INDEX TO THE IOWA
STATE PLANNING BOARD
MAPS 1934-1939

The Iowa State Planning Board was unofficially formed in 1934 and made an official state agency in 1937. The primary purposes of the board were to collect facts concerning the physical, social, and economic resources of the state and make recommendations concerning resource planning and conservation. From 1934 to 1937 the board was funded by several federal agencies, primarily the Works Progress Administration and the National Resources Committee. State funds were used from 1937 to 1939 to support reduced activities and staff. The board was abolished by the Iowa legislature in 1939. Most states had similar advisory bodies.

The Planning Board published two annual reports, several progress reports, numerous individual studies, mimeographed booklets, maps and architectural drawings. Copies of most of these items are in the Iowa State University Library. The maps are located in the map collection of the main library. Most of them date from the board's early period when attention focused on data collection and analysis. In 1937 the emphasis shifted towards specific research and planning.

852 titles are included in this index to the collection. 70% are of cities and 18% of the state. 52% are socioeconomic. The remainder show subjects such as transportation, agriculture, and physical geography. The collection is cataloged with Library of Congress classification and American Geographical Society subject headings. Access is by area and subject.
