GOVERNOR

**OFFICE OF THE GOVERNOR**

PATTY JUDGE  
LT. GOVERNOR

January 30, 2007

To Members of the 82nd General Assembly,

We are pleased to submit the Fiscal Year 2008 budget for the State of Iowa pursuant to *Iowa Code* section 8.21 and our constitutional authority. Building on the progress our State has made over the past few years, this budget boldly begins to implement the important improvements that we are committed to achieving in education, economic development, and health care. By adopting the budget proposed today, we can truly build One Iowa of Unlimited Opportunities.

We are recommending increases in funds for every sector of Iowa's educational system, from pre-school education through higher education. We must increase our teachers' salaries to equal the national average, expand opportunities for pre-school education across the state, and make college education more accessible to all Iowans. Our budget proposes a \$70 million appropriation for teacher salary increases in Fiscal Year 2008, which is the largest single increase in teacher pay ever made in our state history. We also recommend a supplemental appropriation of \$2.5 million in Fiscal Year 2007 and an appropriation of \$10 million in Fiscal Year 2008 from the Rebuilt Iowa Infrastructure Fund to create a stem cell research center at the University of Iowa and significant increases in funding for the community colleges and Regents for faculty salaries and basic university operating costs.

We see an opportunity to move Iowa towards greater independence from foreign oil and to capitalize on our unique advantages in the developing biomass economy. Accordingly, we propose a transformation of our economy by creating a four-year \$100 million Iowa Power Fund. To jump start development of the Fund, we recommend an immediate Fiscal Year 2007 supplemental appropriation of \$25 million. This will help to make Iowa a leader in the renewable energy, alternative fuel, and clean technology industries as we set a goal of markedly reducing Iowa's dependence on expensive foreign oil over the next four years.

We recognize that we must expand health care coverage and do more to support healthy lifestyles among our citizens. We remain concerned about the number of Iowans who do not have access to affordable, quality health care. Our budget provides an increase in the cigarette tax of \$1.00 per pack in order to reduce the number of young and adult smokers and save more than 17,000 Iowans' lives annually. Iowans overwhelmingly support this increase, and the additional revenues will help to provide health care insurance for more than 250,000 needy chil-

dren as well as for another 6,500 presently uninsured parents, fully fund the Iowa Medicaid Program, increase funding for smoking cessation programs, and restore funds to the Senior Living Trust Fund.

We have proposed a budget based upon sound fiscal practices. We continue to provide for full funding of the state's Reserve Funds and for replenishing the Senior Living Trust Fund. In a departure from past practice, we recommend fully funding the Iowa Medicaid Program and restoring \$40 million to the Property Tax Credit Fund. While another \$119.9 million of property tax credits still needs to be funded, our proposal places us on a path to restoring this fund over the next four years. Finally, we strongly recommend that the Legislature avoid the past practice of under funding the costs of state employee salaries. This practice has led to serious understaffing levels in crucial areas.

We look forward to working with you in a bi-partisan manner to discover our potential and create 'One Iowa.' We believe that the budget proposal being transmitted today sets us on that course.

Sincerely,

Chester J. Culver  
Governor

Patty Judge  
Lt. Governor

# POLICY HIGHLIGHTS

- ACHIEVING STUDENT EXCELLENCE
- RENEWABLE ENERGY AS THE NEW ECONOMY
- HEALTHY OPPORTUNITIES
- KEEPING OUR COMMUNITIES SAFE
- CARING FOR OUR STATE INFRASTRUCTURE

This page intentionally left blank.

# ACHIEVING STUDENT EXCELLENCE

Our investment today in Iowa's children will produce large dividends tomorrow. We need to ensure that all Iowa residents have access to education and skill development so that they can be productive and contributing members of the community. Governor Culver and Lt. Governor Judge propose making the largest single increase in funding for pre-kindergarten to 12th grade education ever recommended by any Governor of Iowa. This investment in our human capital – Iowa's great people, our traditionally high-quality educational system, a 21<sup>st</sup> Century workforce development system – will help us attract the kinds of jobs and industries we want.

## **Expand Early Childhood Education**

Governor Culver and Lt. Governor Judge will jump-start existing pre-school education programs with an additional \$20 million commitment for Fiscal Year 2008. They propose to increase funding each year over four years until all four-year olds have access to quality preschool, creating a long-term, sustained funding mechanism for quality preschool programming.

## **Increase Teacher Salaries**

Governor Culver and Lt. Governor Judge propose an additional \$35 million appropriation for teacher salaries in addition to the planned increase of approximately \$105 million over three years that has already been approved by the Legislature. The Fiscal Year 2008 total increase of \$70 million recommended by Governor Culver and Lt. Governor Judge is the first step in a four-year plan to move the salaries of Iowa's teachers to the national average and begin the process of respecting the professional contributions of our best educators.

In addition to increasing the direct appropriation for teacher salaries, Governor Culver and Lt. Governor Judge's budget includes a 4-percent increase in allowable growth for Fiscal Year 2009 in order to provide approximately \$109 million in additional state aid for improving the quality of classroom instruction.

## **Develop a Senior Year Plus Program**

The Governor and Lt. Governor will develop a Senior Year Plus program to make available more college freshman-level courses to the high school student who demonstrates an ambition and a commitment to achieve first-year college level course work. They propose an appropriation of \$300,000 in Fiscal Year 2008 to develop the program and \$3 million in Fiscal Year 2009 for implementation.

## **Commit to Community College Excellence**

Now it is time to update our community colleges for the mission of reorienting Iowa's workforce to the challenges of the new economy. As we explore our State's potential in renewable energy and alternative fuels, community colleges must provide workers with the specific skills they will need to fill the jobs that are created. The community college system has grown and expanded to play multiple, vital roles in our State. Community colleges provide an invaluable vocational educational system; they provide centers of lifelong learning; they promote community education courses; and, frequently, they offer a stepping stone for students to enter our universities. Governor Culver and Lt. Governor Judge propose to invest \$12.4 million from the General Fund in additional funding in the community college system.

## **Create the All Iowa Scholarship Program**

Governor Culver and Lt. Governor Judge recommend a \$5 million appropriation for Fiscal Year 2008, followed by a \$25 million commitment for Fiscal Year 2009, to establish the All Iowa Scholarship Program. The All Iowa Scholarship Program will pay for up to one year of college at an Iowa Regents University or up to two years at an Iowa Community College. The program will encourage both student character and academic scholarship by requiring recipients to work hard and to "play by the rules" in order to receive state scholarship support. With the All Iowa Scholarship program, Iowa will make a commitment to 2007-08 high school juniors, and will provide payments to eligible students during the 2009-10

academic year. Appropriations provided for Fiscal Years 2008 and 2009 will be placed into an endowment for future payments.

### **Boost Funding for Higher Education**

Governor Culver and Lt. Governor Judge are committed to creating opportunities for all students to attend college. A General Fund increase of \$25 million to provide additional support for Iowa's three Regents Universities is recommended in Fiscal Year 2008. This additional funding will create an affordable four-year higher education option to encourage these students to consider Iowa's public universities.

### **Establish Iowa Center for Regenerative Medicine**

Governor Culver and Lt. Governor Judge support the potential of life-saving cures resulting from stem cell research in Iowa. In an effort to jump-start stem cell research initiatives in Iowa, Governor Culver and Lt. Governor Judge recommend a Fiscal Year 2007 General Fund supplemental appropriation of \$2.5 million to create the Iowa Center for Regenerative Medicine in Iowa City. This funding will allow the Board of Regents to immediately begin to formulate plans for their future endeavors in this field. To continue the momentum into Fiscal Year 2008, Governor Culver and Lt. Governor Judge recommend a \$10 million Rebuild Iowa Infrastructure Fund appropriation to provide additional funding for the Center. This Iowa Center for Regenerative Medicine will focus on responsible, state of the art, medical research dedicated to the promise of regenerative medical therapies.

### **Invest in the Board of Regents Institutions**

Governor Culver and Lt. Governor Judge are recommending the following non-General Fund appropriations for Regents institutions:

- University of Iowa Hygienic Laboratory - \$15.65 million;
- Tuition Replacement - \$10.3 million;
- Fire Safety and Deferred Maintenance - \$10 million;
- University of Iowa College of Public Health Building - \$9.1 million;
- Iowa State University Chemistry Building - \$2.2 million;
- University of Northern Iowa Electrical Distribution System – \$625,000; and
- University of Iowa Waterman Non-Profit Center—\$200,000.

### **Additional Increases in Student Achievement**

Governor Culver and Lt. Governor Judge recommend the following General Fund and non-General Fund increases :

- \$1.7 million for the Child Health Specialty Clinic and Area Education Agencies for special education services for eligible children from birth to 3 years of age;
- \$1.0 million to the Department of Education to begin developing an educational data warehouse;
- \$400,000 to support and encourage local school districts to share functions and reorganize;
- \$2.1 million to increase the maximum Iowa Tuition Grant award;
- \$250,000 for additional Iowa Vocational-Technical Tuition Grants;
- \$75,000 to increase the number of Iowa National Guard members receiving tuition assistance;
- \$274,000 for Iowa Public Television to develop, create and acquire programs for multicast services;
- \$200,000 for Vocational Rehabilitation services that lead to employment for Iowans;
- \$100,000 for ICN scheduling activities and ICN assistance;
- \$400,000 so the Department for the Blind can continue providing valuable services; and
- \$250,000 for the Iowa School for the Deaf and the Iowa Braille and Sight Saving School.

# RENEWABLE ENERGY AS THE NEW ECONOMY

## **Create the Iowa Power Fund**

Governor Culver and Lt. Governor Judge propose to create the Iowa Power Fund, an investment of \$100 million over four years that will help Iowa businesses expand rapidly into the high-growth renewable energy, alternative fuel and clean technology industries. Because of the importance of this program, they propose a Fiscal Year 2007 supplemental appropriation of \$25 million from the General Fund to start the Iowa Power Fund as soon as possible.

Many of the next generation of good jobs and companies we want to attract are in those renewable energy industries that can give Iowans energy independence from unstable foreign sources of oil. Iowa has already proven that it can feed the world. The Iowa Power Fund will make Iowa a renewable energy leader whose farmers can fuel the world.

As part of this initiative, Governor Culver and Lt. Governor Judge will form a public/private partnership to include business leaders, citizens, government agencies, labor officials, academic experts, and nonprofit leaders, who, as partners, will help to guide the process and carry out key projects financed by the Power Fund.

The Iowa Power Fund will help home-grown energy businesses get started or expand and will leverage new private investments in renewable technologies. Along with financial and technical assistance, State government will craft "next generation" utility regulations to launch a new growth spurt in Iowa's wind, solar, biofuels, biomass, other renewable sources, and clean coal technologies. This proposed overhaul will include an increase in Iowa's renewable power standards to remove practical obstacles so that innovative independent electricity generators will have access to markets for electricity.

## **Establish Director of Renewable Energy**

Governor Culver and Lt. Governor Judge call for a new Director of Renewable Energy to serve as the Executive Director of the Iowa Power Fund. This position, within the Governor's Office, will help to streamline permit processes and obsta-

cles to expanding renewable energy businesses without lowering standards for protecting Iowans' health and environment. This position will also secure more federal funding and attract R&D funding and venture capital, and make certain that Iowa State Government "leads by example" by maximizing cost-saving energy efficiency and/or energy conservation efforts in State operations and by helping new technologies get into the market place by using Iowa State Government's purchasing power.

## **Strengthen Main Street Iowa Program**

Governor Culver and Lt. Governor Judge propose to add \$1 million to the Main Street Iowa Program for more revitalization grants in Fiscal Year 2008. Since the Main Street Iowa program was enacted, over three dozen Iowa communities have been accepted into the Program. Citizens in these communities made an intense, committed effort to revitalize their main street businesses and downtown historic districts. When an old historic building is revitalized to fit a new purpose, the past meets the future and communities can showcase some of the best of what Iowa life has to offer. These concerted efforts to revitalize historic main streets help make small-town Iowa a place entrepreneurs, businesses, and workers can be proud to call home. Iowa's small towns have received more awards from the national Main Street Program than any other state in the nation.

## **Expand Technology Transfer**

In order for Iowa to create a future providing more good-paying jobs with good benefits for our citizens, Iowa must focus on creating industries of the future while building on our traditional strengths. Governor Culver and Lt. Governor Judge recommend a \$10.5 million appropriation to enhance the development of new technologies through this Technology Transfer Program within the Department of Economic Development.

## **Improve Water Quality**

Governor Culver and Lt. Governor Judge believe strongly that we have a responsibility to assure that our water is clean and safe. Clean water is essential to the growth of all Iowa communities. Under this budget proposal, \$5 million from the

Endowment for Iowa Health Account will be made available for the Watershed Improvement Review Board to continue to reduce soil erosion, improve water quality, provide flood control and protect other natural resources. Furthermore, this budget includes a \$4 million appropriation from the Rebuild Iowa Infrastructure Fund to help local governments upgrade their water treatment facilities.

Several communities are working to improve the quality of water in local lakes in order to enhance economic growth. Governor Culver and Lt. Governor Judge recognize these efforts and recommend \$8.6 million from the Rebuild Iowa Infrastructure Fund to be made available to communities to restore the quality of the water in our lakes. Improvements can include dredging, shoreline stabilization and acquisition of easements for critical habitats within watersheds.

# HEALTHY OPPORTUNITIES

Nobody needs to tell Iowans about the importance of having access to affordable, quality health care for living life to its fullest potential. Unfortunately, many citizens currently do not have the opportunity to access the care they need, when they need it. Over 300,000 hard-working Iowans presently cannot afford health insurance for themselves or their children. We must do better than this.

## **Expand Health Care for Uninsured Children**

One of Governor Culver and Lt. Governor Judge's highest priorities is to continue to strive towards assuring that all Iowans have health insurance coverage. Today 43,000 children who are eligible for either Medicaid or *hawk-i* are not enrolled in these programs. Governor Culver and Lt. Governor Judge propose outreach efforts totaling \$2 million, including a General Fund appropriation of \$745,000, to assure that all children eligible for health care under these programs will receive health care. The projected state cost of enrolling 25 percent of those children who are eligible but not yet enrolled in the State Children's Health Insurance Program is \$8.3 million in Fiscal Year 2008.

## **Provide Health Care for Parents**

While covering children is a first priority, children also need healthy parents. To that end, Governor Culver and Lt. Governor Judge recommend that a larger portion of parents become eligible for health care under the Iowa Medicaid Program as a first step. They recommend \$9.3 million to increase the deduction for earned income when determining eligibility for Medicaid enrollment. This small adjustment would help an additional 6,400 parents receive coverage.

## **Leverage the Tobacco Tax**

The health security of Iowans is threatened by the use of tobacco products, which costs all Iowans increased medical costs and lost productivity. In order to preserve the State's commitment to health care, smokers must assume greater responsibility for the costs of smoking-related illnesses. Governor Culver and Lt. Governor Judge recommend raising the cost of every pack of cigarettes by \$1.00 to ensure that fewer chil-

dren will begin smoking. According to the Campaign for Tobacco-Free Kids, this change is expected to prevent 38,600 youth from smoking, reduce the number of adult smokers by 20,200, and save more than 17,000 Iowans' lives annually. Projected annual revenues are \$138.4 million from the increase in the tobacco tax. These funds will be used to expand our health care program, fully fund the Iowa Medicaid Program, improve child welfare, provide programs for our seniors, and increase smoking prevention programs by approximately \$3 million.

## **Establish the Center for Regenerative Medicine**

As discussed earlier in the Achieving Student Excellence Section, Governor Culver and Lt. Governor Judge support the potential of life-saving cures resulting from stem cell research in Iowa. Governor Culver and Lt. Governor Judge recommend a Fiscal Year 2007 supplemental appropriation of \$2.5 million from the General Fund to create the Iowa Center for Regenerative Medicine at the University of Iowa and a Fiscal Year 2008 Rebuild Iowa Infrastructure Fund appropriation of \$10 million to provide additional funding for the Center.

## **Ensure Quality Nursing Home Care**

At some point in their lives, many older Iowans and their families are confronted with difficult choices about senior's long-term living needs. When that choice is a nursing home, we must ensure that elders receiving quality care. One way to do that is by supporting the Resident Advocate Committees in each nursing home. Governor Culver and Lt. Governor Judge are proposing the addition of four ombudsmen, at a cost of \$320,000, to assist Resident Advocate Committees.

## **Help Our Veterans**

Governor Culver and Lt. Governor Judge are proposing \$2 million for the Enduring Freedom Support Program to assist veterans. The Program's goals are to identify, screen, train, place, and monitor volunteer ambassadors to help returning veterans and their families access veteran-related and community resources. The focus will be on

employment, education and mental health services available in the community.

Additionally, Governor Culver and Lt. Governor Judge recommend a Fiscal Year 2007 supplemental appropriation of \$2 million for assisting injured veterans and a \$3.5 million appropriation to help veterans obtain home ownership, including a Fiscal Year 2007 supplemental appropriation of \$1.5 million.

### **Other Health Care Investments**

Governor Culver and Lt. Governor Judge also propose the following increases:

- \$17.2 million increase in child care funding to

fully implement the child care provider rate increases passed into law in the last Session of the General Assembly, as well as to pay for costs related to enrollment increases and to replace federal funds;

- \$1.5 million for the child care quality rating system;
- \$46.9 million increase in the Iowa Medicaid Program related to anticipated growth in enrollment and utilization in addition to federal program and funding changes;
- \$8.6 million for mental health and developmental disability community services;
- \$1.7 million for Child Health Specialty Clinics; and
- \$1.36 million for youth health care.

# KEEPING OUR COMMUNITIES SAFE

To protect the safety of Iowans and our communities, Governor Culver and Lt. Governor Judge recognize the need to enhance the State's correctional and public safety programs.

## Department of Corrections

### Supervise Sex Offenders

Governor Culver and Lt. Governor Judge's budget contains an additional \$1.8 million to pay for the increase in costs for supervising and managing convicted sex offenders and those released from prison to community supervision. This funding will provide 16 additional community supervision staff and will support treatment services.

### Oakdale Bed Expansion-Special Needs Unit

Governor Culver and Lt. Governor Judge propose a Fiscal Year 2008 appropriation of \$17.5 million to pay for the costs of operations and 290 new staff members at the newly constructed Special Needs Unit at the Oakdale Medical and Classification Center. This will provide primary care services in the infirmary, short-term recuperation and care in the ambulatory unit, geriatric care, and care for those inmates who have chronic debilitating medical illnesses. This Unit will allow care to be provided at one location, which will reduce transfers and provide mental health services for all types of offenders.

### Provide Substance Abuse Assessments

Governor Culver and Lt. Governor Judge recommend the expenditure of \$300,000 for substance abuse assessments at Oakdale for all in-coming offenders. Substance abuse assessments will provide detailed information about the level of treatment that each offender needs while in the care of the facility.

### Continue the Black Hawk County Drug Court

The Governor and Lt. Governor also propose new funding of \$112,000 to continue the operation of the Drug Court in Black Hawk County. The Drug

Court is a judicially supervised collaborative effort aimed to more effectively work with high-risk, non-violent substance abuse offenders.

### Increase Correctional Institutions Staff

Governor Culver and Lt. Governor Judge recognize the critical need for additional funding of \$900,000 for Iowa's correctional institutions to fill existing non-funded security positions. This Fiscal Year 2008 appropriation will fund an additional 20 security positions to complement the additional 110 new security positions at the Oakdale expansion, for a total of 130 new security positions at the Department of Corrections Institutions.

## Department of Public Safety

### Support Public Safety Officers

Governor Culver and Lt. Governor Judge propose an increase of \$3 million for the Department of Public Safety to pay for costs necessary to maintain the current contingent of officers. Funding increases will allow the department to purchase critical equipment, uniforms, supplies, and to provide training whose costs, in previous years have been funded through peace officer vacancies across the Department.

### Strengthen Internet Crimes Against Children Task Force

Governor Culver and Lt. Governor Judge's budget includes new funding of \$388,000 and three additional special agents to expand the Internet Crimes Against Children (ICAC) Task Force. Since its inception, the ICAC Task Force has made over 80 arrests of sexual predators who have attempted to meet and have sexual relations with children. Without the forensic capability of the Electronic Crimes Unit, these cases would frequently not have the evidence needed to prosecute these criminals.

This page intentionally left blank.

# CARING FOR OUR STATE INFRASTRUCTURE

Governor Culver and Lt. Governor Judge believe strongly that funding for infrastructure and capital projects should help improve the State's infrastructure and continue to provide for maintenance for the State's buildings.

## Transportation Projects

Transportation projects in the State are primarily funded by federal revenues and revenues from the Road Use Tax Fund. Except for some "off the top" expenses, these revenues are distributed to governmental entities based on a formula. Funding for State-level projects and operations comes through the Road Use Tax Fund and the Primary Road Fund. Transportation projects are reviewed and approved by the Iowa Transportation Commission, made up of seven commissioners appointed by the Governor and approved by the Senate. The transportation project approval process is done by means of an annual five-year Program.

## Department of Transportation

Governor Culver and Lt. Governor Judge are recommending continued infrastructure funding for capital improvement projects at Iowa's commercial and general aviation airports, and for aviation safety improvement projects at Iowa airports. Continued financial support to expand and improve recreational trails in Iowa is also being recommended. In Fiscal Year 2008, additional funding is recommended to support the Department's efforts on projects to develop and improve railroads in Iowa.

Recommendations include additional funds to cover cost increases for fuel, highway maintenance supplies, sand and salt for snow removal, and the production and issuance of driver's licenses. The Fiscal Year 2008 budget includes both increases and decreases associated with the opening of the Department's new Motor Vehicle Division building, and the relocation of the Park Fair Mall facility. Funding is also recommended for the costs of constructing a new maintenance garage in Clarinda.

## State Infrastructure and Capital Projects

Infrastructure and capital projects are usually funded through the tax on gambling revenues. For Fiscal Year 2008, the tax on gambling at the riverboats and racetracks are allocated as follows: the first \$60.0 million is deposited into the General Fund and the next \$20.0 million is dedicated to paying the debt on the Vision Iowa and School Infrastructure bonds. Any remaining amounts are to be deposited to the Rebuild Iowa Infrastructure Fund. Most infrastructure and major equipment purchases, along with allocations to other funds, are done from this Rebuild Iowa Infrastructure Fund.

Governor Culver and Lt. Governor Judge's budget will include a three-year appropriation of \$11 million for the Iowa State Fair Authority for construction of an Agriculture Exhibition Center. State funds for this project will be contingent on private contributions of \$5 million.

For further information, please review the financial summaries for the Rebuild Iowa Infrastructure Fund. Governor Culver and Lt. Governor Judge recommend Fiscal Year 2008 appropriations from the Rebuild Iowa Infrastructure Fund for the following projects:

- West Capital Terrace Restoration—\$1.6 million;
- Iowa Workforce Development Building Asbestos Abatement—\$4.0 million;
- Fort Dodge Community Based Corrections Residential Facility—\$2.45 million;
- Great Places—\$3.0 million;
- Community Attraction & Tourism—\$5.0;
- Technology Transfer/Targeted Industries—\$10.5 million;
- STARCOMM—\$2.0 million;
- Secure An Advance Vision for Education (SAVE) - \$10.0 million;
- University of Iowa Hygienic Lab—\$15.65 million;
- University of Iowa College of Public Health Bldg.—\$9.1 million;
- Iowa State University Chemistry Facilities—

\$2.19 million; and

- Center for Regenerative Medicine at the University of Iowa— \$10 million.
- New State office building—\$16.1 million;
- Capitol Interior and Exterior Restoration—\$6.3 million;
- Toledo Iowa Juvenile Home Powerhouse Replacement—\$7.0 million;
- Lake Restoration and Water Quality—\$8.6 million; and
- Water Quality Grants—\$4.0 million.

# ECONOMY & BUDGET DISCUSSION

This page intentionally left blank.

# NATIONAL ECONOMIC CONDITIONS

The State of Iowa's ability to fund services is heavily influenced by the economic environment. Economic conditions have continued to improve in the last few years. Most states, including Iowa, have enjoyed stronger growth in tax collections. This section is intended to place the budget outlook in the broader context of state and national economic conditions.

Current analysis by key economists and forecasting agencies such as Moody's Investors Services' Economy.com, Global Insight, Inc., and the U.S. Bureau of Economic Analysis (BEA), paint a stable picture of the national economy. Any analysis of a nation's economic progress will evaluate the level of gross domestic product (GDP), inflation, unemployment, consumer confidence and spending, and interest rates.

## Gross Domestic Product (GDP)

November 2006 data by the Bureau of Economic Analysis show third-quarter Real GDP growth at 2.2 percent. In the second quarter, real GDP increased 2.6 percent. According to a November 2006 report by BEA, "The increase in real GDP primarily reflected positive contributions from personal consumption expenditures, exports, equipment and software, nonresidential structures, and state and local government spending that were partly offset by a negative contribution from residential fixed investment." The deceleration in real GDP growth in the third quarter primarily reflected an acceleration in imports, a larger decrease in residential fixed investments, and decelerations in private inventory investment, in Personal Consumption Expenditures (PCE) for services, and in state and local government spending that were partly offset by upturns in equipment and software, in PCE for durable goods, and in federal government spending.

## Inflation

In 2005, the average inflation rate was reported at 3.39 percent. This was up from the 2004 average rate of 2.68 percent. The average rate for 2006 has been running at 3.3 percent. Analysts see the core inflation for consumer products as very benign, at just 1.3 percent, in line with recent evidence from the consumer price index.

## Employment/Unemployment

Job growth in December 2006 rose by 167,000. November and October figures were also revised by a combined 29,000 job gain. Service industries posted strong gains. The gain in the service industry was strong enough to offset losses in the manufacturing and construction industries. This has helped ease the fear that the weakening housing market and manufacturing growth might impact negatively on the economy. Within manufacturing the weakness was concentrated in autos and furniture and wood products. Professional/business, education/health and leisure/hospitality services posted the largest job gains in November; even retail trade posted its largest gain in a year.

The nation's unemployment rate held steady at 4.5% in December 2006, representing 6.8 million unemployed persons across the country. For all of 2006, the U.S. unemployment rate dropped to a six-year low of 4.6% as the economy added 1.8 million jobs. The labor force participation rate remained consistent between 66.0% and 66.2% all year and has not been above 66.2% since early 2003, as reported by the U.S. Bureau of Economic Analysis and Iowa Workforce Development in January 2007.

## Corporate Profits

In a recent BEA announcement, profits from current production (corporate profits with inventory valuation and capital consumption adjustments) increased \$61.5 billion in the third quarter, compared with an increase of \$22.7 billion in the second quarter of 2006. Current-production cash flow (net cash flow with inventory valuation and capital consumption adjustments) -- the internal funds available to corporations for investment -- increased \$30.2 billion in the third quarter, compared with an increase of \$1.1 billion in the second quarter of 2006.

Taxes on corporate income increased \$14.5 billion in the third quarter, compared with an increase of \$19.2 billion in the second. Profits after tax with inventory valuation and capital consumption adjustments increased \$47.0 billion, compared with an increase of \$3.6 billion. Dividends increased \$19.3 billion, compared with an increase of \$15.4 billion; current-production undis-

tributed profits increased \$27.8 billion in the third quarter, in contrast to a decrease of \$11.8 billion in the second quarter.

In November 2006, BEA reported that domestic profits of financial corporations decreased \$9.1 billion in the third quarter, in contrast to an increase of \$41.7 billion in the second. Domestic profits of nonfinancial corporations increased \$75.8 billion in the third quarter, in contrast to a decrease of \$32.8 billion in the second. In the third quarter, real gross corporate value added and profits per unit of real value added increased. The increase in unit profits reflected a slight increase in unit prices and decreases in both the unit labor and nonlabor costs corporations incurred.

## Housing

It has been widely reported nationally that the housing market has started to recover from the slowdown. The National Association of Home Builder's November 16, 2006 Housing Market Activity index stood at 68 in October and 72 in June 2006, suggesting a housing market peak and subsequent moderation. While the renewed interest in investing in public builders indicates that a turnaround is on the horizon, the enthusiasm could be somewhat premature, especially considering the near-record level of inventories of homes available for sale and quarterly reports from the public builders that include decreased new orders and rising cancellations of earlier orders.

According to Moody's Economy.com, while housing-market activity has come down significantly from its peak in the middle of last year, the correction process must still deplete the excesses generated during the recent boom. Many housing markets remain overpriced, and the inventory buildup continued to outpace demand. It has been suggested by analysts that the slight decline in mortgage interest rate and the weakening in house-price appreciation will not be enough to stop the drop in demand for homeownership. Moody's predicts that the unwinding housing market will put downward pressure on broader economic growth as residential construction activity contracts and the wealth effect turns into a drag on consumer spending. The correction will be substantial, but not so severe as to cripple the broader economy.

## Consumer Confidence

Moody's Economy.com reports that confidence readings were mixed in November and December 2006, although gains were larger than declines. Support came from stable energy prices and stock market gains. Slowdown from housing markets, debt burdens and slower job growth will limit any further gains going forward. The labor market is expected to remain supportive of incomes, and consumers will continue to spend the bulk of their incomes. The University of Michigan and Conference Board measures of consumer confidence both posted slight increase in December at 109.0, up from 105.3 in November 2006. These changes have been attributed to low gasoline prices, rising stock prices and tight labor markets. The daily Rasmussen index, a Chicago area survey sponsored by The Chicagoland Chamber of Commerce also posted a strong gain in November. This index is used to measure the region's level of economic confidence.

## The Federal Reserve and Monetary Policy

Moody's Economy.com reports that "For the third straight meeting, the Federal Open Market Committee (FOMC)- the policy making arm of the Federal Reserve System-held the fed funds rate steady at 5.25% on December 12, 2006, citing slowing growth, especially the weakening in the housing market." Although core inflation has moved higher in recent months, the Fed expects it to moderate. The FOMC maintained its tightening bias, referring to "additional firming that may be needed." However, with the Fed now pausing and growth below potential—particularly as a result of the ongoing weakness in housing—Moody's Economy.com expects the Federal Reserve to hold the fed funds rate steady at 5.25%, but to maintain a tightening bias for another few months. Further rate hikes are not expected because of decreasing energy prices which is helping to bring down inflation. The FOMC is also not expected to boost the federal funds rate above its current and slightly contractionary level of 5.25%. Moody's Economy.com expects the Fed to cut rates in the first half of 2007 as growth remains sluggish and energy prices further recede. Based on these developments, Moody's Economy.com foresees a weaker growth in import prices and slower growth in housing costs, leading to lower inflation in 2007 and 2008.

## **Fiscal Policy**

According to recent forecasts, the U.S. will see a budget deficit in Fiscal Year 2007 of about \$300 billion, about 2 percent of Gross Domestic Product (GDP). Given current trends, there is a structural imbalance between taxes and spending, and over the next few years the federal government will run budget deficits of around 2 percent of GDP. Over the longer run, greater federal spending on retirement programs will lead to even larger federal deficits, of about 3 percent of GDP, absent a dramatic reorientation in fiscal policy. A possible push by U. S. Congress for “pay-as-you-go” budgeting could produce fiscal discipline. The recent war efforts have added to the growing federal budget deficit.

According to Moody’s Economy.com, although revenues are seeing very large gains, the federal deficit is expected to deteriorate in coming years as the cyclical boost to tax collections comes to an end. At the same time, federal spending continues to grow rapidly.

## **Manufacturing**

According to Moody’s Economy.com, the manufacturing industry is the source of the most pronounced weakness in the labor market as the Big Three auto makers continue to offer buyout packages to unionized employees. Since peaking in June 2006, auto industry employment has fallen by 95,000. The majority of the lost factory jobs are directly related to layoffs or strikes at auto and auto parts manufacturing plants.

The domestic auto industry is not the only manufacturing segment seeing big job losses. The housing slowdown is prompting layoffs in wood product and furniture manufacturing. Although job losses have yet to hit the appliance manufacturing industry, the housing bust, coupled with the merger of the nation’s two largest appliance makers—Maytag and Whirlpool—will almost certainly lead to job losses in the industry. Outside of housing- and auto-related industries, the rest of manufacturing is posting decent gains, although recent data from durable goods orders and the ISM manufacturing index point to spreading weakness outside of these segments.

## **Energy**

Energy prices are expected to fluctuate greatly in 2007 and 2008. In the short term, prices are expected to be relatively flat. However, in the long term an upward pressure in prices are expected.

A barrel of crude oil was at \$60 by the end of 2006. This price has fallen to approximately \$55 in early 2007. According to a January 2007 report by Moody’s Economy.com, the warmer weather and an exodus of investor money from oil futures markets are the main reasons for the volatility in prices. Oil prices are expected to settle around \$45 by the end of 2008. The factors that will be driving energy outlook in the coming months and year include the weakness in the U.S. economy in 2007 which will soften global demand for energy and new sources of supply from countries such as Brazil, Angola, Saudi Arabia, Central Asia and the Gulf of Mexico. Others factors include production cut back by OPEC, and easing of investment in oil markets

## **Outlook**

Overall, the economy will continue to struggle with the ongoing housing correction and cuts in vehicle production and jobs. Much of the rest of the nation’s manufacturing base is also working to reduce a modest, but measurable, bulge in unwanted inventories. Real GDP grew only 2.2 percent annualized in the third quarter, and is not expected to expand any more quickly in the current quarter. According to Moody’s Economy.com, if housing and manufacturing were simply neutral with respect to the economy, then the economy would be expanding well above its estimated 3 percent potential. The job market is bending under the weight of slower output growth. Monthly payroll job gains have weakened to closer to 125,000 per month, down from the nearly 200,000 per month the economy was creating this time last year, after accounting for the forthcoming benchmark revisions to the jobs data. The low 4.5 percent unemployment rate may edge higher at the current pace of job creation. Conditions should justify expectations that the expansion will remain intact, but that growth will remain sufficiently soft to ensure that core inflation moderates back to within policymakers’ target rate sometime next year. Some Federal Reserve easing is also likely in 2007.

Moody’s Economy.com is projecting real GDP growth to slow from 3.3 percent in 2006 to 2.5 percent in 2007, with below-potential growth through next summer. Record corporate profits and a sturdy global economy and weaker dollar are behind the optimism that the economy will avoid recession, while the ongoing housing correction and manufacturing slump will ensure that enough slack develops in labor markets to

squelch inflationary pressures. The jobless rate is expected to rise in coming months, peaking at just under 5 percent, and core CPI inflation is expected to fall back firmly within the Federal Reserve's target by the fall of 2007. The Federal Reserve will thus have latitude to ease policy once or twice by mid-2007.

# IOWA ECONOMIC CONDITIONS

The State of Iowa uses the Iowa Economic Forecast, which is published and copyrighted by the Institute for Economic Research at the University of Iowa, as a resource in preparing its projections of revenues and expenditures. The December forecast was based on data through the second quarter of 2006 for state data and the third quarter of 2006 for national data. Personal income is expected to grow by 6.4 percent in 2006 and by 5.4 percent in 2007. Real Personal Income growth for 2006 and 2007 is projected at 3.2 percent and 2.1 percent respectively. Employment forecast for 2007 (based on data through the fourth quarter of 2006) is 1.1 percent and 0.9 percent for 2008.

Iowa's economy is supported by a diverse mixture of industry, agriculture, services and government employment. For example, in 1980, agriculture accounted for 11 percent of Iowa's gross domestic product by state (formerly gross state product), business services 11 percent, and the finance, insurance, and real estate sector 13 percent. By 2002, the shares of Iowa's gross state product had changed to 4 percent, 16 percent, and 19 percent, respectively. Currently in 2005, the shares of Iowa's gross domestic product by state had changed to 3.3 percent, 16.7 percent and 17.8 percent respectively.

However, agriculture continues to play an important role in the State economy. Iowa is a leader in the production of corn, soybeans, hogs and cattle. In addition, a larger part of Iowa's non-farm personal income is earned in agriculture-related industries, such as agricultural services, food and kindred products, leather and leather products, and chemicals, in addition to farm machinery.

The agricultural sector remained relatively stable during the last five years. The Iowa Workforce Development (IWD), in their 2004 Iowa Industry Profile, reported that agricultural employment in the state increased by 9.3 percent since the year 2000. In their upcoming 2005 Industry Profile, IWD is reporting increase in agricultural employment of 6.1 percent from 2004 to 2005. In the last five years agricultural employment has increased by 22 percent. Net farm income more than doubled from 2003 to 2004 but showed a 38.1 percent decrease in 2005. Cash receipts from all

commodities increased by 4.2 percent from 2004 to 2005.

## Farmland Values

The most recent survey of area bankers indicates that farmland values continue to rise. The Federal Reserve Bank of Chicago surveys farm bankers in the area four times a year to determine their best estimates of farmland values. According to their current survey results, "The value of "good" agricultural land in the Chicago District was unchanged in the third quarter from the second quarter of 2006. The quarterly results for the Chicago District states ranged from a loss of 2 percent in Illinois to 1 percent gains in Indiana, Iowa, and Wisconsin. The year-over-year increase in land values slowed to 7 percent after 10 quarters of 9 percent or greater growth.

It has been suggested that a key factor in areas with land value declines was lessened pressure from housing demand, aided by interest rates at high enough levels to slow demand from nonfarm investors. In areas with land value increases, there was continued demand for recreational purposes and interest in farm expansion to meet demand for biofuel inputs. In some areas, farmers have been priced out of land purchases; in others, farmers keep buying land. The proportion of responding bankers expecting farmland values to increase in the next three months remained under a quarter, with 5 percent expecting declines. Iowa respondents exhibited the highest expectations (30 percent) that farmland values will rise during the fourth quarter of 2006.

At least two-thirds of all states have forecasted no change in land values from October to December. In contrast with a year ago, more bankers have predicted higher rather than lower interest in land purchases among farmers (the difference was just over 10 percent). There was higher demand for farmland among nonfarm investors, though not as strong as a year ago, with 20 percent more of the respondents forecasting interest by non-farm investors going up versus down over the next three to six months. In Illinois, Indiana, and Iowa, demand from both groups is anticipated to increase. Michigan respondents expected lower demand from both groups, but Wisconsin bankers only expected lower demand by farmers. Thirty

percent of the respondents forecasted increases in the volume of farmland transfers from the previous fall and winter, while 16 percent anticipated lower volumes of transfers. Michigan and Wisconsin faced the opposite results from the rest of the Chicago District. From October 1, 2005 to October 1, 2006, Iowa farmland values have increased 5 percent.

### Personal Income

The University of Iowa Institute for Economic Research's latest outlook is for personal income in Iowa to grow by 6.4 percent in 2006, 5.4 percent in 2007, and 5.2 percent in 2008.

According to the current U.S. Bureau of Economic Analysis news release on State personal income, "U.S. personal income growth in the third quarter grew 1.4 percent (equaling its average growth rate since 2003:1) following a slower 0.8 percent gain in the second quarter, according to estimates released today by the U.S. Bureau of Economic Analysis. Growth picked up in all regions, with the strongest improvements occurring in the Far West and Mideast regions."

The U.S. Bureau of Economic Analysis also reports that "Third-quarter personal income growth in all regions exceeded inflation as measured by the national price index for personal consumption expenditures. The inflation rate fell to 0.6 percent in the third quarter down from 1.0 percent in the second."

For Iowa, Third Quarter Personal Income is reported at \$100,915 million as compared to the second quarter revised figures of \$99,503 million. This represents a 1.6 percent increase from the third quarter 2005 and a 1.4 percent increase from second quarter 2006. The current data also ranks Iowa 20<sup>th</sup> nationally in Personal Income growth.

Leading the contributions to the percent change in earnings by place of work in Iowa are the following sectors: farm, durable good manufacturing, transportation and warehousing, professional and technical services, health care and social assistance, and state and local government.

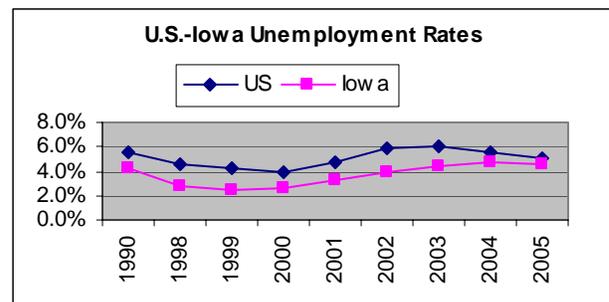

Table A-1 summarizes the State's personal income, monthly initial jobless claims, new incorporations and average unemployment rates for certain years from 1990 through 2005. It appears that the dramatic increase in new incorporation filed in 2002 was the result of previously unincorporated sole proprietorships choosing to become limited liability companies. Since that time, new incorporations filed have increased by 16.7 percent. Iowa's average annual unemployment rate

**TABLE A-1  
Iowa Economic Statistics**

Year	Personal Income (\$ Billions)	Initial Jobless Claims Per Month	New Incorporations Filed	Average Annual Unemployment Rate (Percent)
1980	\$28.2	22,411	6,956	5.8
1990	48.3	13,123	5,486	4.3
1998	71.3	11,637	6,366	2.8
1999	72.9	12,767	6,386	2.5
2000	77.7	12,778	6,251	2.6
2001	80.2	17,647	6,987	3.3
2002	81.9	17,426	9,678	3.9
2003	84.0	16,593	9,825	4.4
2004	91.4	13,990	11,786	4.7
2005	94.3	14,450	11,291	4.6

Sources: Labor Market Information Unit, Iowa Workforce Development, U.S. Department of Commerce, Secretary of State of the State of Iowa.

**Figure 1—U.S.-Iowa Unemployment Rate**

Source: Labor Market Information Unit, Iowa Workforce Development

has consistently been below the national average since the 1990's (see Figure 1). The average unemployment rate stood at 4.6 percent in 2005.

### Per Capita Income

Iowa per capita income has been trending upward since the mid 1980's. In 2005, Iowa per capita income as reported by the U.S. Bureau of Economic Analysis was \$32,315. This places Iowa's rank in this economic variable at 28 nationally. The average per capita income in the nation is reported at \$34,586. (see Figure 2).

### Employment

Iowa continues to have an average unemployment rate below the rate of the nation as a whole. Over the past 10 years, Iowa's unemployment rate has been between one and two percentage points below the national average. The U.S. unemployment rate for September 2006 was 4.6 percent, compared to 5.1 percent in September 2005. The seasonally adjusted percent unemployed for the State in September 2005 was 4.5 percent and the rate for September 2006 was 3.4 percent. In September 2006, there were 1,515,400 employed Iowans. This compares with the level of 1,485,200 employed Iowans in September 2005.

Iowa has a greater percentage of labor force employed compared to the nation as a whole and also has a larger percentage of its population actively participating in the labor force. While Iowa's

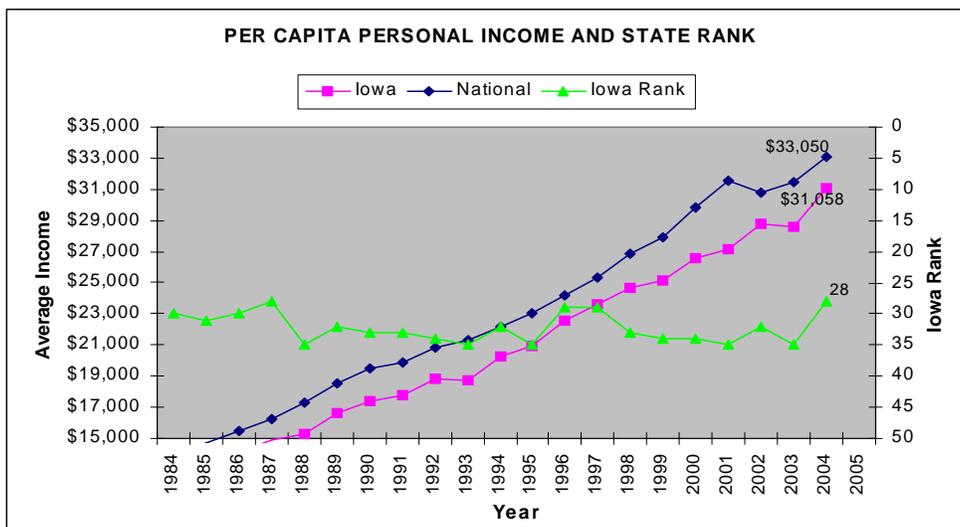

personal income lags that of the nation, its high levels of employment help maintain median household income at levels at or exceeding the national average. In 2005, Iowa's median household income was \$46,500, slightly higher than the national average of \$46,326.

### Exports

The rise in exporting industries has been an important factor in Iowa economic growth since the 1990's. Growth in exports of industrial machinery, instruments and measurement devices, electronics, specialized transportation equipment, chemicals and pharmaceuticals, and processed food products have helped diversify Iowa's economy. When combined with traditional farm commodities and livestock, total exports from Iowa increased by 22 percent, 11 percent and 13 percent in the years 1995 through 1997. The two year declines of 3 percent and 16 percent in 1998 and 1999 have virtually been erased. Subsequent years have seen steady and strong growth. Strong harvests worldwide continued to lead to an oversupply of agricultural commodities and the strong U.S. dollar also continues to make it more challenging for U.S. products to be competitive in international markets.

Iowa's export of value-added and manufacturing goods has increased since 2000 by 4.4 percent in 2001, 2.0 percent in 2002, 10.1 percent in 2003, and 22.1 percent in 2004, and continues to in-

Figure 2: United States and Iowa Per-Capita Income 1984-2005

Source: U.S. Department of Commerce, Bureau of Economic Analysis.

crease. In 2006, for the third year in a row, Mexico has replaced Japan and China as the second leading export country behind Canada partially due to the increase of value-added products shipped to Mexico.

Iowa's record level of exports has been fueled by large percentage increases in machinery, electrical machinery, cereals, milling, and organic chemicals. Overall, through the fourth quarter 2005, exports are up 10.6 percent over the same period in 2004.

### **Gross Domestic Product**

The Gross Domestic Product by state is the U.S. Commerce Department's measure of the value of all goods and services produced in the state each year. In 2005, Iowa's Gross Domestic Product was \$113.6 billion, which reflected 3.0 percent growth over the previous year. The largest shares

of the Iowa Gross Domestic Product were manufacturing (21.8 percent), services (11.9 percent), and finance, insurance, and real estate (9.9 percent), health and social assistance (7.0 percent), and government (11.9 percent). Agriculture accounted for just 3.3 percent of Iowa's gross domestic product. The nation's Gross Domestic Product (\$12.5 trillion) in current dollars grew by 6.3 percent between 2004 and 2005.

### **Iowa's Population**

In 2000, the State ranked 30th in number of inhabitants among the fifty states, the same as in 1990. Iowa's population increased by 5.4 percent from 1990 to 2000. The population growth is projected to increase further by 2.9 percent by 2010. Although this is lower than the national rate projected at 9.8 percent, it is still sizable given the total makeup and population of the state.

## COMPONENTS OF THE IOWA ECONOMY

### Nonagricultural Economy

Over the past 15 years, significant changes have occurred in the mix of nonfarm wage and salary employment. While payroll jobs in Iowa grew by 20.8 percent, jobs in the business services sector grew by 63.3 percent and in the financial services

sector by 41.6 percent. Conversely, manufacturing jobs increased by 4.9 percent. Table A-2 summarizes Iowa's nonagricultural workforce by industry category for certain years from 1990 through 2005.

**TABLE A-2**

Source: U.S. Department of Commerce, Bureau of Economic Analysis.

The growing diversification of Iowa's economy has caused the State's economy to more closely resemble that of the nation. Growth in professional and business services, financial services, education and health has offset relative declines in manufacturing and government.

Tables A-4 and A-5 summarize Iowa's total earned income, by industry type, for the years 1980 through 2005 on a nominal dollar basis. The data in Table A-4 are based on the 1987 Standard Industrial Classification ("SIC"). Beginning with the year 2002, the U.S. Department of Commerce is using the North American Industry Classification System ("NAICS"), and the data in

\* Income includes wages and salaries, other labor income, proprietor's income, and corporate dividends that originate within a given industry in Iowa.

### **Agricultural Economy**

The agricultural sector remained relatively stable during the last five years. However, there was a 33 percent decline in agricultural income from 2004 to 2005. The Iowa Workforce Development, in their 2004 Iowa Industry Profile, reported that agricultural employment in the state increased by 9.3 percent since the year 2000. The majority of this increase in employment was experienced in the Hog & Pig farming with approximately 412 more jobs, the Dairy Cattle and Milk Production with 400 more employees, and the Chicken Egg production industries with 248 more workers. Net farm income declined 38.1 percent from 2004 to

2005 after doubling from 2003 to 2004 as shown in Table A-6. Cash receipts from all commodities (Table A-7) also increased by 4.2 percent from 2004 to 2005. The value of farmland increased by 5 percent from October 1, 2005 to October 1, 2006. This increase in value was triggered by increases in the Northeast, South-central and Southeastern counties of the state. Iowa is also implementing strategies to better market its products. These trends continue to place Iowa in a competitive position in the global marketplace. Other sectors experiencing an increase include manufacturing at 5.7 percent, finance and insurance at 7 percent, and government and government enterprises at 4.8 percent.

Table A-6 summarizes realized gross and net income from farming in Iowa for certain years from 1990 through 2005.

## Iowa Outlook

The Iowa Economic Forecast is prepared using the Iowa Forecasting Model which has been developed and is maintained by the Institute for Economic Research at the University of Iowa. The model is estimated each quarter using the latest national state his-

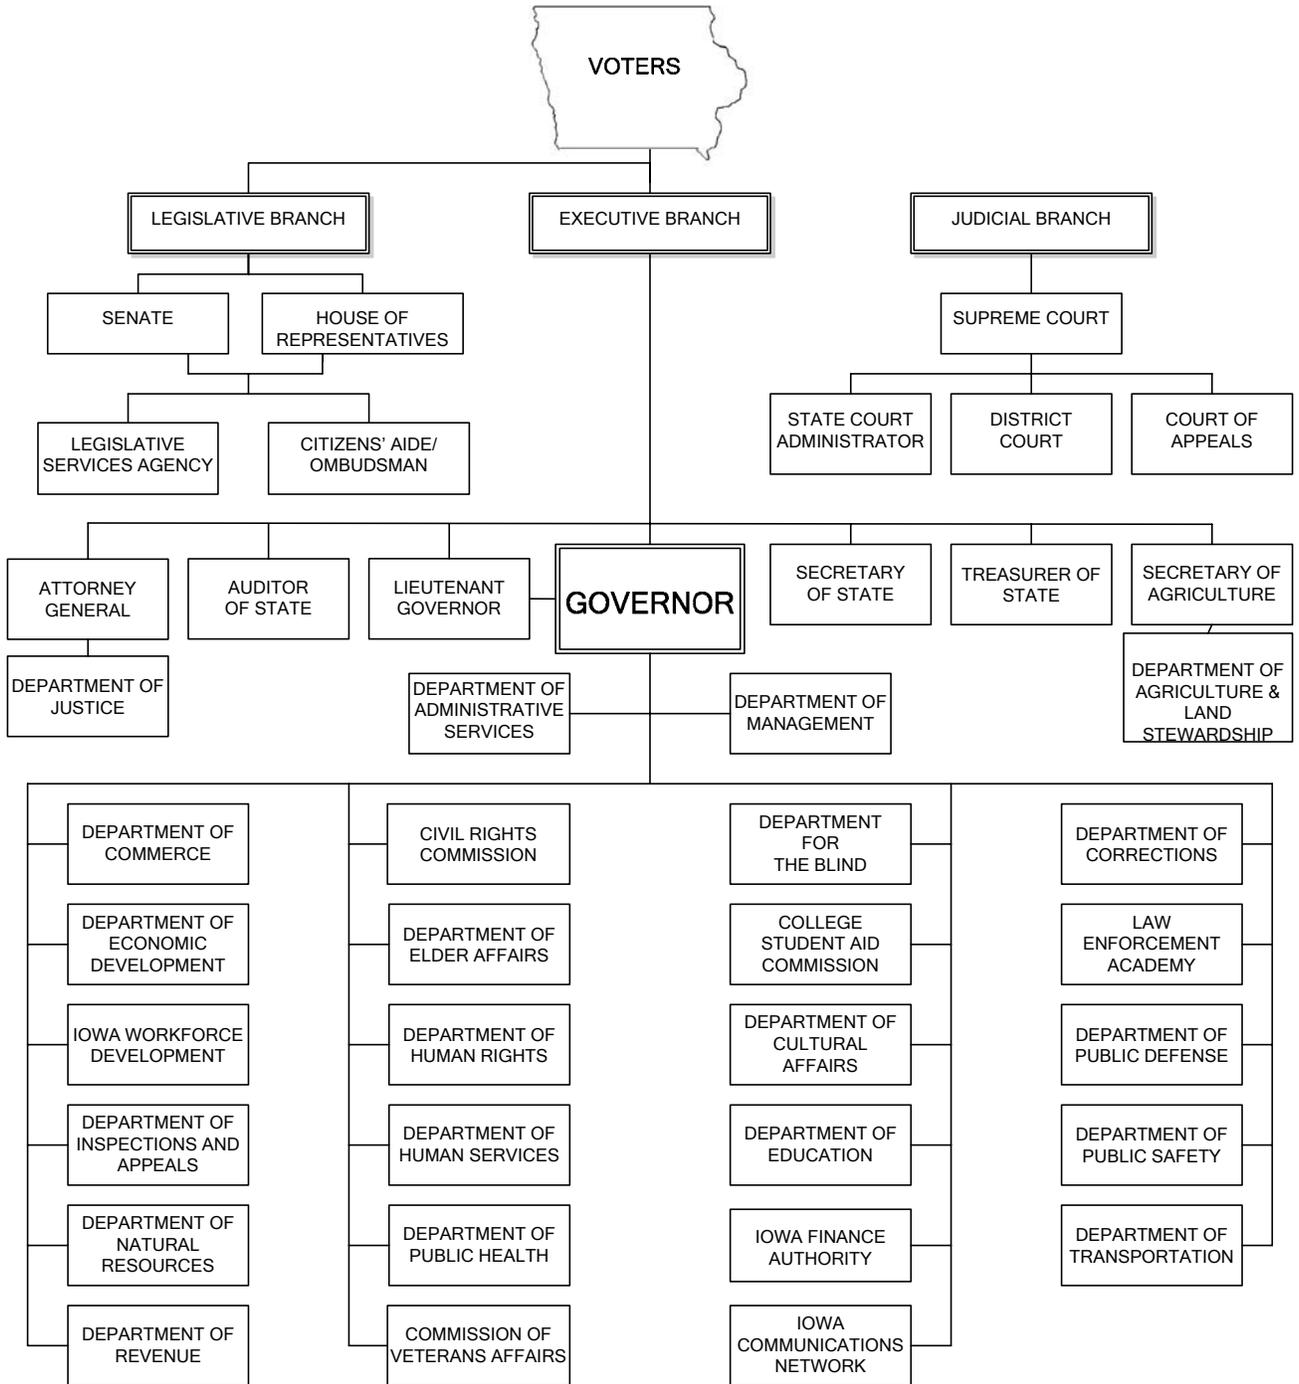

torical data series. The data is obtained from commercial and government electronic data services such as Citicorp's Citibase and the Census State Data Center of the U.S. Department of Commerce. Table A-8 sets forth certain historic and projected economic information on the State

**TABLE A-8**

# STATE OF IOWA ORGANIZATIONAL CHART

# REVENUE SOURCES AND ESTIMATES

The General Fund is primarily comprised of the State's major tax revenues, such as Personal Income Tax, Sales and Use Tax, and Corporate Income Tax. For Fiscal Year 2006, these taxes make up approximately 88 percent of the General Fund revenue. The remaining 12 percent is a combination of lesser taxes such as Inheritance Tax, Insurance Premium Tax, Cigarette and Tobacco Tax, Franchise Tax, along with fees and other revenue sources. Transfers from other funds to the General Fund also occur.

All expenditures from the General Fund must be appropriated by the Legislature. The appropriations from the General Fund expire at the end of the State's Fiscal Year (July 1 to June 30), unless the Legislature specifically provides for those funds to carry forward into the following Fiscal Year.

## Official Revenue Estimates

As with a family budget, state government must live within its means, and the Iowa Constitution prohibits deficit spending. To help ensure accurate estimates, the state has a consensus revenue estimating process, where both the executive branch and the legislative branch must agree on a revenue estimate to be used in the budget process.

The revenue forecast is made by a three-person panel (Revenue Estimating Conference) consisting of a representative of the Legislature (the Director of the Legislative Services Agency), a representative of the Governor (currently the former Director of the Department of Revenue), and a third person agreed upon by the other two. They meet quarterly and arrive at the official revenue estimate used by all parties in the budget process. In December of each year they establish the official estimate that will be used by the Governor and the Legislature in crafting the next year's state budget. By statute, both the Governor and Legislature cannot spend more than 99 percent of this revenue estimate.

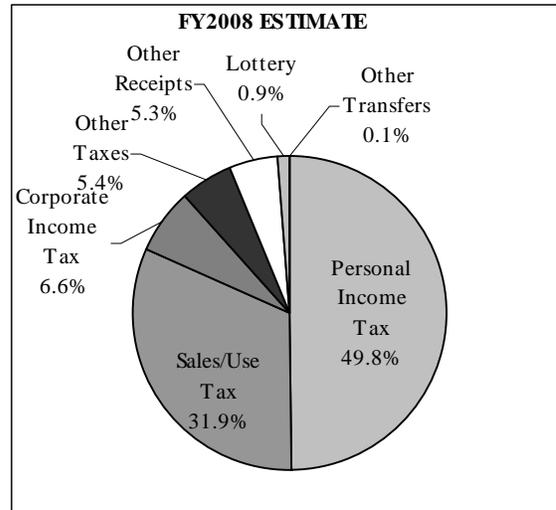

## General Fund

Table 1 shows historical trends in General Fund receipts from Fiscal Year 2000 to Fiscal Year 2008. For Fiscal Year 2008, net General Fund receipts are estimated at \$5,751.6 million. Comparatively, the net General Fund receipts for Fis-

cal Year 2007 are estimated at \$5,567.4 million, a difference of \$184.5 million.

The specific sources of the Fiscal Year 2008 General Fund receipts and their percentages are shown in Figure 1. The data in Figure 1 show per-

Figure 1

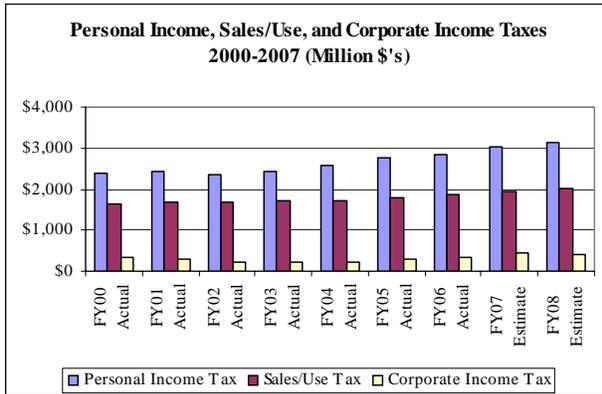

sonal income tax at 49.8 percent, Sales/Use tax at 31.9 percent, and corporate income tax at 6.6 percent. These three taxes make up 88.3 percent of general fund receipts, with the remaining taxes contributing 11.7 percent of receipts.

A close examination of the three major sources of General Fund receipts shows a relatively steady and modest increase over the years. This general increase was in spite of the fact that for Fiscal Year 2002 and Fiscal Year 2003 personal income tax receipts were down from the previous fiscal years.

**Personal Income Tax.** Personal income tax revenues are estimated at \$3,027.0 million in the Fiscal Year 2007, an increase of 6.1 percent over the actual revenues for the Fiscal Year 2006. For the Fiscal Year 2008, the estimate is \$3,150.3. This represents a 4.1 percent increase from the Fiscal Year 2007 estimate. Personal income tax revenues are expected to benefit from continued modest increases in personal income tax, offset by changes in withholding tables on both April 1, 2005 and April 1, 2006 (see Table 1 and Figure 2).

**Figure 2**

**Sales/Use Tax.** Sales/use tax revenues for the Fiscal Year 2007 are estimated at \$1,931.9 million, an increase of 2.7 percent over the revenues for the Fiscal Year 2006. For the Fiscal Year 2008, the estimate is \$2,023.1. This represents a growth of 4.7 percent. The sales tax estimate reflects modest growth in taxable sales and changes in state tax legislation (see Table 1 and Figure 2).

**TABLE 1**

	FY2001 ACTUAL	FY2002 ACTUAL	FY2003 ACTUAL	FY2004 ACTUAL	FY2005 ACTUAL	FY2006 ACTUAL	FY2007 ESTIMATE	FY2008 ESTIMATE

Miscellaneous Tax	1.3	1.5	1.1	1.0	0.6	0.6	1.0	1.0
Other Receipts	338.4	345.7	311.5	332.0	338.0	343.3	330.9	332.5
Total Transfers	108.5	305.8	128.9	57.5	88.4	144.0	62.4	62.4
Accruals (net)	-25.3	31.7	-44.9	83.0	-31.4	54.0	17.0	12.0
Refunds	-550.7	-663.1	-647.3	-715.0	-696.9	-586.0	-567.6	-592.6
<b>Net Receipts</b>	<b>\$4,647.0</b>	<b>\$4,681.9</b>	<b>\$4,483.6</b>	<b>\$4,683.5</b>	<b>\$4,929.0</b>	<b>\$5,382.7</b>	<b>\$5,567.4</b>	<b>\$5,751.6</b>

**Corporate Income Tax.** Corporate income tax revenues for Fiscal Year 2007 are estimated at \$433.3 million, an increase of 24.3 percent from the revenues for the Fiscal Year 2006. For Fiscal Year 2008, the estimate is \$420.6, a decrease of 2.5 percent over the Fiscal Year 2007 figures. The change in corporate profits anticipates a leveling off of corporate tax liability in the near future (Table 1 and Figure 2).

**Other Taxes and Revenues.** The make up of this category of general fund receipts can be seen in Table 1. It includes: inheritance tax, insurance premium tax, cigarette tax, tobacco tax, beer tax, franchise tax, and miscellaneous tax. This category also includes lottery and other transfers. Other taxes and revenues for the Fiscal Year 2007 are estimated at \$725.8 million, a decrease of 12.6 percent from the revenues for Fiscal Year 2006. For Fiscal Year 2008, the estimate is \$738.2, an increase of 1.7 percent (see Table 1).

### **General Fund Revenue Adjustments**

In order to continue to provide essential state services for Iowa, Governor Culver and Lt. Governor Judge recommend the following General Fund revenue adjustments for Fiscal Year 2007 and Fiscal Year 2008:

- Increase in the cigarette tax, effective April 1, 2007, by \$1.00 per pack for a revenue increase of \$32.0 million in Fiscal Year 2007 and \$138.4 million in Fiscal Year 2008;
- Require corporations to file combined reports for Iowa corporate income tax purposes for a revenue increase of \$25.0 million in Fiscal Year 2008;

- A tax amnesty program within the Department of Revenue during Fiscal Year 2008 which is estimated to bring in an additional \$16 million in collections;
- Increase the State Earned Income Tax Credit to 10 percent of the Federal Earned Income Tax Credit, with an estimated revenue reduction of \$4.3 million;
- Create an alternative energy fuel vehicle tax credit at 20 percent of the federal tax credit for an estimated revenue reduction of \$20 million;
- Additional resources and staff within the Department of Revenue which is expected to bring an additional \$4.6 million in Fiscal Year 2008 in collections; and
- Increase in the fees collected for reimbursement due to regulation of additional riverboats, fire marshal inspections and banking regulation for a total of \$1.5 million.

### **Net Receipts**

Net receipts comprise all receipts and transfers adjusted for accruals and refunds. These are the funds that are subject to appropriation. Net receipts for Fiscal Year 2007 are estimated at \$5,567.4 million, an increase of 3.4 percent from Fiscal Year 2006. For Fiscal Year 2008, the net receipts are estimated at \$5,751.6 million, an increase of 3.3 percent. These increases reflect the general positive trend in economic conditions (see Table 1). It is based on these net receipts that the fiscal year expenditures from the General Fund are planned.

This page intentionally left blank.

# SUMMARY OF FINANCIAL INFORMATION

## FOR THE GENERAL FUND

The General Fund receives those revenues of the State not specifically required to be deposited in other funds. General Fund revenues are obtained from the payment of State taxes and non-tax sources. Major tax revenues credited to the General Fund include the personal income tax, corporate income tax, sales/use tax, and certain other taxes and revenues described in the subsequent Financial Details Sections.

The major sources of General Fund expenditures are for Education, Health and Human Services, Justice, Economic Development, Agriculture and Natural Resources, and Administration and Regulation. Information on Governor Chet Culver and Lt. Governor Patty Judge's recommendations for Fiscal Year 2008 appropriations are described in more detail in subsequent sections.

### **Fiscal Year 2006 Summary**

The originally enacted General Fund budget of \$4,988.8 million was predicated on 3.4 percent growth in General Fund revenues, as projected by the State's Revenue Estimating Conference (REC) on April 8, 2005. This estimate reflected the expectation that revenue growth would continue at a moderate pace given the economic outlook.

At its October 14, 2005 meeting, the REC revised upward its Fiscal Year 2006 General Fund revenue estimate upward to \$5,024.1 million. This was based upon the revised base of Fiscal Year 2005 actual revenue growth of 5.2 percent and continued expectation that revenue growth would continue at a normal pattern. On December 12, 2005, the REC again increased the revenue estimate to \$5,075.8 million. The increase from the October 2005 meeting reflected an acknowledgement that year-to-date revenues were growing faster than expected. An additional revision was made at the March 24, 2006 meeting to increase the General Fund revenue estimate to \$5,219.7 million, again acknowledging that year-to-date revenues were growing faster than expected.

During the 2006 Legislative Session, the General Assembly approved \$87.5 million in General Fund supplemental appropriations for Fiscal year 2006. The largest supplemental appropriation was to the Iowa Medicaid Program (Medicaid) in the Department of Human Services for \$38.4 million. Another \$35.3 million was appropriated to the Health Care Transformation Account in the Department of Human Services and is related to the final intergovernmental transfer the State of Iowa received from the Federal Government as a negotiated settlement to end the intergovernmental transfers. Most of the other supplemental appropriations were to help in general operations of various departments.

Also during this legislative session, the General Assembly approved the transfer of \$159.9 million of the ending General Fund balance to the Property Tax Credit Fund for Fiscal Year 2007 expenditures, prior to the transfer to the Cash Reserve Fund and a transfer of \$2.8 million to the Board of Regents to be used for Fiscal Year 2007 expenditures at the Regents Institutions.

During April, May and June 2006, and throughout the accrual period, actual General Fund revenue collections continued to exceed the official REC projections. At the close of the fiscal year, revenue collections totaled \$5,382.7 million, which was a 9.2-percent growth rate. As a consequence, after the transfers to the Property Tax Credit Fund and the Board of Regents discussed earlier, and also taking into account the statutory transfer to the Senior Living Trust Fund of \$49.9 million, the General Fund ending balance for fiscal year 2006 totaled \$149.4 million.

### **Fiscal Year 2007 Update**

After legislation was passed and Governor Vilsack's actions taken into account, Fiscal Year 2007 started on July 1 with estimated Total Net General Fund receipts of \$5,350.9 million. Net General Fund appropriations for Fiscal Year 2007 were \$5,296.3 million. After taking into account estimated reversions, this left an ending balance for the General Fund of \$67.1 million.

At subsequent meetings of the Revenue Estimating Conference, the General Fund revenue estimate was revised upward, and is now \$5,599.6 million. This leaves a projected General Fund ending balance of \$261.9 million for Fiscal Year 2007.

In July 2006, the Executive Council approved \$4.8 million to be spent by the Department of Public Health for pandemic flu vaccinations from the Fiscal Year 2007 budget. Also, Governor Culver and Lt. Governor Judge recommend the following supplemental appropriations be approved for Fiscal Year 2007:

- \$25.0 million to the Iowa Power Fund to jump start the Fund. As described in a previous section, this Fund will help home-grown energy businesses get started or expand and will leverage new private investments in renewable technologies;
- \$8.0 million to the Iowa Medicaid Program for increased Medicaid expenses;
- \$4.0 million to the Department of Economic Development to implement the additional programs for targeted small businesses;
- \$3.4 million to the Department of Corrections to continue staffing of the completed institution at Oakdale and
- \$1.9 million to the Department of Corrections for increased costs and additional staffing at other institutions;
- \$700,000 to the Department of Public Safety for staffing to regulate additional riverboats, increase security detail, additional funding for DNA testing, and additional costs at the Fire Marshal office;
- \$100,000 to the Department of Revenue for additional startup costs associated with the Property Assessment Appeals Board;
- \$1.2 million to the Department of Administrative Services for utilities due to higher than anticipated costs and the addition of the Records and Property Center in the spring of 2007;
- \$2.0 million to the Injured Veterans Grant Program;
- \$1.5 million to the Veteran Homebuyer Program at the Department of Veterans Affairs; and
- \$2.5 million is recommended as start-up funding to the University of Iowa for the Iowa Center for Regenerative Medicine at the Board of Regents.

In Fiscal Year 2005 and Fiscal Year 2006, legislation was passed transferring \$159.7 million in Fis-

cal Year 2005 and \$159.9 million in Fiscal Year 2006 from the ending balances of the General Fund to the Property Tax Credit Fund to pay for property tax credits. Governor Culver and Lt. Governor Judge recognize that this cannot be an ongoing practice. Therefore, while they recommend a transfer of \$119.9 million of the ending balance in Fiscal Year 2007 go to the Property Tax Credit Fund, they also recommend \$40.0 million in Fiscal Year 2008 be appropriated to the Property Tax Credit Fund, starting the practice of bringing the credits back to the General Fund. Also, Governor Culver and Lt. Governor Judge propose a \$25 million Commercial Property Tax Relief Plan.

### **Fiscal Year 2008**

Governor Culver and Lt. Governor Judge will provide unwavering support for the financial responsibility of the State. The State enjoys high credit ratings with Standard and Poor's continuing to give the State a rating of AA+, the second highest possible rating, along with an outlook as stable. Moody's ratings for the State continue to be Aa1, also the second highest rating, and also with a stable outlook. Fitch Ratings, in their latest rating, upgraded the State to AA+, their second highest rating.

Governor Culver and Lt. Governor Judge have developed their Fiscal Year 2008 budget recommendations around the fundamental principle of a balanced budget that looks not only at the short term but also the long term. Their Fiscal Year 2008 budget is balanced and meets the 99 percent expenditure limitation. It also reduces the use of one-time funds and expands on revenue diversification through corporate income tax generation, along with an increase in the cigarette tax.

With the recommended budget changes, the State will end Fiscal Year 2008 with an estimated ending balance of \$189.1 million.

The following pages reflect the actual, budgeted, and recommended Estimated Condition of the General Fund of the State of Iowa for Fiscal Year 2006, Fiscal Year 2007, and Fiscal Year 2008, respectively, along with related tables reflecting the details of the amounts reported in the Estimated Condition of the General Fund and the financial summaries of other major funds.

## **REBUILD IOWA INFRASTRUCTURE FUND**

The Rebuild Iowa Infrastructure Fund was established in Fiscal Year 1996 in the *Iowa Code* to provide funding for public infrastructure-related expenditures. Initial revenues into the Fund were supplied by a transfer from the GAAP Deficit Reduction Account and from the interest earnings of the Cash Reserve and Iowa Economic Emergency Funds. Starting in Fiscal Year 1997, tax revenues, fees and licenses from gambling were deposited into the fund. The Fund retains all interest and earnings on moneys in the Fund. Moneys in the Fund are expended at the direction of the Iowa Legislature.

## **VERTICAL INFRASTRUCTURE FUND**

The Vertical Infrastructure Fund (VIF) was created by legislation during the 2004 Session of the 80th General Assembly. Moneys in the Fund are used as appropriated by the General Assembly for public vertical infrastructure projects. The VIF Code section defines “Vertical infrastructure” as including only land acquisition and construction, major renovation, and major repair of buildings, all appurtenant structures, utilities, and site development. “Vertical infrastructure” does not include routine, recurring maintenance, debt service, or operational expenses or leasing of a building, appurtenant structure, or utility without a lease-purchase agreement. In Fiscal Year 2006 and Fiscal Year 2007, \$15 million was appropriated each year from the Rebuild Iowa Infrastructure Fund to the Vertical Infrastructure Fund. For Fiscal Year 2008, \$50 million is to be appropriated from the Rebuild Iowa Infrastructure Fund.

## **TECHNOLOGY REINVESTMENT FUND**

The Technology Reinvestment Fund was created during the 2006 Legislative Session in Iowa Code section 8.57C. The moneys in the Fund is to be appropriated by the legislature and is to be used for the acquisition of computer hardware and software, software development, telecommunications equipment, and maintenance and lease agreements associated with technology components and for the purchase of equipment intended to provide an uninterruptible power supply. A standing limited General Fund appropriation of \$17.5 million annual is made to the fund.

## **TOBACCO SECURITIZATION TAX EXEMPT BOND PROCEEDS RESTRICTED CAPITAL FUND**

The Tobacco Securitization Tax Exempt Bond Proceeds Restricted Capital Fund was created to receive the tax-exempt bond proceeds which resulted from Iowa's participation in the Tobacco Securitization process. In Fiscal Year 2002, the Fund received \$540 million in tax-exempt bond proceeds. The tobacco settlement agreement established restrictions on the use of the tax-exempt bond proceeds. The bond proceeds and the interest earned may be used for qualified capital projects in accordance with Internal Revenue Code regulations. Qualified capital projects include expenditures for depreciable assets such as facilities construction and renovation and purchases of equipment. Expenditures which do not qualify include operational costs and expenses associated with routine maintenance. The Internal Revenue Code requires all tax-exempt bond proceeds to be expended in accordance with a defined spending schedule. With Fiscal Year 2007 being the last year of the spending schedule, the balance of the bond proceeds, including any remaining interest earned, must be expended.

## **ENDOWMENT FOR IOWA'S HEALTH FUND**

The Endowment for Iowa's Health was created by legislation during the 2000 Session of General Assembly. The fund receives net proceeds made by tobacco companies in settlement of lawsuits per *Iowa Code* section 12E.1b (2). The statute further provides that \$55 million is transferred to the Healthy Iowans Tobacco Trust in Fiscal Year 2001. Each subsequent year the amount of the transfer is increased by 1.5%.

## HEALTHY IOWANS TOBACCO TRUST FUND

The Healthy Iowans Tobacco Fund is created in *Iowa Code* section 12.65 and receives a portion of the receipts from tobacco companies in settlement of lawsuits per *Iowa Code* section 12E12.1b (2). Funds are subject to appropriation by the General Assembly and have been targeted to tobacco and substance abuse prevention and treatment as well as medical services.

## **ENDOWMENT FOR IOWA'S HEALTH RESTRICTED CAPITALS FUND**

The Endowment for Iowa's Health Restricted Capitals fund was created in Fiscal Year 2006 to account for the tax exempt portion of the tobacco settlement refunding proceeds. The bond proceeds and the interest earned may be used for qualified capital projects in accordance with Internal Revenue Code regulations. Qualified capital projects include expenditures for depreciable assets such as facilities construction and renovation and purchases of equipment. Expenditures which do not qualify include operational costs and expenses associated with routine maintenance. The Internal Revenue Code requires all tax-exempt bond proceeds to be expended in accordance with a defined spending schedule.

## SENIOR LIVING TRUST FUND

The Senior Living Trust Fund is created by *Iowa Code* section 249H.4. It initially received federal Medicaid funds and is subject to appropriation by the General Assembly. The purpose of the fund is to provide seniors and people with disabilities with a full array of services including alternatives to nursing facilities. The fund provided for converting long term care facilities to alternative uses, and continues to provide funding to reimburse alternative home and community services. It also continues funding of nursing facility reimbursement methodology changes implemented in 2001 and supplements Medical Assistance appropriation needs.

## **PROPERTY TAX CREDIT FUND**

The Property Tax Credit Fund was created during the 2005 Legislative session to receive funding from the Fiscal Year 2005 ending balance of the general fund to pay for property tax credits in subsequent fiscal year. Again, in Fiscal Year 2006 part of the ending balance from the General Fund went to the Property Tax Credit Fund to pay for property tax credits in the subsequent year. It is recommended that the fund continue, however, a smaller amount is recommended to be transferred from the Fiscal Year 2007 ending balance and a Fiscal Year 2008 general fund appropriation is recommended to be transferred to the fund to pay for the credits in Fiscal Year 2008.

## **STATE FISH AND GAME PROTECTION FUND**

The State Fish and Game Protection Fund consists of all moneys accruing from hunting and fishing license fees and all other sources of revenue arising under the Fish and Wildlife Division of the Department of Natural Resources. The Fund retains the interest earned on the Fund balance. By State Constitution, all funds are expended solely in carrying on the activities embraced in the Fish and Wildlife Division of the Department of Natural Resources. The Department of Natural Resources has spending discretion within the guidelines of the grants and appropriation language created in *Iowa Code* section 456A.17.

## ROAD USE TAX FUND

Iowa's Road Use Tax Fund (RUTF) was created through legislation in 1949. The RUTF is primarily funded with revenues from the following sources: motor vehicle fuel taxes (gasoline, ethanol, and diesel fuels), fees collected on vehicle registrations, titles and drivers licenses, and use taxes on motor vehicle purchases. Except for administrative expenses, all motor fuel taxes and fees associated with vehicle registration, titles, and drivers licenses, are constitutionally mandated to be spent exclusively for the construction, maintenance and supervision of Iowa's public highways. Revenues from the use tax on purchases of motor vehicles is exempt from this constitutional mandate.

All revenues deposited into the RUTF are distributed using a formula to the Primary, Secondary, Farm-to-Market and Municipal Road Funds, which are used by state and local jurisdictions for the construction, maintenance, and administration of roads. Before revenues are distributed by formula, various appropriations and allocations are made from the Fund. These "off-the-top" expenses fund such things as Department of Transportation (DOT) operations, programs, equipment purchases and facility improvements. Appropriation expenses are funded through the legislative appropriations process. The *Iowa Code* specifies the statutory allocation formulas: to the Primary Road Fund (47.5 percent), to the Secondary Road Fund (24.5 percent), to the Farm to Market Road Fund (8 percent), and to the Street Construction Fund of the Cities (20 percent).

## PRIMARY ROAD FUND

The Primary Road Fund (PRF) is created in the *Iowa Code*. Funding is provided by formula from the Road Use Tax Fund; all federal aid received by the state for primary and urban roads; and all other funds which may by law be credited to the PRF. Unless otherwise specified, all funds in the Primary Road Fund are to be expended for highway construction and maintenance purposes including bridge construction, railroad crossing improvements, state institutional and state park roads, and city freeway lighting systems. Primary Road Fund dollars are also subject to legislative appropriations for such things as Department of Transportation operational expenses and programs, costs associated with the disposal of hazardous wastes, and capital improvement projects.

*“It’s our time to accept the challenge, to explore and discover Iowa’s unlimited potential. Let us work together in a sincere and inclusive way, to create ‘One Iowa.’ After all, we serve the same Iowans, they are counting on us, and this state’s future belongs to all of us. It doesn’t matter whether you are a Republican, Democrat or Independent. Whether you live in rural Iowa or urban Iowa. Whether you are a native Iowans or a new arrival. Young or old. What does matter is that we lock arms for the common good and tap our gold mine of potential.”*

Governor Culver’s Inaugural Address  
January 12, 2007
