IOWA PROSPECTIVE PLANTINGS

The annual *Prospective Plantings* report published by USDA National Agricultural Statistics Service is based on the voluntary responses from nearly two thousand Iowa producers. Data collection began February 28, with final interviews completed on March 19. This report provides an indication of the acres farmers intend to plant. Actual plantings will depend greatly upon weather, economic conditions and the availability of production inputs at the time producers must make their final planting decisions.

Corn: As of March 1, Iowa farmers intend to plant 14.6 million acres of corn for all purposes in 2012. This is up 500,000 acres from 2011 and, if realized, would be the largest planted acreage on record. The previous record, 14.4 million acres, was set in 1981.

Soybeans: Producers intend to plant 8.80 million acres of soybeans in Iowa this year, down 6 percent from 2011. If realized this would be only the second time in 18 years Iowa farmers will plant less than 9.00 million acres of soybeans.

Oats: Farmers intend to plant 130,000 acres of oats for all purposes, up 10,000 acres from last year's record low. If realized, this would be the second smallest acreage on record.

All Hay: Farmers in Iowa expect to harvest 1.15 million acres of hay for the 2012 crop year, up 10,000 acres from last year. If realized, this will be the second lowest in state history, trailing only 1.14 million acres last year.

IOWA GRAIN STOCKS

Iowa corn stocks in all positions on March 1, 2012 totaled 1.29 billion bushels, up 1 percent from last year according to the USDA National Agricultural Statistics Service – *Grain Stocks* report. Of the total stocks, 57 percent were stored on-farm. The December 2011 - February 2012 indicated disappearance totaled 666 million bushels, 5 percent more than the 636 million bushels used during the same period last year.

Iowa soybeans stored in all positions on March 1, 2012 totaled 295 million bushels, up 20 percent from the 246 million bushels on hand March 1, 2011. Of the total stocks, 41 percent were stored on-farm. Indicated disappearance for the December 2011 - February 2012 period was 128 million bushels, 9 percent less than the 141 million bushels used during the same quarter last year.

Iowa oat stocks stored in all positions on March 1, 2012 totaled 7.82 million bushels, up 15 percent from the 6.78 million bushels on hand March 1, 2011. Of the total stocks, 14 percent were stored on-farm.

IOWA HOGS & PIGS

On March 1, 2012 there were 19.7 million hogs and pigs on Iowa farms according to the USDA National Agricultural Statistics Service – *Hogs and Pigs* report. The March 1 inventory was up 4 percent from a year ago and became the highest March 1 inventory on record.

The December 2011-February 2012 pig crop was 4.94 million head. A total of 480,000 sows farrowed with an average litter size of 10.3 pigs per sow.

As of March 1, producers planned to farrow 485,000 head of sows and gilts in the March-May 2012 quarter. Farrowing intentions for the June-August 2012 period were estimated at 480,000 as of March 1, 2012.
