REPORT OF BOARD OF TRUSTEES.

IOWA SCHOOL FOR THE DEAF.

*To the HON. HORACE BOIES, Governor of Iowa:*

SIR:—In accord with statutory requirements, the Board of Trustees for the Iowa School for the Deaf herewith respectfully submit their report for the biennial period, closed June 30, 1893.

It affords us distinct pleasure to again be able to report that the two years covered by the exhibits attached hereto have been a period of prosperity. Save a visitation by fire, we have been spared from calamities and disease; the health of the inmates has been uniformly good; the work which the school is intended to fulfill has been carried on with a commendable measure of success, and the general affairs of the Institution are in a gratifying condition. We believe we are justified in saying that the Iowa School for the Deaf to-day ranks among the first in the country, in regard to general conditions and the superiority of its educational work.

This happy condition is largely owing to the earnest and incessant labors of both the superintendent, Henry W. Rothert, and the principal of the school, G. L. Wyckoff, and their respective corps of officials and assistants and teachers; and we gratefully acknowledge the excellency of their services.

In the general management of the Institution the superintendent has shown a watchful and painstaking care, and an intelligent comprehension of his duties. The largest possible results have been obtained, with the means placed at our command, for the benefit of the deaf wards of the State. All the various departments are in as satisfactory condition as the surrounding circumstances will permit. The property of the State, both real and personal, under his careful supervision, is in good preservation, and the sanitary condition of the Institution leaves nothing to be desired. The clean, happy, contented appearance of the pupils, which is approvingly commented on

by all visitors to the school, is a speaking proof of the efficiency of the management of the superintendent, who has a most able and devoted assistant in the matron.

The work of the school proper is quite as satisfactory. The mental progress of the pupils has kept pace with their physical development, and we point with pride to the fact that the Iowa School for the Deaf has been able to graduate, from its own course, and prepare for the National College for the Deaf, at Washington, D. C. (where admission can be obtained after a rigid examination only), a larger number of scholars than any other state. This gratifying result is due to the efforts of an able corps of teachers under the scholarly and intelligent guidance of Prof. G. L. Wyckoff.

For details pertaining to the management of the Institution and school we respectfully refer to the reports of these two officials.

In the report of the superintendent, a narration is given of the only adversity we have to deplore—a visitation by fire, which caused a considerable loss to the State, in August, 1892. Much as this loss is to be deplored, it is a source of congratulation that the conflagration was confined to the limits it did attain, and this was owing to the self-sacrificing services of the officers and employes, who, assisted by neighbors, fought and partly conquered the destroying element.

The incident, however, illustrated the necessity of abundant means to successfully overcome similar visitations, and we have no doubt that the recommendations and requests made for this additional provision will meet your approval, and find a ready response in the action of the general assembly.

The special appropriations made by the last general assembly have been almost expended for the various purposes for which they were made, as will be seen from the special report of the treasurer.

The further needs of the institution are set forth at length, and accompanied with the needful explanations, in the report of the superintendent, to which attention is respectfully directed.

We also call especial attention to the various exhibits of the superintendent, which give a detailed summary of the workings of the institution.

(Signed)

Respectfully submitted,

LOUIS WEINSTEIN,  
*President.*

A. T. FLICKINGER,  
C. S. RANCK,  
*Board of Trustees.*

The board of trustees, after careful examination of the necessities of the school for the ensuing biennial period, recommend the following appropriations:

Library.....	\$ 400.00
Iron shutters and doors.....	1,200.00
Fire hose and pipe.....	300.00
Cold storage.....	3,000.00
Reservoir, cistern and pump.....	5,000.00
Ice pond.....	1,200.00
Repair fund.....	4,000.00
Additional land.....	9,000.00
Dining room furniture.....	600.00
Domestic's dormitories.....	500.00
Watchman's clock and fire signal.....	500.00
Pipe and boiler covering.....	200.00
Electric light.....	3,000.00
Bed room furniture and bedding.....	500.00
Boiler house.....	8,500.00
Cooking school and gymnasium.....	6,500.00
Furniture in school house.....	600.00
Bakery and bake oven.....	3,000.00
New roof on school house.....	700.00
Total.....	\$48,700.00

## SUPERINTENDENT'S REPORT.

OFFICE OF SUPERINTENDENT OF THE IOWA SCHOOL FOR THE DEAF,  
COUNCIL BLUFFS, IOWA.

To His Excellency HORACE BOIES, Governor of Iowa:

SIR—I beg to submit the following biennial report of the Iowa School for the Deaf, with a financial statement of receipts and expenditures; a list of all pupils attending school, with name, sex, age, residence, place of nativity and cause of deafness; and also a report of studies pursued and trades taught.

## HEALTH AND GENERAL CONDITION.

It is with pardonable pride that I beg permission to call attention to the steady onward and upward growth and prosperity of this educational institution, one of the many blessings bestowed by a generous State upon its children.

Not a place of refuge, but (for the term) a home; not an asylum, but a school; not a hospital, but a workshop, its mission to educate, train and develop the children of Iowa who are debarred from the benefits of our public schools by reason of their deafness, into intelligent, honorable men and women, has ever been recognized, honored and obeyed.

The management, in its endeavor to carry out this mission, the sole purpose of the liberal assistance of State and patrons, has, amid its varied duties and responsibilities been guided by one precept, rule and prompting, viz.: "*Children first.*" While the service of officers and teachers is voluntary, the attendance of pupils is in a measure compulsory. The first can, at their option, when inclination, demand or greater pecuniary reward elsewhere entice, sever their connection with the school, but the children must find within its portals their only opportunity for mental development and practical training and consequent future security and independence. The results have demonstrated the correctness and wisdom of this course of action, inasmuch as with our children, health has generally predominated; contentment reigned supreme; happiness found everywhere, and physical

betterment, mental advancement and moral encouragement held full sway.

## THE FIRE.

On the 11th day of August, 1892, at or about one p. m., fire was discovered in the building in the rear of the kitchen, above the boiler room and adjoining the engineer's department, known as the laundry.

The cause of the fire is unknown, and whether it originated in the dry room of the laundry or above the boiler immediately below said laundry is to this day an open question. It wrecked and destroyed the entire (two-story) building; the ironing room, cooking school, laundry, and all the laundry machinery, dry room, cold storage building, and damaged the engine, dynamo and boilers, also the ceiling and walls of the dining rooms and chapel.

Every possible effort was made by the officers, employes, neighbors and citizens. The aid of the fire department of the city was invoked, pails ordered and a bucket brigade organized, and these efforts were finally successful in saving the remaining buildings from total destruction.

Under direction of the Honorable Executive Council the walls were torn down, the remainder covered by a composition roof and a building thus temporarily constructed which would answer the purpose of an ironing room, machinery room and engineer's shop for the time being. Such new laundry machinery and tools as might be necessary were ordered to be purchased, and an appropriation of five thousand dollars from the providential fund authorized for that purpose.

The aggregate loss to the State in the destruction of the property above mentioned will not be less than fifteen thousand dollars.

The actual cost of rebuilding the temporary structure, removing the debris, repairing damages to boilers, engines, walls and ceilings, and the purchase of necessary laundry machinery amounted to six thousand five hundred dollars, which amount, over and above the five thousand dollars appropriated by the honorable executive council, was obtained by the strictest, and, at times, most penurious economy and denial of possible necessary requirements, and paid out of the current fund.

## ADDITIONAL SCHOOL.

It is possibly proper in a report of this character, making statements as to past conditions and usefulness, to also refer briefly to the ability to meet future growth and requirements.

Our dormitories, dining rooms, chapel, industrial schools and school house are of such ample dimensions as to properly take care of and educate all the deaf children of the State who will apply for admission.

The appropriations asked for are not for enlargement of any of these, but for additions and improvements necessary for the proper protection and betterment of pupils and buildings.

Until the enactment of a compulsory law for the deaf, no child in Iowa will be debarred from an education if its parents are willing or so decide by reason of want of room in, or cost of transportation to the Iowa school as it now exists or is located.

#### LIBRARY.

Our library enjoys the fullest patronage of all our pupils. It is one of the prominent factors in developing the mental condition of our children. The shelves, so often approached by the anxious learner, should be filled; its books worn by the constant handling of eager readers should be replaced, and its opportunities for advancing, instructing and interesting the pupil should be enlarged.

We ask for an appropriation of four hundred dollars.

#### IRON DOORS AND SHUTTERS.

It is natural, after the fire of last year, that all possible danger of a re-occurrence is closely watched, and all precautions against a more dire calamity earnestly recommended.

The main building consists of the center building of five stories, with an east and west wing of four stories each.

While separated by heavy fire walls, there are in the center hallways which, in case of fire, would afford an easy avenue for its spread, and without question or doubt, if under full headway, doom the entire building to destruction.

This can be successfully prevented by placing iron doors in each of these hallway connections, and providing the openings connecting the main building with the chapel with iron shutters.

One thought of the responsibility of taking care of and protecting three hundred children gathered in their dormitories under one roof, will warrant the hope that an appropriation amounting to twelve hundred dollars will readily be granted for their better safety.

#### FIRE HOSE AND PIPE.

Notwithstanding the fact that the more exposed parts of the main building, chapel, industrial schools and barn are covered by fire plugs, pipe and hose, there are some places in and about the buildings, school house and laundry, where additional service is a necessity.

Former appropriations have not been sufficient to fully meet the requirement, and a further appropriation of three hundred dollars for this purpose is asked for.

#### COLD STORAGE.

One of the most serious results of the fire, and one all the more deplorable from the fact of its being an absolute necessity, was the destruction of our cold storage building, adjoining the engine room, and in close proximity to the kitchen; built of frame, it became an easy prey to the devouring element, and was with its contents soon a total loss.

As a storeroom under proper temperature to preserve the meat, milk, produce and butter for our large family, it is indispensable, and for the time being inadequate room has been temporarily provided in the root cellar.

We have had the architects make a definite plan for a new brick structure, the estimated cost of which is three thousand dollars.

#### RESERVOIR, CISTERN AND PUMPS.

Since the completion of our new artesian well, our water supply is ample, but we have no adequate means of storing the water for cases of emergency.

Our two artesian wells throw a volume of sixty gallons a minute, which is gathered into a small, leaky cistern, from which it is pumped by means of a small steam pump and forced into a small reservoir holding only about one thousand six hundred barrels. From this reservoir, one hundred and twenty feet above the foundation of the main building, the water is supplied for daily use; and on this small quantity of water contained in the reservoir, we must depend for protection from fire. This condition is absolutely dangerous, and we sincerely trust our request for an additional reservoir of larger capacity, a larger cistern and a new pump will be recognized.

The additional reservoir holding thirty-two hundred barrels can be located adjoining the present one, and thus the water main now leading to the building can be utilized.

The cost of such reservoir, at a close estimate of the architects, will amount to four thousand dollars.

The present small cistern holding not over two hundred barrels should be replaced by a larger and more substantial one which then would also serve the additional purpose that if at any time, by accident or otherwise, the reservoirs should be temporarily empty, a sufficient amount of water be retained from the constantly flowing wells for the daily and absolute use of our large family. The cost of such cistern would be five hundred dollars.

We have not been able, for want of funds, to discard the present pump which has been in use many years; often repaired, and wholly inadequate for its purpose.

We could not reap the benefits of a larger reservoir and cistern without the service of a new and larger steam pump, the cost of which will be five hundred dollars.

The large interests of the State absolutely demand this protection, the cost of which, for reservoir, cistern and pump will amount to five thousand dollars.

#### ICE POND.

We have situated within our grounds an artificial pond built years ago to receive the overflow from the then strong flowing artesian well. The embankments are properly constructed, and the location suitable for the purpose intended, but from the nature of the soil the pump will only retain a limited quantity of water. It has been deemed advisable to apply for an appropriation of twelve hundred dollars, as estimated by experts, to brick and cement the bottom and sides of this enclosure so as to secure sufficient water from which to obtain the annual supply of ice. From a sanitary point of view, this would be a desideratum, as we would then have the clear crystalization of our own artesian well water, in place of relying upon ice secured from creeks, sloughs, or the Missouri river.

The outlay would be reimbursed to the State in a few years by the saving of expense in annually storing our ice from the places named.

#### REPAIR FUND.

In former reports we have called attention to the fact that while some institutions of the State have, by statutory enactment, been provided by annual appropriations with certain sums to defray the ever recurring outlay incidental to repairs, we are compelled to appear at every session of the General Assembly with the request to allow a certain amount for this purpose, and which cannot be evaded.

By the closest attention of officers and teachers, and the best of discipline breakages, damages and destruction occur in a family like ours, and the most economical management cannot control this absolutely necessary expenditure. The wear and tear alone in floors, roofs, dormitories, furniture and machinery, is a very large item, and at no time has the appropriation made by General Assemblies been sufficient to meet the wants.

Two thousand dollars, annually, would not be as large a sum as is required, but in view of other expenditures we beg to ask for said amount, or for four thousand dollars for the biennial period.

#### ADDITIONAL LAND.

As a matter of prudent husbandry as well as a prompting of necessity, we would recommend the purchase of ninety adjoining acres.

Our numerous buildings are so scattered that there is not sufficient room for properly reaping the benefit of judicious farming. Our vegetable garden, our cornfields and our meadows are in small patches, distributed over one hundred and fifty-seven acres owned by the State.

Our growing herd of cows need the pasturage which can only now be obtained for them by annually purchasing the right to graze on foreign fields.

The indications of certain advancement of the price of land in this locality point to the advisability of an early purchase.

Permanently located as the Iowa School for the Deaf seems to be, it, in our judgment, is practical economy to surround it with sufficient land to maintain its stock and produce the necessary garden and field crops for its sustenance. We recommend an appropriation of nine thousand dollars for this purpose.

#### DINING ROOM FURNITURE.

Having the care of nearly three hundred children for the greater part of the year, this institution is properly, for the time being, the *Children's Home*. Their education, improvement and betterment is therefore not confined to the school house, but everywhere, in the workshops, study rooms, dormitories and dining room.

Our dining room furniture and service is not what a parent would provide at his own family table. We are as one large family and should be provided with ordinary serviceable table ware and dining room furniture.

An appropriation of six hundred dollars is respectfully asked for this purpose.

#### DOMESTICS' DORMITORIES.

There remains unfinished the fourth floor of the building known as the addition to dining room and chapel.

This space was contemplated for dormitories for the large number of domestics necessary to so large an institution as ours. The outlay in securing the benefits of this improvement as to floors partitions, doors and plastering, is closely estimated at five hundred dollars.

#### WATCHMAN'S CLOCK AND FIRE SIGNAL.

A system by means of which the central office in the main building could be immediately apprized of accident, either by fire or otherwise, by day or night, has long been a necessity.

Our buildings are somewhat isolated; our pupils' dormitories are on the third and fourth floors, and our hospital on the fifth, and any method whereby rapid communication with the central office could be secured would be a positive protection in many ways to pupils and

buildings. It would also serve as a reliable means for the observance of the faithfulness of such as are placed to guard and protect our children and the interests of the institution during the night.

It is estimated that an expenditure of five hundred dollars will bring about this much desired improvement.

#### PIPE AND BOILER COVERING.

The economy in covering our steam pipes and boilers as provided by a former General Assembly has been clearly demonstrated. The fire destroyed some portions of this covering, and to replace same an appropriation of two hundred dollars is respectfully requested.

#### ELECTRIC LIGHT.

At the first installment of our electric light plant, owing to an inadequate appropriation at the time, the same was confined to service in a limited manner, and the necessity of increasing its volume and efficiency has grown from year to year, so that at the present time we are compelled to bring the matter to the attention of the General Assembly, in the hope that relief be granted to such an extent as to make the system of benefit everywhere where needed.

Our dynamo is inadequate for the number of lamps required, which can only be remedied by the purchase of an additional one. The same is true of the engine, and this, with the necessary additional lights and wiring will entail an expenditure of three thousand dollars.

We sincerely trust the recommendation above made will meet your approval, and thus contribute to the enlargement and greater serviceability of our entire system.

#### BED ROOM FURNITURE AND BEDDING.

Perhaps no one department of our large institution needs such frequent and continuous attention as our dormitories. We have as yet never been able to furnish all our sleeping rooms in a manner acceptable to the general idea of reasonable comfort. In part, new mattresses and new furniture, including wardrobes, tables and chairs are needed, and we respectfully suggest that an appropriation of five hundred dollars be made for this purpose.

#### BOILER HOUSE.

The justly criticised oversight in the first plans and establishment of institutions is in not properly locating buildings with a view to the future increase and growth, and this is severely felt by us in the unfortunate location of our boiler house.

Situated as it is underground, in close proximity overhead to laundry and kitchen, it is a constant menace to life and property. As

referred to elsewhere, our disastrous fire was probably caused by or from the present boiler room.

The four large boilers now located in the cellar should be removed to a more convenient and less dangerous locality, and a suitable building erected independent of all the other buildings, and at a safe distance from all occupied rooms and places.

Such a building, affording in the second story ample accommodations for our engineering and machinery department is estimated as per plans of the architects, including removal of boilers and incidental expenses, at eight thousand five hundred dollars.

#### COOKING SCHOOL AND GYMNASIUM.

No part or branch of our industrial schools has enjoyed such general popularity, and has been perhaps, in its way, as far reaching in its benefits, as our cooking school.

All shared in the pride and satisfaction in this industrial department, which, at first considered as an experiment, had reached a place of permanency, demonstrating its practical and permanent value to our female pupils for their future self support, when the fire destroyed the entire school, leaving no trace of its existence save in the memory of its disheartened pupils and teachers.

We urgently ask that this branch of our practical education be reinstated, and that a separate building be provided for the same.

Our gymnasium, now confined within the narrow limits of a small room absolutely inadequate for the purpose, should have larger accommodations, and can be conveniently placed in the building suggested for the cooking school.

We feel it unnecessary to dwell on the benefits of either or both to our children, and feel that a plain statement of their needs will entitle them to recognition.

At our suggestion, temporary plans have been drawn and an estimate made as to the total cost of a building complete, for the cooking school and gymnasium. The amount so called for is six thousand five hundred dollars, and we earnestly request a favorable consideration of the same.

#### FURNITURE IN SCHOOL ROOM.

We most respectfully represent that a great part of the furniture in school rooms needs replacing. The desks for pupils are old and unserviceable; part of the other furniture broken and beyond repair.

To replace only the above with proper economy will entail an expenditure of six hundred dollars, and we trust an appropriation of this amount will be made for this purpose.

## BAKERY AND BAKE OVEN.

To any casual observer at his first visit to the Institution, the location of our bakery appears positively dangerous. In the basement of the main building, under sleeping apartments on the first floor, the bake oven, built of brick, in almost constant use, and attached to an ordinary chimney of the main structure, is a daily cause of worry and anxiety.

Want of funds alone has prevented its removal to safer quarters. The bakery proper, situated near and adjoining the oven, is without daylight at any time, and must be furnished with gas at all times.

The cost of a suitable building for the bakery and a new oven will be three thousand dollars, for which an appropriation is most respectfully asked.

In addition to the above we beg to refer also to the fact that the bakery is a part of our industrial school system, educating and training pupils to a thorough understanding of this profitable trade.

## NEW ROOF ON SCHOOL HOUSE.

This improvement is a necessary one from the fact that the present slate roof is beyond repair.

Neither careful supervision nor constant attention has thus far been successful in preventing constant leakages after every shower. School room walls, ceilings and blackboards have suffered notwithstanding the large expenditure for repairs on said roof.

The only remedy is relaying, as far as material will permit, the serviceable slate, and adding thereto as much new slate as will make a good, permanent and safe shelter.

We ask for an appropriation of seven hundred dollars for this purpose.

## WORLD'S FAIR EXHIBIT.

The Iowa School for the Deaf refused to offer the outcome of its educational, industrial and art departments to the collective exhibit of similar schools throughout the country, not in fear of competitive examination, but prompted by a justifiable belief in the propriety of exhibiting Iowa's results under Iowa's roof.

It has been a source of gratification to our pupils and a stimulus to future activity that their handiwork thus placed in the Iowa Building received the commendations of citizens of our own State, and also was very favorably recognized and appreciated by those who for the time being enjoyed Iowa's hospitality.

Respectfully submitted,

HENRY W. ROTHERT,  
*Superintendent.*

## OFFICERS AND TEACHERS.

The following is a list of officers and teachers at the end of the biennial period, with salaries paid each:

	Per Annum.
Henry M. Rothert, superintendent, resident.....	\$2,250.00
(No assistant or steward)	
G. L. Wyckoff, principal, non-resident.....	1,700.00
Edwin Southwick, teacher, non-resident.....	1,050.00
Conrad Larsbaugh, teacher, non-resident.....	1,050.00
Frank C. Holloway, teacher, non-resident.....	1,200.00
Hiram Phillips, teacher, resident.....	1,200.00
C. Spruit, teacher, non-resident.....	1,300.00
W. S. Marshall, teacher, non-resident.....	1,300.00
S. C. Bright, teacher, non-resident.....	1,200.00
J. W. Barrett, teacher, resident.....	685.00
Florence Wilcoxson, teacher, resident.....	600.00
Florence Clement, teacher, resident.....	600.00
Fannie Glenn, teacher, resident.....	500.00
Margaret Hamilton, teacher, resident.....	500.00
Margaret Watkins, teacher, resident.....	600.00
Mrs. A. Hardie, teacher, resident.....	450.00
Olivie Bruning, teacher, resident.....	600.00
Francis N. Eddy, teacher, resident.....	400.00
Olive Tracy, teacher, resident.....	350.00
Gussie Kruse, teacher, resident.....	250.00
Mrs. Henry M. Rothert, matron, resident.....	750.00
(No assistant or housekeeper.)	
	Per Month.
Alexander Hardie, bookkeeper, resident.....	\$ 70.00
J. J. Kies, boys' supervisor, resident.....	50.00
Martha Dinsdale, girls' supervisor, resident.....	40.00
Mrs. Mamie Poole, small boys' supervisor, resident.....	25.00
Annie Cabelka, nurse, resident.....	18.00
F. W. Balluff, engineer, non-resident.....	85.00
Elmira Mickle, foreman of sewing department, resident.....	35.00
Jane Walker foreman of ironing room, resident.....	18.00
L. W. Pound, foreman of shoe shop, resident.....	50.00
Z. B. Thompson, foreman of printing, resident.....	50.00
G. C. Taylor, foreman of carpentry, non-resident.....	70.00

## INDUSTRIAL DEPARTMENT.

## TRADES TAUGHT.

Attention is paid to the following practical education of the pupils:

<i>Boys.</i>	<i>Girls</i>
Printing.	General Housework.
Carpentering.	Plain Sewing.
S Shoemaking.	Embroidery.
Broom Making.	Dress Making.
Baking.	Ironing.
General Farming.	Cooking.
Flower Gardening.	
Vegetable Gardening.	

## EDUCATIONAL DEPARTMENT.

## COURSE OF STUDY.

## FIRST GRADE.

*Language.*—Names of objects in the school-room; names of members of the class; articles of household and kitchen furniture; articles of dress; parts of the body; days of the week, and the names of all things with which the pupils are presumably familiar may be taught. The article the is to be used before nouns in all cases where an article is demanded. Both singular and plural forms of nouns are to be taught. All personal pronouns except the reflexives. The adjectives of number to ten, and simple adjectives of kind and quality, such as good, bad, rude, hot, cold, sick, well, as part of the copula. The prepositions on, into, of, from, off, to and with. Verbs describing single actions in the past tense; the verb to be in past and present tense; a few verbs expressing emotions in the present tense; questions: Who? Where?

Let the greater part of the instructions be by topics, selecting only those with which the pupil is presumably familiar, as cooking, sewing, baking, washing, etc. Pay particular attention to sequence of events.

No text-books.

## SECOND GRADE.

*Language.*—Nouns, names of things seen or used in the ordinary work of the school, kitchen and dining-room, farm, barn and garden, with the verbs, adjectives and other parts of speech necessary in describing, in simple sentences, all of the operations of the same, the future tense, the words told, asked and said followed by a quotation, the infinitives of purpose, the indefinite numerals, such as some, many, several. Avoid the use of the habitual present tense and teach the actual present of a few verbs that do not form the actual present with *ing*.

Continue instructions by topics, as in first grade. Questions, the direct form: Whose? How many? Which? When?

*Arithmetic.*—All the fundamental operations with numbers below twenty, using actual quantities. Avoid all abstract numbers.

No text-books.

## THIRD GRADE.

*Language.*—Trades and occupations, operations, tools and products of the same. All tenses of the verb except the past and future perfect, comparison of adjectives, adverbial phrases of time, as last night, next week, etc. Infinitive as object of the verb; the reflexive pronouns. Journal. Question.

*Arithmetic.*—The same as second grade, with larger numbers. Drill with figures.

*Geography.*—Local, with direction and distance. Map of school-room and surroundings.

No text-books.

## FOURTH GRADE.

*Language.*—Trades and occupations continued, collective nouns, the infinitive after make, let, help, see; the potential mood, with may, must and can; also negatives. The conjunctions, either—or, neither nor, both—and, whether—or. Drill in infinitives. The words somebody, nobody, anybody, and comparison of adjectives. Journal, and picture descriptions. Questions requiring the passive voice in answer.

*Arithmetic.*—Mental and practical problems; notation and numeration, complete; United States money, complete.

*Geography.*—State, with special reference to lines of travel. Use sand-board.

No text-books.

## FIFTH GRADE.

*Language.*—Special drill in use of auxiliary verbs, the passive voice, the present and perfect participle. The potential mood, complete; comparison of adjectives; natural history; stories. Journal.

*Arithmetic.*—Practical problems and drill exercises. Compound numbers begun.

*Geography.*—Exercises upon outline maps; descriptive lessons of principal countries.

*History.*—Stories by teacher.

No text-books.

## SIXTH GRADE.

*Language.*—Special drill upon the connectives, the relative pronouns and the subjunctive mood. Narrative and descriptive composition. Journal.

*Arithmetic.*—Practical problems and drill exercises. Compound numbers continued.

*Geography.*—From maps and descriptive lessons prepared by teacher. Map drawing.

*U. S. History.*—Lessons prepared by teacher.

## SEVENTH GRADE.

*Language.*—Special drill upon moods and tenses, participle and infinite constructions. Analysis of simple sentences by diagrams. Sentence building. Text-book—Swinton's Language Primer.

*Arithmetic.*—Fractions completed.

*Geography.*—Completed. Text-book—The Electric.

*U. S. History.*—Colonial Period Completed.

## EIGHTH GRADE.

*Language.*—Composition, new words and idioms; thorough review of connectives, tenses and participles. Analysis by diagram of all the complex sentences. Text-book—Swinton's Language Lessons.

*Arithmetic.*—Practical problems. Text-book—Felter's Intermediate.

*U. S. History.*—Swinton's Condensed completed.

*Physical Geography.*—Lessons prepared by teacher.

## NINTH GRADE.

*Language.*—Composition; idioms; Construction Exercises including expansion and contraction of sentences; Analysis and parsing from diagrammed sentences; original sentences illustrating classification and use; drill in using elements of the sentence. Text-book—Swinton's Language Lessons.

*Arithmetic.*—Percentage and interest. Text-book—Felter's Advanced.

*Physical Geography.*—Warren's Completed.

*History.*—Text-book—Thalheimer's.

*Civil Government.*—Weekly lectures by teacher.

## TENTH GRADE.

*Language.*—Swinton's Grammar, Kerl's Rhetoric. Idioms and punctuation.

*Arithmetic.*—Felter's Advanced Completed.

## REPORT OF PRINCIPAL.

*To the Board of Trustees:*

GENTLEMEN:—This report of the conduct and operation of the school for the past two years will be short.

There have been no important changes in method or aim of the work in hand. The number of pupils and teachers is nearly the same as at date of my last report. We entered the term in 1891-2 with no change whatever in the membership of the corps of teachers, and the changes in the next year entailed no impairment of efficiency.

The work of the school rooms, while well done, has been somewhat hampered by lack of illustrative apparatus. We need much in this direction.

In a school for the deaf the necessary use of the blackboard is many times greater than in public schools; we should, therefore, have the very best natural slate stone. The first cost of such board is considerable, but being practically indestructible, as well as far superior to the ordinary blackened wall, their purchase would be real economy.

In providing for the future needs of the school it should be remembered that the number of pupils we may expect to receive and be called upon to provide for, bears a constant numerical relation to the population of the State. As long as the State of Iowa continues to grow, the number of pupils in our school must increase, and correspondingly larger provision must be made.

It has become the custom among the unthinking to consider education and information as practically synonymous terms, losing sight of the fact that education consists primarily and principally in imparting the power to reason correctly. In the conduct of this school we have endeavored to avoid this error, keeping in mind constantly, especially in the work of the primary grades, the importance of orderly thinking above everything else. I think the results we are now able to show justify the care taken in this regard.

During the last year the school has been divided into seventeen classes, fifteen of them taught by manual signs and writing, and two by the oral method. All children who can be taught to speak and read the lips sufficiently well to make it their ordinary means of communication with others should be taught in that way. I do not think we have gone as far in this direction as would be profitable,

and I therefore recommend that additional provision for the teaching of speech, and by speech, be made. This will involve increased expense, for classes must be small where taught orally, and the salary of each teacher no less than when the manual method is pursued.

During the past two years we have graduated twenty-five pupils. Several of these are now pursuing a higher course of study at Washington. Some have fully entered upon the battle of life and are now employed in various occupations; others are at their homes still, to a certain extent under the direction of their parents, but all, I am glad to say, have creditable records and are acting their parts as true men and women.

In connection with the ordinary literary work of the school, instruction in drawing, painting and wood carving has been given to a large number of pupils. As our practice is now arranged all pupils will have some drill in this work. To the greater number of these the teaching will be merely tentative, given with a view to the discovery of artistic talent. While a certain amount of attention devoted to form, light and shade is profitable to all, only a comparatively small number can be taught to produce work worthy of consideration from an artistic standpoint. I am glad, however, to say that quite a large number of our pupils, under the tuition of Miss Clement, have attained to such proficiency as to attract favorable comment from competent judges.

The work of the regular manual classes has progressed in a satisfactory manner under the charge of a faithful corps of competent teachers, and I think we may not hesitate to compare our graduates with those of any similar school in the world.

While we may speak thus highly of our graduates I ought not to leave unnoticed the large number who leave the school before completing the course. There are, of course, some who for various reasons cannot be expected to continue with us for the full period required for graduation, but there are others who injure themselves, and all in any way connected with them by withdrawing before they are even passably prepared to undertake the battle of life. I submit that some reasonable degree of compulsion would not be out of place in such cases.

I have been thus brief in referring to the work of the past two years because I know that your supervision has not failed to note our work. It therefore only remains for me to extend to you my sincere thanks for the consideration and courtesy you have uniformly accorded me, and conclude by subscribing myself,

Very respectfully yours,

G. L. WYCKOFF,  
Principal.

## STATEMENT.

Showing expenditures during the biennial period ending June 30, 1893.
