TRUSTEES' REPORT.

To the Honorable, the General Assembly of the State of Iowa:

The undersigned, Trustees of the Iowa College for the Blind, respectfully submit the following report for the biennial period ending June 30, 1887:

The term covered by this report has been one of marked prosperity. The attendance has been larger than ever before in the history of the College. The school has been well organized with a full corps of competent officers and teachers. The pupils in the different departments have made commendable progress during the past two years.

The buildings and grounds have received proper care, and are now in good condition, with the exception of the slate roof on the College building.

The special appropriations made by the Twenty-first General Assembly have been expended in making improvements as follows:

The old wooden stairs in the main building and south wing have been replaced with good substantial iron stairs, at a cost of \$2,515.00. The appropriation of \$775.00 for new floors has all been expended for that purpose. One large cistern, capacity 950 barrels, has been constructed at a cost of \$418.60. Painting and Portland cement work is now in progress.

The Board, after fully considering the necessities of the College, purchased and had put in place a new boiler, and paid for the same out of the contingent fund.

To meet the requirements of the College for the next biennial period, we respectfully ask for the following appropriations: For contingent and general repairs, \$3,000.00. For bedding, furniture and carpets, \$2,000.00. For addition to library and school apparatus, \$1,000.00. For washing machine, \$500.00. For new slate roof, gal-

vanized iron cornice, gutters, etc, \$9,834.80. For new front porch, stone steps, and foundation for same, \$852.00. For painting, \$1,100.

The official reports of the officers are herewith submitted, to which your attention is invited, as showing in detail the educational and financial condition of the College.

REPORT OF THE PRINCIPAL.

To his Excellency, WILLIAM LARRABEE, Governor of Iowa:

SIR—I have the honor to submit a report of the progress and condition of this Institution during the biennial period commencing July 1, 1885, and ending June 30, 1887.

DUAL GOVERNMENT.

Two persons, the Principal, \$1,200 per annum, and the Secretary of the Board, \$1,200 per annum, direct the administration. Each one receives his authority from the Trustees, and is responsible to them alone.

To the Principal is intrusted five powers:

1. Entire control and care of the pupils.
2. Control of library, musical and industrial departments.
3. Control of all libraries, school apparatus and musical instruments.
4. Control, except as to repairs, of the college building and its appointments.
5. Control of matron, or housekeeper, teachers, instructors, and all employes whose duties are confined to the college building or laundry.

To the Secretary is intrusted the care of buildings, grounds, stock, and improvements belonging to the College; charge of outside employes; purchase of all material and supplies ordered by the Board; the disposal of all material and stock which the Institution may have to sell; in general, of all matters not included in the powers of the Principal.

The Principal's force consists of—

- 1 Assistant, \$45 per month for ten months.
- 1 1st lady teacher, \$35 per month for ten months.
- 1 5th and 6th grade teacher, \$30 per month for ten months.
- 1 3d and 4th grade teacher, \$30 per month for ten months.
- 1 1st and 2d grade teacher, \$35 per month for ten months.
- 1 mathematic teacher, \$70 per month for ten months. (Lives out of College.)

- 1 musical director, \$1,200 per annum. (Lives out of College.)
- 1 2d music teacher, \$25 per month for ten months.
- 1 3d music teacher, \$15 per month for ten months.
- 1 broom instructor, \$350 per annum.
- 1 general work instructor, \$200 per annum.
- 1 sewing instructor, \$20 per month for ten months.
- 1 housekeeper, \$300 per annum.
- 1 boys' nurse, \$20 per month for ten months.
- 1 girls' nurse, \$20 per month for ten months.
- 1 cook, \$20 per month for ten months.
- 1 2d cook, \$18 per month for ten months.
- 1 3d cook, \$12 per month for ten months.
- 1 1st laundry girl, \$18 per month for ten months.
- 1 2d laundry girl, \$15 per month for ten months.
- 1 3d laundry girl, \$15 per month for ten months.
- 1 chambermaid, north wing, \$12 per month for ten months.
- 1 chambermaid, south wing, \$12 per month for ten months.
- 1 chambermaid, main building, \$12 per month for ten months.
- 1 1st dining room girl, \$12 per month for ten months.
- 1 2d dining room girl, \$12 per month for ten months.
- 1 3d dining room girl, \$12 per month for ten months.
- 1 general help, \$12 per month for ten months.
- 1 visitors' attendant, \$12 per month for ten months.
- 1 kitchen work, \$5 per month for twelve months.

The Secretary's force consists of—

- 1 assistant steward, \$45 per month for twelve months (meals).
- 1 engineer, \$70 per month for twelve months (meals).
- 1 night watch, \$40 per month for twelve months (lives out of College).
- 1 porter, \$20 per month for twelve months.

This system was adopted by the Board June 16, 1882. It has the approval—I believe—of all persons interested. It is eminently satisfactory to the Secretary and myself.

Public institutions, generally, are controlled by superintendents who administer the affairs of their respective establishments through heads of different departments. The chief merit of such a plan is strong centralization. It is attended, however, with the dangers that accompany strong centralization of power everywhere.

In some institutions the superintendent and steward have co-ordinate rights in the household, and are responsible to the same authority. This system is wholly bad. A father cannot govern his family prudently unless his power reaches every member. The relation of superintendent to institution is, first of all, parental.

The form of government peculiar to this Institution would avoid the tendency to absolutism of the first method, and to anarchy of the second. There need be no conflict of authority. The two spheres are separate and distinct.

HOUSEHOLD.

The principal's assistant teaches four hours a day; receives and entertains all Institution guests; sees that indigent female pupils are properly clothed; attends to morals, manners, general deportment, welfare of the girls.

The housekeeper is responsible for the condition of the building as to cleanliness; the care of furniture, beds, carpets, and all house-keeping property. She employs and supervises three chambermaids, three dining room girls, three kitchen girls, three laundry girls, one general help, and one water carrier, or "kitchen work." She draws her supplies from the secretary, and, in all ordinary matters, deals directly with him.

The girls' nurse has charge of all pupils assigned to her nursery. She attends to their clothing, habits, morals, etc. She is to fill the place of the mothers at home. She has charge of the girls' sick room, and is responsible for the care and treatment of all persons confined therein.

The boys' nurse has charge of all pupils assigned to her nursery; the general supervision of boys too old for nursery care, yet too young for entire self responsibility. Her duties, with reference to these two classes, are similar to those of the girls' nurse. She has charge of the boys' sick room, the clothing of all male pupils, and, in a degree, is responsible for the good order of her wing.

The visitors' attendant, in addition to the duties usually required of such a person, attends to the mending of certain clothes.

Each of the five persons mentioned is responsible to the principal alone.

FAMILY REGULATIONS.

Each student, unless excused, is required to attend church once a week.

The bell tolls five minutes before each meal. Every student must be in his place at table before grace bell.

The housekeeper details a waiter for the principal's table, and one

for the teachers' table. These girls, except on rare occasions, remain at their posts one-half hour.

The quiet bell rings at 9:15 o'clock p. m. All students must be in their rooms at that time. The rule of silence applies to every one in the building.

Ten minutes before each meal, the wash-room bell rings. The nurses go to their respective places and meet their respective charges. It is expected that every student will be provided with tooth brush, comb, blacking, etc. Every pupil under care of a nurse must have and use these articles.

The fire alarm is rung several times during the term. At that signal, each student, if possible, walks out at the main entrance. If all are out within three minutes, the remainder of the day is spent in amusements.

To each student is assigned one half hour of Saturday for bathing. Two teachers see that this duty is performed.

The girls are required to take care of their own rooms.

The Institution is open to the public at all reasonable hours. An admission fee of ten cents is charged. Visitors, whether to officers, teachers, students, or employes, desiring to remain longer than one day, are charged ordinary hotel rates. The latter rule is not enforced during the first week, Christmas week, and the closing week of the term.

LIVING.

As a protection to the secretary and myself the trustees have drafted a dietary for the students. This is observed as closely as possible. I feel safe in saying that it is strictly observed eight days out of ten. When a parent writes that his child finds fault with the College boarding, we send him a bill of fare. That silences all complaint. The food is well cooked and well served. The principal and housekeeper are present at every meal. A copy of the dietary may not be out of place.

MONDAY.

Breakfast—Meat, bread, butter, coffee, one vegetable.
Dinner—Meat, bread, butter, corn bread, one vegetable.
Supper—Bread, butter, rice, dried beef, tea.

TUESDAY.

Breakfast—Meat, warm bread, butter, coffee.
Dinner—Meat, bread, butter, two vegetables, desert.
Supper—Bread, butter, sauce, ginger bread, tea.

WEDNESDAY.

Breakfast—Hash, pancakes, bread, butter, coffee.
Dinner—Meat or fowl, bread, butter, pickles, two vegetables, desert.
Supper—Bread, butter, tea, sauce or custard, cakes.

THURSDAY.

Breakfast—Meat, bread, butter, coffee, one vegetable.
Dinner—Meat, bread, butter, two vegetables, desert.
Supper—Bread, butter, sauce, one vegetable, cold meat, tea.

FRIDAY.

Breakfast—Meat pie, fried cakes, bread, butter, coffee.
Dinner—Meat or fish, one vegetable, bread, butter.
Supper—Bread, butter, ginger snaps, sauce, tea.

SATURDAY.

Breakfast—Meat, one vegetable, bread, butter, coffee.
Dinner—Soup, meat, bread, butter, one vegetable.
Supper—Bread, butter, sauce, tea.

SUNDAY.

Breakfast—Meat, buns, one vegetable, bread, butter, coffee.
Dinner—Meat, pickles, two vegetables, bread, butter, desert.
Supper—Bread, butter, tea, sauce, cake.

A strict account of all losses, breakages, etc., is kept. To illustrate—during the last year, ending June 30, 1887, there were broken or otherwise destroyed: 93 lamp chimneys, 4 shades, 18 saucers, 41 cups, 12 plates, 3 soup plates, 2 butter dishes, 4 vegetable dishes, 2 bowls, 2 pails, 8 crocks, 6 pitchers, 12 fruit jars, 17 glasses, 4 knives, 4 meat pans, 2 meat dishes, 2 lamps. This covers the list with perhaps the exception of some articles not worth attention. The housekeeper's book shows each loss, with the name of the person causing the loss.

Each bedstead, three or four excepted, has a wire bottom. Each bed has a good wool or husk mattress, clean linen once a week, and an unlimited supply of clothing.

The sewing teacher has charge of all linen and bedding not in use. During the last year, ending June 30, 1887, the housekeeper drew from her, 567 pillow cases, 533 sheets, 606 towels, 259 blankets, 207 spreads, 239 pillows, 97 roller towels, 243 comforts, 167 mats. She returned to the sewing room, 450 pillow cases, 473 sheets, 436 towels, 170 blankets, 203 spreads, 230 pillows, 76 roller towels, 161 mats, 154 comforts; making our loss during the year, 117 pillow cases, 60 sheets, 170 towels, 4 spreads, 9 pillows, 21 roller towels, 89 comforts, 89 blankets, 6 mats.

A few of these articles were mischievously destroyed, some belonging to the sick-rooms were burned, some were unaccountably lost; nearly all, however, having been in use several terms, were worn out within the year.

Our inventory at the close of this biennial period shows on hand and in the care of the sewing room, 508 pillow cases, 524 sheets, 584 towels, 342 blankets, 265 spreads, 276 pillows, 82 roller towels, 238 comforts, 161 mats.

HEALTH.

Two nurses attend the sick. The knowledge and skill of the physician employed are beyond question. His advice is sought in all sanitary matters, and his directions are carefully carried out.

But two deaths have occurred in the Institution in five years. Cora Albright, of Vinton, a bright and promising girl, died of diphtheria, April 27, 1887.

POPULATION.

A biennial period embraces two school terms, each one beginning on the first Wednesday in September and ending on the second or third Wednesday in June next, when the pupils return to their homes for rest and recreation. The trustees have discretionary power, but as a rule they admit only those of suitable school age and of satisfactory mental and physical conditions. At the close, June 9, 1886, of the term commencing September 2, 1885,

The number of male pupils enrolled was..... 79

The number of female pupils enrolled was..... 91

The whole number of pupils instructed during the term.. 170

At the close, June 8, 1887, of the term commencing September 1, 1886,

The number of male pupils enrolled was..... 76

The number of female pupils enrolled was..... 111

The whole number of pupils instructed during the term.. 187

As will be seen, the greatest number of pupils enrolled within the two school terms embraced in this report was 187. During the first term of this period,

The number of male pupils admitted was..... 17

The number of female pupils admitted was..... 27

The whole number of pupils admitted was..... 44

During the second term of this period,

The number of male pupils admitted was..... 12

The number of female pupils admitted was..... 28

The whole number of pupils admitted was..... 40

The whole number of pupils admitted during the period embraced in this report was eighty-four.

THE SCHOOLS.

LITERARY.

This institution was established that the citizens of the State might have for their children advantages similar to those afforded by the public schools. Keeping this fact in mind, we reduce as much as possible the difference between this school and schools for the sighted.

The course of study covers twelve years; four primary, four grammar school, and four academical or high school.

OUTLINE OF STUDIES—ARITHMETIC.

Topic 1—Objective. *Six objects.*

Object—To cultivate perception, memory, language.

Points—1. Count six objects.

2. By adding, form groups of two, three, four, five, six.
3. Reverse operations, forming groups of five, four, three, two, one.
4. Give number name of each group, one, two, three, four, five, six.
5. Vary combinations and separation of groups.
6. Memorize all operations.
7. Application of suitable problems.
8. How many one things will make a group of two things, of three, of four, of five, of six?
9. How many groups of twos will make a group of four of six?
10. How many groups threes will make a group of six?
11. Reverse operations.
12. Memorize all operations.
13. Application of suitable problems, introducing, money, weights, measures, *rapid work*.
14. Give fractional name and relation of single things and of groups.

Materials—Use buttons, sticks, spools, or any convenient objects.

Time—One semester.

Topic 2—Objective. *Ten objects.*

Object—To cultivate perception, memory, language.

Points—Similar to those in Topic 1.

Materials—Same as in Topic 1.

Time—One semester.

Topic 3—Objective. *Twenty objects.*

Object—To cultivate conception, memory, reason.

Points—Similar to those in Topic 1.

Materials—Same as in Topic 1—numeral frames.

Time—One semester.

Topic 4—Objective. *Thirty objects.*

Object—To cultivate conception, memory, reason.

Points—Similar to those in Topic 1.

Materials—Same as in Topic 1.

Time—One semester.

Topic 5—Objective and Abstract.

Numbers and results limited to 50.

Points—1. Notation and numeration—two orders.

2. Write on decimal board all numbers from 0 to 10.

3. Write on number slate all numbers from 0 to 10.

4. Constant alternation from board to slate.

5. Write on decimal board all numbers from 10 to 50.

6. Write on number slate all numbers from 10 to 50.

7. Constant alternation from board to slate.

8. Varied exercise in writing numbers.

9. Fundamental operations with 1 on decimal board.

a Add 1 to all numbers from 0 to 49.

b Multiply 1 by all numbers from 0 to 50.

c Subtract 1 from all numbers to 50.

d Divide all numbers to 50 by 1.

10. Same operations repeated on number slate.

11. Same operations repeated mentally—carrying and borrowing.

12. Fundamental operations with 2 on decimal board.

a Add 2 to all numbers from 0 to 48.

b Multiply all numbers from 0 to 25 by 2.

c Subtract 2 from all numbers to 50.

d Divide all numbers to 50 by 2.

13. Same operations repeated on number slate.

14. Same operations repeated mentally.

15. Similar operations with 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, etc.

16. Applied problems within limit, introducing money, weights, measures—*rapid work*.

17. All multiplications memorized to a result of 50.

18. Fractional names and relations of combinative groups.

Materials—Number slates. (*Substitutes for the slates used by the sighted*)

Number boards. (*Substitutes for the blackboards used by the sighted. It is specially adapted for those pupils whose sense of touch is not acute*)

Decimal boards. (*A device to illustrate the decimal system.*)

Time—One semester.

Topic 6—Objective and abstract—*Three orders.*

Numbers and results limited to 100.

Points—Similar to those in Topic 5.

Materials—Same as in Topic 5.

Time—One semester.

Topic 7—Objective and abstract—*Four orders.*

Numbers and results limited to 9,000.

Points—Similar to those in Topic 5.

Materials—Same as in Topic 5.

Time—One semester.

Topic 8—Three Periods.

Points—1. Number slate work in addition, subtraction, multiplication and division.

2. Mental work in suitable problems introducing money, weight and measure.

3. Memorize all multiplications to a result of 100.

4. Review all previous topics.

Materials—Number slates and number board.

Time—One semester.

Topic 9—Fractions—*Objective.*

Points—1. Fold paper once and cut in two, $\frac{1}{2}$ =whole.

2. Fold each $\frac{1}{2}$ once, $\frac{1}{4}$ =whole.

3. Fold each $\frac{1}{4}$ once, $\frac{1}{8}$ =whole.

4. Fold each $\frac{1}{8}$ once, $\frac{1}{16}$ =whole.

5. Fold each $\frac{1}{16}$ once, $\frac{1}{32}$ =whole.

6. Fold each $\frac{1}{32}$ once, $\frac{1}{64}$ =whole.

7. Fold paper twice making three equal divisions, $\frac{1}{3}$ =whole.

8. Fold each $\frac{1}{3}$ once, $\frac{1}{9}$ =whole.

9. Fold each $\frac{1}{9}$ once, $\frac{1}{27}$ =whole.

10. Fold each $\frac{1}{27}$ once, $\frac{1}{81}$ =whole.

11. Fold each $\frac{1}{81}$ once, $\frac{1}{243}$ =whole.

12. $\frac{1}{2}=\frac{2}{4}=\frac{4}{8}=\frac{8}{16}=\frac{16}{32}=\frac{32}{64}=\frac{64}{128}=\frac{128}{256}=\frac{256}{512}=\frac{512}{1024}=1$.

13. Deduce principle.

14. Fold $\frac{1}{2}$ once, $\frac{1}{2}=\frac{2}{4}$.

15. Fold each of $\frac{2}{4}$ once, $\frac{2}{4}=\frac{4}{8}$.

16. Fold each of $\frac{4}{8}$ once, $\frac{4}{8}=\frac{8}{16}$.

17. Fold $\frac{1}{2}$ once, $\frac{1}{2}=\frac{2}{4}$.

18. Fold each of $\frac{2}{4}$ once, $\frac{2}{4}=\frac{4}{8}$.

19. Vary objective exercises in reduction.

20. Deduce principle, formulate rule.

21. Constant mental drill.

22. Take one paper and half of another, $1\frac{1}{2}=\frac{3}{2}=1\frac{1}{2}$.

23. Take two papers, $\frac{1}{2}+2=\frac{5}{2}$.

24. Vary objective and mental exercises.

25. Deduce principle of improper fractions—formulate rule.

26. Take $\frac{1}{2}$ and $\frac{1}{4}$ of paper. Fold $\frac{1}{2}$ once, $\frac{1}{2}+\frac{1}{4}=\frac{3}{4}$; $\frac{3}{4}-\frac{1}{4}=\frac{2}{4}=\frac{1}{2}$.

27. Take $\frac{1}{2}$ and $\frac{1}{4}$ of paper. Fold $\frac{1}{2}$ twice, making $\frac{3}{4}$, and $\frac{1}{4}$ once, making $\frac{3}{4}$; $\frac{3}{4}+\frac{1}{4}=\frac{4}{4}=\frac{1}{1}$; $\frac{3}{4}-\frac{1}{4}=\frac{2}{4}=\frac{1}{2}$.

28. Vary objective and mental exercises.

29. Deduce principle and formulate rule for finding the common denominator, and for addition and subtraction.

30. Fold $\frac{1}{2}$; $\frac{1}{2}$ of $\frac{1}{2}=\frac{1}{4}$. Fold $\frac{1}{4}$; $\frac{1}{4}$ of $\frac{1}{4}=\frac{1}{16}$. Fold $\frac{1}{16}$; $\frac{1}{16}$ of $\frac{1}{16}=\frac{1}{256}$.

31. Develop multiplication, formulate rule.

32. Fold paper once. How many $\frac{1}{8}$ s in 1, in 2, in 4, etc., $1+\frac{1}{8}=2$; $2+\frac{1}{8}=4$; $4+\frac{1}{8}=8$, etc.

33. Fold $\frac{1}{2}$ once. How many $\frac{1}{8}$ s in $\frac{1}{2}$? $\frac{1}{2}+\frac{1}{8}=2$.

34. Develop division, formulate rule.

35. Vary objective and mental exercises.

36. Introduce money, weights, measures. *Rapid work.*

Materials—A sufficient quantity of coarse, heavy papers, each paper twelve inches square and notched every three inches. Each student provided with a paper knife.

Time—One semester.

Topic 10—Fractions.—*Mental work.*

Addition, subtraction, multiplication, division, decimals.

Time—One semester.

Topic 11—Compound numbers.—*Objective.*

Points—1. Dry measure.

a Reduce objectively $\frac{1}{2}$ bu. to pints.

b Reduce objectively 32 pints to $\frac{1}{2}$ bu.

c Reduce objectively $\frac{1}{2}$ bu. to qts., to pints.

d Reverse operations.

e Vary objective and mental exercises.

f Construct and memorize table.

2. Liquid measure.

a Reduce objectively 1 gal. to gills.

b Reduce objectively 32 gills to 1 gal.

c Reduce objectively 1 gal. to qts., to pints.

d Reverse operations.

e Vary objective and mental exercises.

f Construct and memorize table.

3. Long measure.

a Count number of inches in a foot.

b Count number of feet in a yard.

c Measure desks, table, floors, chairs, etc., etc.

- d* Vary objective and mental exercises in reducing yards to feet and inches, feet and inches to yards.
- e* Mental exercises involving rods, miles.
- f* Construct and memorize table.
4. Square measure.
- a* Count number of grooved inch squares in a board 2 in. square.
- b* Count number of grooved inch squares in a board 3 in. square.
- c* Count number of grooved inch squares in a board 4 in. square.
- d* Count number of grooved inches in a board 5 in. square, 6 in., 7 in., 8 in., 9 in., 10 in., 11 in., 12 in. square.
- e* Deduce principle.
- f* Let each grooved inch represent a sq. ft., a sq. yd., a sq. rd., an acre, a sq. mi.
- g* Vary mental and objective exercises.
- h* Construct and memorize table.
5. Solid measure.

Our library of books in common print comprises thirteen hundred volumes. The library of books in raised print and point, comprises sixteen hundred and sixty volumes. In addition, the Institution receives regularly, Harpers' Magazine, St. Nicholas, Youth's Companion, Kruasses' Magazine, and the Des Moines Daily Register.

During this period one hundred and twenty-four raised print and point books have been freely distributed among the blind of the State. For several months previous to June 30, 1887, the Institution has sent every week sixty copies of the Sunday School Weekly in raised print and point, the gift of a religious society, to blind residents of the State.

The School is well supplied with apparatus. Our tables for writing the New York Point or Wait system, are made in the Institution, with machinery invented and constructed by the Secretary. I believe these tables to be the most complete and durable that have yet been manufactured in the United States.

Every pupil, unless drafted for tutor work, or otherwise excused, is required to spend one hour a day in some manual employment. The three branches of education, literary, musical and manual, are pursued together, each one occupying its proper proportion of time. But the training of the intellect is deemed of the first importance. The literary school is the base, entwined around it are the other two.

The blind person should be taught to use his brains. He should be well grounded in the principles of knowledge. He should be well read, especially in the field of history, biography and science. He will then be better able to adapt himself to surrounding circumstances, to contrive, to plan, to control, for his own advantage, forces, which otherwise, he could not reach. The educated mechanic may not be the most skillful workman, but he will certainly be, in an equality of conditions, the best manager of a business.

Of the trades accessible to the blind of this State, broom-making should rank first. It is easily learned, the machinery is simple, the workman is under shelter. I cannot see why a blind man of good health, good character, fair ability, and thorough qualification, should not make a living at this business, in any community. Such a man will always be able to secure favors from friends. Those lack-

ing tact, business qualities, or the physical essentials, should be admitted to industrial homes.

In the general work division, the trades, carpet weaving, case-sewing, mattress making, hammock and fly net work, are taught. The object here is to cultivate a spirit of industry. No one of these occupations, nor indeed all of them, will provide a living income, yet they may add greatly to the family support.

All little girls from ten to fifteen years of age, spend one hour a day with the sewing teacher. Those advancing regularly in school work, remain in a sewing class six years. At the end of that time, a pupil of average ability and industry, will be able to sew neatly and rapidly. The impatient teacher is out of place here. Pupils frequently spend six months in learning to thread a needle.

Older pupils showing some dexterity with the needle, anxious to learn to sew with the machine, are given the opportunity. Very few of our entirely blind pupils have derived any practical benefit from the sewing machine.

Pupils having completed sewing, or failing to learn it, are required to spend one hour a day in the fancy-work division. Knitting is taught in this class.

Tuning is one of the leading branches taught in city schools. Blind persons may become experts, and exceptional ones may become good repairers. But the tuner in Iowa must have a circuit embracing several towns. During at least three months in the year, the difficulties of traveling really close the business to the blind.

It should be remembered that the industries taught here, are studies; that the different shops are in fact class rooms; that no students after having completed the course of study, whether in the manual school alone or in the literary, musical and manual schools combined, are retained as journeymen. Hence there is no pecuniary profit from this department.

The drift of thought now among the blind and their friends, is toward the establishment of industrial homes. Ohio, Illinois and California have each made appropriations for this purpose. The Pennsylvania Working Home for Blind Men was established in 1874, in Philadelphia. The appended summary of the work done in that institution during the year 1886, will show how successful such homes may be made under proper management:

Brooms made	373,294
Brushes	89,928
Carpets woven, yards	3,585
Chairs caned	620
Mattresses	117
Outside workmen, about	40
Earnings	\$ 15,087.00
Purchases	47,612.00
Sales	60,827.00
Average number of boarders	65
Inmates, about	90

RESULTS.

By June 30, 1887, 639 pupils had been admitted to this Institution. Of this number 461 by graduation, discharge, or voluntary retirement, have gone out into the world. One hundred and seventy-eight may be considered enrolled pupils still. Of the old pupils, 34 are dead; 107 are making their own living. From facts gathered, I am led to believe that at least 150 are partially supporting themselves.

The following newspapers have been sent gratuitously to the College. We express our thanks to the publishers, with the hope that they will continue to remember us: Vinton Age, Vinton Observer, Vinton Times, State Press of Iowa City, Cedar Rapids Republican, Cedar Rapids Times, Marengo Republican, Goodson Gazette, Belle Plaine Independent, Decorah Journal, Dysart Reporter, Tipton Advertiser, Electric Light of Marshalltown, Oakaloosa Herald.

I have the honor to be,

Your obedient servant,

THOMAS F. McCUNE.

REPORT OF THE OCULIST.

To the Honorable Board of Trustees Iowa College for the Blind:

GENTLEMEN—The work done by myself as Oculist for the College during the last two years has been principally in the way of relief of suffering and in preservation of the remnants of vision retained by some of the pupils. I have also been enabled to restore useful vision to several who would otherwise have been virtually helpless.

The examinations made and recorded of each student has enabled me to call the attention of the profession to several important matters, and a continuation of the careful observation of those who are received into the College cannot fail to be of material assistance to others.

I believe it is your desire that the study of these cases should be utilized, as well in the prevention of unnecessary blindness, as in the relief of those who have been already certified as hopeless.

I desire to call your attention to a matter which I believe should no longer be ignored by a State as great and as wealthy as ours, with the hope that you in turn may signify to the next Legislature your approval of the idea advanced.

In the present condition of science at least twenty per cent of the blindness represented in your School is preventable. Besides the loss of active usefulness in each case, many of the blind become permanent charges upon the State, and true economy demands that so far as possible, the loss from unnecessary blindness should be prevented; and the philanthropy that extends a helping hand to the defective classes of the population, could wisely be extended in this direction. Much of the blindness occurs amongst those who are unable to afford to their children the advantages of skillful treatment, or operation at the time when alone it is possible to procure vision. Many of the other States have provided charitable institutions for the treatment of diseases of the eye and ear, and such an institution is needed in this State.

Medical and surgical attendance would be willingly furnished without expense, to the recipients of the charity of the State, if the patients could be placed in proper surroundings.

Many of the pupils now in the College could under such circumstances be made more comfortable, and their small remnants of vision be preserved, that must otherwise drift hopelessly along, and the State would more than save the expense of such relief if but ten persons were saved from blindness in each year.

I desire again to call attention to the skillful co operation of your attending physician, Dr. C. C. Griffin, and in his earnest and constant solicitude for those under his charge.

Respectfully submitted.

C. M. HOBBY, M. D.
