New Fact Sheet Provides Assistance on Indoor Venting Sources

The DNR has developed a fact sheet to assist applicants with determining when a facility should consider using the small unit exemption or applying for an air construction permit to restrict potential emissions from indoor venting sources. The information presented in the fact sheet titled “*Indoor Venting Sources*” provides assistance to facilities on evaluating potential to emit for indoor venting sources.

Based on comments and questions received from industry, DNR, and other stakeholders during the review period, the DNR revised the fact sheet.

The fact sheet titled “*Indoor Venting Sources*” is available [by clicking here](#) or by going to www.iowadnr.gov/airconstructionpermits, under the General Guidance tab.

Please contact our toll-free permitting assistance line at 877-AIR-Iowa for more information or additional assistance related to indoor venting equipment and determining potential to emit.

DNR's Air Quality News listserve is targeted to the regulated public and consultants to deliver timely regulatory news, program updates, and technical guidance to your email. If you have difficulty, please contact DNR's Wendy Walker at 515-725-9570.
