

Cyclospora Update

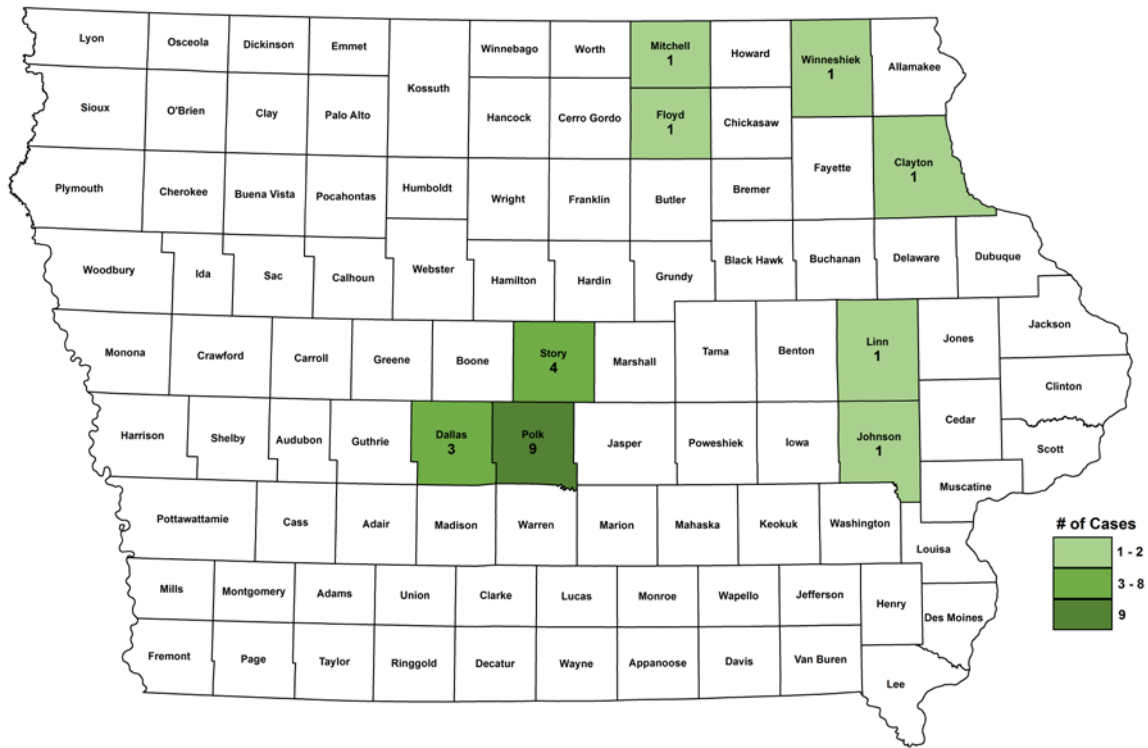

All data presented in this report are provisional and may change as additional reports are received

Published June 13, 2018

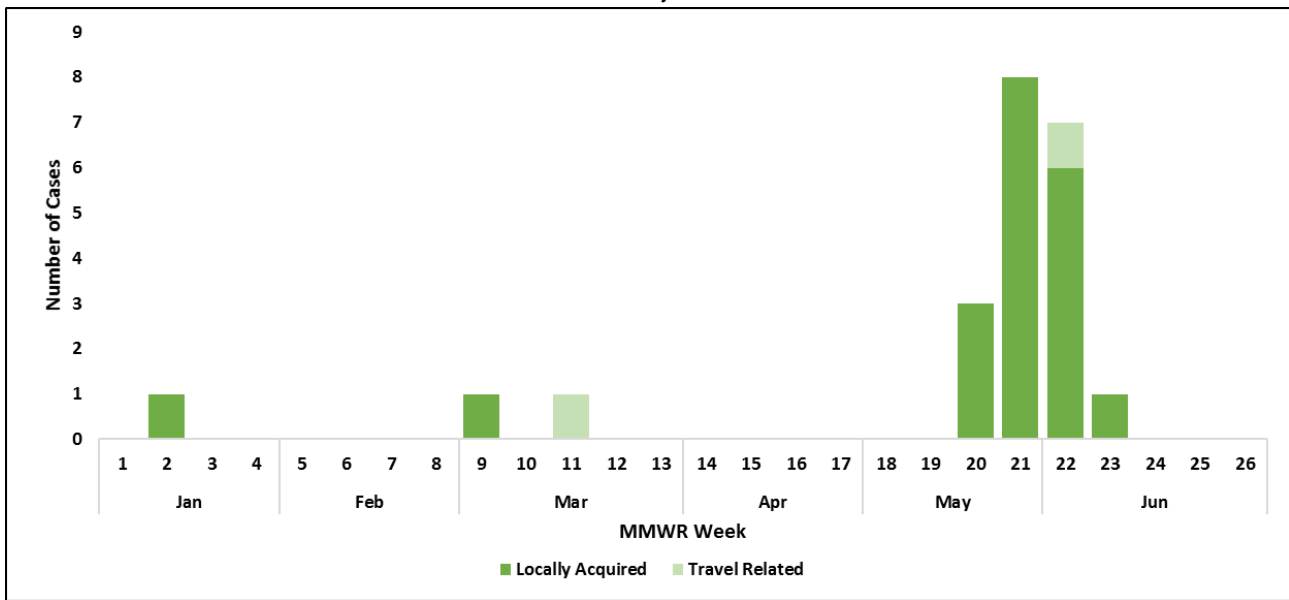

The Iowa Department of Public Health, in collaboration with local public health partners, the Iowa Department of Inspections and Appeals, and the State Hygienic Lab, is investigating an increasing number of *Cyclospora* infections. Since the beginning of the year, 22 *Cyclospora* infections have been reported in nine Iowa counties. Three of the cases in northeast Iowa are associated with an [outbreak](#) also impacting Wisconsin and Minnesota (associated with vegetable trays sold at Kwik Trip, Kwik Star and Tobacco Outlet stores).

Laboratory confirmed cyclospora cases by county of residence, January 1 – June 13, 2018

Laboratory confirmed cyclospora cases by week of symptoms onset (n =21)*, January 1 – June 13, 2018

*Onset of illness is unknown for one case

This graph illustrates the date illness began. Note: 18 of the 22 illnesses have begun since mid-May.
