## Introduction

The FY12 (2011-2012) edition of Iowa Public Library Statistics includes information on income, expenditures, collections, circulation, staff, and several other measures. Each section is arranged by size code, then alphabetically by city. The totals, averages, and percentiles for each size code grouping are given immediately following the alphabetical listings.

The following table lists the size code designations, the municipal population range in each size code, the number of libraries reporting in each size code, and the total municipal population of the reporting libraries in each size code. The total municipal population served by the 544 libraries is 2,339,070. Population data is used to determine per capita figures throughout the publication.

Library size codes are based on the population of the city that the library was established to serve. Population figures are from the 2010 Census or most current special census. County library populations are based on rural county population and contractual agreements.

<b>Size</b>	<b>Population Range</b>	<b>Number</b>	<b>Total Population</b>

Of the 544 public libraries in Iowa, 524 submitted an annual survey for FY12. Only those public libraries that submitted an annual survey will be included in this report. The table of size codes (pages 5-6) lists the public libraries alphabetically.

## Summary

Public library statistics are used at the local, regional, state, and national levels. They are used to compare library performance, justify budget requests, track library data over time, assist in planning and evaluation, and provide valuable information for grants and other library programs. All 50 states collect information according to guidelines and definitions established by the Public Library Statistics Cooperative (PLSC). The rankings below include all 50 states and the District of Columbia.

The PLSC provides state-by-state rankings for public libraries. In FY10, the latest national data available, Iowa public libraries ranked as follows in comparison with other states. Iowa has 544 independent public libraries which ranks 4<sup>th</sup> nationally behind New York, Illinois, and Texas.

## FY12 – Income

---

**The income section includes revenue from all government sources for FY12. It also includes non-governmental revenue such as gifts or endowments.**

**Library per capita income is included from city and total sources. We are now calculating county per capita income for county libraries rather than city per capita income.**

**Per capita income is determined by taking the library's income and dividing it by the population of the city.**

**The listings that follow are in alphabetical order by size code. Use the Table of Size Codes on pages 5-6 to locate a library.**
