

IOWA DEPARTMENT OF NATURAL RESOURCES

Iowa Fishing Report

Conservation and Recreation

[Top Iowa Fishing Spots for the Week of August 20](#)

Stay safe when fishing this summer with these tips:

- Try a new fishing spot — if your regular fishing location is popular and busy, try out a new one that is not so crowded.
- Once you find your spot, keep at least 6 feet of distance between you and other groups.
- Stick with your immediate family, but keep groups to fewer than 10 people.
- Bring lures from home instead of buying bait to minimize your interaction with other people.
- Bring hand sanitizer and wash your hands often.

This weekly fishing report is compiled from information gathered from local bait shops, angler creel surveys and county and state parks staff. You can check the activity of your favorite lake or stretch of river within each district, including which species are being caught, a rating of the bite (slow, fair, good or excellent), as well as a hot bait or lure pattern.

For current information, contact the district fisheries office at the phone number listed at the end of each district report.

- [MISSISSIPPI RIVER](#)
- [SOUTHEAST](#)
- [SOUTHWEST](#)

NORTHWEST

Arrowhead Lake

Water clarity is good. **Bluegill** - Fair: Cast a small jig fished under a bobber near submerged structure along shore in 5-10 feet of water. Try small popping plugs on a fly rod on calm evenings. Cast plugs around downed trees along the shoreline. Try drifting down the middle of the lake with a 1/16 ounce leadhead to find suspended fish. **Largemouth Bass** - Fair: Cast traditional bass lures near submerged woody structure throughout the lake and along weed lines in the southern part of the lake.

Black Hawk Lake

Surface water temperatures are in the mid-70's. Water level is a few inches below crest. **Yellow Perch** - Slow. **Largemouth Bass** – Fair: Cast traditional bass lures and plastics along shore and near docks. You can catch fish anywhere around the lake, but some of the best areas are Ice House point shoreline, inlet bay and bridge area near the outlet, and along Gunshot Hill. **Walleye** - Slow. **Channel Catfish** - Fair: Use natural baits like nightcrawlers, crawdads or shrimp fished around deeper rock piles. Try drifting at night to cover a lot of water. Target catfish around the inlet bridge, especially if there is some flow following a rain event. **Bluegill** – Fair: Fish the deeper rock piles near Gunshot Hill and in the east basin. **Black Crappie** - Fair: Anglers are picking up crappie around and inside the fish house. Many of the crappie are 8 to 9-inches, but a few bigger ones are mixed in. Use a small white jig or a small live minnow under a bobber.

Browns Lake

Channel Catfish - Fair: Look for channel catfish along the outside bend of the lake in deeper water. **Largemouth Bass** - Fair: Look for largemouth bass along the edges of the lotus patches and the deadfalls along the outside bend of the lake.

Brushy Creek Lake

Brushy Creek is currently being drawn-down four feet for a construction project. Launch boats at the north ramp or the west ramp; docks have been adjusted at the west ramp to make them easier to use. **Black Crappie** - Fair: Use a small piece of crawler or minnow on a jig either drifting or fished under a bobber near submerged woody structure. **Largemouth Bass** - Fair: Throw traditional bass lures, plastics or weedless lures near submerged structure and along weed lines. **Yellow Perch** - Slow. **Walleye** – Slow. **Bluegill** - Fair. **Channel Catfish** - Fair: Brushy Creek Lake has a low-density population of larger channel catfish. Target these larger fish near rocky areas and submerged woody structure using a variety of cut baits and crankbaits.

North Twin Lake

Surface water temperature is around 75 degrees. Water clarity is around 16 inches. Water levels are several inches below crest. **Yellow Bass** - Fair: Use a small jig tipped with a piece of crawler or waxworm fished under a small bobber. Yellow bass are 6-10 inches long. A lot of yellow bass are hanging out around the dead falls and woody structure in Muddy Bay and along the wooded shoreline just south of Muddy Bay. **Channel Catfish** - Fair: Channel catfish are numerous in North Twin Lake. Use natural baits like nightcrawlers, crawdads, or shrimp fished near shore. If fishing from a boat, try drifting at night over deeper water. **Bluegill** - Slow: Try small jigs tipped with a crawler fished under a bobber along shore near vegetation edges. **Walleye** - Slow: Try

trolling walleye in the middle of the basin using crankbaits or crawler harnesses. Recent surveys show a lot of big walleye along the wooded shoreline just south of Muddy Bay.

Storm Lake (including Little Storm Lake)

Storm Lake has a daily limit of 3 walleye, and all 17- to 22-inch walleye must be released; no more than one walleye longer than 22 inches may be taken per day. **Walleye** - Fair: Drift with leeches or crawlers along the dredge cuts and troll crankbaits in the main lake. **White Bass** - Fair: Pick up white bass from shore and in the main lake while trolling. Use twisters, crawlers or crankbaits in the marina, near the inlet and north and east shores in the main lake. **Channel Catfish** - Fair: Try a variety of dip baits, cut baits and crankbaits fished near shore and anywhere with rocky structure or rock piles. **Bluegill** - Slow: Find panfish around patches of vegetation. **Yellow Perch** - Slow: Look for panfish around patches of vegetation. **Black Crappie** - Slow: Find panfish around patches of vegetation.

Water temperatures are in the mid-70's in the Black Hawk District. River levels are low and most lake levels are below crest. For more information, contact the Black Hawk District office at 712-657-2638.

Beeds Lake

Bluegill – Fair: Use a small piece of crawler under a bobber near the shore. **Black Crappie** – Fair: Drift fish a minnow or small tube jig. **Yellow Bass** – Fair.

Clear Lake

The water temperature is in the mid-70's. **Walleye** - Fair: Anglers are catching walleyes jigging a crawler on the rock reefs. Best bite is early morning and late evening. **Yellow Bass** – Good: Yellows are biting on a variety of baits. Use your electronics to find and stay on fish. **Channel Catfish** - Good: Try cut bait or crawlers fished on the bottom from the windswept shore. Evening bite is best. **White Bass** - Slow:

Crystal Lake

Black Crappie - Fair: Drift fish a minnow or small jig near the dredge cut. **Largemouth Bass** - Fair.

Lower Pine Lake

Black Crappie - Fair: Best bite is in the evening. **Bluegill** - Good: Lots of 3 to 6-inch fish.

Upper Pine Lake

Black Crappie - Fair: Best bite is in the evening. **Bluegill** - Good: lots of 3 to 6-inch fish.

For information on the lakes and rivers in north central Iowa, contact the Clear Lake Fish and Wildlife office at 641-357-3517.

East Okoboji Lake

The walleye season is open. The water temperature is 76 degrees. **Bluegill** – Good: Find schools in deeper water. **Black Crappie** – Fair. **Yellow Perch** – Good. **Yellow Bass** – Good.

Lake Pahoja

Bluegill - Good: Use small jigs tipped with waxworms. **Black Crappie** - Good: Try small jigs tipped with waxworms. **Largemouth Bass** - Good: Use rubber worms or other slow-moving jigs.

Lost Island Lake

Yellow Perch – Fair. **Walleye** – Fair.

Silver Lake (Dickinson)

Walleye – Good.

Spirit Lake

The walleye season is open. A great walleye bite was seen in June, but has slowed due to warm water conditions. A great yellow perch bite has slowed down, with many yellows over 10 inches caught. Bites should pick up again as temperatures drop. The water temperature is 75 degrees. **Bluegill** - Good: Schools are starting to move deeper off shore post-spawn. **Walleye** - Fair: A fairly good bite lately can also be seen from shore. Try bottom bouncers or crankbaits to cover more water. **Black Bullhead** - Fair: Anglers have been successful at the north grade. **Yellow Perch** - Fair: The bite has really picked up; fish are a little deeper than what can be easily fished from shore. Try small humps in the main basin or weed edges.

West Okoboji Lake

The walleye season is open. The water temperature is 76 degrees. The panfish bite has been great. The ability to anchor or use Spot Lock is very useful to stay on fish in about 20-30 feet of water. **Bluegill** - Excellent: Schools are deeper off shore. Try fishing in 20-30 feet of water off most points. Anglers have had success using pilkies. **Smallmouth Bass** - Fair: Find smallmouth bass on rock piles or on the points. **Largemouth Bass** - Fair: Find largemouth bass on the weed lines. **Yellow Perch** - Fair: Schools have started to move deeper off shore. **Yellow Bass** - Excellent: Easily find yellow bass while fishing for bluegill.

Iowa Great Lake water temperatures have cooled down a bit and are around 75 degrees. This week's extended forecast calls for temperatures ranging from the upper 80's to lower 90's. The area walleye bite has slowed considerably due to very warm water conditions. The panfish bite has been excellent in deeper water, especially on West Okoboji. The overall bite should pick up as temperatures go down. For current conditions, call the Spirit Lake District Office at 712-336-1840.

NORTHEAST

Cedar River (above Nashua)

Repairs to the Nashua dam continue as water levels and flows drop. Water levels are falling with good water clarity. Use caution; underwater hazards may have moved. Go to the [USGS Current Conditions website](#) for more information on water levels. **Channel Catfish** - Good: Use dead chubs, stinkbaits and worms fished near bottom near dusk in woody debris or stumps. **Walleye** - Good: Fish are active in the evening. Try near current breaks and in log jams. Be prepared to run your lure near bottom of pools. **Smallmouth**

Bass - Good: Use a jig tipped with natural colored twister tails or ringworm in current breaks or rock ledges and gravel bars. **Black Crappie** - Fair: Try minnows fished under a bobber near downed trees and slow water or pool areas.

Decorah District Streams

All trout stream stockings are unannounced due to COVID-19 precautions. A small number of trout streams are not stocked in August due to marginal water temperatures; this is an annual occurrence. To check which ones, please visit our [trout fishing website](#). **Rainbow Trout** - Excellent: Hoppers, beetles and anything that looks buggy will work this time of year. Try along grassed edges, undercut banks and around boulders. Use hair jigs or spinners for aggressive fish. **Brown Trout** - Excellent: There have been excellent evening mayfly hatches. A keen eye and a fly box filled with a variety of sizes and colors will help match a hatch. **Brook Trout** - Good: Please respect private property open to angling; pick up trash and be considerate. Use a variety of small terrestrial flies such as crickets, grasshoppers and ants.

Lake Hendricks

Water clarity remains fair and very green. Water temperatures in the mid to upper 70's. **Bluegill** - Fair: Shore anglers will find fish around the jetties or along the weed lines. Use a small piece of worm under a bobber. **Channel Catfish** - Good: Try a worm or stinkbait fished near the bottom around woody structure in the evening. **Largemouth Bass** - Fair: Use topwater lures fished along weed edges.

Lake Meyer

Water clarity is good. Early morning and evening bite is best. An excellent lake to use a paddle board or kayak to fish the nooks and crannies. **Bluegill** - Fair: Good: Use a small hook tipped with a small piece of worm under a bobber from shore. Fly anglers should try a small cricket with a jerky movement on the waters surface along a weed edge. **Largemouth Bass** - Good: Use a topwater lure in the evening when fish are actively feeding. Also try a jig tipped with a plastic worm. **Channel Catfish** - Good: Try stinkbait or worms fished on the bottom around woody structure near dusk.

Turkey River (below Clermont)

Water levels are getting down to summer lows. **Walleye** - Good: Use a jig tipped with natural colored plastics or crankbait in deeper holes and log jams. Fish deeper for walleye holding near the bottom. **Smallmouth Bass** - Fair: Try a variety of brightly colored lures in eddies or along rocky ledges.

Upper Iowa River (above Decorah)

Water levels are falling with excellent clarity. Sand and gravel bars are appearing. You might have to walk in a few places. **Walleye** - Good.

Upper Iowa River (below Decorah)

Water levels are falling with excellent clarity. Sand and gravel bars are appearing; take advantage of these spots to fish the eddies or deeper areas. **Walleye** - Good. **Smallmouth Bass** - Fair.

Volga Lake

A green algae bloom is causing poor water clarity. Blooms should clear as water cools. **Bluegill** - Fair: Use a small hook tipped with a piece of worm. Wait for the bobber

to go under the water, then give the line a quick jerk to set the hook. Keep the rod tip up to put tension on the line while reeling in the fish. **Largemouth Bass** - Good: Slowly troll a lure over fish attracting structure and get ready to set the hook. Try crankbaits or a jig with a twister tail. **Channel Catfish** - Excellent: Use worms or stinkbait fished near dusk. Find a good stump or woody structure to toss bait and wait; patience is key for this fish.

Water levels on area rivers are low. Clarity is good on most. Thunderstorms are possible Friday into Saturday morning. Temperatures are in the 70's. For current fishing information, please call the Chuck Gipp Decorah Fish Hatchery at 563-382-8324.

[Big Woods Lake](#)

A few reports of anglers catching crappie in Big Woods Lake. **Black Crappie** - Fair: Try vertical jigging or casting colored tube jigs around structure or drifting a minnow under a slip bobber.

[Casey Lake \(aka Hickory Hills Lake\)](#)

Largemouth Bass - Good: Try crankbaits and topwater artificial baits. **Bluegill** - Good: Cast a piece of nightcrawler under a bobber. **Channel Catfish** - Good: Try stinkbaits or leopard frogs fished on the bottom of the lake.

[Cedar River \(Nashua to La Porte City\)](#)

Reports for walleye has been good in Bremer County. **Channel Catfish** - Good: Try stinkbaits or fresh chicken livers fished above fallen tree snags. **Walleye** - Good: Cast crankbaits or a jig tipped with a nightcrawler.

[Shell Rock River \(Greene to Shell Rock\)](#)

Walleye - No Report: Cast crankbaits or a jig tipped with a nightcrawler. **Smallmouth Bass** - No Report: Cast crankbaits or a jig tipped with a nightcrawler.

[Wapsipinicon River \(Tripoli to Troy Mills\)](#)

Reports of channel catfish being caught on the Wapsipinicon River. **Channel Catfish** - Good: Try stinkbaits or fresh chicken livers fished above fallen tree snags.

Interior rivers continue to drop and are providing excellent angling opportunities. Lakes in and around Cedar Falls/Waterloo area have been good for largemouth bass. Trout streams are in excellent condition. All fish hatcheries remain closed. Call the Manchester Hatchery at 563-927-3276 for more information.

MISSISSIPPI RIVER

[Mississippi River Pool 9](#)

Pool level is 8.8 feet at Lansing and remains stable. Water temperature is 77 degrees. **Walleye** - Good: Walleyes are feeding on the wing dams; drift crawlers or crankbaits. **Largemouth Bass** - Good: Largemouth are hanging out along weed beds and along channel borders. **Smallmouth Bass** - Excellent: Try crankbaits fished on rock tips of islands in the main channel. **Flathead Catfish** - Good: Smaller flatheads are biting on worms fished in the deeper tailwaters of dams. **Channel Catfish** - Excellent:

Try prepared stinkbait and worms fished in current along rock shorelines. **Freshwater Drum** - Excellent: Drum are biting on worms sunk to the bottom in areas of current.

Mississippi River Pool 10

Pool 10 at Lynxville is stable near 616 feet. Water clarity is good. Water temperature is near 79 degrees. **Walleye** - Good: Walleye are feeding on the wing dams; drift crawlers or crankbaits. **Largemouth Bass** - Good: Largemouth are hanging out along weed beds and along channel borders. **Flathead Catfish** - Good: Smaller flatheads are biting on worms fished in the deeper tailwaters of dams. **Channel Catfish** - Excellent: Try prepared stinkbait and worms fished in current along rock shorelines. **Smallmouth Buffalo** - Excellent: Use crankbaits fished on rock tips of islands in the main channel. **Freshwater Drum** - Excellent: Drum are biting on worms sunk to the bottom in areas of current.

Mississippi River Pool 11

Pool 11 is 7.5 feet and is predicted to remain stable. Water temperature is in the mid-70's. Water clarity is good. **Walleye** - Good: Walleyes are feeding on the wing dams; drift crawlers or crankbaits. **Largemouth Bass** - Good: Largemouth are hanging out along weed beds and along channel borders. **Smallmouth Bass** - Excellent: Try crankbaits fished on rock tips of islands in the main channel. **Flathead Catfish** - Good: Smaller flatheads are biting on worms fished in the deeper tailwaters of dams. **Channel Catfish** - Excellent: Try prepared stinkbait and worms fished in current along rock shorelines. **Freshwater Drum** - Excellent: Drum are biting on worms sunk to the bottom in areas of current.

Upper Mississippi River levels remain stable. Water clarity is good. Walleye slot length limits now apply on the entire Mississippi River. All walleyes less than 15 inches long and between 20-27 inches long must be released immediately. Only one walleye greater than 27 inches can be kept. Combined walleye/sauger daily harvest limit of 6 and possession of 12.

Mississippi River Pool 12

Water levels are expected to remain steady this week. The water level is 6.9 feet at the Lock and Dam and 9.2 feet at the RR bridge. The water temperature is around 79 degrees. The water clarity is excellent. **Northern Pike** - Good: Flashy spinners in eddy areas or along weed lines will take this toothy predator. **Bluegill** - Fair: A few bluegills reported in shallow backwater areas near brush piles. Expect them to move along the channel edges in low water. **Channel Catfish** - Excellent: Lots of channel catfish are being caught on prepared stink baits. Try floating worms along rock lines. **Freshwater Drum** - Excellent: Freshwater drum are easy to catch on an egg sinker and worm rig. Fish in moderate current. **Largemouth Bass** - Excellent: Bass are being taken off lily pad areas on spinnerbaits or frog imitation lures. **Smallmouth Bass** - Excellent: Find smallmouth bass along rock piles with strong current; use flashy spoons or crankbaits. **Walleye** - Fair: Floating grass is hampering walleye fishing; wing dam fishing could be good in the next few weeks if the water remains low. **White Bass** - Fair: Some white bass are being caught in the Dubuque tailwater on white jigs. Look for feeding

schools elsewhere. **Black Crappie** - Good: Crappie are being taken out of brush piles and marina areas on small jigs and minnows. **Flathead Catfish** - Excellent: Smaller flatheads are being taken on worms in deeper holes and in the tailwater.

[Mississippi River Pool 13](#)

The water level is 7.3 feet at the Bellevue Lock and Dam. The water temperature is 79 degrees. The water clarity is good. **Channel Catfish** - Excellent: Catfish are along rock lines and brush piles in moderate current. Most anglers are using prepared stinkbaits. **Freshwater Drum** - Excellent: Freshwater drum are easy to catch on a sinker and worm rig. Fish in moderate current. **Northern Pike** - Good: Try flashy spinners fished along old weed edges and rock shorelines. **Largemouth Bass** - Excellent: Bass are being taken off lily pad areas on spinnerbaits or frog imitation lures. Some are also being caught off the rocks in the tailwater. **Bluegill** - Fair: Try fishing around brush piles in larger sloughs with reduced current. **Flathead Catfish** - Excellent: Use live fish for bait. Lots of trot lines are being set; make sure you follow trot lines rules, especially having a tag with your name and address attached to the lines. Smaller flatheads are being taken in deep holes or in the tailwater on worms. **White Bass** - Fair: White bass are being reported in the tailwater; use flashy small spinners. **Walleye** - Slow: Walleye fishing remains slow, but many feel it should pick up soon with this low water.

[Mississippi River Pool 14](#)

The water level is 6.7 feet at the Fulton Lock and Dam, 10.5 feet at Camanche and 5.5 feet at LeClaire. Water temperature is 79 degrees. Water clarity is good. **Channel Catfish** - Excellent: Anglers are using prepared stinkbaits along rock lines. **Freshwater Drum** - Excellent: Freshwater drum are easy to catch on a worm sinker and worm rig. Fish in moderate current. **Largemouth Bass** - Good: Bass are being taken off lily pad areas on spinnerbaits or frog imitation lures. Some are being taken off of exposed rock piles. **Northern Pike** - Good: Use flashy spinners along backwater shorelines or in the tailwaters for this aggressive fish. **Flathead Catfish** - Excellent: Try live fish for bait. Lots of trot lines are being set; make sure you follow trot lines rules, especially having a tag with your name and address attached to the lines. **Bluegill** - Fair: Find bluegills near the mouths of large backwater areas, usually around brush piles. As water levels get low look for bluegills along the channel edges. **Smallmouth Bass** - Good: Try spinners or crankbaits along rip-rap areas. **White Bass** - No Report: Expect white bass to be hitting in the tailwaters and elsewhere. Look for feeding schools of fish; use flashy small spinners. **Walleye** - Fair: Floating grass is hampering walleye fishing; wing dam fishing could be good in the next few weeks if the water remains low.

[Mississippi River Pool 15](#)

Water level is around 7 feet at Rock Island and is receding. The water temperature is 79 degrees; water clarity is good. **Freshwater Drum** - Excellent: Freshwater drum are easy to catch on a worm sinker and worm rig. Fish in moderate current. **Channel Catfish** - Excellent: Channel cats are readily biting on cut bait and prepared baits. **Flathead Catfish** - Excellent: Try live bait around brush piles or in the tailwater area. **Smallmouth Bass** - Fair: Fish the rocky habitats along the channel edge.

Water level is expected to hold somewhat steady. Water temperature is near 79 degrees. If you have any fishing questions, please contact the Bellevue Fisheries Station 563-880-

Mississippi River Pool 16

Tailwater stage is 6.95 feet at Lock and Dam 15 in the Quad Cities and has been fairly steady the past few days. **Channel Catfish** - Good: Use chicken livers or dip baits around brush piles and snags along the main channel and side channels. **White Crappie** - No Report: Look for crappies in the backwaters. Try jigs and plastics or minnows fished in Sunset Marina or Andalusia Island Complex. **Bluegill** - No Report: Try pieces of worm under a bobber in Sunset Marina or Andalusia Island Complex. **Walleye**-Fair: Look for walleyes on the wing dams. Try trolling crankbaits or three-way rigs with pieces of crawler.

Mississippi River Pool 17

Tailwater stage is 5.54 feet at Lock and Dam 16 in Muscatine and has been fairly steady. **Channel Catfish** - No Report: Use chicken livers or dip baits around brush piles and snags in the main channel and side channels. **White Bass** -No Report: Look for white bass by the dam or by GPC. Cast jigs and twister tails or crankbaits. Also look for white bass on the wing dams. **Bluegill** - No Report: Look for bluegills in the backwaters. Try pieces of worm under a bobber fished around brush piles in Big Timber or Cleveland Slough. **Walleye** - Fair: Look for walleyes on the wing dams. Try trolling crankbaits or pulling three-way rigs with crawlers.

Mississippi River Pool 18

Tailwater stage is 6.39 feet at Lock and Dam 17 at New Boston and has been fairly steady. **Channel Catfish** - Good: Use or chicken livers or dip baits around brush piles and snags in the main channel and side channels. **Walleye** - No Report: Look for walleyes on the wing dams; use crankbaits or three-way rigs with crawlers. **White Crappie** - No Report: Look for crappies in the backwaters around brush piles; try minnows under a bobber or jigs and plastics. **White Bass** - No Report: Look for white bass at the outlet of Odessa up by the dam or on the wing dams. Cast jigs and twister tails or crankbaits.

Mississippi River Pool 19

Tailwater stage is 3.37 feet at Lock and Dam 18 has been been fairly steady. River stage is 9.24 feet at Burlington. River stage is 525.6 feet at Ft. Madison. We have not received any fishing report information for this pool this week. **Channel Catfish** - No Report: Look for channel catfish around brush piles and snags along the main channel and side channels. Use dip baits, shad or nightcrawlers. **White Crappie** - No Report: Look for crappies in the backwaters. Try minnows under a bobber or jigs and plastics fished around brush piles. **Walleye** - No Report: Look for walleyes on the wing dams. Use crankbaits or three-way rigs with crawlers.

Tailwater stages have been fairly steady the past few days. Main channel water temperature is around 78 degrees. Water clarity is fair. If you have questions on fishing Pools 16-19 contact the Fairport Fish Hatchery at 563-263-5062.

SOUTHEAST

Big Hollow Lake

Water temperature was 84 degrees at noon on Wednesday (8/19). Water clarity is improving. Duckweed has taken over in parts of the lake, especially in the boat ramp bay. **Bluegill** - Slow: The bluegill bite has slowed with the return of warm stagnant weather. Work the brush piles in 6 to 7 feet of water. **Largemouth Bass** - Slow: Work out in a little deeper water in the flooded timber in the bays. **Channel Catfish** - Fair: The face of the dam is always good. Also try in the main two bays at the very upper end of the lake around the brush piles and downed trees.

Iowa River (Columbus Junction to Mississippi River)

The Iowa River continued to slowly drop this weekend, down another 3-4 inches. **Channel Catfish** - Fair: They are going to start piling into deeper holes with brush piles for cover.

Lake Belva Deer

Water temperature is in the low 80's most afternoons. Water clarity continues to improve, just not very fast. **Largemouth Bass** - Fair: Try early morning in the flooded timber and around and over top of the mounds at the upper end. **Bluegill** - Fair: The bite has slowed. Work the mounds at the upper end of the lake. Also expect to pick up a few when drifting for crappies at the lower end. **Black Crappie** - Slow: Crappie fishing has slowed down again. Try slow trolling at the usual spots down at the lower end of the lake. **Channel Catfish** - Fair: Catfishing remains decent. Try chicken liver or stinkbaits fished along the face of the dam and around the rocks on the jetties.

Lake Darling

Water temperature Thursday (8/20) morning was 78 degrees. Most afternoons the water temperature is in the low 80's. Water is still turbid and green. **Largemouth Bass** - Fair: While the nights are getting cooler, the daytime temperatures are still warm. Most bass anglers are fishing the rock and brush piles in deeper water in the morning. **Bluegill** - Slow: Work rock piles in 6-8 feet of water. Drift from rock pile to rock pile using a small jig tipped with live bait like a waxworm or small fish worm. **Channel Catfish** - Fair: Catfish like warm water. Evening bite is good. Use chicken liver; work the culvert piles at the base of the rip-rap around the point and back around to the jetty by the beach.

Lost Grove Lake

Water temperature is around 80 degrees; expect it to get into the low to mid-80's in the next few days. **Largemouth Bass** - Fair: Morning bite is best. Some are being taken on topwater baits. After it starts to warm up, bass will move deeper and settle down for the day. **Bluegill** - Fair: Work small jigs tipped with a trailer or live bait in 12 -16 feet of water. The hotter temperatures will keep them deeper for a while. **Black Crappie** - Slow: Crappies are in deep hiding mode. A few are getting caught when bluegill fishing in the deeper water.

Skunk River (Rose Hill to Coppock)

The Skunk River water level has held steady this week. Water levels are low enough that anything bigger than a canoe will have problems getting around. **Channel Catfish** - Fair:

Work the bigger brush piles near the deeper holes. More than a few grass frogs are still around to use for bait.

For more information on the above lakes, call the Lake Darling Fisheries Office at 319-694-2430.

[Coralville Reservoir](#)

The lake level is at normal summer pool of 683.5 feet. The ramp in Macbride State Park is closed due to storm clean-up. Some of the Corps ramps may also be closed. Sandy Beach and Mehaffey Ramps are open. **Channel Catfish** - Fair: Troll cut bait in the channel or up on shallow flats depending on the fish activity.

[Green Castle Lake](#)

The park is closed until further notice due to storm damage.

[Iowa Lake \(Iowa Co.\)](#)

Bluegill - Slow: Look for fish around deeper brush piles. **Black Crappie** - Slow: Try around deeper brush piles or suspended over 14-20 feet of water. **Channel Catfish** - Fair: Typical baits have been working.

[Iowa River \(Marshalltown to Coralville Lake\)](#)

River accesses in Marshall County are closed until further notice. Other counties may be the same.

[Lake Macbride](#)

The main park entrance is closed due to storm damage and clean-up efforts. The park ramps are closed. The other ramps on the lake are open. **Wiper (Hybrid Striped Bass)**- Slow: Troll crankbaits during the day and throw topwaters or plastics at sunrise/sunset for surface feeders. **Walleye** - Slow: Troll crankbaits or worm harnesses in 7-13 feet of water. **Largemouth Bass** - Slow. **Channel Catfish** - Slow.

[Otter Creek Lake](#)

The park and lake are closed until further notice due to storm damage.

[Pleasant Creek Lake](#)

The park is closed due to storm damage.

[Sand Lake](#)

Sand Lake in Marshalltown is currently closed, but the county was hoping to have it opened by the weekend.

[Union Grove Lake](#)

The lake is open, but the trails are unsafe due to debris. No fishing report is available, other than an algae bloom is occurring now.

Additional parks/lakes may be still closed due to storm damage. For more information, contact the Lake Macbride Fisheries Station at 319-624-3615.

Hawthorn Lake

Largemouth Bass - Fair: Use spinnerbaits or crankbaits along rock piles and rip-rapped shores. Try topwater lures early and late in the day. **Channel Catfish** - Fair: Try liver or stinkbait in 4-8 feet of water.

Lake Miami

Bluegill - Fair: Drift small jigs for suspended bluegills in the middle of the lake. Try small jigs tipped with a chunk of nightcrawler around the fishing jetties. **Largemouth Bass** - Fair: Use topwater lures early and late in the day. Try crankbaits around the cedar trees and along the rip-rapped shorelines. **Channel Catfish** - Fair: Use nightcrawlers or liver in 4-8 feet of water.

Lake Sugema

Black Crappie - Slow: Drift jigs tipped with a minnow in 6-10 feet of water for suspended crappies. **Largemouth Bass** - Fair: Use topwater lures along the shorelines; fish deeper with crankbaits or rubber worms.

Lake Wapello

Largemouth Bass - Fair: Try topwater lures early and late in the day; target cedar tree piles. As the day warms up, try plastics fished deeper around tree piles. **Bluegill** - Slow: Drift nightcrawlers on small jigs for suspended bluegills. Target areas in 6-8 feet of water. **Channel Catfish** - Fair: Use nightcrawlers or stinkbait. Don't fish too deep; lakes will stratify this time of year. **Black Crappie** - Slow: Drift jigs tipped with minnows for suspended crappie.

Rathbun Reservoir

The current lake level is 904.01 msl. Normal operating elevation is 904.0 msl. Lake Rathbun has zebra mussels, so make sure to properly drain, clean, and dry equipment before transporting to another waterbody. Use caution while boating: the lake has not been at conservation pool for some time. **Wiper (Hybrid Striped Bass)** – Fair: Look for flocks of seagulls to find shad; hybrids should be below the school of shad. Troll crankbaits that mimic gizzard shad through this area. **Walleye** - Fair: Troll gizzard shad imitating crankbaits around rock piles, submerged points and areas with depth changes. **Channel Catfish** - Fair: Try nightcrawlers or chicken liver in 6-8 feet of water.

Red Haw Lake

Largemouth Bass - Fair: Try topwater lures early and late in the day. Use spinnerbaits and crankbaits during the hotter parts of the day. Target submerged structure and rocky shorelines. **Bluegill** - Slow: Try drifting with nightcrawlers on small jigs in the main part of the lake. **Channel Catfish** - Slow: Use chicken liver or stinkbait in 4-8 feet of water.

The district includes Appanoose, Davis, Lucas, Mahaska, Monroe, Wapello, Wayne and Van Buren counties. Contact the Rathbun Fish Hatchery at 641-647-2406 with questions about fishing in south central Iowa.

SOUTHWEST

Big Creek Lake

Walleye - Slow: Troll live bait rigs or crankbaits at depths of 15 feet or less in the upper half of the lake. **Wiper (Hybrid Striped Bass)** - Slow: Cast or troll shad imitating spoons, crankbaits or plastics. Look for schools of young shad breaking the surface of the water to find feeding wipers.

The advertisement features a dark blue background with a subtle fireworks pattern. At the top, the text "Limited Time Offer!" and "T-Shirt & Magazine Combo" is displayed in large, white, bold font. Below this, a yellow banner with the text "Subscribe Today!" is centered. To the left of the banner, four covers of the "IOWA OUTDOORS" magazine are shown, each with a different nature-themed cover: a rabbit, an owl, butterflies, and a penguin. To the right of the banner, a light blue t-shirt is displayed, featuring a graphic that reads "100 YEARS OF STATE PARKS" at the top, followed by "IOWA OUTDOORS" in a stylized font with a silhouette of a person hiking, and "IOWA OUTDOORS" again at the bottom.
