

I-SMART DATA ENTRY GUIDE – UPDATE (March 2020)

Effective March 1, 2020

Please note the **update** made to the following section in the *May 2015 I-SMART Data Entry Guide*.

Ancillary Services: The reporting of Ancillary Services is only required for IPN funded Women and Children’s programs. NOT required for any other providers. On the third page of the Encounter Note, select the ancillary services, that are provided as part of the treatment to a woman and/or her dependent children enrolled in a IPN Women and Children’s program. Licensed programs that are not funded Women and Children providers **may use “Telehealth” as applicable otherwise** will report “None” on each Encounter.

- None
- Child Care: Child care is provided for children while their mother and/or father is receiving substance abuse treatment.
- Case Management
- Sexual/Physical Abuse: Intended to provide counseling specific to sexual/physical abuse.
- Transportation: Services intended to assist substance abuse clients to access treatment services when it is indispensable to allow a client to receive a less intensive level of care as part of an active treatment plan or when necessary to transport a client who is receiving emergency substance abuse treatment from a non-network provider to a network provider and in such cases where the eligible person is receiving emergency substance abuse treatment outside the state of Iowa.
- Primary Medical Care: Prenatal, Postpartum, Pediatric, and Child Immunizations.
- Therapeutic Interventions for Children: Child Development Assessments
- Telehealth: Provision of a treatment services via technology.
