THIRD BIENNIAL REPORT

OF THE

WARDEN

OF THE

ADDITIONAL PENITENTIARY

TO THE

GOVERNOR OF THE STATE.

 OCTOBER 1, 1881.

PRINTED BY ORDER OF THE GENERAL ASSEMBLY.

DES MOINES:

F. M. MILLS, STATE PRINTER.

1881.

WARDEN'S REPORT.

ADDITIONAL PENITENTIARY, }
ANAMOSA, IOWA, Sept. 30, 1881. }

To HIS EXCELLENCY, JOHN H. GEAR, *Governor of Iowa*:

I HEREWITH present to you my third biennial report as Warden of Additional Penitentiary, Anamosa, commencing with October 1, 1879, and closing September 30, 1881, both dates inclusive.

In my last report I called your attention first to the progress made in the work of building the south cell-house, the chief work in which we were then engaged. This building is now completed and has been in use since February 19, 1881. In convenience, usefulness, and beauty of exterior it fulfills all our anticipations, and common verdict of those connected officially with the prison, and who consequently test its practical value, as also that of the visitor and spectator is "One of the very best cell-houses in the United States." We now have accommodations for six hundred and forty convicts. By using economy we have been able to put in stone stairs in the cell-house, instead of wooden ones, also stone platforms around guard-houses instead of wooden ones, have besides bought three hundred and twenty iron bedsteads, and three hundred and twenty cell-buckets out of the building fund, still keeping inside the appropriation.

CONSTRUCTION FINANCES.

In the estimate made for the construction of cell-house, for which \$60,000 was appropriated, it was supposed the State quarry would furnish all necessary stone, but it failed and was abandoned; we then bought from outside parties. This item of expense not being contemplated or provided for, I asked in my last report for an additional appropriation of \$10,000 to meet it, which was granted, the \$10,000 to cover also cost of erecting chimney-stack for which I asked \$1,580.97 appropriation. By referring to my last report it will be seen that we had up to that date received from State treasury \$32,493.66, leaving of the \$60,000 an undrawn balance of \$27,506.34. This has since been received, as also has the \$10,000, making the total amount received

\$37,506.34, all of which has been used to complete cell-house, and in the erection of chimney-stack. Appropriation for relaying track made by the Sixteenth General Assembly, \$3,000. At time of my last report there was of this \$3,000, an undrawn balance of \$369.24. The Eighteenth General Assembly appropriated \$1,800 more for this work, making a total of \$2,169.24; amount drawn, \$444.05. Of the \$500 appropriated for stockade there remained undrawn at time of my last report, \$245.94; of this \$90.80 has since then been used. For sewer there was appropriated \$5,000; amount drawn, \$4,112.47. For slate roof on engine house, \$460; amount drawn, \$400. For steam heating apparatus, \$5,500; amount drawn, \$5,494.50. For hand cars, \$100; amount drawn, \$100. For transportation of discharged convicts, \$1,000; amount drawn, \$509.01. For rewards offered for escaped prisoners, \$500; amount drawn, \$350. For furnishing Warden's house, \$250; amount drawn, \$250. For work on wall, \$15,000; amount drawn, \$7,962.26. In each and all of these expenditures I have, as heretofore, striven to keep inside of the amount of appropriation, and if possible leave a balance. I have also been mindful of the financial interests of the State by continuing to act as superintendent of the building, thus saving the salary of a superintendent. I had adhered to my former plan in regard to the employment of free labor; viz., hiring as few foremen as possible with which to make efficient our working force of convicts.

GENERAL SUPPORT FINANCES.

My last report, page five, shows that at that date, September 30, 1879, every account payable from support fund was paid, all debts discharged, and a balance of cash on hand of \$3,808.31. We have continued through this term, and are now free from debt, and by referring to Clerk's report it will be seen we have a cash balance on hand of \$3,086.69. Our stock of clothing and provisions on hand is about the same, in quality, as at the time of our last report, but owing to advanced prices the value is of course greater—pork, for which we formerly paid \$10 per barrel, running up to \$20 per barrel; beef, from two to three cents per pound; potatoes, from twenty to seventy-five cents per bushel; wood from \$2.80 to \$4.50 per cord, and other articles in proportion. These advances in prices have made it necessary to expend the full amount received from the State for support. It is impossible now with current prices to support the men on \$8 per month, and should the cost of clothing and provisions

remain the same, or increase, it will be equally impossible in the future. Then, as we have accommodations for six hundred and forty men, and have but one hundred and twenty-three, the cost of fuel and lights for six hundred and forty being no more than it now is for the one hundred and twenty-three, we labor under the disadvantage of the expense per man being greater than if we had the six hundred and forty. We therefore ask for \$10 per month, and the \$10 per month to be granted from the time of this biennial report, October 1, 1881.

NEW QUARRY.

The new quarry, from which we commenced receiving stone September 8, 1879, has proved to be more than a realization of our most sanguine anticipations. The "thirty-nine cars of stone of excellent quality, of the kind most valuable and costly," received up to the time of my last report, were but a fair sample of the eight hundred and fifteen car loads that have followed them, which, at an average value of \$40 each, gives \$32,600; this, added to the \$1,404, the value of stone taken out previous to September 30, 1879, as noted on page seven of my last report, gives us a total value of stone thus far taken from the quarry of \$34,004—\$34,004 worth of stone from a quarry costing \$1,000, will show the investment to have been a wise and profitable one, and especially so when we remember that the above yielding is but the beginning. We have, as it were, but looked into the new quarry; its real hidden value is yet to be brought to light, and its greatest worth future working will disclose. We have taken from this quarry a stone seventy-one feet three inches by four feet eight inches by three feet four inches, another fifty-five feet by four feet eight inches by three feet four inches.

There is in the wall a stone twenty-six feet four inches by two feet six inches by twenty-two feet; one over the gate twenty-four feet by two feet six inches by twenty-two feet. These, as specimens, show that the quarry will furnish all needed stone for completion of prison buildings, or any other purpose required by the State. In fact, so abundant is the supply of stone, and so small the expense of quarrying it that for use in building any of the State institutions, the stone can be taken from this quarry, dressed, and shipped to the desired point at less expense to the State than it can be bought from outside parties near at hand.

WATER SUPPLY.

Our water supply as furnished by the Anamosa Water-works Company is costing us forty dollars per month, an amount equal to six per cent on \$8,000. This is too much, I think, and as there is a spring about half a mile from the prison I recommend that we try to secure our water supply from there, testing the spring by temporarily laying, for convenience pipes from spring to prison, the iron railing which is to be used for top of wall when completed. Testing in this way will cost the State nothing; then if it is found that the spring will furnish enough water for our use, I further recommend that an appropriation be made for building a reservoir, and buying pipe for permanent water-works under our own control. If the spring does not prove sufficient when tested, I would recommend that we have water-works of our own within the yard, and get water from the Buffalo, which is about eighty rods distant. For cost of this latter plan, see Architect's report.

LIBRARY.

We have bought for our library during the past two years over two hundred volumes. These, with donations made added to the seven hundred volumes reported October 1, 1879, give us a library of twelve hundred volumes. For particulars in regard to this part of our work, see Librarian's report appended hereto.

ARCHITECT'S SERVICES.

The services of Mr. William Foster, our architect, have during the past two years, as before, been of great value. The cost to the State of his visits, detailed plans, and instructions during this term has been \$404.50.

GENERAL HEALTH.

The health of the convicts during this term has been much better than formerly, owing to the improved system of sewerage, and good sleeping apartments. Dr. J. L. Adair, our physician, has been faithful and efficient, and I would refer you to his report for items of interest in this department of our work.

GARDEN PRODUCTS.

I would respectfully call your attention to Mr. Kinsey's report showing the value of our garden products. Mr. Kinsey has charge of this work in addition to his duties as Turnkey. His services here are very valuable, and he deserves a great deal of praise both for doing the work so well, and also without extra salary. The products of the garden this year have not been so abundant as last, on account of the long-continued rains last spring followed by drought in the summer months.

CONVICT LABOR.

There is one feature of our prison system that deserves serious consideration. At present the State profits, or seeks to profit, by the labor of the men who have violated its laws. We suggest that this is not good public policy. The legislator reasons that inasmuch as the convict has compelled the State to undertake the troublesome and expensive task of recalling him to a correct sense of the requirements of citizenship, by moderate yet forcible modes of punishment, he should repay the State from the fruits of his industry. We do not question the justice of this position, it is based on the best principles of public economy, but at the same time I believe the State ceases to be truly economical and humane when it takes one dollar more of the convict's earnings than is necessary for his support. The actual cost, and lowest figure at which a man can be properly kept in the penitentiary, will average forty-eight cents per day the year round—twenty-seven cents for food, clothing, heat, and light, and twenty-one cents for guarding. The State should derive forty-eight cents a day from the industry of these men, and no more. The wages of a convict should be fixed at a fair figure, and every dollar he earned beyond the cost of his support should be held in reserve for his own use at the end of his term of imprisonment, or for the immediate benefit of his family or friends, as he may elect.

The idea of earning money can be made and used as a lever for great good in the prison system of the country, if hedged about by useful restrictions. A majority of the men who go to prison are from the poorer ranks of society. In nine cases out of ten when they enter upon prison life their families find their way to the county poor-houses, or become public burdens in other ways. With this undeniable fact in view, it will be seen that the small amount of revenue flow-

ing into the State treasury from the labor of these men is lost several times over, through the dependent ones of their families, to which may be added the evil of a large percentage of crime and social degradation engendered by the abject poverty thrust upon these women and children. Any county auditor can verify these statements from the public ledger. If some interested statistician would devote himself to it, he could gather a vast number of facts and figures bearing upon this subject from the county records of Iowa, and their whole tendency would be to disprove the economy of the State deriving financial profit from the wrong-doings of its citizens. Our prisons should be as reformatory as possible, and no prison system is reformatory that does not inspire the downcast citizen with hope for the future. Hope is the beacon light of the soul. When it is wiped out, men have no reason for striving to be better. Give a convict the knowledge that he can earn something every day he remains in the prison, and he becomes a willing laborer, his value to the State and to himself is at once increased, because he becomes interested in his work, and his good behavior is in a large part guaranteed. Few, if any, of the convicts having families or friends in needy circumstances, would refuse to contribute to their support from their earnings. The burdens of the taxpayers all over the State would be lessened, and the narrow margin of profit now derived from prison labor would never be missed from the State treasury. The plan of deducting a certain percentage from a convict's term of imprisonment, for good behavior, involves the same principle, and has been very successful, still this proposed division of the convict's earnings would be beneficial in a far greater degree. There is much of wisdom and humanity in it, and we trust it will receive the attention of the legislature.

FEMALE PRISON.

I understand that there will soon be made to our State authorities application for an appropriation for building a prison, separate from our other prisons, for females. I deem it a good thing, and recommend that the project receive your consideration.

OUR FUTURE NEEDS.

In my last report I said next to the new cell-house our greatest necessity was the building of the prison wall, owing to the insecurity of the stockade. Two years have increased this insecurity, making the continuation of work on the wall even more of a necessity, if

possible. The stone wall or foundation around enclosure in front of south cell-house is now ready for the iron fence, and needs it to complete part of our work. We need more shop-room, and as the building now in use for a kitchen, hospital, library, chapel, etc., was originally intended for a shop, and used only temporarily for a different purpose, we ask for a new building which shall include a kitchen, hospital, library, chapel, wash-room, and guards' hall, thus giving for shop-room what we need, and what is also in accordance with the original plan, and said building if built now, at same time as wall, will cost less than at any other time, because in getting out stone for wall we quarry and handle a certain amount of stone not suitable for wall, but which would work in well in this building, and if the first handling places it there, further labor and cost are saved. For details of cost in continuation of work on wall, for iron fence, and new building, see Architect's report. I recommend that our new cell-house be lighted with the electric light, which would be safer and cheaper than the present method. The cost of machinery, lamps, etc., would be about \$2,700, and a saving can be made on that by the manufacture of our own engine in the prison shop, which we are prepared to do. After the machinery is all in place the cost of each light would be one and a half cents per hour, six lights nine cents, three hours each evening twenty-seven cents, for one man or six hundred and forty men. As a sample case showing the economy of using the electric light I would refer you to the facts just published in connection with the Philadelphia post-office. The bill for October of this year has just been presented to the Post-office Department. The bill for October of last year, when gas was used was \$1,184, while for this month with the electric light, the bill is \$354, a net saving in one month of \$830.

APPROPRIATIONS NEEDED.

Below find a list of appropriations needed for the further prosecution of the work connected with the prison. The amounts specified have all been carefully calculated by Mr. Foster, the Architect, as seen by his report appended hereto. I ask the earnest attention of the legislature to these appropriations, assuring them that the strictest economy will be used in each and every expenditure. Only such amounts of appropriations will be drawn as to ensure the work being well done.

APPROPRIATIONS ASKED FOR.

| | | <hr/> |
| | | \$174,697.80 |

I wish especially to thank the Christian citizens of Anamosa for their continued faithfulness and help in our prison sabbath-school, assuring them that I have done, and do appreciate their efforts to lead the convicts to a better life, and that the influence of these efforts is felt as a helpful power in the discipline and care of the convicts.

I am also under obligations to you, as Governor, and to the Executive Council for the help which your visits, suggestions, and co-operation has been to me during the past two years, to Mr. Foster, our Architect, for valuable assistance rendered, and to my subordinate officers, and guards, for their uniform faithfulness, and willingness to second, and carry out my plans for the success of the work committed to my care.

Respectfully submitted,

A. E. MARTIN, *Warden*.

STATE OF IOWA, }
COUNTY OF JONES, } ss.

Subscribed and sworn to by the above mentioned Ancil E. Martin, this 11th day of November, A. D., 1881.

In testimony whereof I have hereunto set my hand and affixed the seal of said court at my office in Anamosa on this 11th day of November, A. D., 1881.

ARCHITECT'S REPORT.

DES MOINES, IOWA, September 30, 1881.

HONORABLE A. E. MARTIN, Warden *Additional Penitentiary*:

SIR—I herewith submit my biennial report for the two years ending September 30, 1881. The completion of the south cell-house reflects great credit on your economical management and superintendence. The plans and designs were carefully carried out, and the cost of the building brought *inside* of our estimates, which is not a common experience in the erection of buildings.

The last General Assembly cut our appropriations down so much, that the building of the yard wall and gateways has progressed very slowly, and as a matter of economy to the State I would recommend a sufficient appropriation to complete the same in the next two years.

The board stockade around the yard at present is practically worthless. As it has been built seven years, it is rotten and a continual source of expense, costing several hundred dollars annually for repairs.

Another necessity is the erection of a suitable building for pump works and water-tank.

I also recommend the erection and completion of the center rotunda, or guard-halls, between the two cell-houses, which can be done at a small cost, and will give us when completed the female prison, guards' quarters, and water-tanks for cell-house.

The front wall of north cell-house should be built up to same height as yard wall. This can be covered with a temporary stone coping to protect it, and if built at the same time as the balance of walls will make the enclosure complete.

I also recommend the erection of the center rear building containing the kitchen, dining-room, laundry, dry-room, chapel, hospital, library, etc.

I herewith submit itemized estimates of cost of above work:

| CENTER ROTUNDA, GUARDS' HALL, AND FEMALE CELLS. | |
|---|--------|
| 1 section of wall, 166 feet by 4 feet by 10 feet..... | 6,540 |
| 1 section of footing, 166 feet by 5 feet 6 inches, by 2 feet..... | 1,825 |
| 2 sections of wall, 58 feet by 3 feet by 5 feet..... | 19,488 |
| 1 section of wall, 64 feet by 3 feet 6 inches, by 44 feet..... | 9,856 |
| 1 section of wall, 50 feet by 3 feet by 44 feet..... | 6,600 |
| 1 section of wall, 60 feet by 3 feet by 10 feet..... | 1,800 |
| Total feet..... | 46,210 |

| | |
|---|-------------|
| 1,708 yards at \$5..... | \$ 8,540.00 |
| Cornices and trimmings 3n lower..... | 350.00 |
| 24 iron columns, 10,000 pounds, at 4 cents..... | 400.00 |

Respectfully,

WILLIAM FOSTER, *Architect.*

PHYSICIAN'S REPORT.

ADDITIONAL PENITENTIARY. }
 ANAMOSA, IOWA, Sept. 30, 1881. }

HONORABLE A. E. MARTIN:

Sir—In my report for the past two years, I find a decrease of thirty-three per cent in the number of cases treated for disease, with a decrease also in the continuance of the diseases we have had under treatment. I attribute this fact in part to the very excellent system of sewerage we now have in operation, and to the better sleeping apartments in the new cell-house, with its perfect system of ventilation and excellent heating apparatus as compared with the old cell-house, with its dampness and darkness unavoidable from its situation. I wish to speak in terms of highest praise of the architect in planning, and the builder in forming such a model of beauty. I cannot well conceive how this new cell-house could well be improved upon in a sanitary point of view; pure air, no dampness, plenty of sunlight. I have noted the effect upon the convicts in a short time after being received from the jails. We have had no diseases in hospital—the most serious cases have been from accident or otherwise injured. One was severely injured by receiving a charge of buckshot while attempting to escape, but finally recovered. Another was wounded by a minie ball through the lung and liver, he dying in six weeks of pyemia. Still another was in the hospital for a long time from the effects of a shot in the elbow; another one, from compound fracture of the leg, by a falling derrick, recovered sufficiently to go outside, his time having expired. Quite a number of old men have been on the sick list from time to time. Some have been in the hospital for two and three weeks at a time after being recovered, having been debilitated from excess of various kinds.

We have had but two deaths in the two years, Inman and Thomas. The former dropped while at work. Post-mortem revealed the cause of death to be organic heart disease. Thomas, as stated above, died of his wounds.

There have been expended for the sick—including the drugs and other necessities, four hundred and sixty-eight dollars and fifty-eight cents (\$468.58); for glassware, etc., in fitting dispensary, one hundred and seven dollars and ninety-eight cents (\$107.98), making in all, over expenses, five hundred and seventy-six dollars and fifty-six cents (\$576.56). We have two good airy rooms for the hospital and dispensary use, but we are subject to many annoyances and inconveniences owing to the situation of the rooms; they being near the workshops, the smoke and dust is not only unpleasant to the sick, but is a positive injury to them.

Another great annoyance is that we often have to remove patients from the hospital to the cell-house and back, much to their discomfort. We look forward with pleasure to the completion of the main building with its new hospital and better accommodations for the sick, and would urge upon the next legislature the necessity of appropriating sufficient means for the purpose of so far completing the main building as to give us more and better rooms. Our present inconvenience may seem of trifling importance, but a sick convict needs the same conditions, care, and conveniences for getting well that any other individual does. To give him less would be beneath the dignity of the State of Iowa. With the annexed table of cases treated, I submit this report for your consideration, with many thanks to you for your kind and thoughtful attention of the sick when brought to your notice.

Personally, I thank you for the many favors aiding me in making my duty one of pleasure.

LYMAN J. ADAIR.

LIBRARIAN'S REPORT.

HONORABLE A. E. MARTIN, *Warden Additional Penitentiary:*

SIR—The following report is respectfully submitted:

The work of the past two years has been the same in character, and the results much the same as in previous years. Teaching the unlettered, helping those who wish help in branches in which they are somewhat versed, and trying to discharge the duties that belong to the office of teacher and word instructor, I have tried to do what I could to lead men into a nobler, truer manhood. How successful my efforts have been I cannot say. The greatest encouragement comes, perhaps, to me, through letters received from ex convicts, scattered over the different States, expressing their appreciation and gratitude for what was done for them while in prison, referring to the religious instruction, and saying as the sabbath comes how their thoughts turn to our chapel, and the services there held—the morning prayer-meeting, the Sunday-school, the instruction there received, that will follow them through life. Some have been so influenced that they have confessed Christ and united with the church, while others, so far as I can learn, are earning an honest livelihood and trying to live manly lives. This fact is one of great encouragement, and helps us take up cheerfully the responsibilities that come to us, not knowing how far-reaching the influence may be. Another source of encouragement is the interest some of our colored boys have manifested in learning to read and spell. The most difficult thing for them to overcome is the sounds of the letters, and while some learn to read quite well in a short time, it is hard for them to spell correctly; but they have persevered and done admirably, so it is a pleasure to teach them, and so the work goes on, sometimes amid discouragements, but on the whole, enough to encourage and make us hopeful.

Our Sunday-school is well attended, and the teachers faithful in their instructions. They deserve our warmest thanks for their devotion to the work, and their kind earnestness in trying to lead men to the Savior. It is our object to so teach and treat the men in our care that they shall feel they have souls to save, and their salvation is precious in the eyes of God. We can only sow the seed—what the harvest will be is known only to the All-wise.

For our library I have purchased over two hundred volumes. We received from a gentleman near Boston a donation of magazines enough to make one hundred volumes when bound, also a box of books and papers from Hon. C. Sanborn, of Manchester, Iowa, for which we are grateful. We now have over twelve hundred volumes in our library. I have tried to use care in the selection of books, well knowing that what men read has a strong influence on their character and lives.

October 1, 1879, we had balance on hand \$173.77; since then we have received \$821.10; expended \$559.54; balance on hand, \$435.33. We have purchased ten dozen Gospel Hymns to replace the old Gospel Songs, which we had used so long the men had ceased to become interested in them, and we sent them to New Orleans to be used by the freedmen, and for which our missionaries there expressed their hearty thanks.

I cannot close this report without referring to the uniform kindness I have ever received from the prisoners. In all the years I have been connected with the prison never have I received an unkind word or discourtesy from one of them. Always kind and obliging, they have ever made me feel very grateful to them.

To yourself as Warden, also to the other officers and guards, I wish to express my warmest thanks for your kindness and willingness to render me any assistance, and for all you have done to make my work pleasant and a success.

Very respectfully,

ANNA C. MERRILL, *Teacher and Librarian.*

TURNKEY'S REPORT.

TURNKEY'S OFFICE,
ADDITIONAL PENITENTIARY,
September 30, 1881.

HONORABLE A. E. MARTIN, *Warden:*

SIR—I herewith hand you my biennial report of the moneys received from visitors, and the products of the garden since my last report (September 30, 1879), which is respectfully submitted.

GATE RECEIPTS.

Cash received from visitors.....\$821.10

GARDEN PRODUCT FOR THE YEAR ENDING SEPTEMBER 30, 1880.

| QUANTITY. | NAME OF PRODUCT. | VALUE. |
|---------------------|---------------------------------|-------------|
| 50 bushels..... | Green or string beans..... | \$ 25.00 |
| 110 bushels..... | Beets..... | 55.00 |
