

2016-2020 IOVVA TRANSPORTATION IMPROVEMENT PROGRAM

Dear Iowans:

Transportation powers the creation of wealth in our nation and state unleashing opportunity for economic activity. Iowa's economy is dependent on a robust and diverse transportation system to move products to a global marketplace. Iowa's transportation system has long provided our state's businesses a competitive advantage and that remains true today in the global economy.

The Iowa Transportation Improvement Program (Program) is published to inform you of planned investments in our state's multimodal transportation system including aviation, public transit, railroads, trails, and highways. A major component of the Program is the highway program, and this Program includes historic advances in the investment of funding to improve state roads and bridges.

The Iowa Transportation Commission (Commission) is especially pleased this year to highlight the additional highway and bridge work which can now be accomplished due to the action of the Legislature and Governor Terry E. Branstad in passing and signing into law increased transportation funding. As directed by the legislation, 100 percent of the additional revenue allocated to the Iowa Department of Transportation (DOT) will be spent on road and bridge projects that are critical to maintaining Iowa's transportation infrastructure and create opportunities for expanded economic activity. A list of projects able to be funded due to Senate File 257 is included at the end of this Program.

In the FY 2016-2020 highway program, approximately \$3.2 billion is forecast to be available for highway right of way and construction. In developing the highway program, the Commission's primary investment objective remains stewardship (i.e. safety, maintenance and modernization) of lowa's existing highway system. Over \$1.3 billion is programmed in FY 2016 through FY 2020 for modernization of lowa's existing highway system and for enhanced highway safety features. In addition, the Commission was able to add construction for four-lane improvements to U.S 20, U.S. 30 and U.S. 61 – the first time in years that additional corridor work has been able to be added to the Program. Several significant one or two year projects have also been added to the highway program that addresses safety and condition needs. The Commission remains committed to previous highway programming actions by maintaining the schedules of all large multiyear corridor improvement projects.

The Commission and Iowa DOT continue to recognize the critical importance of an effective and efficient Interstate highway system. The Interstate highways connect all transportation systems in Iowa and allow major freight movements to occur delivering Iowa products to world marketplaces. The highway section includes significant interstate investments on I-29 in Sioux City, the I-74 Mississippi River Bridge replacement in Bettendorf, and the I-80/I-29 system in Council Bluffs. Along with these important Interstate projects, the Commission has also increased yearly investments in Interstate stewardship improvements across the state.

A large part of funding available for highway programming comes from the federal government. Accurately estimating future federal funding levels is dependent on having a multiyear federal transportation authorization bill. The current authorization, Moving Ahead for Progress in the 21st Century (MAP-21), was signed into law on July 6, 2012. However, it is a short-term authorization that has been extended to July 31, 2015. Continued federal funding is uncertain after this date.

Each year, members of the Commission and Iowa DOT meet with Iowa's Congressional delegation and U.S. DOT to discuss transportation issues. A major topic discussed is the importance of a long-term federal transportation bill and the solvency of the current federal Highway Trust Fund (HTF). Approximately half of the funding available for programming in FY 2016-2020 could be impacted by the solvency of the federal HTF. If Congress does not act, the Commission will decide which projects will be rescheduled based on statewide equity, length of time a project has been considered for programming, how many times a project has been rescheduled, purpose of a project, whether the project is already underway, local efforts to move forward on a project, and current conditions and need for the project.

The lowa DOT and Commission appreciate the public's involvement in the state's transportation planning process. Comments received personally, by letter, e-mail or through participation in the Commission's regular meetings or public input meetings held around the state each year are invaluable in providing guidance for the future of lowa's transportation system.

It should be noted that this document is a planning guide. It does not represent a binding commitment or obligation of the Commission or lowa DOT, and is subject to change.

You are invited to visit the lowa DOT's website at iowadot.gov for additional and regular updates about the department's programs and activities.

Respectfully.

Federal and state laws prohibit employment and/or public accommodation discrimination on the basis of age, color, creed, disability, gender identity, national origin, pregnancy, race, religion, sex, sexual orientation or veteran's status. If you believe you have been discriminated against, please contact the lowa Civil Rights Commission at 800-457-4416 or lowa Department of Transportation's affirmative action officer. If you need accommodations because of a disability to access the lowa Department of Transportation's services, contact the agency's affirmative action officer at 800-262-0003.

Iowa Transportation Policy

Goal: The transportation goal for lowa is to provide adequate, safe and efficient transportation services to the public.

Policy

A. General

- 1. Promote a safe transportation system that addresses user needs, and maximizes economic and social benefits for lowans.
- 2. Provide for a participatory planning process which: (a) involves public, private and citizen interests; (b) encourages complementary transportation and land development patterns; and (c) gives consideration to the effects of transportation on the state's natural, cultural, human, and economic resources.
- 3. Encourage and support programs to provide commodity movement and mobility for all lowans.
- 4. Develop, promote, administer, and enforce just and equitable policies and procedures for the registration, regulation and operation of motor vehicles, aircraft, and common carriers of passengers and freight.
- 5. Promote financing of the transportation system through user and nonuser sources in an equitable manner, including public and private cost-sharing partnerships where government and the private sector share in the responsibility for transportation planning and development, and for service and facility improvements.
- 6. Administer the land and resources under its jurisdiction in a manner that both protects the rights of individuals and gives consideration to the effects of its activities on the environment.
- 7. Encourage and support an intermodal transportation system by identifying, improving and/or facilitating points of transfer between modes.
- 8. Promote a transportation research and technology transfer program to develop and improve services, methods and materials.

B. Plan

- 1. Develop a transportation system plan, which:
 - Considers all transportation modes as interacting elements.
 - Considers facilities and services necessary for person and commodity movement from origin to destination.
 - Contributes to the development and implementation of a comprehensive state plan.
 - Exerts a positive influence on social, economic, environmental, and aesthetic values.
 - Provides safe and convenient travel opportunities.
 - Minimizes economic, energy and environmental costs.
 - Coordinates available federal, state and local resources.
 - · Recommends appropriate investment and funding procedures.
 - Makes the best use of land resources for permanent transportation use.
 - Encourages more efficient use of energy resources.
 - · Fosters usage of technological advancements in transportation facilities.
 - Evaluates progress toward achievement of the goal contained in this policy.
- 2. Encourage and assist in the development, preservation, maintenance, improvement, and efficient use of all transportation systems, including:
 - · General aviation, airport facilities and air carrier services.
 - Highway transportation systems and services, including accessibility for commercial and industrial economic development throughout lowa.
 - · Public transit systems and services.
 - Railroad transportation systems and services.
 - River transportation.
 - Multiuse trails and corridors for transportation, recreation and tourism.
- 3. Develop and participate in programs to improve the safety of transportation systems.
- 4. Encourage and support development of transportation education programs.

C. Program

1. Annually prepare a program of capital investment, services and regulatory practice.

Aviation Program

Aviation Program

The lowa DOT's Office of Aviation maintains and develops lowa's air transportation system through advocacy, planning, technical assistance, and the administration of state and federal funding programs.

Additional Office of Aviation functions include annual certification of public-use general aviation airports, administration of the aircraft registration program, production of a statewide airport directory and aeronautical chart, and the development of various educational and safety programs.

Each year, the Iowa Transportation Commission approves annual funding allocations for the State Aviation Program. Components of the program include:

Airport Improvement Program (AIP) - funds aviation safety programs and aviation planning and development projects.

Aviation Safety Programs include Immediate Safety Enhancements and Wildlife Mitigation programs. Airports may apply for grants on an asneeded basis while funding is available. The percentage of local match required for the projects varies by type of program.

Aviation Planning and Development includes airfield and security projects at public-owned airports, airport land use planning, required match for federally funded statewide studies, and air service development funds for commercial service airports. The percentage of local match required for projects varies, depending on the type of project.

Airfield and security projects include: land acquisition; runway, apron and taxiway preservation and construction; access control; planning studies; airport lighting; fuel facilities; and, installation of visual navigational and communication aids.

Automated Weather Observing System (AWOS) - provides a network of aviation weather reporting stations at 43 airports throughout the state, providing essential real-time weather information to pilots.

The majority of AWOS sites were installed with assistance from the federal airport program. The State Aviation Program provides operational maintenance and transfer of data into the national system, which enables a broad access to the information for aviation and weather-forecasting needs.

Runway Marking Program - funds safety critical runway, taxiway, and apron markings that provide key operational information to pilots on the ground and from the air. Markings include runway numbers, touchdown markings, hold lines, and center lines. Airport marking projects are identified by the lowa DOT and are conducted annually based on need and available funding.

Windsocks - supplied to public-use airports and hospital heliports to provide important visual information for pilots regarding wind direction and speed prior to takeoff and landing. Windsocks are subject to weathering and need to be replaced every one to two years.

General Aviation Vertical Infrastructure (GAVI) Program - provides funding for landside development projects such as terminal, hangar, and fuel-facility construction and/or renovation at public-owned general aviation airports.

Commercial Service Vertical Infrastructure (CSVI) Program - provides funding for land side development projects such as terminal, hangar, maintenance and fuel-facility construction, and/or renovation at commercial service airports.

These funds are divided among the commercial service airports by a 50/40/10 formula. One-half of the funds are allocated equally among the airports, 40 percent of the funds are allocated based on the percentage of enplaned passengers at each airport versus the total number of enplaned passengers in the state, and 10 percent of the funds are allocated based on the percentage of the air cargo tonnage at each airport versus the total tonnage in the state.

Federal AIP funding is available to airports that are part of the National Plan of Integrated Airports System. Administered by the Federal Aviation Administration (FAA), the AIP provides funds for projects to improve infrastructure including runways, taxiways, noise control land purchases, navigational aids, and safety. There are 78 airports in Iowa that are eligible for federal funding.

lowa is a channeling state, which means that general aviation airports that are eligible for federal funds and small commercial service airports with fewer than 10,000 annual passenger boardings are required to submit pre-applications for the AIP to the lowa DOT's Office of Aviation. Pre-applications are submitted in January, and forwarded to the FAA in February after the Commission has approved prioritization of the pre-applications. Applications are then prioritized by the FAA and a program for the next federal fiscal year is developed.

For additional information, visit the Iowa DOT's Office of Aviation website at www.iowadot.gov/aviation, or by calling 515-239-1691.

Aviation Funding Summary

Maquoketa	Taxilane drainage improvements	\$ 57,160	\$ 48,586
Milford	Rehabilitate airfield pavement, recycle existing runway in place with bituminous overlay and re-		
	markings	\$ 309,000	\$ 217,000
Muscatine	Construct a connector road between hangar access road and T-hangars	\$ 164,640	\$ 139,944
Newton	Construct stormwater detention	\$ 128,000	\$ 108,800
Osceola	Terminal area pavement improvements	\$ 126,810	\$ 107,788
Red Oak	Construct new six-unit T-hangar and hangar taxilanes	\$ 232,000	\$ 167,000
Sioux County Regional	Design of an fixed-base operator maintenance facility (conventional hangar), terminal building,		
	three 10-unit T-hangars	\$ 150,000	\$ 127,500
Winterset	Runway 32 end runway protection zone and 20-foot building restriction line navigation easement	nts \$ 66,175	\$ 56,248
TOTAL		\$ 3,521,760	\$ 2,357,770

Public-Owned Airports

Transit Program

Transit Program

The lowa DOT's Office of Public Transit promotes a public transportation system that meets the needs of lowans through advocacy, technical assistance, and administration of state and federal financial assistance to lowa's 35 local public transit systems. The office is responsible for administering all of the state transit programs, plus all federal transit assistance for regional and small urban transit systems, and intercity bus carriers, and most of the federal non-formula projects for transit systems serving lowa's urbanized areas. Planning projects are administered for the state's metropolitan planning organizations and regional planning affiliations by the department's Office of Systems Planning.

State Transit Assistance (STA) – lowa devotes four percent of the fees for new registration collected on sales of motor vehicle and accessory equipment to support public transportation. Most of the money is distributed by a formula based on each transit system's performance during the previous year in terms of ride, miles, and local funding support. These formulas funds can be used to support any operating, capital, or planning expenses related to the provision of public passenger transportation. Up to \$300,000 of each year's STA funds are available for technical training and other projects to improve public transit in lowa. Estimated STA receipts for FY 2016 are projected to be \$13,951,000.

Public Transit Infrastructure Grant Program – This program is based on an annual appropriation. It is typically at or close to \$2.0 million. The purpose of the program is to provide funding for improvement of the vertical infrastructure of lowa's designated public transit systems. These funds are available on a competitive basis. Program funds may reimburse up to 80 percent of transit-related costs, with at least 20 percent of transit-related projects costs derived from local sources.

The Federal Transit Administration (FTA) is a unit of the U.S. Department of Transportation that administers a number of programs offering financial support for local public transportation. All FTA programs providing assistance to lowa transit systems are funded through the 2.86 cents per gallon of the federal motor fuel tax dedicated to transit. When FTA funds are used for support of operating costs, the FTA participation is limited to 50 percent of the net project cost. When used for capital improvements, the FTA participation is normally limited to 80 percent of net cost, but can go to 90 percent for specific features required for compliance with the American with Disabilities Act or the Clean Air Act, or 85 percent for purchase of rolling stock equipped with such features. When used for planning, the FTA participation is limited to 80 percent.

Section 5305(d) "Metropolitan Planning Program" - These FTA funds come
to lowa based on the number of individuals living in urbanized areas (over
50,000 population) compared to other states. Iowa uses these funds to
support intermodal transportation planning activities in urbanized areas by
metropolitan planning organizations.

- Section 5305(e) "Statewide Transportation Planning Program" These FTA funds come to lowa based on the number of individuals living in urbanized areas (over 50,000 population) compared to other states. A minimum allocation provision assures all states receive a portion of the available funds. Funds may be used to support intermodal transportation planning activities anywhere in the state. Iowa uses these funds, along with part of the nonurbanized formula funding, to support intermodal transportation planning activities in urbanized areas by regional planning affiliations.
- Section 5307 "Urbanized Area Formula Program" These FTA funds for areas with populations between 50,000 and 199,999 are apportioned to the state on the basis for the collective population and population density of the urbanized areas along with a factor for low-income populations. The department suballocates them using the same formula. In areas with a population of 200,000 or more, the FTA directs allocations, using the same formula, plus additional performance-based factors. Funds may be used to support transit capital, maintenance, planning and job access reverse commute activities in all urbanized areas, and general operations in areas under 200,000 population. Operating costs are allowed, up to certain limits, for areas over 199,999 in population.
- Section 5339 "Bus and Bus Facilities Formula Grants" These FTA funds are apportioned to lowa based on a statutory formula. They may be used only for capital projects to replace, rehabilitate and purchase revenue vehicles, related equipment and construct bus-related facilities. Match for FTA funds must be from non-federal sources.
- Section 5310 "Enhanced Mobility of Seniors and Individuals with Disabilities Program" These FTA funds come to lowa on the basis of the number of seniors and individuals with disabilities within the state compared to other states. Not less than 55 percent of these funds can be used to support the capital costs (including costs of contracted services) of transit services that predominantly serve seniors or individuals with disabilities. The remaining 45 percent maybe used for projects that exceed ADA requirements; improved access to fixed-route service and decrease reliance by individuals with disabilities on complementary paratransit; or alternatives to public transportation that assist seniors and individuals with disabilities. In lowa, areas with a population of more than 200,000 receive direct apportionments The State administers all funding for areas under 200,000 in population. Match for the FTA funding may come from non-DOT federal funds, as well as from non-federal sources.
- Section 5311 "Formula Grants for Rural Areas Program"- These FTA funds come to lowa on the basis of the number of lowans who live outside urbanized areas, non-urbanized land area and low-income populations, compared to other states. The funds may be used to support the cost of transit operations or capital, planning or job access reverse commute

activities in non-urbanized areas where the population is less than 50,000. Match for the FTA funding may come from non-DOT federal funds, as well as from non-federal sources. Federal law requires that 15 percent of the funds be used for support of intercity bus projects.

Federal Flexible Transportation Funding - These federal funds may be "flexed" to fund public transit, roadway, or bicycle/pedestrian projects. When programmed for transit projects, these funds are transferred to the FTA and administered under the rules of one of the FTA programs, except that the matching requirements remain as legislated for the specific flex-funding program.

- Surface Transportation Program (STP): These are federal funds that
 may be "flexed" to fund public transit capital projects, roadway, or trail
 projects with an 80 percent federal participation limit, and match required
 to come from non-federal sources. In lowa, about half of these funds are
 programmed by local governments acting through metropolitan or regional
 planning agencies. When programmed for transit projects, these funds are
 transferred to the FTA and administered the same as Section 5307 or 5311
 funds, depending on whether an urbanized or non-urbanized transit system
 is the project sponsor.
- lowa's Clean Air Attainment Program This is a state program which
 commits federal funds to address the federal congestion mitigation and air
 quality program. This program allows "flexing" of funds to transit, roadways,
 or trails. Iowa receives a minimum allocation of these funds because it
 does not have any areas in violation of federal air-quality standards. These
 funds can be used for any purpose that STP funds can be used for, plus

- certain start-up operating costs for transit and rideshare projects. Federal participation is limited to 80 percent (including for net start-up operating costs), and match must be from non-federal sources. In lowa, funds are programmed based on a statewide application process that selects projects based on their anticipated air quality or congestion relief benefits. When programmed for transit projects, these funds are transferred to the FTA and administered through statewide grant by the Office of Public Transit, using the rules of either the 5307 or 5311 program, depending on whether an urbanized or non-urbanized transit system is the project sponsor.
- Congestion Mitigation and Air Quality Improvement Program This is a state program which commits federal funds toward the backlog of transit revenue vehicle replacement. This program allows "flexing" of funds to transit. Iowa receives a minimum allocation of these funds because it does not have any areas in violation of federal air-quality standards. These funds can be used for any purpose that STP funds can be used for. Federal participation is limited to 80 percent and match must be from nonfederal sources. The funds are programmed based on the Public Transit Management System process that selects projects based on their useful life thresholds of miles and age. These funds are transferred to the FTA and administered through statewide grants by the Office of Public Transit, using the rules of either the 5307 or 5311 program, depending on whether an urbanized or non-urbanized transit system is the project sponsor. In FFY 2013, the lowa Transportation Commission allocated \$3.0 million annually toward bus replacement projects.

For additional information, visit the Iowa DOT's Office of Public Transit website at www.iowadot.gov/transit, or by calling 515-233-7870.

Public Transit Funding Summary

Program	Federal	State	Other	Total
State Transit Assistance (FY 2016)	\$ 0	\$ 13,951,761	\$ 0	\$ 13,951,761

Railroad Program

Railroad Program

The Iowa DOT's Office of Rail Transportation encourages and assists with the development and maintenance of a safe, efficient and economical railroad transportation system. Toward that end, the office administers programs that:

- Enhance safe track conditions through routine track inspections.
- Advocate for policies and practices that benefit the rail transportation system.
- Promote the rail transportation system as a component of a balanced, statewide transportation system.

The **Highway-Railroad Crossing Safety Program** promotes public safety at rail crossings and near rail lines throughout the state. The federally-funded program participates in the cost of safety improvements at public highway-railroad crossings. These funds are used to install or upgrade crossing signal devices, and provide low-cost improvements, such as crossbucks and yield signs, increased sight distance, increased signal lens size or crossing closures. Funding is based on a benefit/cost calculation that considers a number of factors, including highway and train traffic, accident history and project cost.

A railroad or roadway jurisdiction must apply for a project annually by July 1 to be considered for funding. The federal-aid safety fund provides 90 percent of the cost of the automatic warning devices.

The **Highway-Railroad Crossing Surface Repair Program** promotes public safety at highway-rail crossings throughout the state. The program participates in the cost of surface replacement at public highway-railroad grade crossings.

The annual allocation of \$900,000 from the Road Use Tax Fund pays 60 percent of the cost of the replacement, with the roadway jurisdiction and railroad each paying 20 percent. Applications must be submitted jointly by railroads and highway authorities to be considered for funding. Eligible projects are programmed in the order applications are received by the lowa DOT.

A decision will be made annually if federal-aid safety funding is used to rebuild public highway-railroad crossings with higher train and vehicle traffic. Federal funds pay for 60 percent of the project cost, with the roadway jurisdiction and railroad each paying 20 percent. Projects are selected from the applicants for the state-funded surface repair program.

Funding from Iowa's Primary Road Fund is used annually to rebuild highwayrailroad crossing surfaces on the Primary Road System. This allows federal and state surface repair funds to be utilized on city and county projects.

The Railroad Revolving Loan and Grant Program assists business and industry to improve rail infrastructure. The program helps finance, through loans and grants, construction or expansion of rail connections (e.g., sidings, switches, etc.) and railroad rehabilitation or expansion. Rail loan repayments and state appropriations fund the program. Applications may be submitted at any time and are evaluated as funding becomes available.

For additional information, visit the lowa DOT's Office of Rail Transportation website at www.iowadot.gov/iowarail, or by calling 515-239-1140.

State and Federal Trails Programs

State Recreational Trails Program

The State Recreational Trails Program provides funds to establish transportation and recreation trails in lowa for the use and enjoyment of the public. Eligible applicants include state and local government agencies, municipal corporations, counties, and nonprofit organizations. Private organizations must have a governmental agency as a co-sponsor. The program is restricted to the acquisition, construction or improvement of trails open for public use, or trails that will be dedicated to public use when completed. A proposed trail project must meet the following requirements.

- The project must be part of a local, area-wide, regional or statewide plan.
- The trail route must be designed to allow enjoyment of scenic views or points of historical interest, and maximize safety.
- The project must include a contribution of at least 25 percent matching funds from other sources. This match cannot include grants from other state agencies or provisions of in-kind services.

The deadline for applications is July 1 of each year, depending on funding availability.

Applications are evaluated primarily using the following criteria.

- Need, in terms of population to be served and existing trails in the area (25 points)
- Compatibility with local, area-wide, regional or statewide plans (15 points)
- · Benefits of multiple uses and recreational opportunities (20 points)
- Quality of the site (25 points)
- · Economic benefits to the local area (10 points)
- · Special facilities for disabled users (5 points)

Fifty-seven applications were received by the July 1, 2014, deadline. An additional four applications were received by the January 2, 2015, deadline required to fully commit a \$1 million allocation for refurbishing bridges for trail use that have documented historical and architectural significance. The applications represented total project costs of \$60,709,519 with \$28,637,239 requested from the State Recreational Trails Program. Thirteen projects were approved by the Commission for a total state commitment of \$6,014,307. The total cost for the approved projects is estimated to be \$18,703,810.

For additional information, visit the Iowa DOT's Office of Systems Planning website at www.iowadot.gov/systems_planning/fedstate_rectrails.htm, or by calling 515-239-1664.

Federal Recreational Trails Program

The Federal Recreational Trails Program is a program of the U.S. Department of Transportation's Federal Highway Administration that provides funding for both motorized and nonmotorized trail projects.

The Federal Recreational Trails Program funding represents a portion of the revenue received by the federal Highway Trust Fund from the federal motor fuel excise tax paid by users of off-road recreational vehicles, such as snowmobiles, off-road motorcycles, all-terrain vehicles, and off-road light trucks.

Funding Distribution - State Level - Each state administers its own program and establishes its own procedures to solicit and select trail projects for funding. Iowa has chosen to have applications for funding assistance postmarked by October 1.

States may use up to seven percent of their funds for administrative costs and up to five percent of their funds for education. The remaining funds are for projects from the following categories.

- Maintaining existing trails, including grooming trails across snow
- · Restoring damaged trails or areas damaged by trail-related use
- Providing trail access for people with disabilities
- · Developing trailside or trailhead facilities
- Purchasing or leasing equipment for trail construction, maintenance, or grooming
- · Acquiring easements or property for trails
- · Constructing new trails

States may provide grants to city and county governments, and other government entities, including federal agencies and special government districts.

lowa has established a minimum \$5,000 grant amount. Iowa does not have a maximum allowable grant amount. The maximum federal share for each project is 80 percent. The remaining amount may come from federal, state, local or private funding sources. Other select federal funding sources may be used as matching funds. In-kind materials and services may also be permitted toward the project match.

Nineteen nonmotorized and two motorized applications were received by the October 1, 2014, deadline. The applications represented total project costs of \$16,616,123, with \$8,083,574 requested from the Federal Recreational

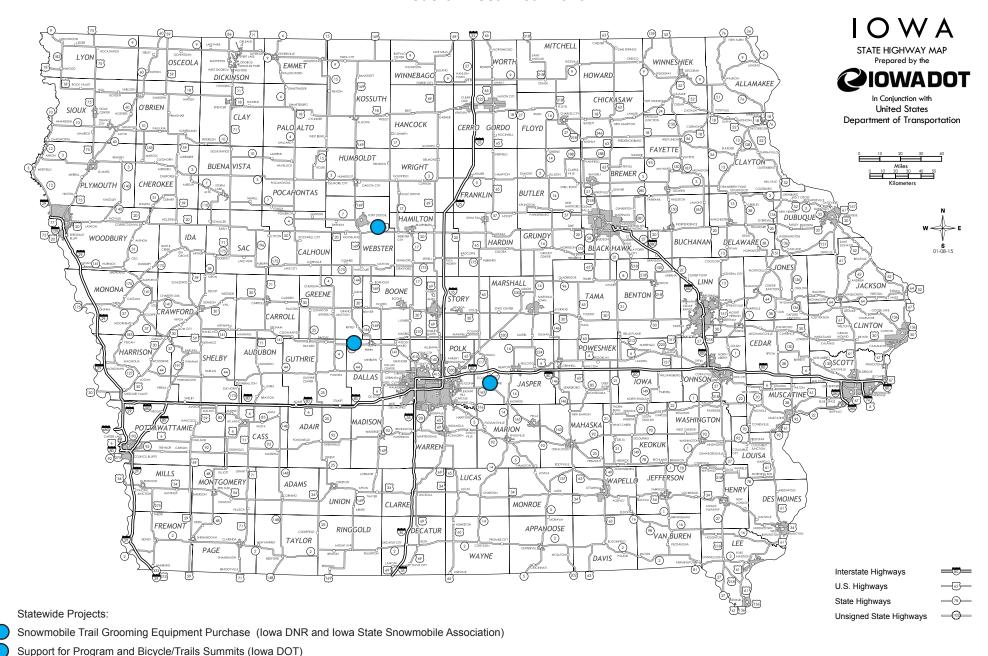

Trails Program. Six projects were approved by the Commission for a total commitment of \$1,304,133. The total cost for the approved projects is estimated to be \$2,159,278.

For additional information, visit the Iowa DOT's Office of Systems Planning website at www.iowadot.gov/systems_planning/fedstate_rectrails.htm, or by calling 515-239-1664.

Revitalize lowa's Sound Economy (RISE)

Revitalize Iowa's Sound Economy (RISE)

The RISE Fund was created in 1985 to promote economic development in lowa through construction or improvement of roads and streets. The fund is designed to target value-adding activities, provide maximum economic benefits, emphasize local involvement and initiative, and address situations requiring an immediate response and commitment of funds. RISE currently receives approximately \$41 million annually. City and county governments can apply for the city and secondary road RISE funds. Primary road RISE funds are deposited in the Primary Road Fund for use on the Commercial and Industrial Network.

When the RISE Fund was established, an amount equal to one cent per gallon of taxable fuel was designated for RISE improvements on the primary road system. An equal amount, split evenly, with ½ cent each for city streets and secondary roads was also allocated to the RISE Program. However, over the last 25 years, the legislature has on two occasions modified how the RISE revenues for secondary roads are allocated. Currently, half of the secondary road RISE revenues are directly allocated to the Secondary Road Fund and the remaining half are allocated to secondary road RISE projects.

RISE funding assists the efforts of local communities to attract industries to lowa, as well as expand existing ones. Since its beginning, RISE has assisted in creating or retaining more than 60,558 jobs. In addition, many other jobs may be created as new and expanding industries take advantage of land that is opened up for development with the help of RISE funding.

Several factors must be considered when evaluating RISE applications. These factors include the effect on competition, economic impact to the state, quality of jobs to be assisted, and a business record of law violations.

There are two types of projects considered under the RISE Fund with the city street and secondary road funds.

Immediate Opportunity Projects - This category is reserved for projects related to an immediate, nonspeculative opportunity for permanent job creation or retention. The applicant should be in the process of negotiating a location or retention decision with a developer or firm, and must be able to demonstrate that an immediate funding commitment is essential to influence a job location or retention decision.

Applications are presented to the Commission for a decision as quickly as possible, following a reasonable period for review and evaluation.

Local Development Projects - This category is for projects that support local economic development, but that do not require an immediate commitment of funds or meet the threshold set for immediate opportunity projects. These projects are selected through a competitive evaluation process conducted semi-annually. Deadlines for submittal of applications are February 1 and September 1 of each year.

RISE Overview - A summary of the 19 projects awarded funding during FY 2014 is included on the following pages.

Annual Report - This summary also serves as the annual report required by 761 lowa Administrative Code section 163.3(4). The following table documents the amount of RISE funding awarded/programmed in FY 2014, compared with the amount of revenue distributed to the RISE Fund that year. It is possible that more funding is awarded/programmed in a year than is generated due to the timing of fund obligation, project construction and fund expenditure.

Summary of FY 2014 RISE Funding

	Amount Awarded/ Programmed	Annual Revenue	Percent of Annual Revenue Awarded/ Programmed

Footnotes:

- Job creation or retention is not a criteria for project funding.
 All calculations are based on the effective cost to the RISE program which includes the net present value of any loan payment.
- 3. The total "RISE Funds Approved" includes both grant and loan funding.

RISE Fund Projects Fiscal Year 2014

Iowa Statewide Transportation Alternatives Program

Iowa Statewide Transportation Alternatives Program

Statewide Transportation Alternatives Program (TAP) projects are community-based projects that expand travel choices and enhance the transportation experience by integrating modes and improving the cultural, historic, and environmental aspects of our transportation infrastructure. TAP projects must relate to surface transportation and must be one of the following ten eligible activities:

Pedestrian & Bicycle Facilities - Sidewalks, walkways or curb ramps; bike lane striping, wide paved shoulders, bike parking and bus racks; traffic calming; off-road trails; bike and pedestrian bridges and underpasses; ADA compliance.

Safe Routes for Non-Drivers: Access and accommodation for children, older adults, and individuals with disabilities.

Conversion of Abandoned Railway Corridors to Trails: Acquisition of railroad rights-of-way; planning, design and construction of multiuse trails and rail-with-trail projects.

Scenic Turnouts and Overlooks: Construction of scenic turnouts, overlooks, and viewing areas.

Outdoor Advertising Management: Billboard inventories and removal of illegal and nonconforming billboards. Inventory control may include, but not be limited to, data collection, acquisition and maintenance of digital aerial photography, video logging, scanning and imaging of data, developing and maintaining an inventory and control database, and hiring of outside legal counsel.

Historic Preservation & Rehab of Historic Transportation Facilities: Preservation and restoration of historic buildings and facades for transportation-related purposes; access improvements to historic sites. Restoration of railroad depots, bus stations and lighthouses; rehabilitation of rail trestles, tunnels, bridges and canals.

Vegetation Management: Improvement of roadway safety; prevention of invasive species; providing erosion control.

Archaeological Activities: Projects related to impacts from implementation of highway construction projects.

Stormwater Mitigation: Pollution prevention and abatement activities to address stormwater management; water pollution prevention related to highway construction or due to highway runoff.

Wildlife Management: Reduction of vehicle-caused wildlife mortality; restoration and maintenance of connectivity among terrestrial or aquatic habitats.

In addition to meeting TAP eligibility requirements, TAP projects should have a statewide significance. Projects of statewide significance may be defined as having one or more of the following characteristics:

- Statewide or multi-regional use or importance
- Enhancement of the quality or utility of the state surface transportation system
- State tourism benefits
- Statewide planning

Statewide TAP funding is requested by submitting a project application. Forms are available from the Iowa DOT's website site at iowadot.gov. Applications for statewide TAP projects will be reviewed by Iowa DOT staff and awarded by the Iowa Transportation Commission.

Federal TAP funding can provide up to 80 percent of the proposed cost of eligible activities. If a project is located along a National Scenic Byway or State Historic or Scenic Byway, has the endorsement of the appropriate byway organization, is a project of statewide or multi-regional significance, and has received TAP funding up to 50 percent of total project costs through the local Metropolitan Planning Organization or Regional Planning Affiliation; the project may be eligible to receive an additional award of up to 30 percent of total project costs of statewide TAP funding.

Applicants must provide a commitment of at least 20 percent of eligible costs. Federal funds cannot be used as matching funds, unless expressly permitted by law. State funds are eligible for use as a match.

Nine applications were received by the October 1, 2014, deadline. The applications represented total project costs of \$4,046,596, with \$2,087,294 requested from the Statewide Transportation Alternatives Program. Five projects were approved by the Commission for a total commitment of \$1,000,000. The total cost for the approved projects is estimated to be \$1,760,614.

For additional information, visit the Iowa DOT's Office of Systems Planning website at www.iowadot.gov/systems_planning/trans_enhance.htm, or by calling 515-239-1664.

Iowa's
Clean Air
Attainment
Program
(ICAAP)

Iowa's Clean Air Attainment Program (ICAAP)

ICAAP projects are intended to improve air quality by maximizing vehicle emission reductions via traffic-flow improvements, reduction of vehicle miles of travel, reduction of single-occupant vehicle trips, and congestion reduction. Projects should reflect a strong planning process involving close coordination among the Iowa DOT, metropolitan planning organizations, transportation management areas, regional planning affiliations, and other state and local air quality agencies. Projects should have a high priority in appropriate congestion-management processes or long-range transportation plans. The state may use its funds for any eligible project under the Congestion Mitigation and Air Quality Improvement Program or Surface Transportation Program. Should Iowa become a nonattainment state, transportation control measures or other projects that are documented as improving air quality in Iowa's State Implementation Plan will receive the highest priority for funding.

The following types of projects are priorities for funding in lowa's program.

- Projects that reduce ozone, carbon monoxide, or PM-2.5 and PM-10 air quality problems
- · Projects that reduce single-occupant vehicle trips or vehicle miles of travel
- Transportation projects that reduce highway congestion and improve roadway traffic flow
- Transportation control measures or other transportation-related projects identified in an approved SIP, if applicable
- Projects that assist in the development of management systems for traffic congestion, public transportation or intermodal facilities

Eligibility - Iowa's program funds may be used anywhere in the state for any activity eligible under the Surface Transportation Program, as described in Section 133(b) of Title 23, U.S. Code, as amended by MAP-21, or the Congestion Mitigation and Air Quality Program, as indicated in Section 149(b) of Title 23, U.S. Code, as amended by MAP-21. To be eligible for Iowa program funds, the project should fit into one or more of the following categories.

Traffic Flow Improvements

Highway and street projects that improve air quality or reduce congestion

Shared-Ride Services

• Establishment of carpool and vanpool programs, parking areas for people using these services, and programs to match drivers and riders

Transit Improvements

 System and service expansion for bus and rail services, operational improvements, or demand and market strategies to make transit a more attractive transportation alternative and divert riders from single-occupant vehicle trips

Travel Demand-Management Strategies

 Techniques or programs that attempt to reduce demand for singleoccupant vehicle travel, such as promotion of employee trip reduction programs, development of transportation management plans and establishment of auto-free zones

Pedestrian and Bicycle Programs

 Pedestrian and bicycle facilities, promotional activities designed to encourage bicycle commuting and improved pedestrian walkways

Vehicle Inspection and Maintenance Programs

 Start-up activities, such as updating quality assurance software, developing mechanic training curricula, construction of high-tech diagnostic facilities, and equipment purchases in networks meeting Environmental Protection Agency criteria

Other Projects and Programs

- Other projects and programs that use promising technologies and feasible approaches to reduce transportation emissions
- Conversion of public fleets to alternative-fueled vehicles (eligible under certain conditions)
- Feasibility studies necessary to provide environmental documentation, although general planning studies, traffic data collection activities and similar assessments are not eligible

Transportation Control Measures

 Transportation control measures specified in Section 108 (f)(1)(A) of the Clean Air Act Amendment are generally eligible. (Many of these also fall into one of the previous categories listed.)

Transportation Activities in the State Implementation Plan

Transportation activities in an approved state implementation plan, if applicable

Program Administration - lowa's program administration, project application process and eligibility determination are coordinated by the lowa DOT's Office of Systems Planning. A project evaluation committee evaluates and ranks projects. The Office of Systems Planning submits project funding recommendations to the Commission for approval. The project evaluation committee consists of one representative selected from each of the following organizations: Iowa Department of Transportation; Iowa Department of Natural Resources; Iowa Public Transit Association; metropolitan planning organizations; and regional planning affiliations. The Commission has final project selection authority.

Twenty-two applications were received by the October 1, 2014, deadline. The applications represented total project costs of \$17,356,397, with \$7,162,360 requested from the ICAAP. Eight projects were approved by the Commission for a total commitment of \$3,929,782. The total cost for the approved projects is estimated to be \$8,721,697.

For additional information, visit the Iowa DOT's Office of Systems Planning website at www.iowadot.gov/systems_planning/icaap.htm, or by calling 515-239-1664.

Traffic Safety Improvement Program

Traffic Safety Improvement Program

Traffic Safety Improvement Program funds can be used for traffic safety improvements or studies on public roads under county, city or state jurisdiction. Projects can be initiated by any incorporated city or county, or the lowa DOT. The program is administered by the lowa DOT, with funding of about \$6 million per year.

Three separate funding categories are available.

Construction or Improvement of Traffic Operations at a Specific Site - Eligible projects for construction or improvement of traffic operations at a specific site include the following.

- Road modernization, upgrading, or reconstruction
- Bridge and culvert modernization, replacement or removal
- Road intersection and interchange improvement, including channelization, traffic control devices and lighting
- Right-of-way required for a traffic safety project
- Drainage and erosion control measures that are an integral part of the project
- · Traffic control devices required by the project
- Guardrail
- Tree removal
- Other construction activities directly related to or required by the safety project

Purchase of Materials for Installation of New or Replacement of Obsolete Traffic Control Devices - Costs of materials purchased for the initial installation of traffic control devices or replacement of obsolete traffic control devices to comply with the applicable warrants in the *Manual on Uniform Traffic Control Devices* are eligible for funding.

Transportation Safety Research, Studies or Public Information Initiatives - Funding is available for research, studies and public information initiatives relating to traffic safety, which can include:

- · Research addressing traffic safety concerns.
- Studies to address remedies for traffic operations safety at a specific location.
- · Public information initiatives to emphasize traffic safety.

The maximum traffic safety funding for a site-specific project shall not exceed \$500,000, and total funding allotted for traffic control materials cannot exceed

\$500,000 annually. Total funding allotted for all research, studies and public information initiatives shall not exceed \$500,000 annually.

Applications for FY 2016 funding consideration were due August 15, 2014. Seventy-three applications were submitted requesting \$14,791,170 in safety funding. Thirty-eight of the applications requested site-specific funding, 11 requested traffic control device funding, and 24 requested funding for studies and public information initiatives. On January 13, 2015, the Commission approved funding for 52 projects totaling \$9,699,685 in traffic safety improvement funding. A list of the approved projects is shown on the following pages.

Traffic and Safety Information and Services - Applications for funding consideration for FY 2017 will be due by August 15, 2015. Application forms or further information concerning the Traffic Safety Improvement Program may be obtained by contacting:

For additional information, visit the Iowa DOT's Office of Traffic and Safety website at www.iowadot.gov/traffic, or by calling 515-239-1557.

Traffic Safety Improvement Program Projects Fiscal Year 2016

Applicant	Location/Description		Approved Amount
Marion County	Co Rd G-28 - Pave 3' shoulder with shoulder rumbles	Site	\$ 500,000
Montgomery/Mills County	Co Rd H-34 - Widen pavement from 18' to 24' and regrade foreslopes	Site	\$ 500,000
Harrison County	County Route L-20 - Pave 4' shoulders with rumbles and edge line paint markings	Site	\$ 480,407
City of Clinton	US 30 - Intersection pavement marking alignments and signage upgrades and signal timing	Site	\$ 35,000
City of Des Moines	Hubbell Ave - Add left turn lanes on Hubbell Ave., add north bound right turn lanes on East 42nd street and install traffic signals	Site	\$ 500,000
City of Ames	West Lincoln Way - Add East/West turn lanes and signal improvements	Site	\$ 500,000
City of Marion	35th St - Conversion of a 2-way stop with left turn lanes on 4 approaches to a mini roundabout	Site	\$ 164,220

1 Statewide Site

Highway Program

Highway Program

The highway section of the Iowa Transportation Improvement Program (Program) contains the primary and interstate highway construction-related investments planned for fiscal year (FY) 2016 through FY 2020. In general, contracts awarded during a fiscal year are constructed during the corresponding calendar year. This serves as the long range program for the primary road system and the annual accomplishment program as required by Iowa Code 307A.2(12). The highway section is arranged by county and route. A map showing the location of each 2016 project is located in this highway section of the Program.

Highway Program Objectives

This Program includes historic advances in the investment of funding to improve state roads and bridges. These advances are possible due to additional revenue authorized by Senate File 257 and signed into law on February 25, 2015. As directed by the legislation, 100 percent of the additional revenue allocated to the Iowa Department of Transportation (DOT) will be spent on road and bridge projects that are critical to maintaining Iowa's transportation infrastructure and create opportunities for expanded economic activity. A list of projects able to be funded due to Senate File 257 is included at the end of this highway section of the Program.

The Commission and the Iowa DOT remain committed to providing modern, safe and efficient transportation services to the public. For FY 2016-2020, approximately \$3.2 billion is forecast to be available for highway right of way and construction. The highway section was developed to achieve several objectives. The Commission's primary investment objective remains stewardship (i.e. safety, maintenance and modernization) of Iowa's existing highway system. Over \$1.3 billion is programmed in FY 2016 through FY 2020 for modernization of Iowa's existing highway system and for enhanced highway safety features.

The Program includes over \$1.1 billion of investments in lowa's state owned bridges, which continues the Commission's objective to improve the condition of lowa's bridges. Over the last few years, the number of structurally deficient bridges on the state highway system has been reduced from 256 in 2006 to 105 in 2014 as a result of this emphasis.

The Commission and DOT continue to recognize the importance of maintaining an effective functioning interstate system. The interstate system connects all transportation systems in lowa and allows major freight movements to occur.

The highway section includes significant interstate investments on I-29 in Sioux City, the I-74 Mississippi River Bridge replacement in Bettendorf, and the system in Council Bluffs. Portions of these investments address stewardship needs.

The Commission was able to add construction for four-lane improvements to U.S. 20, U.S. 30 and U.S. 61 – the first time in three years that additional corridor work has been able to be added to the Program. These four-lane improvements include U.S. 20 in Ida/Sac Counties from Correctionville to U.S. 71, U.S. 30 in Tama/Benton Counties from the Tama Bypass to the west junction of U.S. 218, and U.S. 61 in Des Moines County from Burlington to 210th Street.

The Commission was able to add several significant one or two year projects that address safety and condition needs and these include Iowa 1 in Washington County at the Iowa 22 intersection in Kalona, Iowa 3 in Dubuque County from Luxemburg to County Road Y13, Iowa 13 in Linn County from north of County Home Road to south of Central City, U.S. 30 in Story County at the Airport Road interchange in Nevada, U.S. 34 in Monroe County at the Iowa 5 intersection in Albia, Iowa 57 in Black Hawk County in Cedar Falls, U.S. 69 in Polk County from I-80 to Ankeny, Iowa 92 in Warren County at the Iowa 28 intersection in Martensdale, Iowa 141 in Monona County from east of County Road L32 to west of County Road L37, and Iowa 146 in Marshall County from County Road E49 to U.S. 30.

The Commission remains committed to previous highway programming actions by maintaining schedules of all large multiyear corridor improvement projects. These multiyear corridor improvement projects include Iowa 3 in Dubuque County from County Road Y13 to Pfeiler Road, U.S. 20 in Woodbury County from Moville to Correctionville, U.S. 20 in Dubuque County at Swiss Valley Road, U.S. 30 Mount Vernon/Lisbon bypass in Linn County, U.S. 52 Mississippi River Bridge in Jackson County, Iowa 58 in Black Hawk County at Viking road, U.S. 61 in Louisa County from south of Iowa 92 to Muscatine County, U.S. 63 in Wapello County from 1 mile south of U.S. 34 north to U.S. 34 in Ottumwa, U.S. 63 in Black Hawk County from Jefferson Street to Newell Street in Waterloo, U.S. 65 in Jasper County at the Iowa 117/330 intersection, Iowa 100 in Linn County from U.S. 30 to Edgewood Road in Cedar Rapids, Iowa 122 in Cerro Gordo County from Monroe Avenue to Carolina Avenue in Mason City, Iowa 141 in Polk County from Iowa 44 to I-35, and the Southwest Arterial in Dubuque.

The bar chart on the next page summarizes the 2016-2020 Highway Program by funding category. The chart also shows the scope of projects being developed but not yet funded. The pie chart on the right summarizes the 2016-2020 Highway Program by work type.

A large part of funding available for highway programming comes from the federal government. Accurately estimating future federal funding levels is dependent on having a multiyear federal transportation authorization bill. The current authorization, Moving Ahead for Progress in the 21st Century (MAP-21), was signed into law on July 6, 2012. However, it is a short-term authorization that has been extended to July 31, 2015. Continued federal funding is uncertain after this date.

Another major concern with federal funding is solvency of the federal Highway Trust Fund (HTF) beyond July 2015. At that time, the HTF, which is funded primarily from federal fuel taxes, will not be able to provide funding at current levels. If this is not corrected, drastic cuts to the federal highway program are anticipated. If this occurs, the Commission will have to make significant changes to the program in fiscal year (FY) 2016 and beyond. In fact, approximately half of the funding available for programming in FY 2016-2020 could be impacted by this issue. As the Commission decides which projects will be rescheduled, they will consider statewide equity, length of time a project has been considered for programming, how many times a project has been rescheduled, purpose of a project, whether the project is already underway, local efforts to move forward on a project, and current conditions and need for a project.

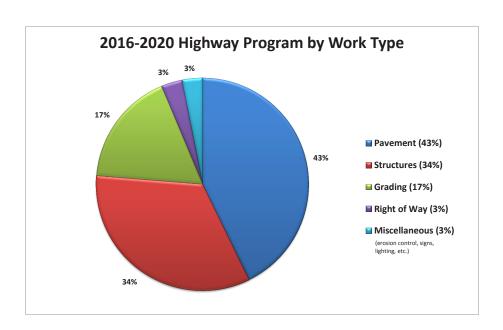

Public Participation

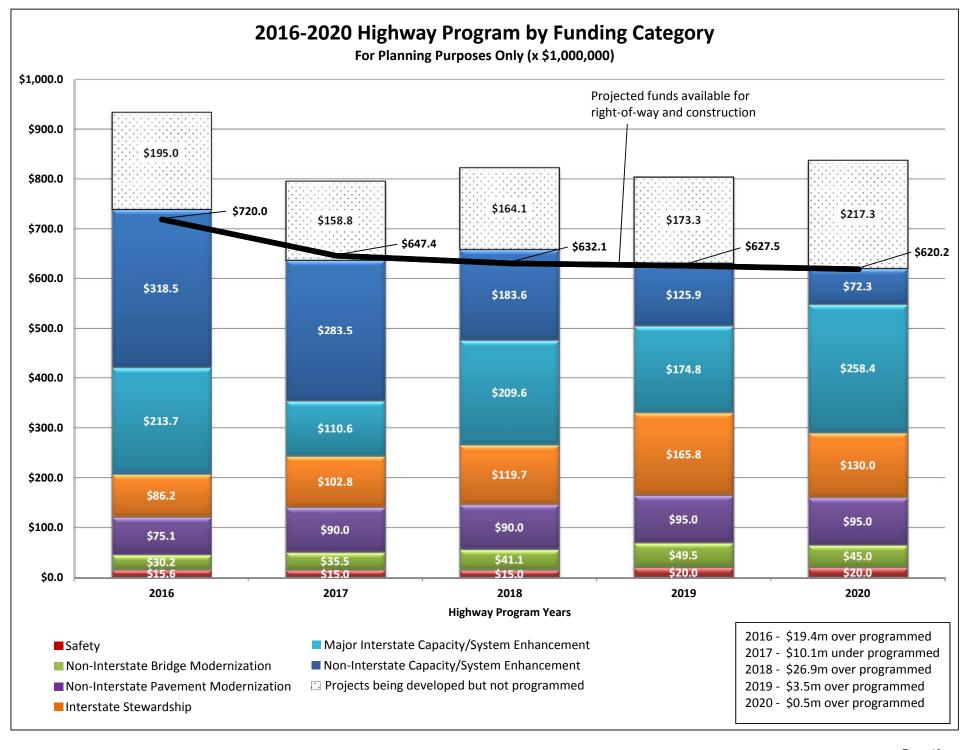

Throughout the year DOT staff meet with individuals, local agencies and organizations to discuss potential projects and transportation issues. Comments on the proposed program are encouraged.

During 2014, the Commission conducted meetings at four locations around the state for the specific purpose of receiving public input concerning planning and programming. Meetings were conducted in Centerville, Perry, Cedar Rapids, and Sioux Center. Approximately 40 delegations presented their views.

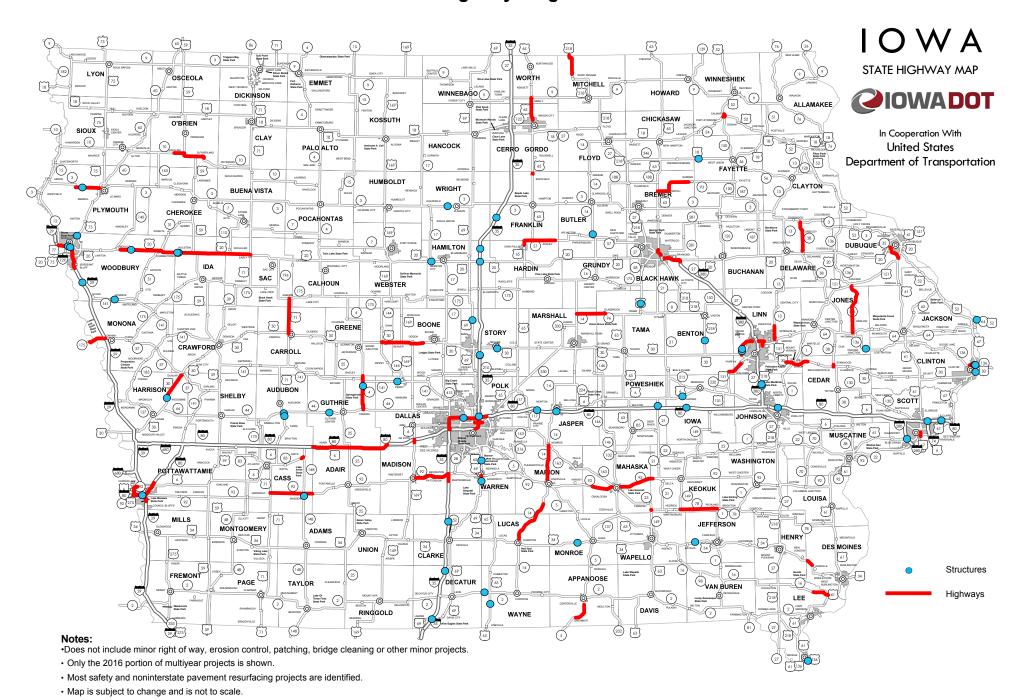

Highway Program Information and Services

On a periodic basis, the Commission considers adjustments to the highway program. Information regarding these changes can be accessed on the DOT's website at iowadot.gov/program management/five year.

2016 Iowa Highway Program

Explanation of columns using the examples above:

- (1) Project is on I-80
- (2) Average daily traffic on this section is 85,100 vehicles
- (3) The project is in Pottawattamie County, on I-80/I-29/I-480 in Council Bluffs
- (4) The project is 4.0 miles in length
- (5) Type of work programmed is as listed
- (6) Project costs programmed for each year

Cooperative State Traffic Engineering Program (U-STEP and C-STEP)

In 1977 a special purpose safety program was established by the Commission as a means of reducing crashes and improving operations on the urban extensions of the State Primary Road System. The Urban-State Traffic Engineering Program (U-STEP) was established to share the construction cost of traffic engineering improvements at spot locations, such as intersections or other bottlenecks. This program has funded new or remodeled traffic signal systems, interconnection or coordination of signals, intersection reconstruction, construction of turning lanes, bottleneck elimination, widening or adding lanes for through traffic, and other safety-related improvements.

Effective January 1, 1983, the Commission established the County-State Traffic Engineering Program (C-STEP) to join with interested counties in resolving similar problems outside of the cities. The state share of the construction and right-of-way costs for both U-STEP and C-STEP spot

improvement projects has been set at 55 percent, with the local jurisdiction furnishing the engineering and project supervision. Some improvements of larger scope, requiring linear, rather than spot improvements, are also eligible. Projects are approved by the lowa DOT's highway division director.

Many candidate projects have been identified as a result of a state-federal Traffic Engineering Assistance Program (TEAP). Traffic engineering consultants have been retained by the lowa DOT and are available to local governments, as requested on a first-come, first-served basis. The program is funded by the Federal Highway Administration. A city or county can obtain a traffic engineering evaluation of a problem situation at no cost.

County - State Traffic Engineering Program (C-STEP)

A. Spot Improvements - Safety or Operational

For cooperative safety or operational improvements on the rural portion of the State Primary Road System (outside corporate limits).

State share - 55 percent of the construction cost of a qualified project, with a limit of \$200,000 of state funds per project. The county will furnish the engineering.

B. Linear Improvements - Safety or Operational

	•	Improvement ction Retained				Improvement cal Jurisdiction	
Rehabi	litation	Reconst	truction	Rehabi	litation	Recons	truction
State Share(%)	Limit (\$/Mi.)	State Share(%)	Limit (\$/Mi.)	State Share(%)	Limit (\$/Mi.)	State Share(%)	Limit (\$/Mi.)
30	45,000	30	75,000	60	90,000	60	150,000

Shared project cost to apply to construction only. The county will furnish the engineering.

Urban - State Traffic Engineering Program (U-STEP)

A. Spot Improvements - Safety or Operational

For cooperative safety or operational improvements on municipal extensions of the State Primary Road System. State Share - 55 percent of the construction cost of a qualified project, with a limit of \$200,000 of state funds per project. The city will furnish the engineering.

B. Linear Improvements - Safety or Operational

For occasional safety or operational improvements spanning two or more intersections on municipal extensions of the State Primary Road System. Limited to situations for which a single location improvement is inadequate. State Share is 55 percent of the construction cost of a qualified project with a limit of \$400,000 of state funds per project. The city will furnish the engineering.

Living Roadway Trust Fund

The Living Roadway Trust Fund (LRTF) was established by the Iowa Legislature in July 1989. This fund was created to implement Integrated Roadside Vegetation Management (IRVM) programs on city, county or state rights-of-way or areas adjacent to traveled roadways. As part of the legislation, an IRVM coordinator's office was established to administer grants and assist in developing community enhancement projects or other planting demonstration projects through the state. Examples of projects eligible for funding through this program are planning and public education, installation or initial maintenance and development, special staff training, special equipment, or increased protection for existing vegetation. The lowa Code, Section 314.22, requires that county or city applicants must have an IRVM plan on file with the IRVM coordinator's office before applying for funds. It further states that all county applications must be sponsored by the county engineer or county conservation board. The application deadline is June 1 of each year. All applicants received are reviewed by the IRVM technical advisory committee. This committee is appointed by the director of the lowa DOT and recommends approval of qualified applications. The director authorizes funding based on the recommendations of the advisory committee.

The LRTF has four funding sources.

- 1. \$250,000 from the Road Use Tax Fund (RUTF).
- Fees obtained from utility easements along interstate and other divided four-lane, access-controlled highways.
- 3. Three percent of Resource Protection and Enhancement (REAP) funds.
- 4. Three percent of REAP license plate revenue.

Incomes from these sources, after distribution of the legislatively mandated amounts, are divided between city, county, and state projects in the same proportions as the RUTF distribution formula.

Since the beginning of this program, more than \$18.4 million have been approved for nearly 1,546 projects around the state. These funds supported the purchase of special equipment, roadside inventories, gateway plantings, native grass and forb seed, tree and shrub plantings, and research and educational programs.

The IRVM coordinator's office established the framework to begin the programs and state IRVM plan. The office has funded a wildflower brochure, educational display, and native wildflower posters. Also, native seed for planting has been provided to lowa DOT garages for use on interstate rest areas and public school grounds. These projects will enhance aesthetics, provide identification and management training, and provide future seed sources.

Public education is one of the major goals of the LRTF program. The coordinator's office makes presentations and attends conferences around the state to explain the program. Distribution of brochures, posters and other information to increase awareness and public support for lowa's native vegetation is available on request.

Fifty-nine applications for FY 2015 funding were submitted by cities, counties, and the state. The total amount of funding requested was nearly \$910,758.40. Fifty-four projects were awarded a total of \$814,170.86.

Requests for applications or additional information about this program should be directed to the Iowa Department of Transportation, Attention: Roadside Coordinator, Office of Design, 800 Lincoln Way, Ames, IA 50010, or call 515-239-1768. More information on projects and the Living Roadway Trust Fund program can be reviewed at www.iowalivingroadway.com.

TOTAL

Living Roadway Trust Fund Projects Fiscal Year 2015

Projects Funded with Increased Revenue

Projects Funded with Increased Revenue

This Program includes historic advances in the investment of funding to improve state roads and bridges. These advances are possible due to additional revenue authorized by Senate File 257 and signed into law on February 25, 2015. As directed by the legislation, 100 percent of the additional revenue allocated to the lowa Department of Transportation (DOT) will be spent on road and bridge projects that are critical to maintaining lowa's transportation infrastructure and create opportunities for expanded economic activity. Over the five-years of this Program, it is forecast that an additional \$501.7 million of funding is available for these additional projects. A list of projects able to be funded due to Senate File 257 is included following this page.

The Commission spent the last several months discussing how to assess and prioritize critical road and bridge construction projects to be funded with the additional revenue. There are several types of critical need projects that exist including projects to address pavement and bridge condition issues, safety projects, and projects that are vital to grow lowa's economy by lowering transportation costs and supporting new developments.

Every year, the Commission determines funding targets for stewardship investments in pavement resurfacing, bridge repair/replacement, safety improvements, and Interstate projects. As a result of SF 257, the Commission increased those targets by \$80 million over this Program to improve safety and bridge/pavement conditions on critical projects. The Commission has also identified preliminary target levels for these categories for the five-years following this Program and they continue to significantly increase over that time.

Beyond the types of projects that can be funded with the stewardship investment categories described above, there are several one or two-year critical projects that address more significant safety and condition needs. The Commission was able to add these projects totaling over \$50 million to this Program.

Finally, the Commission was able to add construction for four-lane improvements to U.S 20, U.S. 30 and U.S. 61 – the first time in three years that additional corridor work has been able to be added to the Program. These four-lane improvements include U.S. 20 in Ida/Sac Counties from Correctionville to U.S. 71, U.S. 30 in Tama/Benton Counties from the Tama Bypass to the west junction of U.S. 218, and U.S. 61 in Des Moines County from Burlington to 210th Street.

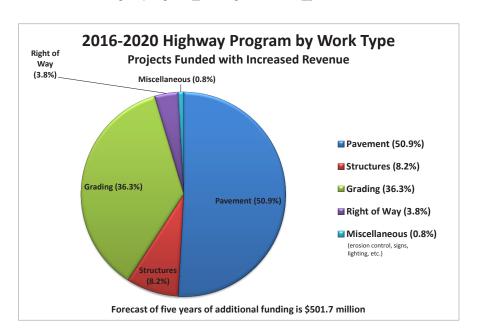

The Commission has heard from industries, school districts, emergency service providers, farmers, and economic development officials about the importance of completing four-lane corridors to better connect the state to the rest of lowa and provide more efficient corridors for moving goods to surrounding states, across the nation, and to international markets. While investment in four-lane construction projects is not repair or rehabilitation of an existing road, that does not mean they are not critical projects. The efficient movement of people and goods is essential in supporting and strengthening the economy of lowa.

The list of projects following this page totals the amount of forecast additional funding over this five-year time period. In order to match the forecast amount of additional funding, it is possible that the full cost of a project is not reflected in the project list. Please refer to the full Highway Program list for full project costs.

The pie chart below summarizes the additional projects by work type.

Highway Program Information and Services

On a periodic basis, the Commission considers adjustments to the highway program. Information regarding these changes can be accessed on the DOT's website at iowadot.gov/program_management/five_year.
