

Aviation System Plan 2010-2030 Individual Airport Report

Pocahontas Municipal Airport

Prepared for:

IOWA DEPARTMENT OF TRANSPORTATION OFFICE OF AVIATION

The preparation of this document was financed in part through an Airport Improvement Program grant from the Federal Aviation Administration (Project Number 3-19-0000-15-2009) as provided under Section 505 of the Airport and Airway Improvement Act of 1982, as amended. The contents do not necessarily reflect official views or the policy of the DOT or the FAA. Acceptance of this report by the FAA does not in any way constitute a commitment on the part of the United States to participate in any development depicted therein not does it indicate the proposed development is environmentally acceptable in accordance with appropriate public laws.

Individual Airport Report Pocahontas Municipal Airport

The *Iowa Aviation System Plan* Individual Airport Report provides an overview of the aviation system in Iowa, as well as specific information related to the Pocahontas Municipal Airport. Iowa's air transportation system plays a critical role in the economic development of the state and quality of life for Iowans. The *Iowa Aviation System Plan* evaluates existing conditions and makes recommendations for future

development of the air transportation system to meet the needs of users over the next 20 years.

Airport sponsors and airport management can use the Individual Airport Report to better understand the role their airport plays in the state and use it as a guide to improve facilities and services for their aviation users. The Individual Airport Report is divided into two sections: Section One provides an overview of the statewide aviation system; and Section Two provides specific information for the Pocahontas Municipal Airport. Additional information regarding the *Iowa Aviation System Plan* can be found at http://www.iowadot.gov/avaition.index.html.

Section One - System Plan Overview

1.1 System Planning Process

Development of a meaningful and useful planning document centered on the analysis of data collected for the system's inventory and input received from public involvement on issues, concerns, and needs affecting aviation in Iowa. A comprehensive data collection effort, analysis, and significant public involvement guided the development of the 2010 *Iowa Aviation System Plan*. Contributions from the System Plan Technical Advisory Committee, comprised of individuals involved in different aspects of aviation across the state, as well as input received from the public at five input meetings, also guided the planning process. The process to complete the *Iowa Aviation System Plan* included the following steps:

- Identify goals, objectives, and performance measures.
- Inventory of existing aviation facilities and infrastructure.
- Update airport roles.
- Identify facility and service targets for airport roles.
- Forecast of aviation activity.
- Discuss emerging trends and technologies.
- Develop system recommendations.

1.2 System Plan Goals, Objectives, and Performance Measures

The identification of goals establishes the framework necessary to guide future development and maintenance of the system's airports based on key areas of existing and anticipated user needs. Meeting these goals allows airports to provide facilities and services that meet the air transportation demands of the economy, citizens, and visitors of the state.

The following six goals were established for the system to adequately meet user demands and achieve the overall vision of aviation in lowa:

- Safety and Security Provide a safe and secure system of airports.
- Infrastructure and User Support Provide an airport system that meets existing and future user needs.
- Accessibility Provide a system of airports that is adequately accessible from both the ground and the air.
- **Economic Support** Support economic development through the air transportation system.
- Planning Establish airport-related local planning to guide the development and operation of airports in lowa.
- **Education and Outreach** Provide local aviation education opportunities that promote understanding, safety, utilization, and career development.

Objectives identify specific means and methods needed to achieve each goal based on an assessment of existing and future user needs. Some objectives may target facilities or services, while others quantify future needs. Not all objectives will be applicable to each airport as some may be adapted to the role it serves within the aviation system.

Performance measures establish criteria to evaluate whether the system is meeting the objectives. Performance measures identify desired levels of the objectives to determine the system's progress towards achieving the goals. Typically expressed as a percentage, the performance measures are used to identify strengths and weaknesses that contribute towards the development of the Plan recommendations. The following lists the objectives and performance measures for each goal.

| Airports have clear approaches to primary runways. Airports have clear approaches to all runways. Airports have emergency response plans. Airports develop and implement security plans. Percent of airports with clear approaches to all runways. Percent of airports with airport security plans. Percent of airports with airport security plans. Airports meet facility targets identified for their specific role. Airports meet service targets identified for their specific role. Primary runways maintained to PCI of 70 or higher. Airports maintain an overall PCI of 70 or higher. Based aircraft stored in covered hangars. Percent of airports meeting at least 75% of service targets. Percent of airports with primary runway PCI of 70 or greate. Percent of airports with primary runway PCI of 70 or greate. Percent of airports with primary runway PCI of 70 or greate. Percent of airports with primary runway PCI of 70 or greate. Percent of airports with primary runway PCI of 70 or greate. Percent of airports with primary runway PCI of 70 or greate. Percent of airports with primary runway PCI of 70 or greate. Percent of airports with primary runway PCI of 70 or greate. Percent of airports with primary runway PCI of 70 or greate. Percent of airports with primary runway PCI of 70 or greate. Percent of airports with primary runway PCI of 70 or greate. Percent of airports with overall airport PCI of 70 or greate. Percent of airports with overall airport PCI of 70 or greate. Percent of population 30 minutes from a commercial service airport. Percent of population within 30 minutes of an airport weather reporting equipment. Percent of population within 30 minutes of an airport weather reporting equipment. Percent of population within 30 minutes of an airport weather reporti | Goals, Objectives, and | Performance Measures |
|--|--|--|
| Airports have clear approaches to primary runways. Airports have clear approaches to all runways. Airports have emergency response plans. Percent of airports with clear approaches to all runways. - · Airports host annual aviation events.
- Airports host additional types of public events.
- · Airports host organized youth education activities.

Note: * = Measurement criterion to evaluate performance varies by role.

1.3 Airport Roles

Airports in lowa serve varying types of users and levels of demand. Airports were classified into one of five airport roles based upon their capability to support various types of aircraft and aviation users. Airports were assigned to a role based on currently meeting specific facility and services criteria. As conditions change and an airport meets the criteria for a higher level role, the plan is flexible to recognize role changes. The following table lists each role and its classification criteria while the following graphic identifies the location of each system airport.

Role Classification Criteria

System Role Criteria

Commercial Service – Commercial Service airports support some level of scheduled commercial airline service, have the infrastructure and service available to support a full range of general aviation activity, meet most needs of the aviation system, and serve as essential transportation and economic centers of the state.

Commercial airline service.

Enhanced Service – Enhanced Service airports have runways of 5,000 feet or greater in length, facilities and services that can accommodate a full range of general aviation activity including most business jets, serve business aviation, and are regional transportation centers and economic catalysts.

- 5,000 foot or greater paved runway.
- Airport Reference Code (ARC) of C-II or greater.
- Full time staffing during regular weekday and weekend business hours, available 24 hours a day.
- Availability of most based services including aircraft maintenance, flight training, rental aircraft, and aircraft charter.
- Availability of jet fuel.
- Weather observing system located on airport.

General Service – General Service airports have runways 4,000 feet or greater in length, facilities and services customized to support most general aviation activity including small to mid-size business jets, and service as a community economic asset.

- 4,000 foot or greater paved runway.
- Availability of some based services including aircraft maintenance, flight training, rental aircraft, and aircraft charter.
- Staffing during regular business hours.

Basic Service – Basic Service airports have runways 3,000 feet or greater in length with facilities and services customized to meet local aviation demands.

- 3,000 feet or greater paved runway.
- Availability of aircraft fuel.
- Some availability of airport or FBO personnel or on-call availability 24 hours.

Local Service – These airports support local aviation activity, offer few airport services, have turf runways, or are unable to meet criteria defining any other role.

- Turf runways.
- Airports not meeting criteria in any other roles.

Iowa Airports by Roles

1.4 Facility and Service Targets

Facility and service targets were established to help airports, within a specific role, meet the needs of their users. While not all targets are required for inclusion in a particular role, these are recommended levels of service and/or facility targets appropriate for the type of use associated with each role. Airports are encouraged to meet or exceed suggested targets for their role to satisfy local and aviation system needs.

The targets are separated into two main categories: airside and landside facilities, and services. Targets for each role vary based on the needs of aviation users for that role. The Enhanced Service airports, for example, will have more targets to meet the needs of business users. There are fewer targets for Local Service airports since they serve users with fewer requirements for operation. In the table below, targets for Commercial Service airports are combined with Enhanced Service targets, since in most categories, Commercial Service airports will exceed targets. Targets required for inclusion in a role are highlighted in red in the following facility and service tables.

Facility Targets

| Target Description | Commercial/Enhanced Service Targets | General Service Targets | Basic Service Targets | Local Service Targets | | | |
|---|--|--|---------------------------------|--------------------------|--|--|--|
| Airside | | | | | | | |
| Airport Reference Code | C-II | B-II | B-I or below | A-I | | | |
| Primary Runway Length | Minimum 5,000 ft | Minimum 4,000 ft | 3,000 ft | Not an objective | | | |
| Primary Runway Width | Minimum 100 ft | Minimum 75 ft | Minimum 60 ft | Minimum 50 ft | | | |
| Type of Parallel Taxiway | Full parallel | Turnarounds meet standards (both ends) | Exits as needed | Not an objective | | | |
| Type of Runway Approach | Vertical guidance | Non-precision | Visual | Visual | | | |
| Runway Lighting | MIRL | MIRL | LIRL | Not an objective | | | |
| Taxiway Lighting | MITL | MITL | Not an objective | Not an objective | | | |
| Visual Guidance Slope Indicator | Both runway ends (or ILS) | Both runway ends | Not an objective | Not an objective | | | |
| Runway End Indentifier Lights (as required) | Both runway ends (or ILS) | Both runway ends | Not an objective | Not an objective | | | |
| Rotating Beacon | Yes | Yes | Yes | Not an objective | | | |
| Lighted Wind Indicator | Yes (multiple as needed) | Yes | If open for night | If open for night | | | |
| RCO Facilities | Tower or RCO | Not an objective | Not an objective | Not an objective | | | |
| Wind coverage or crosswind runway | Crosswind runway or 95% wind coverage for NPIAS facilities | Crosswind runway or 95% wind coverage for NPIAS facilities | Not an objective | Not an objective | | | |
| | Land | dside | | | | | |
| Covered storage | 100% of based aircraft | 100% of based aircraft | 100% of based aircraft | Not an objective | | | |
| Overnight storage for | Typical average aircraft/ | Typical average aircraft/ | Nick our eleteration | Nick our children | | | |
| business aircraft | business user demand | business user demand | Not an objective | Not an objective | | | |
| Aircraft apron | 100% of average daily transients | 100% of average daily transients | 50% of average daily transients | Not an objective | | | |
| Terminal/administration building | Yes | Yes | Waiting area | Not an objective | | | |
| Paved entry/terminal parking | Yes | Yes | Not an objective | Not an objective | | | |

Note: Targets highlighted in **RED** are requirements for role classification

Service Targets

| Target Description | Commercial/Enhanced | General Service | Basic Service | Local Service |
|--|--|---|------------------|------------------|
| rarget Description | Service Targets | Targets | Targets | Targets |
| | | | | |
| Fuel (type & hours) | 100LL & Jet A - 24 hour - single point | 100LL | 100LL | Not an objective |
| Weekday hours of operation | Standard business hours, after hours on-call | Standard business hours, after hours on- call | On-call | Not an objective |
| Weekend hours of operation | Standard business hours, after hours on-call | Standard business hours, after hours on- call | On-call | Not an objective |
| Ground transportation | Courtesy car/car rental available | Courtesy car/car rental available | Not an objective | Not an objective |
| Food & Beverage | Vending | Vending | Not an objective | Not an objective |
| Posted contact info | Yes | Yes | Yes | Yes |
| Internet access | Yes | Yes | Not an objective | Not an objective |
| Restroom | Yes | Yes | Yes | Not an objective |
| Pilot area | Yes | Yes | Not an objective | Not an objective |
| Security | Security plan | Security plan | Security plan | Security plan |
| Snow removal | Timely snow removal | Timely snow removal | Snow removal | Not an objective |

| Flight training | Available | Available | Available | Not an objective |
| Aircraft maintenance/repair | Based | Based | Not an objective | Not an objective |
| Aircraft charter | Based | Available | Available | Not an objective |
| Weather reporting/flight planning capabilities | Yes | Yes | Not an objective | Not an objective |

Note: Targets highlighted in **RED** are requirements for role classification

1.5 System Forecasts, Trends, and Technology

During the past decade, aviation activity was impacted by economic conditions and events that were difficult to predict. Projections for the next twenty years indicate commercial airline enplanements, based aircraft, and operations are expected to experience slow growth. The 2010-2030 Federal Aviation Administration (FAA) Aerospace Forecast projects that the number of active aircraft throughout the planning period will increase at one percent (1.0%) annually, while the number of based aircraft in the state is projected to be slightly higher at 1.25 percent (1.25%). Aircraft operations are anticipated to increase at one-half of one percent annually.

Several anticipated trends and developing technologies will affect aviation in Iowa throughout the planning period. It is important the system is prepared to adapt to these changes to meet the short-and long-term needs of aviation users. Topics that could significantly impact aviation in Iowa include the implementation of the Next Generation Air Transportation System (NextGen), environmental sustainability, and future aircraft types.

1.6 System Plan Recommendations

Federal, state, and local airport sponsors all have a role in providing adequate infrastructure and services to support the demands of the air transportation system. Review of the system's performance and comments received from the public and the System Plan Technical Advisory Committee identified recommended improvements and initiatives. Recommendations address specific goals and general concepts for the system. A cooperative approach towards the implementation of plan

recommendations is necessary for the Iowa aviation system to meet the air transportation demands of the state. Continued management of essential programs and services by the Iowa Department of Transportation (Iowa DOT) Office of Aviation helps strengthen the safety and security of the state aviation system.

Airport sponsors own and operate the airports, having ultimate responsibility for daily and long term operations and maintenance. Recommendations in the *Iowa Aviation System Plan* provide a guide for airport sponsors to assess their role to ensure that Iowa has safe, quality facilities and services to meet the air transportation needs. Recommendations to enhance safety of the system include actively mitigating obstructions, developing and enforcing compatible land use controls, actively mitigating wildlife hazards, and developing emergency response plans. Airport sponsors are encouraged to engage their community leaders and stakeholders in developing a strategic plan to guide the future of the airport and its role in economic development. More specific recommended actions are detailed beginning on Page 13 of this report.

1.7 System Plan Summary

The lowa aviation system is an integrated network of users, aircraft, businesses, airports, technologies, and services that supports the economy and serves as a transportation resource for both the state and the nation. The lowa DOT, in conjunction with the FAA and individual owners and operators of each airport, continue to strive towards meeting system goals and objectives to maintain a safe, efficient, and effective aviation system. As airports respond to changing needs of aviation users and the communities they serve, it is important to consider both facilities and services identified in the targets established for airport roles.

Maintaining and developing the airports' infrastructure and services is critical to the continued health of lowa's economy and the quality of life for lowans. Through addressing needs identified in the recommendations, the *Iowa Aviation System Plan* will help ensure users of the aviation system are offered safe, quality facilities and services that support the air transportation demands of Iowa for the next twenty years.

Section Two – Individual Airport Overview

This section provides information specific to the Pocahontas Municipal Airport, including a brief history of the airport, forecasts of operations and based aircraft, performance measure recommendations, a summary of capital improvement projects, and an airport fact sheet.

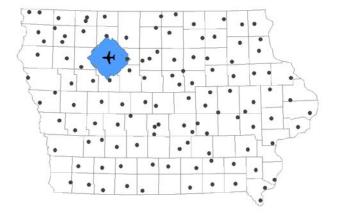

2.1 Airport Summary

The Pocahontas Municipal Airport is owned and operated by the City of Pocahontas. An airport commission, with members appointed by the city, was established to manage and operate the airport. The FAA recognizes the airport as playing a role in the national airport system and includes the airport in the National Plan of Integrated Airport Systems (NPIAS) as a general aviation airport, which makes the airport eligible for federal funding.

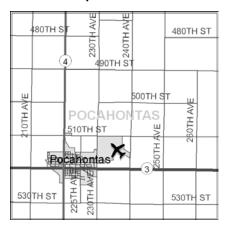

The *Iowa Aviation System Plan* identifies the Pocahontas Municipal Airport as a Basic Service airport. Basic Service airports have runways 3,000 feet or greater in length with facilities and services customized to meet local aviation needs. Specific airport information can be found in the Airport Fact Sheet located in the appendix of this report.

The Pocahontas Municipal Airport is located approximately one mile northeast of the City of Pocahontas. Access is provided from County Road C37.

30 Minute Drive Time

Airport Location

2.2 Airport Current Conditions & Facilities

A summary of general airport information, facilities, and services at the Pocahontas Municipal Airport is included in the Fact Sheet at the end of this report. Airport information in the Fact Sheet reflects updated information and may vary from the 2010 data used in the *lowa Aviation System Plan* technical report. The Pocahontas Municipal Airport has been classified as an Basic Service airport. This classification is relevant to specific facility and service targets as well as performance measures.

2.3 Airport Forecasts

Aviation demand projections for based aircraft and aircraft operations were prepared for each of the 117 public use airports in Iowa's aviation system. A number of different FAA forecasting techniques were utilized in the projection of aviation activity at each airport ranging from subjective judgment to mathematical modeling based on historical trends. Data obtained from airport managers, the Office of Aviation, the 2010-2030 FAA Aerospace Forecast, and the FAA Air Traffic Activity Data System (ATADS) also contributed to the projections developed for each airport.

Based aircraft projections were developed for each airport by multiplying a compound annual growth rate (CAGR) of 1.25 percent (1.25%) to the number of current (2010) based aircraft at each airport as reported by airport managers. Aircraft operations were projected by multiplying the forecasted number of based aircraft by an adopted Office of Aviation estimation guideline outlined in FAA Order 5090.3C, Field Formulation of the National Plan of Integrated Airport Systems (NPIAS). This is an acceptable procedure to forecast operations where limited or no historical data may be available, permitting a single methodology to be applied to all airports. Airports with 1 to 30 based aircraft forecasted were assigned 250 operations per aircraft, while airports with 31 to 99 based aircraft were assigned 350 operations per aircraft. Airports forecasted with 100 or more aircraft were assigned 450 operations per aircraft. The based aircraft and operations projections developed for Pocahontas Municipal Airport using the methodologies as described previously are presented in the following table.

Airport Forecasts

| Forecast Year | Based Aircraft | Operations |
|---------------|----------------|------------|
| 2010 | 22 | 5,500 |
| 2015 | 23 | 5,750 |
| 2020 | 25 | 6,250 |
| 2025 | 27 | 6,750 |
| 2030 | 28 | 7,000 |

<u>Sources</u>

Operations: FAA Order 5090.3C, FAA Aerospace Forecast 2010-2030, FAA ATADS

2.4 System Performance by Airport

Although progress has been made to achieve the goals and objectives, continuous improvements are necessary to provide Iowa with an air transportation system that supports the economy and quality of life demands. Pocahontas Municipal Airport has a role in meeting these goals by striving to meet the individual performance measures that are applicable to its current role as an Basic Service airport. Each airport plays a role in meeting the goals and objectives. Individual airports can assess their specific performance, to

determine what is appropriate to meet their needs, taking into account the recommendations from the system plan. It is understood that full implementation of some of the targets may not be feasible; however, it is important to identify goals and work to attain those that are reasonable.

2.4.a Recommendations to Support the System Plan Goals

Evaluation of how well the Pocahontas Municipal Airport is meeting the objectives identified areas that could be improved to achieve the system plan goals. Focusing future improvements to enhance facilities, services, and planning to meet the objectives, while maintaining existing performance in areas meeting or exceeding desired conditions, contributes to a vibrant aviation system. Recommendations included on Page 14 list actions the airport may consider to benefit users of aviation in lowa. In addition to specific recommendations to meet system goals and objectives, the *Iowa Aviation System Plan* recommends that airport sponsors and managers take the following actions to enhance a safe and effective operating environment:

- Reduce on-airport wildlife habitat and mitigate hazardous wildlife activity to limit potential safety concerns.
- Engage community leaders and stakeholders in developing a strategic plan to guide the development of the airport, coordinating with economic development interests.
- Develop a welcome image for visitors arriving by air and provide directional signage to the business community to ensure a connection.
- Actively work to protect runway approaches by developing or enforcing height and compatible land use zoning.

2.4.b Recommendations to Achieve the Facility and Service Targets

Facility and service targets identify levels of infrastructure and services that are desirable to effectively meet user needs. Though it may not be feasible to meet or exceed all targets, the airport is encouraged to develop and maintain facilities and services to levels defined for the Basic Service role. The tables presented on Page 15 and Page 16 identify what is recommended for the Pocahontas Municipal Airport to achieve each target.

Airport Recommendations to Support the Goals of the Iowa Aviation System

| Objective | Achieving Performance/Recommendation |
|--|--|
| Goal: Safety and Security | |
| Airport has clear approaches to primary runway. | NO - Mitigation is required to remove obstructions from primary runway approaches. |
| Airport has clear approaches to all runways. | NO - Mitigation is required to remove obstructions from all runway approaches. |
| Airport has an emergency response plan. | YES - Update airport emergency plan annually. |
| Airport develops and implements a security plan. | YES - Continue to update security plan annually. |
| Goal: Infrastructure and User Support | |
| Airport meets facility targets identified for its role. | YES - Continue to maintain and preserve facilities to meet or exceed targets by role. |
| Airport meets service targets identified for its role. | NO - Improve and continue to provide services that meet or exceed targets by role. |
| Primary runway maintained to PCI of 70 or higher. | YES - Continue to maintain primary runway to a PCI of 70 or higher. Primary runway PCI: 95 |
| Airport maintains overall PCI of 70 or higher. | YES - Continue to maintain all pavement surfaces to achieve an overall airport PCI rating of 70 or higher. Overall PCI Rating: 94 |
| All based aircraft stored in covered hangars. | YES - Continue to provide hangars for all based aircraft. |
| Goal: Economic Support | |
| Airport coordinates with local officials to include information in business promotional materials. | Establish cooperative relationships with local economic development offices, chambers of commerce, and city and county officials to include airport information in business promotional materials. |
| Goal: Planning | |
| Airport has a current master plan or ALP. | YES - Airport continually update Airport Layout Plan as needed. Last Airport Layout Plan update: 2006 |
| Airport is protected by local height zoning ordinances. | YES - Update height zoning ordinance as needed and monitor its enforcement. |
| Airport compatible land use is included in city/county comprehensive or land use plans. | NO - Coordinate with city and county officials to address compatible land use in a comprehensive or land use plan. Review and update land uses as needed with each plan update. |
| Goal: Education and Outreach | |
| Airport has a regular communication program. | YES - Continue to regularly communicate airport news and events through newsletters, press releases, web sites, and social media. |
| Airport has based rental aircraft and availability of flight instruction. | YES - Continue to offer based rental aircraft and the availability of flight instruction. |
| Airport hosts pilot safety programs. | NO - Coordinate with the FAA, industry associations, and other aviation organizations to host pilot safety programs. |
| Airport hosts annual aviation events, additional types of public events, and organized youth educational activities. | Increase efforts to host annual aviation events such as fly-ins and air shows, additional types of public events such as open houses, tours, conferences, and meetings, and organized youth educational activities such as aviation camps, Young Eagles programs, and internships. |

Airside and Landside Facility Target Needs

| Target Description | Existing | Condition | Target | Recommendation | | |
|--|------------|--------------|------------------------|---|--|--|
| Airside Facilities | | | | | | |
| Airport Reference Code | B-I | | B-I or Below | Maintain airfield to at least B-I or below design standards | | |
| Primary Runway Length | 4,1 | 00 ft | 3,000 ft | Maintain runway length to at least 3,000 ft | | |
| Primary Runway Width | 60 |) ft | Minimum 60 ft | Maintain 60 ft runway width | | |
| Type of Parallel Taxiway | Conr | nector | Exits as needed | Maintain exit taxiways as needed | | |
| Type of Runway Approach | Non-P | recision | Visual | Maintain at least a visual approach | | |
| Runway Lighting | M | IRL | LIRL | Maintain at least LIRL runway lighting | | |
| Taxiway Lighting | M | ITL | Not an objective | n/a | | |
| Visual Guidance Slope Indicator | Rwy 11 | Rwy 29 | Not an objective | n/a | | |
| Visual Guidance Stope Mulcator | PAPI | VASI | Not all objective | 11/4 | | |
| Runway End Identifier Lights (as required) | Yes Yes | | Not an objective | n/a | | |
| Rotating Beacon | Yes | | Yes | Maintain rotating beacon | | |
| Lighted Wind Indicator | Yes | | If open for night | Maintain lighted wind indicator | | |
| RCO Facilities | no | one | Not an objective | n/a | | |
| Wind coverage or crosswind runway | Crosswir | id runway | Not an objective | n/a | | |
| | | Landsid | le Facilities | | | |
| Covered storage for based aircraft | 100% of ba | sed aircraft | 100% of based aircraft | Continue to provide storage for all based aircraft | | |
| Overnight storage for business aircraft | No | | Not an objective | n/a | | |
| Aircraft apron | 100% of | faverage | 50% of average | Maintain apron size to park at least | | |
| All Craft aprofi | daily tr | ansients | daily transients | 50% of average daily transients | | |
| Terminal/administration building | Attached | to hangar | Waiting area | Maintain at least a waiting area | | |
| Paved entry/terminal parking | Entry & | parking | Not an objective | n/a | | |

Service Target Needs

| Target Description | Existing Condition | Target | Recommendation | | |
|--|--|------------------|---|--|--|
| Services | | | | | |
| Fuel (type & hours) | Type: 100LL 24 hour availability: Yes | 100LL | Continue to provide at least 100LL fuel | | |
| Weekday hours of operation | none | On-call | Provide at least on-call staffing | | |
| Weekend hours of operation | none | On-call | Provide at least on-call staffing | | |
| Ground Transportation | Courtesy car | Not an objective | n/a | | |
| Food & Beverage | Yes | Not an objective | n/a | | |
| Posted contact info | Yes | Yes | Continue to post and update after hours contact information | | |
| Internet access | Computer & wireless | Not an objective | n/a | | |
| Restroom | Number of restrooms: 2 | Yes | Continue to provide restrooms | | |
| Pilot area | Yes | Not an objective | n/a | | |
| Security plan | Yes | Security plan | Continue to maintain and update security plan annually | | |
| Snow removal | Plowing | Snow Removal | Continue to provide snow removal | | |
| Rental aircraft | Available | Not an objective | n/a | | |
| Flight training | Based | Available | Continue to provide flight training | | |
| Aircraft maintenance/repair | none | Not an objective | n/a | | |
| Aircraft charter | none | Available | Provide a method to charter aircraft | | |
| Weather reporting/ flight planning capabilities | Yes | Not an objective | n/a | | |

2.5 Potential Projects

Although significant investment has been made to improve the overall condition of system infrastructure, it is important to continue to preserve and develop infrastructure to meet the needs of aviation users. In addition to needed facility and service target improvements, specific airport needs identified on Capital Improvement Plans (CIPs) and Long Range Needs Assessments (LRNAs) were evaluated to project the anticipated level of investment that will be required by airports throughout the twenty year planning period.

To determine the anticipated level of investment needed at the Pocahontas Municipal Airport, the following resources were referenced:

- Cost estimates for airports to achieve 100% of the system plan facility targets.
- 2011-2016 Airport Capital Improvement Program (CIP) plans.
- Airport Long Range Needs Assessments (LRNA).
- Cost estimates to meet the system plan Airport Layout Plan objective, focusing on the development and continual update of electronic ALPs (e-ALPs).
- Cost estimates to maintain pavement condition index at 70 using pavement rehabilitation projects identified in the Iowa Statewide 2010 Pavement Management Report.
- Because of the wide variation in methods to mitigate runway approach obstructions, separate
 costs were not identified to address the clear approach objective. These costs are included in
 many of the airport CIP and LRNA, and will be identified through specific annual initiatives.

A summary of funding needed to address development needs and other potential projects at the Pocahontas Municipal Airport is presented on Page 18.

2011-2030 Potential Projects

| Project Description | Funding Needed |
|---|----------------|
| Replace airport lighting | \$245,000 |
| Improve drainage on turf runway | \$120,000 |
| Widen Runway 11/29 | \$850,000 |
| Acquire land and close a portion of 240th Ave for runway extension | \$962,000 |
| Install Automated Weather Observing System (AWOS) III-P (Present Weather Identification Sensor) | \$250,000 |
| Construct parallel taxiway - phase 1 | \$720,800 |
| Runway rehabilitation | \$100,000 |
| Construct parallel taxiway - phase 2 | \$2,625,000 |
| Construct hangar | \$500,000 |
| TOTAL | \$6,372,800 |

Pocahontas Municipal Airport

Fact Sheet

| General Information | Based Aircraft |
|---|-------------------|
| Airport name: Pocahontas Municipal Airport | Single engine: 20 |
| Associated city: Pocahontas | Multi engine: 1 |
| FAA identifier: POH | Jets: 0 |
| Iowa Aviation System Plan Role: Basic Service | Military: 0 |
| Manager: Gary Mc Cartan | Helicopters: 1 |
| Phone: 712-335-4677 | Ultralights: 0 |
| Latitude: 42° 44′ 34″ N | TOTAL: 22 |
| Longitude: 94° 38′ 50″ W | |
| | |

| Airside Facilities | Landside Facilities |
|-----------------------------------|---|
| Type of taxiway system: Connector | Apron aircraft tie-down locations: 5 |
| Taxiway lighting: MITL | Total hangar parking spaces: 26 |
| Rotating beacon: Yes | Overnight storage for itinerant aircraft: No |
| Weather reporting equipment: none | Type of terminal/admin building: Attached to hangar |
| Lighted wind indicator: Yes | Paved surfaces: Entry & parking |

Remote Communication Outlet (RCO): none

Elevation: 1,226 ft

| Runway Information | | | | | |
|--------------------|----------|--------|-----|------------|-----------------|
| Runway | Length | Width | ARC | PCI rating | Lighting System |
| 11/29 | 4,100 ft | 60 ft | B-I | 95 | MIRL |
| 18/36 | 2,500 ft | 135 ft | A-I | turf | none |
| | | | | | |

| Runway App | proach Information | | | | |
|------------|-----------------------|---------------------|----------------|------|------|

Pocahontas Municipal Airport

Fact Sheet

| Planning | Fueling Capabilities |
|---|--------------------------------|
| Security plan: Yes | Fuel types: 100LL |
| Emergency response plan: Yes | 24 hour fueling available: Yes |
| Last Airport Layout Plan update: 2006 | |
| Local height zoning: Yes | |
| Inclusion in local comprehensive plan: No | |

Staffing

Weekday hours of personnel: none Weekend hours of personnel: none

Posted after hours contact information: Yes

Services & Programs

Aircraft maintenance & repair: none

Flight instruction: Based

Snow removal: Plowing

Aircraft charter: none

Rental aircraft: Available

Internet: Computer & wireless

Food & beverage: Yes Restrooms: 2

Pilot area: Yes

Type of ground transportation: Courtesy car

Regular communication program: City of Pocahontas website includes airport

Pilot safety program: none
