 R. J. KELSEY ..... *Assistant Foreman Quarries*

## WARDEN'S REPORT.

WARDEN'S OFFICE,  
 PENITENTIARY AT ANAMOSA. }

To His Excellency, FRANK D. JACKSON, *Governor of Iowa:*

DEAR SIR—In compliance with the statutory requirement, I have the honor to submit to you my report for the two fiscal years ending June 30, 1895.

#### SUPPORT FUND.

The support fund fixed by the statute allows us \$10 per month for the support of each convict. This fund covers the expense of food, fuel, light, clothing, bedding, hospital supplies, stationery, postage and general expense, besides a suit of clothes and \$5 gate money to every discharged prisoner. Of this allowance by law, chiefly, we have been able to turn back into the state treasury the sum of \$15,000, and a like surplus will be returned next fall. And yet we safely assert that the prisoners under our care during that same period have fared equally well with the average laborer outside.

#### PRISON POPULATION.

When I entered upon my duties at this prison, April 1, 1892, there were 262 prisoners. At this time there are in the lock-up 542. This rapid increase in the prison population adds to the difficulties and responsibilities in their management. It also emphasizes the importance of our need of more room at the earliest possible moment. As there is no contract work done at this prison, the increased forces at the command of the state ought to push the construction work with all possible energy. The next biennial period ought to push to a finish some of the buildings now under way. And while the finishing work is the more expensive, it is also the more important. These facts invite a wise and liberal appropriation for construction work.

The rate of increase in the prison population of Iowa is a fact that has already gone to verdict. All argument on the subject is simply a waste of precious time. The only thing that remains to be done is to promptly and vigorously meet the emergency, provide with all possible dispatch the additional room already needed, and which will be *indispensable* in the very near future. In the light of these facts I urgently suggest the following appropriations:

For finishing the female building, now under roof.....	\$10,000
For completion of the center building, now under construction.....	32,348
For foundation of the north wing of the cell house.....	25,000
Contingent and repairs.....	7,000
80-horse power boiler, complete.....	1,000
Warden's house.....	300

#### INDUSTRIES.

The industries of the prison, in every branch, are in a satisfactory condition and the work done in all departments does credit to the state. It would be difficult indeed to find a class of *free* laborers anywhere that would excel these men in orderly conduct, in diligence and faithfulness to duty, and in the class of work that is being done.

#### QUARRY.

The quarry is operated by about eighty men and yields a fine product of stone for building purposes. The enactment of the last legislature prohibiting us from giving away the waste from the quarry has cramped and hampered, to some degree, this industry. This waste material is worse than worthless to the state, for it requires *immense* labor to dispose of it; still it is valuable to the railroad companies and others, who would willingly and gratuitously assist in its removal. It is clearly a piece of unwisdom for the state to board and clothe a class of men to perform a task which others would *gladly* do without cost to the state.

The stone cutting department employs seventy-five men. Here the stone is shaped and made ready to be dropped into its place upon the walls. Under Mr. Archibald, our efficient foreman, the work progresses in good shape, with far less friction than could be expected, and the work done is certainly first-class.

#### CONSTRUCTION WORK.

The construction work begun three years ago is now well under way and will doubtless be completed this year as far as

the second story. Gratifying progress has been made, considering the fact that the entirety rests on 1,800 feet of foundation. The character of the work is a credit to the state and will be a standing testimony of the faithfulness and skill of these men.

#### HEALTH.

The general health of the inmates is good. We have less sickness than is found among a like number in the outside world. This fact may safely be ascribed to the favorable conditions that obtain within these walls. The labor is regular and sufficiently severe, and yet not to a degree to put in jeopardy the health of the convict. The food is clean, wholesome and nourishing, with sufficient variety to preserve the keen qualities of the appetite. Three full meals are served each working day. Their persons and their clothing are kept clean by the bath room and the laundry. Clean, well ventilated sleeping apartments. Regular hours for rest. The light is extinguished in every cell at precisely 9 o'clock by one stroke of the lever in the engine room. This is Dr. Dio Lewis' famous prescription: "*Bedibus ninoabus cloccabus.*" They are free from the damaging and destructive alcoholic beverages. These conditions reduce the mortality to a little less than 10 per 1,000. This is far below the average in the general population. The compendium of the tenth census of the United States gives the annual death rate for the United States as 18 per 1,000; the rural population of England, 18½ per 1,000, and the whole of England, 20½ per 1,000. The death rate in the prison population of New York for 1894 was 23 per 1,000, and that of some of the prisons in the United States as high as 50 per 1,000. So the annual death rate in this prison is only about one-half the average in the outside world, and only one-fifth the rate in some of the noted prisons in this country.

Alexander Maconochie, next to the immortal Howard, is entitled to the world's confidence in matters of prison management. He was permitted to give a practical test to the theory of prison reform, and for this purpose he was constituted governor, by Great Britain, of her convict colony on the island of Norfolk, with its 1,500 prisoners. After four years of experience this thorough and practical test is briefly summed up in his own words: "I found the island a turbulent, brutal hell; I left it a peaceful, well ordered community." This practical and triumphant experiment has done much to rivet the attention of

legislators to the importance and value of reform in the methods of prison management. The good time law on our statute books is a tangible recognition of one of the salient features of this reform.

There is another vital question in the restoration of manhood, upon which the laws of our great state are manifestly lame, namely, the laws regulating the turn-out equipment—a suit of clothes, transportation back to the place of conviction and \$5 gate money. All this is well meant, but it is nevertheless a humiliating suggestion to these men that they are paupers and objects of *state charity*. The parting salute of the state to this class of its servants is a stab at the frayed manhood of these men. They have toiled manfully and skillfully for the state, why not recognize that service in some sort of remuneration that would ennoble rather than degrade them? Waiving the question of *right* on the part of the state to *confiscate* the labor of these men, I boldly *challenge its propriety*. Besides, it works glaring inequalities that are a contradiction of all justice. One man comes to our care at the beginning of winter under a three months' sentence. His clothes are threadbare, he is out of work, no place to go, and the state of Iowa takes him to winter; but when the warm days of spring arrive he goes out with a new suit of clothes, transportation and gate money—"He is the favored one in all the king's dominions." The next man that gets his discharge papers has served the state well and faithfully for fifteen solid years; he goes out into the bleak world a child, inexperienced, homeless and a stranger in the state; he has some friends at St. Joseph, Mo., and after he has counted up all his small change he lacks \$1.50 of enough money to pay his fare to the only friends he has on earth. The law winters the tramp and pays him off in the spring for the privilege, but what about the man who has spent all the best years of his life in the service of the state? It sends him adrift, helpless, penniless, friendless and homeless. It is to be hoped that this part of our code will meet prompt and vigorous revision at the hands of our next general assembly.

#### THE PAROLE SYSTEM.

The confidence which I expressed in the parole system two years ago has been verified by the methods of pardon employed by your excellency, in making the pardon *conditional* on the good behavior of the prisoner after his release. In fine, the

attitude of the state administration toward this institution commands my profound respect and admiration for our present chief executive, both personally and officially.

#### CHAPEL AND RELIGIOUS SERVICES.

Our religious services are held in the prison chapel, which is also our library. We have preaching at 7:30 A. M. by the prison chaplain, Rev. J. M. Crocker, who also preaches to the female prisoners in their ward, thus delivering two sermons each Sunday, and Sunday school in the afternoon, conducted largely by Christian men and women belonging to different churches in this city.

Of the efficient services of our chaplain in ministering to both the spiritual and temporal wants of the convicts, too much praise cannot be given. He is untiring in his devotion to their welfare, comforting them when sick or afflicted, writing letters for them and endeavoring by every means in his power, especially by his noble example, to lead them to become better men. He is, in fact, the embodiment of the highest type of a Christian gentleman, and has gained the entire respect and esteem of the convicts as well as that of his associates, the other members of my staff.

To the state officials and the public generally who have manifested a live interest in the arduous task assigned us and in the welfare of those committed to our care, I express my sincere thanks. I also make grateful recognition of the valued services rendered me by the subordinate officers and guards, who have promptly and vigorously sustained me in the administration of the affairs of this prison.

Most respectfully submitted.

P. W. MADDEN,  
Warden.

CLERK'S REPORT.

---

## CLERK'S REPORT.

CLERK'S OFFICE, IOWA PENITENTIARY. }  
ANAMOSA, IOWA, June 30, 1895. }

*Hon. P. W. Madden, Warden:*

I herewith present you the biennial report of the finances and statistics of this institution for the term commencing July 1, 1893, and ending June 30, 1895.

T. E. PATTERSON,  
*Clerk.*

TABLE I.

Prisoners in confinement June 30, 1893.....	275
Prisoners received during biennial period.....	542
Total in confinement during biennial period.....	1,015
Discharged by expiration of sentence.....	425
Discharged by death.....	9
Discharged by executive clemency.....	33
Discharged by order of court.....	4
Discharged by escape.....	2
Discharged by order of physician.....	1- 472
Total number in confinement June 30, 1895.....	542

TABLE II. DAILY COUNT OF PRISONERS IN CONFINEMENT FROM JULY 1, 1880, TO AND INCLUDING JUNE 30, 1895. SHOWING THE TOTAL OF EACH MONTH AND AVERAGE PER DAY.

Table with columns for Month, Total, and Average. Rows include months from July 1880 to June 1895, with a 'Total' row at the bottom.

Total in confinement.

TABLE III.

SHOWING NUMBER OF PRISONERS RECEIVED, DATE COMMITTED, COUNTY FROM, TERM, AGE, COLOR AND CRIME, DURING BIENNIAL PERIOD ENDING JUNE 30, 1895.

Table with columns for Number, Crime, Date Received, County From, Term, Age, and Color. Lists various crimes like Burglary, Robbery, Murder, etc., with their respective details.

TABLE III—CONTINUED.

ARCHITECT'S REPORT.

---

## ARCHITECT'S REPORT.

ANAMOSA, IOWA, August 19, 1895.

*Hon. P. W. Madden, Warden:*

In reporting on the work of the construction department of Anamosa penitentiary the first and most noteworthy item is the center building and warden's house, now in course of erection. The progress made and the value of the work as it stands is such that it makes a very creditable showing for your administration in the past biennial period, up to July 1, 1895. In quality the work done is fully up to the high standard that has made this prison noted, being strictly fireproof, with heat, light and ventilation provided for according to best modern practice. Heavy stone walls of the celebrated Anamosa limestone, taken from the state quarry upon the Buffalo, quarried, cut and laid by convict labor, under the supervision of skilled foremen, makes this work fully equal to the best of government and state buildings anywhere.

The value of the work done up to July 1st on the above named buildings, when figured at a fair contract price for the same class of work on the outside, is as follows:

### CENTER BUILDING, WITH OPENINGS TAKEN OUT.

Excavation, 3,644 yards, 19 feet @ 18c.....	\$ 554.40
Concrete—concrete, 341 yards, 8 feet @ \$1.....	341.35
Footings and foundation walls, 24,234 feet @ 40c.....	9,693.60
Cut stone from bottom of basement windows to top of water table, 11,161 feet, 10 inches @ 80c.....	8,928.80
Cut stone inside walls, 25,615 feet @ 80c.....	20,492.00
Cut stone from top of water table to present height, 44,329 feet @ \$1.....	44,329.00
Masonry laying above in walls, 3,742 yards, 23 feet @ \$5.....	13,798.50
Flags for siltaries, 51 pieces @ \$12.....	612.00
<b>Total.....</b>	<b>\$ 94,813.00</b>

## WARDEN'S HOUSE.

Excavations, 1,341 yards @ 15c .....	\$ 201.15
Concrete, 151 yards @ \$1 .....	151.00
Cut stone for basement walls, 12,748 feet @ 40c .....	5,099.20
Cut stone for first story, 9,581 feet @ 50c .....	4,790.50
Cut stone for first story, 12,960 feet @ \$1 .....	12,960.00
Cut stone for first story, 4,385 feet @ \$1 .....	4,385.00
Cut stone for second story, 1,868 feet @ 50c .....	934.00
Cut stone for second story, 7,846 feet @ \$1 .....	7,846.00
Cut stone for second story, 3,528 feet @ 50c .....	1,764.00
Masonry (laying above in walls), 2,185 yards, 12 feet, @ \$3 .....	65,550.00
Total for warden's house .....	\$ 94,574.98
Total for center building .....	94,574.98
Total value of work to July 1 .....	\$ 189,149.96

The above measurements were made by Mr. John Archibald, foreman of stone cutters, and are undoubtedly correct, and the prices set on the work is low for contract work where heavy stone is cut and set by derrick as in this case.

To fairly appreciate the amount of work done here it should be understood that our quarry has now been worked back into the bluff so far as to require an unusual amount of stripping and unprofitable stone to be removed before we can get at the stone that can be used in these buildings, and as this is all done by the convicts it should stand so much more to your credit for work done.

In addition to the above showing on the building, there has been a large amount of work done in the shop and yard on which it is difficult to place any money value estimate. This consists of gratings and iron work for the building for which we have only bought the bar iron and beams as it comes from the rolls, and worked them up into shape here. Two large buggy derricks and one transfer derrick have been built new, and several quarry and yard derricks have been rebuilt with the Washington fir timbers brought from the coast this last spring. Hand cars to transport the quarry-men, stone cars for the yard, together with stone cutter and quarry tools have been made and kept in repair in the shop as well as the piping, wiring etc., for the steam heat, cooking and electric plants, All of which has served to keep the men at your disposal well employed whenever the weather has been fit to work them outside.

A late fall favorable for work will see these buildings well along upon the second story of the center building and the third story of the warden's house. But owing to the advance

made on freights on stone from quarry, and being unable to get certain kinds and quality of stone as fast as needed, the present appropriation will be exhausted before the walls are up ready for the roof, although it will more than carry you through this season's work for which it was originally intended.

For the next biennial period the appropriation needed for construction will be as follows: To carry walls up ready for roof, \$5,000; the roof for center building and warden's house, which includes the large dome over the guard hall between the cell houses, will cost \$24,000 at present prices of the various materials required in its construction. This provides for corrugated steel ceilings in some rooms where it will be most suitable to the use intended, and over the balance of the center building (inside of the yard) it provides for angle iron attached to underside of ceiling beams close enough together to prevent a man cutting up through to escape by the roof. Steel frame covered with three inch porous fire proof tile and best (Monson) slate laid in cement. Dome of guard hall to be steel frame covered with copper, also copper gutters, valleys, hips, flashings, etc. This is the same class of roof already adopted and applied on the insane and female buildings and our experience with the cheaper roof on the cell house and present dining rooms show us that the better roof will be cheapest in the end as it is fire proof and practically indestructible, while as you know we have had to ask a special appropriation and put a new roof on the cell house this season to save the wall and arches.

After the roof is on it will depend entirely upon the action of the next legislature in the matter of providing for more cell-room, as to whether you will need the money for inside finish of center building during the present biennial period, or not, for, if they decide upon starting work on the north cell house next season it would be best to put the most of your men upon that work and keep only a few on the inside finish of these two buildings now under way. In fact this would almost seem to be an absolute necessity for two reasons, viz.: After this roof is on if no further stone work is provided it will stop all your quarry, stone shed, and derrick work, and throw most all that whole force into their cells for lack of work, as you cannot use over 50 to 75 men on the inside finish of these buildings; and again, the present prison population of the state and its rate of increase makes imperative demand for more cell-room

and it is generally conceded that Anamosa prison is the place to provide for it.

In this light it seems best to only ask for enough to put in the windows and brick arches for floors of center building after the roof is complete and then turn the bulk of your force upon the foundations of the north cell house, for which you will need \$25,000 in the first two years' work.

This \$25,000 includes the foremen's salaries for two years together with cement, lime, powder, tools, freight on stone and another bridge and cars to open the east end of quarry and dispose of the stripping.

The quarry can never begin to furnish such an amount of stone as will be required for another cell house unless prompt measures are taken to open it up more fully.

Besides the construction estimates there is one other item for which it seems to me especial provision should be made, and that is another boiler. Our boilers are now getting old, two of them being over seventeen years old and the other two thirteen, and in almost constant use and overloaded most of the time in winter. Good care has prevented any serious accidents, but of late repairs have been very numerous and go to show that they are weakening under the strain. This fall ought to see a new 80 horse power (54 inches by 16 feet) boiler in there to reinforce the ones carrying high pressure for electric lights and cooking. We have too much depending on these boilers in winter to take the risk of going through even one more winter if it can be avoided. Such a boiler, with the front and trimmings, will cost about \$1,000.

You understand how we were hampered on "contingent and repair fund" the past two years by reason of our estimate on this fund being cut down, and realize the importance of urging more liberal appropriation to this very necessary fund in the future. You should have fully \$7,000 next time.

If the legislature decide upon completing the female department, it will take \$10,000 to do it.

In conclusion I would present a summary of estimates, as follows:

## CONSTRUCTION.

To complete walls of center building.....	\$ 5,000
Roof and ceilings of center building.....	24,000
Windows of center building.....	1,848
Brick for arches of center building.....	1,000
Lime for plaster and mortar, center building.....	500
For work on north cell house.....	25,000
Warden's house.....	300
Special 80 horse power boiler complete.....	1,000
Contingent and repairs.....	7,000
Female department (if decided to complete).....	10,000
Total.....	\$ 75,648

Respectfully submitted,

J. FRANK BARNES,  
Master Mechanic and Architect.

REPORTS  
OF THE  
CHAPLAIN AND PHYSICIAN.

---

## CHAPLAIN'S REPORT.

*Hon. P. W. Madden, Warden Penitentiary at Anamosa, Iowa:*

DEAR SIR—I have the honor to present to you my biennial report for the period ending June 30, 1895.

Religious services have been held at the chapel each Lord's day at 7:40 A. M. We have congregational singing with a choir in the lead. We endeavor to preach the word which the great Master declares is the "seed of the kingdom."

For the command comes ringing downward through the centuries: "In the morning sow thy seed and in the evening withhold not thy hand, for thou knowest not whether shall prosper this or that."

Amid the rising splendors of prosperity the good seed is sown broadcast throughout the great wide world. Sowing the seed in the morning light. And although the evening of adversity has cast its cold shadows over these walls, still the Lord of the harvest is saying "*At evening withhold not thy hand.*" We are sowing in the shadows, but we are sowing not without hope.

### THE PRISON SUNDAY SCHOOL.

Last year the prison Sunday school averaged 216 in attendance, and this year will score a still better record. The teachers and superintendent are prompt and untiring in their work, and have earned our admiration and esteem by their efficient and unselfish service.

### THE FEMALE DEPARTMENT.

This department, though few in numbers, comes in for an equal share of religious service. A Sunday school is conducted in this department by some earnest Christian workers, and this little handful of women receive the same number of sermons as

the larger housefull of their brothers in the chapel, thus rendering the pulpit service in this prison just double what it is in almost the entirety of our penal institutions.

The separation of worshippers on the line of sex, has been thoroughly tested by one of the most vigorous and conservative religious bodies in the United States, and the results are simply a sweeping denial of the value and fitness of any such division in the worship of Him who said: "There is neither Jew nor Greek; there is neither bond nor free; there is neither male nor female, for ye are all one in Christ Jesus."

#### THE HOSPITAL FOR THE INSANE.

This is the only prison hospital for the insane in the state and presents a correct invoice of those who become insane after they receive their sentence. The ratio holds about thirty to the thousand, while the hospitals for the general population represent about one to every thousand. Incarceration increases and accelerates the tendency to insanity to a startling degree.

#### THE LIBRARY.

Our library contains about 3,200 volumes and furnishes a variety of valuable reading to the prisoners. It embraces the religious, historical, scientific, literary, humorous and fictitious. Each prisoner can receive only one book at a time, but may exchange them as often as twice a week if he desires. Over 2,000 copies per month are given out. In addition to the books of the library a Bible and a small dictionary are placed in each cell.

A bureau of free reading has sprung up under your management and, fostered by your advice, it has grown from a small beginning until at the present we are distributing 2,000 papers per month. These papers are in the main the best that come from the press. We depend on the unselfish kindness of the friends of humanity for our supplies.

#### EDUCATION.

Until the new building is completed it will be impossible to conduct a night school, so that the only educational opportunities at our command are within the cells. We supply school books to these men in their cells and encourage and assist them as best we can. About 100 take an interest in this line, their studies ranging all the way from the alphabet to higher mathematics and the classics, and their progress is for the most part really gratifying.

#### VOICES FROM THE CELLS.

With your encouragement I have continued to use in my personal work among the inmates, cards of inquiry into some of the important conditions that touch the value of human life. The response from eight hundred forms the basis for the following estimate: Fifty per cent were orphans; 35 per cent lost either father or mother; 15 per cent lost both parents; 672 had religious parents as follows: Catholic, 191; Methodist Episcopal, 182; Baptist, 92; Lutheran, 51; Presbyterian, 44; Christian, 39; Episcopal, 22; Protestant, 16; Advent, 3; Congregational, 10; United Brethren, 9; Jews, 4; Reform, 2; Mormon, 2; Protestant Methodist, 2; Dunkards, 2; Seceders, 1.

Three hundred and twelve of the inmates were church members: Catholic, 136; Methodist Episcopal, 65; Lutheran, 31; Baptist, 20; Christian, 18; Episcopal, 12; Presbyterian, 10; United Brethren, 5; Reform, 4; Jews, 2; Protestants, 2; Church of God, 2; Mormon, 1; Congregational, 1; Friends, 1; Evangelical, 1.

#### PERCENTAGE.

Orphans, 50 per cent; left home under twenty-one, 70 per cent; Protestant parents, 60½ per cent; Catholic, 23½ per cent; Irreligious parents, 16 per cent. Total abstinence, 10 per cent; occasional drinkers, 24 per cent; moderate, 41 per cent; habitual, 19 per cent; not reported .06 per cent. Visited saloons or other drinking resorts, 66 per cent. Attended church, 20 per cent. Gambled, 35 per cent.

There is something painfully suggestive in this calm invoice of thrilling facts. What a bold challenge to the home, the church, and to legislative bodies. The fatherless boys and motherless girls of this nation! What a problem for the millionaire society of the nineteenth century.

Churches reeking with perspiration in the endeavor to maintain their peculiarities, and steadily losing their grasp upon the young men and women of today; legislative wisdom armed with the sword of defense against some of the imminent perils of the nation, yet manacled with the handcuffs of public sentiment.

One hundred and three boys *under the age of 21* have marched in at these gates in the last two years. I appeal to the motherhood of our state. Mothers of Iowa, step this way a moment. Look at that long line of beardless boys! The state razor made no abrupt change in their youthful faces. Each one of them is

some mother's boy. Do you see that proud boy over there with a noble and manly bearing? His mother is in Heaven and her boy is in *prison*. The home of that mother and her boy was wrecked by the cyclone of iniquity that is furrowing its furious pathway through our fair and noble state. That mother was swept away on the fiery wings of that whirlwind that sent her boy adrift into the darkness pathless and perilous. "Though dead she yet speaketh." Those voiceless lips are saying to you, "Where is my wandering boy to-night?" Mothers of Iowa, arise in your God-given sovereignty and stamp out this enormous evil that is an outrageous affront to the motherhood of earth, and an open threat to her sons and daughters.

#### THE FLOWER MISSION.

This originated in the darkened home of Jennie Cassaday, one of the fair daughters of light, patient in suffering, peerless in faith, heroic in her zeal for humanity. And Frances Willard, that princess among women, catching the inspiration, gave to it world-wide proportions. Flower mission, rooted in affliction, touched by the sunshine of a cloudless faith, blossomed into promise under the fair skies of Kentucky, now spreads its branches over two continents, and drops its fragrant fruitage annually within these walls.

#### EASTER LETTERS.

Another child of Kentucky was adopted this year by the Iowa Christian Endeavor. Under the leadership of their excellent state secretary, Miss Nellie C. Goodell, many fell into line. One hundred letters floated into the prison cells on that memorable occasion of gladness and song. These letters, fragrant in spirit and wise in counsel, fell upon us like the dew upon Mount Hermon.

#### AWAKENED THOUGHT.

There is a growing sentiment in favor of the reformatory in prison life. To an awakened public sentiment we must look for a strong ally in the work of reform among this people, both before and after they are discharged.

#### PRISON MANAGEMENT.

Prison management is the bed rock upon which rests the entire structure of prison reform. In some portions of our

country even, every reformatory measure is viewed with suspicion by prison officials, and makes slow progress under their averseness or perverseness. And the results are that some of the prisons in the United States are a disgrace to the nation and an insult to civilized life. And they present to the whole world the bold failure of a prison management in which is strangled every generous impulse, and from which is stripped every agency of moral reform.

Human authority, savage and relentless, not only stifles moral reform but it invites mutiny, resistance and anarchy. A sceptre of cruelty lights the torch of the incendiary and explodes the bomb of nihilism. It is a stubborn fact that the throne of anarchy in Russia was built out of the clumsy wheels of justice and the prison bars of an unreasonable and outrageous cruelty. The exasperating tardiness of court proceedings, the wholesale and indiscriminate methods of arrest and the injustice and inhumanity of imprisonment laid deep and broad the foundations of hatred of the supreme authority that presided over such an array of contradictions to all the nobler and deeper sensibilities of the human heart. There are only two places on the globe where day and night seem to have dissolved partnership—the two frigid zones, the home of polar bears, icebergs and death. Only in regions where day and night are properly balanced do we behold the highest attainments of nature and art. And when the rigor of human authority is divorced from all the warmer and nobler sentiments of the human heart it crystallizes into a frigid sterility from which are swept all the fair flowers of promise and all the ripe fruitage of civilized life. But when human authority, prompt, inflexible and vigorous, is properly balanced by the calm dictates of wisdom and the sunshine of human kindness it touches the zenith of glory and permanence. When the royal house of Russia opened their jeweled hands in gorgeous generosity to their starving subjects they dealt a blow at nihilism more deadly and destructive than could have been delivered by all the most astute espionage, all the army of his constabulary and all the death-dealing dungeons of his empire.

I desire to express my unhesitating endorsement of the happy degree in which these supreme essentials in all earthly rulership have met in your management of this mixed multitude and all the varied and vital interests committed to your control in this prison.

For your kindness and unswerving interest in my humble work I desire to express my unqualified thanks, and I avail myself of this opportunity to express my appreciation of the courtesy and respect which has been tendered me by the orderly and efficient corps of officers and employes of this prison.

Respectfully submitted.

J. M. CROCKER,  
*Chaplain.*

## PHYSICIAN'S REPORT.

*Hon. P. W. Madden, Warden Anamosa Penitentiary:*

Since my last biennial report the number of inmates has increased to a much larger number. Some of the departments have been over-crowded; notwithstanding this we have maintained our usually healthy condition.

The criminal insane are all in comfortable quarters and well provided with suitable food and clothing. Their physical condition is excellent, marked improvement in nearly every case being noted; also in many instances their mental condition has improved—four have been discharged as cured.

The woman's ward is over-crowded and should be relieved by the completion, at once, of the woman's prison. Where they are now kept is not and never has been a suitable place for them; they are to near the insane who are often noisy and troublesome.

The hospital ward is kept as quiet as possible; the sick are provided with good beds and their comfort always considered by a very competent and trustworthy steward. We look forward to the time when the hospital for the sick of the main prison shall be completed and the building now in use kept exclusively for the purpose intended.

The main prison is in excellent sanitary condition, the grounds well kept as are the cell house and all the other buildings. The food is of good quality, well-cooked, with great abundance of all kinds.

The health of the prisoners has been good, the number treated in the hospital being 523 for the biennial period. The

number of calls and persons reporting for medical and surgical relief is for the two years 6,640, or an average of nine per day. Nine deaths have occurred, mostly from chronic and incurable diseases, one only having died from acute disease.

The water supply has not improved very materially since my last report. The state should have a well and a system of its own under the management of the prison authorities. The water supply for a large part of the period has been limited, and the service not good.

Thanking you for the many favors granted in caring for the sick and disabled, I remain as ever,

L. J. ADAIR, M. D.

ANAMOSA, July 1, 1895.

ANAMOSA, IOWA, September 6, 1895.

STATE OF IOWA, }  
COUNTY OF JONES, } ss.

I, P. W. Madden, warden of the penitentiary at Anamosa, Iowa, on my oath state that the foregoing report of affairs of the penitentiary for the twelfth biennial period from July 1, 1893, to and inclusive June 30, 1895, is true and correctly taken from the books of this institution.

P. W. MADDEN,  
*Warden.*

Subscribed and sworn to before me and in my presence by P. W. Madden the sixth day of September, 1895. Witness my hand and seal of my office hereto affixed, at Anamosa, Iowa, the day and year above mentioned.

[SEAL]

T. E. PATTERSON,  
*Notary Public in and for Jones County.*
