

SECOND BIENNIAL REPORT

OF THE

HOSPITAL

FOR THE INSANE,

AT

INDEPENDENCE,

FOR THE FISCAL TERM ENDING NOVEMBER 2, 1875.

DES MOINES:

R. P. CLARKSON, STATE PRINTER.

1875.

REPORT.

OF THE

IOWA HOSPITAL FOR INSANE.

AT INDEPENDENCE,

FOR THE BIENNIAL ENDING NOVEMBER, 1, 1875.

TO HIS EXCELLENCY GOV. CYRUS C. CARPENTER :

The Board of Trustees most respectfully report as follows :

The condition of the hospital for the last biennial has been progressive and prosperous.

At the date of the previous report the number of patients then in hospital was 113. There have since been received from all sources 328. Discharged, 190. Died, 42. Present number, 251.

The capacity of the institution has, from time to time, been increased by the completion of several wards, so that the whole number now in use is eleven, with a capacity for 250 patients.

The amount of current expense for the hospital since the last biennial report, is \$101,780.81. Deducting from this amount \$9,531.62, paid for supplies on hand November 1, 1875, it leaves a balance of \$92,249.19 actually expended.

This sum, *per capita*, amounts, on an average, to \$230.62 per annum, or \$19.21 per month, or \$4.43 per week. This expense *per capita* is gradually diminishing as the number of patients is increasing.

The amount of moneys received from all sources, since the last report, for defraying current expenses, is \$102,599.87, leaving a balance on hand of \$819.06.

The Fifteenth General Assembly appropriated eighteen thousand dollars for specified improvements, from which has been expended, in accordance with the provisions of the act, as follows:

	\$18,000.00
For furnishing the hospital.....	\$7,312.17
For building a barn.....	4,227.97
For sufficient supply of water.....	2,271.84
For fencing, breaking and stock.....	1,592.29
For contingencies.....	1,311.95
Total.....	\$16,716.22
Leaving an unexpended balance on November 1, 1875, (which has since been expended for furnishing the hospital) of.....	\$1,273.78

It was found impossible to build a suitable barn for the sum of three thousand dollars, as specified in section 2 of the act, but as the law allowed of applying the overplus of any of the specified objects to any of the others, which might require more than the individual specification, there has arisen no difficulty in building a good, substantial structure 50 by 75 feet, with granite foundation, having a frost proof cellar, eight feet in depth, under the whole, with a capacity for storage of all the vegetables and root crops, for the winter use of the hospital. There are two stories above,—the first for stalls, carriages, granary, threshing floor and hostler's room furnished with water, and warmed by steam, and second story for storage of hay, grain and straw.

We have been successful in obtaining a good supply of soft, pure water from a well, one-fourth of a mile distant, connected by a syphon with a former well at the hospital, at less expense than specified in the act.

Three yards have been fenced with planed, painted, and tight board fences, two of them for open exercise grounds for the patients, and the third for drying and airing clothes. Also one hundred and twenty acres of land have been fenced, seventy put under cultivation, and fifty for pasturage.

Considerable grading has been done in front of the hospital by the employes, when not required for other work. This ground has been laid out as in the original topographical survey, and planted with evergreens. Also an open ditch has been dug from the outlet of the main sewer, conducting the drainage into a cesspool at a sufficient distance from the building. There has also been built a cheap slaughter-house, and the old machine shop, formerly used for the construction, has been converted into a substantial ice-house.

Since the last report Dr. Willis Butterfield, assistant physician, having resigned, Dr. G. H. Hill was elected, at the last annual meeting, to the position, which he has filled to the entire satisfaction of the Board. The other officers of the hospital remain the same as last reported.

It may, perhaps, be unnecessary to state that, of the Board of Trustees, consisting of five members, the term of office of three of them will expire on the 4th of July, 1876, viz: E. G. Morgan, C. C. Parker and J. G. House, which will require an election by the Legislature, to fill these vacancies.]

It remains now to state the wants of the hospital.

First. In order to preserve the building from accidental fires, from the explosion of kerosene lamps, which, from necessity, are now in use in all parts of the hospital, we need a manufactory for *gas*, which will require an appropriation of five thousand dollars. For further information we refer you to the superintendent's report on the subject, all of which we fully endorse.

Secondly. For continuing the construction of the Hospital, we believe that it would be good policy for the state to appropriate a specific, annual sum of one hundred thousand dollars to be continued until the completion of the south wing, which is to consist of three sections, corresponding with the north wing, one of which should be made ready for occupation, at the end of each year, until all shall be finished.

It will probably require for its completion, an aggregate of three hundred thousand dollars, when the state of Iowa will have a Hospital, capable of accommodating five hundred patients, which nothing but an earthquake, or fire can destroy, and which will remain to coming ages, a monument of the benevolence, enterprise and civilization of the present generation.

For further particulars we respectfully refer you to the reports of the Building Commissioners, the Medical Superintendent and Steward, accompanying this report. All of which is submitted.

---------------------------	---------------

SUPERINTENDENT'S REPORT.

To the Board of Trustees of the Iowa Hospital for the Insane at Independence:

GENTLEMEN: In compliance with the law, and the by-laws of the Institution I herewith submit my Report of the Hospital for the last biennial period.

Three hundred and twenty-eight patients have been admitted, and one hundred and ninety have been discharged.

Of those admitted two hundred and forty-six were received from the counties direct, and eighty-two were transferred from Mt. Pleasant.

The territory now belonging to this district, and sending patients to this Hospital, includes forty-eight counties, all that part of the state lying north of the south line of Woodbury county on the Missouri, and the south line of Jackson county on the Mississippi. As was stated in the last biennial report, those transferred from Mt. Pleasant were nearly all chronic cases, and the same may be said of the majority of those admitted from the counties direct. A great advance will be made when communities learn that for insanity to be properly treated in hospitals, the patient must be sent early, before the malady has become fixed. Too many are kept at home until many months of valuable time is lost, and then friends wonder why they do not recover when brought to the Hospital. If they were as willing to remove them, when it became evident they could not recover, and were harmless, our hospitals would never become crowded as they now are. Many patients now here, could comfortably live at home, if their friends would exercise the same forbearance toward them that we are obliged to do.

Of those discharged fifty-five were fully recovered, sixty-two were improved, thirty-one were unimproved, and forty-two were removed by death. One of the number of unimproved was a prisoner tried for murder, acquitted on the plea of insanity, sent to Hospital by order of

court, and discharged by order of the same court at the expiration of five months. It is needless to say that his mental condition was not changed by his residence in Hospital.

In the table of supposed or assigned causes of insanity, the statement of the examining physician, usually obtained by questions asked of friends of the patient, is taken as the standard in the main. This statement is in many cases erroneous, the most prominent delusion or habit being taken for the cause. A man often, sober and temperate before the earlier manifestations of mental trouble, may, before the disease is fully evident to all, freely indulge in drink, and straightway the habit is believed to be the cause of his insanity. A person may, during the incipency of his disease, attend religious meetings, and with the egotism and recklessness of the insane, take an active part in the proceedings. Soon the new excitement helps to overthrow his reason entirely, and religion is given the credit of causing insanity. Still we have undoubted cases of religious causation. In the words of Shepherd: "Of a truth I know not why that which contains the largest controversial element of things known to men, and which has produced more bitterness, and cruelty, and bloodshed than anything else in the world, should not derange the world. The fact that it can do and has done these things, and yet pointing with the eye of faith to the untried and unseen, give to millions unmeasured consolation, is alone evidence of its extraordinary power both for good and evil."

It is possible that hereditary influence is the most potent of any primary cause. The influence that would be harmless for evil in the case of ordinary persons, often proves sufficient to cause insanity in those who inherit a bad organization. Friends of patients, on admission to the hospital, are often averse to admit that there has been insanity in the family. Still, in at least one-half of our admissions there can by careful inquiry be discovered an hereditary tendency. At least an admission that some remote relative had been peculiar and eccentric. To constitute an hereditary taint it need not be that the ancestors have been insane. Epilepsy, drunkenness, and paralysis in the parent may be followed by actual insanity in the child, or grand child, and, on the other hand, the children of those whose nervous degeneracy is manifested in insanity, may be epileptic, idiotic or imbecile. It is an alarming fact that the children of drunken parents receive a heritage as damaging to their future mental integrity as the children of the actually insane. To illustrate, in this connection, the rapidity with which insanity, pauperism, and drunkenness are propagated, as well as to show the

intimate relation between them, I append an extract from a report on the subject by Dr. Hanis, of New York. "His attention was called, some time since, to a county on the upper Hudson which showed a remarkable proportion of crime and poverty to the whole population, 480 of its 40,000 inhabitants being in the alms-house; and upon looking into the records a little he found certain names constantly appearing. Becoming interested in the subject he concluded to search the genealogies of these families, and after a thorough investigation he discovered that from a young girl "Margaret," who was left adrift in a village of the county seventy years ago, and in the absence of an alms-house was left to grow up as best she could, have descended two hundred criminals. As an illustration of this remarkable record in one single generation of her unhappy line, there were twenty-seven children. Of these, three died in infancy, and seventeen arrived at maturity. Of these seventeen, nine served in the state prisons, for high crimes, an aggregate term of fifty years, while the others were frequent inmates of penitentiaries, jails, and alms-houses. The whole number of this girl's descendants through six generations is nine hundred; and beside the two hundred who are on record as criminals, a large number have been idiotic, imbeciles, lunatics, prostitutes and paupers." A stronger argument for careful treatment of paupers children, than these figures present, could scarcely be given.

We have received during the last two years several women whose insanity was evidently produced by too frequent child-bearing. One, thirty-six years of age, was the mother of eight children; another, forty-two years old, has fourteen children, and worse, a husband who is periodically insane; another, forty-seven, has had eleven children; another, fifty, is the mother of sixteen children. Generally poverty and hard work are associated with the above condition, and the future of a goodly number of those offspring, some of whom are born after the insanity is developed, in the mother, will be a matter of interest to the state.

At the writing of the last biennial report the number of patients in the hospital was one hundred and thirteen. The present number is two hundred and fifty-one. During the two years eighty-two have been transferred from Mt. Pleasant, leaving a natural increase of fifty-six in the period. It is not probable that the increase in the future will be less, and as the population of the district increases, the number requiring hospital treatment will correspondingly increase. The number in hospital now is no more than can properly and profitably be cared

for with our present accommodation. With the completion of two new wards in the main building, room will be provided for thirty more, or for a little more than one year's increase, and thus is seen the absolute necessity for further accommodations, by the erection of the other wing of the building. With our present arrangements it is not possible to make a proper classification of patients. No hospital can be complete, or the necessary arrangements and details put in execution, with both sexes in one wing, and when all the wards are crowded to their utmost capacity, as has been the case so much of the time since opening this hospital, it is no wonder that our constant cry has been for more room. I trust that in your report to the Legislature this need will be so apparent that there will be ample appropriation made for the completion of the whole hospital at an early day, and the urgent demand for more room for our indigent insane, for a time set at rest. The amount required, and the manner of expenditure will be better set forth in your report.

WATER.—Since the completion and use of the large tank in the main building, our supply of water has been abundant. In a season like the present no apprehension need be felt. I would suggest that to guard against any contingency, the well south of the hospital be enlarged, and also that a large reservoir be constructed in rear of the contemplated new wing. With such increased supply and capacity for saving, we might feel that the water question was settled for the future of the hospital.

GAS.—The building is piped for gas, and when it is considered that our present mode of illumination is the most dangerous known, it would seem evident to all, that a proper apparatus for the manufacture of gas was one of our prime necessities. We have of necessity not less than one hundred kerosene lamps in use a part of each night. An accidental explosion, a careless handling, or an unguarded blow from a patient, might be followed by the most disastrous consequences. I trust we shall be enabled early in the coming spring to supply the great need. A few thousand dollars expended now might save the State a half a million, to say nothing about the risk to human life that our present mode of illumination involves.

WORK.—A large amount of farm and garden work, draining, grading, etc., has been done by the male patients. A record has been kept of those working out of doors, and it shows that something over fifteen hundred days work, of eight hours each, have been done within the last six months. A number of the female patients have worked in the kitchen,

and ironing room, and a few have daily assisted in the sewing room, in making and mending. In each ward some patients are employed a part of the day in assisting about the usual ward work. Much good results from manual labor in the treatment of these people, but the majority of the insane are averse to work.

CHAPEL SERVICES.—During the last two years we have, with two exceptions, had chapel services every sabbath afternoon. These services have been uniformly well attended by the patients. I venture the remark that no more orderly or decorous congregation assembles for Sunday worship than our own. These services have been conducted by Rev. Thomas B. Kemp, Rev. W. B. Phelps, Rev. J. G. Schaible, and Rev. F. A. Marsh, who have placed us under great obligations for their faithful attendance, often in the most inclement weather. Rev. H. S. Church officiated twice during the year. Rev. James L. Hill, of Lyons, Mass., preached one Sabbath in August.

AMUSEMENTS.—During the fall and winter season we have had dances twice a month, and during the last winter had frequent magic lantern exhibitions. Our household is greatly indebted to Dr. Hill and Mr. H. S. Josselyn for their successful endeavors to make the latter a source of entertainment and interest.

Since our exercise grounds have been inclosed, a large number of our patients have been out of doors daily. As many as one hundred have been out at one time. A few are allowed to go at pleasure, to visit town, attend church, etc.

A pleasant episode during the period was a visit, in July, 1874, from Miss D. L. Dix, whose name is familiar as household words in every Hospital for the insane in this country. We are indebted to her generosity for a parlor Kaleidoscope, and also for a hundred pictures for our walls. But it needed not these outward tokens to keep her name in remembrance in our household.

NEWSPAPERS.—The following named newspapers have been sent us regularly during a part or whole of the biennial period. I trust we shall receive a much larger number in future. We have for the last year added to our number by weekly purchase of exchanges from the "Bulletin" office, "Buchanan County Bulletin," "Des Moines Register," "Clinton Age," "West Union Gazette," "Fayette News," "National Democrat" (German), "Fort Dodge Times," "Fort Dodge Messenger," "Decorah Republican," "The People's Paper," "Lucas County Republican," "Chariton Patriot," "The Iowa Commercial."

We have received many generous contributions of magazines and

newspapers. We wish it to be generally known that the inmates of the Hospital are very grateful for all gifts of the kind. I would like to thank the donors by name, were it not for the fact that so many gifts of the kind have been sent without the name of the giver. I trust we shall not be forgotten in the future.

We take pleasure in thanking the "Tennesseans" and the "North Carolinians" for entertaining concerts in our chapel; the "Peak Family," and the "Japanese," for their inimitable entertainments. Major Powell talked to our chapel full, about the canons of the Colorado, to the great satisfaction of all. The "Kendall Comedy Kompany" entertained our household for an hour with a farce and fine music. The "Continental Glee Club," and the "Armonia Troupe," each gave an excellent concert to an appreciative audience. Debarred as our household is from public entertainments, we are all very grateful for such manifestations of generosity and good feeling.

Dr. G. H. Hill was appointed to the position of assistant physician, made vacant by the resignation of Dr. Willis Batterfield, in December, 1874, and has, with the thorough and conscientious discharge of the duties of that office, shared with me the cares and responsibilities of our evergrowing establishment.

Mr. George Josselyn and Mrs. Anna B. Josselyn have continued in the discharge of the important and responsible duties of steward and matron with their former acceptability.

I would again return thanks to all the employes for their uniform willingness to perform with alacrity all duties imposed upon them, especially the attendants, on whose conscientious work so much depends.

To Dr. House, the resident trustee, I am greatly indebted for his ever ready advice and assistance.

In conclusion, I thank the members of the board for a continuance of confidence, and for an ever ready consideration of our many wants.

A. REYNOLDS, *Superintendent.*

Independence, Iowa, November 1st, 1875.

APPENDIX NO. 1.

The Association of Medical Superintendents of American Institutions for the Insane, at their last annual meeting, held in Auburn, New York, in June, 1875, adopted unanimously the following preamble and resolutions, by Dr. Ray, and recommended that it be published in the annual Reports of Hospitals:

"The Association of Medical Superintendents of American Institutions for the Insane, having been formed for the purpose of promoting the welfare of the insane, regard it as one of their duties to enquire into, and pass judgment upon, any scheme, project, or change offered professedly with this end in view. They would be faithless to the trust they have assumed were they to remain in silence while changes in the management of our hospitals are forced upon us, calculated to impair their usefulness, and inflict a positive harm upon their inmates. The duty to speak at the present time is all the greater in view of the fact that the objects sought for, by these new measures, are sufficiently secured in the existing arrangements, and the pretended demand for them proceeds from no actual, tangible grievance, but wholly from that prevalent spirit of discontent, which is ever ready to discover a fancied wrong, and clamor for a change in whatever has stood the test of time. Were this dissatisfaction confined to the ordinary methods of discussing evils, real or fancied, it would furnish no ground of complaint, and we would cheerfully meet it in the same way. But without reference to or without inquiry of any kind, in fact. It has been thrust upon us in the shape of legislation unexceptionably mischievous in its effects on the true purposes of hospitals for the insane, and thus it is, that institutions which should be managed on well matured, intelligent principles, their course guided by one animating spirit, taking in all the circumstances of the situation, are disturbed by an intrusive element, having with them no kind of affiliation, and calculated in the nature of things to destroy that harmony of action which is indispensable to the highest measure of success. Believing that whatever of progress has been accomplished by our hospitals may be fairly attributed, in a great measure, to the free and independent action allowed to their officers, whereby they have been enabled without apprehension of popular fear or favor, to manage their charge in the way commended to them, either by the general voice of the profession, or their own deliberate convictions. We should for that reason alone deplore any legislation

calculated to substitute for such liberty the suggestions of an outside party, entirely ignorant, it may be, of the workings of a hospital, as well as of the movement of the insane mind. If the time shall ever come when the Legislature, in its zeal for the public good, shall establish a board of officers to supervise the medical practice of the state, with power to enter every sick man's chamber, to enquire respecting the medicine and diet prescribed, and any other matter connected with his welfare and report the results of their examination to the constituted authorities, then it may be proper to consider the propriety of extending the same kind of paternal visitation to the hospitals for the insane. Without arrogating to ourselves any extraordinary wisdom, we believe that the accomplished work of this association, as well as the character and reputation of its present members, fairly entitles it to a respectful hearing in any matters of legislation affecting the interests of the insane, in the establishments devoted to their custody and treatment. We, therefore, offer the following resolutions, in the hope that they will receive from the public all the attention which the importance of the subject, and the authority of the source from which they come, entitle them.

Resolved, That the government of our hospitals, as at present constituted, whereby a physician supposed to be eminently qualified by his professional training and his traits of character, both moral and intellectual, is invested with the immediate control of the whole establishment, while a Board of Directors, Trustees, or Managers, as they are differently called, in different places, men of acknowledged integrity and intelligence has the general supervision of its affairs, has been found by ample experience to furnish the best security against abuses, and the strongest incentive to constant effort, and improvement.

Resolved, That any supernumerary functionaries endowed with the privilege of scrutinizing the management of the hospital, even sitting in judgment on the conduct of attendants, and the complaints of patients, and controlling the management directly by the exercise of superior power, or indirectly by stringent advice, can scarcely accomplish an amount of good sufficient to compensate for the harm that is sure to follow.

Resolved, That the duty of restoring the insane, and procuring the highest possible degree of comfort for those beyond the reach of cure, implies a knowledge of their malady, and of their ways and manners, that can be obtained only by study and observation.

Resolved, That the work of conducting any particular individual through the wages of disease into the light of unclouded reason, embracing as it does, the drugs he is to take, the privileges he is to enjoy, the letters he is to write or to receive, and the company he may see, implies not only certain professional attainments, but also a close and continuous observation of his conduct and conversation, neither of which qualifications can be expected from the class of functionaries above mentioned, though appointed for the express purpose of making suggestions and proffering advice.

Resolved, That one of the first things in the treatment of a patient is to secure his confidence, to make him feel that he is in the hands of friends who will protect and care for him. And yet this purpose is completely frustrated when it is incessantly proclaimed to him,

from the walls of his apartment, that the people to whom he has been entrusted are not trusted by others, and that any aid or comfort he may require must be sought from a power paramount to them.

Resolved, That valuable information may be obtained from the letters of patients respecting their mental movements, as many will communicate their thoughts in this manner more unreservedly than in their conversation, which advantage is lost when their letters are forwarded unopened.

Resolved, That inasmuch as the letters of the insane, especially women, often contain matter the very thought of which, after recovery, will overwhelm them with mortification and dismay, any law which compels the sending of such letters, is clearly an outrage on common decency and common humanity.

Resolved, That the fact so much asserted at the present day, and offered as the main reason for the legislation in question, viz: that sane persons are often falsely imprisoned on the pretense of insanity, is not true, and that we believe that, if ever, it is extremely rare, that a single case of wrongful imprisonment in any hospital in this country has taken place.

Resolved, That should such cases occur it would require more knowledge and experience to detect and expose their real character, than any but the officers of the hospital would be likely to possess.

Resolved, That the project of law for regulating the relations of the insane, adopted by the unanimous vote of the association in 1868 prescribes such safeguards against abuses of every kind, as are best fitted to secure that object, with the least possible amount of inconvenience to parties not immediately concerned.

Resolved, That the practice now rather common, even among those who write or lecture on the subject for the instruction of the public, of designating as "Private Asylums," the corporate hospitals of the country, such as the McLean Asylum at Somerville, the Butler Hospital at Providence, the Retreat for the Insane at Hartford, the Bloomingdale Asylum at New York, the Friends' Asylum at Frankford, and the Pennsylvania Hospital for the Insane at Philadelphia, is calculated to mislead the public mind respecting the true character of such establishments, founded as they are in the gifts and bequests of benevolent persons, conducted by officers paid by a fixed salary, and directors and managers with no compensation at all, and watched by a system of visitation unequalled in frequency and thoroughness by that of any public hospital, they are in no sense of the term Private Asylums.

From the minutes.

JOHN CURWEN,
Secretary.

APPENDIX NO. 2.

No person should be brought to the hospital without having been clearly informed of his destination. If he is too insane to appreciate it, no harm will be done, while, if some reason still remains, he will understand that at least his friends intend to deal honestly with him. Nor should he be told that his stay will be but a few hours or days, or that he can go home when he pleases. Such promises give a patient a distrust of the hospital and those under whom he is placed.

Patients should be provided, before coming to the hospital, with a change of good clothing, and at least one extra change of underwear. While the institution will exercise all possible care that the clothing of patients is repaired and duly kept, it cannot guarantee against those occasional losses which are particularly liable to occur in a hospital for the insane. No money, jewelry, or valuable articles of clothing should be brought to the hospital with patients. Parties in charge of patients arriving by night trains should remain in the city till morning. It is extremely injurious to patients, already retired and asleep, to be disturbed by the arrival of another, perhaps noisy and turbulent, and in our present crowded condition, every bed occupied, it is a great inconvenience.

Before starting for the hospital with a patient it should be known that all the formalities of the law have been complied with.

It is very desirable that the Commissioners of Insanity should notify the officers of the hospital of the probable time of the arrival of patients, with some main facts in regard to the case.

Some person should accompany the patient who is familiar with the history of the case ; some member of the family if practicable.

GEORGE W. BEMIS, Treasurer.

STEWARD'S REPORT.

To the Board of Trustees of the Iowa Hospital for the Insane at Independence :

GENTLEMEN : I herewith submit to you a classified statement of the current expenditures of this institution, and of the expenditures of the special appropriation made according to section 2, chapter 55, Laws of the Fifteenth General Assembly, for improvements and furnishing, from Nov. 1, 1873, to Nov. 1, 1875, with a list of vouchers on file ; also a statement of moneys received, an estimate of the amount of the farm and garden products for the past two years, a list of stock and farm implements and an exhibit of general supplies, fuel, butcher's stock, etc., on hand.

Respectfully yours,

GEO. JOSSELYN, *Steward.*

Independence, Nov. 1, 1875.
