ITEM NO.1 2102-2710070 EXCAVATION, CLASS 10, ROADWAY AND BORROW
No shrink factor (0% Shrink) was applied to the fill from the earthwork calculations. The contractor will need to determine the shrink factor based on the properties of the soil that is available from their borrow site and calculate the amount of additional material required to get the compacted in place fill quantity in the plan and bid it as such. Standard Specification 2107 for the construction of embankments is required.
