### Iowa's 5-year Network Assessment is available for public review and comment

The 5-year Air Monitoring Network Assessment will assist the Iowa DNR in its efforts to monitor the quality of Iowa's air and to keep the public aware of air quality problems. This assessment is required by EPA's national ambient air monitoring regulations. It contains detailed information about the objectives and purpose for the monitors in Iowa's air monitoring network, as well as data trends and an outlook for the future.

The assessment is posted on the Air Quality Bureau's [Public Participation website](#) under Public Input and comments will be submitted to EPA after a 30-day review period. The Air Quality Bureau must receive all public comments by April 30.

Comments may be sent by email to [Sean.Fitzsimmons@dnr.iowa.gov](mailto:Sean.Fitzsimmons@dnr.iowa.gov). Please include "**5-year Air Monitoring Network Assessment**" in the subject line of the e-mail.

DNR's Air Quality News listserv is targeted to the regulated public and consultants to deliver timely regulatory news, program updates, and technical guidance to your email. If you have difficulty, please contact DNR's Wendy Walker at 515-725-9570.
