Table of Contents

Executive Summary

- Drug crimes were the most common type of offense for which inmates were incarcerated at mid-year 1999. About 19% of inmates statewide were serving time for a drug crime as their most serious offense. Among female inmates, the percentage of drug offenders was higher; nearly 30% of female inmates housed at Mitchellville, Mt. Pleasant or out of state on June 30, 1999 were serving time for a drug crime as their most serious offense.

- During the past five years, drug offenders have comprised an increasing proportion of the inmate population, growing from about 13% of all inmates in 1994, to about 19% of all inmates in 1999.

- Less that half (45%) of inmates statewide had a most serious offense involving a crime against persons, and this has not changed substantially over the past five years. Among female inmates, the percentage was lower; about 32% of female inmates housed at Mitchellville, Mt. Pleasant or out of state on June 30, 1999 were serving time for a crime against persons as their most serious offense.

- As of mid-year 1999, there were 504 Iowa inmates serving life sentences (this count omits some Iowa "lifers" who were housed out of state at the time). This population has grown by about 123 offenders over the past five years.

- The number of inmates serving mandatory minimum terms has more than doubled over the past five years.

- Female inmates made up about 7% of the statewide inmate population at mid-year 1999, up from 6% five years ago. While the male inmate population increased by 42% over the past five years, the female inmate population increased by nearly 76%.

- Regarding race/ethnicity, about 69% of all inmates were Caucasian (non-Latino); about 24% were African-American; about 4% were Latino; about 2% were Native American, and about 1% were Asian. The proportion of African-Americans in the Iowa prison system has declined slightly compared with five years ago. However, during the same period, the proportion of Latino, Native American and Asian offenders in prison have increased.

- While offenders aged 35 and younger represent the majority of inmates, their proportion of all prisoners has declined over the past five years. The proportion of offenders aged 36 through 60, however, has increased over the period. These trends may be attributed to larger demographic factors within society, namely, the aging of the "baby boomers".

Introduction

This report was compiled at the request of the Department of Corrections. The statewide analysis of Iowa's prison population at mid-year (June 30) 1999 includes the following information:

- Type of Most Serious Offense (e.g., arson, assault, burglary, etc.)
- Offense Class of Most Serious Offense
- Sex
- Race/Ethnicity
- Age (median, or middle value)
- Inmate Custody Scores (median value)
- Educational Level (average)
- Reading Scores (average)

Included in the statewide analysis are 100 female offenders who were temporarily housed out-of-state at the time. However, because information on these offenders is limited, they were omitted from median age and custody scores, and average educational level and reading scores.

The statewide population analysis contains a comparison with prior years. Following the statewide section are *Facility Profiles* that examine each Department of Corrections institution (as well as a profile of the women housed out-of-state). The facility profiles cover much of the same types of information as the statewide analysis.

Data Sources

The information in this report was derived from two sources:

- The Adult Corrections Information System (ACIS), compiled by the Division of Criminal and Juvenile Justice Planning (CJJP)
- The E-1 Reports, compiled by the Department of Human Services

Please note that the statewide E-1 Reports omit Iowa inmates housed out of state. Also, inmate populations as compiled by CJJP may differ from data in the E-1 Reports by a few offenders. Regarding the latter, this small discrepancy is likely due to the different times at which the ACIS database was accessed by the respective agencies for reporting purposes.

Data obtained from the E-1 Reports include age, average educational level, and average reading scores. Median custody scores were calculated by CJJP based on information provided in the E-1 Reports.

Data developed by CJJP from the Adult Corrections Information System focused primarily on descriptions of inmates' most serious offenses; race/ethnicity data (statewide and by facility) were also compiled from this source.

Please note that displayed percentages for various breakdowns (e.g., offense type, offense class, etc.) may not add up to 100% due to rounding.

Terms & Definitions

Inmate Custody Scores

Inmate custody scores are calculated via the Department of Corrections' Inmate Custody Classification System, and are used to determine whether a given inmate should reside in a minimum, medium or maximum security setting. Scores are associated with particular security levels as follows:

Custody Score	Security Level
0-5	Minimum
6-10	Medium
11+	Maximum

Iowa Offense Classes & Notations

Iowa offenses are generally classified as felonies or misdemeanors. There are five levels of felonies and three levels of misdemeanors, each carrying one or more distinct maximum penalty.

Felony offense class levels are lettered A through D, with an "other felony" category containing Habitual Offender sentences, a number of drug offenses (e.g., those carrying penalty enhancements) and sexual predators sentenced under Chapter 901A, *Iowa Code*.

Misdemeanor offense classes include aggravated, serious and simple misdemeanors. Misdemeanants may be incarcerated within the state prison system if the total maximum sentence imposed exceeds one year (otherwise offenders must serve their terms in county jails).

The chart and notes on the next page explain the various offense codes used throughout this report:

Code	Explanation	Maximum Penalty
A Fel	Class A Felony	Life w/o Parole
BF-85	Class B Felony: 902.12	25 yrs.
B Fel	Class B Felony	25 yrs./50 yrs.
CF-85	Class C Felony: 902.12	10 yrs.
C Fel	Class C Felony	10 yrs.
D Fel	Class D Felony	5 yrs.
OF-85	Sexual Predator: 901A; Habitual Offender: 902.12	varies
OF	Other Felony	15 yrs./varies
OWI	Drunken Driving	2 yrs./5 yrs.
MISD	Misdemeanor	1+ yr./2 yrs.
VIOL	Violator Program Participant	---
COMP	Interstate Compact Prisoner	---
SAFE	Safekeeper	---

902.12 Offenders. Offenders committing certain forcible felonies after July 1, 1996 earn much less "good time" than other sentenced offenders do. "BF-85" offenders must serve a minimum of 85% of 25-year terms, with the exception of those sentenced to Murder-2nd degree, who must serve a minimum of 85% of 50-year terms. "CF-85" offenders are serving a minimum of 85% of

10-year terms for Robbery-2nd degree. Those convicted of being an habitual offender by way of Robbery-2nd degree are included in the "OF-85" category.

901A Offenders. Also after July 1, 1996, certain repeat sex offenders must also serve a minimum of 85% of their maximum terms. Most of the "OF-85" offenders are sexual predators sentenced under Chapter 901A, *Iowa Code*. Maximum penalties and time served vary for this group.

OWI Offenders. Felony and misdemeanor drunken drivers are listed separately because most such offenders receive short prison stays prior to being transferred to community-based treatment facilities. This category will include those awaiting transfer to such facilities, as well as those who were returned to prison for failing to abide by the conditions of community supervision.

Violator Program Participants. This group consists of probationers, parolees and work releasees whose community supervision is temporarily suspended for the purpose of participating in the state's Violator Program. The Violator Program provides a short-term (60-day) incarceration option and treatment for offenders who fail to abide by the conditions of community supervision.

Offense Types
The various felonies and misdemeanors may be classified according to the type of offense committed, as follows:
- Arson
- Assault (includes Chapter 708 offenses as well as similar offenses in other Code sections, such as child endangerment and tampering with a witness)
- Burglary
- Drug Crimes
- Escape/Flight (includes voluntary absence and failure to appear)
- Forgery/Fraud
- Kidnapping
- Murder/Manslaughter
- OWI/Traffic Offenses
- Prostitution/Pimping
- Robbery (includes extortion)
- Sex Crimes (includes Chapter 709 offenses as well as similar offenses in other Code sections, such as incest and sexual exploitation of minors)
- Theft
- Vandalism
- Weapons Offenses (includes Chapter 724 offenses involving simple possession, rather than use of, weapons)
- Other Offenses (includes conspiracy, solicitation to commit crimes, aiding and abetting, public intoxication, abandonment or neglect of dependent persons, and other offenses not readily classifiable in the above categories)

The above offense types may be grouped within six general categories, as follows:
- *Violent*: assault, kidnapping, murder/manslaughter, robbery and sex crimes
- *Property*: arson, burglary, forgery/fraud, theft and vandalism
- *Drug*: drug offenses

- *OWI/Traffic*: OWI/traffic offenses
- *Weapons*: weapons offenses
- *Other*: escape/flight, other crimes and prostitution/pimping

Persons/Non-Persons Offenses

Felonies and misdemeanors may also be classified as crimes against persons or not against persons. Crimes against persons are those offenses involving death, injury, attempted injury, abuse, threats, coercion, intimidation or duress. Examples of crimes against persons include all forms of homicide, assault, robbery, terrorism, child endangerment, sex offenses, first degree burglary and first degree arson.

Examples of crimes *not* against persons include burglary and arson offenses other than first degree, drug offenses, forgery, theft and weapons possession (as opposed to use).
Most Serious Offense

If an offender is incarcerated for more than one offense, the most serious offense is the offense with the longest maximum sentence length. If there are more than one such qualifying offense, then the most serious offense is determined by selecting the crime against persons over the crime not against persons.
