## Executive Summary

- Drug crimes were the most common type of offense for which inmates were incarcerated at mid-year 2000. About 21% of inmates statewide were serving time for a drug crime as their most serious offense. Among female inmates, the percentage of drug offenders was higher; nearly 31% of female inmates housed at Mitchellville or Mt. Pleasant on June 30, 2000 were serving time for a drug crime as their most serious offense.
- During the past five years, drug offenders in prison have more than doubled, growing from 773 inmates in 1995, to 1,611 inmates at mid-year 2000.
- As of mid-year 2000, there were 512 inmates serving life sentences (this count includes some compact prisoners housed in Iowa at the time). This population has grown by 109 offenders over the past five years.
- The number of inmates serving mandatory minimum terms declined during the past year, from 1,632 inmates in 1999, to 1,279 inmates at mid-year 2000.
- Female inmates made up about 8% of the statewide inmate population at mid-year 2000, up from 7% five years ago. While the male inmate population increased by 33% over the past five years, the female inmate population increased by nearly 53%.
- Regarding race/ethnicity, about 68% of all inmates were Caucasian (non-Latino); about 24% were African-American; about 5% were Latino; about 2% were Native American, and about 1% were Asian. Although the number of African-Americans in the Iowa prison system has increased, their proportion of the inmate population has declined slightly compared with five years ago, when 26% of all inmates were African-American. However, during the same period, the proportion of Latino, Native American and Asian offenders in prison have increased, from 5% of all inmates in 1995 to about 8% of all inmates at mid-year 2000.
- While offenders aged 35 and younger represent the majority of inmates, the proportion of prisoners in this age group has declined over the past five years. The proportion of offenders aged 36 through 60, however, has increased, from 28% of all inmates in 1995 to 37% of inmates at mid-year 2000. These trends may be attributed to larger demographic factors within society, namely, the aging of the “baby boomers”.

## Introduction

This report was compiled at the request of the Department of Corrections. The statewide analysis of Iowa's prison population at mid-year (June 30) 2000 includes the following information:

- Type of Most Serious Offense (e.g., arson, assault, burglary, etc.)
- Offense Class of Most Serious Offense
- Sex
- Race/Ethnicity
- Age (median, or middle value)
- Inmate Custody Scores (median value)
- Educational Level (average)
- Reading Scores (average)

The statewide population analysis contains a comparison with prior years. Following the statewide section are *Facility Profiles* that examine each Department of Corrections institution. The facility profiles cover much of the same types of information as the statewide analysis.

## Data Sources

The information in this report was derived from two sources:

- Adult Corrections Information System (ACIS), compiled by the Division of Criminal and Juvenile Justice Planning (CJJP)
- E-1 Reports, compiled by the Department of Human Services

*Please note that the statewide E-1 Reports omit Iowa inmates housed out of state. Also, inmate populations as compiled by CJJP may differ from data in the E-1 Reports by a few offenders.*

Regarding the latter, this small discrepancy is likely due to the different times at which the ACIS database was accessed by the respective agencies for reporting purposes.

Data obtained from the E-1 Reports include age, average educational level, and average reading scores. Median custody scores were calculated by CJJP based on information provided in the E-1 Reports.

Data developed by CJJP from the Adult Corrections Information System focused primarily on descriptions of inmates' most serious offenses; race/ethnicity data (statewide and by facility) were also compiled from this source.

Please note that displayed percentages for various breakdowns (e.g., offense type, offense class, etc.) may not add up to 100% due to rounding.

## Terms & Definitions

### Inmate Custody Scores

Inmate custody scores are calculated via the Department of Corrections' Inmate Custody Classification System, and are used to determine whether a given inmate should reside in a minimum, medium or maximum security setting. Scores are associated with particular security levels as follows:

<b>Custody Score</b>	<b>Security Level</b>
0-5	Minimum
6-10	Medium
11+	Maximum

*Iowa Offense Classes & Notations*

Iowa offenses are generally classified as felonies or misdemeanors. There are five levels of felonies and three levels of misdemeanors, each carrying one or more distinct maximum penalty.

Felony offense class levels are lettered A through D, with an “other felony” category containing Habitual Offender sentences, a number of drug offenses (e.g., those carrying penalty enhancements) and sexual predators sentenced under Chapter 901A, *Iowa Code*.

Misdemeanor offense classes include aggravated, serious and simple misdemeanors. Misdemeanants may be incarcerated within the state prison system if the total maximum sentence imposed exceeds one year (otherwise offenders must serve their terms in county jails).

The chart and following notes explain the various offense codes used throughout this report:

<b>Code</b>	<b>Explanation</b>	<b>Maximum Penalty</b>
A Fel	Class A Felony	Life w/o Parole
BF-85%	Class B Felony: 902.12	25 yrs.
B Fel	Class B Felony	25 yrs./50 yrs.
CF-85%	Class C Felony: 902.12	10 yrs.
C Fel	Class C Felony	10 yrs.
D Fel	Class D Felony	5 yrs.
OF-85%	Sexual Predator: 901A; Habitual Offender: 902.12	varies
O Fel	Other Felony	15 yrs./varies
Misd	Misdemeanor	1+ yr./2 yrs.
Viol	Violator Program Participant	---
Other	Interstate Compact Prisoner; Safekeeper; Federal Prisoner	---

*902.12 Offenders.* Offenders committing certain forcible felonies enumerated in this section of the *Iowa Code* earn much less “good time” than other sentenced offenders do. “BF-85%” offenders must serve a minimum of 85% of 25-year terms, with the exception of those sentenced to Murder-2nd degree, who must serve a minimum of 85% of 50-year terms. “CF-85%” offenders are serving a minimum of 85% of 10-year terms for Robbery-2nd degree. Those convicted of being an habitual offender by way of Robbery-2nd degree are included in the “OF-85%” category.

*901A Offenders.* Certain repeat sex offenders sentenced under this section of the *Iowa Code* must serve a minimum of 85% of their enhanced maximum terms. Most of the “OF-85%” offenders are sexual predators sentenced under this section. Maximum penalties (and associated time served) vary for this group, ranging from two to fifty years.

Violator Program Participants. This group consists of probationers, parolees and work releaseses whose community supervision is temporarily suspended for the purpose of participating in the state's Violator Program. The Violator Program provides a short-term (60-day) incarceration option and treatment for offenders who fail to abide by the conditions of community supervision.

### Offense Types

The various felonies and misdemeanors may be classified according to the type of offense committed, as follows:

- Arson
- Assault (includes Chapter 708 offenses as well as similar offenses in other Code sections, such as child endangerment and tampering with a witness)
- Burglary
- Drug Crimes
- Escape/Flight (includes voluntary absence and failure to appear)
- Forgery/Fraud
- Kidnapping
- Murder/Manslaughter
- OWI/Traffic Offenses
- Prostitution/Pimping
- Robbery (includes extortion)
- Sex Crimes (includes Chapter 709 offenses as well as similar offenses in other Code sections, such as incest and sexual exploitation of minors)
- Theft
- Vandalism
- Weapons Offenses (includes Chapter 724 offenses involving illegal weapons possession and trafficking; it excludes offenses involving the use of weapons in serious crimes)
- Other Offenses (includes conspiracy, solicitation to commit crimes, aiding and abetting, public intoxication, abandonment or neglect of dependent persons, and other offenses not readily classifiable in the above categories)

The above offense types may be grouped within six general categories, as follows:

- Violent: assault, kidnapping, murder/manslaughter, robbery and sex crimes
- Property: arson, burglary, forgery/fraud, theft and vandalism
- Drug: drug offenses
- OWI/Traffic: OWI/traffic offenses
- Weapons: weapons offenses
- Other: escape/flight, other crimes and prostitution/pimping

### Most Serious Offense

If an offender is incarcerated for more than one offense, the most serious offense is the offense with the longest maximum sentence length. If there are more than one such qualifying offense, then the most serious offense is determined by selecting the crime against persons over the crime not against persons.
