

Cedar Rock, Lowell Walter House

❖ Built in 1950 ❖

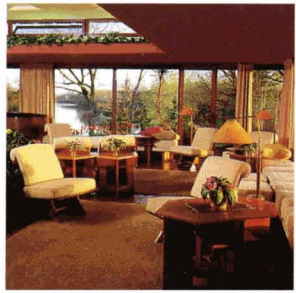

High on a limestone bluff overlooking a scenic bend in the Wapsipinicon River, you'll find the Lowell Walter residence known as Cedar Rock. It was designed by one of the world's greatest architects, Frank Lloyd Wright. Cedar Rock was the first and most elaborate of ten houses that Wright designed in Iowa after World War II. The Iowa Department of Natural Resources owns and preserves Cedar Rock. It is listed on the National Register of Historic Places. 🐦

Cedar Rock

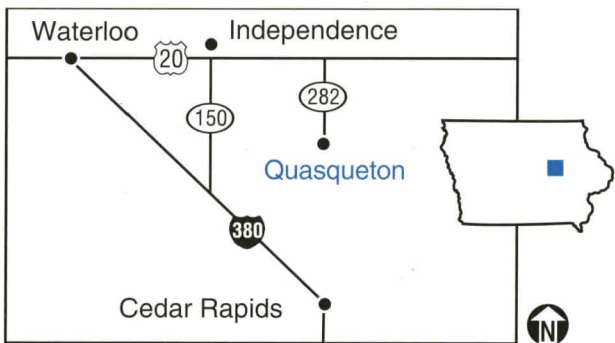

Quasqueton, Iowa

Located near Quasqueton, nearly every aspect of Cedar Rock bears Frank Lloyd Wright's imprint, from the home's ground-hugging form and unique built-in furniture to upholstery, curtains and the nearby boat house. You can see Wright's signature on the tile to the home's entrance. The Usonian-style residence is the only "signed" Wright house in Iowa. Completed in 1950, Cedar Rock is a testament to Frank Lloyd Wright's belief that architecture should directly relate to its environment and to Lowell Walter's conviction that his dream home could be built here in Iowa.
