IOWA HOSPITAL FOR THE INSANE. }
AT MOUNT PLEASANT, IOWA, July 1, 1883. }

To *His Excellency*, BUREN R. SHERMAN, *Governor of the State of Iowa*:

SIR—I have the honor herewith to transmit to you, on behalf of the Board of Trustees of the Iowa Hospital for the Insane at Mount Pleasant, their twelfth biennial report, together with the report of the Superintendent, and statistical and other exhibits, showing the operations of the period, and the present condition of the Institution.

I have the honor to be very respectfully,

Your obedient servant,

J. H. KULP, *Secretary*.

TRUSTEES' REPORT.

IOWA HOSPITAL FOR THE INSANE, }
AT MOUNT PLEASANT, IOWA, July 1, 1888. }

To His Excellency, BUREN R. SHERMAN, Governor of the State of Iowa:

The Trustees respectfully submit their twelfth biennial report, accompanied by the report of the Superintendent and the exhibits of the Steward and Treasurer.

All the regular meetings of the Board required by law have been held during this period, and monthly visits by one or two Trustees each intervening month, between the regular quarterly meetings of the Board.

The improvements and repairs have been made under the supervision of the Superintendent, with the advice and counsel of the Board of Trustees. The work is well and substantially done, and has the approval of the Trustees.

Some changes in the present law would simplify its working, and be in the line of true economy; among which we suggest that the Hospital be relieved from the burden of paying the State Visiting Committee. If paid as the matter now stands, it must be out of the current expense funds. This is not a legitimate charge to that fund, and fails to represent truthfulness.

Again, section 1,419 of the Code provides for the removal of patients who have no legal settlement in the State, if the Trustees see fit and proper. This class of patients is constantly increasing, like tramps drifting in from distant States and Canada. There being no provision made for the payment of the expense of removal, this has become a serious burden upon the State. One of these might cost from one to four thousand dollars to keep through life. Less than one year's expense would remove the most distant.

The removal of patients from the Hospital by the board of county

commissioners of insanity, before recovery, seems fraught with danger, destroying the chance of final recovery, by sending them back to their former condition when first placed in the Hospital, when a month or two longer stay bid fair to restore them to family and friends in comfortable health. Should there be two authorities on this point, the county commissioners and Hospital Superintendent? If not, which is best qualified to come to a correct judgment in the case? We suggest that the law be so modified that when a difference of opinion occurs between the commissioners of insanity of any county and the Superintendent of the Hospital, in regard to the propriety of discharging any patient, the matter be referred to the Board of Trustees for final settlement.

The quarterly meetings of the Board of Trustees, if changed from the first Wednesday of the month to the second, would lessen the labor of making returns and give a few days in which to close up accounts.

We refer your Excellency to the accompanying report of the Medical Superintendent, as containing what we deem necessary in the way of appropriations for repairs and permanent improvements during this biennial period, premising in the language of the Association of Medical Superintendents of American Institutions for the Insane, assembled at Toronto, Canada, in 1871, "that no expense that is required to provide just as many of these hospitals as may be necessary to give the most enlightened care to all their insane, can properly be regarded as either unwise, inexpedient, or beyond the means of any one of the United States or British Provinces."

We recommend building an addition to each wing of the Hospital, which will provide room for three hundred more patients at a per capita cost of less than one half the cost paid in either of the Hospitals for insane of the State, or that can be provided by the building of any new hospital, because we have the motive power ready to attach, and all needed hospital physicians, and would incur no additional expense except for food, clothing, and necessary attendants. These wings would be made of brick, painted stone color to correspond with the present building, and would add three wards to each wing, making twelve in each wing. This number is regarded as most desirable for the best and most perfect classification of patients, and hence increases their chances of recovery. Our estimates are made, and will not exceed the cost per capita of five hundred dollars. The

sum asked is one hundred and fifty thousand dollars. Should this be appropriated, it will secure the completion of these wings for patients within the incoming biennial period.

The lamented Dr. Ranney died the last of January, 1882; was buried in the cemetery in sight of his place of toil and labor for years, and rests unconscious of all criticism as the prairie breezes that blow over his tomb.

Dr. H. M. Bassett kindly assumed the duties of Superintendent until the Trustees could secure a successor. This was done in July, and on the 16th of October following, Dr. H. A. Gilman, long and favorably known as First Assistant Superintendent of the Hospital for Insane at Jacksonville, Illinois, commenced his service as Superintendent.

Mrs. Ranney remained after the death of her husband about ten months in her position of Matron, exerting all her power and energy to perfect the work carried on for years by her beloved husband. As successor of Mrs. Ranney, Mrs. F. V. Cole was duly appointed Matron, and is regarded as rendering valuable service.

Mr. E. N. Nelson succeeds Mr. J. W. Henderson as Steward; assumes all the duties of the position, employing no clerk for the past nine months, thus saving the State this expense, and by his energy and straightforward business course is winning the confidence and respect of the business community.

In closing this report the Board desires to bear testimony to the able, vigilant and untiring manner in which the resident officers are discharging their respective duties, and the general morale and good condition of the Hospital.

SUPERINTENDENT'S REPORT.

*To the Trustees of the Iowa Hospital for the Insane, Mt. Pleasant,
Iowa:*

GENTLEMEN—By an act of the last Legislature the biennial period closes June 30, instead of September 30, as heretofore, consequently this report covers the operations of the Hospital for but twenty-one months.

Only about eight months of this period has come under my personal observation, and to Dr. H. M. Bassett, Acting Superintendent *ad interim* from the date of Dr. Ranney's death to October 16, 1882, and who remains associated with me as Senior Assistant Physician, I am indebted, largely, for the record of the work accomplished since the date of the last biennial report.

The twenty-one months included in this review shows a larger number of patients admitted and cared for in the Hospital than any previous period of the same duration, and during the whole time the Institution has been overcrowded.

The general results for this period, including statistical tables, financial statements, etc., are appended for your perusal.

The number admitted in twenty-one months has been five hundred and thirty-four: three hundred and nineteen men and two hundred and fifteen women.

The total number treated during the period has been ten hundred and seventy-eight: six hundred and sixteen men and four hundred and sixty-two women. The whole number discharged during the period has been six hundred and six: three hundred and eighty men and two hundred and twenty-six women; of these seventy-three men and forty-seven women were discharged recovered, one hundred and nine men and seventy women improved, one hundred and forty-one men sixty-seven women stationary or unimproved, fifty-seven men and forty-one women died, and one man was found not insane, being a

plain case of drunkenness, leaving in the Hospital June 30, 1883, two hundred and thirty-six men and two hundred and thirty-six women.

The death rate has been large, which is due chiefly to the overcrowded condition of the Hospital, and the imperfect system of ventilation, which is now being remedied.

The daily average for the period has been five hundred and eighteen: two hundred and seventy-seven men and two hundred and forty-one women.

HEATING AND VENTILATING FUND.

The last Legislature appropriated \$5,000 for changing the system of heating and ventilating the first two sections of the east wing of the Hospital, which appropriation remained undrawn until the present Superintendent assumed charge. The work in the two sections for which the appropriation was made has been satisfactorily accomplished and enough saved to perfect the same system in the third section of the same wing, which had once been attempted but with very unsatisfactory results. This work has now progressed far toward completion, and, when done, will make the Hospital a much more desirable place of residence, so far as pure air is concerned. The heating flues in all these wards, nine in number, have been cut in the corridor walls to a point about seven feet from the floor and a register face placed in each opening, which completely removes the nuisance which formerly obtained when the openings were near the floor, resulting from using them as spittoons or a repository for dirt and filth. The ventilating flues have been made, by cutting through the partition walls between the sleeping rooms, which being only nine inches thick, it became necessary to build out pilasters into each room of brick, leaving the opening about twelve inches from the floor, all the impure air being thus carried into the attics, and thence outside through the campaniles in the roof. This work, alone, for the entire east side of the Institution, has been quite a serious one, considering the fact that all the wards have been very much crowded all the time, but the discomfort resulting is amply repaid by the advantage gained by the improvement.

REPAIR AND CONTINGENT.

The appropriation made for the purpose of repairs was \$5,000, of which about \$1,100 had been expended, for laying new floors and various other necessary items, previous to my arrival.

The center building had no system of heating throughout, or ingress for pure air. The medical offices had no way of heating, except by fire places, and were very uncomfortable in cold weather; the reception room and Steward's office had a steam coil in each as did the rooms on the second story; the third story was heated only by stoves and one fire place, and the fourth story had no heat at all. Flues were cut in the corridor walls from the basement to the fourth story, and openings made into the corridors, offices and all other rooms in the center, and Gold's Patent Radiator, Utica pattern, placed in the basement and connected with the steam pipe, thus heating all the apartments, the air supply being taken from the common air chamber, and reinforced by hinged windows opening into the basement. The medical offices, reception room, and two corridors in the center have been painted, a very necessary work, as they had become very dingy, and the cutting of the flues added to the disfiguration. The water-closets in the center were emitting sewer gas, and the soil and ventilating pipes to these were overhauled and we now have complete ventilation.

In the closet on the office floor the wooden floor and fixtures had commenced to decay, and a brick arch was turned, and a tile floor laid in cement in its place, and all the closets have been lighted by gas. Some minor repairs have been made in the dispensary. Store-rooms for groceries and the general supplies of the Hospital have been finished in the basement, and a system of distributing supplies inaugurated which we anticipate will result in a very material saving in expense.

Following the masons in their work of remodeling the system of heating and ventilating the wards, the carpenters and painters have two wards pretty thoroughly renewed and repainted. The water-closets have been renewed and new fixtures put in. There were no bath-tubs in the wards, and the rooms that were used for wash-rooms and closets have been divided, and well heated, and comfortable bath rooms constructed.

New tile floors, laid in cement on brick arches, have been put in each wash-room. There was no water in the dining-rooms for washing dishes, and a corner sink has been placed in each, and hot water introduced for that purpose. A flue was also constructed in connection with the ventilating flue, with a steam coil in the basement for drying towels. Dust flues opening into the stairways have been con-

structed with doors on each landing for each ward, taking the place of unsightly and foul boxes that were previously used to hold the sweepings of each day from the wards. In the first section the old wash basins were re-set and answer a very good purpose; in the second and third sections new basins have been put in, being Mott's enameled work. There was no accommodation for patients' clothing, except small, dark closets, and large, well lighted clothing rooms have been constructed, so that each patient can have ample room by box and hook for his clothing, and much disorder and confusion remedied in this respect. Closets have also been placed adjoining the attendants' rooms for their clothing. Carpets have been placed on the floors of wards five east, and one and five west, and the wards thus made more homelike and cheerful. Numbers one and five east, have been seated with comfortable chairs.

WATER-CLOSET FUND.

A portion of this fund has been expended in purchasing hoppers, sinks, slop-safes, soil pipes, and in putting in the same, and the work is still progressing along with the other repairs.

TELEPHONE FUND.

A telephonic connection has been made with the city of Mount Pleasant, and much of our business is transacted by this agency; in addition to this we have an annunciator in the medical office, and the apparatus is so arranged that the same transmitter is used for the town line and the Hospital stations, a switch being used to accomplish the change from the town line to the house. We have the six extreme wards, boiler-house, carpenter shop, and stable connected, and use at each of these stations the pony, crown, or hand telephone, and there is also a call-bell in the rear kitchen. The entire appropriation of \$300 was expended for these appliances.

WIRE MATTRESSES AND BEDSTEADS.

One hundred wire mattresses have been procured, and are a great comfort to the patients, and the most economical bed that can be used. Fifty bedsteads have been purchased to replace those old and worn out.

AIRING-COURT FUND.

This had all been expended, save \$162, before my arrival here, for the legitimate purpose for which it was intended, and it will require the balance to complete the work.

FIRE-PROOF WALLS.

The appropriation for this purpose was \$3,000, and remains undrawn, but we desire immediately to commence this work and carry it forward to completion before the period expires in which it was expected to accomplish it.

IMPROVEMENTS AND REPAIRS NEEDED.

Your attention has been called from time to time to the remainder of the defective sub-basement walls of the Hospital, and you are aware of the dangerous condition they are in from crumbling. This is growing worse constantly; they have been pronounced unsafe by competent builders, and some calamity may result unless they are renewed the coming year. The estimated cost, based upon the expense of that already replaced, together with new stone steps, is \$8,500. The present heating surfaces for the whole house have been in use ever since its construction, over twenty years. They were very much injured by using water from an artesian well some years ago, the action of the chemicals in the water having partially destroyed the pipes so that they are constantly bursting and leaking. It has become a very serious matter to attempt to patch up and renew them during the winter, when needed for the comfort of the Institution. We can economically use \$2,500 per annum for renewing that portion of the heating apparatus contained in the basement. The system of heating and ventilating the three sections of the west wing is as defective as that was in the east wing previous to the improvements just approaching completion. Five thousand dollars was appropriated for two sections of the east wing. I think by economical management that amount will accomplish the result for the three sections on the west side untouched, and where pure air is so much needed. This will make the entire Hospital a completely ventilated institution, and go a long way toward aiding in the recovery of our patients, and toward preventing any epidemic or malarial disease. Some years ago an appropriation was asked for rebuilding and enlarging the old filter used for filtering our water before its introduc-

tion into the house, and repairing one of the reservoirs. The amount of appropriation made proved only sufficient, I learn, to repair the reservoir, and the filter became entirely useless and worthless. We need the sum of \$5,000 to build a filter of sufficient capacity to supply clear, pure water for our household. This is one of the necessities in common with a pure air supply, and must be had in order to secure the best results and ward off disease. Impure air and impure water are two of the most formidable enemies of the human race. As the water of this whole State is largely surface drainage, swelling our creeks and streams at certain seasons of the year, so that the water is very muddy and unfit for use, and at no time is it in a condition to be used for drinking water and culinary purposes, without being filtered.

We find the woven-wire mattress the most comfortable and economical bed we can use in the Hospital, and as it is among the most important items in caring for the insane, who are so generally troubled with insomnia, to provide comfortable beds, we desire enough more to furnish the institution, and bedsteads to supply the place of those broken and worn out. For this purpose we shall need \$1,000 per annum during the next two years. Our washing-machines have been in use nine or ten years, and are worn out and likely to fall in pieces at any time, leaving us in very serious trouble, with our six hundred people to provide clean clothing for. The machines have always been overloaded, or they might have lasted even longer than they have. I desire to procure three machines to replace the old ones, and one additional to supplement their work. It has been demonstrated that the brass machine is much more durable, economical and satisfactory, and we desire that kind, for which \$2,500 will be needed. The cyclone last year destroyed our shelter for cattle and hogs, and we need good, substantial sheds for the cattle, and a piggery for sheltering our hogs, and, in connection with these buildings, a proper place for storing and keeping dry our lumber that we use from time to time in making repairs. We can purchase lumber more economically by getting it by the car-load, but as no place has hitherto been provided, it has been piled out of doors at a great loss. For building sheds for our cattle, a piggery for our hogs, and a place for storing lumber we require the sum of \$3,000. The work of renovating the west wing of the Hospital as has been done in the east wing, together with much needed changes in the kitchen, new tea and coffee urns, food-cars,

renewing of plastering, repainting, and a multitude of minor repairs constantly demanding immediate attention throughout the length and breadth of this building will require \$5,000 per annum. This is absolutely demanded to preserve the property from deterioration and decay. Every prosperous and thrifty individual is sure to practice economy by not permitting his buildings to become shabby or out of repair, but in season cares for them, and thus saves a much larger outlay in the future. This is doubly true in a hospital for the insane where the destructive propensity is so fully developed, and constant repair is the order of the day.

I believe it is the true policy of the State to take economical care of its property. The terrible accounts that we have read from time to time of the burning of hospitals calls our attention to the fact that we have no system fire alarm in this Institution. There should be an annunciator in or near the office, connected by wire with different portions of the building, and especially with the attics, basements, and unfrequented places; also with the kitchens, bakery, and wherever there is a fire. In all these localities a system of thermostats should be put in, so that, in case of a fire, instantaneous alarm would be given, and the place of the fire designated in season to save, not only the building, but perhaps scores and hundreds of lives. For connecting the wards with signals, putting in a system of thermostats, and connecting alarm with large bell in the tower, by actual estimate of Western Electric Co., \$2,000 will be required.

INCREASED ACCOMMODATION FOR THE INSANE.

This question has forced itself upon your attention from year to year, and has been ably presented to former Legislatures, and now the demand is greater than ever before. The compendium of the tenth census of the United States shows that there were 2,544 insane in the State of Iowa in 1880. It is fair to estimate that this number has increased to 3,000 during the past three years. These figures are somewhat startling when we consider the fact that only 1,000 are provided with hospital care, the residue being scattered over the State in jails, almshouses, and in private families. The terribly crowded condition of our State institutions is to be deplored, and is prejudicial to the best results of treatment.

Upon assuming the responsibility as Superintendent of this Hospital I found, as you know, one hundred and eighteen men and twenty-

five women sleeping on the corridor floors on straw beds, a condition of affairs certainly not in accordance with scientific care, or in consonance with true philanthropy, or even humanity. Not feeling willing to be responsible for such care, relief was sought by your order of discharge, and in that manner our numbers have been reduced more than one hundred, but still we are accommodating about one hundred more than the Hospital was intended for. What can be done to relieve this state of affairs, inside and outside our two Hospitals?

County care has been tried in this and other States, and the result has been most unsatisfactory to the counties themselves, and as a rule left the unfortunate victims of disease in a pitiable condition. The experience of all alienists and true philanthropists has been that State supervision of all institutions for the care of the insane is the comparatively safe, and only wise, plan. Under the watchful care of a board of trustees, elected from the people by the legislature, and selected because of characteristics of head and heart which eminently qualify them for so humane a mission, any institution can but be safely administered, and the best possible results to humanity secured. In addition to this body, in Iowa we have a board of visitors appointed by the Governor, and selected on account of their peculiar fitness for such a labor of love, and the Hospitals are open to their inspection by law. Biennially a report of the stewardship of these Boards, and of the Superintendents, is presented to the representatives of the people in the Legislature assembled; and finally the Chief Executive of the State has authority, and advises from time to time in regard to the welfare of these wards of the State. Not so with county institutions or any other system. They are not thus guarded or tenderly watched over, but are left to themselves; and if the county physician visits them once a week he is doing probably more than he is paid for. Let it never be said that Iowa thus contracts for the care of her unfortunate by "farming them out" to the lowest bidder.

As the Superintendent of one of these State Hospitals, I am ready to aid in every possible way in solving this vexed question; and as a practicable, tangible proposition, I will agree to construct additional wings to this institution for the accommodation of three hundred more patients, for the sum of \$150,000—or \$500 per capita—which is more than fifty per cent less than the cost of the original building. I am aware of the additional hard work, responsibility, and conse-

quent anxiety with which this plan is fraught, but having devoted my life to this work, after mature deliberation, I am prepared to make all necessary sacrifices to carry it forward, and thus contribute to the relief of this class of suffering humanity. It is a fact, often demonstrated, that the additional number we shall then be enabled to accommodate can be cared for at a much less rate per capita than the number which we now have. The gas mains, water mains, sewers, laundry, kitchen, bakery, stables, barns, shops, etc., are all here, sufficient in capacity for the increased number we propose to accommodate. The central or administrative building, with its corps of officers, save an additional assistant, are also on the ground; all the necessary domestics, kitchen and laundry help, and all other, except the immediate attendants upon the additional patients to be treated. The cost then for building and future care will be less than by any other plan. Immediate accommodation is what is needed, and we propose to have this addition completed and occupied before the session of the General Assembly succeeding the next. We have the appliances, shops, machinery, carpenters and machinists here, and familiar with this kind of work, so that the earliest and best possible results will be secured, and the pressure to that extent relieved. We have, then, the most economical scheme for additional buildings; the most economical plan for keeping the per capita cost of maintenance at the lowest possible figure; and the means for the most prompt execution of the work, so as to further accommodate the unfortunate wards of the State, and thus far relieve the imperative demand for more room. I submit the plans to your Board for this addition, and desire to present them to the Legislature, asking for an appropriation to construct accordingly. But this will not be sufficient provision, and the State should still further make an appropriation for a new institution in some convenient section of the State.

There are some potent reasons for placing new hospitals in this State, as they may be required, in different parts of the Commonwealth. The expense of transportation, to counties and individuals, becomes something of an item, and can be curtailed by convenient access when new institutions are thus located.

The section surrounding the hospital becomes more familiar with the management, and confidence is thus gained by a thorough acquaintance with the manner of conducting affairs which very materially strengthens the administration and increases the usefulness of

the institution. This confidence gained, the patient is promptly removed to the hospital, has the advantage of early treatment, is cured, and becomes a producing citizen instead of a life burden, by this early care, when if the hospital had been at a more remote point, the case would have been delayed and become permanent. Nearness of locality gives opportunity for friends, at much less cost, to visit the patients while in the hospital, while at present it is often a burden. Close proximity to any of these benevolent enterprises of the State engenders and stimulates philanthropic and friendly feelings toward the afflicted whose interests we desire to subserve. One other, and a most important, reason for shortening the distance to our Hospitals is, the exhaustion consequent upon long trips, especially in case of delicate female patients who are often brought, but few days after confinement, with puerperal fever or exhausted from mania; the long journey, often so exhausting as to leave the patient at the Hospital doors in a moribund condition. This Institution, and all kindred ones that may be needed in the future, should be called Hospitals for the Insane, and not designated, as some are inclined to do, by the name of "Incurable Institutions" or "Asylums for Incurable Insane." A majority of the chronic cases have sufficient mind to realize that, if transferred or placed in an institution thus named, they leave behind all hope when crossing its threshold, and thus they are robbed of the last boon left them in their misfortune, anticipation of future health and happiness in this life. Those who have devoted their lives to this specialty concur in the opinion that separation of the recent and chronic cases of insanity, is not only wrong in theory, but impracticable in execution. Every hospital for the insane is largely filled with the incurable, it being safe to say that out of every five hundred patients found in a hospital, not more than fifty are curable, because those who recover are admitted, remain a few months, and go to their homes, while the constantly accumulating residue are incurable, and should be cared for, for life.

The chronic case often exerts a soothing influence over the recent one, aids in making him feel better satisfied, and relieves his mind of many delusions and suspicions in regard to friends and the officers of the institutions, as well as its object.

On the other hand the recovery of the recent case is an inspiration to the chronic insane, stimulating and encouraging him to hope, that he too, in turn, may recover, thus making his life a happy, hopeful

one, instead of a hopeless one, if labelled "Incurable." Other States are moving in this matter of provision for their insane; Ohio has four hospitals, Illinois four, Michigan three, and Indiana has just appropriated money for three new ones. This State must not delay longer or turn a deaf ear to the cry of this class. Being out of debt, with State taxes at a minimum, the work can be accomplished without scarcely feeling the increase necessary to place Iowa alongside the other States of the Northwest.

CRIMINAL INSANE.

The matter of separate provision for this class has been discussed before you, and by my predecessor in the biennial reports. It seems to me that just a single sentence is sufficient to convince any one of the great injustice of forcing innocent persons, unfortunate enough to require treatment for brain disease, to associate with murderers and thieves. What must be the feeling of every right minded person, unfortunate enough to have a wife, sister, father, brother, son or daughter insane, and knowing if taken to the Hospital, such must be their associates. A mild application of the Golden Rule, it occurs to me, cannot fail to cure this malignant excrecence. Morally this class are debased and their influence for evil is constant and demoralizing. They are also our most vicious and dangerous patients. It seems to me that while the State is erecting the penitentiary at Anamosa, a wing should be constructed for this class, and for those arrested for crime and found insane, that they may all be under observation, without the opportunity for escape which there is in a hospital. At the same time they can have proper treatment, if necessary, and, if able to work, cannot shirk it, as when transferred to our Institution. This will also do away with the attempt to feign insanity, hoping thereby to be removed to the Hospital, escape hard work, or elope altogether. It is to be hoped this opportunity will not be allowed to pass by without making the necessary and suitable provisions indicated.

NON-RESIDENT INSANE.

Great injustice has been done the *bona fide* citizens of this State as a result of the law permitting non-residents to be sent to the Hospital in the same manner as those having a legal settlement, while no one is made responsible for their removal after ordered discharged as incurable. The law has militated against the interest of the citizens

and tax-payers in this way. We have been compelled to receive all such cases, and when the Institution became so much crowded that a discharge list must be made out, in order to make room for newcomers, it has been necessary to place upon the list the names of those having a legal settlement in order to secure their removal by counties responsible, while the tramp, vagrant, and others, who have never paid a cent of tax toward the Hospital, are left to enjoy its comforts and care; a class constantly accumulating and increasing in number, until there are now present in the Institution over one hundred who have never aided in any way to secure the comforts they enjoy, while many of those who have been taxed regularly for the building of the Institution are in county houses. I submit that this is a gross injustice, and there ought to be some legislation by which it can be remedied.

AMUSEMENTS.

The importance of properly directed diversions for our patients cannot be too emphatically dwelt upon. The introduction of any entertainment, game, or amusement of any kind, by which the mind, too much given to introspection, is attracted, and the thoughts diverted into other and healthy channels is a point gained in the right direction in the individual case, and aids just that much in relieving the diseased brain, and consequent mental obliquity, from the irritation causing the abnormal condition, and thus starting the patient on the road to recovery. With this end in view, we have purchased one square grand, and one cabinet grand, upright piano, both from the manufactory of Wm. Knabe & Co., Baltimore, Md. These instruments are unsurpassed in brilliancy and sweetness of tone, and have been the source of much gratification to our household, and there has been a large number of our female patients who could perform very creditably upon them. Two billiard tables have been placed in the gentlemen's wards, and afford the means of whiling away many otherwise tedious hours. The weekly dance is continued most of the year, on Friday evening, and is entered into with much zest, and highly enjoyed by all. An orchestra, to furnish music for our dances and other entertainments, has been organized from among the officers, employes, and patients, and very creditable music is thus afforded. A lyceum, or literary association, was organized in the autumn, and each Monday evening during the winter and spring, a programme

has been presented, consisting of declamations, recitations, select readings, essays, the reading of papers edited by patients; one, by the ladies' division, called *The Hospital Bugle*, and the other, by the gentlemen, *The Golden Arrow*; the entertainment usually concluding with a spicy debate on some important question of church or state, the discussion being largely carried on by patients. During the amusement season, on Tuesday evenings, the oxy-hydrogen light has been brought into requisition, and the views of cities, public buildings, landscapes, etc., all over the world have been shown, an instructive and entertaining lecture by one of the physicians accompanying each presentation. We have also had several dramatic entertainments which were highly pleasing and very creditable to the performers, considering the appliances at hand. In this connection I will say that we feel very seriously the need of a convenient amusement hall. Our Christmas entertainment, when each patient received some token from friends at home or here, placed on large evergreen Christmas trees, was highly enjoyed; and the musical programme, both vocal and instrumental, was greatly appreciated. On Washington's Birthday, in the evening, a masquerade ball was given, when seventy-five or more masqued, and a very happy occasion followed. When the weather is pleasant the patients are allowed to be out of doors daily in the airing-courts, and those considered trusty about the grounds, and even about town. During settled weather, when the roads are good, patients go out carriage riding, and, in the winter, sleighing parties are in vogue. A band has been organized recently from among the officers and employes, consisting of ten parts, including drums, and supplied with LeCompte's French nickel-plated instruments. They are making good progress and afford excellent music, on the green in front of the Hospital two evenings in the week, much to the gratification of our patients. The gentlemen assist on the farm and about the buildings outside, with profit to themselves and the Institution, and the ladies aid in like manner in the various domestic departments and in the ordinary hall work. Since last October the pastors of the different churches in the city have alternated monthly, in supplying our chapel desk each Sabbath, and all of them to the edification of the patients, officers, and employes.

FARM.

Below we present a list of products from our farm and garden. We are enabled to furnish fresh vegetables, of the different varieties, in their season, to our entire household, and, by judicious foresight, in putting in the seed; this is continued throughout the spring, summer and autumn. A large number of the patients assist in the work of cultivation, and are thus benefited, both mentally and physically, and their labor contributes toward enabling us to raise, in greater variety and quantity, the products of the farm and garden than we otherwise could. The list following is for the years 1881 and 1882. This season has been an uncommonly wet one, 17.06 inches of rain having fallen since April 1. It has been very difficult to get into the fields of corn, potatoes and garden vegetables, to give the crops proper care, but, notwithstanding this drawback, we have fifty acres of oats, forty acres of corn, twenty-five acres of potatoes, and about fifteen acres of garden vegetables under cultivation, with a prospect of an average crop of each.

PRODUCTS OF FARM AND GARDEN.

	1881.	1882.
Asparagus, dozen.....	450	2,514
Beans, Lima, bushels.....	4	184
Beans, string.....	142	91
Beet greens, bushels.....	60	3
Beets, bushels.....	280	261
Cabbage, heads.....	8,125	6,478
Citron, pounds.....	55
Currants, quarts.....	384
Cauliflower, heads.....	24
Celery, bunches.....	7,650	7,541
Carrots, bushels.....	62
Cucumbers, bushels.....	130	106
Corn, bushels.....	500	925
Corn, sweet, bushels.....	110	55

Peas, bushels.....	175
Radishes, bunches.....	380	767
Raspberries, quarts.....	80
Rhubarb, dozen stalks.....	200	423
Salsify, pounds.....	1,260
Sage, pounds.....	40	16
Spinach, heads.....	8,950
Squash, pounds.....	2,625	11,093
Straw, tons.....	60	35
Turnips, bushels.....	300	408
Tomatoes, bushels.....	370	306

ACKNOWLEDGMENTS.

I desire to express my thanks, and that of our patients, to the proprietors of the following papers, who have so kindly sent us their issues gratuitously from day to day and week to week, throughout the period just closed. The messages thus delivered have found lodgment in the hearts of many who thus had the only means of gaining intelligence from their homes, and the perusal of home papers has afforded a bright spot in their lives here. We trust this may be found a growing list, until all the newspapers published in this Hospital district will be forwarded to their unfortunate constituents.

The subjoined is the list now sent:

The Standard, Chicago, Illinois.
Daily Gazette, Burlington, Iowa.
The Time-Table, Lena.
Semi-Weekly Eagle, Vinton.
Daily Register, Des Moines.
Journal, Mount Pleasant.
Free-Press, Mount Pleasant.
Herald, Mount Pleasant.
Iowa State Press, Iowa City.
The National Democrat (German), Dubuque.
Electric Light, Marshalltown.
The Democrat (German), Davenport.
The Gate-City, Keokuk.
The Observer, De Witt.
The Miner, Marysville.
The Advertiser, Creston.
Van Buren Democrat, Keosauqua.
Monona County Gazette, Onawa.
Deaf-Mute Hawkeye, Council Bluffs.
Deaf-Mute Optic (two copies), Little Rock, Arkansas.

Dr. H. M. Bassett continues to occupy the position of Senior Assistant Physician, which place he has filled for many years with entire satisfaction, and more than ordinary ability, and I can but express, what I believe your Board feels due, especial thanks for much extra service and anxious responsibility, during the period of uncertainty occasioned by the decease of the lamented Dr. Ranney, my predecessor, and the selection of a successor; my personal thanks are due

him for much valuable service while yet unfamiliar with the Hospital, and the conscientious discharge of duty since.

It was a matter of sincere regret to us that in December last Dr. I. P. Brubaker found it necessary, on account of ill health, to resign his position as Second Assistant and seek refuge in another climate. The good wishes of the whole household follow him, as a result of his sacrificing devotion and intelligent service while with us. Dr. Max E. Witte, who occupied the position of Third Assistant, was promoted to fill this vacancy, and has been most industrious and faithful to duty, giving evidence of scientific research and conscientious care, equalled by few.

Dr. Frank P. Peck, recently graduated from Chicago Medical College, was appointed Third Assistant Physician and Pathologist, and brings to us such indorsements as to lead us to expect increased interest in this department of our work.

To Mr. E. N. Nelson, Steward, and Mrs. F. V. Cole, Matron, during the period of my administration, are due my hearty thanks for loyal and exacting service.

Miss Meno Trope continues to discharge the duties of Supervisoress of the female division in a most acceptable manner, and great credit is due her for most faithful and self-sacrificing discharge of duty, and to Mr. G. H. Lyon, Supervisor of the male department. To many industrious attendants and employes are due special mention for their kind and considerate care of those placed under their charge, and for faithful service.

Finally, I desire to extend to you, gentlemen, my heartfelt thanks for the cordial welcome I have received at your hands, and for your kind words of advice and hearty support in the management of the affairs of the Hospital. With gratitude to our Heavenly Father, for mercies untold and protection from pestilence or other danger, we commit to His loving care these unfortunate ones, with all their interests here, which are so dear to us, and press forward, with reliance on Him, to whatever of duty, service, or sacrifice is before us.

Respectfully submitted,

H. A. GILMAN,
Superintendent.

MT. PLEASANT, IOWA, July 1, 1883.

REPORT

OF THE

JOINT COMMITTEE

OF THE

TWENTIETH GENERAL ASSEMBLY

OF THE

STATE OF IOWA,

APPOINTED TO VISIT THE

Hospital for the Insane

LOCATED AT

MOUNT PLEASANT,

PRINTED BY ORDER OF THE GENERAL ASSEMBLY.

DES MOINES:

GEO. E. ROBERTS, STATE PRINTER.

1884.

REPORT.

To the Twentieth General Assembly of the State of Iowa:

Your joint committee charged with the duty of visiting and inquiring into the management of the Iowa Hospital for the Insane at Mt. Pleasant, Iowa, beg leave to report that they have performed their duty in accordance with the Concurrent Resolution of the Senate and House of Representatives.

Your committee would report that on the fifth day of February, 1884, they met at the Hospital for the Insane at Mt. Pleasant, Iowa, and effected an organization by electing T. J. Caldwell, chairman, and J. D. McVay, clerk, and on the same day proceeded to the work assigned them.

Your committee were charged with the following duties: To examine and include in their report:

First. Whether the appropriations made by the last General Assembly, have been wisely and economically expended.

Second. Whether they have been expended for the objects appropriated.

Third. Whether chapter 67 of the acts of the Seventeenth General Assembly, has been complied with, in not contracting indebtedness in excess of appropriations.

Fourth. Whether there has been any diversion of any money, from the specific purpose for which it was drawn from the State treasury.

Fifth. Said committee shall also report the names and number of persons employed by the institution, for what purpose employed and at what salary. Also, whether any of the employes receive or have received, anything in addition to the salary, in the way of board, rooms, lights, fuel, or clothing, or anything else at the expense of the State.

Sixth. Said committee shall specially examine and report, as to the sufficiency of the means of fire escape in case of fire, and also as to the protection against fire.

Your committee would most respectfully submit the following report of their visit and examinations:

We began by visiting the Hospital in the official capacity of a visiting committee. We examined the books, records and vouchers connected with the financial management of the Hospital, and gave the hospital buildings and grounds a thorough inspection.

Your committee are disposed to concur in the opinion of the Joint Committee of the Nineteenth General Assembly, that a careful inspection discloses the fact, that the foundation, upon which the hospital building rests, is imperfect. The sub-basement walls of the main building, have been partially replaced, during the biennial period between the Eighteenth and Nineteenth General Assemblies, by a new foundation, under the supervision of the late Superintendent, Dr. Ranney, and your committee find the work done in a good, substantial and workman-like manner. But the work is not completed, and your committee would recommend a further appropriation for the completion of the same.

The offices of superintendent, steward, physicians and assistant physicians, and apothecary store-rooms are located on the first floor of the Hospital. The wards for the patients, are in the east and west wings of the main building. The laundry, store-room and bakery are situated in the rear center building. The laundry is provided with all the necessary machinery except washing-machines.

Your committee also visited the minor buildings, connected with the Hospital, such as, barn, ice-house, smoke-house, carpenter and blacksmith shops. The barn and wagon-house we find sufficient for the wants of the Hospital, there being barn room enough for the stock upon the hospital farm, except a shed for cattle and piggery for hogs. The shed for cattle was destroyed by the cyclone in June, 1882. The ice-house and house for storing meat and fish, were in good condition, the ice-house being filled with ice.

We found a very efficient corps of medical assistants, who are attentive to the wants of the patients. The Superintendent, Dr. Gilman, in the opinion of your committee, is peculiarly adapted to the arduous duties devolving upon him, as the chief executive and medical officer of the Institution, having had large experience in the care

and management of the unfortunate class committed to his charge. He is a man of great energy, rare executive ability, and most excellent judgment.

The capacity of the Hospital, is for but three hundred and fifty patients, whereas, there are now five hundred and three confined therein. This is altogether too crowded a condition, for either the health or comfort of the patients and should be remedied. We found the patients well cared for, the wards clean, well warmed, and a part well ventilated. We find, upon examination, that the ventilation of some of the rooms is very deficient. The registers were improperly placed, so that the warm pure air is carried off, while the impure atmosphere remains in the rooms. This defect has been remedied, in some respects in a part of the building, and we would recommend an appropriation of a sufficient sum to complete the needed changes in this department. The bedding and clothing of the patients, we found to be clean and in good condition.

Your committee would report that they found the building well provided with means of fire escape, so that the entire building could be cleared in a brief space of time and without creating any confusion. The fire-trap, in the shape of studded partition from the office floor to the cupola, has been removed, and in its place a solid brick wall built, separating the front center from the rotunda, and shutting off completely the wards where the patients are located, with fire-wall and iron doors, so that in case of fire in one section, or in the center building, it can progress no further. This wall has been plastered, the carpenter work done and painted, within the appropriation. We found everything connected with the patients and household, in good order and condition, showing that the Superintendent had given his personal attention to all things connected with the Hospital. The internal management which was also under the special supervision of Dr. Gilman, is deserving of high commendation.

As an investigating committee, we would report as follows:

First. The appropriations made by the last General Assembly have been wisely and economically expended.

Second. The appropriations have been expended for the objects for which they were appropriated.

Third. The acts of the Seventeenth General Assembly have been complied with, in not contracting indebtedness in excess of the appropriations.

Fourth. There has been no diversion of money from the specific purpose for which it was drawn out of the State treasury.

Fifth. Your committee herewith submit Exhibit "A," which contains the names of the persons employed in the Institution, for what purpose employed, and at what salary, and what has been received in addition to salary, in the way of board, rooms, lights, fuel, or clothing, or anything else at the expense of the State.

Sixth. That the sufficiency of the means of escape from fire are ample, but some additional protection against fire is required.

Your committee would recommend the following appropriations:

For renewing sub-basement walls.....	\$ 8,500.00
For renewing heating surfaces.....	5,000.00
For changing the system of heating and ventilating the remainder of the wards.....	5,000.00
For filter.....	5,000.00
For renewing bedsteads and for wire mattresses.....	2,000.00
For washing machines.....	2,500.00
For sheds for cattle, piggery for swine and drying shed for lumber.....	3,000.00
For repairs and contingent fund.....	10,000.00
For electric fire alarm and system of thermostats.....	2,000.00

We have carefully examined the necessity for the several appropriations and repairs requested by the Trustees and Superintendent and believe that each request is an absolute necessity, therefore, we recommend as follows:

For renewing sub-basement walls, \$8,500.

This wall, constructed of imperfect stone originally, has been partially renewed by former appropriations; however, about five or six hundred feet of the rotten foundation and sub-basement still remain, and this is constantly growing worse, so that now the walls of the building are badly cracked in places, and it is only a matter of time when they will fall down and some calamity result, unless renewed. They have been condemned by a competent builder. We recommend the above estimate, it being based upon the actual expense of that portion already renewed. This small expense will make the structure as substantial as any can be.

For renewing heating surfaces in the basement to the entire building, \$5,000.

We have carefully examined sections of the steam coils now in use, and find they are badly eaten by rust and the action of chemicals found in water taken from an artesian well some years ago. They are constantly bursting during the winter, when the steam is turned on, and it is necessary to turn it off from the section where the damage occurs, thus leaving that portion of the building uncomfortable. We think this improvement and renewal can be wisely and economically done in the summer, when the steam heat is not needed in the wards, and that one half can be renewed in 1884 and the other in 1885; therefore we recommend the sum of \$2,500 per annum.

For changing the system of heating and ventilating the remainder of the wards, \$5,000.

The improvement made in the Hospital where this work has been accomplished is more marked than any of the repairs resulting from the appropriations made by the Nineteenth General Assembly; and the importance of perfect ventilation for the remainder of the building, where the patients are suffering from vitiated air, cannot be too strongly emphasized. The appropriation, for two sections of the east wing, made by the last General Assembly, has been so economically expended that another section has been nearly completed. The Superintendent only asks for the same amount for the three sections of the west wing as was made for two sections of the east wing, by the Legislature two years ago, and we recommend the amount asked, which is \$5,000.

For filter to purify at least 50,000 gallons of water per day, \$5,000.

The water supply of this institution has been assured for all time during the past year, by making a contract with the Mount Pleasant water-works, at a less cost per annum than was formerly expended for fuel, repairs, boiler, pumping and wages of engineer engaged in pumping. It is well known that the supply in this portion of the country is surface water, which, after being pumped into reservoirs, holds in suspension a great deal of vegetable and animal impurity. By means of the filter proposed here this can be made absolutely pure. The plan recommended is a double filter, each portion 30 x 30 feet, excavation having been made about 7 feet deep, and composed of

solid clay impervious to water, which shall be covered with stone, brick and cement, with a wall of brick laid in cement between. A main drain will be laid the entire length of the bottom of bed, emptying into the clear water space, which shall be 20x20 feet, and also separated by solid brick and cement wall. Smaller drains will be laid every five or six feet, connecting with the main, then twelve inches of rock, broken four inches in diameter, will be placed in the bottom of the basin on top of these drains, then twelve inches of rock two inches in diameter, twelve inches of coarse gravel, twelve inches of charcoal, twelve inches of very coarse sand, and, finally, twelve inches of very fine sand. A perforated iron pipe will be placed in position across the top, fastened three or four inches above each of these filter beds. The water thus let in, percolates down through and empties into the clear water space, is pumped up into the Hospital and distributed for all purposes. It will be necessary to place over this filter a tight brick structure, ten feet high, covered by a roof to prevent freezing in winter. Believing, for the same reason that perfect ventilation should exist in every Hospital, that there should be an abundance of pure water, we recommend for the construction of this filter the sum of \$5,000.

For renewing bedsteads and for wire mattresses, \$2,000.

By observing the difference in the comfort and inducement to repose, so necessary to the recovery of this class of invalids, between the old wooden slats and straw beds and the new beds already provided, we feel that no delay should be permitted in refurnishing the remaining wards, and we recommend for that purpose \$1,000 per annum for two years.

For washing machines, \$2,500.

We examined the washing machines, and found one entirely disabled and beyond repair, and the others rotten and liable to fall in pieces at any time. Washing is done here for more than six hundred people, and many of the patients are exceedingly filthy. Your committee desire to recommend the estimate of the builders of these machines, which is \$2,500.

For sheds for cattle, piggery for swine and drying shed for lumber, \$3,000.

We find the cyclone of June, 1882, destroyed all the shelter for cattle and hogs, except the cow-barn; also that no place has ever been provided for storing lumber necessary for the constant repairs needed. To supply these needs we recommend an appropriation of \$3,000.

For repair and contingent fund, \$10,000.

We find that the entire building, walls, ceiling and wood-work, has had no repairs, and has never been painted since its construction, nearly twenty-five years ago, until the work was commenced, about a year ago. The whole had become dingy, much of the plastering had fallen off, and the wood-work was split and defaced, so as to give to the institution a generally "run-down" appearance. In the eight wards of the east wing, where the work of repair has been carried on, everything looks bright and cheerful. The walls, ceiling and wood-work can now be constantly cleaned, and a much healthier condition be maintained than when the wall and wood-work were impregnated with poisonous emanations. We believe the remainder of the building should at once be repaired in like manner, for hygienic reasons, as well as the next important, cheerful surroundings, which are so necessary in the treatment of mental disease. The large kitchen needs overhauling and repairing throughout, and in the way of furniture, new tea and coffee urns and steam roasters. There is, of course, in a hospital of this character, need for a multitude of constantly occurring repairs, as a result of the destructive propensity of the insane. We recommend, to carry forward this very important work of renovating the remainder of the building, including kitchen, and as a contingent fund for this biennial period, the sum of \$5,000.

For electric fire alarm and system of thermostats, \$2,000.

By the introduction of this apparatus, millions of property and thousands of lives have been saved, and we should deem it an act of negligence should we fail to recommend this protection to this unfortunate and helpless class of our fellow-citizens. We most emphatically indorse the recommendations of the Superintendent in this direction, and recommend the actual estimate of the Western Electric Co., which is \$2,000.

CRIMINAL INSANE.

Your committee deem it of great importance to urge the necessity of separate provisions for the care of the criminal insane. Morally this class are debased, and their influence for evil is constant and demoralizing. There are now about one hundred of this class of insane persons in our State, who should be separated from the other insane. In our opinion it would be advisable for the State to make provision for such insane at one of our Penitentiaries, which can be accomplished at a comparatively small expense to the State.

T. J. CALDWELL,

On the part of the Senate.
