## Hold redelivery is now live

### Auto-checkout no longer available

This feature gives users more control over their holds, helping your library connect more readers to the right book at the right time. If you missed earlier announcements about this feature, you can learn more [here](#).

To support this feature, the auto-checkout setting has been removed from your library's OverDrive collection. Going forward, users will receive a notification when a hold is available prompting them to either borrow the book, select "deliver later," or cancel the hold.

### Important notes:

- Help resources and in-app messaging are available in both Libby and the OverDrive app to guide users through this update.
- At this time, anyone using OverDrive on a Kobo device will need to manage holds (borrow, cancel, or have them delivered later) directly in Libby, the OverDrive app, or on your library's OverDrive website.
