east of Hornick, 9.2 mi upstream from Wolf Creek, and 13.5 mi north of Onawa.

Drainage area. -- 403 sq miles.

Gage.--Water-stage recorder. Datum of gage is 1,045.82 ft above mean sea level. Prior to June 16, 1959, nonrecording gage at site 3.0 miles upstream and June 16, 1959 to Sept. 30, 1969, recording gage at site 2.2 miles upstream at datum 7.0 ft higher.

Stage-discharge relation. -- Defined by current-meter measurements. Flood stage. -- 18 feet.

Remarks.--Base for partial-duration series, 1,800 cfs. West Fork ditch is a dredged channel which diverts flow of West Fork Little Sioux River at Holly Springs and carries it 5.5 miles south, thence southeast 6.5 miles to a point 1.2 miles west of Kennebec, where Wolf Creek enters from the left. From this point, ditch roughly parallels Little Sioux River and becomes known as Monona-Harrison ditch.

c Affected by ice.

d Gage removed for construction of new bridge.

### 05-3884.00 Wexford Creek near Harpers Ferry, Iowa

Loction. -- Lat 43°16', long 91°08', in SE1/4 sec. 25, T. 98 N., R.3 W., Allamakee County, at bridge, 5 miles north of Harpers Ferry.

Drainage area. -- 11.9 sq miles.

Gage. -- Crest-stage gage.

Stage-discharge relation. -- Defined by current-meter measurements and step-backwater computations.

Remarks. -- Only annual peaks are shown.

a Peak stage did not reach bottom of gage.

b Discharge not determined.

Location.--Lat 41°14'41", long 93°16'08", in NW1/4 NW1/4 sec. 3, T.74 N., R.21 W., Marion County, on left bank 15 ft downstream from bridge on county highway, 0.5 mile downstream from Kirk Branch, and 1.7 miles northwest of Dallas.

Drainage area. -- 342 sq miles.

Gage.--Water-stage recorder. Datum of gage is 759.12 ft above
mean sea level, (Corps of Engineers bench mark).

Stage-discharge relation. -- Defined by current-meter measurements. Remarks. -- Base for partial-duration series, 3,000 cfs.
