

Soldiers' and Sailors' Monument, Des Moines, IA, December 2015

IOWA ACUTE DISEASE MONTHLY UPDATE

January 1, 2015 – December 31, 2015

The Center for Acute Disease Epidemiology

TABLE OF CONTENTS

The Center for Acute Disease Epidemiology (CADE) uses the most recent Council of State and Territorial Epidemiologists (CSTE) / Centers for Disease Control and Prevention (CDC) case definitions found at <http://www.cdc.gov/nndss/script/casedefDefault.aspx>. These definitions are used to classify the case as confirmed, probable, suspect, not a case, or awaiting more information. **Only confirmed and probable cases meeting the CSTE/CDC case definitions are included in this report.**

Disease case counts were compiled from the Iowa Disease Surveillance System (IDSS). IDSS data is updated frequently, therefore case counts may differ slightly for the same time period if updates are made after this report is generated.

Rates were calculated using the 2010 census population for the State of Iowa

Contents

12 Month Case Counts by County/A-C	3
