

IN-SERVICE TRAINING MATERIALS FOR TEACHERS

OF THE EDUCABLE MENTALLY RETARDED

Session II

Policy Statement: A review of commercially prepared material by the Special Education Curriculum Development Center does not constitute a recommendation or endorsement for purchase. The consideration of such material is intended solely as a means of assisting teachers and administrators in the evaluation of materials.

Experience Unit

Family and Home

Intermediate Level

Staff: Edward L. Meyen, Acting Director
Munro Shintani, Ph.D., Coordinator

Staff Assistants:

Phyllis Carter
Pat Adams
James Stehbens

The project is supported in part by a grant from the U. S. Office of Education, awarded under PI-88-164, Co-Investigators are Donald L. Carr, Ph.D. and Edward L. Meyen

FAMILY AND HOME

Intermediate Level

Preliminary Steps

I. Selection of Unit: FAMILY AND HOME

Why are you including this unit in your curriculum?

Slow learners as a group will become home owners, parents, and homemakers regardless of how adequate they are. Many retarded children will come from homes where low standards of homemaking and family living exist. Often these homes will not provide the training necessary for developing effective homemakers. Therefore, equipping the mentally retarded with the skills to function acceptably as a family member, the head of a household, or a parent becomes a major task of the school.

Successful community living has its foundation in successful family living. Consequently, it is essential that the retarded student acquire those skills, attitudes, and habits that will help him to become a contributing, effective member of his family and community.

II. List Sub-Units (related theme)

1. parental occupations
2. our responsibilities at home
3. sex education
4. ^{40m} home furnishings
5. health habits
6. good grooming
7. clothing
8. safety practices in the home
9. telephone
10. leisure time activities
11. holidays
12. transportation
13. the community

III. General Objectives:

1. To develop an understanding of the family group; their roles and responsibilities.
2. To develop an appreciation of good home life
 - a. The home as the center of family life
 - b. Expression of love within the family.
 - c. Cooperation, courtesy and respect among family members
3. To teach sex education.
4. To become familiar with different kinds of homes, surroundings and furnishings.
 - a. Single dwelling house
 - b. Apartment house
 - c. Mobile home
5. To develop good safety and health habits.
 - a. Proper eating and food preparation habits
 - b. Basic cleanliness rules
 - c. Adequate rest
 - d. Appropriate dress
 - e. Prevention and care of illnesses
 - f. Safety precautions and simple first aid
6. To develop an understanding of the ways families have fun together.
7. To develop an understanding of the relationship between the home and the community.
 - a. Neighbors
 - b. Schools
 - c. Businesses
 - d. Churches
 - e. Social Services
 - f. City Employees

IV. Core Areas:**A. Arithmetic Concepts**

1. Keep records of the time meals are eaten each day
2. Reading the second hand to time how long to keep in a thermometer
3. Read degrees on a thermometer
4. Figure cost of food needed to prepare breakfast at school
5. Find the price of different brands of deodorant, cleaning powder, etc. and compare
6. Figure how many hours of sleep children get
7. Find the cost of various items of clothing
8. Determine the time that prescribed medicines should be taken throughout the day
9. Discuss the cost of various leisure time activities

B. Social Competency

1. Dramatize family situations at mealtime; bedtime, leisure time, doing chores
2. Arrange attractive table settings
3. Assign committees for group projects
4. Field trip

C. Communicative Skills

1. Keep records of foods eaten
2. Make scrapbooks; include a table of contents
3. Learn vocabulary lists
4. Write, read and copy experience charts
5. Label pictures, items, things on bulletin boards
6. Read books and stories pertaining to unit
7. Arrange a House Cleaning Dictionary in alphabetical order
8. Read labels on medicine bottles
9. Conduct "brainstorming" sessions

D. Safety

1. Read labels on cans of household poisons
2. Discuss fire prevention, precautions with medicines and drugs, prevention of falls in the home
3. Practice simple first-aid procedures; use first-aid supplies
4. Use telephone to call the doctor, the fire department

E. Health

1. Study chart of Basic Four food groups
2. Use colored food cut-out
3. Cook breakfast at school
4. Shampoo hair, clean fingernails, brush teeth, wash and iron clothes at school
5. Practice cleaning kitchen, bathroom, livingroom, etc. at school
6. Make bulletin boards about appropriate clothes for different weather conditions

V. Resource Materials:

Experience Charts

Bulletin Boards

Flannel Boards

Story Books

Field Trips

Resource Speakers

Pictures

Old Magazines and Catalogs

Telephone Directories

Art Materials

Free and Inexpensive Materials

First-Aid Supplies

Cleaning Supplies and Equipment

Large Chart Paper

Kitchen Facilities, Dishes, etc.

Pets

Traffic Signs

VI. Vocabulary:

grandmother	menstruation	plates
grandfather	period	glasses
cousin	sanitary napkins	silverware
aunt	cramps	serving dishes
uncle	apartment	sponge bath

fever	sidewalk	letter
thermometer	noisy	mail
prescribe	school	deliver
capsule	learning	equipment
poison	church	questions
electric wiring	together	listen
drugs	social worker	answer

OBJECTIVES

ACTIVITIES

MATERIAL

EXPERIENCE CHART

1. To develop an understanding of the individual members of the family and their roles
- a. Names of relatives other than parents and siblings

Read Orally: How Families Live Together as review of immediate members of a family and their roles. Lead into more complicated relationship by pointing up that everyone at the dinner table is related because of the Grandmother and Grandfather. First, point up that all children of the Grandparents are sisters and brothers with relationships of aunts, uncles, cousins, nieces and nephews. Then read: My Family, to reinforce and clarify discussion.

Use art materials to make hand puppets representing family members. Let children choose specific family members they wish to represent, being sure all typical relatives are covered.

Directions for making puppets:

Stuff toe of stocking with cotton batting; tie father, sisters, brothers, tightly with string. Use yarn or glue on copper Dolly Duzit for hair; mark features with magic markers.

Cut body from material, making it large enough to cover the hand and for fingers to fit into the "arms." Cut felt hands and sew onto material.

Display "family member" puppets in classroom.

Introduce next phase of lesson with question: "Do all brothers and sisters have the same mother and father?" Discuss relationships of step-brother and sister, step-father and mother. Bring in difference also between foster child and adopted child.

Summary: We have family members in our homes and outside our homes. We live with our closest family members, and each one does many things to make our home happy. Next, we shall discuss what some of these things are.

Book: How Families Live Together, by Malcolm Provus, Chicago: Benefic Press, 1963. My Family, by Miriam Schlein, New York: Abelard-Schuman, 1960. Grandfather and I, by Helen Buckley, Lothrop uncle, and cousin. Lee, 1957.

For Bulletin Board:
Simplified "Family-tree" type poster with magazine cutouts to represent grandmother and grandfather, mother and father, sisters, brothers, aunts, uncles, cousins. Identify one child, i.e., "This is me." for specific reference.

Pink cotton socks, cotton batting, string, yarn, copper Dolly Duzits, magic markers, cotton yard goods pink felt, scissors, needles, and thread.

Vocabulary:
Grandmother
Grandfather
Cousin
Aunt
Uncle
puppets

Mothers, fathers, sisters and brothers are family members who live together. Other people in our family are -- Grandmother, Grandfather, aunt, Grandfather and I, Grandfather, Lothrop uncle, and cousin. We are close to them because they are our family.

EXPERIENCE CHART

MATERIALS

ACTIVITIES

OBJECTIVES	ACTIVITIES	MATERIALS	EXPERIENCE CHART
b. Varied roles of family members. (1) Parents (2) Children	<p>Review Primary introduction to family duties through free discussion of mother's household and child care duties and father's economic contributions. Suggest that we do not see all the things our parents do.</p> <p>Bring in idea of decisions on behavior standards, study habits, and handling money. Explain what civic duties - community activities include, such as PTA, community government, school board meetings, voluntary organizations.</p> <p>Because parents are busy people, we may do many things to help at home. Ask children what jobs they do at home. List on board. Suggested chores and others to include:</p> <ul style="list-style-type: none"> baby sitter dust errands clear off table feed animals dry dishes 	<p>Pictures of parents at home, on the job, mother at marketing, volunteer work and meetings.</p> <p>Puppets made by class members.</p> <p><u>Vocabulary:</u></p> <ul style="list-style-type: none"> chores baby sitter errands dust table dishes garbage iron mow rake lawn sweep 	<p>We made puppets. Today our puppets played family. They were all working at home. There are chores all may do to help mother and father.</p>
2. To develop appreciation of good home life.	<p>a. The home as center of family</p> <p>b. Expression of love within family</p> <p>c. Cooperation</p> <p>We feel good at home because we are with people we love who love us. The things in our home belong to us and we know where to look for things we want or need. To show our appreciation and help make our homes happy, we have talked about helping with work. What other ways may we show our love in the family and the good feelings</p>	<p>Pages 12-50 and pp. 149-157 in <u>You and Others</u>; Leslie W. Irwin and others; Lyons and Carnahan, Chicago, Ill. 1967. "The Fight-Sauer," pp. 33-39 in <u>Open Roads</u>, U. W. Leavell, M. L. Friebele; American Book Co., New York: 1957.</p>	<p>Home is a good place to be. The people there love us and we love them. To show that we love our home and family we help our parents and brothers and sisters. We share our things. We use good table manners. We do not talk when others are talking. We try to not fuss and get angry with each other.</p>

EXPERIENCE CHART

OBJECTIVES	ACTIVITIES	MATERIALS	VOCABULARY:
we have about home?	<ul style="list-style-type: none"> A. Helping other family members B. Sharing our things C. Being kind and polite D. Carry out garbage E. Iron F. Mow lawn and rake yard G. Set the table H. Take care of own room, toys, and clothes I. Sweep 		sharing love manners angry polite
	<p>Class divides into groups with puppets made earlier and dramatize family situation to illustrate chores being done around home when all of the family is there. Teacher should encourage good ideas of cooperation and ways of doing chores with examples such as:</p> <p><u>Brother</u> says: It is a pretty day. I will mow the yard and rake the grass. Dad, where is a basket to put the grass in?</p> <p><u>Sister</u>: Mother, I'll play games with the baby while I am folding the clean clothes.</p>		(Picture of a baby) The father puts sperm in the mother's body. It joins with the mother's seed to make a baby. The baby takes nine months to develop in the mother's body. Only married people should have babies. Babies need a good home.
3. To teach sex education	<p>Arrange for mating a pet -- rabbit, cat, dog, etc. Explain to pupils that the male plants sperm in the female's body. The sperm joins with the mother's seed. From this seed the babies develop inside the mother's body.</p> <p>Discuss that when people fall in love they get married. Then the man plants sperm in the woman's body. If the sperm joins with the woman's seed, a baby develops. It takes nine months for a baby to develop to the point where it is ready to be born. Babies are very helpless and need a great deal of care. They need both</p>	<ul style="list-style-type: none"> a. Male sperm joins with female seed or egg to form baby. b. It takes nine mos. for a baby to develop. c. Babies need the security of a good home 	pets, e.g., rabbits, dogs, cats e.g., rabbits, dogs, cats

EXPERIENCE CHART

MATERIALS

ACTIVITIES

OBJECTIVES

parents, a good home and a great deal of love.

Write experience chart. Read orally.
Seatwork: Write the following words on chalkboard. Children are to write sentences using each word: father, mother, baby, develop, months, married, home.

3. To teach sex education
d. Menstruation
 (1) is a natural process
 (2) is a preparation for motherhood
 (3) personal hygiene

Chart paper
Chalkboard

Discuss menstruation with both boys and girls. Explain what it is -- a flow of blood which occurs once a month. All girls experience this when they reach a certain age, usually about 12 years old. This is a natural process, a sort of preparation for motherhood: All women must menstruate before they can have babies.

Write experience chart.

Menstruation
All girls menstruate when they're about 12 years old.
Menstruation is a flow of blood which happens once a month.
Menstruation is a part of growing up for girls.

Chart paper
"Teaching Unit on Menstruation," available from Kimberly-Clark Corporation; Educational Department; Neenah, Wisconsin.
"Educational Material on Menstruation," Tampax, Inc., 161 East 42nd Street, New York, N.Y.

With the girls explain how to take care of themselves when they menstruate. Teaching aids are available from the Kimberly-Clark Corporation. These include booklets for the girls, a motion picture prepared by Walt Disney, charts, teaching suggestions. Booklets and background information for teachers are also available from Tampax, Inc. These materials may be modified and used with retarded girls. It is important, however, to keep in mind that with these students you must be very explicit and straightforward. If too evasive, the students will miss the point.

Vocabulary:
menstruation, period, sanitary napkins, cramps.

OBJECTIVES

ACTIVITIES

MATERIALS

EXPERIENCE CHART

<p>4. To become familiar with different kinds of homes, surroundings, and furnishings</p> <p>Begin lesson with statement that we have talked of the people in our homes and things we do in our homes. Now we will talk about the different kinds of houses we live in. Have children tell what type of house they live in. Include coverage of: single dwelling house apartment house mobile home.</p> <p>Class art activity: Some members may use watercolors to make street, trees, lampposts on mural paper. Others draw and cut out different types of houses, using construction paper. Pin or staple the houses along the mural paper to be placed on wall. (Leave space to be filled in with later coverage.)</p>	<p>Pictures of different types of homes.</p> <p>Roll of brown wrapping paper to cover one strip of classroom wall for mural.</p> <p>Water colors Colored construction paper Pencils Scissors</p> <p>Books: <u>Big City Homes</u>, Catherine Urrell, et al., Follett Pub. Co., Chicago Ill.: 1954. <u>Project Boy</u>, by Lois Lensk, J. B. Lippincott Co., Philadelphia, Pa., 1954. <u>Our New Home in the City</u>, by Leo Israel, Holt, Rinehart & Winston, Inc., N.Y., 1963</p>	<p>People live in different kinds of houses. Apartment houses have many families in them. People who move a lot may live in trailers. That way they take their house with them.</p> <p><u>Vocabulary:</u></p> <p>apartment trailer house</p> <p>Bulletin board caption: "Do you know some good health rules?" Picture of a boy or girl with a questioning expression on his or her face.</p>	<p>Pictures of food from each basic group. We should eat well-balanced meals every day. We should drink milk and have 2 or more servings of meat or eggs every day. We should have 4 or more servings of vegetables and fruit, and 4 or more servings of bread and cereals.</p> <p>Series of large question marks cut from construction paper.</p> <p>5. To develop good health habits.</p> <p>a. Proper eating habits (1) well-balanced meals</p> <p>Introduce lesson by directing attention to bulletin board. Hold a "brain-storming session" - ask pupils to think of as many things as possible that contribute to good health.</p> <p>Discuss one important health rule-eating proper food. Display a chart showing the basic four foods. Explain that food from each of these groups is needed each day for a well-balanced diet. Stress the importance of well-balanced meals: in order for our bodies to grow and develop properly, they must have the right kinds of foods. If we don't eat properly, we won't be as strong</p>

as we should; we'll be more prone to catch colds and other illnesses; we won't feel as ambitious as we might.

Using colored cut-outs, have children select a good menu for breakfast, lunch, dinner or supper.

Write experience chart. Read orally.

Seatwork: Have pupils copy experience chart story. Draw picture to illustrate. Keep to put in a scrapbook. Make covers from construction paper.

Write title, Good Health Rules.

Vocabulary:

Basic Four, diet, well-balanced, menu, servings, milk, meat, eggs, vegetables, fruit, bread, cereal.

5. Good health habits - continued.

a. Proper eating habits

- (1) well-balanced meals
- (?) eating at regularly scheduled times

Put records in scrapbook.

Write experience chart. Read orally.

Seatwork: Copy experience chart to put in scrapbook.

Vocabulary:
schedule
meals

The Four Food Groups: A food chart for inter-grades, #GA16, Iowa Dairy Industry Commission, 333 Insurance Exchange Bldg., Des Moines, Iowa.

Food Models, #GB12, Iowa Dairy Industry Commission, 333 Insurance Exchange Bldg., Des Moines, Iowa.

Chart paper
paper and pencils
crayons
construction paper

(Picture of a family eating)

We should eat our meals at about the same time each day. Our bodies work best when we keep on a regular schedule.

We are going to keep a record of all the food we eat in a day. Then we'll see if our meals are well-balanced.

Daily record form

Chart paper
Paper and pencils

OBJECTIVES	ACTIVITIES	MATERIAL	EXPERIENCE CHART
5. Good health habits - continued a. Proper eating habits - cont. (3) Learning to eat new foods	<p>Discuss tasting new, unfamiliar foods and learning to like less favorite foods. Using the food cut outs, dramatize a family situation in which mother serves a new vegetable, a different casserole, etc.</p> <p>Encourage students to try new things when eating lunch at school in the Hot Lunch program.</p> <p>Write experience chart. Read orally.</p> <p>Seatwork:</p> <ol style="list-style-type: none"> Copy experience chart for scrapbook. Look in old magazines to find pictures of food. Select a good menu for each meal; paste onto papers. Label food if possible; put in scrapbook. 	Food models, Iowa Dairy Commission Chart paper. Paper and pencils Old magazines Newsprint Paste Scissors	(Picture of a less familiar food) We should taste new kinds of food. Many times we find we like them. Some foods we should try to learn to like. We probably won't like all foods but we should try to eat as many as possible.
5. Good health habits - continued b. Proper food preparation habits. (1) Cleanliness with food	Review lessons about good eating habits by re-reading experience charts. Discuss that care should be taken when fixing these foods to be eaten - vegetables and fruits should be thoroughly washed; meat, bread, cereals, etc., should be kept clean and uncontaminated; you should always wash your hands before handling food; dishes and cooking utensils should be clean. Read pp. 90-97 in <u>Come Rain, Come Shine</u> . Write experience chart. Seatwork: Copy experience chart for scrapbook. Find a picture in a magazine to illustrate. <u>Vocabulary:</u> cleanliness, handle	Experience chart about food.	(Picture showing someone fixing food) <u>Cleanliness With Food</u> We should be very careful to keep everything clean when we handle food. Our hands and the dishes and pans should be clean. We should wash fresh fruits and vegetables before we eat them. Meat and other food should be kept clean, too.

5. Good health habits -
continued
c keeping hands and
fingernails clean

Re-read experience chart about bathing and shampooing hair.
On flannelboard display a series of hands. (Outline hand on pieces of paper. Cut out. Make some appear to be very dirty, others with dirty fingernails, some clean, etc.) Ask children if they know which hands know the least health rules.
Demonstrate how to wash hands properly; clean fingernails. Have children practice. Read pp. 196-197 in Among Friends. Write experience chart. Read orally.
Seatwork: Have children draw a series of pictures showing proper way to wash and clean hands and fingernails. Write appropriate sentence under each picture. Put in scrapbook.

Vocabulary: fingernail file, germs.

Experience chart
Flannel board
Outline of hands
Soap and water
Old toothbrushes
Fingernail files
Chart paper
Newsprint
Crayons
Pencils

Among Friends, by C. L. Brownell, Ruth Evans, and L. B. Hobson; American Book Co., New York, 1959.

Picture of clean hands.
Keeping Hands and Fingernails Clean
It is important to keep our hands clean.
If they are dirty they can carry germs.
Wash hands with lots of soap and water.
(An old toothbrush and a fingernail file will help keep fingernails clean.)

5. Good health habits -
continued
d Brushing teeth

Ask a dentist to speak to the class about proper teeth care. Have him demonstrate proper brushing with a large model of teeth and brush. (Try to select a dentist who can present a realistic program of dental care for children who may come from lower economic homes.)

Have toothbrushes at school for each student. Brush teeth each day after lunch. Use salt and soda solution as well as toothpaste.

Read pp. 98-105 in Come Rain, Come Shine.
Read book, How Many Teeth?

Write experience chart. Read orally.
Seatwork: Copy experience chart for scrapbook.

Picture of a Dentist.
Dr. _____ talked to us today.
He showed us how to brush our teeth. He told us if we have our teeth checked regularly, we can keep them in good shape.
If we run out of toothpaste, we can use salt and soda mixed together.

EXPERIENCE CHART

MATERIALS

ACTIVITIES

OBJECTIVES

5. Good health habits - continued e Wearing clean clothes	<p>Review cleanliness rules and read experience charts. Discuss next rule - wearing clean clothes. Stress changing under clothes every day; dresses, jeans, shirts when they get dirty. Emphasize health aspect of clean clothes.</p> <p>Discuss how families wash clothes - washing machine at home or go to a laundromat. Emphasize that this is a big job for Mother-children should help as much as they can. Demonstrate how to launder garments by hand, how to hang them up so they'll dry quickly. Have each child practice. Show how to iron simple pieces.</p> <p>Write experience chart. Read orally.</p> <p>Seatwork: Copy experience chart for scrapbook.</p> <p>Vocabulary: laundromat, detergent, scrub, rinse.</p>	<p>Experience charts</p> <p>(Picture of a person washing clothes) Wearing clean clothes helps us stay healthy. We should change underclothes every day and our other clothes when they get dirty.</p> <p>Sometimes we can help by washing underclothes out by hand. We have to scrub hard and then rinse them well.</p>
5. Good health habits - continued f Using deodorants	<p>Explain to students that in order to guard against body odors they need to use a deodorant as well as wear clean clothes and bathe regularly. Display different kinds and show how to use. Discuss cost - stress not wasting deodorant when using it.</p> <p>Write experience chart.</p> <p>Seatwork: (1) Copy experience chart for scrapbook; (2) List the cost of different brands of deodorant. Compare prices, figure out differences in cost.</p> <p>Vocabulary: deodorant</p>	<p>Different kinds of deodorants --- creams spray-on roll-on, etc.</p> <p>(Picture of bottle of deodorant) Deodorants help keep us from smelling bad. Wearing clean clothes and taking baths help, too.</p> <p>There are different kinds of deodorants. You can buy them in the grocery store or drug store.</p>

MATERIALS

ACTIVITIES

OBJECTIVES

5. Good health habits - continued	Refer to bulletin board about health rules. Students formulate rules about keeping themselves clean; write on strips of paper and put up on board. Review experience charts.	Bulletin board Sentence strips. Experience charts	Rules for Bulletin Board: 1. Take a bath, shower, or sponge bath. 2. Shampoo hair once a week or more. 3. Keep hands and fingernails clean. 4. Brush teeth every day. 5. Wear clean clothes. 6. Use a deodorant.
c. Basic cleanliness rules	(1) Personal cleanliness and grooming		(Picture of a kitchen) <u>How To Clean the Kitchen</u> Put something like spic-n-span in a pail of hot water. With a rag wash off the table, the cupboards, the counters, stove, and refrigerator.
	5. Good health habits - continued	Stress that one of the most important health rules in keeping clean; that we need to keep our house clean as well as ourselves. As children are getting older they can help do the work involved in cleaning their house. Emphasize that boys as well as girls should know how to clean and should help at home.	Use some Babo and a rubber scrubber to clean the sink. Sweep the floor with a broom. Then mop the floor with hot water and spic-n-span. Every few weeks the floor should be waxed.
c. Basic cleanliness rules	(2) Keeping house clean	Discuss proper way to clean the kitchen. Go to home ec. room or hot lunch kitchen and demonstrate cleaning the sink, counters, tables, refrigerator, stove, cupboards, floor. Stress importance of keeping kitchen, where food is prepared, very clean. Let children clean kitchen thoroughly.	Put wax on a clean floor with a rag.
	(a) Cleaning the kitchen	Write experience chart. Review cleaning procedures carefully.	The kitchen should be kept clean because this is where we eat.
		Ditto master copy to duplicate chart story.	17.
		Old magazines Newsprint Paste, scissors, pencils	
		Vocabulary: cleaning items, cleaning com-pounds, scrub, sweep, scour, wax.	

OBJECTIVES	ACTIVITIES	MATERIALS	EXPERIENCE CHART	
			(Picture of a bathroom)	(Picture of a living room)
5. Good health habits - continued	Discuss proper way to clean the bathroom. Stress importance of keeping it clean so germs won't be there. Go to bathroom in school and demonstrate how to clean; let students practice. Write experience chart. Read orally. Seatwork: Duplicate experience chart to put in scrapbook. Have pupils make a list of all the things they used to clean the bathroom. Make chapter page, Chapter 3 - Cleaning the House	Bathroom in school. Babo, Sani-flush, spic-n-span. Mop, sponge, bowl brush, etc. Chart paper.	How to Clean the Bathroom Use some Babo and a sponge or rubber scrubber to clean the sink and bathbut. Wipe the outside of the toilet with spic-n-span in hot water. Put Sani-flush in the toilet bowl and use a bowl brush. Scrub the floor with spic-n-span and hot water.	How To Clean the Living Room, Dining Room and Bedroom.
(2) Keeping house clean - cont.	(b) Cleaning the bathroom	Ditto master copy to duplicate chart story. Paper and pencil	Be sure to clean the bathroom well to kill germs	Straighten up the rooms and put everything away. Dust the furniture with a soft rag. You can use Endust or Pledge.
(c) cleaning livingroom, dining room, bedroom	Discuss procedures for cleaning livingroom, diningroom, bedroom. Demonstrate and practice in the home ec. room or the classroom. Show how to use a vacuum cleaner and what the different attachments are for. Also, show how to use a dust mop if the pupils do not have vacuum cleaners in their homes. Write experience chart. Read orally. Seatwork: Duplicate chart for scrapbook. Have pupils make a House Cleaning Dictionary: find or draw pictures of all items and products used in cleaning the house. Arrange in alphabetical order and label.	Soft rags Dust mop Dust pan Vacuum cleaner Endust, Pledge Chart paper Newsprint Old magazines crayons	Home ec. room or classroom. Ditto Master copy to duplicate experience chart.	Clean the rug and the floor with a vacuum cleaner. If you don't have one, use a dust mop and

Fun With Our Families

We can do many things with our family to have fun.

Some things don't cost anything. Other things do cost some money.

Doing things with our family makes us feel happy.

- ACTIVITIES**
- Hold a "brainstorming" session - ask children to think of as many things as possible for the ways families can have fun together.
- Write experience chart.
- Seatwork:** Look in magazines for pictures showing the various activities families can enjoy together. Discuss pictures, put on bulletin board under correct heading - At Home or In the Community. Write appropriate sentence to put below each picture.
- Title bulletin board, Ways Families Have Fun Together.
- (6) Play outdoors
Read Jerry books.
- Vocabulary: hobbies, sports, fairs, youth organizations
- (7) Visiting friends or relatives
- (8) Taking care of pets
- (9) Family parties and activities
- (10) In the community
- (1) Sports
 - (2) Fairs
 - (3) Picnics
 - (4) Movies
 - (5) Swimming
 - (6) Fishing
 - (7) Youth organizations
- Refer to mural made earlier by class that contains homes located on a street. Say that many streets with houses make up a community. Establish concept by referring to specific community in which pupils live. Discuss that many people working together make up the community. The people who live on our street and near our house are neighbors. Discuss how to be a
- OBJECTIVES**
- a. In the home
 - (1) Watch TV
 - (2) Listen to music
 - (3) Play games
 - (4) Work on hobbies
 - (5) Play outdoors
- b. In the community
 - (1) Sports
 - (2) Fairs
 - (3) Picnics
 - (4) Movies
 - (5) Swimming
 - (6) Fishing
 - (7) Youth organizations
6. To develop an understanding of the relationships between the home and the community
- a. Neighbors
7. To develop an understanding of the relationships between the home and the community

A good neighbor keeps his yard clean. He does things to help the people who live near him. If someone on his street is sick a good neighbor does not disturb him.

OBJECTIVES	ACTIVITIES	MATERIALS	EXPERIENCE CHART
a good neighbor.	<p>1. Respect for property; don't play in yards where you are not invited.</p> <p>2. Don't throw trash or leave toys on sidewalks or in yards.</p> <p>3. Don't be noisy when neighbors might be sleeping or ill.</p> <p>4. Run errands for busy or sick neighbors.</p> <p>5. Keep your own yard and home attractive.</p>	<p><u>Vocabulary:</u></p> <p>neighbor community invited sidewalk noisy</p>	<p>Our school has a special class for us because we are slow in learning. Our teacher helps us learn how to mind and be happy with everyone.</p>
7. To develop an understanding of the relationships between the home and the community.	<p>We have talked about the important time we spend in our homes. Next to our homes, we spend more time in school. The schools in our community are very important to our home and family. Our mothers and fathers pay taxes to build our schools and pay our teachers. The people in the community choose (by voting) a <u>school board</u> - more neighbors from different streets - to see that the schools are good for boys and girls and that there is enough money to pay the costs. The schools help boys and girls learn the things they need to know to live good lives now and know the things they must do when they grow up and help run a community.</p> <p>Have students name the people in their school who help run the school and help them learn.</p> <p>(1) To learn that all the community has interest in the school.</p> <p>(2) To recognize that special education helps children who have difficulty learning.</p>	<p>Colored Construction Paper Scissors Pencils</p> <p><u>Vocabulary:</u></p> <p>school learning</p>	<p>Our school has a special class for us because we are slow in learning. ACTIVITIES

OBJECTIVES

Discuss significance of special classes.
Have various class members make for mural:
School building
Figures of students and school personnel
Flag Pole and flag
Playground equipment around school

7. Home and Community

c. Churches

- (1) Teaching about right ways to live and about

Our families get help from the schools which make better people by teaching us the right way to live. What is another place in our community where we enjoy being with other people and learn right ways to live? The church is an important help for families.

There are many different churches because people want to worship in different ways and believe different things. Name the different churches in your community.

(Keep in mind that not all families represented by class may attend church.) Churches teach about God and help families when they are in trouble by collecting food, clothes, and money. If someone's house burns down, the people of a church might help them get clothes and food to replace those lost.

Add churches to mural.

7. Home and Community

d. Social Services

We have said that churches help people when they are in trouble. Do you know that there are others in our community whose job it is to help our families when they are in trouble? Discuss:

1. Social Workers
2. Public Health Nurse
3. State Employment Office

Note that these services are free and for people who cannot help themselves. Our community is showing that it is a "good neighbor" and helps people get jobs, solve their problems and become well when they

Colored construction paper
Scissors
Pictures of people going to church; inside of a church

Vocabulary:
church
together

Churches teach us about God and help families in trouble. People like to be together in church.

There are people in our community who help families in trouble. It is their job to help find a job. They give food and medicine to people who cannot buy it. They help people to help themselves.
