The Iowa Department of Public Safety gratefully acknowledges the state and local law enforcement agencies who have made every effort to comply with Chapter 692.15 of the *Code of Iowa* which charges them with the responsibility of reporting crimes to the Department.

A special note of thanks is also extended to those persons who process the crime reports at the sheriff's offices, police departments and state university departments of public safety across the state. Without their diligence and hard work, there would be no crime report.

EXECUTIVE SUMMARY

Overall, reports of crime declined in Iowa in 2009. It is important to keep in mind, however, that crime is a local event. Crime rates and crime reports will vary from one locale to another across the state, and crime rates and crime reports in any locale may vary from year to year. Crime rates and crime reports are best understood when compared in the aggregate over a period of years. The Iowa Uniform Crime Report attempts to provide that aggregate summary, as well as a meaningful comparison with previous years in order to understand general trends in crime reporting in Iowa.

INCIDENT BASED REPORTING

TOTAL GROUP A CRIMES: The adjusted rate per 100,000 population decreased 3.1 percent from the 2008 adjusted rate of 5715.1 to the 2009 adjusted rate of 5539.3. The number of crimes decreased 2.4 percent from 166,222 reported in 2008 to 162,257 in 2009. Group A crimes include crimes against persons, property and society.

CRIMES AGAINST PERSONS: the number decreased 1.3 percent from 33,676 victims reported in 2008 to 33,230 victims reported in 2009. The adjusted rate decreased 2.0 percent between 2008 (1157.9) and 2009 (1134.4).

MURDER: The number of murder victims decreased from 76 reported in 2008 to 39 in 2009. The number of victims reported in 2007 (38) was the lowest victim count since the Department became the repository of crime data in 1974. The increased number of victims in 2008 was the second highest number logged during that history. The decrease from 2008 to 2009 contrasted the previous year's increase. Some explanation for the dramatic increase and decrease seen over this three year period may be partially accounted for by the dramatic increase of juvenile victims (17) in 2008, including eleven aged five and under. There were six juvenile victims in 2006, three in 2007, and six in 2009. Another explanation could be the increase of multiple victim homicides; fifteen in 2008 while there were five multiple victim homicides in 2006, three in 2007 and two in 2009.

SEXUAL ASSAULT: The rate decreased 2.2 percent from 72.1 in 2008 to 70.5 victims per 100,000 adjusted population in 2009. Specifically, forcible sexual assault offense rates decreased 4.3 percent while nonforcible offenses increased 18.2 percent. Among the individual offenses Forcible Rape, Forcible Sodomy, Sexual Assault with an Object and Forcible Fondling decreased while Statutory Rape and Incest increased.

AGGRAVATED ASSAULT: The number of aggravated assault victims increased 0.4 percent from 6,259 victims in 2008 to 6,281 victims reported in 2009. However, due to population increases, the adjusted rate decreased 0.4 percent between 2008 (215.2) and 2009 (214.4).

SIMPLE ASSAULT: Accounting for 59.1% of the crimes against persons, victims of simple assault decreased 0.3 percent in 2009 (19,637) from 2007 (19,704). The adjusted rate decreased 1.0 percent between 2008 (677.5) and 2009 (670.4).

KIDNAPPING: The number of victims increased 10.8 percent from 195 reported in 2008 to 216 reported in 2009, which is slightly less of an increase than the previous year's decrease. The adjusted rate increased 10.4 percent between 2008 (6.7) and 2009 (7.4).

CRIMES AGAINST PROPERTY: the adjusted rate decreased 4.1 percent from 3948.2 in 2008 to 3787.0 per 100,000 population in 2009. The decade high was in 2002 (5302.0 crimes per 100,000 population).

ROBBERY: Decreased 5.1 percent from an adjusted rate of 42.9 crimes per 100,000 population in 2008 to 40.7 crimes per 100,000 population in 2009. Reported robberies were most prevalent in Blackhawk, Pottawattamie and Scott Counties.

BURGLARY: The number of offenses decreased less than a percent from 15,745 in 2008 to 15,735 in 2009. The adjusted rate decreased 0.7 percent between 2008 (541.3) and 2009 (537.2).

LARCENY: The adjusted rate decreased 4.4 percent from 1775.4 in 2008 to 1696.4 in 2009. Larceny offenses accounted for 44.8 percent of the property crime. With the exception of a slight increase in 2006, larceny offenses have decreased since 2002. Nearly \$38 million worth of property was reported stolen in 2009.

MOTOR VEHICLE THEFT: The number of offenses decreased 9.6 percent from 4,408 offenses in 2008 to 3,986 in 2009 while the adjusted rate decreased 10.2 percent. The dollar value of reported stolen motor vehicles decreased 10.6 percent to \$22,110,065. The recovery rate showed no change remaining at 69 percent.

FRAUD: For the first time in more than a decade, the adjusted rate for fraud offenses decreased 2.8 percent from 186.9 in 2008 to 181.6 per 100,000 population in 2009. The rate has increased more than 1 ½ times over the last decade despite the decrease in 2009. Credit Card/ATM and Wire Fraud offenses increased from 2008 while Cons/Swindles, Impersonation and Welfare Fraud offenses decreased.

VANDALISM: The number of offenses decreased 3.8 percent from 32,404 crimes in 2008 to 31,173 crimes in 2009. The adjusted rate decreased 4.5 percent from 1114.1 in 2008 to 1064.2 per 100,000 population in 2009.

CRIMES AGAINST SOCIETY: the adjusted rate increased 1.5 percent from 609.0 offenses per 100,000 population in 2008 to 617.9 incidents in 2009. Drug/narcotic violations accounted for 57.8 percent of the total crimes against society.

DRUG/NARCOTIC VIOLATIONS: The rate decreased 0.3 percent from 357.9 in 2008 to 356.9 per 100,000 in 2009. The arrest rate for meth/amphetamines increased 15.6 percent in 2009 following a 61.7 percent decrease over the previous four years. The adjusted rate for Drug equipment violations increased 4.6 percent in 2009.

WEAPONS LAWS: The adjusted rate decreased 0.6 percent from 33.3 in 2008 to 33.1 per 100,000 population in 2009. Eighty-eight percent of the arrests were for possessing or concealing a weapon. More than half of the weapons involved were classified as some type of firearm while knives/cutting instruments accounted for 30.5%.

HATE/BIAS CRIMES: The number of Hate/Bias incidents decreased from 35 reported in 2008 to 18 in 2009, which is the lowest number recorded since the department began collecting data on Hate Crimes in 1991. Thirty-three percent of the offenses were classified as vandalism while the other offenses included aggravated assault, simple assault and intimidation.

DOMESTIC ABUSE: The number of victims increased 1.7 percent from 6,439 in 2008 to 6,549 in 2009. Boy/girl friend accounted for 51.7 percent of the victim/offender relationships followed by spouse with 26.8 percent.

LEOKA: There were no in the line of duty deaths reported in 2009. Reported assaults on law enforcement officers decreased 3.6% from 2008. Reported injuries sustained by the officer during the assault showed little to no change from 2008 to 2009.

OFFENSES CONVERTED TO SUMMARY BASED REPORTING

SERIOUS CRIMES: the rate decreased 3.4 percent from 2735.1 crimes per 100,000 population in 2008 to 2642.1 crimes per 100,000 population in 2009. Also known as the **Crime Index**, serious crimes include the violent crimes of murder, forcible rape, robbery and aggravated assault and the property crimes of burglary, larceny and motor vehicle theft.

Introduction

Historical Perspective

In 1974, the 65th Iowa General Assembly enacted a provision of Chapter 749 B of the *Code of Iowa* requiring law enforcement agencies to submit reports of crime and arrests to the Bureau of Criminal Investigation. The following language now is contained in section 692.15 of the *Code of Iowa* concerning Uniform Crime Reports:

If it comes to the attention of a sheriff, police department or other law enforcement agency that a public offense or delinquent act has been committed in its jurisdiction, the law enforcement agency shall report information concerning the public offense or delinquent act to the department on a form to be furnished by the department not more than thirty-five days from the time the public offense first comes to the attention of the law enforcement agency. The reports shall be used to generate crime statistics. The department shall submit statistics to the governor, the general assembly, and the division of criminal and juvenile justice planning of the department of human rights on a quarterly and yearly basis.

During December, 1974 the Bureau of Criminal Investigation conducted schools throughout the state on the proper completion of Uniform Crime Reports. The schools were attended by most of the law enforcement agencies that were to contribute Uniform Crime Reports. On January 1, 1975, the Iowa Uniform Crime Reporting program was implemented, with forms being sent to 210 agencies. Forms provided by the Federal Bureau of Investigation were used in implementing this program since most contributing agencies had previously submitted their forms to the FBI. Monthly reports were received from 209 agencies throughout 1975 and 1976. In 1977, the number of agencies submitting reports grew to 220, which remained the case in 1978. In 1979, the number of reporting agencies rose to 223, and in 1980 to 225. The number of reporting agencies were reduced to 223 in 1981 but rose again in 1986 to 224 and to 225 in 1990. With very few exceptions the reporting agencies submitted data for every month from 1977 to 1990.

In 1977, the responsibility for Uniform Crime Reports was transferred from the Bureau of Criminal Investigation to the Department of Public Safety's Division of Administrative Services (which maintained UCR field personnel in the Field Services Bureau who responded to questions concerning data entry policy and procedures and received raw data from contributing agencies) and the Data Services Bureau (which performed computer analysis of the data). The Research and Development Bureau of the Commissioner's Office performed the function of further analyzing the data, preparing reports, and responding to requests for information based on the data. From 1993 the function was housed in what is now known as the Program Services Bureau. The data collection process is still housed in the Program Services Bureau, but analysis and reporting has been housed in the Division of Intelligence and Fusion Center since 2006.

The National Uniform Crime Reporting System began with 400 cities representing 20 million inhabitants in 43 states on January 1, 1930. Since the establishment of the Uniform Crime Reporting Program, the volume, diversity, and complexity of crime steadily increased while the UCR program remained virtually unchanged. Recognizing the increasing need for more in-depth statistical information and the need to improve the methodology used for compiling, analyzing, auditing, and publishing the collected data, an extensive study of the Uniform Crime Reports was undertaken. The objective of this study was to meet law enforcement needs into the 21st century. The result of the study was NIBRS (National Incident Based Reporting System). Adoption of the NIBRS system took place in the mid 1980s and Iowa began organizational efforts to implement the system. Conversion to IBR (Incident Based Iowa Uniform Crime Reporting) was completed January 1, 1991, as part of a national effort to implement incident based crime reporting, coordinated by the Federal Bureau of Investigation and the Bureau of Justice Statistics of the U.S. Department of Justice. Iowa was the fifth state in the nation to be accepted as a certified “reporting state” of incident based crime data to the national system.

Incident-Based, Iowa Uniform Crime Reports Overview

The incident-based crime reporting system (IBR) involves collection of data on individual criminal incidents rather than monthly statistical summaries. These individual crime incidents and arrests are submitted in the form of reports using prescribed data elements and data values to describe each incident and arrest. The National Incident-Based Reporting System (NIBRS) compiles the specified information on two types of Offenses: “Group A Offenses” and “Group B Offenses.” Both incidents and arrests are reported for Group A offenses while only arrests are reported for Group B offenses.

Group A Offenses

Arson
Assault Offenses
Bribery (Except Sports Bribery)
Burglary/Breaking and Entering
Counterfeiting/Forgery
Destruction/Damage of Property (Except Arson)
Drug/Narcotics Offenses (Except Driving Under the Influence)
Embezzlement
Extortion/Blackmail
Fraud Offenses (Except Counterfeiting/Forgery and Bad Checks)
Gambling Offenses
Homicide Offenses
Kidnapping/Abduction
Larceny/Theft Offenses
Motor Vehicle Theft
Pornography/Obscene Material
Prostitution Offenses
Robbery
Sex Offenses, Forcible
Sex Offenses, Non-forcible
Stolen Property Offenses
Weapon Law Violations

The above 22 Group A crime categories are further divided into 46 offenses. The criteria for deciding whether a crime is to be designated as a Group A offense depends upon:

- The seriousness or significance of the offense
- The frequency or volume of its occurrence
- How widespread is the occurrence of the offense in the United States
- How likely the offense will come to the attention of law enforcement

- Whether law enforcement is the best channel for collecting data regarding the offense
- The burden placed on law enforcement in collecting data regarding the offense
- The statistical validity and usefulness of the collected data
- The National UCR Program's responsibility to make crime data available not only to law enforcement but also to others having a legitimate interest.

Group B Offenses

Bad Checks
 Curfew/Loitering/Vagrancy Violations
 Disorderly Conduct
 Driving Under the Influence
 Drunkenness
 Family Offenses (non-violent)
 Liquor Law Violations
 Peeping Tom
 Runaway
 Trespass of Real Property
 All Other Offenses

More complete definitions of Group A and Group B offenses can be found in Appendix B. These definitions were taken from a federal publication entitled: Uniform Crime Reporting, National Incident-Based Reporting System, Volume 1 *Data Collection Guidelines*. September, 1996.

The federal definitions of offenses are general definitions. "The definitions which were developed for NIBRS are not meant to be used for charging persons with crimes. To the contrary, they are meant to be "receptacles" or "pigeonholes" for reporting crimes that are committed throughout the United States. The purpose for UCR as developed by law enforcement is to provide a "common denominator" language, which transcends varying local and state laws. State statutes and local ordinances must be very specific in defining crimes so that persons facing prosecution will know the exact charges being placed against them. On the other hand, the definitions used in NIBRS are generic in order not to exclude varying State and Federal statutes relating to the same type of crime."

2009 Incident-Based, Iowa Uniform Crime Reports: Part I Analysis

Contained in the 2009 Incident-based, Iowa Uniform Crime Reports is the analysis found in Part 1. The narrative for total crimes (Group A and Index), murder, total sexual assaults, forcible sexual assaults (forcible rape, forcible sodomy, sexual assault with an object, forcible fondling), non-forcible sexual assaults (incest and statutory rape), robbery, aggravated assault, simple assault, intimidation, stalking, burglary, larceny, motor vehicle theft, fraud, arson, vandalism, weapons laws violations as well as drug violations is found in Section A of Part 1. A short explanation of Group A and B arrests and victim information is also in Section A of Part 1. Hate/Bias Crime is found in Section B, Domestic Abuse is found in Section C and Law Enforcement is found in Section D.

The analysis of the above mentioned crimes includes illustrations in the form of tables and figures to make the analysis more comprehensible. Total incidents, rates per 100,000 population, gender, race, date and time are just a few of the breakdowns found in the analysis of murder, sexual assault, robbery, aggravated assault, simple assault, intimidation, burglary, larceny, motor vehicle theft, drug violations, and arrests. The hate/bias and domestic abuse sections include a narrative documenting the historical perspective of each category as well as other background details. The law enforcement section includes employment information as well as officers killed or assaulted in the line of duty. Five and ten year comparison tables are also included throughout this section showing rates and total offenses and arrests.

The rates used in Part 1 of this report are figured on a population basis of those law enforcement jurisdictions reporting more than six months worth of consistent offense data. Population figures are based on United States census information and the Federal Bureau of Investigation calculates a rate of change for each year. Adjusted rates are used also for total arrests in the narrative, but table rates are figured on the combined populations of law enforcement jurisdictions having **any** arrests. There is no accurate way to compensate for incomplete reporting of arrest data, particularly juvenile arrest data. (For further discussion on the completeness of this report refer to Appendix A, B or C in the back of this publication and Total Crime in Iowa found in the narrative section.)

- Juveniles are considered all persons less than 18 years of age.
- Rates are figured by dividing the crimes, arrests or etc. by a population and multiplying the answer times 100,000.

2009 Incident-Based Iowa Uniform Crime Reports: Part II Statistical Data

Contained in the 2009 Incident-Based Iowa Uniform Crime Reports are several tables, found in Part II, illustrating state totals as well as tables breaking down state totals by reporting law enforcement jurisdiction. The reports are set up in four sections with Section A containing general crime information, Section B containing hate/bias crime information, Section C containing domestic abuse information and section D containing LEOKA and law enforcement personnel information.

As an added feature, some of the agency specific tables now contain population summaries at the end of those tables. The population summaries are broken down by:

Cities of 50,000 and over population
Cities between 25,000 and 49,999 population
Cities between 10,000 and 24,999 population
Cities between 5,000 and 9,999 population
Cities under 5,000 population
Suburban Sheriff's Offices
Rural Sheriff's Offices
State Universities

- Cities under 5,000 population usually include cities between 2,500 and 5,000 population. Cities under 2,500 population report through their Sheriff's Office unless they have applied to be a direct reporting agency (fewer than 10 agencies have done this since 1991 when this became possible).
- Suburban Sheriff's Offices include those in Black Hawk, Dallas, Dubuque, Johnson, Linn, Polk, Pottawattamie, Scott, Warren and Woodbury Counties. The Bureau of Census through the FBI added additional counties in 2005 (for 2003 data and beyond) to be considered. The metropolitan counties that were added are: Benton, Bremer, Grundy, Guthrie, Harrison, Jones, Madison, Story and Washington. Rural area sheriff's offices include those in the 80 counties that are not classified as suburban sheriff's offices (as listed above).
- State Universities include the University of Northern Iowa, the University of Iowa, and Iowa State University.

Section A, Table 1 shows Group A offenses for each reporting agency. Section A, Table 2 converts IBR data to summary data similar to Part 1 crimes seen in reports for 1990 and before in the (summary based) Iowa Uniform Crime Reports. In both Table 1 and Table 2 the rates for the state totals reflect the adjustment in population, subtracting the non-reporting jurisdictions. (For further discussion on the completeness of this report refer to Appendix A in the back of this publication or in the Chapter on Totals).

More specifically, Table 1 shows the complete list of Group A offenses that have been reported by the incident-based method. Those 46 Group A crimes have been broken down by the direct reporting law enforcement geographic jurisdictions (the 99 county sheriffs, the three state university departments of public safety and the 131 local police departments) as well as the state totals. Included in these totals are the submissions of the state law enforcement agencies. The major contributing state agency has been the Iowa Department of Public Safety's Division of State Patrol. Data reported by state agencies is attributed to the jurisdictions in which the crimes occurred.

Table 2 contains incidents of crime converted back to the summary-based method (formerly Part 1 Crimes). The crimes of murder, rape, robbery, aggravated assault, burglary, and motor vehicle theft are shown in this table.

Reported arrest information is presented in tables by jurisdiction in the 2009 Incident-Based Iowa Uniform Crime Reports. These tables may be used to report adult and juvenile arrest information together or separately. The tables show arrest rate figures per 100,000 population. Arrest rates for the state are figured by the accumulated population of the law enforcement jurisdictions when **any** arrests are entered for that jurisdiction.

Reported clearance information and percentage of offenses cleared by jurisdiction is also represented in table format. A clearance usually occurs when an arrest occurs. However, a case can also be cleared exceptionally. The following four conditions must be met to exceptionally clear an offense: 1) the investigation must have clearly and definitely established the identity of at least one offender; 2) sufficient probable cause must have been developed to support the arrest, charging, and prosecution of the offender; 3) the exact location of the offender must be known so that an arrest could be made; and 4) there must be a reason outside the control of law enforcement which prevents the arrest, i.e.:

- Death of the offender/suspect
- Prosecution declined (by the prosecutor for other than lack of probable cause)
- Extradition denied
- Victim refused to cooperate (in the prosecution)
- Juvenile/no custody (the handling of a juvenile without taking him/her into custody, but rather by oral or written notice given to the parents or legal guardian in a case involving a minor offense)
- Warrant issued
- Turned over to another agency

The Hate/Bias Crime information can be found in Section B listed by offense type, victim, offender, target, motivation and jurisdiction. Additional tables listing Hate/Bias Crime history by agency can be found in the Part II tables.

The Domestic Abuse reports for 2009 are reported in Section C. Included in the information collected is data on time and location of occurrence, victims, offenders, relationships, signs of abuse, weapons used, referrals made by law enforcement, presence of the offender, presence of the children and whether they were harmed, and the use of alcohol and drugs. Although the Domestic Abuse Reports were always counted by 1 incident per victim, they were not a part of the general crime data before 1991 but were maintained by a separate system. With the incident-based system, domestic abuse offenses are an integral part of the tabulations. However, the number of victims per incident may be different than the number of victims per agency. This is reflected in the tables generated in this section.

The remaining tables in this report examine statewide totals in different ways. Arson, property stolen and recovered, and reported weapon information by offense, among other statewide data, can be found in the List of Tables.

An information requesting system is available to complement the incident-based crime records data system. This system is dependent on the main data system and will be used for specialized requests on a time available basis.

Anyone wishing to request specialized data should contact the Division of Intelligence and Fusion Center, Iowa Department of Public Safety, 215 East 7th Street, Des Moines, Iowa 50319- 0049, (515)725-6322. Those on-line may e-mail requests to:

ibrinfo@dps.state.ia.us.

It should be noted that increases in reporting within the first few years of implementation of a new reporting system are common. Therefore, comparisons of the early years 1991 and 1992 data from the incident-based system should be viewed cautiously. Similarly, comparisons of reporting levels between data from the incident-based system and data from 1990 and before may also be inappropriate.

Much work has been accomplished in the last few years towards total conversion to the Incident-Based Iowa Uniform Crime Reports. The Iowa Department of Public Safety acknowledges the challenges that reporting agencies in Iowa have faced in their efforts to comply with the new standards and commends those law enforcement agencies that have made the substantial effort required to submit their data in an accurate and timely manner. The State of Iowa benefits from having more accurate and complete information.

Adjusted Rates

NOTE: Data for this report is based on incidents submitted by the law enforcement jurisdiction throughout Iowa to the Iowa Department of Public Safety. Although not all of the law enforcement agencies in Iowa were able to report statistical data, or complete data, the numbers show a marked increase in compliance with the reporting system since the 1991 introduction.

The adjusted population criterion is based on an individual agency entering more than six months worth of consistent data for the year. The adjusted population figure for 2009 is 2,929,174 or 97.4 percent of the total population, which is a slight increase from 2008 when the adjusted population was 2,908,540 or 96.9 percent of the total population. The adjusted population figures since 2000 are as follows: 2007 is 2,837,012; 2006 is 2,830,970; 2005 is 2,796,657; 2004 is 2,780,998; 2003 is 2,697,640; 2002 is 2,680,799; 2001 is 2,608,047; and 2000 is 2,493,096. All ten year comparison tables or figures displayed in this analysis were computed using these adjusted populations.

The following law enforcement agencies' corresponding populations are not included in the adjusted population figure for 2009:

MURDER

“The willful killing of one human being by another.” (Does not include Negligent Manslaughter or Justifiable Homicide)

The State of Iowa has relatively low numbers of homicides each year, which makes it difficult to identify a trend. However, certain periods of increase and decrease have been identified since the Department became the repository for crime data in 1974. Murders generally increased from 1992 (44) to a period peak in 1996 (66) and 1998 (66) before declining substantially in 1999 (48).

During the last decade the number of

murders generally declined from 2000 (58) through 2005 (42) with the exception of a very slight increase from 2002 to 2003. However, in the last four years we have seen a series of spikes and valleys resulting in a new recorded low number of victims in 2007 (38) followed by the second highest number recorded in 2008 (76). The number of victims recorded in 2009 (39) marked an equally significant decrease. Despite the fact that the relatively low numbers accentuate the increases and decreases, questions arise about why the spikes and valleys over the last four years have been so dramatic.

In 2008, nationally the homicide rate decreased approximately 2%. There were a handful of states that showed around a 50% increase, but the remaining states showed relatively normal rates of change. Part of the increased number of homicide victims in Iowa may be explained by a dramatic increase of juvenile victims (17), including eleven aged five and under. There were six juvenile victims in 2006, three in 2007, and six in 2009. Another explanation could be the increase of multiple victim homicides (15). There were five multiple victim homicides in 2006, three in 2007 and two in 2009.

NOTE: Since statewide crime reporting was instituted, supplemental homicide reports have been submitted by law enforcement agencies to the Iowa Department of Public Safety. These reports contained more detailed homicide information than was required by the summary based crime reporting system. Since the inception of the incident-based system in 1991, supplemental homicide reports have been requested (when applicable) of law enforcement agencies that have not been able to report to the incident-based system.

VICTIMS

Who were they...

Figure 26 shows the ages of the 39 victims killed in 2009. The age category 36 - 40 accounted for the highest number of victims (6), which accounts for 15.4% of the total number of victims. Four age categories recorded the next highest number of victims (5): 0 - 5, 21 - 25, 26 - 30, and 41 - 45. In 2008, victims aged 5 and under accounted for the largest number of victims followed by the age group 41 - 45. In 2007, victims aged 36 - 40 accounted for the largest number.

The age group 61 - 65 recorded the largest victim increase with no victims recorded in 2008, but three victims recorded in 2009.

Victims over the age of 50 increased in 2009 accounting for 18% compared with 13.2% recorded in 2008. However, the number was much higher in 2007 accounting for 23.6% of the total.

Males were the victim of homicide most often over the last decade. In 1998, victim gender was evenly distributed, but all other years since have shown a higher percentage of male victims. In 1993 (not shown), female victims accounted for 53% of the total. In 2009, males accounted for 59% of the total number of victims, which is a decrease from 2008 when 61% were male. In 2007, male victims recorded their highest percentage while females were at a decade low.

2001 and 2006 when they accounted for only 10% of the total. In 2007, the percentage spiked to 34%, which is the highest percentage recorded. The number of African American victims declined from 2008 to 2009, but the percentage increased slightly from 24% to 26%.

In 2009, White victims accounted for 69% of the total, which is the lowest percentage recorded for the decade. Asian victims recorded a

decade high 7% in 2008. Four of the five Asian victims were children in the same family and were killed in the same incident. There were two Asian victims in 2009, a slight decrease from 2008, but still the second highest percentage recorded.

There were two reported Hispanic murder victims in 2009, accounting for 5% of the total number of victims for the year. The two Hispanic victims are recorded under White for their race.

one offender and two incidents show no known offender information.

In 2009, 11 of the 39 offenders were in the age category 16 – 20, which accounts for 28.2% of the total. Over the last decade offenders between the ages of 16 and 30 have been the most reported group. In 2009, 48% of the offenders were in that age range. Specifically, the offenders in this age range were reported 52% of the time in 2008, 66% in 2007, 57% in 2006, 65% in 2004, 58% in 2003, 71% in 2002, 55% in 2001, and 60% in 2000. The only exception is in 2005 when 52% of the known offenders were recorded between the ages of 21 and 35.

There are 39 known offenders, who committed the murder of the 39 victims in 2009. Among those 39 offenders there were 32 arrests recorded. In some cases supplemental information was not received on the arrest of offender(s), so it is possible that not all arrest information was recorded. There were two incidents in which three offenders were responsible for the murder of one victim. Two incidents reported two victims for

The highest percentage of female offenders was recorded in 2001 (25%). Males continue to account for the majority of murder offenders. The decade high was in 2006 when males accounted for 95% of the offenders.

Following a marked decrease from 2006 to 2007, White offenders increased to 63% in 2008 and then 64% of the total number of offenders in 2009. The percentage of African American offenders decreased to 33% in 2008 after having set a decade high 46% in 2007. The percentage decreased to 31% in 2009. The Native American and Asian race each recorded one offender.

In 2009, four of the white offenders were identified as being Hispanic. Hispanic offenders accounted for 10.3% of the total in 2009, which is an increase from the 6.6% reported in 2008.

JUVENILES INVOLVED IN HOMICIDE

In 2009, six juvenile victims were recorded accounting for 15.4% of the total. This is a decrease from the 22.4% recorded in 2008, when a record high number (17) were reported. The decade low was recorded in 2007 with only three juvenile victims. Among the juveniles killed in 2009, five children were under age five and one was 16 years old.

The year also recorded three juvenile offenders including a 14 year old Hispanic male, a 16 year old African American female and a 17 year old African American male. The decade high for juvenile offenders was in 2002 with nine young persons involved in the commission of a murder: one 15 year old, four 16 year olds, and four 17 year olds.

RELATIONSHIPS BETWEEN VICTIM AND OFFENDER

No victim/offender relationship was identified in two of the cases due to no known offender being recorded. Two incidents each had three offenders listed for one victim. There were 41 victim/offender relationships identified, 17% of which were recorded as Acquaintance. Spouse was the second most recorded relationship accounting 10.3%. Offenders identified as Immediate Family (including spouses) accounted for 22% of the total relationships. This

category peaked in 1998 accounting for 35% of the total. The offender was otherwise known by the victim in 22% of the cases in 2009. The relationship was listed as unknown in 32% of the cases.

Figure 37 shows the 2009 murder circumstances broken down by number of victims and offenders for each incident. One victim/one offender accounted for 84% of the incidents, which is an increase from the 49% reported in 2008. Two victims were recorded in incidents where there were multiple offenders. Two incidents occurred with multiple victims and one offender. A relationship was identified in 95% of the cases.

Child abuse murders accounted for 11% (4) of the incidents. In 2008, child abuse murders were at an all time high accounting for 20% of the murders with 15 reported incidents.

The combined Firearm category accounted for 32.4% of weapons used during the commission of a murder. Handguns (5 of 12) were the most used firearm. Knives or Cutting Instruments accounted for 21.6% (8 of 37) of the total, which was the most often used weapon other than personal weapons (hands, feet, etc). Handguns were used more often than Cutting Instruments in 2003 to 2005, but Cutting Instruments have surpassed Handguns for the past four years.

WHEN

Usually no clear pattern emerges when comparing previous years' murder incidents by month. In 2009, the highest number of incidents occurred in February and June (5). In 2008, the highest recorded month was July (9) and December (6) recorded the most homicides in 2007. In 2006, July (10) recorded the most homicide incidents. May and June (5) had the highest number of incidents in 2005.

The least number of murder incidents reported per month varied by year as well. In 2009, there was only one incident recorded in March. In 2008, there were four months that reported four incidents each: March, April, June, and November. The other three years represented in Table 17 varied as follows: March and November were the lowest months in 2007, September in 2006, and August in 2005.

Over the last five years no specific day of the week has been identified as having more murder incidents, however, Saturday was the most reported day in 2007 (10) and 2008 (14). Sunday was the most common day in 2006 (13) and 2009 (10), as well as in 2005 when it shared the top spot with Monday (8 each). Tuesday was the least reported day in 2006, 2007 and 2008. In 2009, Monday and Wednesday were the least reported days with 3 incidents each.

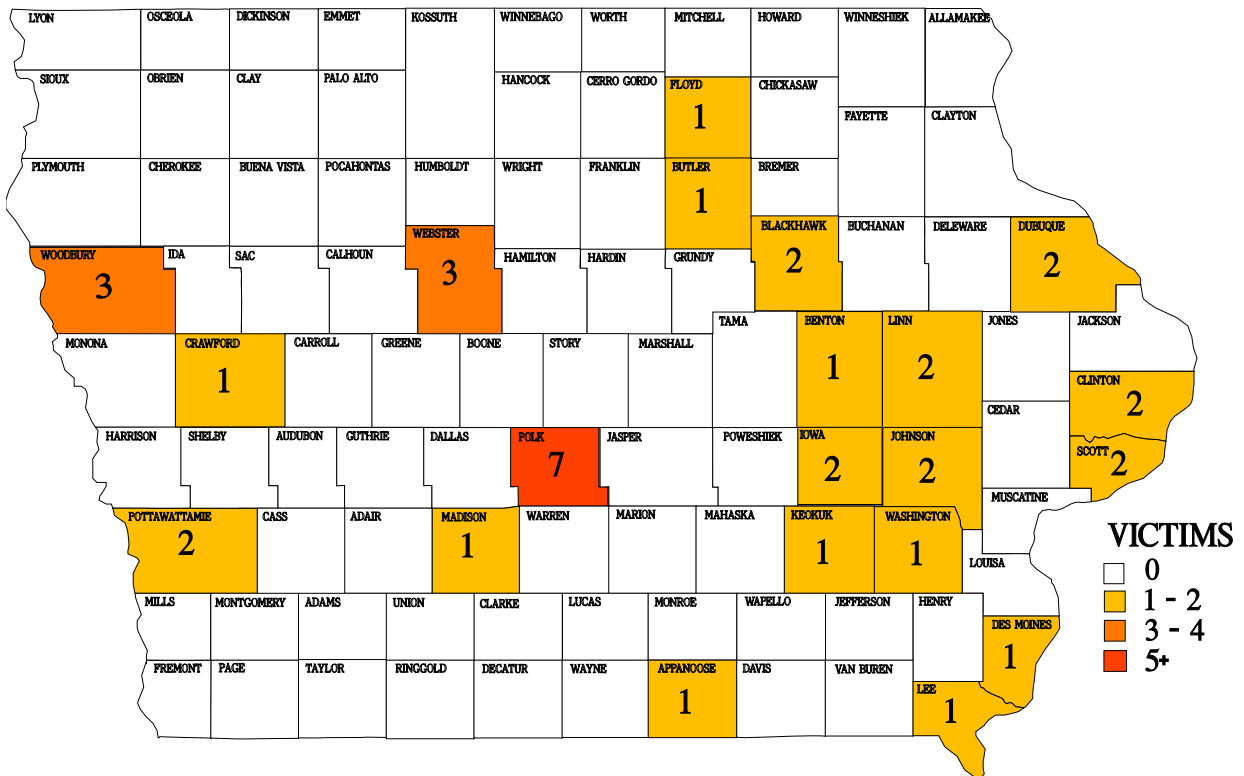

WHERE

Metropolitan incidents accounted for 70% of the murders in 2009, which is a decrease from the 72% reported in 2008 and 83% in 2007. In recent years metropolitan incidents have accounted for the majority of the reported murders as follows: 52% of incidents in 2006 were located within metropolitan areas, 55% in 2005, and 79% in 2004. “Other” refers to the cities, usually over 2,500 population, which submit their own statistical data. Other cities accounted for 14% of the reported homicides in

2009 and 11% in both 2007 and 2008. Rural areas are the county sheriffs’ jurisdictions that are not in a Metropolitan area. Rural county sheriffs’ offices recorded 16% of the murder incidents in 2009, which is a decrease from 17% reported in 2008 but still a higher percentage than the 6% reported in 2007.

The number of sexual assault victims decreased for the third year in a row. The sexual assault adjusted rate decreased 2.2% from 72.1 in 2008 to 70.5 per 100,000 population in 2009. Overall for the decade, sexual assault offenses increased through 2006 with the exception of a decrease from 2002 to 2003. However, due to the decrease over the last two years the number of offenses is comparable to the first part of the decade. Due to population growth over the last ten years the adjusted rate is at a decade low even though the lowest number of victims was recorded in 2000. Despite the overall decrease of sexual assaults in 2009, nonforcible sex offenses increased 18.2% from 2008.

Sexual assault arrest rates per 100,000 population decreased from 11.8 in 2008 to 11.5 in 2009.

FORCIBLE OFFENSES

In 2009, forcible sexual assault offenses continued to decline, recording the lowest rate for the five year period. The number of forcible offenses declined 3.5% over the past year while the adjusted rate declined 4.3%. Among individual forcible offenses, the adjusted rates for forcible rape, forcible sodomy and sexual assault with an object decreased while the rates for forcible fondling showed no change.

Over the five year period forcible sexual assault offenses increased from 2005 to 2006, but then decreased each year since.

NONFORCIBLE OFFENSES

Nonforcible sexual assault offenses also increased from 2005 to 2006 before declining in 2007 and 2008. In 2009, nonforcible sex offenses increased 18.2%. Among individual nonforcible offenses, the adjusted rate for Incest increased 13.3% while the rate for Statutory Rape increased 19.6%. In 2008, nonforcible sex offenses recorded the lowest adjusted rate for the five year period.

FORCIBLE RAPE

2009 FORCIBLE RAPE	
Number of Victims	877
Rate per 100,000	29.9

Number of Incidents	844

The number of forcible rape victims decreased 5.8% from 2008, but still recorded one of the highest numbers for the decade. Adjusted rates decreased 6.6% from the previous year. The number of arrests and adjusted rate continued to decrease from the decade high recorded in 2007. Specifically, the arrest rate decreased 7.0% from 2008.

RELATIONSHIPS BETWEEN VICTIM & OFFENDER

In 2009, 70.4% of the forcible rape victims knew their attacker. Among these known assailants 29.3% were recorded as being acquaintances of the victim. Otherwise known persons represented the next highest category accounting for 9.7% of the total relationships followed by strangers accounting for 8.7% of the total. Historically, these three relationship categories have consistently recorded the highest numbers.

VICTIMS

Ninety-four percent of the forcible rape victims were reported as being female.

The age group of 13 – 17 year old persons has had the most reported number victims of forcible rape since 1995. In 2009, this age category accounted for 31.2% of the total victims, which is consistent with 2008. Fifteen year olds were the most reported victims with 74 recorded rapes in 2009.

White females accounted for 85.5% of the total victims. African American females recorded the next highest percentage of victims at 7.3%. Hispanic victims (not shown) numbered thirty-seven (36 female, 1 male). Thirty-three of the Hispanic victims are recorded as White and four were recorded as unknown race.

OFFENDERS

Sex, race and age data is available on 120 persons arrested for forcible rape in 2009.

The age category of 13 – 17 year olds was recorded as having the most arrestees (40) with 21 – 29 year olds being the second highest (22). The single most reported age of an arrestee in 2009 was 14 years old with ten reported arrests.

In 2008, 95% of forcible rape arrestees were male (114) and 5% were female (6). White males were the most arrested group (85%) with the 13 – 17 year olds (35) having the most arrests among that group. Among the female offenders, four were White and two were African American. In 2003 all of the arrestees were male, but females have been among those arrested each of the following years.

In 2009, personal weapons such as hands and feet were used in 65.9% of the reported forcible rapes, which is slightly higher than the percentages in 2007 and 2008. In 2006 personal weapons accounted for 71% and 74% in 2005. Firearms, knives and blunt objects accounted for 1.9% of the weapons in 2009, which is slightly higher than the 1.3% in 2008, 1.5% in 2007, 1.6% in 2006. Drugs were reported as the weapon used in 0.7% of the cases.

VICTIM INJURIES

Reported minor injuries historically account for the largest percentage of injures received during the commission of a rape. In 2009, minor injuries were reported in 22% of the cases, an increase from the 18.7% reported in 2008, but comparable to 22.2% logged in 2007. Some type of physical injury was reported in 25.4% of the 2009 rape cases, an increase from 21% reported in 2008, but a decrease from the three previous years.

WHEN

In 2009, April and June had the highest number of reported forcible rape victims. July, April, May, August and October have previously been the highest reported months since 2003. The lowest reported month in 2009 was December. February, October and December have been the lowest reporting months since 2004.

In 2009, Saturday was the most frequently reported day for incidents of rape. Friday, Saturday and Sunday have been the most frequently reported days for the last decade. In 2009, the least reported day was Friday. Since 2001, the least reported day has varied between Monday, Tuesday and Wednesday.

WEAPONS

The use of personal weapons such as hands and feet represented 50.2% of the weapons reported as having been used during an aggravated assault. The second most often used weapon was a knife or some other type of cutting instruments, accounting for 15.8% of the weapons. Blunt objects were reported as being used in 9.3% of the cases. Firearms, motor vehicles, poison, explosives, fire/incendiary devices, drugs, and asphyxiation were also used in the commission of the crime.

Figure 105 shows a comparison of the five main weapons used during the commission of aggravated assaults during the last five years. The use of knives has increased 5.2% from 2005 through 2009, but was at a high point for the period in 2007. The use of blunt objects peaked in 2008, recording 60 fewer incidents in 2009. The total use of firearms has fluctuated over the five year period with its peak in 2005. The use of motor vehicles also peaked in 2005.

INJURIES

There were 5,748 reported injuries sustained during aggravated assault attacks in 2009, which is a 22.5% increase from 2008. Apparent minor injury occurred in 3,010 incidents (52.4%). Other major injuries (1,518) accounted for 25.4% of the injuries while severe lacerations (555) were reported 9.7% of the time. There were 30 victims who reported having received no injuries during the attack.

WHEN

Historically, incidents of aggravated assault tend to peak during the summer and decline in the winter months. The month of July (536) recorded the highest number of offenses in 2009 and the warm weather months also recorded a higher percentage of the offenses than the cold weather months. December (354) had the least number of reported offenses. Saturday (981) and Sunday (975) were the most reported days of the week, while Monday (650) and Tuesday (665) recorded a lower victim count.

SECTION B

HATE/BIAS CRIME

HATE CRIMES

HISTORICAL PERSPECTIVE

In the past two decades, criminal acts motivated entirely or in part by prejudice have come to be known as hate crimes. These crimes continue to occur in Iowa, as well as throughout the country. Hate crimes not only affect individuals or groups, but also can disrupt the very ideals of a democratic society. Individuals and/or groups are affected more deeply because hate crimes are not random; the victims are targeted for who they are. The entire community can be threatened because of the increased level of fear and distrust related to or perceived after a hate/bias incident. The aftermath of fear related to a criminal act in the community can then escalate into other criminal incidents. In response to the seriousness of these crimes, state and national programs have been instituted to focus on these incidents. Specifically, new law enforcement techniques were developed to investigate these crimes along with data collection enhancements to determine the scope and nature of these offenses.

Public Law 101-275 or the “Hate Crimes Statistics Act” was approved, after passing both the House and Senate of the United States, on April 23, 1990. The purpose of this Act is to acquire and publish data of crimes that include evidence of bias based on race, religion, sexual orientation, or ethnicity. The collection elements thought to be appropriate include the crimes of murder, non-negligent manslaughter, forcible rape, aggravated assault, simple assault, intimidation, arson, and destruction, damage, or vandalism of property.

On a state level, beginning in 1990, the 73rd Iowa General Assembly enacted into law precise language defining a hate crime and making special provisions for hate crimes. Revised in 1992, Iowa’s law provides a broader range of protection than the national law, reiterating the violation of an individual’s rights and including victims of prejudice because of their sex, age, political affiliation, or disability. Iowa law provides:

SEC. 729A.1 VIOLATIONS OF AN INDIVIDUAL’S RIGHTS PROHIBITED.

Persons within the state of Iowa have the right to be free from any violence, or intimidation by threat of violence, committed against their persons or property because of race, color, religion, ancestry, national origin, political affiliation, sex, sexual orientation, age, or disability.

SEC. 729A.2 VIOLATION OF INDIVIDUAL RIGHTS – HATE CRIME.

“Hate crime” means one of the following public offenses when committed against a person or a person’s property because of the person’s race, color, religion, ancestry, national origin, political affiliation, sex, sexual orientation, age, or disability, or the person’s association with a person of a certain race, color, religion, ancestry, national origin, political affiliation, sex, sexual orientation, age, or disability.

Bias Crime Indicators

From the National Center for Hate Crime Prevention

Racial, Ethnic, Gender and/or Cultural Differences

- The race, religion, ethnicity/national origin, disability status, gender, or sexual orientation of the victim differs from that of the offender.
- The victim is a member of a group that is overwhelmingly outnumbered by members of another group in the area where the incident occurred.
- The victim was engaged in activities promoting his or her group.
- The incident coincided with a holiday or date of particular significance to the victim's group.
- The victim, although not a member of the targeted group, is a member of an advocacy group that supports the victim group, or the victim was in the company of a member of the target group.
- Historically, animosity exists between the victim's group and the offender's group.

Comments, Written Statements, or Gestures

- Bias-related comments, written statements, or gestures were made by the offender.

Drawings, Markings, Symbols or Graffiti

- Bias-related drawings, markings, symbols, or graffiti were left at the scene of the incident.

Organized Hate Groups

- Objects or items that represent the work of organized hate groups (e.g., white hoods, burning crosses, and hate graffiti) were left at the scene of the incident.
- There are indications that a hate group was involved; for example, an organized hate group claimed responsibility for the crime or was active in the neighborhood.

Previous Bias Crimes or Incidents

- Victim was visiting a location where previous bias crimes had been committed against members of the victim's group.
- Several incidents occurred in the same area, and the victims were members of the same group.
- Victim had received previous harassing mail or phone calls or had experienced verbal abuse based on his or her affiliation with a targeted group.
- Recent bias incidents or crimes may have sparked a retaliatory hate crime.

Victim/Witness Perception

- Victims and/or witnesses perceive that the incident was motivated by bias.

Motive of Offender

- Offender was previously involved in a similar incident or is a member of, or associates with members of, an organized hate group.
- The victim was in the company of or married to a member of a targeted group.
- The victim was perceived by the offender as violation or breaking from traditional conventions or working in nontraditional employment.
- The offender has a history of previous crimes with a similar modus operandi, and involving other victims of the same race, religion, ethnicity/national origin, disability, sexual orientation, or gender.

Location of Incident

- The victim was in or near an area or place commonly associated with or frequented by members of a particular race, religion, ethnicity/national origin, disability, sexual orientation, or gender (e.g., a gay bar).

WHY

A crime that is motivated by prejudice, as defined by law, is a hate crime. Race was the motivation or type of hate/bias crime most reported in Iowa for the years 2000 through 2009. Anti-African American crimes accounted for 38.9% of the hate crimes in 2009 and 47.3% for the decade. Anti-Male Homosexual (gay) was the next most reported group for the decade, accounting for 10.8%, and was also one of the next highest reported groups in 2009. Anti-Hispanic bias recorded the third highest percentage for the year, accounting for 11.1% of the offenses, compared to 6.9% for the decade.

SECTION C

DOMESTIC ABUSE

DOMESTIC VIOLENCE

HISTORICAL PERSPECTIVE

The Iowa Department of Public Safety is charged under Chapter 236 of the *Code of Iowa* with the responsibility for collecting information on incidents of domestic abuse in Iowa from local law enforcement agencies. The national Uniform Crime Report guidelines do not require the reporting of domestic abuse separately. The Department began collecting domestic abuse data on July 1, 1985, assuming a function previously performed by the Iowa Department of Human Services. The domestic abuse reporting system was the only incident-based crime data collected by the Department from 1986 through 1990. The incidents of domestic abuse rose rapidly each year between the years of 1986 to 1990 increasing from a reported 3,501 incidents in 1986 to 6,199 reported incidents in 1990. Beginning with the 1991 data the Department incorporated the domestic abuse data and hate/bias crime data with the new Iowa Incident-Based Uniform Crime Reporting System, housing all crime data in one computerized system.

Domestic Abuse is defined by Section 708.2A(1) and in Section 236.2 of the Code of Iowa under any of the following circumstances:

- a. The assault is between family or household members who reside together at the time of the assault.
- b. The assault is between separated spouses or persons divorced from each other and not residing together at the time of the assault.
- c. The assault is between persons who are parents of the same minor child, regardless of whether they have been married or have lived together at any time.
- d. The assault is between persons who have been family or household members residing together within the past year and are not residing together at the time of the assault.
- e. The assault is between persons who are in an intimate relationship or have been in an intimate relationship and have had contact within the past year of the assault.

Some factors of an intimate relationship can be: duration, frequency of interaction, termination, either party's sexual or romantic expectations and the relationship does not have to be exclusive.

Although the definition of Domestic Abuse has changed since 1985, the meaning of "family or household members" has stayed much the same. The major changes have been in 1987, 1989, 1991, 1993, 2002 and 2003.

HOW MANY...

Counted by Victims

In 2009, the domestic abuse adjusted rate decreased 7.1% from 2008, despite the number of victims increasing 1.7%. The decade high adjusted rate was reported in 2000 (292 per 100,000 population), but the highest number of reported victims was in 2002 (7,607).

WHEN

In 2009, June was the most reported month for incidents of domestic violence. June, July and August have consistently been the most reported months. February has been the lowest reported month since 2006.

Incidents of domestic abuse were reported more frequently on the weekends than on weekdays. In every year, Monday reported the least number or tied for the lowest number of victims of any other day.

The most frequent single hour reported was midnight (12.5% or 516 victims), which matches the trend set by the previous five years. The least reported hour was 6:00 am (62 victims) followed by 7:00 am (80 victims).

The percentage of African American victims has increased nearly 3% since 2000. Conversely, White victims have decreased 3% since 2000. In 2009, White persons accounted for 81.3% of the total victims. There were 360 reported Hispanic victims, which is the highest number recorded for the decade.

In 2009, the percentage of female offenders was at the second highest point for the decade. The number of White offenders has decreased 4.1% since 2000, while African American offenders have increased 4%. Asian and Native American offenders have shown little change. In 2009, Asian and Native American offenders were more often than not at the scene when the report was made, but White and African American offenders were more often not present.

VICTIM/OFFENDER AGE

In 2009, the largest percent of persons involved in a domestic abuse situation were between the ages of 16 and 25 (2,353) accounting for 35.9% of the victims. The second highest age category was 26 through 35 (2,099), which accounted for 32.1%.

Among known offenders, the age category 16 through 25 also accounted for the largest percentage recording 2,608 offenders or 36.1% of the total. The second highest age category was 26 through 35 (2,329), which accounted for 32.2%. The number of victims and offenders under age 16 and over age 65 mirrored each other.

WHAT

The investigating officer reports a number of characteristics of each domestic abuse incident. Included are observed signs of abuse (injuries) to the victim, the weapon used to inflict the abuse and who reported the abuse to law enforcement. The law enforcement officer also notes any referrals made, the presence or absence of children during the abuse, whether an arrest was made, and if the offender was present at the time of the report

REPORT

The percentage of victims reporting domestic abuse has generally risen since 1990 when victims reported in 72% of the incidents. The highest percentage of victim reporting of the incident was in 2002 with 87%. In 2009, the percentage of incidents reported by victims was 81%, which is a slight increase from 2008.

Reports of children being absent from the scene have also generally increased since 1989 when on 45% were recorded as not being present. The highest percentage was recorded in 1999 when children were absent in 71% of the cases. In 2009, the percentage of those absent increased to 67%, which compares with 2008. Incidents in which children were present and harmed accounted for 2% of the total.

WEAPONS

A weapon was indicated in 90% of the cases in 2009. Among those weapons, 82% were recorded as personal weapons such as hands and feet. The percentage of cases where no weapon was involved decreased 1% from 2008 to 2009. The use of firearms, knives and other dangerous weapons has shown little change over the five year period.

REFERRALS

Under Iowa law, investigating officers may be asked for referrals, but are not mandated to make any referrals. Programming options vary widely across the state. No referral was made in 42.0% of the cases in 2009, which is a decrease from the 48.5% recorded in 2008. Legal referrals increased 5%, “other” (+2%) and financial (+1%) referrals also increased. Officers may make multiple referrals for one incident.

IOWA OFFICERS ASSAULTED IN THE LINE OF DUTY

Caution should be used when analyzing this data. As with the crime data, it represents reports from law enforcement jurisdictions accounting for 96.7% of the total population of Iowa.

Over the last decade the number of Iowa law enforcement officers assaulted annually in the line of duty increased in 2002 and from 2003 through 2007. Officer assaults have decreased for the last two years. In 2009, 555 officers were reported as being assaulted, which equates to a 3.6% decrease from 2008. Over the past decade the lowest reported number of officer assaults occurred in 2001 (519) and the highest number in 2007 (623).

Assaults on law enforcement officers in the line of duty most often occurred in larger metropolitan areas of Iowa. Seventy-three percent of the assaults were reported as occurring within suburban areas. Cities reporting a population less than 6,000 people reported the lowest number of assaults.

In 2009, officer assaults occurred most often on Saturday (86) followed by Friday (76). A higher number of assaults were also logged on Sunday and Thursday with 71 incidents occurring on each day. In 2009, 1:00 am and 7:00 pm were the most reported times for officer assaults. Over the past decade, midnight was the most often reported time for each year. Historically, the highest percentage of assaults has occurred between the hours of 10:00 pm and 2:00 am. The lowest assault times have been recorded between 6:00 am and 8:00 am.

The percentage of assaults resulting in injuries to the officer peaked in 2006, accounting for 49.7% of the total assaults. Officers reported being injured from the assault more often during the second half of the decade (47%) compared with injured officers during the first five years (44%). The percentage of officers injured during an assault decreased in 2008 (42.3%) and showed no change in 2009.

In 2009, the highest percentage of officer assaults were perpetrated when the officer responded on a disturbance call (30.8%). The next two most reported activities for officer assaults were “Attempting Other Arrests” (19.5%) and “Handling or Transporting Prisoners” (19.3%).

In 2009, the offender used personal weapons such as hands and feet to assault the officer in 76.6% of the incidents. Weapons other than a firearm or knife were used 20.5% of the time. Injury resulted from an assault with personal weapons 43.3% of the time. When “other” objects were used in the assault, injury to the officer resulted in 42.1% of the incidents and 37.5% when a firearm was used.

Weapons were used in 31.9% of disturbance calls in which officers were assaulted. Nearly eighty-five percent of those weapons were classified as personal weapons. The percentage of personal weapons was similar when the officer was handling or transporting prisoners. Knives were most often used when the assaulted officer was attempting an arrest other than the originating call. This can also be said for “other” weapons.

Officer assaults by assignment follow similar patterns from year to year. The majority of assaults occur among uniformed single officer cars and primarily when an assisting officer is present. In 2009, one officer cars accounted for 64%, which is comparable with the percentage reported in 2008. Uniformed officers accounted for 83% of the officers assaulted in 2009 compared with 85% in 2008.

National statistics indicate that the vast majority of police departments use one-officer cars. Recent research indicates that assaults of officers are closely related to resistance to police use of force, and that resistance may be greater for one-officer cars than for two officer cars.

LAW ENFORCEMENT EMPLOYEES

The Program Services Bureau of the Department of Public Safety not only collects uniform crime reporting data, but also collects information on law enforcement civilian personnel as well as law enforcement officers. The information displayed below is from the 99 county sheriffs, the 3 state universities, 135 police departments and the Iowa Department of Public Safety.

Officers of the Iowa Department of Public Safety are in the Division of State Patrol, the Division of Criminal Investigation, the Division of Narcotics Enforcement and the Fire Marshal Division.

APPENDIX A

A previously used indicator of the completeness of crime data has been “agency months”. Agency months refers to the formula that counts the number of months in a year times the number of agencies, divided into the number of actual months some data is entered for all of the agencies. For example, in 1991 through 1993 Iowa had 225 reporting law enforcement agencies times 12 possible months of data submission equals 2,700 months that could be possible for 100% reporting. In 1991, crime data was entered in 1,872 months divided by the possible months would equal 69.3 percent complete reporting. In 1992, 2033 agency months had some crime data entered for a total of 75.3 percent complete reporting. There were 2,171 months entered for 1993 to account for 80.0 percent completeness. Eight agencies joined the direct reporting agencies in 1994. Therefore, the possible months of reporting rose to 2,796 in 1994. There were 2,323 months entered in 1994 to account for 83.1 percent completeness. One more agency joined the direct reporting agencies in 1995 to bring the total to 2,808 possible months. There were 2,391 months entered in 1995 to increase to 85.1 percent completeness. The same number (2,808) of months was possible in 1996, but completeness decreased to 2,306 months entered or 82.1 percent. In 1997, the number of months possible was again 2,808 and completeness increased to 84.0 percent with 2,360 months entered. In 1998 some data was entered in 2,455 months, which raised completeness to 87.4 percent of the possible 2,808 months. Three agencies were deleted in 1999 and one was added to bring the total number of reporting agencies to 232 with 2,784 possible months. Decreasing slightly, the months complete for 1999 was 86.4 percent. In 2000 the number of agencies stayed constant with 2,784 possible months and 2,364 months entered for 84.9 percent. A total of 237 agencies or 2,844 months were possible in 2001 with 2,481 months entered or 87.2 percent complete. Five agencies were deleted in 2002 for a possible 2,784 months for 232 agencies. In 2002, 2,467 agency months were entered for 88.6 percent complete. An additional agency was added in 2003 for a total of 233 agencies or 2,796 months. Additionally, 2,445 months were entered for 87.4 percent complete in 2003 and 2004. In 2005, 2,473 agency months were entered for the 233 agencies or 88.4 percent complete. In 2006, 2,527 agency months were entered for the 233 agencies or 90.4 percent complete. In 2007, 2,458 agency months were entered for the 233 agencies or 87.9 percent complete. In 2008, one agency was added increasing the total number of agencies to 234 or 2,808 possible months worth of data. A total of 2,458 months worth of data was entered, which equates to the data being 87.5% complete. (This method does not account for completeness of the number of crimes entered per month.) In 2009, one agency was added increasing the total number of agencies to 235 or 2,820 possible months worth of data. A total of 2,584 months worth of data was entered, which equates to the data being 91.6% complete.

Another way that can be used to indicate completeness involves comparisons of completeness of populations for participating in a given year with the statewide total populations. Considering only agencies which reported in all 12 months in each year, 1991 data represents 54.6 percent of the state’s population, 1992 data represents 60.8 percent of the state’s population and the 1993 data represents 74.2 percent of the state’s population. The 1994 data represents 72.1 percent of the state’s populations while the corresponding figure for 1995 is 81.7 percent of the state’s population and the 1996 figure is 70.9 percent. Increasing again in 1997, the data represents 79.9 percent of Iowa’s population but dropped to 77.8 percent of Iowa’s 1998 population. In 1999, the data represented 82.9 percent of the state’s population but again dropped to 74.6 percent of the 2000 population and 75.5 percent of the 2001 population. The 2002 data increased markedly to 89.2 percent of the population, 2003 was 88.6 percent of the population but decreased in 2004 to represent 79.4 percent of the total population and 2005 to represent 78.5 percent of the population. The 2006 and 2007 data also increased markedly to 94.4% in 2006 and 94.2% of the population in 2007. In 2008, contributing agency represented 96.9% of the population. In 2009, the contributing agencies represented 95.5% of the population. (This method does not account for small agencies that would truly have no crimes during a month or does not account for the completeness of the number of crimes entered per month in larger agencies).

APPENDIX B

Definitions of Crime Categories

“The following definitions are not meant to be used for charging persons with crimes. To the contrary, they are meant to be “receptacles” or “pigeonholes” for reporting crimes throughout the United States. State statutes must be very specific in defining crimes so that persons facing prosecution will know the exact charges being placed against them. On the other hand, the definitions used in NIBRS must be generic in order not to exclude varying state statutes relating to the same type of crime.”
