## Kids & Family Seven games for kids to learn about empathy

Has your child been called dramatic? For most parents, the thought of a dramatic child conjures nightmarish images of angry toddlers throwing tantrums in the produce section. But even if we just described your teary-eyed tyke, don't worry! There's another kind of dramatic that can be really good for you - and for your kids! Each time children play pretend, they have to imagine how another person thinks and feels, and act accordingly. Although acting may just seem like a fun game to your kids, it's also giving them [amazing practice at understanding people](#) and developing empathy.

## Early Childhood Resources to get your citizen scientists started

According to the Iowa Conservation Education Coalition, "Citizen science projects combine useful observation or data collection with an opportunity for students to learn more about scientific principles, problems and processes as well as helping them better understand our environment and how to protect it." Before you and your students are ready to dive into your data collection adventure, you may need to set the stage with ecology, data collection, conservation or environmentalism concepts. Iowa PBS Education can help you and your students get started on [your citizen scientist adventure](#).

## Elementary School integration

The fight for school integration in Iowa happened 85 years before the famous Brown v. Board of Education case in Topeka, Kansas. When Susan Clark was denied admission to Muscatine's Second Ward Common School Number 2 because she was Black, her father, Alexander Clark, a determined businessman of Muscatine, acted to resist

racism and the segregation of Iowa's schools and won. The Iowa Supreme Court ruling in Susan's favor became a foundational case for change in Brown v. Board of Education. Iowa PBS is proud to bring you this unique Iowa story. Check out Iowa Pathways for more [ordinary Iowans doing extraordinary things.](#)

## Secondary Smithsonian

Smithsonian brings interdisciplinary resources with stories that only the Smithsonian could tell. These resources [connect content from across the Smithsonian's many museums](#) and research centers to introduce concepts that cross subject areas. They help foster a sense of creativity in students, and encourage the exploration of new ideas and perspectives by connecting concepts across disciplines.
