Executive Summary
(Based on the section, "Comparison with Prior Years")

- Over the past five years, Iowa's prison population grew by about 31%, from 6,176 inmates at mid-year 1996, to 8,101 inmates at mid-year 2001. In addition to the state inmate population, 55 Iowa offenders were being housed in prisons in other states on June 30, 2001.

- Drug crimes were the most common type of offense for which inmates were incarcerated at mid-year 2001. About 24% of Iowa inmates statewide were serving time for a drug crime as their most serious offense. Five years ago, about 15% of state inmates were serving time for a drug crime as their most serious offense.

- Among female inmates, the percentage of drug offenders was higher; about 30% of women incarcerated on June 30, 2001 were serving time for a drug crime as their most serious offense.

- During the past five years, drug offenders in prison have more than doubled, growing from 925 inmates in 1996, to 1,923 inmates at mid-year 2001.

- As of mid-year 2001, there were 529 inmates serving life sentences within Iowa's prison system (this count includes some compact prisoners housed in Iowa at the time). This population has grown by 101 offenders over the past five years. The number of Iowa "lifers" only (those housed instate and out-of-state) was 546 at mid-year 2001.

- The number of inmates serving mandatory minimum terms increased during the past year, from 1,279 inmates in 2000, to 1,529 inmates at mid-year 2001.

- Female inmates made up about 8% of the statewide inmate population at mid-year 2001, up from 7% five years ago. While the male inmate population increased by about 30% over the past five years, the female inmate population increased by about 43%.

- Regarding race/ethnicity, about 70% of all inmates were Caucasian (non-Latino); about 23% were African-American; about 5% were Latino; about 1% were Native American, and about 1% were Asian. Although the number of African-Americans in the Iowa prison system has increased, their proportion of the inmate population has declined slightly compared with five years ago, when 25% of all inmates were African-American. However, during the same period, the proportion of Latino, Native American and Asian offenders in prison have increased, from 6% of all inmates in 1995 to about 8% of all inmates at mid-year 2001.

- While offenders aged 35 and younger represent the majority of inmates, the proportion of prisoners in this age group has declined over the past five years. The proportion of offenders aged 36 through 60, however, has increased, from 29% of all inmates in 1996 to 38% of inmates at mid-year 2001. These trends may be attributed to larger demographic factors within society, namely, the aging of the "baby boomers".

Introduction

This report was compiled at the request of the Department of Corrections. The statewide analysis of Iowa's prison population at mid-year (June 30) 2001 includes the following information:

- Type of Most Serious Offense (e.g., arson, assault, burglary, etc.)
- Offense Class of Most Serious Offense
- Sex
- Race/Ethnicity
- Age (median, or middle value)
- Inmate Custody Level (minimum, medium, maximum security)
- Educational Level (average)
- Reading Score (average)

The statewide population analysis contains a comparison with prior years. Following the statewide section are *Facility Profiles* that examine each Department of Corrections institution. The facility profiles cover much of the same types of information as the statewide analysis.

Iowa's Correctional Facilities

While Iowa has a total of nine prisons, there are nineteen individual "facilities" described in this report, many of which are satellites. Most of Iowa's prisons hold only male inmates. The "inmate" and "patient" sides of the Iowa Medical and Classification Center may hold both men and women. Women-only facilities include the Iowa Correctional Institution for Women, the Mitchellville Violator Program and the Mt. Pleasant Women's Unit (which is a satellite of the Mt. Pleasant men's prison).

Data Sources

Most of the information in this report was derived from two sources:

- Adult Corrections Information System (ACIS), compiled by the Division of Criminal and Juvenile Justice Planning (CJJP)
- E-1 Reports, compiled by the Department of Human Services

Please note that the statewide E-1 Reports and statewide prison populations omit Iowa inmates housed out of state. Also, inmate populations as compiled by CJJP may differ from data in the E-1 Reports by a few offenders. Regarding the latter, this small discrepancy is likely due to the different times at which the ACIS database was accessed by the respective agencies for reporting purposes.

Data obtained from the E-1 Reports include age, average educational level, and average reading scores. Custody levels were compiled by CJJP based on information provided in the E-1 Reports. Iowa prison population comparisons with prior years is also from the E-1 reports (with the exception of trends regarding the most serious offense of inmates).

Data developed by CJJP from the Adult Corrections Information System focused primarily on descriptions of inmates' most serious offenses. Race/ethnicity data (statewide and by facility) were also compiled from this source. Where inmates were identified as being of "other" race in ACIS, arrest records maintained by the Iowa Department of Public Safety were consulted for specific race/ethnicity information.

Please note that displayed percentages for various breakdowns (e.g., offense type, offense class, etc.) may not add up to 100% due to rounding.

Terms & Definitions

Inmate Custody Levels

The Department of Corrections' Inmate Custody Classification System is the process used to determine whether a given inmate should reside in a minimum, medium or maximum security setting. Classification scores are associated with particular security levels as follows:

Custody Score	Security Level
0-5	Minimum
6-10	Medium
11+	Maximum

Please note that custody levels described in this report are as per the custody score, and therefore do not reflect overrides to higher or lower security levels. Such overrides may be based on inmate behavior, treatment needs and other considerations.

Iowa Offense Classes & Notations

Iowa offenses are generally classified as felonies or misdemeanors. There are five levels of felonies and three levels of misdemeanors, each carrying one or more distinct maximum penalty.

Felony offense class levels are lettered A through D, with an "other felony" category containing Habitual Offender sentences, a number of drug offenses (e.g., those carrying penalty enhancements) and sexual predators sentenced under Chapter 901A, *Iowa Code.*

Misdemeanor offense classes include aggravated, serious and simple misdemeanors. Misdemeanants may be incarcerated within the state prison system if the total maximum sentence imposed exceeds one year (otherwise offenders must serve their terms in county jails).

The chart and following notes explain the various offense codes used throughout this report:

Code	Explanation	Maximum Penalty
A Fel	Class A Felony	Life w/o Parole
BF-85%	Class B Felony: 902.12	25 yrs.
B Fel	Class B Felony	25 yrs./50 yrs.
CF-85%	Class C Felony: 902.12	10 yrs.
C Fel	Class C Felony	10 yrs.
D Fel	Class D Felony	5 yrs.
OF-85%	Sexual Predator: 901A; Habitual Offender: 902.12	varies
O Fel	Other Felony	15 yrs./varies
Misd	Misdemeanor	1+ yr./2 yrs.
Viol	Violator Program Participant	---
Other	Interstate Compact Prisoner; Safekeeper; Federal Prisoner	---

902.12 Offenders. Offenders committing certain forcible felonies enumerated in this section of the *Iowa Code* earn much less "good time" than other sentenced offenders do. "BF-85%" offenders must serve a minimum of 85% of 25-year terms, with the exception of those sentenced to Murder-2nd degree, who must serve a minimum of 85% of 50-year terms. "CF-85%" offenders are serving a minimum of 85% of 10-year terms for Robbery-2nd degree. Those convicted of being an habitual offender by way of Robbery-2nd degree are included in the "OF-85%" category.

901A Offenders. Certain repeat sex offenders sentenced under this section of the *Iowa Code* must serve a minimum of 85% of their enhanced maximum terms. Most of the "OF-85%" offenders are sexual predators sentenced under this section. Maximum penalties (and associated time served) vary for this group, ranging from two to fifty years.

Violator Program Participants. This group consists of probationers, parolees and work releasees whose community supervision is temporarily suspended for the purpose of participating in the state's Violator Program. The Violator Program provides a short-term (4 to 6 months) incarceration option and treatment for offenders who fail to abide by the conditions of community supervision.

Offense Types

The various felonies and misdemeanors may be classified according to the type of offense committed, as follows:

- Arson
- Assault (includes Chapter 708 offenses as well as similar offenses in other Code sections, such as child endangerment and tampering with a witness)
- Burglary
- Drug Crimes
- Escape/Flight (includes voluntary absence and failure to appear)
- Forgery/Fraud
- Kidnapping
- Murder/Manslaughter
- OWI/Traffic Offenses
- Prostitution/Pimping
- Robbery (includes extortion)
- Sex Crimes (includes Chapter 709 offenses as well as similar offenses in other Code sections, such as incest and sexual exploitation of minors)
- Theft
- Vandalism
- Weapons Offenses (includes Chapter 724 offenses involving illegal weapons possession and trafficking; it excludes offenses involving the use of weapons in serious crimes)
- Other Offenses (includes conspiracy, solicitation to commit crimes, aiding and abetting, public intoxication, abandonment or neglect of dependent persons, and other offenses not readily classifiable in the above categories)

The above offense types may be grouped within six general categories, as follows:
- *Violent*: assault, kidnapping, murder/manslaughter, robbery and sex crimes
- *Property*: arson, burglary, forgery/fraud, theft and vandalism
- *Drug*: drug offenses
- *OWI/Traffic*: OWI/traffic offenses

- *Weapons*: weapons offenses
- *Other*: escape/flight, other crimes and prostitution/pimping
Most Serious Offense

If an offender is incarcerated for more than one offense, the most serious offense is the offense with the longest maximum sentence length. If there are more than one such qualifying offenses, then the most serious offense is determined by selecting the crime against persons over the crime not against persons.
