## 2015 CROP PRODUCTION

Corn for grain production in Iowa during 2015 is estimated at 2.51 billion bushels, according to the USDA, National Agricultural Statistics Service annual Crop Production 2015 Summary report. This record high production is 4 percent above the previous record of 2.41 billion bushels set in 2009. Iowa has led the Nation in corn production for 22 consecutive years and 37 of last 38 years. Iowa's corn for grain yield is estimated at 192 bushels per acre, 6 percent higher than the previous record yield of 181 bushels per acre established in 2004 and tied in 2009. Area harvested for grain is estimated at 13.1 million acres, down 150,000 acres from the November 1 forecast and 250,000 acres below 2014. Corn planted for all purposes in 2015 is estimated at 13.5 million acres, down 100,000 acres

## IN THIS ISSUE

Crop Production
Hay Stocks
Grain Stocks
Grain Storage
Capacity
Horticultural Specialties from the November 1 estimate and the fewest planted acres since 2010.

Corn for silage production is estimated at 8.16 million tons, up 32 percent from 2014. The silage yield estimate of 24.0 tons per acre is a record high, 2.0 tons per acre higher than the previous record set in 2009. Producers harvested 340,000 acres of corn for silage, up 30,000 acres from 2014.

Soybean production is estimated at 554 million bushels in 2015. This is a record high production, topping the previous record of 525 million bushels set in 2005 by 5 percent. The Iowa soybean crop yielded 56.5 bushels per acre in 2015 . This yield is also a new record high, 8 percent above the previous record of 52.5 bushels per acre set in 2005 . The harvested acreage of 9.80 million is down 20,000 acres from the November 1 estimate, but 30,000 acres above 2014. Soybean planted acreage, at 9.85 million, is down 50,000 acres from November 1, but is unchanged from 2014.

All hay production for the state is estimated at 3.94 million tons, up 7 percent from the 3.68 million tons produced in 2014 and the highest production since 2009. Producers averaged 3.4 tons per acre, up from 3.2 tons in 2014. All hay harvested acres is estimated at 1.16 million, up 5,000 acres from 2014.

Alfalfa and alfalfa mixtures production is estimated at 3.0 million tons, up 3 percent from 2014. Producers averaged 3.9 tons per acre, up 0.3 ton from 2014. Harvested acres are down 40,000 from last year, to 770,000 . Iowa producers seeded 90,000 acres of alfalfa in 2015, down 20,000 acres from 2014 and the lowest seeding since 2011.

Other hay production is estimated at 936,000 tons, up 23 percent from 2014. Producers averaged 2.4 tons per acre, 0.2 ton per acre above the 2014 yield. Harvested acres of other hay, at 390,000 , is 13 percent above 2014.

USDA is an equal opportunity provider and employer.

## HAY STOCKS

Dry hay stored on Iowa farms as of December 1, 2015, is estimated at 3.28 million tons, an increase of 11 percent from December 2014 according to the latest USDA, National Agricultural Statistics Service - Crop Production report. Disappearance from May 1, 2015, through December 1, 2015, totaled 1.36 million tons, compared with 1.14 million tons for the same period in 2014.

## GRAIN STOCKS

Iowa corn stocks in all positions on December 1, 2015, totaled 2.19 billion bushels, up 7 percent from December 1, 2014, according to the latest USDA, National Agricultural Statistics Service - Grain Stocks report. Of the total stocks, 63 percent were stored on-farm. The September - November 2015 indicated disappearance totaled 678 million bushels, 16 percent above the 587 million bushels used during the same period last year.

Iowa soybeans stored in all positions on December 1, 2015, totaled 457 million bushels, up 12 percent from the 409 million bushels on hand December 1, 2014. Of the total stocks, 43 percent were stored on-farm. Indicated disappearance for September - November 2015 is 131 million bushels, 17 percent more than the 111 million bushels used during the same quarter last year.

Iowa oats stocks stored on-farm on December 1, 2015, totaled 1.6 million bushels, equal to the stocks on December 1, 2014.

## GRAIN STORAGE CAPACITY

Iowa on-farm storage capacity on December 1, 2014, was 2.00 billion bushels, unchanged from December 1, 2013, according to the latest USDA, National Agricultural Statistics Service - Grain Stocks report. Iowa's 900 off-farm storage facilities have a storage capacity of 1.43 billion bushels, 30 million bushels above the previous year. As of December 1, 2014, Iowa had a total of 3.43 billion bushels of storage capacity, the largest total storage capacity of any State.

## HORTICULTURAL SPECIALTIES

Iowa's total floriculture, nursery and specialty crops generated $\$ 99.3$ million in sales in 2014, up 26.9 percent from 2009. This accounts for 0.7 percent of all U.S. horticulture sales in 2014. Iowa producers increased in number from 217 in 2009 to 289 in 2014, a 33.2 percent increase. Of the 289 horticultural specialty operations, family- or individually-owned operations were the most common, accounting for 59.2 percent of all operations, but corporately owned operations accounted for 78.5 percent of all sales ( $\$ 78.0$ million). Total industry expenses in Iowa totaled $\$ 81$ million, up 27.9 percent since 2009. Hired labor costs were the largest expense, accounting for 39.9 percent of total expenses in 2014, up from 36.5 percent of total expenses in 2009.

Sales value of Iowa flower seeds were ranked second in the nation, composing 23.2 percent of the total US flower seed sales, with $\$ 7.34$ million in sales. Ten operations harvested and sold over 1.28 million pounds of clean seed. In 2009, only 104,000 pound of flower seeds were harvested and sold in Iowa.

Annual bedding and garden plants had the largest increase in total sales from 2009, up $\$ 18.2$ million to $\$ 40.5$ million in sales in 2014. There were 154 operations with annual bedding and garden plant sales, up 45.3 percent from 2009. Seventy-five percent of the sales were wholesale sales, while the remainder were retail sales. Potted flowering plants also showed strong growth, with sales increasing 33.0 percent to $\$ 10.3$ million in sales in 2014. This gain in sales was partially off-set by declining sales of nursery stock, which decreased 59.7 percent from 2009 to 2014.

Food crops grown under protection gained in prominence as the number of operations engaged in this practice increased 168 percent to 75 operations. Total sales from food crops grown under protection increased 70.0 percent to 8.28 million dollars in 2014. Total production increased 74.8 percent to $25,610 \mathrm{cwt}$.
