## Administration

Ryan M. Wise, Director and Executive Officer of the State Board of Education

It is the policy of the lowa Department of Education not to discriminate on the basis of race, creed, color, sexual orientation, gender identity, national origin, sex, disability, religion, age, political party affiliation, or actual or potential parental, family or marital status in its programs, activities, or employment practices as required by the Iowa Code sections 216.9 and 256.10(2), Titles VI and VII of the Civil Rights Act of 1964 (42 U.S.C. § 2000d and 2000e), the Equal Pay Act of 1973 (29 U.S.C. § 206, et seq.), Title IX (Educational Amendments, 20 U.S.C.§§ 1681 - 1688), Section 504 (Rehabilitation Act of 1973, 29 U.S.C. § 794), and the Americans with Disabilities Act (42 U.S.C. § 12101, et seq.). If you have questions or complaints related to compliance with this policy by the lowa Department of Education, please contact the legal counsel for the Iowa Department of Education, Grimes State Office Building, 400 E. 14th Street, Des Moines, IA 503190146, telephone number: 515-281-5295, or the Director of the Office for Civil Rights, U.S. Department of Education, Citigroup Center, 500 W. Madison Street, Suite 1475, Chicago, IL 60661-4544, telephone number: 312-730-1560, FAX number: 312-730-1576, TDD number: 877-521-2172, email: OCR.Chicago@ ed.gov.

Gary Schwartz, Consultant

Data and information are important components of school improvement. They show how schools are changing and how students are progressing. Providing and interpreting data is one of the critical functions of the lowa Department of Education.

The annual Condition of Education report provides valuable data about our students, educators and school districts across a number of statewide measures. They include shifts in student populations and demographics, teacher and administrator salaries and characteristics, student achievement results,
 and school financial information.

This year, I'm excited that the Department is introducing an online companion to the print version of the Condition of Education report. The new online features allow education stakeholders to dive deeper into enrollment and staffing data at the state and district level. We will continue development of the online Condition of Education report, which is available at http://reports.educateiowa.gov/COE/.

Thanks for all you do to support lowa's schools and students.

Sincerely,
Ryan M. Wise
Ryan M. Wise, Director
Iowa Department of Education

## Acknowledgments

The authors of the Annual Condition of Education Report wish to thank the staff of the lowa Department of Education who contributed to the production of this report. A special acknowledgement is extended to individuals outside the Department of Education who made important contributions in sharing their data and thoughts with us. They are: Dr. Steve Dunbar and Dr. Catherine Welch, lowa Testing Programs.

## Introduction

With the 28th edition of the Annual Condition of Education (COE) report, the Department of Education is releasing both a print and online version. The online COE adds a new dimension to the report by allowing for interactive analyses at the state, area education agency (AEA) and district level. It supports the public by allowing examination and localize results to lowa communities. The first version of the online COE will start with a few measures including: K-12 enrollment, enrollment trends and staffing. Future editions of the online COE will include expanded measures and additional content areas.

The print edition of the COE includes a rich set of measures for evaluating lowa's education system. Data in the report provide important information about our students, teachers and schools. It includes information such as the demographic characteristics of our students, assessment results, college readiness measures, course taking patterns and school finance. Below are highlights from the 2017 Annual Condition of Education report.

## Enrollment

- The number of students in lowa's public school districts continues to climb. After a 17-year decline, there has been six years of enrollment gains statewide.
- Minority students make up 23.5 percent of the student body. The number of minority students in Iowa's public schools continues to increase and is at an all-time high $(113,076)$.
- The percentage of students eligible for free-or-reduced priced lunch declined slightly in the 201617 school year to 41.3 percent.
- The percent of students who are English language learners (ELL) increased from 5.7 to 5.9 percent in 2016-17. This is up from 2.3 percent of ELL students in 2000-01.

## Iowa Educators

- Iowa's average regular teacher salary increased 2.3 percent to $\$ 55,703$ in the 2016-17 school year.
- Iowa's average teacher salary is 22 nd in national rankings and 5th when compared to other Midwest states.
- The number of full-time teachers in public schools increased to 36,279 in 2016-17 from 35,883 in 2015-16.

## Student Performance

- Since 2011-12, lowa Testing Programs introduced Forms E and F. The 2012-14 biennium included an addition of a new form (F) of the lowa Assessments which was introduced during the 2013-14 school year.
- Across all grades (4th, 8th and 11th) in both reading and mathematics, biennium proficiency rates are slightly down from the prior biennium period.
- The percent of students taking higher-level mathematics and chemistry increased for the class of 2017 compared to the class of 2016. The percent of students taking foreign languages remained the same, while there was a slight decrease in the percent of students taking physics.
- 46.2 percent of students took a higher-level mathematics course, 71.9 percent took chemistry and 30.5 percent took physics for the class of 2017. This is compared to the class of 2016 in which 45.3 percent of students took a higher-level mathematics course, 71.0 percent took chemistry and 30.7
took physics. 85.2 percent of students took a foreign language for the classes of 2016 and 2017.
- Iowa continues to have one of the top graduation rates nationally. The four-year cohort graduation rate for the class of 2016 was 91.3 percent which is an increase from 90.8 percent for the class of 2015.
- The percent of students in the class of 2017 who took the ACT decreased to 67 percent from 68 percent for the class of 2016.
- There was a decrease in the composite ACT score for the class of 2017 (21.9) compared to the class or 2016 (22.1).
- Among states for which ACT is the primary college entrance exam (greater than 50 percent), lowa's average composite (21.9) score ranks second nationally.
- The number of students taking AP courses and total AP enrollment continues an upward trend. In the 2016-17 school year, 16,762 students took 25,286 AP courses. The percent of school districts offering AP courses increased to 53.3 from 51.3 in the prior year.
- Statewide concurrent enrollment continues to increase. 43,843 students in grades 9-12 took 96,031 courses in 2016-17.
- The number of Iowa Advanced Placement (AP) test takers and exams saw a decrease in 2016-17. In 2016-17, 19,084 AP exams were taken by lowa students compared to 19,790 in 2015-16. There was also a decrease in the total number of AP exams $(12,119)$ in 2016-17 compared to the prior year $(12,439)$. Over the past decade, the long-term trends show a significant increase in the total number of students taking AP exams.

## Technology Readiness

- There was a significant increase in the overall expenditures in technology in the 2015-16 (\$86.5 million) school year in lowa districts compared to the 2014-15 school year ( $\$ 73.9$ million).
- The percent of lowa schools equipped with 100 MB or more of bandwidth continues to grow. In 2016-17, 81.8 percent of schools reported having 100 MB or more of bandwidth compared to just 76.2 in 2015-16.

Sincerely,

Jay Pennington, Chief
Bureau of Information and Analysis

## Enrollment

The public and nonpublic enrollment trends in lowa, by district size and area education agency (AEA) are presented in this chapter, including data on student characteristics such as race/ethnicity, English language learners (ELL), percent of students eligible for free or reduced price lunch, special education enrollment, and migrant enrollment. These data come from the Basic Educational Data Survey (BEDS), certified enrollment, Student Reporting in Iowa (SRI), and lowa special education records.

Certified enrollment counts are used for the lowa School Finance Formula calculation, and include resident students, supplemental weightings for sharing programs, weighting for ELL students, nonpublic school assistance, and dual enrollments. Enrollment data by grade and race/ethnicity are calculated by the attending district.

Enrollment in 2016-2017 continues to increase after a 14-year decline between 1997-1998 and 20112012. The public school enrollment projection shows an enrollment increase in the next five years, while the nonpublic school enrollment trend remained the same (Figure 1-1). More than two-thirds of lowa public school districts in 2000-2001 had district enrollments less than 1,000 and these districts served about 28 percent of K-12 students. Over two-thirds of the districts in 2015-2016 and 2016-2017 had less than 1,000 students and served 25 percent of K-12 public school students (Table 1-3). There are nine AEAs in lowa that serve students. The largest is Heartland AEA which serves 27.8 percent of lowa students in 2016-2017 (Table 1-4).

The Open Enrollment Act (Iowa Code 282.18) of 1989-1990 states, "It's the goal of the general assembly to permit a wide range of educational choices for children enrolled in schools in this state and to maximize ability to use those choices...,[To] maximize parental choices and access to educational opportunities that are not available to children because of where they live." The number and percent of students taking advantage of the Open Enrollment Act continues to increase (Table 1-5). The smallest and largest enrollment categories in 2015-2016 and 2016-2017 had more students open-enrolling out than open-enrolling in. The 1,000-2,499 enrollment category gained the most students from the open enrollment legislation (Table 1-6).

Children from families with incomes at or below 130 percent of the poverty level are eligible for free lunch and children from families with incomes between 130 percent and 185 percent of the poverty level are eligible for reduced lunch, according to the National School Lunch Program. In 2016-2017 the percent of students eligible for free or reduced lunch decreased slightly (Figure 1-2). Districts in the largest and smallest enrollment categories had the highest percentage of students eligible for free or reduced price lunch (Table 1-7).

Children requiring special education are "Persons under 21 years of age, including children under five years of age, who have a disability because of a head injury, autism, behavior disorder, or physical, mental, communication, or learning disability, as defined by the rules of the department of education" (lowa Code 256.2). The special education students in lowa public schools accounted for 13 percent of the total certified enrollment in 2005-2006. For the last three years, the percentage remained 11.6 (Table 1-8).

The percent of minority students in public and nonpublic schools continued to increase in 2016-2017 (Table 1-9, Table 1-10, and Figure 1-3). The largest enrollment category had the highest percent of minority students at 40 percent while the two smallest enrollment categories had the lowest percent of minority students (Table 1-11).

The percent of English Language Learner (ELL) students in public schools increased slightly in 2016-2017, as well as the number of ELL students in nonpublic schools (Figure 1-4). The majority of ELL students spoke Spanish in all three years presented (Table 1-12). An ELL student is eligible for 0.22 weighted funding for four years. Districts with more students had more weighted ELL students in all years presented in Table 1-13.

The U.S. Department of Education defines a "migratory child" as a child who is (or whose parent or spouse is) a migratory agricultural worker or migratory fisher. A migratory agricultural worker or migratory fisher is one who has moved from one school district to another in the preceding 36 months in order to obtain temporary or seasonal employment in agricultural or fishing work. Migrant student data are collected by the lowa Department of Education through a directed certified system. The number and percent of migrant students in the 2015-2016 and 2016-2017 school year are displayed in Table 1-14.

$14 \quad$ The Annual Condition of Education Report 2017

## Early Childhood Education

Data on Early Childhood Education are reported by school districts through the Basic Educational Data Survey (BEDS) program level data collection forms and the Student Reporting in lowa student level data collection. This chapter describes preschool and kindergarten programs in 2015-2016 and 2016-2017.

## Preschool Programs

## Preschool Enrollment

Districts throughout the state offer preschool to three- and four-year-old children. Table 2-1 shows the number of districts that offered preschool during the past two school years and Table 2-2 shows the preschool enrollment by enrollment category for the past two years. About 98.5 percent of school districts offered preschool during the 2016-2017 school year. Table 2-3 shows the breakdown of preschool enrollment by subgroup for the past two years. More students participate in a district sponsored preschool program than in 2015-2016.

Table 2-1

## Statewide Voluntary Preschool Program for Four-Year-Old Children

The Statewide Voluntary Preschool Program (SWVPP) for Four-Year-Old Children was established May 10, 2007, with signing of House File 877. The SWVPP legislation provides an opportunity for all four-year-old children in lowa to enter school ready to learn by expanding access to research-based preschool curricula and early childhood licensed teaching staff. The allocation of funds for the SWVPP is to improve access to high quality early childhood education through predictable, equitable, and sustainable funding to increase the number of children participating in quality programs.

Table 2-4 shows the number of districts that provided the SWVPP, number of students funded, and the total number of students who participated in the program. These districts continue to operate the Statewide Voluntary Preschool Program through ongoing funding generated by the student count. The same table and Figure 2-1 represent the number of four-year-old children funded from 2015-2016 to 2016-2017. Children served in SWVPP classrooms may also include 3- and 5-year-olds. Numbers of students served in Table 2-4 include the children who are younger or older (ages 3 and 5) who participate in the SWVPP (see the last row in Table 2-4). The number of students funded and served by the SWVPP continues to increase.

Figure 2-1
Statewide Voluntary Preschool Program Funded Enrollment Count 2015-2016 to 2016-2017

Source: Iowa Department of Education, Bureau of Information and Analysis, Student Reporting in lowa, fall files.

The number of SWVPP students by age and Individualized Education Program (IEP) status is shown in Table 2-5. Instructional IEPs and support only IEPs are listed separately since they have different funding sources. The number of students receiving special education services (IEP) in SWVPP decreased between 2015-2016 and 2016-2017. Table 2-6 indicates the number of 3-, 4-, and 5 -year-old children served in the SWVPP by race/ethnicity, free/reduced price meals, and gender. Free/Reduced meals data may be underreported since the SWVPP is only required to meet ten hours per week and preschool students may not receive meals. Information on Potential English Language Learners (PELL) was collected for the first time during 2014-2015. The percentage of children participating in district sponsored preschool programs who were identified to have potential language learning needs during 2016-2017 was 2.0 percent. The numbers of three-, four-, and five-year-olds served in SWVPP increased from 2015-2016 to 2016-2017.

## Kindergarten

School districts report the type of kindergarten program offered in their district on the spring Basic Educational Data Survey (BEDS). The types of kindergarten programs reported include all day every day, half day every day, alternate day, three days a week, and other combinations. As shown in Table 2-7, the majority of districts in 2016-2017 offered all day, every day kindergarten.

School districts in lowa are required by Iowa Administrative Code (IAC) 279.60 to administer a valid and reliable universal screening instrument, as prescribed by the lowa Department of Education (Department) to every kindergarten student enrolled in the district no later than October 1. The Department integrated this legislative change with the IAC 279.68 regarding early literacy. The Department provides a list of approved assessments that can be used to implement the requirements of IAC 279.68; however, a district may administer an assessment that is not on the list as long as it addresses technical adequacy. In the fall of 2016, as shown in Table 2-8, the majority of buildings used the earlyReading Composite from the Formative Assessment System for Teachers (i.e., FAST) assessment suite. The percentage of buildings using FAST as a universal screening of early literacy skills in kindergarten has continued to increase annually. The FAST earlyReading Composite provides an estimate of broad early literacy skills during the fall screening window, typically within the first six weeks of school. FAST assessments during the fall of kindergarten include Concepts of Print (requires learner to distinguish among familiar literacy cues related to print such as directionality, letter or word order), Letter Names (requires the learner to expressively name visually presented upper and lower case letters), Onset Sounds (requires learner to identify sounds found at the beginning of words), and Letter Sounds (requires the learner to provide sounds for visually presented upper and lowercase letters).

Table 2-9 displays the number and percent of public school kindergarten students by each type of kindergarten literacy assessment taken during the fall of 2016-2017.

Table 2-10 lists the number and percent of students identified as at or above benchmark by assessment during the fall 2016-2017 screening window. Note the percentage of students at or above benchmark is likely to be somewhat different during the winter and spring windows as the screening demands and students' skills each increase. The percent of students at or above benchmark, categorized by fall screening tool, ranged from 41.7 percent to 84.5 percent.

## Preschool Attendance (Parent Report)

Information on kindergarten students who attended preschool prior to kindergarten is reported by districts through Student Reporting in lowa in the fall. Districts gather information on preschool experience through parent report or district records. Some districts report this indicator based on the number of kindergarten students who participated in the SWVPP and have a state identification number prior to kindergarten entry. The term "preschool" has not been specifically defined in legislation and thus could result in different meanings ranging from SWVPP, childcare, or a private enterprise. Table 2-11 shows the number and percent of kindergarten students who were reported as having attended preschool prior to kindergarten. The percentage of children reported to participate in preschool prior to kindergarten increased from 2015-2016 to 2016-2017.

## Staff

This chapter presents information on licensed and non-licensed staff in lowa's schools and area education agencies (AEAs). Data on characteristics such as age, race/ethnicity, gender, experience, and salary for teachers, principals, superintendents, professional school counselors, and library/media specialists are included in this chapter. Information on instructional aides, pupil-teacher ratios, and nurses for public schools is also included. The data are summarized at the state level, by enrollment category (based on district certified enrollment) and by AEA. National and regional state comparative data are also presented where available. Some information is broken out by public and nonpublic schools.

An unlimited number of positions/assignments can be reported for each staff member. Some staff members are reported as serving in multiple positions. For example, a professional school counselor may also be a principal or a teacher. Salary is not reported separately for each position/assignment combination. Therefore, salary reported for staff may be impacted by additional duties. In 2008-2009, data on shared staff were collected on the Fall Basic Educational Data Survey (BEDS). Beginning in 2008-2009, shared staff members were reported in each district they served. However, the district that held the contract was the only district to report salary for the staff. The district that did not hold the contract for shared staff did not report any salary. In 2008-2009 and 2009-2010, the district that held the contract was also the only district to report the staff as full-time if they held a full-time contract. The district that did not hold the contract for shared staff reported the shared staff as having a part-time contract in 2008-2009 and 2009-2010. Beginning in 2010-2011, full-time equivalencies (FTE) were collected for each position. The district that held the contract reported the entire FTE for shared staff. The district that was purchasing services only reported FTE for their district. In all figures presented in this chapter, staff members are reported only once in the district that held the contract.

In previous years, information on licensed staff in lowa was collected from schools through the Licensed Staff Detail report on BEDS. The data that were collected included age, gender, race/ethnicity, salary, contract days, contract type, degrees, majors, positions, and the assignments that go along with each position. Beginning in 2010-2011, a new web application was used to collect this same data on licensed and non-licensed staff in lowa.

Full-time teachers in 2010-2011 to 2016-2017 were defined as staff with at least one teaching position code (including teacher leaders), a full-time equivalency for licensed positions of 0.8 or higher, and at least 180 contract days. Full-time teachers in 2016-2017 had base salary (salary paid for regular position responsibilities, including salary paid from teacher leadership grant funds and excluding professional development) of at least $\$ 33,500$. There were about 12,000 teachers in 2016-2017 that were reported as serving in other positions, such as administrative (e.g., principal, superintendent) or student support services (e.g., coach, counselor, teacher leader). Salary is not reported separately for each position/assignment combination. Therefore, salary reported for these teachers may be impacted by the additional duties. In each section, minority counts include staff with a reported ethnicity of Hispanic and/or reported race of American Indian/Alaskan Native, African American, Asian, Pacific Islander or multiple races. Teachers and principals with advanced degrees include staff with a master's, specialist, or doctorate degree.

Salary information collected through Fall BEDS included base salary, salary paid from teacher leadership grant funds, salary paid for professional development, and extra duty pay. The portion of salary that is paid for regular position responsibilities is called regular salary. Extra duty salary includes salary paid for extra duties such as yearbook sponsorship and coaching. Total salary is the sum of the regular salary and extra duty pay.

## Teachers

This section includes data on public and nonpublic teachers and teacher leaders in lowa. In 2016-2017, 3.9 percent of teachers were beginning teachers-teachers in their first year of teaching (Tables 3-2 and 3-3). The percent of teachers with advanced degrees and the percent of minority teachers was highest in the larger enrollment categories (Table 3-4). Heartland AEA 11 had the largest percent of teachers in the state in 2016-2017, 26.9 percent (Table 3-5). About 75 percent of the full-time teachers in public schools in lowa were female in 2016-2017. The salary for male teachers was 4.1 percent higher than female teachers, while the percent of teachers with advanced degrees was higher for females than males (Table 3-6). The percent of teachers that were minorities in 2016-2017 was 2.4 percent. The average salary of non-minority teachers was about 2 percent higher than the average salary of minority teachers. The average experience and percent of female teachers was also higher for non-minority teachers than minority teachers (Table 3-7).

Staff in lowa public schools are eligible to receive full retirement benefits through the lowa Public Employee Retirement System (IPERS) if they are at least 55 years old and the sum of their age and total IPERS covered employment is equal to or greater than 88. According to this rule, 5.9 percent of teachers was eligible to retire in 2016-2017 (Table 3-9).

In 2016-2017, average total salary for full-time public school teachers was 4.6 percent higher than average regular salary (Table 3-10). The average total salary of full-time public school teachers increased by 2.7 percent between 2015-2016 and 2016-2017. Average total salary was lowest in the smallest enrollment category and highest in the largest enrollment category (Table 3-11). When averaged by AEA, the average total salary was highest for teachers in Grant Wood AEA 10. The National Education Association reports average salaries of teachers in the United States in the Rankings of the States and Estimates of School Statistics report. In 2015-2016, lowa ranked 22 nd in the nation and 5th among Midwest States for average salary (Table 3-13).

In 2016-2017, the average number of assignments held by grades 9-12 teachers was 2.6. Over half (59.43 percent) of grades 9-12 teachers had one or two assignments (Tables 3-16 and 3-17). Pupil-teacher ratios from 2004-2005 to the present include special education teachers and students. Prior to this year, special education teachers and students were excluded. The pupil-teacher ratio in 2016-2017 was 13.9. The pupil-teacher ratio by enrollment category ranged from 10.6 in the smallest enrollment category to 14.7 in the 2,500-7,499 enrollment category (Table 3-18). The number of instructional aides (non-licensed staff who provide assistance to teachers in the classroom) increased by 5.8 percent between 2015-2016 and 2016-2017 (Table 3-19).

Notes: Teacher figures for 2015-2016 and 2016-2017 represent average salaries for full-time public school staff with teaching position codes. There were approximately 9,500 full-time public staff in 2015-2016 and 12,000 full-time public school staff in 2016-2017 with teaching position codes who also reported that they served in the capacity of administrator (superintendent, principal, etc.) and/or student support personnel (curriculum consultant, teacher leader, etc.). Average salaries for these staff include salaries for these additional responsibilities as well.

## Principals

Data on full-time public and nonpublic school principals in lowa are shown in this section. The percent of female public school principals and minority public school principals was highest in the largest enrollment category. The percent of principals with advanced degrees was highest in the 2,500-7,499 enrollment category (Table 3-21). The average salary of male principals was about 3 percent higher than female principals. The percent of principals with advanced degrees was higher for females than males and the average years of experience was higher for female principals than male principals (Table 3-22). In 20162017, 10.1 percent of full-time public school principals was eligible to retire with combined age and years of experience of 88 or more (Table 3-24). The average salary of full-time public school principals increased by 2.3 percent between 2015-2016 and 2016-2017. The average salary of principals in the largest enrollment category was 34.2 percent higher than the average salary of principals in the smallest enrollment category (Table 3-25).

## Superintendents

The tables in this section present data on full-time superintendents in lowa public schools. The percent of superintendents with specialist/doctorate degrees decreased between 2015-2016 and 2016-2017. The percent of female superintendents decreased (Table 3-26). The percent of female superintendents was highest in the largest enrollment category in 2016-2017. The percent of superintendents with specialist/ doctorate degrees was highest in the largest and smallest enrollment categories (Table 3-27). The average salary of female superintendents was 1.8 percent higher than male superintendents. The percent of superintendents with specialist/doctorate degrees was higher for females than males (Table 3-28). The percent of superintendents with combined age and experience of 88 years or more and therefore eligible to retire in 2016-2017 was 22.3 percent (Table 3-30). The average salary of superintendents increased by 4.0 percent between 2015-2016 and 2016-2017 (Table 3-31).

Notes: Every district is required to have a superintendent. There are a number of smaller districts that share superintendents. The one superintendent at the AEA is AEA staff that is also serving as a superintendent in a public district.

## Teacher, Principal, and Superintendent Salary Comparison

The average salary of superintendents had a higher percentage increase than the average salary of teachers and principals from 2000-2001 to 2005-2006 and in 2009-2010 to 2016-2017. The average salary of teachers had a higher percentage increase than the average salary of principals and superintendents from 2006-2007 to 2008-2009. In 2016-2017, principals had the lowest percentage increase in average salary (Figure 3-10 and Table 3-32).

Notes: Includes AEA staff.
Teacher figures for 2016-2017 represent average salaries for full-time public school staff with teaching position codes. There were approximately 12,000 full-time public school staff in 2016-2017 with teaching position codes who also reported that they served in the capacity of administrator (superintendent, principal, etc.) and/or student support personnel (curriculum consultant, teacher leader, etc.). Average salaries for these staff include salaries for these additional responsibilities.

## Public School Professional School Counselors

The percent of female professional school counselors, the percent of minority professional school counselors, and the percent of professional school counselors with advanced degrees increased slightly between 2015-2016 and 2016-2017 (Table 3-33). All districts are required by lowa Code (256.11) to have a professional school counselor who is licensed by the Board of Educational Examiners. Districts are able to share professional school counselors with another district. The percent of professional school counselors eligible to retire with combined age and years experience of 88 or more was 9.4 percent in 2016-2017 (Table 3-36). The average salary of professional school counselors increased by 1.4 percent between 2015-2016 and 2016-2017 (Table 3-37).

## Public School Library/Media Staff

Library/media staff members who are licensed through the Board of Educational Examiners have the position title of teacher librarian/media specialists. Districts are required by lowa Code (256.11) to have a licensed library/media specialist. Districts are able to share library/media specialists with another district. There was an increase in the percent of library/media specialists with advanced degrees between 2015-2016 and 2016-2017 (Table 3-38). The number of full-time library/media specialists decreased in 2016-2017 (Table 3-39). The average salary of library/media specialists increased by 3.2 percent between 2015-2016 and 2016-2017 (Table 3-40). Library/media associates are staff members that support the library/media specialists in the library/media center. The number of library/media associates decreased by 1.5 percent between 2015-2016 and 2016-2017 (Table 3-41).

## Area Education Agency (AEA) Licensed Staff

There were nine area education agencies (AEAs) in lowa in 2016-2017. The personnel in AEAs develop and provide programs, services, leadership in school improvement, professional development, emerging educational practices, school-community planning, curriculum, special education, school technology, and media services to school districts in the state. As seen in Table 3-42, the percent of female AEA staff has increased slightly and the percent of minority AEA staff increased slightly between 2015-2016 and 2016-2017. The average salary of AEA staff increased by 2.6 percent between 2015-2016 and 2016-2017. Almost half of the AEA staff in 2016-2017 held a Special Education Support position (Table 3-43).

Table 3-42

| Characteristics of lowa Full-Time Licensed AEA Staff | 2000-2001, | 2015-2016 and | 2016-2017 |

| Total | 2,187 | 99.7\% |

Source: Iowa Department of Education, Bureau of Information and Analysis, Basic Educational Data Survey, Staff files.
Notes: This total may not match the total staff in Table 3-42 because that one person could have more than one position. The superintendent at the AEA is AEA staff that is also serving as superintendent in a public district.

## Licensed Staff State Totals

Table 3-44 shows the distribution of public and nonpublic school licensed staff by AEA in 2016-2017. AEA 267 and Heartland AEA had the highest percent of districts. Heartland AEA had the highest percent of public school and nonpublic school licensed staff. Mississippi Bend AEA had the lowest percent of districts. Keystone AEA had the lowest percent of public school licensed staff and Green Hills AEA had the lowest percent of nonpublic school licensed staff.

Table 3-44

Distribution of lowa Public and Nonpublic School Total Full-Time Licensed Staff by AEA, 2016-2017

|  | Districts |  | Public School Licensed Staff |  | Nonpublic School Licensed Staff |  |

Notes: AEA full-time licensed staff are included.
Figures may not total due to rounding.

## Public School Nurses

Iowa Code (256.11) requires each school district to have a nurse that is licensed by the Board of Nursing. Some districts share a nurse with another district or contract out for nurses. Registered Nurses are licensed by the Board of Nursing, have a baccalaureate degree, have a statement of professional recognition (SPR) issued by the Board of Educational Examiners (BOEE), and are reported as licensed staff on the Fall BEDS staff collection. Registered Nurses that are licensed by the Board of Nursing have an associate degree or diploma, may practice in a school district, but they do not qualify for a school nurse SPR. These nurses are reported as non-licensed staff on the Fall BEDS staff collection. The nurse full-time equivalent (FTE) counts listed in Table 3-45 include nurses with a SPR and nurses without a SPR.

Table 3-45
Iowa Public School Nurse FTE by Enrollment Category, 2015-2016 and 2016-2017

| Enrollment Category | $2015-2016$ | $2016-2017$ | \% Change in FTE Nurses 2015-2016 to 2016-2017 |
| ---: | :---: | :---: | :---: |
| $<300$ | 10.8 | 12.8 | $18.5 \%$ |
| $300-599$ | 73.9 | 74.9 | $1.4 \%$ |
| $600-999$ | 88.1 | 84.4 | $-4.2 \%$ |
| $1,000-2,499$ | 147.2 | 147.0 | $-0.1 \%$ |
| $2,500-7,499$ | 119.2 | 126.4 | $6.1 \%$ |
| $7,500+$ | 157.8 | 158.0 | $0.1 \%$ |
| State | 596.9 | 603.4 | $1.1 \%$ |

Source: Iowa Department of Education, Bureau of Information and Analysis, Basic Educational Data Survey, Staff files.
Notes: Does not include AEA staff. Every district is required to have a nurse. Some districts may share with another district. Does not include nurses contracted with an outside agency such as a hospital, clinic or county health department. Figures may not total due to rounding.

## Program

The program chapter provides information regarding the school district organizational structure, curriculum data regarding courses offered and taught, class size for kindergarten through third grade, technology expenditures, and availability of computers.

## Districts and Schools

The number of public school districts in lowa has declined over time. The percent of districts without a public high school has increased since 2002-2003 with the exception of 2005-2006 and 2014-2015 (Table 4-1). In 2000-2001, about two-thirds of lowa districts had two or more elementary and middle/junior high schools. In 2015-2016 and 2016-2017, about two-thirds of the school districts had a single elementary, middle, and high school (Table 4-2).

Table 4-1

| Number of Iowa Public School Districts and Number of Districts Without a Public High School2000-2001 to 2016-2017 |  |  |  |
| :---: | :---: | :---: | :---: |
| Year | Number of Public School Districts | Number of Districts Without a Public High School | Percent of Districts Without a Public High School |

## Carnegie Unit Taught

Iowa Administrative Code 12.5 (14) defines a Carnegie unit as the equivalent of a course that meets a minimum of 200 minutes per week for 36 weeks or is taught for the equivalent of 120 hours of instruction. In other words, one Carnegie unit is represented by a course that is offered and taught daily for the entire school year.

The average number of Carnegie units offered and taught was directly correlated with enrollment categories in all years listed (Table 4-3). With the exception of foreign language for districts with less than 300 students, all district sizes on average met or exceeded state minimum requirements in major curriculum areas. The districts with 7,500 students or more provided greatest average number of units in all subject areas listed.

Table 4-3
Average Curriculum Units Offered and Taught by Accreditation Area and District Enrollment Category 2010-2011, 2015-2016 to 2016-2017

|  | Enrollment Category |  |  |  |  |  |  |  |

[^6]
# Enrollments in Foreign Language, Algebra II, Higher-Level Mathematics, and Higher-Level Science Courses 

The Iowa Department of Education started to collect course-taken data at the student level through SRI (EASIER) in 2004-2005. Along with the lowa Student State ID System, SRI can track a high school student's course taken from 9th grade to 12th grade. A real four-year course-taken pattern has been available for the Annual Condition of Education Report since 2008. Tables 4-4 to 4-14 describe lowa public high school four-year enrollment in foreign language, Algebra II, higher-level mathematics (pre-calculus, calculus, statistics, trigonometry, advanced placement mathematics, and other specific courses identified as advanced mathematics), and higher-level science (chemistry and physics) courses for the graduating classes of 2016 and 2017. The course enrollments only include the students who enrolled in lowa public high schools in each of the last four years. Each table shows non-duplicate enrollment at the state level and by district enrollment category. Gender comparisons are reported by subject areas.

Table 4-4 examines foreign language course enrollment in lowa public high schools for the 2016 and 2017 graduating class. Overall, 85.2 percent of the students in these two graduating classes took at least one foreign language course between 2012-2013 and 2015-2016 and between 2013-2014 and 2016-2017. The female enrollment in foreign languages was higher than male enrollment. The percent of students enrolled in foreign language courses was higher for the districts with enrollment between 2,500 and 7,499.

More than 27,000 of the students in the graduating class of 2017 took at least one foreign language course, almost 24,000 of them took Spanish (Table 4-6). Six other major languages French, German, Japanese, Chinese, Italian, and Russian, along with other foreign languages were taken by 4,831 students in that class. The enrollment in Table 4-5 can be duplicated if a student took courses in more than one language. However, one student is only counted once if his or her course taken was in one language at different levels.

Table 4-8 shows the Algebra II courses taken for the graduating classes of 2016 and 2017 by enrollment category. The total percent of the students who took Algebra II was 70.5 in the class of 2016 and 72.7 percent in the class of 2017. The female enrollment in Algebra II was higher than males (Table 4-7).

A total of 14,569 students ( 45.3 percent) in the 2016 class took one or more higher-level mathematics courses. The number and percent enrollment was slightly higher in the class of 2017. The female enrollment in higher-level mathematics was higher than male enrollment. The percent of students enrolled in higher-level mathematics courses was higher for the districts with enrollment between 2,500 and 7,499 than the districts in other enrollment categories in both classes shown (Tables 4-9 and 4-10).

Generally speaking, female students had about 9 percent more in chemistry or advanced chemistry enrollment than male students (Table 4-11).

Table 4-12 shows the chemistry courses taken by enrollment category for the graduating classes of 2016 and 2017. The data indicate that the greatest percent of students enrolled in chemistry courses are from districts with enrollments between 2,500-7,499.

About 31 percent of the students took physics and advanced physics for the classes of 2016 and 2017 (Table 4-13). The highest percentages of physics enrollment were in the districts with enrollment more than 2,500 students. Female physics enrollment was 5.5 percent less than the male enrollment for the class of 2016 and was 4.3 percent less than the male enrollment for the 2017 class.

This report starts to report course taken patterns by race/ethnicity and other subgroups.

## Senior Year Plus

Based on Iowa Code Chapter 261E, several existing programs are under the Senior Year Plus umbrella to provide college credit opportunities to high school students. These programs are Advanced Placement (AP), Concurrent Enrollment (under 28E agreement for concurrent credit offered by community colleges) and postsecondary enrollment options (PSEO). This section of the report presents the high school enrollment data in each program for three years or more.

## Advanced Placement (AP) Courses

AP courses are college-level classes taught by highly qualified high school teachers who use the College Board course guidance. A school district can make AP courses available through on-site teaching, collaborating with another district or using lowa AP online academy. High school students can choose from nearly 40 AP courses to enroll in one or more courses. There is a section on AP exam and AP test scores in the Student Performance Chapter in this annual report.

Figure 4-1 shows an eight-year trend of AP courses taken by lowa public high school students and AP enrollments from 2009-2010 to 2016-2017. In lowa, AP enrollments and courses taken are higher in 20162017 than the figures in earlier years shown.

Each year, more than 50 percent of lowa districts (only those districts that had a public high school) had AP enrollments. (Table 4-15).

AP enrollments by grade are displayed in Table 4-16. In the last eight years, about half of the AP enrollments were 12th graders.

Table 4-17 and Figure 4-2 show the AP courses taken by subject areas. The distributions are similar from 2015-2016 and 2016-2017, the top courses taken were in the social studies area, followed by English language arts and science. Mathematics was the fourth highest course taken.

Note: Each year, about 1 percent of the AP courses taken were in "other" subject areas. For details, see Table 4-17.

## Concurrent Enrollment

Concurrent enrollment courses are offered by community colleges through 28E agreements between school districts and community colleges. The two slightly different designed courses are: one, the courses are designed for both college and high school students for concurrent credit offered by community colleges and two, the courses are designed for high school students offered by community colleges to bridge high school students to community college programs and typically provide coursework in science, technology, engineering, and mathematics (STEM) or other highly technical areas. The second kind of courses through 28E agreements between high school and community college are designed for career academy concurrent credit.

Figure 4-3 shows eight-year trends of concurrent enrollment courses taken by lowa public high school students and concurrent enrollment from 2009-2010 to 2016-2017. Concurrent enrollment and courses taken are much higher in 2016-2017 than the figures in 2009-2010.

Each year, 80 to 99 percent of Iowa districts (only those districts that had a public high school) had concurrent enrollments. In general, an upward trend of districts with concurrent enrollment is reported in Table 4-18.

Concurrent enrollments by grade are displayed in Table 4-19. In the last eight years, close to half of the concurrent enrollments were high school seniors.

Table 4-20 and Figure 4-4 show the concurrent enrollment courses taken by subject areas. The distributions are similar from 2009-2010 to 2016-2017, the highest percentages of courses taken were in career technical/vocational education, followed by English language arts. Social studies and mathematics were the third and fourth highest courses taken respectively.

## Postsecondary Enrollment Options (PSEO) Act

The Postsecondary Enrollment Options (PSEO) Act was enacted in 1987. The purpose of the act was to promote rigorous academic pursuits and to provide a wider variety of options to high school students by enabling 11th and 12th grade students to enroll part-time in nonsectarian courses in eligible postsecondary institutions of higher learning in lowa. Ninth and 10th grade students who are identified as talented and gifted students according to the school district's criteria and procedures may also participate under the Act (See lowa Code-261C.2). The Department of Education began collecting data on PSEO in 1993.

Figure 4-5 shows eight-year trends of PSEO courses taken by lowa public high school students and PSEO enrollments from 2009-2010 to 2016-2017. While the concurrent courses taken are much higher the last few years than the early years (see Figure 4-3) in contrast, the trend switches between PSEO and concurrent enrollment due to recent year's better data reporting from lowa school districts.

Each year, 88 to 66 percent of lowa districts (only those districts that had a public high school) had PSEO enrollments. However, a downward trend of PSEO enrollment districts is reported in Table 4-21.

PSEO enrollments by grade are displayed in Table 4-22. In the last eight years, about two-thirds of the PSEO enrollments were 12th graders.

Table 4-23 and Figure 4-6 show the PSEO courses taken by subject areas. The distributions are similar in 2015-2016 and 2016-2017, the majority of courses taken were in the social studies area.

## Class Size

## Overview

The results of 17 years of class size reduction efforts, initiated by the lowa Early Intervention Block Grant Program, are provided in this section. The lowa Early Intervention Block Grant Program focused attention on class size reduction in kindergarten through third grade and established the goal of reaching an average class size of 17 students or less.

Public school districts report the number of kindergarten, first, second and third grade classroom sections, students, teachers, and aides by building through the Fall Basic Educational Data Survey (BEDS). Special education teachers, aides and "specialty" teachers, such as physical education, art and music teachers are excluded from the teacher count.

Since the purpose was to calculate an average class size for each grade, kindergarten through grade three classrooms defined as multi-age or multi-grade classrooms were reported as grade level "other" and were not considered in the calculation of average class size. Special classrooms for special education students and other "pull-out" situations were also excluded. Average class size was calculated by dividing the number of students by the number of classrooms for each grade level.

## Average Class Size $=$ Number of Students $/$ Number of Classrooms

Since average class size uses the number of classrooms as the denominator, adding additional teachers to a classroom does not lower the average class size for that grade level. The use of the classroom aides also does not reduce average class size at the district or state level.

## Trends

Figures 4-7 to 4-10 provide a summary of average class size in grades kindergarten through third in lowa public schools for the past 17 years. None of the grades reached the state goal of 17 students per classroom during the years reported.

Table 4-24 shows the change in BEDS enrollment compared to the change in class size. From 1998-1999 to present, enrollment increased more than that of average class size for all grades, with kindergarten experiencing an overall decrease in class size.

Table 4-25 shows the comparison between teachers, students and class size. The number of students used in this table were reported by districts for the purpose of calculating average class size. First and second grades had a modest increase, while kindergarten showed a modest average class size decrease and third grade remained the same as the previous year.

Summary statistics are presented in Table 4-26.

## Class Size vs. District Size

Table 4-27 shows average class size comparison for kindergarten through grade three by enrollment category for 1998-1999 and 2016-2017. In general, average class size tended to increase as enrollment category increased. The less than 300 enrollment category showed an average of less than 17 students per classroom for all grade levels. In all cases for kindergarten through grade three, the average class size in enrollment categories greater than 300 exceeded the goal of 17 students per classroom.

## Table 4-27

Average Class Size Comparison for Iowa Public Schools by Enrollment Category, Kindergarten to Third Grade 1998-1999 and 2016-2017

| Enrollment Category | K |  | 1st |  | 2nd |  | 3rd |  |

## Class Size Funding and Expenditures

Table 4-28 shows the lowa class size reduction allocations since 2010. In 1999, the lowa General Assembly enacted, and Governor signed, HF 743, lowa Early Intervention Block Grant Program to fund class size reduction. Appropriations for HF 743 began in fiscal year 2000.

Table 4-29 shows the fiscal year 2016 lowa Early Intervention Block Grant Program expenditures. Staff salaries absorbed the largest amount of lowa Early Intervention Block Grant funds in fiscal year 2016 at 75.85 percent.

Table 4-28

| State Class Size Reduction Allocation for lowa Public Schools FY 2010 to FY 2017 |  |  |
| :---: | :---: | :--- |
|  | Fiscal Year | State Allocation |

Notes: Total expenditures reported exceeded the amount of revenues. The differences are dollars spent from the General Fund.
Detail for expenditures and percent may not equal the total due to rounding.

## Technology

## Expenditures for Computer Hardware and Software

Expenditures for computer hardware and software are collected from school districts as a part of the Certified Annual Financial Report. Table 4-30 provides the number of districts, software and hardware expenditures, district enrollment and per pupil expenditures for 2000-2001 and the two most recent years for which expenditures were available. Figure 4-11 provides computer hardware and software per pupil expenditures back to 2000-2001.

Table 4-31 shows computer hardware and software expenditures data by enrollment category for 20002001 and the two most recent years for which expenditures were available. Total expenditures increased significantly in each size category except the $<300$ and the 1,000-2,499 sized districts. The state's largest districts (enrollment>=7,500) spent more than 28 percent more on technology in 2015-2016 despite a meager 1 percent increase in enrollment.

Table 4-30

| Total Expenditures and Average Per Pupil Expenditures for Computer Software and Hardware in Iowa Public Schools 2000-2001, 2014-2015 and 2015-2016 |  |  |  |  |  |  |  |  |

## Availability of Computers

As a part of the Basic Educational Data Survey (BEDS), Iowa public school districts report on the number of computers made available for student use. The Department of Education has collected this information since 1995-1996. However, in 2012-2013 the definition of student accessible computer was revised to include tablets. The ratio of students per computer is calculated by dividing the number of students reported on the Certified Enrollment by the number of computers available for student use.

Figures 4-12 and 4-13, and Table 4-32 provide the pupil to computer ratios. As of 2016-2017, the statewide pupils per computer has reached 1.0. Districts with enrollments of 7,500 or more are the furthest behind with 1.3 pupils per computer.

Table 4-33 provides the number of computers per pupil by school type within enrollment category. In general, students in higher grades have more access to a computer than students in lower grades. Statewide high schools remained at one pupil per computer and middle schools and junior high schools continued to exceed the one pupil per device goal. Districts with largest enrollments continue to lag behind their smaller sized peers.

EL - Elementary

## Bandwidth

Table 4-34 shows bandwidth for public schools in lowa by enrollment category. These ranges have changed from prior years, and now reach into the gigabit ( 1,000 megabits) realm. All but one of the largest districts have bandwidths greater than 100 megabits and 76 percent of the largest districts are in the gigabit range. Table 4-35 provides the number of buildings and bandwidth by school type within enrollment category. In contrast to computer accessibility, the percentage of schools with gigabit-level bandwidth decreases as the grade levels increase. Thirty percent of elementary schools reported bandwidth of gigabit or more while only 17 percent of high schools have such access.

## Student Performance

The student performance chapter contains two major sections. The first section reports the State Indicators of Student Success data required by Iowa Administrative Code. Data from the lowa Assessments are included. The second section provides achievement trends and student performance for all students by enrollment categories, gender, race/ethnicity, and other subgroups. Besides the lowa Assessments results, results from the National Assessment of Educational Progress (NAEP), ACT, SAT, and Advanced Placement Assessments are included. In addition, Basic Educational Data Survey (BEDS) and the Student Reporting in lowa (SRI) data provide information pertaining to dropouts for grades 7-12 and 9-12, high school graduation rates, high school graduate intentions, postsecondary enrollment options for public school students, and suspension and expulsion data.

Since 2011-2012, lowa Testing Programs introduced Forms E and F of the lowa Assessments for lowa schools. The Iowa Assessments were linked to the lowa Tests of Basic Skills (ITBS) and lowa Tests of Educational Development (ITED), Forms A and B, through a national study. Proficiency cut scores for the lowa Assessments are presented in Standard Score metric and are specific to grade, content, and time of year.

## State Indicators of Student Success

The seven required state indicators for student success include:

1. The percentage of all fourth, eighth, and eleventh grade students achieving a proficient or higher reading status on the lowa Assessments;
2. The percentage of all fourth, eighth, and eleventh grade students achieving a proficient or higher mathematics status on the lowa Assessments;
3. The percentage of all eighth and eleventh grade students achieving a proficient or higher science status on the lowa Assessments;
4. The percentage of students considered as dropouts for grades 7 through 12 and the percentage of high school students who graduate;
5. The percentage of high school seniors who intend to pursue postsecondary education/training;
6. The percentage of high school students achieving at the ACT national average score or above and the percentage of students achieving an ACT score of 20 or above; and
7. The percentage of high school graduates who complete a "core" high school program of four years of English-language arts and three or more years each of mathematics, science, and social studies (Iowa Administrative Code - 12.8(3))

Subgroup data are shown for gender, race/ethnicity, socioeconomic status (determined by eligibility for free or reduced price lunch), disability status (determined by the presence of an individualized education program - IEP), primary language status (determined by English language learner status), and migrant/ non-migrant status (defined by Title I requirements). Separate tables show achievement level performance for students by gender, race/ethnicity, disability, socioeconomic, and primary language subgroups. These subgroups vary in size in a given biennium, and each varies in size from year to year. The subgroup data should not be averaged to obtain an overall value and will not match the data for the total grade group. Due to the data source change, the migrant student data are not available in the 2016 and 2017 annual reports.

## Iowa Student Counts for Iowa Assessments Reading, Mathematics, and Science Test-Takers Including Subgroups

Three of the seven indicators requested by the State Board of Education are percent proficient for lowa students in the selected grades in each subgroup on the lowa Assessments in reading, mathematics, and science.

Since group size varies from one subgroup to another, it is important to consider the students tested by subgroup. The approximate number of students tested by grade (in grades 4,8 , and 11 ) and by subgroup for reading and mathematics for the biennium periods 2011-2013 through 2015-2017 are shown in Tables $5-1$ and 5-2. Table 5-3 shows the approximate average number of grade 8 and 11 students tested by subgroup in science for the same three biennium periods. The number of students tested shown in Tables $5-1$ to $5-3$ include both public and nonpublic school participants. The students in the biennium analysis are those who enrolled for a full academic year (FAY), as well as those who were enrolled only part of the academic year in lowa schools, plus some home-schooled students who took the lowa Assessments in reading, mathematics, or science.

Table 5-1

Approximate Number of Iowa Students Tested on the lowa Assessments Reading Tests by Subgroup Biennium Periods 2011-2013 to 2015-2017

| Grade 4 | $\mathbf{2 0 1 1 - 2 0 1 3}$ | $\mathbf{2 0 1 2 - 2 0 1 4}$ | $\mathbf{2 0 1 4 - 2 0 1 6}$ | $\mathbf{2 0 1 5 - 2 0 1 7}$ |

${ }^{3}$ IEP indicates special education status, students with IEPs are classified as special education students.

## Reading

Indicator: Percentage of 4th, 8th, and 11th grade students achieving proficient or higher reading status on the lowa Assessments Reading Tests (reported for all students and by gender, race/ethnicity, socioeconomic status, disability, and primary language status).

Figure 5-1
Percent of lowa Fourth Grade Students Proficient on the lowa Assessments Reading Tests Biennium Periods 2011-2013 to 2015-2017

Source: Iowa Testing Programs, The University of lowa.
Notes: Percentages for each biennium period represent average percentages of proficient students for the two school years represented, e.g., 2013-2015 represents the average for the 2013-2014 and the 2014-2015 school years. A student designated as proficient can, at a minimum, do the following:
Usually understands factual information and new words in context.
Usually is able to make inferences and interpret either nonliteral language or information in new contexts. Often can determine a selection's main idea and analyze its style and structure.

Percent of lowa Fourth Grade Students Proficient on the lowa Assessments Reading Tests by Gender Biennium Periods 2011-2013 to 2015-2017

Source: Iowa Testing Programs, The University of Iowa.
Notes: Percentages for each biennium period represent average percentages of proficient students for the two school years represented, e.g., 2013-2015 represents the average for the 2013-2014 and the 2014-2015 school years. A student designated as proficient can, at a minimum, do the following:
Usually understands factual information and new words in context.
Usually is able to make inferences and interpret either nonliteral language or information in new contexts. Often can determine a selection's main idea and analyze its style and structure.

## Percent of lowa Fourth Grade Students Proficient on the lowa Assessments Reading Tests by Socioeconomic Status* Biennium Periods 2011-2013 to 2015-2017

Source: Iowa Testing Programs, The University of lowa.
Notes: Percentages for each biennium period represent average percentages of proficient students for the two school years represented, e.g., 2013-2015 represents the average for the 2013-2014 and the 2014-2015 school years.
A student designated as proficient can, at a minimum, do the following:
Usually understands factual information and new words in context.
Usually is able to make inferences and interpret either nonliteral language or information in new contexts.
Often can determine a selection's main idea and analyze its style and structure.
*Socioeconomic status is determined by eligibility for free or reduced price meals

Figure 5-5
Percent of Iowa Fourth Grade Students Proficient on the lowa Assessments Reading Tests by Disability Status* Biennium Periods 2011-2013 to 2015-2017

Source: Iowa Testing Programs, The University of lowa.
Notes: Percentages for each biennium period represent average percentages of proficient students for the two school years represented, e.g., 2013-2015 represents the average for the 2013-2014 and the 2014-2015 school years.
A student designated as proficient can, at a minimum, do the following:
Usually understands factual information and new words in context.
Usually is able to make inferences and interpret either nonliteral language or information in new contexts.
Often can determine a selection's main idea and analyze its style and structure.
*Disability status is determined by the presence of an individualized education program (IEP).

Figure 5-6
Percent of lowa Fourth Grade Students Proficient on the lowa Assessments Reading Tests by Primary Language Status* Biennium Periods 2011-2013 to 2015-2017

Biennium Periods
Source: Iowa Testing Programs, The University of lowa.
Notes: Percentages for each biennium period represent average percentages of proficient students for the two school years represented, e.g., 2013-2015 represents the average for the 2013-2014 and the 2014-2015 school years.
A student designated as proficient can, at a minimum, do the following:
Usually understands factual information and new words in context.
Usually is able to make inferences and interpret either nonliteral language or information in new contexts.
Often can determine a selection's main idea and analyze its style and structure.
*Primary language status is classified by English and English language learner and determined according to the following definition: English language learner refers to a student who has a language other than English and the proficiency in English is such that the probability of the student's academic success in an English-only classroom is below that of an academically successful peer with an English language background.

Is developing an understanding of many math concepts; usually is able to solve simple and complex word problems and use estimation methods; and can interpret data from graphs and tables.

## Percent of Iowa Fourth Grade Students Proficient on the lowa Assessments Mathematics Tests by Gender Biennium Periods 2011-2013 to 2015-2017

Source: Iowa Testing Programs, The University of Iowa.
Notes: Percentages for each biennium period represent average percentages of proficient students for the two school years represented, e.g., 2013-2015 represents the average for the 2013-2014 and the 2014-2015 school years. A student designated as proficient can, at a minimum, do the following: Is developing an understanding of many math concepts; usually is able to solve simple and complex word problems and use estimation methods; and can interpret data from graphs and tables.

Figure 5-21
Percent of lowa Fourth Grade Students Proficient on the lowa Assessments Mathematics Tests by Race/Ethnicity Biennium Periods 2011-2013 to 2015-2017

## Probable Postsecondary Success

Indicator: Percentage of students achieving an ACT score above the national average and the percentage of students achieving an ACT score of 20 or above.

Figure 5-54

[^10]Percent of Iowa ACT Participants Completing Core High School Program Graduating Classes of 2006 to 2017

Source: ACT, Inc., The Condition of College and Career Readiness.
Notes: ACT classifies high school programs consisting of four years of English and three or more years each of mathematics, natural science, and social studies as "core" programs. The lower line shows the percent of ACT test takers not reporting any information in their courses taken.

## Student Performance by Tests and Areas

## Iowa Assessments

The standardized achievement tests, lowa Assessments, are developed by lowa Testing Programs (ITP) at The University of lowa for use nationally in grades K-12. During the 2016-2017 school year, all lowa public school districts and over 180 nonpublic schools participated in the ITP achievement assessments. The biennium trends of the percent of public and nonpublic school students proficient in grades 4, 8, and 11 in reading and mathematics, and the percent of students in grades 8 and 11 proficient in science are included in the state indicators.

## Iowa Assessments Achievement Level Distributions

Form E of the lowa Assessments with 2011 national norms was used for the first time during the 20112012 and 2012-2013 school years. For the 2013-2014 to 2016-2017 school years an equated form, Form F, was administered. The achievement level data on lowa Assessments are shown for all students in grades 4, 8, and 11 in reading and mathematics and in grades 8 and 11 in science between 2011-2013 and 20152017. Proficiency cut scores for the three achievement levels of the lowa Assessments are calculated using a Standard Score metric and are specific to grade, content, and time of year. The Standard Score metric allows teachers and parents to monitor growth across years and make connections between growth and proficiency.

## Achievement Levels for Reading

Figures 5-56 through 5-61 show the achievement level trends for reading for all students in grades 4, 8, and 11 for the biennium periods 2011-2013 through 2015-2017. Less students were categorized in the Intermediate achievement level and more students were categorized in the High achievement level during 2013-2015 to 2015-2017 in reading in grade 4 (Figure 5-56) and grade 8 (Figure 5-57). More students were categorized in the Low achievement level and less students were categorized in the High achievement level in grade 11 (Figure 5-58) in 2012-2014 to 2015-2017.

Figure 5-56

## Iowa Assessments Reading - Grade 4 Percentages for lowa Achievement Levels Biennium Periods 2011-2013 to 2015-2017

Source: Iowa Testing Programs, The University of lowa.
Notes: The descriptions below indicate how the typical grade 4 student at each achievement level performs with respect to the Iowa Assessments Reading Tests:
HIGH PERFORMANCE LEVEL
Understands factual information; draws conclusions and makes inferences about the motives and feelings of characters; identifies the main idea; evaluates the style and structure of the text; and interprets nonliteral language.
INTERMEDIATE PERFORMANCE LEVEL
Understands some factual information; sometimes can draw conclusions and make inferences about the motives and feelings of characters; and is beginning to be able to identify the main idea, evaluates the style and structure of the text, and interpret nonliteral language.
LOW PERFORMANCE LEVEL
Understands little factual information; seldom draws conclusions or makes simple inferences about characters; rarely grasps the main idea, evaluates the style and structure of the text, or interprets nonliteral language.
Percentages for each biennium period represent average percentages of proficient students for the two school years represented, e.g., 2013-2015 represents the average for the 2013-2014 and the 2014-2015 school years. Figures may not total 100 percent due to rounding.

Figure 5-57
Iowa Assessments Reading - Grade 8 Percentages for lowa Achievement Levels
Biennium Periods 2011-2013 to 2015-2017

Source: Iowa Testing Programs, The University of Iowa.
Notes: The descriptions below indicate how the typical grade 8 student at each achievement level performs with respect to the lowa Assessments Reading Tests:
HIGH PERFORMANCE LEVEL
Understands factual information; draws conclusions and makes inferences about the motives and feelings of characters; makes applications to new situations, identifies the main idea; evaluates the style and structure of the text; and interprets nonliteral language.
INTERMEDIATE PERFORMANCE LEVEL
Understands some factual information; sometimes can draw conclusions and make inferences about the motives and feelings of characters; and apply what has been read to new situations, and sometimes can identify the main idea, evaluate the style and structure of the text, and interpret nonliteral language.
LOW PERFORMANCE LEVEL
Understands little factual information; can seldom draw conclusions or makes simple inferences about characters; usually cannot apply what has been read to new situations; can rarely grasp the main idea, evaluates the style and structure of the text, and interprets nonliteral language.
Percentages for each biennium period represent average percentages of proficient students for the two school years represented, e.g., 2013-2015 represents the average for the 2013-2014 and the 2014-2015 school years. Figures may not total 100 percent due to rounding.

Figure 5-58

Source: Iowa Testing Programs, The University of lowa.
Notes: The descriptions below indicate how the typical grade 11 student at each achievement level performs with respect to the Iowa Assessments Reading Tests:
HIGH PERFORMANCE LEVEL
Understands factual information; infers the traits and feelings of characters, identifies the main idea; identifies author viewpoint and style, interprets nonliteral language; and judges the validity of conclusions.
INTERMEDIATE PERFORMANCE LEVEL
Understands some factual information; sometimes can make inferences about characters; identifies the main idea, and identifies author viewpoint and style; occasionally can interpret nonliteral language and judge the validity of conclusions.
LOW PERFORMANCE LEVEL
Understands little factual information; seldom makes simple inferences; rarely grasps the main idea; and usually cannot identify author viewpoint and style, interpret nonliteral language, or judge the validity of conclusions.
Percentages for each biennium period represent average percentages of proficient students for the two school years represented, e.g., 2013-2015 represents the average for the 2013-2014 and the 2014-2015 school years. Figures may not total 100 percent due to rounding.

## Achievement Levels for Mathematics

Figures 5-59 through 5-61 show the mathematics achievement level distributions for students in grades 4, 8, and 11 for the biennium periods 2011-2013 through 2015-2017. More students performed at the High achievement level during 2013-2015 to 2015-2017 in mathematics in grades 4 (Figure 5-59), 8 (Figure 5-60), and 11 (Figure 5-61).

Figure 5-59
Iowa Assessments Mathematics - Grade 4 Percentages for lowa Achievement Levels Biennium Periods 2011-2013 to 2015-2017

Source: Iowa Testing Programs, The University of Iowa.
Notes: The descriptions below indicate how the typical grade 4 student at each achievement level performs with respect to the Iowa Assessments Mathematics Tests:
HIGH PERFORMANCE LEVEL
Understands math concepts, solves complex word problems, uses various estimation methods, and is learning to interpret data from graphs and tables.
INTERMEDIATE PERFORMANCE LEVEL
Is developing an understanding of most math concepts, is developing the ability to solve simple and complex word problems and to use estimation methods, and is beginning to develop the ability to interpret data from graphics and tables.
LOW PERFORMANCE LEVEL
Is beginning to develop an understanding of many math concepts and an ability to solve simple word problems. Is generally unable to use estimation methods, and is seldom able to interpret data from graphs and tables.
Percentages for each biennium period represent average percentages of proficient students for the two school years represented, e.g., 2013-2015 represents the average for the 2013-2014 and the 2014-2015 school years. Figures may not total 100 percent due to rounding.

Figure 5-60
Iowa Assessments Mathematics - Grade 8 Percentages for lowa Achievement Levels Biennium Periods 2011-2013 to 2015-2017

Source: Iowa Testing Programs, The University of Iowa.
Notes: The descriptions below indicate how the typical grade 8 student at each achievement level performs with respect to the ITBS test tasks that determine the lowa Assessments Mathematics Tests:
HIGH PERFORMANCE LEVEL
Understands math concepts and is developing the ability to solve complex word problems, uses a variety of estimation methods and interpret data from graphs and tables.
INTERMEDIATE PERFORMANCE LEVEL
Is beginning to develop an understanding of most math concepts and to develop the ability to solve word problems, use a variety of estimation methods, and interpret data from graphs and tables.
LOW PERFORMANCE LEVEL
Understands little about math concepts, is unable to solve most simple word problems or use estimation methods, and seldom able to interpret data from graphs and tables.
Percentages for each biennium period represent average percentages of proficient students for the two school years represented, e.g., 2013-2015 represents the average for the 2013-2014 and the 2014-2015 school years. Figures may not total 100 percent due to rounding.

Figure 5-61

## Iowa Assessments Mathematics - Grade 11 Percentages for lowa Achievement Levels Biennium Periods 2011-2013 to 2015-2017

Source: Iowa Testing Programs, The University of Iowa.
Notes: The descriptions below indicate how the typical grade 11 student at each level performs with respect to concepts and problems in the lowa Assessments Mathematics Tests:
HIGH PERFORMANCE LEVEL
Understands how to apply math concepts and procedures, makes inferences with quantitative information, and solves a variety of novel quantitative reasoning problems.
INTERMEDIATE PERFORMANCE LEVEL
Is beginning to develop the ability to apply a variety of math concepts and procedures, makes inferences about quantitative information, and solves a variety of novel quantitative reasoning problems.
LOW PERFORMANCE LEVEL
Demonstrates little understanding about how to apply math concepts and procedures, generally cannot make inferences with quantitative information, and cannot solve most novel quantitative reasoning problems.
Percentages for each biennium period represent average percentages of proficient students for the two school years represented, e.g., 2013-2015 represents the average for the 2013-2014 and the 2014-2015 school years.
Figures may not total 100 percent due to rounding.

## Achievement Levels for Science

Figure 5-62 shows the lowa Assessments science achievement level distributions for students in grade 8 and Figure 5-63 shows the science achievement level distributions for students in grade 11. Grade 8 students had a decrease in the percent of students performing at the Low achievement level and an increase in the percent of students performing at the High achievement level from 2011-2013 to 20142016. In 2013-2015 and 2015-2017, more grade 11 students performed in the Low level for science, while the percent of students at the Intermediate achievement level for grade 11 science decreased.

Figure 5-62
Iowa Assessments Science - Grade 8 Percentages for Iowa Achievement Levels Biennium Periods 2011-2013 to 2015-2017

Source: Iowa Testing Programs, The University of Iowa.
Notes: The descriptions below indicate how the typical grade 8 student at each achievement level performs with respect to the Iowa Assessments Science Tests: HIGH PERFORMANCE LEVEL
Usually understands ideas related to Earth and the universe and to the life sciences. Understands ideas related to the physical sciences and is able to demonstrate the skills of scientific inquiry. INTERMEDIATE PERFORMANCE LEVEL
Sometimes understands ideas related to Earth and the universe, the life sciences, and the physical sciences. Often can demonstrate the skills of scientific inquiry.
LOW PERFORMANCE LEVEL
Sometimes understands ideas related to Earth and the universe, but seldom understands ideas about the life sciences or the physical sciences. Rarely demonstrates the skills of scientific inquiry.
Percentages for each biennium period represent average percentages of proficient students for the two school years represented, e.g., 2013-2015 represents the average for the 2013-2014 and the 2014-2015 school years. Figures may not total 100 percent due to rounding.

Source: Iowa Testing Programs, The University of lowa.
Notes: The descriptions below indicate how the typical grade 11 student at each achievement level performs with respect to the Iowa Assessments Science Tests:
HIGH PERFORMANCE LEVEL
Makes inferences and predictions from data, recognizes the rationale for and limitations of scientific procedures, and usually judges the relevance and adequacy of information.
INTERMEDIATE PERFORMANCE LEVEL
Sometimes makes inferences or predictions from data, judges the relevance and adequacy of information, and recognizes the rationale for and limitations of scientific procedures.
LOW PERFORMANCE LEVEL
Rarely makes inferences or predictions from data, judges the relevance and adequacy of information, or recognizes the rationale for and limitations of scientific procedures.
Percentages for each biennium period represent average percentages of proficient students for the two school years represented, e.g., 2013-2015 represents the average for the 2013-2014 and the 2014-2015 school years. Figures may not total 100 percent due to rounding.

## National Assessment of Educational Progress (NAEP)

The National Assessment of Educational Progress (NAEP), conducted by the U.S. Department of Education since 1969, is the only national assessment of student achievement. The NAEP state assessments have been administered periodically in grades 4 and 8 since 1990 in the areas of reading, mathematics, science, and writing. In 2009, lowa participated in the first state NAEP assessment for grade 12 students.

NAEP began testing with the use of accommodations in reading in 1998 and in mathematics in 2000. The use of accommodations allows for the assessment of special needs students (e.g., students with disabilities, ELL students) in a small group setting, with extra time, or with more breaks to result in higher levels of inclusion. Tables and graphics in this section include the results for accommodations not permitted in the earlier years and for accommodations permitted in the most recent years.

## Scores Reported

NAEP assessment scores in reading and mathematics are reported on a scale range of 0 to 500 while the science and writing assessments are reported on a 300 point scale. lowa's average assessment scale scores in 2015 exceed the national averages in grades 4 and 8 for reading and in grade 4 for mathematics (Table $5-4)$. The lowa average score in grade 8 mathematics is not statistically different from the national average.

The National Assessment Governing Board uses three achievement levels for reporting student performance results: Basic, Proficient, and Advanced. Basic represents at least a partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at each grade. Proficient represents solid academic performance, and Advanced represents superior performance. Students not achieving the Basic level are classified as Below Basic.

Table 5-4

Average NAEP Scale Scores for Public Schools Grades 4, 8, and 12

| Subject | Grade | Year | Scale Score |  | Achievement Level Iowa Percent At or Above |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Notes: *Accommodations not allowed.
Observed differences are not necessarily statistically significant.
Detail may not sum to totals because of rounding.

## 161

The following figures show the scale score growth of lowa students on the NAEP for 2003 and 2015. The eleven other states classified as Midwestern states are also included for comparison. Iowa has not shown the growth in grade 4 reading or in grade 8 mathematics found in other states across the Midwest or across the nation.

ACT
ACT is a curriculum-based achievement exam designed to measure the academic skills that are taught in schools and deemed important for success in first-year college courses. A composite ACT score measures overall educational development and is based on assessments for English, mathematics, reading, and science reasoning. The ACT scores range from a low of 1 to a high of 36 and data are reported for various subgroups of students. Subgroups reported in this section include high school program type and gender.

High school program types are classified as "core" and "less than core." ACT defines "core" as high school programs consisting of four years of English, and three or more years of mathematics, natural science, and social studies. Students not meeting the "core" program standard are considered as "less than core" completers.

In 2017, the lowa participation rate was 67 percent. The rate for the nation has been lower than lowa rates for all years displayed. However, the gap is getting smaller in the last few years (Figure 5-68).

In lowa, almost 100 percent of the Des Moines school district's graduating classes of 2010 to 2017 are included in the profile. Clinton is the second district in lowa that had the most students in the classes of 2012 to 2017 tested.

Iowa's ACT composite score averages have consistently been one point higher than the national averages (Figure 5-69). Among 31 states for which ACT is the primary college-entrance exam (more than 50 percent graduates tested), lowa's average composite score of 21.9 in 2017 ranked second among the 31 states in the nation and in the Midwest states (Table 5-5).

## ACT Scores for Core and Less-than-Core Students

ACT defines the college-preparatory core curriculum as at least four years of English and at least three years each of mathematics, natural science, and social studies (Table 5-7). Core mathematics and natural science courses are beyond the introductory level. For example, a typical minimal core mathematics course might include Algebra I, Algebra II, and geometry one year each. A typical minimal core natural science course might include one year each of general science, biology, and chemistry or physics.

About 77 percent of lowa's 2017 graduates taking the ACT indicated that they participated in the core high school programs (Figure 5-70). The enforcement from 2008, for reporting seniors taking core high school programs, shows higher lowa and national percentages in the recent seven years.

Overall, average ACT composite scores for lowa students taking core programs have been approximately three points higher than those not taking core programs (Table 5-8). This trend has been consistent at more than two points difference score for nationwide students.

Table 5-7

| ACT Standards for Core High School Programs |  |  |  |
| :---: | :---: | :---: | :---: |
| Core Area | Years | Course | Credit |
| English | 4 or more | English 9, 10, 11, 12 | 1 year each |
| Mathematics | 3 or more | Algebra I \& II, Geometry | 1 year each |
|  |  | Trigonometry \& calculus (not precalculus), other math courses beyond Algebra II, computer math/computer | 1/2 year each |
| Social Studies | 3 or more | American history, world history, American government | 1 year each |
|  |  | Economics, geography, psychology, other history | 1/2 year each |
| Natural Science | 3 or more | General/physical/earth science, biology, chemistry, physics | 1 year each |

| 2008 | 23.1 | 20.6 | 2.5 | 22.0 | 19.5 | 2.5 |
| 2009 | 23.1 | 20.1 | 3.0 | 22.0 | 19.1 | 2.9 |
| 2010 | 23.0 | 19.6 | 3.4 | 22.0 | 18.9 | 3.1 |
| 2011 | 23.0 | 19.8 | 3.2 | 21.9 | 19.0 | 2.9 |
| 2012 | 22.8 | 19.6 | 3.2 | 21.8 | 19.1 | 2.7 |
| 2013 | 22.9 | 19.6 | 3.3 | 21.7 | 18.7 | 3.0 |
| 2014 | 22.9 | 19.6 | 3.3 | 21.8 | 18.9 | 2.9 |
| 2015 | 23.0 | 20.1 | 2.9 | 21.9 | 18.9 | 3.0 |
| 2016 | 22.9 | 20.0 | 2.9 | 21.9 | 18.7 | 3.2 |
| 2017 | 22.8 | 19.9 | 2.9 | 22.1 | 18.9 | 3.2 |

Source: ACT, Inc., The Condition of College and Career Readiness.
Notes: ACT classifies high school consisting of four years of English and three or more years of mathematics, natural science, and social studies as "core" programs.
The figures include all students tested, public as well as nonpublic.

## ACT Composite Score Distributions

Table 5-9 provides the lowa ACT composite score distributions for the classes of 2013 to 2017 (also see Figure 5-79). About 70 percent of lowa test takers had a composite score of 20 or greater, with approximately 53 percent scoring 22 or higher in all three years. In 2017, more students scored 17 or less and less students scored between 22 and 28 than the other two years displayed in Figures 5-79.

Table 5-9

| Iowa ACT Composite Score Distributions Classes of 2013 to 2017 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

## ACT Composite Scores by Student Planned Educational Majors

The most popular planned educational majors by students taking the ACT in 2017 were Health Sciences/ Allied Health Fields (Table 5-13). The highest average composite ACT scores in lowa were reported by students who plan to major in engineering (25.1), English and foreign language (24.7); sciences (24.3) and computer science and mathematics (24.1). The lowa ACT test takers that indicated a planned major in education had an average ACT composite score above 21.

Table 5-13

## ACT Average Composite Scores by Student Planned Educational Major Class of 2017

| Planned Educational Major | Nation Average | Iowa Average | Iowa Percent Planned |
| :---: | :---: | :---: | :---: |
| Agriculture \& Natural Resources Conservation | 19.7 | 20.8 | 4\% |

The SAT is one of the national college entrance examinations developed by the College Board. The SAT scale scores are in the range of 200 and 800 . The SAT was first administered in 1926 to 8,040 candidates nationwide. In 2017, the number of SAT takers in the Nation was more than 1.7 million and the number of Iowa SAT takers was about 700 (approximately 2 percent) of the high school graduates (Table 5-14).

In 2016-2017, the College Board first reported the Evidence-Based reading and writing (ERW) scores. Iowa's ERW and math average scores are both higher than the nation (Tables 5-14 and 5-15).

## Advanced Placement (AP)

The College Board sponsors the Advanced Placement (AP) Program in lowa, which offered more than 35 courses in over 30 subject areas in 2016-2017. AP provides secondary school students the opportunity to take college-level courses in a high school setting. Courses are taught by highly qualified high school teachers who use the AP Course Descriptions to guide them.

In lowa, over 19,000 AP exams were taken by more than 12,000 students in 2017 (Figure 5-74). English language and composition, English literature and composition, U.S. history and government, biology and chemistry, calculus, and psychology in aggregate, accounted for more than 65 percent of the exams taken in 2017. The number of students/candidates in 2017 was slightly less than the number in 2016. The number of exams taken decreased 3.6 percent over that one-year period.

From 2007 to 2017, the percentage of Iowa's students receiving a score of three or better has consistently been higher than the national percentage (Figure 5-75).

Nationally, and in lowa, greater percentages of males are reported as receiving a score of three or higher than females. The achievement gap between lowa males and females is displayed in Figure 5-76.

Table 5-16 shows the AP test results by Midwest states for the high school graduating classes of 2015 and 2016.

## Pursuit of Postsecondary Education/Training

This section presents Information on lowa public high school graduates pursuing or intending to pursue postsecondary education or training. Graduate intention data have been collected through Student Reporting in lowa (SRI, formerly EASIER).

The percent of graduates intending to pursue postsecondary education or training decreased slightly between 2015 to 2017 (Figure 5-77). Table 5-17 lists the percent of graduates intending to pursue postsecondary education/training. As seen in Table 5-18, the percent of female graduates intending to pursue postsecondary education/training was higher than the percent of male graduates intending to pursue postsecondary education/training in all years presented. As in previous years, the largest percent of graduates intended to pursue postsecondary education at a community college in 2017 (Table 5-19). Table 5-20 and Figure 5-78 show that the percent of graduates intending to pursue postsecondary education at a two-year college was higher than the percent of graduates intending to pursue postsecondary education at a four-year college in 2012. Beginning in 2013, the percent of students intending to pursue post-secondary education at a four-year college was higher than the percent of graduates intending to pursue postsecondary education at a two-year college.

Note: Data for the 2010 to 2017 graduating classes include students who received a regular diploma. Other completers, such as students who received a certified attendance, are not included.

## Dropouts

The National Center for Education Statistics (NCES) definitions used for dropouts include students who satisfy one or more of the following conditions:

- Was enrolled in school at some time during the previous school year and was not enrolled as of Count Day of the current year or
- Was enrolled in school at some time during the previous school year and left the school before the previous summer and
- Has not graduated from high school or completed a state or district-approved educational program; and
- Does not meet any of the following exclusionary conditions:
a) transfer to another public school district, private school, or state or district-approved educational program,
b) temporary school-recognized absence for suspension or illness,
c) death, or
d) move out of the state or leave the country.

A student who has left the regular program to attend an adult program designed to earn a High School Equivalency Diploma (HSED) or an adult high school diploma administered by a community college is considered a dropout. However, a student who enrolls in an alternative school or alternative program administered by a public school district is NOT considered a dropout.

The numerator of the grades 7-12 dropout rate (or grades 9-12 dropout rate) is the total number of dropouts for grades 7-12 (or the total number of dropouts for grades 9-12) and the denominator is the total enrollment of grades 7-12 (or total enrollment of grades 9-12).

Figure 5-79 shows the two statewide public school trends, the lower line is for grades 7-12 and the upper line is for grades 9-12 dropout rates. Both rates increased in 2015-2016.

The public school dropout distributions by grade and enrollment categories for 2015-2016 are available in Table 5-21. Grade 12 had the highest number and percent of dropouts. Districts with enrollments of 7,500 and above accounted for more than 41 percent of the total dropouts while comprised less than 30 percent of the total enrollment in grades 7 to 12 .

Table 5-22 shows the dropout rates by gender. Males had a higher dropout rate than females in all years shown.

The public school grade 7-12 dropout and enrollment data by race/ethnicity are presented in Table 5-23 and Table 5-24.

Table 5-25 shows the distribution of the dropout rate by lowa public school districts.

Iowa Public School Grades 7-12 and Grades 9-12 Dropout Rates 2000-2001, and 2004-2005 and 2009-2010 to 2015-2016

Note: Dropout rates are combined grades 7-12 dropouts divided by combined grades 7-12 enrollment and expressed as a percent.

## High School Graduates and Graduation Rates

This section reports 12 years of trend data on the number of high school graduates in lowa public schools and displays a tour-year conort graduation rate trend tor the graduating classes ot 2009 to 2U16. In addItion, a five-year cohort graduation rate is reported for the graduating classes of 2014 and 2015.

## High School Graduates

A public high school completer can receive a high school diploma or a certificate. The No Child Left Behind (NCLB) Act defines the regular diploma recipients as high school graduates.

Other completers, students who have finished the high school program, but did not earn a diploma, are not high school graduates based on the Iowa Consolidated State Application Accountability Workbook.

Figure 5-80 shows the number of regular diploma recipients by school year from 2004-2005 to 2015-2016. The counts in this figure include the students who earn a regular diploma in four years and the students who receive regular diplomas in less or more than four years.

Figure 5-80
Number of Iowa Public School Graduates 2004-2005 to 2015-2016

Source: Iowa Department of Education, Bureau of Information and Analysis, Student Reporting in lowa files.

## High School Graduation Rates

With the statewide identification system and Student Reporting in Iowa (SRI) data, lowa can follow the same group of students over several years and implement the first-time freshman cohort rates (students who repeated their 9th grade year were not included in the cohort). The four-year cohort graduation rate is calculated for the class of 2016 by dividing the number of students in the cohort (denominator) who graduate with a regular high school diploma in four years or less by the number of first-time 9 th graders enrolled in the fall of 2012 minus the number of students who transferred out plus the total number of students who transferred in.

Iowa Four-Year Cohort Graduation Rate $=(\mathrm{FG}+\mathrm{TIG}) /(\mathrm{F}+\mathrm{TI}-\mathrm{TO})$
For the graduating class of 2016

FG -- First-time 9th grade students in fall of 2012 and graduated in 2016 or earlier
TIG-- Students who transferred in grades 9 to 12 and graduated in 2016 or sooner
F -- First-time 9th grade students in fall of 2012
TI -- Transferred in the first-time 9th graders' cohort in grades 9 to 12
TO -- Transfer out (including emigrates and deceased)

First-time freshmen and transferred-in students include: resident students attending a public school in the district; non-resident students open-enrolled in, whole-grade sharing in, or tuition in; and foreign students on Visa. Those excluded are: home-schooled and nonpublic schooled students; public school students enrolled in another district, but taking courses on a part-time basis; and foreign exchange students. Students receiving regular diplomas are included as graduates in the numerator. Early graduates are included in the original cohort. All students who take longer to graduate (including students with IEPs) are included in the denominator, but not in the numerator for the four-year rate.

Figure 5-81
Iowa Public High School Four-Year Cohort Graduation Rate for the Graduating Classes of 2009 to 2016

Source: Iowa Department of Education, Bureau of Information and Analysis, Student Reporting in Iowa file.

The five-year cohort graduation rate is calculated using a similar methodology as the four-year cohort rate. The five-year cohort graduation rate for the class of 2015 is calculated by dividing the number of students in the cohort (denominator) who graduate with a regular high school diploma in five years or less (by the 2015-2016 school year) by the number of first-time 9th graders enrolled in the fall of 2011 minus the number of students who transferred out (between 2011 and 2015) plus the total number of students who transferred in (between 2011 and 2015). The five-year cohort rate will maintain the same denominator as the previous year's four-year cohort rate, simply adding students who graduate in the fifth year to the numerator.

Table 5-26 displays the four-year cohort graduation rates for the graduating classes of 2015 and 2016. The rates listed are for all students and 13 subgroups. In gender comparison, females had higher graduation rates than males on average. Among the ethnic/race subgroups, white and Asian students had higher graduation rates than other race groups; the students who were eligible for free reduced price lunch and IEP, English language learners (ELL), migrant, and male students had graduation rates lower than all student groups on average.

Table 5-26
Iowa Public High School Four-Year Cohort Graduation Rate by Subgroup
for the Graduation Classes of 2015 and 2016

| Group | Class of 2015 |  |  | Class of 2016 |  |  |

Source: National Center for Education Statistics, Digest of Education Statistics, 2016 (Table 219.46).
Notes: --- Not Available; <> Data were suppressed to protect the confidentiality of individual student data.
The estimated for American Indian/Alaska Native students also includes imputed data for Virginia.
The four-year ACGR is the number of students who graduate in four years with a regular high school diploma divided by the number of students who form the adjusted cohort for the graduating class. From the beginning of 9th grade (or the earliest high school grade), students who are entering that grade for the first time form a cohort that is "adjusted" by adding any students who subsequently transfer into the cohort and subtracting any students who subsequently transfer out, emigrate to another country, or die. To protect the confidentiality of individual student data, ACGRs are shown at varying levels of precision depending on the size of the cohort population for each category cell. There are some

- differences in howstates implemented the requirements for the ACGR, leading to the potential for differences acrossstates in how the rates are calculated. This is particularly applicable to the population of children with disabilities. Black includes African American, Hispanic includes Latino, Asian/Pacific Islander includes Native Hawaiian or Other Pacific Islander, and American Indian includes Alaska Native. Race categories exclude Hispanic origin unless specified.

## Suspensions and Expulsions

In-school suspensions, out-of-school suspensions, expulsions, and removals to an interim setting can be given to students because of incidents that occur on school property. Table 5-29 shows public school removals by type. In-School Suspensions comprise 49.1 percent of all removals, Out-of-School Suspensions at 50.3 percent. Removals went down over 11 percent in 2016-2017 from 2014-2015, but increased 2.7 percent since 2015-2016. When multiple offenses are removed from the counts to reveal the number of unique students involved, about 5.3 percent of enrolled students statewide are affected.

An in-school suspension is defined as an:
Administrative removal of a student from regular classes or activities for disciplinary reasons, the student continues to be under the supervision of the school district.

School district personnel were instructed to report all in-school suspensions regardless of their length. Therefore, an in-school suspension lasting as little as one period of the day is included in this data, as long as the removal was initiated and/or approved by building or district administration. Detail distribution of reason for in-school removal is illustrated in Table 5-30.

An out-of-school suspension is defined as an:
Administrative removal of a student from regular classes or activities for disciplinary reasons.
Āgain, school district personmetwere instructed to report all out-of-sehool susperisions regardless of theith length. Detail distribution of reason for out-of-school suspension is illustrated in Table 5-31.

An expulsion is defined as:
School board action resulting in the removal of a student "from the rolls" of a district (unless the student has an IEP and requires continuing services) for disciplinary reasons.

If the length of a student expulsion is greater than the remaining number of days in the current school year and the student returns to the district the following school year, district personnel are instructed to report the expulsion in both school years. In each of the past three years, expulsions were most often given as a result of drug-related incidents (Table 5-32).

For removals to an interim setting initiated by school personnel given to special education students, the reason for removal must be drug related, weapons related, or due to serious bodily injury with a maximum length of 45 days. There are no similar restrictions for placement of regular education students.

Tables 5-34 to 5-36 show removal information by subgroups, grade span, and district enrollment size categories.

Source: Iowa Department of Education, Bureau of Information and Analysis, SRI unilateral removal and student archive files.
Note. Figures may not total due to rounding
*These values include five records for Interim Settings by an Administrative Law Judge.

## Special Education

Iowa reports annually on the conditions and performance of students with disabilities ages 3-21 in the Annual Performance Report (APR) for Part B of the Individuals with Disabilities Education Act (IDEA) submitted to the Office of Special Education Programs on February 1 of each year. Performance is measured against state targets that are set in the State Performance Plan (SPP) every six years using baseline data along with input from various stakeholders. Measures of compliance with IDEA are also reported in the SPP and APR. Some of the measures of performance presented in this section are modified from lowa's Part B APR, which is accessible in its entirety at: https://www.educateiowa.gov/annual-progress-report-part-b.

Other measures in this section are included to address the four areas that special education stakeholders in the state have agreed are important to monitor and with which to compare students with and without disabilities.

- Students come to school ready to learn
- Students attend school in safe and caring environments
- Students achieve at high levels
- Students leave school ready for life

## Context of Special Education in Iowa

## Identification Rates

The identification rate refers to the percentage of students who are identified as needing special education services. The following graph presents the special education identification rate for students ages 6-21 from 2011-2012 to 2015-2016. From the 2011-2012 school year to the 2015-2016 school year, the rate has decreased by 0.25 percent.

Figure 6-1
Special Education Identification Rate for Students Ages 6-21, 2011-2012 to 2015-2016

Sources: Iowa Department of Education, Bureau of School Improvement, Information Management System, Count Files; Bureau of Information and Analysis, SRI, Fall Student Files.

## Placement

Children and students receiving special education services may be served in a variety of educational settings. Data are collected on these settings based on the amount of time children and students spend with their nondisabled peers. Over time, the percent of children/students served in settings with typically developing peers has increased significantly in lowa.

The following graphs show the percentage of students with disabilities ages 6-21 served (1) in the regular education classroom for the greatest percentage (80 percent or more) of the school day, (2) in the regular education classroom for less than 40 percent of the school day, and (3) in private separate schools, residential placements, homebound or hospital placements. New targets were set for 2013-2018. In some cases, targets for the prior six year reporting period were deemed to be overly ambitious and were adjusted accordingly. This explains why some targets seem to be moving in the wrong direction between 2012 and 2013.

In 2015-2016, the percentage of students in the regular education classroom for 80 percent or more of the school day was 65.63 , just over the state target of 65.00 percent. The percentage of students served in the regular education classroom for less than 40 percent of the school day was 8.90 . This percentage was over the threshold, which was set at 8.50. The percentage of students served in other placements was below the state thresholds of 2.80 percent.

Figure 6-2
Percent of Students with Disabilities Ages 6-21 In the Regular Classroom 80 Percent or More of the Day 2011-2012 to 2015-2016

Figure 6-4
Percent of Students with Disabilities Ages 6-21 Served in Private Separate Schools, Residential Placements, or Homebound or Hospital Placements, 2011-2012 to 2015-2016

Source: Iowa Department of Education, Bureau of School Improvement, Information Management System, Count Files.

## Disproportionality

Disproportionality refers to the percent probability, or likelihood, of disproportionate representation of racial and/or ethnic groups in special education and related services that is the result of inappropriate identification. The following graph shows the percent probability of overrepresentation (positive numbers) or underrepresentation (negative numbers) of each racial/ethnic group. In 2015, African American, and Native American students had the greatest disproportionality rates of overrepresentation at 71 percent and 62 percent respectively. Asian students had the greatest disproportionality rates of underrepresentation at -53 percent.

Figure 6-5
Percent Probability of Being Placed in Special Education Compared to All Students 2013-2014 to 2015-2016

Source: Iowa Department of Education, Bureau of School Improvement, Information Management System, Count Files.

## Are Students Going to School in Safe and Caring Environments?

## Positive Behavioral Interventions and Supports (PBIS)

PBIS are evidence-based interventions that are integrated into the classroom activities and environment to encourage positive behavioral and academic outcomes for all children. The following graph depicts the percentage of public school buildings using PBIS, which has increased by 19.02 percent since 2011.

Figure 6-6
Percent of Public School Buildings That Use Positive Behavioral Interventions and Supports 2011-2012 to 2015-2016

Source: Iowa Department of Education, Bureau of School Improvement, PBIS Files.

## Discipline

Data on disciplinary actions taken against students with IEPs are collected and reported for students ages 3-21 who are suspended and/or expelled for a total of more than ten days in a school year. A district is considered significantly discrepant for the discipline of students with IEPs if the percent of students with IEPs suspended/expelled for more than ten days in the school year for the district is at least 2 percent greater than the state-wide average percent of students with IEPs suspended/expelled for greater than ten days. The following graph presents the percent of districts with a significant discrepancy in the percentage of students with IEPs suspended/expelled for greater than ten days with respect to state targets from school year 2011-2012 to 2015-2016. Currently, 1.81 percent of districts have a significant discrepancy, which exceeds the state threshold of 1.40 percent. New targets were set for 2013-2018. In some cases, targets for the prior six year reporting period were deemed to be overly ambitious and were adjusted accordingly. This explains why some targets seem to be moving in the wrong direction between 2012 and 2013. Please note that per federal requirements, discipline data lag one year, which means that data reported for 2015-2016 were collected during the 2014-2015 school year.

Figure 6-7
Percent of Districts Significantly Discrepant in Suspension/Expulsion of Students with Disabilities Greater Than Ten Days, 2011-2012 to 2015-2016

## Are Students Achieving at High Levels?

## National Assessment of Educational Progress (NAEP)

The NAEP, conducted by the U.S. Department of Education beginning in 1969, is the only national assessment of student achievement. The NAEP state assessments have been administered periodically in grades 4 and 8 since 1990 in the areas of reading, mathematics, science, and writing.

In 2014-2015 in reading, 21 percent of 4th grade students with IEPs and 78 percent of 4 th grade students without IEPs scored at basic or above on the NAEP. During the same year, 30 percent of 8 th graders with IEPs and 87 percent of 8 th graders without IEPs scored at basic or above. The gap between students with and without disabilities was 56 percent for 4th graders and 56 percent for 8th graders in 2010-2011 and 57 percent for 4 th graders and 57 percent for 8 th graders in 2014-2015.

Figure 6-8
Percent of 4th Grade Students Scoring at Basic or Above on NAEP Reading, 2010-2011, 2012-2013 and 2014-2015

Figure 6-9
Percent of 8th Grade Students Scoring at Basic or Above on NAEP Reading, 2010-2011, 2012-2013 and 2014-2015

[^15]In 2014-2015 in math, 46 percent of 4th grade students with IEPs and 89 percent of 4 th grade students without IEPs scored at basic or above on the NAEP. During the same year, 26 percent of 8 th graders with IEPs and 82 percent of 8 th graders without IEPs scored at basic or above. The gap between students with and without disabilities was 41 percent for 4 th graders and 55 percent for 8 th graders in 2010-2011 and 43 percent for 4th graders and 56 percent for 8th graders in 2014-2015.

[^16]
## Iowa Assessments

The standardized achievement tests, lowa Assessments, are developed by lowa Testing Programs (ITP) at The University of Iowa for use nationally in grades K-12. The following six graphs show the percentage of 4 th, 8 th, and 11th grade students proficient in reading and in math from 2011-2012 to 2015-2016. Distinctions are made between students with and without IEPs.

## Are Students Leaving School Ready for Life?

## Graduation Rates

This section reports the percentage of high school students with and without IEPs who graduate based on the four year cohort rate. In reporting year 2015-2016, the graduation rate for students with an IEP was 77.00 percent which is 15.82 percent below the graduate rate for students without IEPs at 92.82 percent. Between the 2011-2012 and 2015-2016 reporting years, the graduation rate increased by 7.12 percent for students with IEPs. Please note that per federal requirements, graduation data lag one year, which means that data reported for 2015-2016 were collected during the 2014-2015 school year.

Figure 6-18

| Graduation Rate by Graduating Classes, 2012 to 2016 |  |  |  |  |  |

## Finance

Information pertaining to revenues, property taxes, state aid, and income surtax at the state level and by enrollment category in certain cases is included in this chapter. This chapter contains the most current data available at the time of preparation. The sources of data for this chapter include the 2015-2016 Certified Annual Financial Report from the Iowa Department of Education, the 2017-2018 Iowa Department of Management Aid and Levy worksheet database, and the Program and Budget Summary document from the Legislative Services Agency, Fiscal Services Division. Expenditure data are included and detailed by functions and objects. The 2000-2001 school year is used as the base year for comparison in most tables and figures.

## Function Category Expenditures

The function categories discussed in this section are broken out by instruction, student support services, staff support services, administration and central services, operations and maintenance, student transportation, other support services, and community services. There have been notable shifts in function category expenditures as a percent of general fund expenditures over the last three years. In particular, there has been an increase in the percentage used for staff support services and decreases for operations and maintenance and student transportation (Table 7-1). The smallest enrollment category has continued to show the largest percentage of expenditures in the functions of instruction and administration and central services when compared to the other enrollment categories, while the two largest enrollment categories had the highest percentage of expenditures for the function of student support services (Table 7-2).

Table 7-1
Function Category Expenditures as a Percent of Total General Fund Expenditures in Iowa Public Schools 2000-2001, 2013-2014 to 2015-2016

|  | $2000-2001$ | $2013-2014$ | $2014-2015$ | $2015-2016$ |
| ---: | :---: | :---: | :---: | :---: |

Note: Figures may not total 100 percent due to rounding.

## Object Category Expenditures

Object category expenditures for school districts include salaries, benefits, purchased services, supplies, property, and other expenditures. The breakdown of object category expenditures as a percentage of total general fund expenditures was about the same over the last three years (Table 7-3). The percentage for salaries has increased over the last three years; however, it remains lower than the base year. The percentages for employee benefits and purchased services have remained relatively unchanged for the past three years, but continue to be higher than the base year. The percentage for property has continued to decrease. In the most recent year, salaries as a percentage of general fund expenditures increase as the enrollment size category increases, with the exception of the largest size category. Benefits as a percentage of general fund expenditures was highest for the largest enrollment category ( 21.0 percent). Purchased services as a percentage of general fund expenditures was highest for the smallest enrollment category (28.2 percent) (Table 7-4).

Table 7-3

## Object Category Expenditures as a Percent of Total General Fund Expenditures in Iowa Public Schools 2000-2001, 2013-2014 to 2015-2016

| Object Category | Year |  |  |  |  |
| ---: | :---: | :---: | :---: | :---: | :---: |

## Revenues

Iowa public school districts receive general fund revenues from a variety of sources, including local property taxes, local income surtaxes, other local sources, interagency, intermediate, state foundation aid (school aid), other state aid, federal aid, and other financing sources. The other state aid is comprised of state programs including class size reduction and the student achievement/educator quality program. Total local taxes include property tax and local income surtax.

The percent of revenue from state foundation aid dropped slightly in the past year, while the percent of revenue from other state sources has increased (Table 7-5, Figure 7-1). The largest enrollment category continued to have the highest percent of revenue from state foundation aid, other state sources, and federal sources. The lowest three enrollment categories had the highest percent of revenue from local taxes and interagency sources (Table 7-6). The smallest enrollment category was the only one for which the percentage of revenues received through local taxes and those received from total state sources (state foundation aid and other state sources) was nearly identical (Figure 7-2).

Table 7-5
Revenues by Source as a Percent of Total General Fund Revenues in lowa Public Schools 2000-2001, 2013-2014 to 2015-2016

| Source of Revenue | Year |  |  |  |  |
| ---: | :---: | :---: | :---: | :---: | :---: |
|  | Local Taxes | $3000-2001$ | $2013-2014$ | $2014-2015$ | $2015-2016$ |
| Interagency | $3.9 \%$ | $33.7 \%$ | $32.7 \%$ | $32.7 \%$ |  |
| Other Local Sources | $2.6 \%$ | $5.6 \%$ | $5.4 \%$ | $5.5 \%$ |  |
| Intermediate Sources | $0.3 \%$ | $0.0 \%$ | $1.8 \%$ | $1.7 \%$ |  |
| State Foundation Aid | $52.3 \%$ | $47.5 \%$ | $47.5 \%$ | $47.2 \%$ |  |
| Other State Sources | $5.3 \%$ | $6.9 \%$ | $8.1 \%$ | $8.4 \%$ |  |
| Federal Sources | $3.4 \%$ | $4.3 \%$ | $4.3 \%$ | $4.2 \%$ |  |
|  | $0.1 \%$ | $0.3 \%$ | $0.2 \%$ | $0.2 \%$ |  |

Source: Iowa Department of Education, Division of School Finance and Support Services, Certified Annual Financial Reports.
Notes: Interagency includes revenues from services provided to other local education agencies (LEAs) such as tuition, transportation services, and other purchased services.
Intermediate sources include grants-in-aid revenues in lieu of taxes received from area education agencies (AEAs), cities, and counties.
Other local sources include interest, textbook sales, rents and fines, student fees, and community service fees. Other financing sources include the proceeds from long-term debt such as loans, capital leases and insurance settlements for loss of fixed assets.
Totals may not equal 100 percent due to rounding.

## Taxable Valuation

The adjusted-equalized value of real property is represented by taxable valuation. There are 112 assessing jurisdictions in the state of lowa. The property in each jurisdiction is equalized by the state through the Department of Revenue every two years. Assessments are adjusted for classes of property to actual values, except for agriculture land values that are based on productivity. Adjustments are based on investigations and appraisals done by the state and on assessments/sales ratio studies. The agriculture land use productivity formula is based on agriculture prices and expenses. An adjustment is ordered by the state if reported valuation is more than 5 percent above or below those determined by the state. Taxes are assessed against equalized property values and rates are expressed per $\$ 1,000$ of valuation.

The amount of state aid a school district will receive is based on the taxable valuation in the school district. The lowa school foundation formula requires all school districts to levy a uniform rate of $\$ 5.40$ per $\$ 1,000$ taxable valuation. State aid is provided to adjust for the different amounts of revenue raised in each school district. The relative property wealth in a school district is the primary factor in determining the property tax rates.
lowa's average taxable valuation per pupil has increased each year since 2005-2006 (Figure 7-3). The three largest enrollment categories have consistently had an average per pupil valuation below the state average (Table 7-7). The taxable valuation per pupil increases because of increases in valuation, as well as decreases in enrollment. The 600-999 enrollment category had the greatest range in taxable valuation per pupil in each of the last five years, followed closely by the <300 category (Table 7-8). The largest enrollment category had the lowest taxable valuation per pupil $(\$ 168,466)$ and the 600-999 enrollment category had the highest taxable valuation per pupil $(\$ 1,300,025)$ in 2017-2018, which was consistent with the previous year.

## Expenditures Per Pupil

General fund expenditures per pupil include expenditures for instruction, student support services, staff support services, administration and central services, operation and maintenance, student transportation, and other support services. Expenditures per pupil are calculated by dividing total general fund expenditures by the certified enrollment. Expenditures related to community services, adult education, nonpublic education, and area education agency revenues for services sold to other school districts and area education agencies are not included in the per pupil calculation.

The smallest enrollment category had the highest average general fund per pupil expenditures in all years presented in Table 7-9. Table 7-10 and Figure 7-4 display the average per pupil expenditures for lowa, the Midwest states, and the nation. The National Education Association (NEA) collected and estimated these data. In the most recent year, lowa ranked 28th in the nation in average expenditures per pupil. Indiana, Kansas, Nebraska, North Dakota, Ohio, and South Dakota ranked lower than Iowa.

Table 7-9
Average General Fund Per Pupil Expenditures for Iowa Public Schools by Enrollment Category 2000-2001, 2013-2014 to 2015-2016

|  | Enrollment Category | Year |  |  |  |

## State Aid

This section presents data on state aid, including School Foundation Aid, Instructional Support, Class Size Reduction, Early Intervention, and Student Achievement/Educator Quality. State aid is received by school districts through appropriations made from the state's general fund each year. In 1996-1997 and 1999-2000, changes were made to school foundation aid laws that impacted state aid amounts. The state foundation level, currently at 87.5 percent, was last changed in 1996-1997. The special education foundation level was increased to its currently level, also 87.5 percent, in 1999-2000. The changes to the foundation level increased the amount of state aid and lowered the amount of property tax. Several programs have been added or removed since these changes were made. For example, in 2009-2010, Teacher Salary Supplement was added as well as Professional Development Supplement. 2015-2016 was the first year in which a portion of districts participating in the Teacher Leadership and Compensation (TLC) Program were funded through the school finance formula. As of 2017-2018, all districts participate in the TLC Program and are funded through the formula.

Table 7-11 shows the state's general fund appropriations and initial state aid to school districts for multiple years. The Legislature initially appropriated $\$ 7.26$ billion and initial state aid to school districts was about $\$ 3.18$ billion or about 43.8 percent of the general fund appropriations for the 2017-2018 school year (fiscal year 2018). This was the second consecutive year-over-year increase in the initial percent spent on education, the first time this has occurred since the FY09 to FY11 time period. Initial state aid to school districts has steadily increased since 2012-2013. For 2017-2018, the initial general fund appropriation was lower than the previous year for the first time since 2010-2011.

Notes: Includes school foundation aid, educational excellence, instructional support, technology/school improvement, class size reduction/school improvement, and teacher quality/compensation appropriations.

## Property Taxes

The school aid formula for school districts is funded by a combination of state foundation aid and the uniform levy ( $\$ 5.40 / \$ 1,000$ of taxable valuation) and additional levies. School districts may levy other local taxes along with the uniform and additional levies. The uniform levy, additional levy, instructional support levy, and educational improvement levy are property taxes that are included in the school district's general fund. The management levy, regular physical plant and equipment levy (PPEL), voter-approved physical plant and equipment levy (VPPEL), public education and recreation levy (PERL), and debt services levy are other school district property taxes for specified purposes that are not included in the general fund.

Data on general fund property tax rates, management fund property tax rates, regular and voter-approved physical plant and equipment levy (PPEL) tax rates, the public education and recreation levy (PERL) tax rates, and debt service levy tax rates for 2017-2018 are found in Table 7-12.

All school districts levy the general fund property tax. The two largest enrollment categories had an average general fund property tax rate greater than the state average. There are no restrictions for the management levy rate; however, the purpose for which the proceeds may be used is restricted to paying tort claims, insurance premiums (except health insurance), unemployment benefits, and the cost of retirement benefits. Beginning with FY16, allowable uses expanded to include the cost of mediation and arbitration. The majority of the school districts in 2017-2018 levy for the management fund. The regular physical plant and equipment levy (PPEL) is a levy the school board may approve up to $\$ 0.33$ per $\$ 1,000$ of taxable valuation. The school board may also request voter approval to increase the levy an additional $\$ 1.34$ per $\$ 1,000$ taxable valuation. The two largest school district enrollment categories have the highest average voter-approved PPEL rates.

The public education and recreation levy (PERL), or playground levy, must be approved by voters within the school districts. Funds from PERL must be used for the purchase of playgrounds and recreational facilities and for the costs of community education. The maximum rate for PERL is $\$ 0.135$ per $\$ 1,000$ of taxable valuation. In 2017-2018, 6.6 percent of the school districts levy for PERL, a slight increase over the previous year.

Usage of the debt service levy is tied to passage of a bond issue, which requires approval of at least 60 percent of the electorate within the school district. About half of the school districts use the debt services levy. The highest percentage of districts using this levy fall within the $1,000-2,499$ and $2,500-7,499$ enrollment categories, while use by the smallest ( $<300$ ) and largest ( $7,500+$ ) enrollment categories falls below the state average.

Table 7-13 lists the total taxes and property tax amounts for the general fund, management fund, regular PPEL, voter-approved PPEL, PERL, and debt services levies for 2017-2018. The smallest enrollment category had the highest average tax per pupil for all taxes listed.

Notes: Enrollment categories determined by budget enrollments.
Surtaxes include Asbestos, Educational Improvement, Instructional Support, Voter-Approved Physical Plant, and Equipment Levy.

## Instructional Support

Instructional support is a program that must be approved through board action or referendum. It provides additional funding to a school district. It may be imposed for up to 10 years if approved through a referendum, or up to five years through board resolution. A school district's budget may be increased up to 10 percent of the school district's regular program cost through the instructional support program. In earlier years, state aid funded a portion of the program and the remaining portion was funded through a property tax and income surtax, if approved, once the program was enacted.

The revenue sources and amounts for the instructional support program for 2017-2018 and previous years are shown in Table 7-15 and Figure 7-5. Since 2011-2012, instructional support funding has come from a combination of property taxes and income surtax. The percent of the funding for instructional support generated from property taxes has increased each year since 2014-2015 (Table 7-15). The number of school districts with an instructional support program in current and previous years by enrollment category is shown in Table 7-16. All school districts in the smallest and two highest enrollment categories had instructional support programs in the current and previous year. The percentage of districts utilizing the instructional support program has gradually increased each year since 2013-2014. 330 of 333 districts (99.1 percent) are participating in 2017-2018.

## Budget Adjustment

The budget adjustment, previously known as the budget guarantee, is part of the lowa school aid formula. Each year, enrollment changes from the previous year and the supplemental state aid growth rate set by the Legislature is used to determine whether or not a school district qualifies to receive the budget adjustment. Through FY 2013, school districts could receive, as a budget adjustment, the greater of a scale-down adjustment or 101 percent adjustment. The scale-down adjustment compares regular program funding for the current year to the level of funding a school district received in FY 2004. The scale-down adjustment was completely eliminated in FY 2014. The 101 percent budget adjustment guarantees a school district's regular program cost will equal at least 101 percent of the previous year's regular program cost. The percent of school districts statewide receiving the budget adjustment decreased in 2013-2014 (Table 7-17 and Figure 7-6), while 2015-2016 experienced an increase. The percent receiving the budget adjustment for 2017-2018 significantly increased from the previous year. Consistent with the two previous years, the two largest enrollment categories had the lowest percent of school districts receiving the budget adjustment in 2017-2018, though both of these saw large increases for the most current year.

Table 7-17

## Bond Elections

The number of school districts that attempted bond referendums by enrollment category is listed in Table $7-18$. A bond referendum may be passed with approval of at least 60 percent of the total votes cast. In 2015-2016, 52.2 percent passed as compared to 40.0 percent in 2014-2015.

Note: A school district could be included more than once if it had more than one bond issue in a year, or more than one issue on a ballot.

## Physical Plant and Equipment Elections

Table 7-19 lists the number of school districts that attempted voter-approved physical plant and equipment referendums in 2001-2002 and 2014-2015 to 2015-2016. Voter-approved physical plant and equipment referendums require 50 percent approval for passage. In 2015-2016, 96.7 percent of the voter-approved physical plant and equipment referendums were passed, as compared to 2014-2015 where 88.6 percent were approved (Table 7-19).

Table 7-19

Source: Iowa Department of Education, Division of School Finance and Support Services, Certified Annual Financial Reports.
Notes: A school district could be included more than once if it had more than one Voter-Approved Physical Plant and Equipment Levy referendum in a year.
FY 2002 was the first year the information was collected.

## Secure an Advanced Vision for Education

Secure an Advanced Vision for Education (SAVE) is used by school districts for school infrastructure needs and property tax relief. Effective July 1, 2008, legislation changed the local option sales and services tax to a statewide sales and services tax. This legislation (lowa Code 423F.1) increased the state sales, services, and use tax from 5 percent to 6 percent to continue providing revenues to local school districts solely for school infrastructure purposes or school district property tax relief. The statewide sales and services tax is set to sunset on December 31, 2029.

Use of revenues from SAVE depends on whether or not the school district has a revenue purpose statement (RPS). Current law specifies the usage of SAVE revenue as dictated by the RPS. RPS requires voter approval for designating specific use of SAVE. If there is no RPS, the revenue is to be used for reducing specified levies described in lowa Code 423F. 3 "Use of revenues." A school board may adopt a resolution for using SAVE revenues solely for property tax relief by reducing indebtedness of PPEL and debt levies without voter approval. If the school board approves a change in the RPS not solely for reduction of property tax relief, voter approval is required. The school district-approved RPS is effective until amended or repealed on December 31, 2029.

Estimated sales and services tax revenues for 2017-2018 are approximately $\$ 442.1$ million for 333 school districts in all 99 counties (Table 7-20).

Table 7-20
Local Option/Statewide Sales and Services Tax for School Infrastructure 2000-2001, 2012-2013 to 2017-2018

[^23]
## Total Elementary and Secondary Education Budgets

The budget detail for 2000-2001, 2016-2017, and 2017-2018 is shown in Table 7-21. State categorical funding includes Instructional Support, Class Size Reduction/Early Intervention, Technology/School Improvement, and Student Achievement/Educator Quality. Beginning in 2009-2010, categorical roll-ins for Teacher Salary, Professional Development, Early Intervention, Area Education Agency (AEA) Teacher Salary, and AEA Professional Development were added to the school aid formula. Teacher Leadership was added beginning 2015-2016, as part of a three-year phase in.
