# STATE OF IOWA 1920 1922

# REPORT OF THE .

# Department of Public Instruction

For the Biennial Period Ending June 30, 1922

P. E. McCLENAHAN
Superintendent of Public Instruction

Published by
THE STATE OF IOWA
Des Moines

# LETTER OF TRANSMITTAL.

Hon. N. E. Kendall, Governor.

SIR: I have the honor to submit herewith, as required by law, the forty-first biennial report of the Department of Public Instruction for the period beginning July 1, 1920, and ending June 30, 1922.

P. E. McClenahan, Superintendent Public Instruction.

July 1, 1922.

# DEPARTMENT OF PUBLIC INSTRUCTION.

P. E. McClenahan	Superintendent of Public Instruction
A. L. Heminger	Deputy Superintendent
H. C. Hollingsworth	
Melvin R. Fayram	Inspector of Normal Training High Schools
Geo. A. Brown	Inspector Consolidated Schools
F. A. Welch	Inspector of State Graded and High Schools
Harry D. Kies	Inspector of Mining Camp Schools
Blanche Angove	
Hazel Davidson	
Grace Riley	Stenographers
Geraldine Sprinkle	
Mrs. Minnie Wilder	

# TEACHERS' PLACEMENT BUREAU.

J. J. McConnell	Director
Helen Holbert	Stenographer

# STATE BOARD OF EDUCATIONAL EXAMINERS.

P. E. McClenahan, ex officio, President	Des Moines
Walter A. Jessup, ex officio	Iowa City
Homer H. Seerley, ex officio	
Raymond A. Pearson, ex officio	Ames
*H. E. Blackmar	Ottumwa
**Jeannette Lewis	Rockwell City
***William F. Barr	Des Moines
Viola H. Schell, Secretary	Des Moines
Florence Erickson	Stenographer
Leah Zion	Stenographer
Theodora Wilcox	Clerk

<sup>\*</sup>Term expires February 1, 1923. \*\*Term expires April 1, 1925. \*\*\*Appointed June 13, 1922.

# SUPERINTENDENT OF PUBLIC INSTRUCTION.

#### TERRITORY AND STATE OF IOWA.

Name	County	Time	Postoffice
William Reynolds			Deceased
James Harlan			Deceased Deceased
James D. Eads	Lee		Deceased Deceased
Joseph C. Stone			Deceased
Oran Faville	Mitchell		Deceased Deceased
D. Franklin Wells		1869-1872	Deceased
Alonzo Abernethy			Deceased Deceased
C. W. von Coelln		1882-1888	Pasadena, Cal
Henry Sabin	Clinton	1888-1892	Deceased Cedar Falls
J. B. Knoepfler Henry Sabin	Clinton	1894-1898	Deceased
Richard C. Barrett		1898-1904	Deceased Des Moines
John F. Riggs Albert M. Deyoe		1911-1919	Des Moines
P. E. McClenahan		1919-1923	Des Moines

The office of Superintendent was abolished in 1842. Again in 1858 it was abolished and the duties were performed by the State Board of Education, of which Thos. H. Benton acted as secretary for five years.

# STATE BOARD FOR VOCATIONAL EDUCATION.

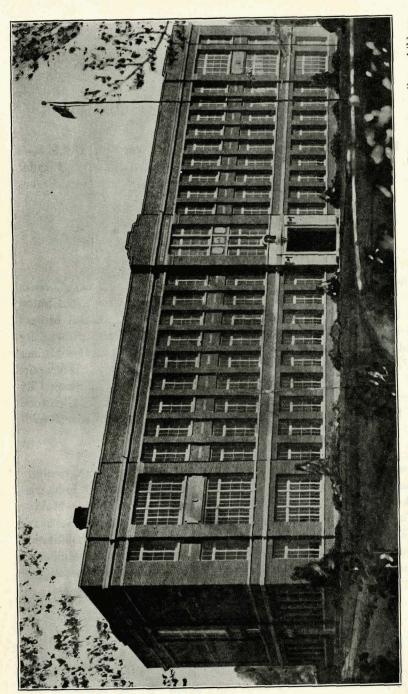

P. E. McClenahan, Supt. Public Instruction, Chairman.	Des Moines
D. D. Murphy, Pres. State Board of Education	Elkader

Alma Merwin	Supervisor of Home Making
Minetta Furbush	Office Secretary
Willis W. Grant	Supervisor of Industrial Rehabilitation
Grace E. SalisburyAss	t. Supervisor of Industrial Rehabilitation
7	File Clerk and Accountant

<sup>\*</sup>Deceased December, 1921.

Aurelia Consolidated School, Cherokee ransported, 166; enrollment, 310.

# REPORT OF SUPERINTENDENT OF PUBLIC INSTRUCTION

#### INTRODUCTION.

No loyal citizen who considers the vastness of our nation, and the diversified and conflicting interests of its cosmopolitan population, can regard its future welfare without feelings of deepest concern. The very vastness of the area, the resources, the wealth, and limitless development of mind and matter raises the question, what bonds can hold together so aggressive a people. If history repeats itself as history has repeated itself, our most dangerous enemy may grow up within our own borders. We may mobilize armed forces to protect ourselves against the enemies from without; but there is but one power which can protect us against the enemies within—can protect us against ourselves. That power is the intellectual and moral development of our youth and the diffusion of knowledge among our people.

The state of Iowa is one vital portion of this vast nation. The Department of Public Instruction has as its immediate concern, the oversight of the elementary and high school education of more than one-half million children. No less immediate is its responsibility in securing competent teachers in sufficient numbers to perform this mammoth task.

Let figures tell the story of the development of this problem: In 1860, Iowa had enrolled in her public schools 167,869 pupils; in 1880, 426,057; in 1900, 566,223; in 1922, 543,430. However, with 22,793 fewer people enrolled today than in 1900, the average daily attendance is 62,886 greater.

In 1860 the state had in its employ 6,374 teachers; in 1880, the number had increased to 21,598; in 1900, 28,789. In 1922, 25,827 teachers were on the pay roll of the state. In 1860 more than fifty per cent of the teachers were men. In 1922, less than ten per cent are men. Today there are in the high schools alone more teachers than we had in all public schools in 1860.

The increase in percentage of attendance far exceeds the increase in population. It is in the interest of these pupils, in the attempt to provide them with better training and to help them to become better citizens that our educational problems arise. It is in the endeavor to provide better buildings, better equipment, better trained teachers, and a practical course of study for these children, that the state of Iowa finds its problems in the administration of education.

A state, as well as an individual, has a variable and varying temperature—periods of elation and of depression. New problems are constantly arising as a result of these changing conditions. Some are temporary and demand immediate solution; others are more involved and require far-reaching consideration before they may be solved.

If a man is hungry, he must have food. That is a vital temporary problem. If a community is hungry, it must be fed, but the real problem lies in providing food in such quantities that only temporary hunger may exist.

So in education the temporary problem may be one of housing, of equipment, or of teachers, while the more fundamental and lasting one becomes a question of the proper course of training for the future development of the child.

At this time our political country is in a period of reconstruction and has gigantic problems to solve. We have a changing economic situation that challenges the best thinking of our financial kings. Our industrial problems urge the knights of labor to their most strenuous efforts. All of these conditions react upon the educational world and the resultant educational problems are worthy of the best trained minds and the most sympathetic hearts.

A new ideal, a composite of national ideals, is gradually being developed which creates a new world consciousness that is helping us to see state and national problems in a clearer light and making it possible to solve them with greater sympathy and in the spirit of brotherly love.

There is no solution that can assure a stable situation or a permanent settlement for the future, for as long as we have life—human life—and growth, there must exist variations in race, color, and climate. The state and the nation must continually modify its laws and adapt its social relations to the changing conditions and ideas as they affect the home, the family, and the state.

At this time I cannot do better than to repeat what I said two years ago.

The cost of education is a fundamental and ever-present problem. The parent, the teacher, the school board, all have to consider the cost. The parent has to pay his ever increasing school tax and find extra ready money to provide for books, and school supplies. The teacher has to depend upon the economic resources of the district for her income. The board of education has to plan for the entire year, to figure cost, to anticipate changes in population, and to provide for any contingencies which may cost extra money. At present, boards of education are confronting a serious situation. In many places the total possible legal revenue will not provide for the schools. Bonds cannot legally be sold under the present restrictive rates. Cost, like the ghost of Hamlet, is keeping the most thoughtful people thinking day and night. From every direction we hear a Macedonian cry for help and many think they are on the road to Jericho.

Education is a function of the state, and popular education is the only means of attaining social, political, and individual freedom. It is by this means that the government can insure its perpetuation, and it is thus interested in perpetuating the public schools, but the public schools must work on problems which the state has to solve. Too long we have looked to foreign countries for leaders, too long we have had courses of study about foreign countries, too long we have taught problems in the abstract, now we need to consider America's problems and center our interest on American methods and develop American ideals, as a basis for American citizenship.

The air is full of "isms" at the present, and we need to stick to the fundamentals in education and eliminate the fads, and create American ideals. We need an American school built on an American philosophy of education and taught by American trained teachers and grounded in American ideals.

In this report I hope to emphasize a few of the most fundamental problems, connected with our educational system.

#### SUPERVISION AND CONTROL.

The supervision and control of the public schools and state institutions are placed legally under the Department of Public Instruction, the State Board of Education, and the Board of Control of State Institutions. The private, denominational and parochial schools have no state supervision and control. Sec. 2627-c of the school laws of Iowa reads as follows:

"The Superintendent of Public Instruction shall have general supervision and control over the rural, graded, and high schools

of the state, and over such other state and public schools as are not under the control of the State Board of Education, or Board of Control of State Institutions."

#### GROWTH AND DEVELOPMENT.

The following statistical table shows the growth and development of the public schools for each decade from 1850 to 1920, inclusive. It also shows the changes from 1920 to 1922.

GROWTH OF PUBLIC SCHOOL SYSTEM OF IOWA.

	Scho	olhouses		pl		Expend	ditures	
Year	Numb'r	Value	Volumes in libraries	Institutes Held	Teachers salaries	School- houses, grounds, libraries, apparatus	Fuel and other con- tingencies	Total

#### SCHOOLHOUSES AND EXPENDITURES.

A brief examination of this table reveals some very interesting facts. In a period of seventy years the number of schoolhouses has increased from 522 to 12,953, and the value from \$68,762 to \$78,369,187. The expenditures for schoolhouses, grounds, libraries and apparatus has increased from \$30,955 to \$14,529,473, and the number of volumes in the libraries from 287 to 1,637,639. The fuel and other contingent expenses has increased from \$3,450 to \$13,390,727. The total cost of conducting the public schools, including the teachers' salaries, has advanced from \$71,219 to \$55,061,829.

\* Including Independent District

#### TEACHERS AND PUPILS.

In 1850 the state employed 549 male and 250 female teachers, and at the present time we employe 2,612 male and 23,215 female teachers. While in 1850 the average salary for males was \$14.76 and for females \$8.78, today it is \$153.24 for the male and \$118.23 for the female teachers. The amount spent for teachers' salaries went from \$36,814 to \$27,141,629.

In 1850 there were 64,336 pupils between the ages of five and twenty-one and only 24,804 were enrolled in the public schools, while today we have 710,190 pupils and 543,430 are enrolled in our schools.

These figures tell the story of our growth in more eloquent terms than words could express it. One of the most significant facts with reference to the situation is that in 1860 we had but 31% of the total school population in average daily attendance while in 1922 we have over 60% of the total in average daily attendance.

#### A BUSINESS OFFICE.

It is not unusual to find people who think the Department of Public Instruction is an office that has primarily to do with the question of teaching, but as a matter of fact the office is a big business organization which handles about \$500,000 annually and has to deal with inspectors, supervisors, stenographers, and clerks, and in addition to keeping the organization in the office in the proper-business channels, it has to deal with ninety-nine County Superintendents and many thousands of school boards.

During the past two years the Department has kept up a correspondence with all these County Superintendents with reference to Teachers' Institutes and the legal problems connected with educational work. It has also written legal opinions for school boards and patrons whenever they have asked for the same.

The Department distributes \$150,000 annually to the Consolidated schools, \$150,000 to the Normal Training high schools, \$50,000 to the Mining Camp schools, and approximately \$100,000 to the Standard schools. This distribution of funds must all be made upon the basis of reports and statistics made by the Superintendents and compiled by the inspectors or supervisors.

The Superintendent of Public Instruction has personally to sign and approve all bills for the distribution of such funds and the traveling expenses of the supervisors and salaries of clerical help. In addition to this he has to sign several thousand certificates which are issued each year. He makes a program and the plans for the Educational Council of the Iowa State Teachers' Association. In this way he directs a sort of scientific investigation in connection with the superintendents and teachers of the state of Iowa. He has direct charge of the work of the County Superintendents and calls them together two or three times annually for the purpose of planning their work and helping them to familiarize themselves with the details of the laws and the local problems of administration. This multiplicity of duties makes the work in the office most exacting and difficult and it can only be accomplished through a great amount of legal knowledge and very accurate and painstaking work.

In addition the Superintendent has to be editor and, in many respects, write a very large number of the bulletins and reports connected with the office. During the past two years he has edited a Biennial Report which contains 380 pages, and written more than 40 pages of this report, and also edited an Educational Directory of 400 pages for each year since he has been in office, has published a pamphlet of the new school laws passed, and altogether published more than 2,500 pages of written material. This takes an enormous amount of work and becomes a serious problem in connection with the general work of the office.

The work of the Department of Public Instruction centers around the following Departments and problems connected with the supervision and administration of these Departments.

- 1. Normal Training high schools.
- 2. Rural schools.
- 3. Consolidated schools.
- 4. High schools.
- 5. Mining Camp schools.
- 6. The Teachers' Placement Bureau.
- 7. Vocational Education.
- 8. Civilian Rehabilitation.
- 9. The certification of teachers.

### NORMAL TRAINING HIGH SCHOOLS.

Iowa now has over one-half million children in the public schools for whom teachers must be provided. More than forty thousand persons who have been certificated by the Board of Educational Examiners now have the legal right to teach in Iowa, but a large number of these have left the teaching profession and gone into other lines of work which are more remunerative, and it is necessary to certificate several thousand teachers annually in addition to this number in order to secure enough teachers who have the legal right to teach. It is a gigantic task to train enough teachers for these schools.

The colleges and universities are giving much time and spending much money in training teachers for the high schools, but comparatively very little effort is being devoted to the training of teachers for the graded and rural schools. Iowa has never made adequate provision for the training of teachers for the elementary schools.

The Normal Training Department in the high schools, under the supervision of the Department of Public Instruction, has come in response to the demand for trained teachers for the rural schools. This Department was established in 1911 with 40 schools and 624 pupils, and it has grown until today it has departments in 192 schools with an enrollment of over 6,000, and last year more than 2,000 were graduated, most of whom were ready to enter the rural schools this year.

The growth of this department is the best evidence of its popularity and service to the rural schools. This department could easily be doubled in size and in importance if sufficient funds were provided for its development.

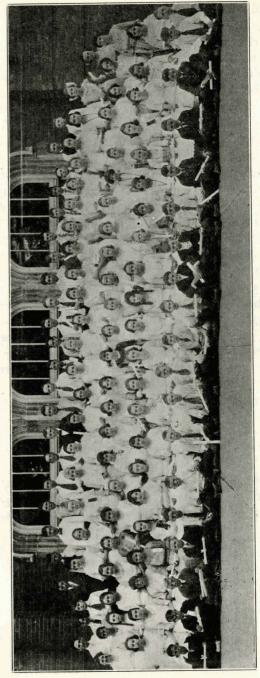

#### THE RURAL SCHOOL.

In a general way, the rural school means a single school with a single teacher, situated in a farm community where the teacher handles all the work for eight grades, is the janitor, the instructor, the supervisor, and the administrator. This type of school was the result of a pioneer period in our state and national development. The rural school was a part of the rural life and was frequently near a country store and a country church. At this store the farmer bought his groceries, swapped stories, got the market reports, and learned the news of the neighborhood. The store was a social center, where the boys congregated to work off their surplus energy in various amusements.

The church was the social center on Sunday, where all united in worship, the benign influence of which lasted through the week.

The school has as many hallowed memories and sanctified spots as the church. It was here that all country children, and that was all children at one time, received the rudiments of an education. The curriculum was represented by the three R's, and the attitude, supervision, and administrative ability of the teacher was typified by the motto, "No lickin, no learnin."

Not long ago in the history of states, Iowa had this kind of a community store, church, and school, but social and industrial changes have come. New means of transportation and communica-

Eighth Grade Graduates, Oskaloosa, Mahaska County.

tion have had their influence on church, and store, and school. The railroad, automobile and airplane have influenced time and space. The telephone has helped to bring larger areas together and make communication easier. These and many other inventions have made a different rural life, and a changed school must minister to the needs of the community.

#### CONDITIONS IN RURAL SCHOOLS.

There are two types of districts that have control of these schools, the independent rural district and the subdistrict. The subdistrict usually consists of a township and one director in each school district, the total number of directors making up a school board for the entire township. The rural independent district has three directors who have charge of the schools and they determine the amount of taxes to be raised, hire the teacher, furnish the equipment, and control the school expenditures for the year. The school district usually contains four sections and has one school to serve the people who live in that district.

Some of these schools are located in districts where the land is poor, the taxable valuation small, the buildings are old, the equipment meager, and teachers who have little training are hired because of the economic situation. Other districts have a large taxable valuation and as a result have been able to erect excellent buildings, well lighted, heated and ventilated, with a reasonable amount of equipment and have hired teachers well trained for the work.

By taking a few extreme cases almost anything may be proved about the system as a whole, and speakers and writers are apt to take extreme cases to prove what they want, but the real truth lies in the median cases which are between the extremes. It is not unusual to see educators who condemn these rural schools, and who point out their weaknesses, turn away and leave them to continue their existence as before. Comparisons have frequently been made to show the faults of the rural school, and it is not unusual to have the rural school compared with the high school instead of with the graded school. It has been in the past and is now the policy of this office to survey these schools as carefully as time and help will permit, to take them as they are and try to approve them.

#### RURAL PROBLEMS.

The real rural school difficulty centers about several problems. Among the most important are the following: school boards, teachers, funds, supervision, and courses of study. There is no attempt to suggest these in the order of their importance.

School Board. The school board ought to be given the first consideration, as it is the direct representative of the people, elected by them to carry out their wishes in educational matters. It has to assume the responsibility for furnishing funds, for hiring teachers and janitors, for establishing courses of study, for transporting pupils, and for determining the general policy of the school.

As a general rule, these boards are not in touch with the work of other districts, and there is no state-wide, constructive plan for the conducting of these schools.

Support. The school board has to determine the amount of taxes which should be levied and certify the same to the county auditor. It has to figure the legitimate expenses of the district, and then provide for contingencies which may arise during the year, and raise sufficient revenue for the conducting of the schools. Without this economic attention, the schools could not be kept in operation. There is no constructive, state-wide policy with reference to the taxation. In many places the taxes are already too high, and some uniform method should be established for equalizing the taxes and the educational opportunities of the children.

The Teacher. A little examination of the facts reveals that the teachers in the country schools are hired for a short period, frequently as short a time as three months, that they have had a small amount of training, and that there is little, if any, supervision. In order to meet the difficulty in securing qualified teachers for the rural schools, the Normal Training high schools in the State of Iowa have been organized. At the present time there are 192 of these schools, with an enrollment of approximately 6,000 that are turning out more than 2,000 graduates per year. The work of these graduates in the rural schools has had a very wholesome effect. During the past year more than 30% of the rural schools have been taught by the graduates of these Normal Training high schools.

Supervision. That the rural schools are not adequately supervised is self-evident. The County Superintendents of the state are doing some very excellent work in connection with these schools,

but they are limited in time and opportunity. Their work instead of being supervisory, must be more in the nature of inspection and visitation.

Course of Study. The course of study in the early school consisted of short exercises in reading, writing, arithmetic, and spelling. A little care in comparing the course in the pioneer school with the one in the school today shows that the course of study has been improved by the addition of new practical subjects that pertain to rural life, and that are valuable to the health and citizenship in the community.

Summary. A little care in comparing a pioneer rural school with one of today shows that many changes, to include practical, vocational, and home making subjects, have taken place. Teachers are better trained. Many of them are graduates of good high schools with special training for rural teaching. The buildings are better. The old log school house with its crude equipment is only a memory in the minds of pioneers. The course of study has been expanded. An examination of the records shows that last year more than 11,000 boys and girls finished the course of study in these schools, took the final examinations, and now are qualified to enter the high schools of the state. Every student who has completed his course in one of these rural schools is entitled to training in some high school that will accept him, and his district must pay his tuition.

#### METHODS OF IMPROVEMENT.

In recent years the rural school has had many changes and improvements, but it has probably been changed the least of any part of our educational system, and now needs the most attention.

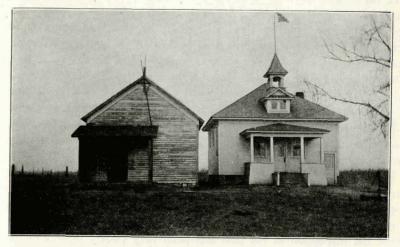

Two methods of improvement in these schools are now in operation; one consists in making a Consolidated school with districts united and pupils transported to a certain school; the other of standardizing the one-room school where it now stands. Each has its advantages and its difficulties.

### THE STANDARD SCHOOL.

The Thirty-eighth General Assembly established the Standard school as a means of taking care of the children and teachers in the rural schools.

This law, known as the Evans-Smith bill, made an appropriation of \$100,000 annually for the purpose of helping the one-room

school. The bill provides state aid of \$6.00 per pupil for each student who is in attendance for at least six months of the school year. One-half of the amount goes to the teacher as an addition to her salary and the other half to the district and must be used

Standard School-Before and After.

for the purchasing of more equipment. The law requires that the teacher have a first grade certificate and that she be hired for a year. Grounds, building, and equipment must meet the standard set by the Department of Public Instruction.

An official rating card for Iowa Standard schools has been prepared and issued by the Department of Public Instruction. It is found in the Bulletin on Standard schools and covers the following points:

- I. Grounds and outbuildings.
- II. The schoolhouse.
- III. Equipment and care of the schoolroom.
- IV. Library and supplementary readers.
- V. The teacher and the school.
- VI. Community activities.

The law did not provide for any means of administration and provided no inspector, but for a time an inspector was taken from another department at a very great sacrifice to the work. However the Thirty-eighth General Assembly reduced the number of inspectors, and for the past two years it has been impossible to give any inspection from this office to these schools. As a result the

only inspection given to them has been by the County Superintendent and there have been ninety-nine different standards, and it has made the advance of this work very difficult.

This Department asked the Retrenchment and Reform committee for assistance in carrying on this valuable piece of work. They asked the Attorney General for an opinion and after a long period of waiting, an opinion was given that the standardization funds could not be used for the purpose of inspection, and we have had no help this year to carry on the work. As a result we have to depend entirely upon the efforts of the County Superintendent for the standardization of these schools. In most cases reports have been prompt and the results satisfactory. However, in a few cases the County Superintendents' reports have been very unfavorable and the checking in this office has compelled us to drop a good many schools.

This has worked a hardship upon some teachers who were led to believe that they were meeting the requirements for a Standard school, but we have depended entirely upon the County Superintendents and they are responsible for the situation. We have found that the inspection in the past has been very poorly done and that County Superintendents have been unwilling to certify to some schools that were on the list for the previous year. This has sometimes caused dissatisfaction on the part of the teachers and boards of education in these districts.

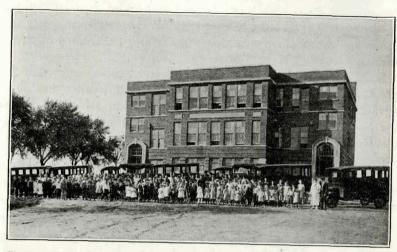

#### THE CONSOLIDATED SCHOOL.

The Consolidated school in Iowa has been in operation for about fifteen years, but its growth has been slow, and it was not until recently that its rapid development began.

During the past two years of the present administration the number of Consolidated schools practically doubled and last year the Department dedicated an average of two new schools per week for the first six months of the school year. However, the economic situation has made it difficult for districts to continue the improvements.

The Consolidated school has its advantages and disadvantages, the same as any other school, and the wise person considers both sides of the case.

The Consolidated school is formed by the union of several districts which build a central school and transport pupils. The kind of building, the equipment, and grounds, depend somewhat upon the size of the district and the value of the taxable property. Six-

Geneseo Township (Buckingham)—Organized 1919; sections in district, 36; total enrollment, 150; high school enrollment, 33; motor busses, 5; cost of building, \$130,000; cost of teacherage, \$20,000; children transported, 150.

Geneseo Township (Buckingham) Teacherage—One of the problems confronting every school teacher, superintendent or instructor is that of getting a suitable house to live in. It is not only a problem of the teacher, but it is the problem of the school board because with no place to live it is impossible to get the better teachers to remain in the country. Geneseo Township probably has the finest teacherage in the state, costing \$20,000. It is modern in every way, with electric lights, gas, hot and cold water. It is also one of the schools having excellent vehicles for taking the children to and from school.

teen sections is the smallest territory that can be consolidated, and at least one district has been formed with more than 70 sections. At the present time 440 Consolidated districts have been joined and about 400 are in active operation, 70 of which are located in purely rural districts.

Some of these districts are located in the open country, but the great majority are in the small towns. Each location has some advantages and disadvantages. The purely rural location brings the question of a teacherage to the front at once, and in some places fine homes for the Superintendent and teachers are built in connection with these consolidated districts.

The following are a few of the advantages of the Consolidated school. It gives a larger taxing area, usually gives the pupils the advantage of a high school, better buildings, larger grounds, an experimental plot for agriculture, and better supervision.

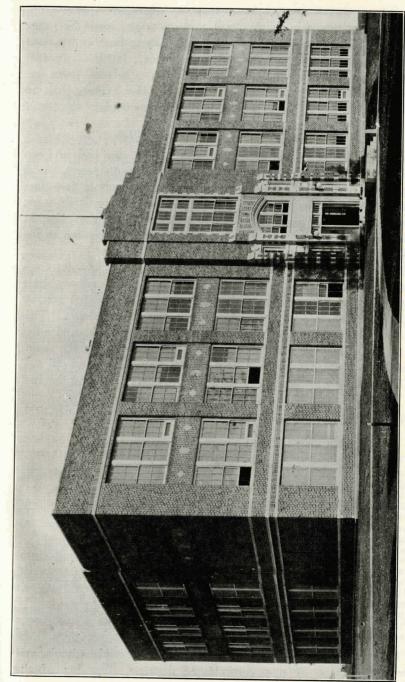

A new bulletin on Consolidated schools has recently been issued and the following facts taken from this bulletin furnish some very interesting information with reference to Consolidated schools.

Last year there was a total enrollment in the Consolidated schools receiving state aid of 51,439 and those not receiving state aid of 21,187, making a grand total enrolled of 72,626. In the high school there was enrolled in all schools 72,626. The total cost of transportation was \$1,708,654.31, transporting a total of 35,611 pupils at an average cost per pupil per year of \$51.77. The number of horse busses in use for transporting these children was 1,781 and the number of motor busses was 574.

Transportation cost runs very high in some schools with horses and in others very high with motors. In the case of one school represented in this list when a member of the school board was interviewed, he replied that he knew it was high, but unless the men were employed who were given the contract that these same men would make trouble for the school board.

There has been considerable discussion of the subject of motor vehicles and the ownership of same. A few schools in the state are employing men who own the motor busses and are paying them a very extravagant wage, but the large number of schools have purchased their own vehicles and the extra cost has always proven its worth inasmuch as the employment of drivers who own their busses leaves the school at the mercy of the driver.

An interesting item in this report is the tax in mills to support the Consolidated schools. High taxes have been quite commonly

of building, \$123,000;

charged to Consolidated schools but an investigation frequently shows that a big item in the local taxes is often made by other expenses than the school. It is quite common to hear expressions of approval of the schools even though the cost is high. In fact investigation has nearly always shown that people who were opposed to the school were in the minority. The average cost in mills for the state of Iowa was 50.9.

#### COST OF CONSOLIDATED SCHOOLS.

So much has been said in recent months about the cost of Consolidated schools that a presentation of actual facts seems to be very much needed. Comparison of the cost of schools in first-class cities doing the same type of work and the same amount of work shows conclusively that the Consolidated school is the cheapest school in the state of Iowa giving twelve years of education to the girls and boys in the community.

Buena Vista county, with fourteen Consolidated schools, commenced the work of consolidation early. For this reason there is prepared a comparison of these fourteen Consolidated schools with the fourteen large first-class cities in the state of Iowa. This comparison could be made with any of the larger towns and cities in the state showing that the Consolidated schools have been maintained at a much less tax levy than is true in the towns and cities.

The cost of all schools is a matter of public record and the cost of the schools can be found on record in the office of the County Superintendent. The figures given show the tax for August, 1921.

#### TAX LEVY IN MILLS FOR SCHOOL PURPOSES.

#### School year 1921-1922.

City Schools	Mills	Consolidated Schools	Mills
Clinton	124.4	Alta	58.0
Waterloo (West)	117.0	Brooke Township	56.0
Fort Dodge		Fairview	43.6
Council Bluffs		Hayes Township	24.5
Boone		Highview	39.2
Mason City		Lincoln-Lee	32.2
Marshalltown		Linn Grove	48.0
Iowa City	88.2	Marathon	53.3
Waterloo (East)	85.2	Newell	57.0
Ottumwa		Providence Township	33.4
Cedar Rapids	78.0	Rembrandt	
Muscatine		Sioux Rapids	64.0
Burlington		Truesdale	
Des Moines		Albert City	

Legal. The elections, closing of so many one-room schools, and the organization of new consolidated districts, disposing of the

rural district property, etc., has caused an enormous amount of legal work, and had it not been for a legal authority in the office, the work in the districts would have been much slower.

#### HIGH SCHOOLS.

For the past biennial period the high school in Iowa has continued the phenomenal growth which it had in the previous few years. It seems to fill a very desirable place in our educational system. The following facts tell the story of its growth.

In 1919-20, 63,217 pupils were enrolled in the high schools. In 1921-22 the enrollment had increased to 72,681, or approximately 14%, in a period of two years. Of this number 21,125 were non-residents and the districts received \$1,582,947.78 for tuition. Of all those in attendance 28% were nonresidents of the districts in which they attended. The tuition rate for the high schools was increased from \$8.00 per month to \$12.00 per month by the last General Assembly. This advance in rate partially accounts for the increase in the amount of tuition which has been paid.

At the present time schools are approved for one, two, three, or four years' work, depending upon the size of the school, the numbe of teachers, pupils, and the equipment provided. Iowa now has 10 schools that are approved for one year of high school work, 61 approved for two years, 72 approved for three years, and 699 approved for four years of high school work, making a total of 860 approved high schools.

This part of our educational system presents many problems, most of which can only be mentioned in this brief report.

The course of study, properly trained teachers and supervisors, sufficient funds, proper libraries, adequate equipment, grounds, buildings, transportation, all are demanding attention and at once make problems of great magnitude for the State of Iowa. A table of statistics later in this report gives many interesting facts.

The public high schools of the state are divided into Approved, Consolidated, and Normal Training. An Approved school is one that has been inspected and standardized by the Department of Public Instruction. All high schools must be approved if they desire to receive tuition for nonresident pupils. The Consolidated school is organized under a special statute, receives state aid for equipment and maintenance, and must give special emphasis to vocational subjects, with greatest stress upon manual training, domestic science, and agriculture. The Normal Training high

school is in reality only a department in a high school with special emphasis upon the methods of teaching. The course aims to prepare teachers for work in the rural schools.

Inspectors are visiting these various types of schools as frequently as possible and detailed reports are later presented.

#### MINING CAMP SCHOOLS.

One portion of our school system has been neglected for a long time, and a problem so mammoth in its proportions and so grave in its consequence has arisen that the state saw fit to center special attention upon this work.

The school in the mining camp is a peculiar one. It had no special origin, but, like Topsy, it just grew. Frequently, like a mushroom, it sprang up overnight.

The Thirty-eighth General Assembly gave an appropriation of \$25,000 for this work and the Thirty-ninth General Assembly doubled the appropriation when it realized what had been done and what good could be accomplished.

A special inspector was provided who devoted his entire time to this work. Some serious conditions were found. Buildings were in a wretched condition, school furniture was dilapidated, and the equipment almost entirely lacking. Taxes in many places were at the limit and yet local school boards could not give reasonable schools. Gradually these conditions have been remedied but there is much work yet to be done.

#### STATE TEACHERS' PLACEMENT BUREAU.

The Thirty-eighth General Assembly established a Teachers' Placement Bureau in the office of Superintendent of Public Instruction. This Department was organized July 1, 1919. Dr. O. H. Longwell, who for a quarter of a century had been President of Highland Park College, was the first director. He was an expert in this line of work and deserves much credit for the splendid service which this Bureau has been able to offer. After his untimely death, the position of director was vacant for some time. Later the Department was able to secure the services of Superintendent J. J. McConnell, formerly of the Cedar Rapids schools, and during the past year the work of this Bureau has been under his direction. Boards of education and school teachers have found helpful service through this Bureau.

"No person connected with the office of the Superintendent of Public Instruction shall be held responsible or be understood to vouch for the fitness or success of any teacher who may secure a position through the agencies herein provided."

This law makes it very specific that the office is in no way responsible for locating or recommending the teacher who enrolls, but that it is rather a clearing house where school officers may find available teachers, and teachers may learn of the vacancies which are known in the state. Enrollment in this Bureau is free to all teachers who hold certificates in the state.

#### VOCATIONAL EDUCATION.

Vocational Education in Iowa has been introduced as a legal part of our educational system. Work has been started in Agriculture, Trades and Industries, Home Economics, and Teacher Training. In connection with this work the Civilian Rehabilitation has become a part of our system and is now looking after a large number of cases.

During the past year the work in Vocational Education has been somewhat handicapped because of lack of leadership for these various departments, but after October 15, 1922 this work will be under the direction of J. J. McConnell, formerly Superintendent of the Cedar Rapids schools, and will no doubt be carried on in a most excellent manner.

Last year Vocational Agriculture was carried on in 43 high schools in the state of Iowa. This Vocational work requires one-half of the pupil's time. This is a most unfortunate requirement as the pupil is thus made an irregular student and is obliged to take longer time should he desire to continue his high school course. The same difficulty applies to the question of day classes in Home Making in the public schools. The Federal Government has provided \$114,811.99 for use in Iowa for the year 1923-24, if an equal amount is provided by the state.

The work in Agriculture has been assisted in a great many respects by the Department of Education in the Iowa State College of Agriculture and Mechanic Arts. Special courses in Vocational work have been offered and many teachers have been trained for this work. The work in Trades and Industries has not prospered as it was hoped that it might.

The need for Vocational Education is too generally recognized to need argument in its favor. It helps to adjust the general educational system to the needs of those who are in remunerative occupations; it increases the general efficiency of laborers as public

servants; it improves the social service and is a distinctive advantage to those who cannot go to the regular schools.

The work in Vocational Education deserves the support of the educators and citizens of Iowa for the service which it may render.

#### CITIZENSHIP.

The first great fundamental problem is that of citizenship. Interpreted in a narrow way, it concerns only the individual and his duty to his country, but taken in a broader sense there is no limit to its significance.

Fundamentally the question of citizenship is a legal one. The Thirty-eighth General Assembly enacted a law requiring that the subject of American citizenship be taught in all public and private schools in Iowa. The Thirty-ninth General Assembly enacted the following law:

"Section 1. In all public and private schools located within the state of Iowa, commencing with the school year 1921, there shall be given regular courses of instruction in the Constitution of the United States and the Constitution of the State of Iowa.

"Section 2. Such instruction in the Constitution of the United States and the Constitution of the State of Iowa shall begin not later than the opening of the Eighth Grade and shall continue in the High School course to an extent to be determined by the Superintendent of Public Instruction."

In accordance with these legal requirements, committees were selected, and a course of study made and supplied to County Superintendents and teachers. In order to emphasize this work, a series of circulars was written and sent to County Superintendents for the teachers. Later reports were required to determine progress and accomplishments.

One hundred thousand copies of the elementary course of study were prepared and distributed. Reports show that last year over 200,000 children in the grades took work for the entire year in citizenship. Over 40,000 in the seventh and eighth grades studied the Constitution. Nearly 30,000 in the high school studied citizenship and over 25,000 in the high school studied the state and national Constitutions.

During the past year every Teachers' Institute has had a special instructor in citizenship and has devoted at least two hours to its study.

This is the legal phase as enacted by the Legislature and carried into effect by the Department of Public Instruction. In reality

citizenship covers the entire range of problems of the home, the school, and the state.

#### ILLITERACY.

The work in illiteracy is but one of the problems in citizenship, and as such it deserves careful consideration. The importance of this problem as far as this state is concerned has been grossly overestimated by ignorant or poorly informed people who are looking for some sensational criticism on Iowa.

Let it be understood at the beginning that Iowa has the lowest per cent of illiteracy of any state in the Union, and while it is true we have 20,680 illiterates, this is only 1.1 per cent of our total population. The fundamental outstanding truth is the fact that 19,444 of these illiterates are over twenty-one years of age, and there is a possibility of the school reaching only 1,236 of these children, and these are so deficient that they cannot learn to read and write. From the 20,680 subtract the number beyond the school age and the number of deficients and this leaves an almost perfect record for the public schools. Therefore, as a public school problem, illiteracy is eliminated. It resolves itself into one of the adult schools which must train the older persons at times when their economic status will permit them to study.

Inasmuch as many people are calling for information on illiteracy and are frequently misinformed, some facts may be appreciated.

Illiteracy is about equally divided between urban and rural population. There are 10,097 illiterates in the cities and 10,538 in the rural communities. According to the census, any town under 2,500 is classified as rural population. Of the children ten to fifteen years of age, only 0.2 of one per cent are illiterate, and of those sixteen to twenty years of age only 0.3% are illiterate.

In 1910 Iowa had a population of 152,869 fewer children over ten years of age than in 1920 and had 9,209 more illiterates than today. At that time we had 1.7% illiterates. The public schools have reduced illiteracy 0.6 of one per cent in a decade.

#### SCHOLARSHIP.

The Superintendent of Public Instruction believes that the first essential and the greatest reason for the existence of a school is scholarship—actual knowledge of the branches taught. With the idea in mind of encouraging thoroughness, a scholarship contest was inaugurated last year in the rural schools.

At the close of the year a special diploma was given to one boy and one girl who led the county in their studies. These pupils all have to pass the same examination to enter high school, hence they are on a uniform basis. After the county scholars are awarded, the papers are selected and the 15 boys and 15 girls who lead the state are selected and a special diploma is given to them. The Commissioner of Education of the United States also signs the latter diplomas.

Last year 63 counties took part in the contest, and it is hoped that in a short time every county in the state will take this means to encourage educational efficiency. This contest may be carried on by the grades in city schools if they desire to do so.

#### A THRIFT PROGRAM.

In this period of unrest and economic stringency no sane person needs an argument to convince him that some general thrift program is necessary. A course of study in Thrift has been prepared in connection with the work in citizenship, and we have also been cooperating with the Educational Department of the Iowa Bankers' Association in an attempt to establish thrift habits among the children in the public schools of the state.

Thrift is the basis for ability to succeed financially and is essential to every well-rounded life, and instruction in simple economic principles and project practice in Thrift are vitally needed in the schools because the prevalent extravagance and waste in American life threatens to undermine the economic independence and civic virtue of American citizenship. The present social and economic unrest is evidence of this need.

The American Bankers' Association made a tentative outline of work which is given below:

Course of study in Thrift.

Material to be used.

Systematic saving, wise spending and careful investment of money.

Judicious use of time and materials.

A broader understanding of financial institutions and financial practice.

It is hoped that Iowa teachers will follow the suggestions and plans of the committee and make this a part of the public school course of inspection.

#### IOWA STATE TEACHERS' READING CIRCLE.

The Iowa certificate law recognized the vital necessity for growth in teachers, and requires each teacher to read thoroughly one professional book each year and submit proof of this reading to the County Superintendent in order to renew his certificate.

The Iowa State Teachers Reading Circle was organized for the purpose of selecting uniform professional reading texts and getting the work in a systematic way to the teachers of the state.

A member of the Iowa Teachers' Reading Circle is expected to read two books a year, and to own at least one of them. When he has done this, he is entitled to an annual certificate of credit signed by the County Superintendent. Any member securing four such certificates is entitled to a lithographed Reading Circle Diploma upon presenting these certificates to the secretary and manager of the Iowa Teachers' Reading Circle Board.

The Reading Circle Board meets each year in the office of the State Superintendent of Public Instruction, for the purpose of selecting three or four recent books which best represent the trend of educational thought. Representatives of the different book companies are given the opportunity to present their books at this time, and the books for the year are selected.

The officers and directors of the Iowa Teachers' Reading Circle Board for 1922-23 are as follows:

P. E. McClenahan, president ex-officio; A. E. Harrison, secretary and manager; Maude Wakefield, treasurer; Geo. E. Masters, Kate L. Hull, E. C. Lynn, N. J. Breckner.

A statement about the Reading Circle by the Secretary, County Superintendent A. E. Harrison, Buena Vista county, will be found later in this report.

#### CERTIFICATION OF TEACHERS.

# Board of Educational Examiners.

P. E. McClenahan, ex-officio, President; Walter A. Jessup, ex-officio; Homer H. Seerley, ex-officio; Raymond A. Pearson, ex-officio; H. E. Blackmar, Jeannette Lewis, William F. Barr, Viola H. Schell, Secretary.

The Board of Educational Examiners consists of the persons named above, the first four of whom are ex-officio members and the last three are appointed by the Governor. The Thirty-ninth General Assembly added one representative to this Board who should come from the denominational colleges. The Board of Educational Examiners has charge of the certification of all teachers. They select a secretary who carries on this work in the office of the Superintendent of Public Instruction. The State Superintendent is ex-officio chairman of this Board, signs all certificates, and carries out the work as directed by the Board and as prescribed by law.

Three series of certificates are issued by this Board; namely, state certificates, uniform county certificates, and high school Normal Training certificates.

### STATE CERTIFICATES.

State certificates are issued upon:

- (1) examination,
- (2) graduation from the State University of Iowa, the Iowa State Teachers' College, the Iowa State College of Agriculture and Mechanic Arts, and Iowa colleges accredited by the Board of Educational Examiners.
- (3) graduation from colleges and normal schools of other states which meet the Iowa standards; provided the applicants file proofs of two years successful teaching experience.
- (4) state certificates of other states which meet the Iowa standards.
- (5) fifteen years' teaching experience and one year's training above high school grade.

Examinations for state certificates are held in counties calling for such examinations on the uniform county certificate examination dates and the Saturdays following in January, June, July, August, and October.

In addition to the three state schools accredited by the statute, the colleges named below are accredited by the Board of Educational Examiners for state teachers' certificates:

Buena Vista College, Storm Lake. Central College, Pella. Coe College, Cedar Rapids. Columbia College, Dubuque. Cornell College, Mount Vernon. Des Moines University, Des Moines. Drake University, Des Moines. University of Dubuque, Dubuque. Ellsworth College, Iowa Falls. Grinnell College, Grinnel'. Iowa Wesleyan College, Mt. Pleasant. Luther College, Decorah. Morningside College, Sioux City. Mount St. Joseph College, Dubuque. Parsons College, Fairfield. Penn College, Oskaloosa. Simpson College, Indianola. Upper Iowa University, Fayette. Western Union College, Le Mars.

During the biennial period, state certificates have been issued as follows:

# HIGH SCHOOL NORMAL TRAINING CERTIFICATES.

High school Normal Training certificates are issued to graduates of Normal Training high schools who pass the required examinations.

During the biennial period, high school Normal Training certificates have been issued as follows:

	3,154	6,028
Renewal	2,874	6,023

Five thousand one hundred fifty-three provisional certificates have been issued during the biennial period.

The total number of teachers' certificates issued during the biennial period is 40,413.

# CERTIFICATION AND TRAINING OF TEACHERS.

The following statistics with reference to the preparation and certification of teachers give some very interesting facts. These statistics refer to all teachers in the grades and high schools in the three types of schools; the Approved, Consolidated, and Normal Training. These statistics cover the year 1921-22 only.

The figures show first, the kind of certificates and number of each kind held by the teachers in each type of school; second, the amount of training each teacher has received in the high schools; third, the time she has attended college.

This shows that 451, teachers hold provisional certificates. Most of these are issued as the result of a certain amount of college training rather than upon a low record of examination grades. Only 39 hold third grade certificates, 589 hold second grade, and 2,407 hold first grade uniform county certificates, but 609 hold Normal Training certificates, which are practically the same as first grade certificates, making a total of 3,016 first grade certificates.

The high school record is still more significant as 7,180 out of a total of 9,099 have completed a four-year course.

The college record is very significant. It shows that many of the teachers stop when they have had two years of college training and only a small number go back for a single year, but most of them finish a full four-year college course.

Of these 4,220 have had one year or less of college training, 2,071 have had two years' work above a high school, and 3,752 have completed a four-year college course. The following tables compiled by Mr. Kies give a very complete record.

### RECOMMENDATIONS AND SUGGESTIONS.

I. Revision and Codification of the Laws. A code commission has been codifying the laws of the State of Iowa, and this commission has had a special committee to deal with the school laws. Honorable J. H. Trewin, of Cedar Rapids, has had charge of this work. He held conferences at various times with the leading educators of the state, and as a result has re-written many of the school laws. He has cleared up ambiguous clauses, removed contradictory statements, and has classified them in a very excellent way. The commission has done a splendid piece of work in codifying these laws, and the results should have the earnest, careful con-

sideration of each member of the Legislature. The committee has prepared a number of educational bills, and no doubt will present them at the meeting of the Legislature.

II. Research. The Department of Public Instruction has no Research Bureau or any one to compile the statistics when acquired. The special reports and annual reports of the County Superintendents furnish the regular statistics, but these should be supplemented by many special reports and some one should be employed to interpret these facts and get them to the public. The reports and material in the office would prove a veritable gold mine to a statistician and would give the public some adequate idea of the great work that is being done.

Many cities are now employing statisticians on their staffs and the state cannot afford to let this field go uncultivated. Research work should be done, and the information given to all public schools.

III. School Boards. At the present time, Iowa has more than 20,000 members of boards of education, and these persons have no means of getting together and making plans for carrying out a constructive, educational policy for the state. These members of the boards of education are obliged to take the responsibility for the public schools. They must hire teachers and janitors, determine the amount of money to be raised, see that the money is spent wisely, and assume the general responsibility for all problems in connection with the schools.

A provision should be made so these members of boards of education could be called together by the Superintendent of Public Instruction, for the purpose of making plans for the entire year for a constructive, uniform, educational policy. Provision should be made for the district to pay the expenses of board members while they are actually in attendance at these meetings.

IV. Mining Camp Schools. The schools in the Iowa mining camps form a special problem and should be given special attention. These schools are the result of congested conditions caused by the construction of small homes located near the mines. In most places the land in the district has a low valuation, and the tax rate is high.

The school buildings are poor, and the equipment is meager. Special work has been done in these schools during the past year, and many improvements have been made, but there is still a great work to be done in this field. These schools should be given an especial appropriation and a permanent inspector should be provided.

V. The Teachers' Placement Bureau. The Teachers' Placement Bureau supplies an apparent need at the present time, as a large number of boards of education and teachers have taken advantage of the fact that a clearing house is available. An appropriation of at least \$5,000 annually should be made for this Bureau so that a competent director could be kept permanently and boards of education and teachers of the state may be better served.

VI. Rural Schools. Iowa has 9,605 rural schools, and 173,-259 children enrolled in these schools. These children are all doing work below the ninth grade. In the biennial period the number of schools has been réduced 1,171 and the enrollment decreased 41,239. This is a very significant fact. Whether it is for better or for worse remains to be seen, but the fact is that parents are getting their children out of the one-room schools and sending them to graded schools.

Country children are entitled to as good teaching, as long a term, and as pleasant surroundings as the children in the cities. The work of improving these schools is the most important educational work in the state of Iowa, and it will have the most far-reaching effect. Special help should be given both to the Consolidated and to the Standard school, as these institutions both are helping to solve the rural school problems.

VII. Scholastic Qualifications. Any child who finishes one part of our educational system should have easy access to the next higher department of the system. Any student who finishes the required course in the eighth grade should be qualified to enter high school, and any student who graduates from a four-year approved high school should have unconditional freshman standing in a Liberal Arts course in the institutions of higher learning.

VIII. Monthly Bulletin. The teachers of the state should be familiar with the details of the work in the office of the Department of Public Instruction.

At the present time teachers have no accurate means of getting information with reference to the work in the office. If they get any information at all it is second or third hand and is frequently inaccurate and unreliable. For that reason a monthly bulletin ought to be prepared and sent out to the teachers. Bulletins of information are now published by the Departments of Public Instruction in the most progressive states in the Union. This kind of publicity should be given to the Department.

IX. Educational Commission. A very large number of school districts in the state of Iowa at the present time are having financial troubles, and are unable to raise sufficient funds to carry on the actual work of the school. Boards are issuing warrants for salaries and marking them unpaid for the want of funds. The teachers are obliged to discount these warrants in order to have them cashed. Taxes are unusually high, and are by no means uniform in the various parts of the state. The General Assembly should appoint a standing educational commission to study the educational problems for the entire state of Iowa. Such a commission could save millions of dollars and help to equalize the burdens and opportunities of educating the children of the state.

X. School Nurse. No one denies that the health of the child is one of the first prerequisites of a good school. We plan buildings with better light, heat, and ventilation than those of previous years, but only recently have we really discovered the great number of defects among pupils who are supposed to be in good health. School nurses ought to be provided for every county. They ought to be under the immediate direction of some one who is authorized to lay out the work and make the plans for the year. The local nurse should be under the direction of the County Superintendent and under his control. A nurse for the state of Iowa who could outline the work for the year would be a valuable addition to the field force of the Department of Public Instruction of the state.

XI. Educational Building at State Fair. The Iowa State Fair has been very helpful in preparing an educational exhibit and getting this work before the people of the state but both the fair management and the Department of Public Instruction have been handicapped on account of lack of space and proper means of displaying the exhibit after it has been prepared. This Department has previously recommended a special educational building at the Iowa State Fair grounds and now wishes to emphasize the necessity for such a building, where the work of the schools of the state can be placed on exhibition and put before the people of the state.

XII. Legal Requirement for Instructors. The Thirty-eighth General Assembly enacted a law requiring the teaching of citizenship in the public schools. Our law requires that all teachers in the public schools shall hold certificates issued by the Board of Examiners, but it does not require that a teacher shall be a citizen of the United States. It necessarily follows that many aliens who

have not even taken out their first papers are teaching in the public schools. Many aliens teaching in the public schools are required under our law to teach American citizenship. It is our opinion that a law should be enacted requiring that candidates for teachers' certificates should be citizens of the United States.

The law makes no requirement for professors, instructors, or teachers in our various colleges, either in regard to citizenship or scholarship. Any person may be employed in any of our state colleges, the question of fitness being left entirely to the discretion of the person making the selection. College teachers, professors, and instructors should be required to have a certificate of qualifications the same as teachers in the public schools.

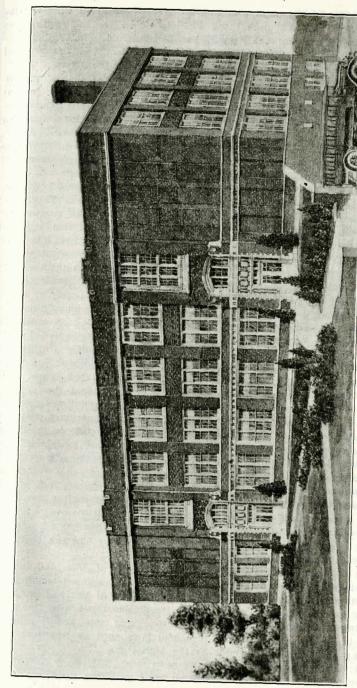

### LEGAL DEPARTMENT.

A. L. Heminger, Deputy State Superintendent of Public Instruction

In addition to being required to furnish written opinions to school officers on questions of law, the Superintendent of Public Instruction is a final court of appeal from an error of a school board in making its decision. During the biennial period, July 1, 1920 to June 30, 1922, there were twenty-two appeals of this kind heard and decided by the Superintendent of Public Instruction. These cases may be grouped under the following heads: School sites, 2; residence of children, 4; transportation, 7; dismissal of teacher, 3; change in the boundaries of school districts, 2; grading of school, 1; petition for dissolution of a consolidated district, 3.

The law made no provision for an appeal to the Superintendent of Public Instruction from the decision of the county superintendent on a petition to dissolve a consolidated district. These appeals were dismissed for lack of jurisdiction, and an action was brought in the municipal court of Des Moines on a writ of certiorari to compel the superintendent to hear and determine the question. On the motion of the Superintendent of Public Instruction the court dismissed the plaintiff's petition and quashed the writ. An appeal from this decision was taken to the supreme court, but it never reached a hearing for the reason that the plaintiff dismissed his petition. Since these decisions the law has been amended, permitting an appeal to the county board of education, from the decision of the county superintendent on a petition for dissolution of a consolidated district.

The appeals on the question of transportation did not come from those districts composed of rural territory in which a central school has been established and in which transportation is required by law for all pupils living outside the town or village, but from school townships or independent districts in which a school may have been closed on account of the small attendance, or in which the pupils did not live within reasonable walking distance from school. The rule of law laid down by former superintendents that a board may be required to furnish

transportation to any pupil who does not live within a reasonable walking distance from school in those districts which are not required to furnish transportation to all pupils has been upheld. Under this rule the board may meet the requirement by actually transporting the child or making a reasonable allowance to the parent or guardian.

The opinions have not yet been published for the reason that no edition of the School Law decisions has been issued under the present administration. Since the Superintendent of Public Instruction is the final court of appeal on many questions, a complete edition containing all the opinions of the Superintendents of Public Instruction from the very beginning should be issued in order that not only school officers but attorneys who are their advisors may inform themselves in regard to the interpretation of the law as found in these decisions.

Just before the beginning of this administration, a school code containing only the statutes without the notes was published. There was a comparatively small number of copies ordered, for the reason that a code commission had been created, and it was expected that a special session of the Legislature would be called for a revision of the code, after which a new school code would be necessary. A special session of the Legislature was not called, and the Thirty-ninth General Assembly did not revise the code. We are still in the same condition of uncertainty as at the beginning of the administration. The supply of school codes has long been exhausted, and there is still some possibility that the code will be revised since the code commission has been continued. A supplement containing the laws and amendments passed by the Thirty-ninth General Assembly was published, but the law provides for the publication of all the school laws only every four years.

There is a very great need for a complete annotated school code, giving explanations and references to decisions so that the ordinary school officers may be able to intelligently understand the application of the law. In the beginning our school code was apparently well written and adequate to meet the conditions of a new state in organizing elementary schools. The school business has become more and more complicated, and in order to meet new conditions the statutes have been amended in so many different ways and places that it has not only destroyed the unity, but also has changed various sections in such a manner that provisions of law relating to the same subject matter are found in several different sections, making it difficult for even a skillful attorney to find all the law pertaining to a particular subject and rendering it impossible for the ordinary individual to find the provisions of law relating to many things.

The code commission has prepared a number of bills, and possibly in revising the code, the Legislature will make some improvement in our present school laws. But the code commission has not had an opportunity to give the time necessary to familiarize itself with the actual working conditions as they exist at the present time, and it is impossible to secure a revision of the school laws such as is necessary in making a revision of the code by the legislature.

The entire school code should be re-written. This need is indicated by the number of written opinions on legal questions furnished by the Department of Public Instruction. For the year ending June 30, 1921, the Department furnished in writing 1710 opinions which are indexed under 62 different heads, and in addition thereto there were 171 on miscellaneous legal questions. For the year ending June 30, 1922, there were 1,651, of which 213 are unclassified for the reason that they do not come under any regular head or point of law on which more than one opinion has been written, making a total of 275 separate heads.

Questions involving tuition call for the largest number of opinions, there being 191 for the year ending June 30, 1921, and 234 for the year ending June 30, 1922.

Following the financial depression, the activity in the organization of new school corporations has almost ceased, and the correspondence involving questions of this kind has become less but the operation of new districts give rise to new questions, and for the last year the legal correspondence in regard to the question of transportation has exceeded those in regard to organization of new districts.

The Thirty-ninth General Assembly revised the law for organization and dissolution of consolidated districts, and improved the law providing for the organization of districts by making it clearer on many points and entirely revised the law for dissolution, making it conform in procedure so far as possible to the law for organization.

When the State Legislature met in January, 1921, there were a number of districts that were unable to meet the running expenses on account of the advance in prices, together with the increase in attendance and the fact that the limit fixed by law would not permit the board to estimate a sufficient amount of money annually to meet the current expenses. Chapter 93 of the Acts of the Thirty-ninth General Assembly was enacted to meet this condition, making the levy made under this chapter payable the two years following. A number of districts had started buildings which they could not finish for lack of necessary funds, and in a few cases, schoolhouses had been destroyed in districts that were bonded to the limit. To meet this condition, the Thirty-ninth General Assembly enacted Chapter 335 which permitted the people to vote a schoolhouse tax for a period of ten years. These two laws permitted certain districts to proceed with their program but it necessarily increased the taxes at a time when the people could least afford it.

Section 2813 was amended, permitting the board to estimate not to exceed twenty-eight mills, in order to enable a school corporation to levy sufficient taxes during a period of twenty years to pay off the maximum amount of indebtedness which it may incur under the constitution. This section permits a board to estimate a portion of the principal annually, but many boards neglect to do this, and it becomes necessary when the bonds are due to issue refunding bonds; consequently, there are some school corporations which have issued the maximum amount of bonds permitted under the constitution, and which are not making adequate provision for their payment when due.

If a schoolhouse should be destroyed in one of these districts as has happened in one or two instances, the school corporation has no means of replacing the building and providing school privileges for a number

of children. It should be compulsory upon all such school boards to create a sinking fund which could not be used for any other purpose except for the payment of bonds, so that districts which have issued the maximum amount of bonds under the constitution will be compelled to pay for such schoolhouses as it constructs before they become unfit for use.

The public school is our greatest public business, and yet there is little or nothing expended for overhead or administration as compared with other branches of the government for which the greatest expenditure in many cases is for administration. There should be better means of instructing school officers, since they receive no pay and feel that it is an imposition to expect them to devote additional time and expense to informing themselves on matters which the state has neglected or refused to supply the necessary information.

The books of the larger school corporations should be audited under the direction of the state department, and school boards should be instructed in regard to their duties and responsibilities. In a number of instances, school architects have imposed upon school boards by selling them plans for school buildings which the school corporation did not have sufficient money to construct. This in a large measure was responsible for the law enacted by the Thirty-ninth General Assembly authorizing school boards to vote a school tax of ten mills for ten years in order to complete the school building. It would save the state many thousands, possibly millions of dollars, if the building operations of various school corporations were properly supervised by a competent person. In the building of a schoolhouse in many cases, the school board has never had experience in building, and will never have again; consequently, it is no wonder that they sometimes make great blunders.

In a few cases, there have been members of school boards who have refused to perform their duties, and in some cases the members of a board have been guilty of crimes which wholly unfit them for the office of school director. Our laws should be amended so that a member of a school board may be removed from office for cause, the same as any other officer.

We have mentioned a few things along the financial side because questions of this kind have caused the greatest trouble, and because some discussion of these points seems to be the best means of emphasizing the importance of a careful revision of the school laws in order that they may be uniform and understandable and intelligible to the average person who is called upon to act as school officer.

It would be impracticable to attempt at this time a discussion of the various points that need attention and revision to meet the modern needs. It is not the intention that any authority should be taken away from the local school but that there should be a better provision made for assisting local authorities and instructing them in regard to their duties and responsibilities.

All technical restrictions which only hinder the operation of the schools should be removed from the law, and provision should be made to enforce such necessary restrictions as are placed upon a school board so that

if the members are not willing to perform their duties as required by law, they may be either restrained or removed from office. Unless provision is made to do this, the law in many cases is of no value.

We are hereto attaching a summary of the various opinions written for the school year ending June 30, 1921, and the school year ending June 30, 1922, as shown by the index for those years.

#### CONSOLIDATED SCHOOLS.

#### George A. Brown

Consolidated School Inspector

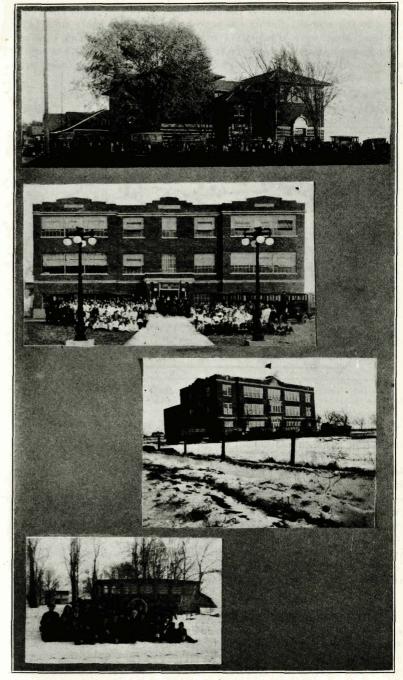

The marvelous growth and development of the consolidated school movement in Iowa in the two-year period ending July 1, 1921, has occasioned much comment from the press and the platform. Much of this comment has been inaccurate, and sometimes visionary. This bulletin is official and, it is hoped, an available source of reliable information for all interested in the continued growth of the movement.

There were 439 consolidated school districts January 1, 1922. All had elected school boards as provided by law, and 380 had centralized their schools and were transporting all pupils living in the country. The remaining 59 did not have sufficient housing facilities. Twenty-one of these will have new buildings completed by September, 1922. The status of the remainder is somewhat uncertain. A number of districts have been tied up in court action, while others have failed to secure favorable action.

The sudden fall in prices of farm products produced a reaction in many communities and the rapid development of the movement has been checked. However, the two-year period just ending added 200 new consolidated school districts.

Much work has been necessary in the way of counsel and advise with the new schools during the past year. The opposition, although a minority, was many times a bitter one, and the board of directors, unaccustomed to the new situation, hesitated until some one from the office of the State Superintendent of Public Instruction could come and instruct them as to their plan of procedure. With only one worker in the field, many boards could not be visited, and no doubt some districts will drift into dissolution as a result.

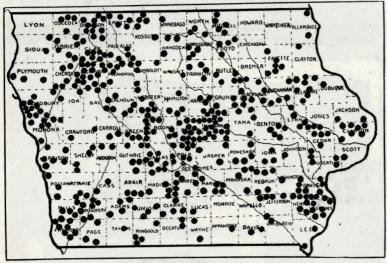

The pioneers in the consolidated school movement in Iowa planned wisely and the first law provided that no school district could be formed with less than sixteen government sections of land. Today this is not sufficient to accomplish the purpose originally intended, which was to put a four-year high school within reach of every boy and girl in the state of Iowa. Twenty-four sections is about the least area that can give a property valuation sufficient to keep taxes from becoming burdensome if a full high school course is to be maintained.

Newhall, Franklin Township (Cooper) and McCallsburg in the order named. Below, comfort in a storm.

The outstanding problem is the transportation of the pupils from their homes to the school. During the school year 1920-1921 more than 34,000 girls and boys were transported to school, while the grand total enrolled in consolidated schools of the state reached 60,000. Thus almost 30,000 children living in the smaller towns of the state have been benefited as well as the children of the farmer.

# GROWTH OF CONSOLIDATED SCHOOLS IN IOWA

Consolidation of schools is steadily spreading over Iowa. Each dot on the map represents an established consolidated school.

#### CONSOLIDATED SCHOOL FACTS.

Number of consolidated school districts authorized by vote up
to beptember 1, 1921
Number of consolidated schools maintained for school year 1920-21. 368
Number of pupils enrolled June, 1921
Number of pupils transported34,743
Number of pupils transported by motor busses 8,147
Number of motor busses used
Total cost of transportation\$ 1,641,008.20
Average cost of transportation per pupil
Cost of new buildings since January, 1920 10,000,000.00
Number of buildings built since January, 192093

Liberty Center, a rural consolidated school with all activities belonging to a school of this type.

61

# ESTABLISHMENT OF NORMAL TRAINING HIGH SCHOOLS. M. R. Fayram, Inspector

The Thirty-fourth General Assembly of this state enacted a law which established the Normal Training High School Department as a local institution for the purpose of training teachers for the rural schools and also awakening a more positive interest in rural life. A Department may be established in any High School in the state if there seems to be a local demand for it and the number of pupils enrolled in the high school justifies the expense of maintaining it.

A High School in which a Normal Training Department may be established must maintain an approved High School Course of Study so that the Normal Course will be given in the eleventh and twelfth grades and Manual Training, Home Economics, and Agriculture be offered in the High School, an enrollment of at least ten pupils in the department. proper physical conditions, teachers who have four years of collegiate preparation with some experience and special preparation in the subjects which they teach, a recitation period of not less than forty minutes, no class over thirty pupils and not over six classes daily per teacher.

The grade school must also have proper physical conditions and the grade teachers should have at least two years of special preparation above a four-year High School. Experience should also receive consideration.

How Designated. When the general professional spirit of the school is such that efficient school work is accomplished and the High School and Grade School meets the specific requirements as set forth in Circular No. 1, "Course of Study and Regulations for Iowa Normal Training High Schools," the Superintendent of Public Instruction may designate such a High School to maintain a Normal Training High School Department. Section 2634-b8, Code of Iowa.

High Schools Designated. The total number of schools maintaining the Normal Training High School Course at the close of the school year, June 30, 1922, was as follows:

City or Town Schools179	
Consolidated Schools 13	
Total192	

Schools Dropped. During the school year of 1921-22 three schools (Marathon, Mechanicsville, and Walker) were dropped from the list of designated Normal Training High Schools.

New Schools. The applications for Normal Training High School Departments in the High Schools at Sanborn and LaPorte were approved and designated as Normal Training High Schools beginning September 1, 1922, providing that at that time all the regulations and statutory requirements have been complied with.

Present List. A complete list of Normal Training High Schools for the school year of 1922-23 is attached to this report.

High School Credits. All Normal Training High School credits must be completed in a regularly designated Normal Training High School or in an approved High School.

Students of Other Approved High Schools. The regulations of the Normal Training High School Department provide that a student who has graduated from a regular approved four-year High School Course may enter a Normal Training High School and finish the Normal Course in one year. A person who has graduated from a two or three-year approved High School may enroll in a Normal Training High School and finish the course in two years.

Professional Requirements of the Course. Each student who graduated from the Normal Training High School Course is required to complete one semester in each of the following subjects: Rural Education, Psychology, School Management, and Methods in Teaching. Each school must have a plan by which the students will be able to do some observation and practice teaching in the local grade school as well as in an adjacent rural school.

Teachers' Certificates to Graduates. All graduates of the Normal Training High School Course who pass the state examination in the subjects required by the regulations are granted a Normal Training High School Certificate for a period of two years which may be renewed regularly every three years. This certificate entitles a person to teach in any school in this state.

Growth in Normal Training High School Departments. The Normal Training High School Course has met with favor with students who have manifested an interest in the profession of teaching. During the past two years the number of Normal Training High School Departments has increased from 191 to 192, the enrollment in these schools from 4,200 to 4,880 pupils, the average of each school from 23 to 25 pupils and the number of teachers' certificates granted from 4,557 to 6,028.

Distribution. The Normal Training High School Departments are distributed among the counties as follows:

Counties having no Normal Training High Schools (	Black Hawk)* 1
Counties having one Normal Training High School	29
Counties having two Normal Training High Schools	
Counties having three Normal Training High Schools	3
Counties having four Normal Training High Schools.	4
The state of the s	Task Jacobs 1
Total	

\*Blackhawk County has one Normal Training High School for the school year of 1922-23 at La Porte. Each county now has at least one Normal Training High School.

#### CERTIFICATES ISSUED .

School Year	Original N. T. H. S. Certificates	Certificates renewed	Total Certificates
1920–1921 1921–1922	1,332 1,822	1,349 1,525	2,681 3,347
Total for biennial period.	3,154	2,874	6,028

This shows that during the biennial period closing June 30, 1922, that 3,154 original Normal Training High School Certificates have been issued and 2,874 Normal Training High School Certificates have been renewed. The total number of certificates then issued by the Normal Training High School Department for the biennial period is 6,028.

State Aid. State aid of \$750.00 is granted to each city or town school which maintains the Normal Training High School Course. Each Consolidated School which maintains the Normal Training High School Course receives its portion of the funds available for "Consolidated Schools." Private schools may have the Course if they comply with the rules and regulations for a Normal Training High School Department, but they are not entitled to State Aid. The State Aid of \$750.00 per year is not intended to pay the complete expense of maintaining the course but to encourage the local High School to offer a course which will prepare better rural teachers. The course is such that many High School students who could not attend college have been able to enter the profession of teaching.

Disbursement of Aid. During the biennial period disbursement of the \$150,000.00, the annual appropriation for State Aid to Normal Training High Schools, has taken place as follows:

School year, 1920-21, first semester,  178 schools at \$375.00, State Aid\$ 66,750  1 school did not qualify for State Aid.  13 schools received Consolidated State Aid.	.00
School year, 1920-21, second semester, 178 schools at \$375.00, State Aid	
Total State Aid\$133,500	.00
Expense salary 2,400	.00
Traveling Expenses	.17

Total\$137,520	.01

### APPROVED GRADED AND HIGH SCHOOLS. F. A. Welch, Inspector

Recognizing the right of every boy and girl in Iowa to secure, at public expense, a high school education, the Thirty-fourth General Assembly,

in 1913, passed a measure requiring that every school district which does not provide a high school shall pay tuition of its pupils who are prepared for high school work, if they choose to attend a high school in some other district in the state where an approved high school is provided. The present limit of tuition charge under this law is twelve dollars per pupil for each school month. This law brought about the very desirable standardization and supervision of the school, in both grades and high school. The Supervision is by direction of the Department of Public Instruction.

Classification. The term, Graded and High Schools, of course, includes all public schools of the state with graded elementary work and with one or more years of high school work. This includes such schools as are approved and those not yet standardized and approved by the state. It does not include rural schools, except those that are consolidated. Schools may be approved for one year, two years, three or four years of high school work. Standards, of course, vary according to number of years of approval. Approval of a school does four definite things for the school:

- 1. It permits the school legally to collect tuition to a certain maximum amount, from other districts sending pupils to its high school.
- 2. It prevents other districts collecting from this district tuition for pupils resident in this district, for the years of high school work approved.
- 3. It standardizes the school, and thus is a distinct benefit to the pupils of the district moving to another district to complete their high school work, and to high school pupils moving from another district to the community to complete their high school work.
- 4. It secures recognition from higher institutions of learning, so that graduates of four-year approved high schools may enter college and have all secondary credits accepted without examination.
- 5. It increases local interest and pride in the school and induces more pupils to complete the high school course.
- 6. It brings the school into direct contact with the Department of Public Instruction and under direct supervision and aid of the inspectors of the Department.
- 7. It has been found that most graded schools offering some high school work are anxious to be placed on the approved list, and every year a number of schools attain the standard for approval and receive a certificate of approval from the State Department.

## PRESENT STATUS OF ALL SCHOOLS. Correct to June 30, 1922.

### DUTIES OF AN INSPECTOR.

For the inspection of the above schools, three inspectors are provided. The schools are classified as follows:

Normal Training High Schools, at present 192 in number.

Consolidated schools, at present 350 in number.

Other Approved schools, at present 326 in number.

Of these schools 13 are both consolidated and normal training, leaving a total of 800 approved schools of all classes. One inspector is assigned to each class of schools. One of the chief duties of an inspector is to visit the school, check up equipment, examine the course of study and records, visit classroom work of the teachers, confer with the superintendent and teachers and often meet in conference with the board of education. It is sometimes found that a school has more teachers than it really needs for the work of the school, and a reorganization is advised, to assist the school financially. It is not the purpose of the inspector either to encourage the district in attempting to maintain a school beyond its means or to penalize it for its limitations. His purpose is rather to assist the district in maintaining the best type of school justified by local conditions. Some districts, because of the small number of students eligible for high school, are advised not to maintain a four-year high school, but to maintain a two-year high school, and then, as a district, send the students to another high school to complete the work. An itemized written report with recommendations for the school is then sent to the superintendent, the board of education and the county superintendent. At the beginning of each school year blank cards are sent to each school for a complete annual report on all items. These

reports are later carefully examined by the inspector and a check sheet with recommendations sent to each school.

Besides these duties the inspector must provide standards, prepare courses of study, issue bulletins and manuals, answer correspondence and have individual conferences with superintendents, county superintendents and members of boards of education. He is often called upon to attend community meetings and address meetings in the state, and occasionally attends national meetings outside the state. He sometimes, by invitation of the county superintendent, holds a round table conference with superintendents and principals, and occasionally gives an address before the whole body of teachers assembled at county institutes.

### WHAT SUPERVISION DOES FOR THE SCHOOLS.

Supervision by the inspector is of value in various ways. First of all, it creates a standard of efficiency for all schools. It also standardizes the schools of the state and qualifies graduating students for entering high institutions of learning, thus encouraging completion of high school work and also encouraging higher education. It induces more schools to reach a good standard, and results in many districts without high schools establishing such. Many new modern buildings are erected as a consequence of this oversight, and other buildings are improved or remodeled. Better equipment is also provided.

At all times the superintendent, teachers and school officers seem to be glad of a visit by the inspector, responsive to his suggestions and anxious to provide anything necessary for the school, as far as the financial limitations of the district will permit.

In a previous paragraph it has been noted that the inspectors are responsible for the supervision of eight hundred sixty approved schools, the Normal Training Department having at present one hundred ninetytwo approved schools, the Consolidated Department three hundred fiftythree approved schools and the Department of "Other Approved Schools" three hundred twenty-seven approved schools. This is in addition to nearly two hundred grade schools not yet approved, which require care. When visiting schools for inspection purposes, an inspector cannot see more than two schools per day, and often not more than one per day. On the average not more than eight schools per week can be visited. or two hundred eighty-eight schools per year if the inspector could devote all the thirty-six school weeks to inspection. As approximately half of an inspector's time must be devoted to checking reports, preparing literature, answering correspondence and doing other forms of office work, it will be seen that on the average schools cannot be visited more than once in two and one-half years. This does not render the close supervision that is needed, and the inspectors cannot keep in as close touch with the work as they desire. The county superintendents cooperate well, but the various duties of their offices render them too busy to assist, to any extent, in the inspectors' work.

### THE MINING CAMP SCHOOLS.

Harry D. Kies, Inspector Mining Camp Schools.

The Thirty-eighth General Assembly of Iowa appropriated \$50,000 to be used by the Department of Public Instruction to improve the existing conditions in the Mining Camp Schools. The Thirty-ninth General Assembly doubled the appropriation for the next biennium. In August, 1921, the Executive Council, upon the recommendation of State Superintendent, P. E. McClenahan, appointed Harry D. Kies an inspector of the Mining Camp Schools.

A complete survey has been made and the Department of Public Instruction is now working on the following program:

1st. To establish a school in every camp.

2nd. To encourage better qualified and more experienced teachers to enter the Mining Camp Schools.

3rd. To improve the buildings, equipment, attendance and the instruction.

4th. To create a better school atmosphere and to make the schools a community center.

5th. To equalize taxes in the Mining Camps with the surrounding districts.

Conditions in the camps are not ideal, due chiefly to the short life of the mines which is from 5 to 25 years. The 3 to 5-room houses which are the homes of the miners are cheaply constructed, without a good foundation, cellar or any of the modern conveniences.

The camps vary in population from 100 to 3,500. Many of the camps are without churches, public meeting places, trees, water system—everything to encourage camp or civic pride.

In these camps are to be found representatives of nearly every nationality, especially of Central and Southern Europe. It is not an uncommon thing to find from 10 to 15 different nationalities in one camp. Neither is it uncommon to find all of them of one nationality such as, Italians, Clarkdale; Austrians, Zookspur; etc.

In many of the camps, in order to maintain a school, the district has taxed itself far beyond the surrounding districts, thus making the burden of taxation unequal, ranging from a few mills to 322 mills (Mystic), for 1922. Had it not been for state aid many of these mining camp schools would have had to close, shorten the term or greatly lower the standard of the work which ought to be done. The best investment the state can make is to see that these children are given a square deal in education; that good schools are maintained where the principles of Americanism may be taught to these foreign-born children, and that these schools may become the community center from which will radiate the true spirit of patriotism.

#### VOCATIONAL EDUCATION.

State Board for Vocational Education: P. E. McClenahan, Superintendent of Public Instruction, Chairman; D. D. Murphy, President State Board of Education; A. L. Urick, State Labor Commissioner; J. J. McConnell, Director of Vocational Education.

There are three distinct branches of work in which vocational education is provided by the cooperation of the Federal Government and the State of Iowa. These are Agriculture, Trades and Industries, and Home Making, in all their various phases. In addition to these subjects, the State Board for Vocational Education has been given jurisdiction over the work that has been organized under the Act of Congress of June 2, 1920, known as an Act for the Rehabilitation of Persons injured in industry, so far as this act relates to Iowa.

In Agriculture, Trades and Industries, and Home Making, provision is made by which children fourteen years of age or older may secure a part of their education in the subjects of this group, for which the pupil, in each instance, may be adapted, fitting him or her for effective service to society and for a successful life among his fellowmen.

Under this arrangement part time instruction is possible for persons not able to attend school excepting for a limited portion of the year and this is adjusted to the needs of the individual of any age above fourteen. For workers of either sex between fourteen and sixteen under provisions of the child labor law there is now a legal requirement in this state of eight hours per week attendance on continuation or part time schools, which are required to be established in districts having fifteen or more of such persons.

Evening classes which afford means of improving individuals in the occupations in which they are engaged are also a part of the vocational education work.

In short there are three distinct occupations with all their subdivisions in which pupils who attend school all the year or persons who can go but a short time each year, as well as those so closely engaged that they can give only evenings to continuation of their education may each have instruction.

Teacher training for all of these kinds of teaching is required by the federal law if money from that source is to be used for payment of the teachers employed.

The federal money available in Iowa for the coming biennium for the payment of vocational teachers' salaries and for the training of such teachers is in the following amounts:

1922-1923	 103,315.00
1923-1924	 14,811.99

This sum may be used if met by an equal amount, within the state, making a total for the two years named of \$436,253.98 for vocational teachers' salaries and the training of vocational teachers.

In the plan for rehabilitation above referred to the allotment from the Federal Government for Iowa for the ensuing biennium amounts to \$22,836 for 1922-1923 and \$22,836 for 1923-1924.

This, when met by funds within the state of an equal amount, will give for rehabilitation service in Iowa for the biennium \$91,344.

68

The idea underlying this movement is that it is worth while to provide for the restoration of persons disabled in industry or otherwise to positions of comfort in society and to positions in industry fitting them for productive employment and preventing them from being forced into the group of incompetent and entirely dependent people.

## AGRICULTURAL VOCATIONAL EDUCATION.

Louis Wermelskirchen, Supervisor.

During the school year of 1921-22 there were fifty-seven classes in vocational agriculture in forty-three high schools of the state of Iowa. This work is in general conducted on a two-year plan. There were, however, three schools in the state that conducted one class each in a third year's work.

The first year is usually devoted to the study of crop production, and the second year to Animal Husbandry studies. Directed or Supervised Practice work is required of all pupils taking the work in Agriculture. This practice work is done largely during the growing season on the farms, and for that reason the agricultural instructor must be employed for a twelve-month period.

The instructors are called together annually for a week of instruction and self-improvement, the object of this conference being to improve the instructors in methods of instruction, in the conduct of supervised practice work, and in the community work which they do.

The course in agriculture covers work that is of less than college grade. The object is to help the pupil to obtain practical information which he can use as he takes up the operation of farming after the completion of his course in the High School.

The students who take these courses rank high in the annual State High School judging contest at Ames, Iowa, and in the competitive judging at the Iowa State Fair. Full credit for the work done in High School is given toward graduation, and later toward college entrance.

The schools carrying the work in vocational agriculture are reimbursed for a proportionate amount of time that the instructor spends upon the class in agriculture.

In addition to the work in the high schools, we have the Part Time dull season classes in agriculture. These dull season classes may be conducted (1) along with a regularly organized high school class in agriculture, or (2) organized into a special class by the County Organizer.

The pupils taking this type of Part Time work do not, as a rule, get school credit for the work done, because of the fact that they cannot get away from their farm work for a long period of time that would justify the giving of school credit. The course is given for its informational value and practical help. The pupils taking the work in the Dull Season classes must carry on the Directed Practice work just the same as those taking the work in the High School.

## EXAMPLE OF FIRST TYPE OF DULL SEASON CLASSES.

During the winter of 1920-21 the High School at Lamont conducted a Dull Season class for a period of six weeks. The pupils enrolled took work in crop production, Animal Husbandry and Farm Shop in a sep-

arate class from that of the regular class, in Agriculture. The amount of work done in this short period of time was not very great, but by giving a condensed course in each of the three lines, much good was accomplished.

In the last fiscal year, the school at Huxley allowed eight pupils to enter the regular High School class in agriculture. These boys attended for a period of twelve weeks and received some school credit for the work done. In addition to the agriculture they took other school studies which were a help to them.

#### SECOND TYPE OF DULL SEASON CLASSES.

The County Organizer, working with the County Superintendent of Schools, and local school board, may organize Dull Season classes in agriculture for a period of ten days or more. Assistant teachers are supplied for the period that the class is in operation. The Organizer teaches one class and later carries on the Directed Practice work with all the boys enrolled after the winter class work is over.

## TRADE AND INDUSTRIAL VOCATIONAL EDUCATION. Harvey L. Freeland, Supervisor Trade and Industrial Education.

DAY UNIT TRADE CLASSES.

For the boy who, because of economic necessity or other causes, does not intend to continue his education beyond high school, several of our cities have established day trade classes. In such classes the student spends one-half of his time in learning the technique of shop practice and the remainder of his time is divided between the humanities and science, mathematics, drawing and hygiene related to the trade. Such classes have been conducted in Ames, Burlington, Cedar Rapids, Des Moines and Newton. In these classes pupils are given instruction in the following trades: Auto-mechanics, drafting, machinist, printing, wood and metal pattern making, sheet metal cabinet making and mill work.

### PART TIME TRADE EXTENSION CLASSES.

Trade extension dull season classes have been conducted for men in the painting, paper-hanging and decorating trades at Marshalltown, Ottumwa, Sioux City, Fort Dodge and Des Moines. The Northwestern Railroad has released its blacksmith, machinist, boiler-maker, electrician and car repair apprentices, with pay to go to the public schools at the division points in Iowa for specialized instruction in the science, mathematics, drawing, and blue print reading relating to their trades. In these schools the classes have been doing some notable work.

### PART TIME CONTINUATION CLASSES.

Sixteen cities named below come within the scope of the compulsory continuation school law and provided classes, giving eight hours a week of instruction to employed boys and girls. These classes have enrolled as high as 2,200 pupils.

Burlington Cedar Rapids Clinton Council Bluffs Davenport Des Moines

Dubuque Waterloo (East) Waterloo (West) Ft. Dodge Ft. Madison Sioux City Keokuk Mason City Marshalltown Muscatine Ottumwa 70

### EVENING CLASSES.

Evening classes for workmen desiring to improve in their respective trades have been conducted in a number of cities. Among these have been the following:

Science for plumbers, electricians, auto-mechanics, painters and decorators; drawing for sheet metal workers, carpenters, machinists, mill workers, and advertisers; shop work for machinists, auto repair men, pattern-makers, carpenters; shop mathematics or estimating for carpenters and lumbermen, building laws for plumbers, mine ventilation, mine timbering and hoisting engineering for miners; foremanship classes for foremen in the packing, railroad, printing, wood working, knitting and machine industries of Boone, Newton, Des Moines, Marshalltown, Missouri Valley, Sioux City; courses in chemistry and dietetics were given to nurses in training at Des Moines and Sioux City.

### VOCATIONAL HOME MAKING.

Fern Stover, State Supervisor, Home Making Education.

Under the State Board for Vocational Education Home Making courses are given in the following schools:

Ft. Dodge Garden Grove Moulton Bloomfield Newton New Hartford Bondurant Hudson Burlington Radcliffe Cedar Rapids Lamoni Liberty Center Sioux City Colfax Des Moines Tama Lorimor Toledo DeSoto Mapleton West Branch McCallsburg Dubuque West Liberty Missouri Valley Emmetsburg

There are three types of classes in which Home Making is taught in the public schools.

- 1. Day School Classes
- 2. Part Time Classes
- 3. Evening Classes

### A. Day School Classes.

The law requires pupils to be at least fourteen years old in order that the best results may be had. The work is carried on through the regular school work for one or more years, as may suit the desire of pupil and parents. Girls belonging to the class are taught in a segregated group so that interest may be deepened and the instruction made effective by having a unified purpose in the work.

The day school departments of home making offer a program for half day of vocational subjects which may be made up, either entirely of home making subjects or of home making and related subjects. The remaining half day is devoted to non-vocational subjects. These vocational courses are part of the regular High School curriculum and are accredited for High School graduation.

The minimum equipment should include one laboratory with sufficient and suitable equipment for instruction and practice in food study and cookery, including the serving of meals; one laboratory for instruction and practice in dressmaking, textiles and a study of clothing; equipment for instruction in laundry work, in housewifery, in home nursing and the care of children.

All instruction in housekeeping operations conducted in the schools should be supplemented by special projects, outlined to provide home experience for the pupil. Consciousness of the home making processes, with the mother as a trained home demonstrator is a very essential element in the home making education of any girl.

B. Part Time Classes.

These classes are open to girls or women over fourteen years of age, without an upper age limit. They are organized to give instruction during the hour of usual employment either as housekeepers, house daughters, or in some wake earning occupation. Instruction is adapted to the course of study and the age, maturity, and experience of the students. The length of the school term by state law for pupils between fourteen and sixteen years of age is now eight hours per week for the school year, or for persons not subject to the state law, not less than 144 hours. A great deal of work is done, among foreign women, to assist them in marketing, cookery, managing and in providing clothing and proper home surroundings for their own families.

C. Evening Classes.

Evening school classes in Home Making offer instruction to women, over sixteen years of age, after their regular hours of employment, or at the time of day it is most convenient for them to leave their regular work. The course of study is adapted to local conditions and the special needs of the class members. The work is given in a series of short unit courses.

During the last two years 2,928 girls and women in the state were enrolled in these three types of home making classes.

#### REHABILITATION SERVICE.

W. W. Grant, Supervisor, Industrial Rehabilitation.

Pursuant to the provisions of Chapter 14 of the laws of the Thirtyninth General Assembly, the Board for Vocational Education began active operation of the Rehabilitation Service for disabled persons by employing an agent known as Supervisor of Rehabilitation. He began his duties June 1, 1921, and it becomes the duty of the Board to render a report to the Governor in conformity with Section 4 of the act. Since a biennium has not elapsed it is assumed that a report will be acceptable which covers the period from June 1, 1921 to October 31, 1922.

A financial and statistical report is appended. It is well that this report should also contain a statement of the policies and methods of administration of this service in order that the public generally may see its benefits to society.

The purpose of the law is two-fold. First, to conserve for society the remaining possible contributions which citizens might make who have lost, through disease or accident, some of their physical powers. Second, to prevent such persons from becoming a burden to society because of lack of adjustment of their impaired powers to the conditions of employment and self support as they find them. An obvious result of its working, which might be an implied purpose, is that in restoring him to self support the state has lifted the individual and his family from despondency and indifference to a life of cheerful usefulness.

This act is the direct result of the federal act of June, 1920, known as the Industrial Rehabilitation act. By its provisions a federal allotment is made available for the use of the state administration, provided the federal funds are matched dollar for dollar by funds raised within the state and the joint fund used according to the regulations of the federal law. With these safeguards the joint fund is administered by the proper state officials. The federal allotment for the fiscal year 1921-22 was \$22,836.05 and the state appropriation to match it was \$22,836.45. The same amounts are available for 1922-23. While the problem is old. its solution is difficult and must be undertaken with care, lest abuses and inefficiency cause the defeat of the entire program. Therefore, on June 30, 1922, \$18,372.37 was returned to the State Treasury, and \$18,434.97 of the federal funds was unused because it was not needed in the present state of development. However, the work is progressing rapidly and with over 300 prospective cases on file the advantages of the service can be extended to many more.

The total number of those who are disabled or in other words, the size of the problem cannot be readily determined. Various estimates have been made. A very carefully worked out estimate places the total number in the United States who were made permanently disabled as a result of industrial and public accidents at 180,000 for the year 1919-20. Placing Iowa's portion at 2 per cent would give us 3,600 annual accidents producing permanent disablements. The law includes persons disabled as the result of disease or the natural deformities. It is not possible to estimate the annual number of these coming to maturity or becoming well enough to take up life's responsibilities. There is every evidence that there are thousands in need of the service. The number that may be found and assisted to independence will be determined by the efficiency of the service. Many factors unite to fix the number benefited.

To be effective, each person must be given individual attention. Those who most need this service generally cannot be reached by correspondence. A letter is a cold, bare statement at best and these people need inspiration and personal contact. More than that, they frequently do not know their own needs or their own possibilities. This means many time-consuming visits by someone who is trained to guide them properly. Having determined a plan, the adjustment to the future job which they have been unable to make must be made for them. No two cases are alike and no class training or group treatment is possible. Local arrangements require the soliciting of aid and cooperation of many different individuals and organizations. Cooperation cannot be purchased, it must be won. It takes time to win the confidence of the socially minded people of the state. They must be led to believe that this new enterprise of the state is valuable to the community and carefully and sanely managed. It is essential to the future of the service that it be well founded and that it proceed slowly enough to avoid serious mistakes.

In this connection it is fortunate that while in a way it is a pioneer movement, Iowa has joined hands with the Federal Government and 32 of her sister states in this humanitarian effort. By the active as-

sistance of the Federal Board the experiences of the states are combined. The exchange of information is bringing to each a knowledge of the problem that would take a single state many years to discover. The national grant was the cause of the adoption by so many states of this program, but the states are becoming more and more alive to its possibilities for usefulness. Rehabilitation is a humane measure, but it is far more than that, for once it is established every dollar the state spends in rehabilitating a man will be returned many fold in his years of usefulness to society.

The State Rehabilitation Service must not be confused with the care given disabled veterans of the late war. Neither must it be considered a poor relief measure. While it will serve to reduce the number of blind and crippled beggars on the street, most of these mendicants are not likely to take their place in the industrial world. They have lost their self reliance and sense of shame and frequently talk of their "right to earn a living" this way. To most of them the sympathetic public is contributing far more than they could earn at any legitimate occupation. The field of rehabilitation lies with the greater number who are making the struggle, pitifully at times, to maintain their self respect and independence. The state must aid them tactfully and with due regard to the danger of their becoming pauperized. Dependency and pauperism may be prevented but it rests with an enlightened public to clear the streets of beggars.

Section 2 of the Federal act describes rehabilitation as follows:

"That for the purpose of this act the term 'persons disabled' shall be construed to mean any person who, by reason of a physical defect or infirmity, whether congenital or acquired by accident, injury or disease, is, or may be expected to be, totally or partially incapacitated for remunerative occupation; the term 'rehabilitation' shall be construed to mean the rendering of a person disabled fit to engage in a remunerative occupation."

### WHAT IS REHABILITATION?

The last clause of Section 2 indicates the character of the service. It is a specialized personal service which may take one of several forms all leading to the establishment of the individual in a vocation. It may be:

- 1. Service leading to physical reconstruction.
- 2. Service leading to supplying artificial appliances.
- 3. Service assisting the person to suitable employment.
- 4. Service providing training for a vocation suited to the person's ability. Every effort will be made to keep the service on the basis of friendly helpful interest in the individual.

### LAWS PROVIDE FOR HOSPITAL TREATMENT.

Not all of the items listed above may be provided at the expense of rehabilitation funds. The first concern in a rehabilitation program for an individual should be to see that his bodily functions are restored as fully as possible. Iowa has provided for this in the Perkins and Haskell-Klaus laws supplemented by private, medical and hospital facilities. Rehabilitation funds cannot be used for medical or hospital expenses. But our representatives frequently can aid in securing the needed attention.

### ARTIFICIAL APPLIANCES.

In some special cases an artificial leg or arm can'be supplied but only where it can be shown that it is a definite part of the rehabilitation program. The artificial appliance must be essential to enable the disabled person to carry on effectively in a particular occupation.

### TRAINING FOR A VOCATION.

Training can be provided either in school or by individual instruction. No general education is offered, but instruction which will help the afficted person to definite employment. We are not going to start a special school or train these people in any one trade. No two persons are alike. Each case will be handled by itself and a plan worked out after carefully considering the person's ability and ambition. The type and scope of training must depend upon a careful consideration of the disabled person's ambition, previous experience and training, limited by feasibility of training, and the chances of success in the proposed vocation.

### MAINTENANCE.

The money provided from federal and state funds cannot be used for living expenses even while the person is taking training. Other agencies may assist with maintenance where it is necessary, but many times the person can provide his own living or will be assisted by friends or relatives. By law, private gifts may be placed in the state treasury, subject to consistent conditions which would make up this deficiency in worthy cases. But much can be accomplished by the proper cooperation with existing charitable organizations. Agencies now aiding in the support of disabled persons will readily see the advantages of aiding them to independence. Many times the greatest gain will be in preventing future dependence.

### INDUSTRIAL ACCIDENTS.

Persons entitled to the benefits of the Workmen's Compensation Act are also entitled to Rehabilitation Service. Frequently the weekly compensation which an injured employee receives will support him while he is being trained for a new job because he can no longer follow his former occupation. The amount of compensation being fixed according to the physical impairment sustained, there is no danger of the total compensation being reduced because the injured one strives to overcome his handicap and increases his earning power. Thus the two types of service work hand in hand to reduce the burden of industrial accidents.

.This report would not be complete without a brief statement of the development of the work. The Board for Vocational Education, according to statute, Section 4, Chapter 14, Acts of the Thirty-ninth General Assembly, took over the responsibility of administrating the act when it became effective in March 1921. Little was done, however, until June 1, when a Supervisor of Rehabilitation, Willis W. Grant, was employed. The Director of the Board, Mr. W. H. Bender, in addition to his duties in the administration of vocational education, took an active part in the inauguration of the program and devoted considerable time to discussing and promoting the details.

On January 1, 1922, Mr. P. E. McClenahan, ex-officio Administrative Officer of the Board, took over the active administration of the Board's affairs looking to the Supervisors to work out the details. As the needs of the service rapidly developed an Assistant Supervisor was employed. Mrs. Grace Salisbury began her duties June 28, 1922.

It was recognized at the outset that a service of this nature must depend on the cooperation of all the agencies, public and private, whose activities touched on this problem. As required by law, an official agreement approved by the Governor was drawn up and signed by the Chairman of the Board for Vocational Education, the Commissioner of Labor and the Industrial Commissioner. The supervisor got in touch with the School for the Blind at Vinton and the School for the Deaf at Council Bluffs, the two state institutions for the training of children suffering from special classes of disabilities. Public school officials throughout the state have been visited and express their willingness to cooperate. Organized Welfare Bureaus in the larger cities have been active in their assistance as have been the public nurses and in some cases the Red Cross organizations.

The logical development has followed four general lines:

- 1. The rehabilitation of victims of industrial accidents as reported by the Industrial Commissioner.
- 2. The adjustment to the commercial world of those victims of disease and congenital defects who have been physically restored as far as possible at the State University Hospital and under the Perkins and Haskell-Klaus laws.
- 3. The cooperative care and training of the cases reported by the various organized agencies for poor relief.
- 4. Those persons who make their own application or are reported by interested friends.

Strange as it may seem there is not any great number of self applicants. The history of this and other states indicates that for the most part disabled persons must be found and induced to make the necessary effort for self improvement. The number of those coming to our attention is rapidly getting beyond our facilities for their investigation and care. This part cannot be delegated for it taxes the ingenuity and skill of a person experienced in this work in almost every case handled. The most difficult cases are generally those whose need is the greatest. It is evident that this state will soon have to follow the lead of our neighbor states and add a number of field workers to the staff with the necessary increased office force to handle the volume of business entailed.

### SOME EXAMPLES OF REHABILITATED CASES.

Most persons feel that a blind person is hopelessly handicapped. It is true their field is limited, but largely by the prejudice of the public. An otherwise able bodied man has many possibilities but few opportunities. It is easier for them to be employed at home, and rug weaving is a very good kind of occupation for them where it is not overdone. We have several blind weavers started.

One of the most encouraging cases is that of a blind woman. We first came in contact with her in October 1921. The family finances were

limited because the husband, who also has defective eyesight, is a common laborer and frequently is out of work. Through a local organization arrangements were made to purchase a loom which she was to buy on the installment plan. A blind woman was employed to teach her weaving and sufficient supplies purchased to get started. She is now an expert and rapid weaver and has all the work she can do. Her work brings in about \$4.00 per day, most of which is profit.

The most hopeful and interesting outcome of this case developed when she called us in to consider the case of her husband's father who is blind and deaf. He is seventy years old and would not ordinarily be considered a good prospect, but we found his blind daughter had married a man who is seriously handicapped as a result of infantile paralysis. The son-in-law had been selling pencils on the street. The father-in-law had proposed to take the daughter and her crippled husband to his home in a neighboring town and they would all do weaving. Due to the example and influence of the first blind woman this family became interested to do something for themselves. We employed her to train them and last reports indicate that both have learned to make excellent rugs and are getting nicely started.

Another blind man whose home is in a different part of the state has made very good progress in rug weaving. He was blinded in an accident in 1918. Formerly he had been a carpenter and his family had a good social standing. The usual history of such cases was repeated. First a desperate and expensive effort to regain his eyesight, then the wife took up the burden of family support. Although the Vinton School for the Blind cannot take in a large number of adults, he was admitted because of his high moral and social standing. After training there in several hand crafts he made application to this department for assistance in getting started in a home occupation. His home is in Sioux City and by cooperation with the Welfare Bureau of that city the details were worked out for him to be supplied with a weaving loom and materials for getting started. The results are very satisfactory. The cooperation of the Welfare Bureau has been most valuable. Recently they arranged for him to put on a working exhibit at the Interstate Fair. The report of this is best given in an extract from a letter from Mary Stanton, family visitor. "Mr. D. was a great attraction and there were always large crowds standing three or four deep around him. I have confidence that the effects will be far reaching. Mr. D. sold many of his rugs which were on display and took orders for many more."

The problem of the blind is only a part of our responsibility. There are many young men and women who have a fair general education and a very definite ambition to prepare themselves for office positions in keeping with their intelligence. A rather serious physical handicap becomes negligible in intellectual pursuits. A case typical of this class has recently been placed. Mr. S. first came to our attention after he had entered the Cedar Rapids Business College. He was unable to pay his tuition and was working in a restaurant for his board. The rehabilitation fund paid for his tuition and supplies and he continued working for his living expenses with some help from home. His school

progress was very satisfactory and we have just received word that he has graduated and accepted a position with a very good future at an initial salary of \$100 per month.

Quite a different kind of service is being rendered to one of our many cases of coal miners who meet with disabling accidents. This man lost the lower part of his left leg. His case was reported by County School Superintendent Roberts. He had left school at an early age and had worked in the mines all his life. Dr. Gutch of the Albia Miners' Hospital suggested that if he were supplied with an artificial leg there was every reason to believe he could return to coal mine work. The appliance was furnished from rehabilitation funds and we have learned that he is now re-employed at a better job than he had before.

The record of cases might be extended, but these will illustrate some of the problems and how they are met. As stated before each case has its own difficulties which require the most careful and painstaking effort. The greatest difficulty in one case will be to work out a logical plan of rehabilitation. In the next case the job objective is obvious but the training facilities are lacking. Again the training can be easily provided but there is no one to furnish the living expenses which under the present law cannot be supplied from our fund.

Every day brings new problems but fortunately the service is becoming better understood. We are winning the confidence of broad minded persons and confidence will secure much needed cooperation in every community in our state.

### STATE TEACHERS' PLACEMENT BUREAU.

### J. J. McConnell, Director.

The present director of this bureau has had charge of this work only since April 1, 1922. His first-hand knowledge of the operation of the bureau is therefore limited to what has been done during that period. Whatever else appears in this report is gleaned from the records of the work prior to his entrance upon the work of the bureau.

The first thing which the director wishes to say is a word of appreciation of the fine work of Dr. Longwell in organizing this service. He created an organization which although simple is sufficiently comprehensive to enable those in charge of the work to collect and give out information about teachers and school boards with reasonable promptness and accuracy, making it possible to bring teachers and boards into communication without too much delay, and making it possible also for teaching contracts to be readily consummated. The plan is fundamentally good and no occasion has arisen which seemed to require fundamental changes of plan. Changes should be in the direction of amendment and enlargement particularly of certain features, as will be indicated later in the report.

The following are the essential points of the law under which the bureau is conducted:

"Any person having a certificate to teach in this state and who is deemed by this department to be a suitable person for teaching, shall, on written application be entitled to enroll with the Superintendent of Public Instruction under such regulations as he may prescribe.

"Upon request he shall furnish information to boards of education, superintendents, principals, and other proper authorities of public schools, desiring to employ teachers, and under such regulations as he may prescribe, furnish teachers enrolled with the information relative to vacancies in public schools but no person connected with the office of the Superintendent of Public Instruction shall be held responsible or be understood to vouch for the fitness or success of any teachers who may secure a position through the agencies herein provided.

"There is hereby appropriated from any funds in the state treasury not otherwise appropriated, the sum of two thousand five hundred dollars (\$2,500.00) annually, for the purpose of carrying out the provisions of this act."

The director deems it proper in this report to make some suggestions not as to changes of plan but for the extension and improvement of the work of the bureau.

The work of the bureau should be given broader publicity. If this free service is to be offered to school boards and teachers, printed matter should be widely distributed among boards and teachers, by which they should all be informed of the privilege offered and of the methods of procedure.

The connection between the membership and the bureau should be vitalized and quickened. This result could be brought about by enlarging the correspondence between the bureau and its members. One of the obligations of membership should be the making of periodical reports to the end that those in charge of the bureau might know what the members are doing and what are their desires as to further service. The doing of this would require an enlarged clerical force, but the results would more than justify the increased expenditure. The office should have in its files as complete information as possible about the place of a teacher's employment and the kind of work which he is doing. This kind of information should come from the teacher and also from the board, and should relate to all matters affecting the professional standing of the teacher.

The bureau should also place itself in a position to gather more information about the former work of teachers than is now possible.

Each member is now expected to furnish a number of references as to success in former positions. The bureau should by correspondence and in other ways secure from the references given by the teachers and from other available sources, as complete information as possible about the teacher's former work, as well as about her education and character, so that prospective employers might easily ascertain the kind of information about the teachers which they are entitled to receive in view of the relations about to be assumed. Boards and superintendents should

always feel that the bureau is a reliable source of information in all important respects. The bureau through an arrangement made with Boards of Education and with school superintendents should receive frequent reports, concerning the work of teachers employed upon the nominations of the bureau.

The doing of the things herein suggested would make of the bureau an agency which would be trusted more and more by boards of education, and would become a source of reliable information in all professional matters. This would make the bureau more than a clearing house. It would make it a public advisory agency such as does not now exist. Just in the proportion that the organization would attract the interest of teachers and school boards, its membership would be greatly enlarged and its scope of usefulness increased.

It would enable boards to exercise more careful discrimination in the selection of teachers, and would enable teachers to assure themselves in advance concerning the desirability of positions, both of which features would be of great value in establishing satisfactory relations between the parties in interest.

It is simply a matter of canvassing the whole matter fully, enabling all who are active in the matter to proceed with intelligence and discrimination which in view of the interests involved is of great importance.

It will be seen that if these suggestions be adopted, the organization would need to be enlarged.

The director's estimate of the public financial support is that in addition to the employment of a director to manage the bureau, two capable clerks should be employed.

This estimate is based upon the experience of the past year in the operation of the bureau. The statistics indicate a steady growth which will be increased rapidly, as efficiency in the directions herein suggested is promoted. It is a public service organized in the public interest and should be expended as the public need may require.

The following statistical statement will show something of what has been done by the bureau since its organization.

## REPORT OF THE IOWA STATE TEACHERS' PLACEMENT BUREAU.

	From the date of its organization July 1, 1919, to July 1, 1922	
1.	Number of teachers enrolled for 1919-1920	479
Lifty	Number of teachers enrolled for 1920-1921	1,545
	Number of teachers enrolled for 1921-1922	2,660
	Total	4,684
2	Number of teachers called for 1919-1920	618
-	Number of teachers called for 1920-1921	1,856
	Number of teachers called for 1921-1922	1,705
	Total	4.179
	Total	
3.	Number of nominations made for 1919-1920	1,078
	Number of nominations made for 1920-1921	4,358
	Number of nominations made for 1921-1922	3,487

	Total	8,923
4.	Number of schools requesting teachers for 1919-1920	263
	Number of schools requesting teachers for 1920-1921	298
	Number of schools requesting teachers (estimated) for 1921-1922	700
	Number of calls or requests for teachers (some boards made	17.5%
	several requests)	1 035

### THE CAUSES AND DANGER OF FIRE.

J. A. Tracy, State Fire Marshal.

This is a subject that is being freely discussed throughout the United States.

The general public is very indifferent when it comes to the question of Fire Prevention and Law Enforcement. It is hard to interest people of mature age and educate them to habits of carefulness.

It is therefore necessary to educate the rising generation in the causes and danger of fire.

Iowa has a law which requires the teaching of Fire Prevention in the schools. Organizations for Public Welfare are undertaking a campaign to reduce the Nation's annual fire waste, and they endorse the teaching of Fire Prevention in the schools.

It is claimed by the Committee of Publicity and Education that 15,000 persons are killed and 50,000 injured, and over \$500,-000,000 worth of property is destroyed each year as a direct result of fire and we know that at least three-fourths of these fires are preventable.

It is also claimed there are on an average of five school house fires each day of the school year, and five church fires each day of the year, and Iowa contributes her share to this tremendous loss of life and property.

### GOOD CITIZENSHIP.

- 1. A good citizen will try in every way to avoid being the cause of danger, through not permitting any of the practices that we have been warned about.
- 2. He will remove all dangerous conditions that he may find in his own home.
- 3. He will train himself to recognize dangerous conditions in the community, and will use his influence to have them removed and to educate others to habits of carefulness.

## THE IOWA TEACHERS' READING CIRCLE.

A. E. Harrison, Secretary.

The Iowa State Teachers' Reading Circle was established for the purpose of encouraging professional reading among the teachers of the state. To develop plans and to aid in carrying out the purposes of the Reading Circle there is a Reading Circle Board. This Board consists of seven members. These are the State Superintendent of Public Instruction and six County Superintendents.

The State Superintendent is ex-officio President of the Board. The other members are elected by the County Superintendents of the State

at their annual meeting in November, two of whom are elected each year. The state is divided into six districts and each of these districts is represented on the board by one county superintendent. The county superintendent from each district is the Reading Circle Manager of his district. The county superintendent in each county is the manager for his own county.

The State Board of Educational Examiners has put its approval upon the State Reading Circle by requiring that teachers who wish to renew uniform county certificates must read at least one of the Reading Circle books each year.

The Reading Circle Board meets annually in February and adopts three or more books for the following school year. The board also transacts other business that pertains to the work of the Reading Circle. A Secretary-Manager and a Treasurer is elected each year from the membership of the board. The members of the board except the Secretary-Manager and Treasurer receive no compensation for their work except necessary traveling expenses. The Secretary-Manager and Treasurer receive such compensation as is allowed by the board and this amount is made commensurate with the work required to be done.

Funds for carrying out the work of the Reading Circle are secured by requiring each publisher whose book is adopted to pay 5 per cent of the total amount received from the sale of the book to the Reading Circle Board. The total receipts for the year ending February 1, 1922 were \$2,003.56, which includes a balance on hand on February 1, 1921 of \$1,027.54. The total expenditures for the year 1921-1922 were \$771.34, leaving a balance on hand February 1, 1922 of \$1,232.22. The total receipts since February 1, 1922 to this date (November 1, 1922) including the balance of \$1,232.22 are \$1,342.34. The total expenditures to date are \$206.00, leaving a balance on hand on November 1, 1922 of \$1,146.34. Settlements with book companies are made after November 1st and additional funds will presently be in possession of the Treasurer of the board.

The expenditures include all expenses of members to board meetings, salary of officers, stationery, printing of leaflets and other reading circle literature which is necessary for promoting the work in the state.

The members of the board at this time are State Superintendent P. E. McClenahan and County Superintendents Maude Wakefield of Gilbert, George E. Masters of Glenwood, Kate L. Hull of Leon, E. C. Linn of Donnellson, N. J. Breckner of West Union and A. E. Harrison of Storm Lake. Miss Maude Wakefield is the Treasurer and A. E. Harrison is the Secretary-Manager.

The books adopted for the present school year are as follows: Teaching Geography by Problems, by E. E. Smith, Doubleday, Page & Co.; Great American Issues, by Hammond and Jenks, Charles Scribners Sons; Discipline of the School, by Morehouse, D. C. Heath & Co.; Children's Literature by Curry-Clippinger, Rand, McNally & Co.

These books are among the latest educational books and teachers should endeavor to read at least two of the Reading Circle books each year. A large number of books are submitted each year and the board adopts the books that are most suitable to the teachers of the entire state.

### BIBLE STUDY.

Prof. D. S. Wright, Cedar Falls.

Recognizing the importance of Biblical instruction in the public schools, the Iowa State Teachers Association in the year 1916, acting upon the recommendation of its Educational Council, appointed and authorized a committee to prepare a syllabus of Bible study for the use of the public high schools of the state, and to further the introduction of credit courses in such study in the schools. At the annual meeting of the State Association, held in November 1921, this committee was able to report that in about one-fourth of the accredited high schools of the state such instruction had been introduced. In attaining this gratifying result, the efforts of the committee have been ably seconded by the Women's Christian Temperance Union and by other agencies devoted to the moral training of youth. This number has been materially increased in 1922, and the movement is in line with the best educational thought, not only of the state, but throughout the nation.

To this cause, the State Department of Education has gladly given every encouragement by voice and pen and by the printing and distributing of the Syllabus prepared by the committee of the State Teachers Association and endorsed and adopted by that body. The legality of such teaching, if nonsectarian, in the schools under the constitution and laws of the state of Iowa is unquestioned; its disciplinary value should be made second to that of no other study in the curriculum, and its returns can only serve to make for better citizenship through the training of the heart and conscience of the learner.

To protect the thoroughness of the work to be presented in these courses, the State Board of Secondary Relations has laid down the following requirements:

"This course must be pursued under the same conditions as credit work in the regular courses in History and English.

"The instructor must have the same scholastic requirements as are demanded of teachers of other high school subjects.

"The recitation periods must be of equal length with those required in other branches of study.

"Each lesson must require, on the part of the pupil at least, an hour and a half for preparation."

Four methods of Bible study, subject to such modification as local conditions may demand, are recognized as valid:

- "1. The pupils are segregated along denominational lines, and the instruction is given, once a week, or oftener, by pastors or by such persons as they may designate as instructors.
- "2. Some person in the community is chosen who may be trusted to rise above sectarian bias who will teach the Scriptures to high school pupils regardless of denominational lines.
- "3. In cities in which are located colleges or secondary schools that offer courses in Bible Study, pupils may be dismissed for an hour weekly, or oftener to receive Biblical instruction for high school credit.
- "4. In planning courses in English Classics, a half semester is devoted to intensive study of suitable chosen selection from the great discourses of the Bible."

## IN MEMORIUM

Memorial address delivered before Iowa State Teachers' Association, Des Moines, Iowa, November 3, 1922, by Homer H. Seerley, President Iowa State Teachers' College, Cedar Falls, Iowa—Chairman of the Necrology Committee.

For sixty-eight years the educators of Iowa have held these annual conventions and made plans and determined policies for the future. For these two generations their resolutions have sounded the note of the hope of progress and their committee reports have been a quarter of a century before possible fulfillment, yet nothing has daunted courage, suppressed enthusiasm or prevented confidence. In all the years that I have participated in these annual assemblies I have been constantly impressed with the expectation shown all the time of securing in the near future the possibilities that were deemed so earnestly desirable. At my first session in 1873 I listened to the deliberations that occurred with profound enthusiasm because of the august programs that were proposed and the unity of determination that was so decidedly promulgated. This is the beginning of the fiftieth association year since that earnest body of progressive educators decided what was best for education. Today it is only necessary to reread those pronouncements of 1873 and to consider those exact propositions in order to realize that much of the proposed accomplishments and many of the hoped-for plans are not yet accepted as the policies and the laws of Iowa.

Yet the great men and the great women of those days have left a more distinguished heritage, one that is vital rather than formal, one that is permanent rather than temporary, one that is intellectual and spiritual rather than material and statutory. Education for results does not depend on legislation for possibilities. It does not rely upon statutes for progress. The schools of every grade in Iowa are far beyond the scope of any laws that are upon the statute books, they are undertaking far more than all the lawmakers of the past have authorized and they are doing a work for civilization that no publicist nor statesman can get credit for bringing about. While the persons who are commissioned by government to lead in progress and in intelligence are debating the "ifs and the ands" of long delayed expected statutes, progress has come by popular demand and the schools are a decade beyond the laws that the codes in force exhibit.

These things are said to pay tribute to all these distinguished members of this Association who have so nobly wrought for the uplift of humanity and have gone into the unknown beyond to enter upon more effective

activities. The deeds and the hopes of most of these were far in advance of the actual demands of the times, they were in the skirmish line of forward leadership and were the kind of American citizens that recognized all real progress to be human and personal, individual and social rather than administrative or authoritative. By doing small things, one at a time, they amassed great things and by thinking of the benefits to the individual, they amazedly reached the social whole.

To have had a personal acquaintance with such prominent state educators as President John W. Bissell of Upper Iowa University, as General James Rush Lincoln of Iowa State College, as Professor Benjamin F. Simonson of Upper Iowa University, as Professor Sara Findlay Rice of the Iowa State Teachers College, as ex-Superintendent Frank J. Sessions of East Waterloo, as Superintendent Aaron Palmer of Marshalltown, as Principal Oliver E. Dixon of the Oskaloosa High School, as Superintendent James Corbett-Sanders of Avoca, as Ella Hamilton-Durley of East Des Moines High School, member of the Board of Examiners and editor of the Des Moines News, is to have had remarkable privileges that can never be fully appreciated, as all of them were choice spirits whose influence was always used for human welfare and social progress. The inspirations of such lives are an everlasting memorial to their exalted characters while their services will be perpetuated in the work of those they taught and trained.

But those who were thus publicly honored and esteemed by broad associations and by extensive opportunities are no more deserving of tribute because of their enlarged opportunities on this occasion than those who were in the rank and file of the teachers as instructors of children and youth and whose work has been equally as effective in producing the civilization that is, as their abundant works do follow them. Great recognition is always due to those who composed the army that fought the battles of the common country by giving consecrated instruction in things that last.

Neither can we be unmindful today of the untimely passing of Inga Magnusen and of Rebecca Nelson, who were victims of a brutish violence and of a deprivation of life that ought never to be able to be repeated in this State of Iowa. It becomes the duty of the citizenship of this commonwealth to manage so absolutely these unfortunate, irresponsible characters that womanhood will be assured a protection by a permanent segregation of such persons before the tendency and the persistency of crime can be inflicted upon the innocent and the defenseless. The moron and the feeble-minded should no longer be considered harmless. Society should guard its own life by proper, effective, legal methods. The insane and the mentally incompetent should be withdrawn from the opportunities to deal death and destruction.

### AARON PALMER

The state of Iowa lost one of its ablest and most inspiring school men in the death of Aaron Palmer at Marshalltown on January 29 of this year. Fourteen years of service as superintendent of schools at Marshalltown following several years in the same capacity in Maquoketa and Anamosa had enabled Mr. Palmer to realize many of the ideals which sincere and faithful men have in the teaching profession.

During his period of service at Marshalltown, the schools of that city enjoyed remarkable growth and notwithstanding the close application of service required to bring them to their high standard the obituaries that were written and spoken regarding the man emphasized his exceptional personal influence among the school children and citizens of the town.

He was such a kindly man, so friendly with all of his many thousands of school children, his interest in them was so intimate and genuine that he knew them all and could call them all by name. He knew their parents as well and remembered their brothers and sisters with an intimate friend-ship. So close was his human touch with the many with whom he had to deal that his upright, christian character shone brightly to all as a high example and beacon light leading young people to high ideals in life.

Superintendent Palmer's school work commended him to school men for his rare good judgment and common sense in all things. He did not scintillate. He never seemed to be self-conscious in an effort to attract attention to his work, but his teachers loved him while they admired his judgment and trusted his integrity and sincerity of purpose. Everywhere he went about his city children from the door yards, the play grounds and the streets cried out in comradeship, "Hello, Mr. Palmer," and Mr. Palmer was never too busy to reply with a "Hello" for everyone.

At his funeral the executive officers of the two largest banks in Marshalltown, the publisher and the managing editor of the daily newspaper, the leading merchant and a retired manufacturer were found among his nearest friends to act as pall bearers, so broad had been his life and his citizenship while engaged in a schoolmaster's tasks. His church honored him as one of its deacons. The Rotary club of business men mourned him as one of its choicest members. The Country club missed him from among the men who enjoyed wholesome play and Mr. Palmer, from his days at baseball when he had won amateur distinction as a pitcher, always found time for recreation and play among men.

Mr. Palmer's life has exalted the profession of school teaching in Iowa. He demonstrated that a man need not be narrow nor pedagogical if he spends his life at school work. He has proved to the world and to his profession that a school superintendent can become a prominent citizen whose counsels are prized among the ablest men of his town, whose character and personality can be an uplift to the young and a guide to the old, while at the same time the school superintendent can go about his daily work in his community, being a genuine, sincere, unaffected and beloved friend to man.

### DR. O. H. LONGWELL

It is no easy task to become an educational leader in a great and growing state, and maintain that leadership for a quarter of a century, and yet such is the record of Dr. O. H. Longwell, who was for more than a quarter of a century president of Highland Park College.

As a young man, Dr. Longwell came to Iowa from Indiana and engaged in educational work at Bloomfield. This was at a time when the academy and normal school were flourishing, and he soon became known as a leader among those who were training teachers. His worth was recognized and he soon was promoted to a position in the Western Normal College at Shenandoah.

At the time Highland Park College was founded, the trustees searched far and wide for the best educational leader for the first president of the college. They finally selected Dr. Longwell as the best trained and equipped executive available for such a position. When Dr. Longwell came to Des Moines to enter upon his duties, he had a task such as few educators have ever been called upon to perform. As president of Highland Park College he had the gigantic task of selecting a faculty, fixing a salary schedule, securing students for the school, and providing funds to pay the salaries. In addition to this he had to provide buildings, secure equipment, and lay out an educational program which would appeal to teachers and students, and satisfy the educational needs of the state.

As president and executive he saw the needs of Iowa schools. He had a clear vision of the industrial and vocational needs, and planned the college course to meet the demands of the students. The wisdom of such a plan is best testified to by the thousands of students who came to the college to secure an education. All courses of study were planned and instruction was offered to fit the individual needs of the student, rather than to conform to the whims of the faculty.

With such ideals carried out in practice, he built a great institution for the training of teachers and also a vocational college equal in most respects and excelling in many the better schools of our land.

As a teacher and trainer of teachers, Dr. Longwell had a national reputation such as few men ever attain. He was especially known as the author of a grammar which was an authority in the middle west for many years. As an executive, he was a marvel to his associates because of his quick and accurate analysis of the educational problems and the justice of his administration.

Dr. Longwell's last great piece of work was done in the office of State Superintendent P. E. McClenahan, when he organized and put into operation a Teachers' Placement Bureau for the benefit of teachers of Iowa.

Take him all in all, as a teacher, as a college president, as a citizen, he was every inch a man; and as a friend and fellow worker, he inspired his associates with a divine touch.

#### INSTITUTE FACULTIES.

# ABSTRACT E-1—REPORTS OF COUNTY SUPERINTENDENTS. INSTITUTE FACULTIES JULY 1, 1920, TO JUNE 30, 1921. INSTRUCTORS AND LECTURERS.

Adair County—Mrs. Mina Whittum, William F. Barr, Elizabeth Myers, D. R. Earl, Elnora Swanson, Dr. Elmer E. Higley, Geo. E. Davis, Anna Drake

Adams County—Anna Lynam, E. O. Ashbaugh, Carrie Niedemeyer, H. M. Towner, Dr. Waterman, Teresa Dansdill, Chas. F. Pye.

Allamake County-W. L. Peck, Dr. J. M. Matheny, Dr. Lee L. Driver, Dorothy Cole Co.

Appanoose County—Janet Wilson, C. A. Fullerton, Theresa Dansdill, H. E. Bradford, Emma Watkins, L. L. Caldwell.

Audubon County—Ella M. Stearns, H. E. Bradford, Eva Luse, M. M. Mc-Intire, Perry E. Pyle.

Benton County-Emma R. Crossley, Allison Aitchison, Dr. Germane, Dean Chas. Fordyce, Ada Pemberton, Mrs. Edwards.

Black Hawk County—H. C. Moeller, F. M. Fling, Dan B. Stephens, A. C. Fuller, Jno. H. Styles.

Boone County—Gracia E. Tucker, C. C. Swain, Effie Schuneman, Grace Rait. Ruth Keleher, Helen McHose.

Bremer County—Grace E. Beebe, Harry E. Bradford, M. G. Clark, Chas. H. Meyerholz, Mrs. A. H. Hoffman, Bertha Drown, Theresa Dansdill, Mrs. Flora H. Smith.

Buchanan County—A. E. Jewett, Lemuel Gibson, M. G. Clark, C. E. Germane, Jeanette Kling.

Buena Vista County—A. E. Harrison, H. C. Moeller, O. J. Jerde, H. E. Bradford, Francelia French, Ethel Haines, Ellinor Findley, Halcyon Heffling, George Galloway, D. R. Earl, Theresa Dansdill, W. D. Cocking, E. V. Burdick.

Butler County—Hazel M. Black, M. G. Clark, Bertha E. Drown, Harry E. Bradford, Theressa Dandsdill, Mrs. A. H. Hoffman, Mrs. D. W. Burch, C. H. Van Tuyle, C. F. Pye.

Calhoun County—C. L. Jackson, Hon. J. L. McBrien, F. T. Vasey, Ruth Johnson, E. J. Ashbaugh, Anna Cordts, Dr. F. E. Mossman.

Carroll County-

Cass County—Jennie Ward, Dr. J. R. Jewell, Prof. Arthur MacMurray. P. E. McClenahan, Dr. Harry A. Green, Edith M. Rhetts, Mrs. H. M. Drake, Anna M. Drake, Obera Brown.

Cedar County-Jane McCormick, Grace Rait, E. L. Philbrook, M. G. Clark, Thomas Kirby, Jeanette Throckmorton.

Cerro Gordo County—R. E. Newcomb, Chas. Fordyce, C. A. Fullerton, Blanche Goudy, Allison Aitchison, Theresa Dansdill, F. T. Vasey, James Rae,

Cherokee County—Margaret Montgomery, Prof. Macy Campbell, Agnes Rice, Marguerite Uttley, Mr. Van Tuyle, Frances Lavender.

Chickasaw County—Alf O. Vaala, Dr. John E. Stout, Prof. C. A. Fullerton, Avis Grawe, H. C. Moeller.

Clark County—Bessie Hart, Arthur MacMurray, M. P. Shawkey, Mrs. C. W. Hummell, Dr. Eva Shively.

Clay County-D. M. Odle, Macy Campbell, Lee Driver, Chas. Meyerholtz, J. L. McBrien.

Clayton County-Carl F. Becker, Edward Atchison, R. W. Eaton,

Clinton County—C. E. Cozzens, Ernest Horn, Alice E. Aitchison, G. H. Trafton, Katherine Martin.

Crawford County-F. N. Olry, Hattie Moore-Mitchell, Clare Moe, Jas. F. McCrary, Fred D. Cram, Ernest Horn.

Dallas County—May A. Hills, Ella Ford Miller, M. G. Clark, Dr. Ernest Horn, Supt. Chehock, Chas. F. Pye, Blanche Fuller, Arlene Thomas, Supt. Lindeman

Davis County—H. C. Brown, C. A. Fullerton, Beulah Bennett, Bonnie Andrews, J. B. Arp, Theresa Dansdill, H. E. Blackmar.

Decatur County—Kate L. Hull, Dr. Lida B. Earhart, Dr. Ernest Horn, Dr. C. A. Fulmer, Prof. Monica Wild, Theresa Dansdill.

Delaware County—Dr. Geo. H. Mount, M. G. Clark, Dr. E. N. Tompkins, Lemuel E. Gibson, May E. Francis, Theresa Dansdill.

Des Moines County-Vail Cordell, Cora M. Hamilton, J. O. Engleman, E. M. Sipple, R. H. Bracewell, Wm. A. Dunlavy, Fremont Hendrickson.

Dickinson County—Frank S. Willey, Hon. Lee Driver, C. A. Fullerton, Hon. J. L. McBrien, C. H. Meyerholtz, O. R. Arrington, H. E. Ilsley, Hazel Lee, Verna M. Gray, Edith S. Countryman, W. L. Ernst.

Dubuque County—Joseph Flynn, Dr. Fracker, Franz Otto, Theodore Maynard, Dr. Banks, George Gerken, Evelyn Siege, Homer B. Holbert, Gregory Zilbowig.

Emmet County—Marie Sorum, Dr. J. L. McBrien, Dr. Lee Driver, Dr. Chas. Meyerholtz, Prof. Macy Campbell, May Francis, Helen Mattison.

Fayette County—N. J. Breckner, C. A. Fullerton, Jeanette Kling, Dr. Jeanette Throckmorton, Leon O. Smith, Irene Hirsch, A. W. Moore, Isabel Kellman, C. H. Van Tuyle, H. C. Moeller.

Floyd County-Mary D. Korinke, C. A. Fullerton, Emma Klein, Claude F. Brown, Ella Mae Clark, John E. Foster, W. F. Russell.

Franklin County—Harry J. Henderson, F. F. Vasey, Bertha E. Drown, Macy Campbell, B. W. Hoadley, H. L. Cecil.

Fremont County—Edith M. Anderson, J. R. Jewell, Harry A. Green Bertram Everett McProud, Arthur McMurray, P. E. McClenahan.

Greene County—Mrs. Hazel H. Ott, Cora E. Thomas, R. A. Morris, T. B. Stewart, R. B. Hardin, H. C. Roclolsz, Maude Shoemaker, Mrs. E. B. Wilson, A. L. Heminger.

Grundy County—D. R. Earl, F. E. Palmer, Charles Fordyce, H. C. Moeller, C. A. Fullerton, Theresa Dandsdill.

Guthrie County—Mrs. Mary L. Boggs, J. W. Hanchell, Mrs. E. B. Wilson, C. M. Wassum, Elizabeth Myers, Mrs. Shoemaker, Mrs. Hillis.

Hamilton County—E. F. Snow, P. E. McClenahan, W. P. Shawkey, Anna D. Cordts,

Hancock County—J. R. Baggs, Dr. H. E. Bradford, H. S. Hartzog, C. A. Fulmer, Alice Cusack, May E. Francis, S. M. McConnell.

Hardin County-Blanche Stoddard, Emma Klein, Glenn Drake, Kittle Glee Merrill, J. A. Woodruff, Albert Keister, Mary Gregg, A. C. Swain.

Harrison County-Marie E. Case, G. W. Gaines, Prof. Ensign, Blanche Goudy.

Henry County—Eva Allen, Dean Russel, Dr. Clark Fulmer, A. L. Heminger, B. E. McProud, Edna Countryman, C. C. Swain, Ivadell Swindler.

Howard County—Mira B. Buck, H. E. Bradford, C. C. Swain, C. A. Fulmer, N. W. Gaines, Julia A. Robinson, Barbara Agan, Estelle Swem, Geo. H. Sawyer, C. H. Van Tuyl.

Humboldt County-Clarence Messer, J. H. Beveridge, C. A. Fullerton, Emma Klein.

Ida County-Julia Jacob, J. W. Searson, C. H. Meyerholtz, C. E. Avis, Elizabeth Burney Schmidt.

Iowa County—Ida O'Brien, W. A. Millis, W. A. Matheny, R. B. Hyten, Teresa M. Dansdill, Neal O. Knowles, Miss Rhetts, E. O. Garrett. Jackson County-C. R. Stoddard, John Barnes, F. B. Knight, J. H. Harris, H. L. Eells, Thomas J. Kirby.

Jasper County—Lucy E. Hall, Harry E. Bradford, C. E. Avis, Macy Campbell, Avis Grawe, G. H. Alderman, Carrie E. Miles, C. H. Van Tuyle.

Jefferson County—June Chidester, Dr. C. A. Fulmer, Elizabeth Burney Smidt, Grace Shields, Dean Russell, Dean McDonald, Dr. H. S. Hartzog, Cora Ball, Prof. C. W. Mountain.

Johnson County—W. N. Leeper, Frank Johnson, Eva Mae Luse, J. G. Hyten, C. A. Fullerton, Ernest Horn, Harry Green, Ethel Hale, Ethelyn Yount, Mabel Snediker.

Jones County-Nellie V. Morey, C. A. Fullerton, Emma Watkins, Chas. Fordyce, F. T. Vasey, Mrs. Florence Hinke, Kate Maurice, Miss Hazen.

Keokuk County—H. S. McVicker, F. G. Blair, J. H. Beveridge, G. W. Samson, R. B. Hyten, S. A. Potts, W. Dean McKee, Dorothy Halcomb.

Kossuth County—Wm. Shirley, T. J. Kirby, John E. Foster, F. A. Welch, J. F. Overmeyer, Minnie J. Coate, Louise McCoy, Lucia Wallace.

Lee County—E. C. Lynn, W. F. Russell, J. A. Matheny, C. E. Germaine, B. E. McProud, C. C. Swain.

Linn County—Lulu B. Secrist, M. V. O'Shea, M. P. Shawkey, Katharine Martin, J. J. McConnell, Prof. Sarka B. Hebkova, Alice Inskeep, Dr. C. P. Colgrove, Prof. Risser Patty, Theresa Dandsdill, Henrietta Bures, F. J. Hokin,

Louisa County-Myrtle Jamison, Mary Smith, Dr. Edwin D. Starbuck, Jeanette Kling.

Lucas County—Myrtle A. Dungan, J. Adams Puffer, J. L. McBrien, Mrs. H. C. Hummell, J. R. Congill, Sam Findley Rice.

Lyon County—E. T. Gilman, Harry E. Bradford, E. R. Misner, E. J. Ashbaugh, S. H. Buntley, Theresa Dansdill, Chas. F. Pye.

Madison County—Carrie E. Ludlow, Irving H. Hart, David Riley Earl, Clark H. Brown, S. E. Steeves.

Mahaska County—Erma L. Krout, L. L. Caldwell, S. A. Potts, Lemuel E. Gibson, J. M. Matheny, A. L. Heminger, Frank D. Joseph, Chas. F. Pye, Alice J. Pattee, Blodwyn Rees.

Marion County—Avis Grawe, A. L. Heminger, J. M. Matheny, May E. Francis, Mae Goldizen, F. M. Frush, Gertrude Tyrrel, Lou Shepherd, J. M. Davis.

Marshall County—C. E. Shutt, Grace Shields, P. H. Buntley, J. L. Mc-Brien, C. P. Colgrove, W. F. Russell, P. E. McClenahan, Edith McBroom.

Mills County—Geo. E. Masters, Arthur Mac Murray, B. E. McProud, Harry J. Greene, J. R. Jewell, Edith Rhetts, P. E. McClenahan.

Mitchell County—Blanche McLaughlin, Chas. H. Myerholz, F. T. Vasey, M. Anita Yates, Ethel Elliot Swan, Bertha Stiles.

Monona County—Ella M. Gardner, Prof. A. C. Fullerton, Irene Hirsch, C. H. Meyerholtz, M. G. Clarke, Prof. H. E. Bradford, Theresa Dandsdill, Geo. Galloway.

Monroe County—G. H. Brinegar, Martha Van Brussel, Charlotte Williams, Lucile Brandenburg, Theresa Dandsdill, M. P. Shawkey, J. L. Mc-Brien.

Montgomery County—Hattie E. Hough, M. G. Clark, Dr. J. R. Jewell, Prof. Arthur McMurray, Dr. H. A. Greene.

Muscatine County—E. D. Bradley, F. G. Blair, E. J. Ashbaugh, F. C. Ensign, Anna D. Cordts, Macy Campbell, A. C. Fuller, C. A. Fullerton.

O'Brien County-J. J. Billingsley, S. H. Buntley, Ernest Horn, J. T. Vasey, Anna Cordts.

Osceola County—Mary E. DeBoos, S. H. Buntley, Ada DeBoos, May Francis, Dr. Russell, F. T. Vasey, J. Hoffman.

Page County—Agnes Samuelson, Dr. C. A. Fulmer, Dr. Charles Fordyce, Prof. Gannaway, Dr. Livingston Lord.

Palo Alto County—Florence Underwood, Lee L. Driver, J. L. McBrien, Blanche Goudy, C. A. Fullerton, Chas. Meyerholz, Christel Palmer.

Plymouth County—Agnes M. Eyres, Agnes Rice, C. E. Avis, Macey Campbell, Ruth M. O'Reilley, Hattie Dresselhuys.

Pocahontas County—Grace D. Michael, Theresa Dansdill, C. W. Wassom, Macy Campbell, C. H. Myerholtz.

Polk County-Mrs. A. H. Hoffman, J. W. Studebaker, Dr. Gambrill, Prof. Driggs, George Dick, Dean Russell, May Francis, Alison Aitchison.

Pottawattamie County-Charlotte Dryden-Combined with S. W. Iowa Teachers' Association.

Poweshiek County-Estelle Coon, W. F. Russell, B. F. Knight, Grace Rait, Theresa Dansdill, Mrs. Elizabeth Schmidt.

Ringgold County-Louise Askren, Mrs. Pearl Maple, C. A. Fulmer, Ernest Horn, Lida Earhart, Monica Wild.

Şac County-P. A. Lauterbach, Frank Mossman, J. Ł. McBrien, Ruth M. Johnson, Carrie Niedermeyer, E. T. Vasey, A. C. Fuller.

Scott County—Henry E. Rouge, H. L. Miller, Ernest Horn, M. V. O'Shea, Chas. H. Meyerholz, Sarah Huftalen.

Shelby County—Rose M. Parker, F. M. Gregg, Mary J. Wyland, Lida B. Earhart, N. A. Housel, Mrs. C. W. Hummell.

Sloux County—Chas. H. Tye, Leon Smith, D. R. Earl, Joe Whiting, Macy Campbell, S. H. Buntley, Mrs. Wm. Hickey, Geo. Kellogg.

Story County—Maude Wakefield, Sara F. Rice, Dr. A. Holmes, Bonnie Andrews, F. W. Beckman, Lynn B. Stiles, Dr. R. A. Pearson, Miss Rhetts.

Tama County—Mary A. Richards, Prof. Wassum, C. D. Colgrove, M. P. Shawkey, Kathryn Martin, M. V. O'Shea, A. L. Heminger.

Taylor County-Allie Nelson, E. J. Ashbaugh, Addie J. Maulsby, H. E. Bradford.

Union County—Nancy M. Bell, Dean McDonald, I. H. Hart, Agnes McCoy, J. H. Beveridge.

Van Buren County—H. B. Carroll, Emma Watkins, C. W. Wassam, A. T. S. Owen, T. M. Essex, Julia Robinson, Wm. A. Dunlavy.

Wapello County—R. L. Gardner, P. S. Shawkey, H. E. Bradford, Forest Ensign, Mrs. Sarah Hollister.

Warren County-P. E. McClenahan, Dr. Ensign, Ella Ford Miller, Mrs. Earl Brown, Forest Buchter, Mildred Mott, W. C. Dennis.

Washington County—Kathryn Z. Montgomery, Henry S. Hartzog, Wm. F. Russell, Grace Shields, Bess Johnson, Dr. Clark, A. Fulmer, Mrs. Elizabeth Schmidt, Barbara Agan, Bertha Hay, W. C. Harding.

Wayne County—Ava Amenell, Ida Fesenbeck, F. C. Ensign, C. E. Germane, Barbara Agan, C. H. Van Tuyl, Mrs. H. K. Evans.

Webster County—Anna A. Johnson, C. C. Swain, Dr. H. Martin, Lucy Gage, Dr. Earl Roadman, Mr. Schmidt, E. W. Goetch, E. D. Clagg.

Winnebago County—Jessie M. Parker, John E. Foster, A. C. Fuller, C. A. Fulmer, C. H. Van Tuyl, Theresa Dansdill.

Winneshiek County—H. E. Miller, R. W. Eaton, Mr. Fulmer, Mr. Ganes. Woodbury County—Jessie L. Newlin, Francis G. Blair, Dean B. McProud, Lucy Gage, Edward Elliott, W. B. Waldo, C. A. Fullerton, C. E. Avis.

Worth County—Nora M. King, C. E. Germane, Howard Driggs, Lemuel Gibson, Macy Campbell, A. E. Aitchison, D. E. White, H. E. Moeller.

Wright County—Blanche Bock, J. E. Foster, Emma Watkins, M. R. Fayram, Effie Schuneman.

#### INSTITUTE FACULTIES.

ABSTRACT E1-REPORTS OF COUNTY SUPERINTENDENTS

INSTITUTE FACULTIES JULY 1, 1921, TO JUNE 30, 1922. INSTRUCTORS AND LECTURERS.

Adair County-Mrs. Mina Whittum, Prof. Macy Campbell, Elizabeth Myers, H. C. Gibson, Anna Drake, Geo. F. Nardin, David Hand.

Adams County—Anna Lyman, Chas. H. Meyerholz, Chas. A. Germane, Ella Ford Miller, May Darling.

Allamakee County—W. L. Peck, Dr. J. M. Matheney, Prof. J. F. Marsh, P. E. McClenahan, Guy W. Eaton, Bierkamp Trio.

Appanoose County—Janet Wilson, Theresa Dansdill, C. W. Wassam, J. W. Searson, C. E. Germane, M. G. Clark, Faye Rhoades, Dr. M. P. Sawyers.

Audubon County—Augusta G. Hecker, Adaline Brooks, H. C. Moeller, W. F. Barr, Gertrude Nelson.

Benton County—Emma R. Crossley, H. M. Gage, Dr. C. A. Fulmer, George Hilliard, Ada Pemberton, Ella B. Edwards.

Black Hawk County-H. C. Moeller, E. J. Burkett, J. L. McBrien, Jeanette

Hart, Chas. Fordyce, Fred D. Cram.

Boone County—Gracia E. Tucker, John E. Foster, Allison Aitchison, Anna

Cordts, Ruth Kelcher, Helen McHose.

Bremer County—Grace E. Beebe, Dr. C. A. Fulmer, Howard L. Driggs.

Bremer County—Grace E. Beebe, Dr. C. A. Fulmer, Howard E. Brigges Z. C. Thornburg, Theresa Dansdill, May E. Francis, C. E. Avis, Vera H. Hart.

Buchanan County—A. E. Jewett, Emma R. Klein, W. L. Wallace, Edward R. Driggs, C. A. Fullerton, W. H. Morton, E. J. Burkett, C. C. Swain.

Butler County—Hazel M. Black, C. E. Avis, C. P. Colgrove, May E. Francis, C. A. Fulmer, Agnes Rice, Gertrude T. Lynch, Theresa Dansdill, Margaret Siegfried, Mr. Sheldon.

Calhoun County—Helen Wilson, Bertha E. Drown, Chas. Germane, Ernest R. Misner, Chas. H. Meyerholz, Grace Young.

Carroll County—Geo. Galloway, C. A. Fulmer, O. C. Morrison, A. E. Harrison, Hazel Ott, Bonnie Andrews.

Cass County—Myrtle R. Hardenbergh, Judge C. S. Wortman, Dr. Howard R. Driggs, Bonnie Andrews, E. Grace Young, W. H. Bender, Supt. S. W. Rowley, L. K. Bennett.

Cedar County-Jane McCormick, C. E. Avis, Irene Kirsh, Mrs. Max Mayer,

C. P. Colgrove, C. C. Swain.
 Cerro Gordo County—R. E. Newcomb, Chas. H. Meyerholz, May E. Francis,
 Mrs. A. O. Ruste, Bird T. Baldwin, C. P. Colgrove, F. B. Knight, Blanche

Goudy.
Cherokee County—Hazel M. Jackson, Elsie Boss, Prof. Howard Driggs,
May E. Francis, Agnes Rice, Dean W. F. Barr, V. C. Sheldon, C. A. Fulmer.
Chickasaw County—Alf. O. Vaala, Prof. M. V. O'Shea, Bertha E. Drown,

Theresa Dansdill, P. C. Lapham, Eva Grant, Mrs. Grace Rehorst. Clarke County—Ora Criswell, C. E. Germaine, C. A. Fulmer, I. H. Hart,

Mrs. C. W. Hummell, D. B. Heller, Eugene Mannheimer.

Clay County—Etta M. Smith, C. A. Fullerton, F. B. Knight, J. C. Cunningham, J. R. McAnelly, Katherine Reynolds.

Clayton County—Margaret C. Meyers, Dr. John E. Stout, Dr. Jas. E. Matheny, Dr. H. L. Miller, Hon. D. D. Murphy, F. E. Welch, Senator B. W. Newberry.

Clinton County—C. E. Cozzens, Dr. Livingston C. Lord, R. L. Lyman, Irene Hirsch, Mrs. Max Meyer, Geo. A. Brown, Theresa Dansdill.

Crawford County-F. N. Olry, Fred D. Cram, Richard Ernesti, M. G. Clark, F. A. Welch, Beatrice Lally, Miss Thompson.

Dallas County-May A. Hills, Leon O. Smith, C. A. Fullerton, Irene

Hirsch, Supt. Lindeman, A. E. Engebretson, Dorothy Taylor.

Davis County-H. C. Brown, H. Ostergaard, Dr. Elmer Ritter, Orsini Swift, Harry McClane, Minnie Rochelle, Theresa Dansdill.

Decatur County—Kate L. Hull, John E. Foster, Frederic B. Knight, Harry E. Bradford, Effie Schuneman, Thos. J. Kirby.

Delaware County—W. A. Ottilie, Prof. C. C. Swain, Dr. A. H. Holmes, Prof. W. H. Morton, Hon. Elmer J. Burkett, Dr. Howard Driggs, Prof. W. L. Wallace, Emma R. Klein, Kathryn Gabriel.

Des Moines County-Vail Cordell, E. E. Horn, R. M. Tryon, C. H. Meyerholz, H. W. Shryock, H. L. Miller, F. J. Blair, M. V. O'Shea.

Dickinson County—F. S. Willey, S. H. Buntley, C. P. Colgrove, Geo. A. Brown.

Dubuque County—Joseph Flynn, Chas. A. Payne, B. T. Baldwin, I. W. Howerth, C. W. Wassam, Mrs. Harriet E. Vittum, Charlotte J. Garrison, Andrew Weimar, Welhelmine Giesemann, Julia Deane.

Emmet County—Marie Sorum, F. M. Gregg, Emma Watkins, David Riley Earl, F. Pearl Bemis, Theresa Dansdill, Helen U. Mattison.

Fayette County—N. J. Breckner, C. W. Wassam, F. B. Knight, Jessie M. Finch, Agnes O'Brien, C. A. Fullerton, Emily R. Talbott, H. L. Eels, Sara Flynn, E. J. Burkett, Mrs. A. O. Ruste.

Floyd County-Mary D. Korinke, C. F. Brown, Winifred Selhy, Mrs. O. G. Satterlee, Mrs. Edwin Booth.

Franklin County—H. J. Henderson, Chas. H. Meyerholz, Clare Moe, C. P. Colgrove, F. B. Knight, B. T. Baldwin, H. L. Cecil.

Fremont County-W. H. Simons, H. E. Bradford, C. H. Meyerholz, Theresa Dansdill, Irene Hirsch, H. R. Driggs.

Greene County—Mrs. Hazel H. Ott, Elsie Hubbard, C. E. Germane, May E. Francis, Geo. Galloway, Murray Campbell, Mrs. E. B. Wilson. J. W. Jarnagin,

Grundy County—D. R. Earl, Dr. C. A. Fulmer, Dr. Jeanette Throckmorton, C. F. Tye, S. H. Buntley, F. D. Crom.

Guthrie County—Chas. A. Young, I. H. Hart, H. L. Eels, Leslie I. Reed. Fred D. Crom, Minnie Meyers.

Hamilton County—E. F. Snow, Anna D. Cordts, Chas. F. Meyerholz, A. C. Fuller.

Hardin County—Bessie M. Steinberg, A. C. Fuller, Jr., Richard Ernesti, Blanche Goudy, E. Grace Young, James M. Matheney, W. H. Bender, Lafayette Young, Y. Critchley.

Harrison County—Alice Divelbess, Mrs. Hattie M. Mitchell, Dr. C. A. Fulmer, Leon O. Smith, Worcester Warren.

Henry County—Eva Allen, C. A. Fulmer, Dean W. F. Barr, Miss Rait, C. W. Cruikshank, Dean Weir, U. S. Smith.

Howard County—Vernette B. Moore, J. L. McBrien, W. G. Brooks, Geo. Crocker, J. M. Matheney, Margaret Dill, Sara Flynn, N. J. Breckner. Cordella Eastwald.

Humboldt County—Clarence Messer, C. P. Colgrove, C. C. Swain, Lou A. Shepherd, F. A. Welch.

Ida County-J. M. Rees, Jr., C. L. Swain, J. L. McCrary, C. P. Colgrove, Carrie Niedermeyer.

Iowa County—Ida O'Brien, Fred D. Crom, C. A. Fullerton, O. E. Klingaman, H. B. Allen, Judge Martin Wade.

Jackson County—E. R. Stoddard, H. L. Eels, Mae H. Donaldson, A. C. Fuller, Jr., C. W. Wassam.

Jasper County—Lucy E. Hall, Dr. Germane, Dr. Arthur Holmes, Ernest Horn, D. M. Kelly, Dr. Alderman, Harry McClare, Jeanette Mills.

Jefferson County—June Chidester, Dr. C. A. Fulmer, Grace Rait, Grace Schmidt, Dean W. F. Barr, Dean McDonald, C. F. Garrett, May Schueber, Prof. Chas. Mountain.

Johnson County—W. N. Leeper, Julius Boraas, C. A. Fullerton, F. B. Knight, Ernest Horn, Emma Watkins, Elizabeth Myers, R. H. Bracewell.

Jones County-Nellie V. Morey, Mabel Snedaker, Marguerite Babcock, Dr. H. E. Bradford, Dr. F. B. Knight, Prof. H. L. Eels.

Keokuk County—H. S. McVicker, Edgar S. Kindley, S. A. Potts, John J. Williams, W. Dean McKee, J. A. Jessup, Theresa Dansdill, A. E. Kepford, J. W. Johnson, Mrs. W. H. Kracht.

Kossuth County-Wm. Shirley, May Francis, H. C. Filley, C. E. Avis, J. F. Overmyer, Lucia Wallace, Minnie J. Coate.

Lee County—E. C. Lynn, Jas. M. Matheney, Harlan E. Hall, R. B. Hyton, Chas. F. Pye, H. McClave.

Linn County—Lulu B. Secrist, Georgia Cline, Wm. W. Sweet, R. P. Lyman, Dr. E. T. Hagerman, C. E. Avis, Doris E. White, Marx Oberndorfer.

Louisa County-Myrtle Jamison, Dr. Chas. H. Meyerholz, Dr. G. W. Stephens, Theresa Dansdill,

Lucas County—Grover Alderman, R. B. Hyten, Alison Atchison, J. R. Cougil, W. H. Bender.

Madison County—S. E. Steeves, Dean W. F. Barr, C. A. Fullerton, B. S. Salinger, Carmen Fairbanks, Effie Shuneman, P. E. McClenahan.

Mahaska County—Erma Krout, Dr. C. A. Fulmer, Prof. H. E. Bradford, W. H. Powell, Elizabeth Washburn, Chas. F. Pye, Alice Pattee.

Marion County—Avis Growe, C. E. Germaine, Mae Goldizen, May E. Francis, Agnes Rice, H. E. Bradford, Leta Bonifield.

Marshall County—C. E. Shutt, S. H. Buntley, Richard Ernesti, Blanche Goudy, E. D. Starbuck, W. H. Powell, M. V. O'Shea.

Mills County—Geo. E. Masters, Irene Hirsch, Theresa Dansdill, Howard Driggs, C. H. Meyerholz, H. E. Bradford.

Mitchell County—Blanche McLaughlin, John E. Foster, C. P. Colgrove, Adrien Newens, C. E. Avis, Edith Gregory, H. McClave, P. E. McClenahan, Geo. H. Sawyer.

Monona County—Esther E. Transtom, Howard Driggs, Theresa Dansdill, L. O. Smith, Dr. C. A. Fulmer, Mildred Oliver, H. W. Hartman.

Monroe County—Esther Roberts, Martha Van Bussel, Martha Eschbach, Louise Worth, V. I. Smith, H. E. Brown, Z. C. Thornburg, G. H. Brinegar.

Louise Worth, V. I. Smith, H. E. Brown, Z. C. Thornburg, G. H. Brinegar. Montgomery County—Hattie E. Hough, Irene Hirsch, H. E. Bradford, C. E. Germaine, Theresa Dansdill, C. H. Meyerholz, P. E. Packer.

Muscatine County—E. D. Bradley, J. C. Engleman, J. W. Searson, A. C. Fuller, Jr., S. A. Potts.

O'Brien County—Bessie L. McNutt, C. P. Colgrove, Chas. W. Meyerholz, Agnes Rice, C. A. Fulmer, S. H. Buntley.

Osceola County-Mary E. D. Boos, Dr. H. E. Bradford, Dr. G. W. Wilson, F. D. Joseph.

Page County—Agnes Samuelson, H. R. Driggs, C. H. Meyerholz, C. E. Germane, Irene Hirsch, H. E. Bradford, Theresa Dansdill, Gertrude Thompson.

Palo Alto County—Gertrude M. Thornwall, Z. C. Thornburg, Mary Campbell, Addie J. Maulsby, D. P. Earl, Christel Palmer.

Plymouth County-Agnes M. Eyres, C. P. Colgrove, T. J. Kirby, Mrs. Curtis.

Pocahontas County—Grace McMichael, Dr. C. P. Colgrove, Prof. Macy Campbell, Alta Wilmarth.

Polk County—Mrs. A. H. Hoffman, J. W. Studebaker, J. L. O'Brien, Mrs. Hazel Ott, Eva Shuman, L. B. Schmidt, Dean Germaine, May Francis, W. S. Gray, F. B. Knight.

Pottawattamie County—Charlotte Dryden, J. H. Beveridge, M. G. Clark, Mrs. E. B. Wilson.

Poweshiek County—Estelle Coon, F. E. Ensign, W. L. Wallace, Mrs. Elizabeth Schmidt, John Barnes, Mrs. Ella Ford Miller, Dr. B. T. Baldwin. Ringgold County—Louise Askren, Effie Schuneman, C. H. Norton, Grace Young, H. E. Bradford, T. J. Kirby, F. B. Knight, J. E. Foster.

Sac County—P. A. Lauterback, James L. McCrary, C. P. Colgrove, Theresa Dansdill, C. C. Swain, Bonnie Andrews, B. I. Salinger.

Scott County—Hermine C. Schneckloth, H. C. Moeller, Rev. P. B. Hyten, T. F. Vance, Fredrica Shattuck, B. I. Salinger, Ernest Horn.

Shelby County—Rose M. Parker, Dr. R. L. Conger, Ella Ford Miller, C. A. Fulmer, Richard Ernesti.

Sioux County—Chas. H. Tye, Chas. H. Meyerholz, Mrs. Ida B. Wise, C. M. Wassam, S. H. Huntley, Mrs. Wm. Hickey, N. A. Housel, A. L. Spooner. Story County—Maude Wakefield, Sara E. Hollister, Herbert Martin, Tulius Boraas, G. M. Wilson, C. W. Wassam, Oscar Hawley, Tolbert McRae.

Tama County—Mary A. Richards, C. E. Avis, R. L. Lyman, W. W. Sweet, G. M. Wilson, C. W. Bangs, J. H. Peet, Frank Joseph.

Taylor County-Allie Nelson, F. M. Gregg, C. C. Swain, Harry McClove, Anna Drake.

Union County—Nancy M. Bell, C. H. Norton, W. A. Evans, Ernest Horn. Van Buren County—H. B. Carroll, Bonnie Andrews, R. B. Hyten, Frederica Shattuck, F. M. Essex, A. T. S. Owen, J. C. Calhoun.

Wapello County—Celia M. Bell, C. A. Fulmer, A. W. Watterhouse, Chas. E Germaine, Ethel M. Hale, Cleva Carson, Julia Mahoney.

Warren County—O. E. Smith, Ella Ford Miller, Mrs. Mae Goldizen, Prof. Chas. Deich, Dr. M. A. Honline, Rabbi Eugene Mannheimer, Prof. R. Ernesti. Washington County—Clara M. Wallace, Prof. Fred D. Crom, Mae Schrieber, Jeanette Hart, Supt. J. H. Krenmyre, Supt. W. C. Harding, Dr. F. C. Ensign, Mrs. Elizabeth B. Schmidt, Bertha Hay.

Wayne County-Ava Amenell, Anna D. Cordts, Eva Burnet, L. A. Blezek, F. Q. Stewart.

Webster County—Anna A. Johnson, Dr. W. A. Jessup, Dr. Arthur Holmes, Mrs. L. M. Fetherstone, Dr. C. E. Germane, Thomas J. Kirby, Himenia Hoffman, J. F. Overmeier.

Winnebago County—Jessie M. Parker, C. E. Germane, Fredrica Shattuck, R. B. Hyten, M. G. Clark.

Winneshiek County—Gertrude M. Crane, Flora Bergerson, George Crocker, David Earl, W. G. Brooks, Mr. Gaston, Mr. Brent.

Woodbury County—J. F. Garnes, L. V. Koos, W. N. Ferris, L. C. Good, M. G. Clark, Fannie Foster, Mrs. I. Z. Hillis, Mira E. Mills, Helen James.

Worth County—Nora M. King, Chas. Meyerholz, C. A. Fullerton. Wright County—Blanche Bock, Grace Shields, Fredrica Shattuck, John Barnes, Earl Roadman, H. Y. Moffett, Effie Schuneman.
