

REPORT

OF THE

# Custodian of Public Buildings

AND PROPERTY

TO THE

GOVERNOR OF IOWA,

FOR THE YEARS 1900 AND 1901.

JANUARY 1, 1902.

J. D. McGARRAUGH
CUSTODIAN OF PUBLIC BUILDINGS AND PROPERTY

DES MOINES
B. MURPHY, STATE PRINTER
1902.

## CUSTODIAN'S REPORT.

Office of the Custodian of Public Buildings and Property, January 1, 1902.

To his Excellency, L. M. Shaw, Governor of the State of Iowa:

Dear Sir,—In accordance with section 150, chapter 6, of the code, I have the honor to submit herewith the biennial report of this office, consolidating the expenditure of the two years preceding the meeting of the general assembly, as required by this law, showing the total expenditure for the period from January 1, 1900, to December 31, 1902, inclusive. The quarterly reports, as required by this office in compliance with the same section of the code, have been submitted to the executive council.

The total expenditure for the two years for all purposes, coming properly under the taking care of the capitol and public buildings, has been \$51,342.09. This does not include the extra help of janitors and elevator attendance during the meeting of the last general assembly, as such help was hired and paid by the general assembly, and was only under the supervision of the custodian. To make the service more efficient, the custodian should have the selection of his help, as the law makes him responsible for the good care of the state's property.

In compliance with the law, all the supplies for the different departments under my charge are drawn from the supply department, and contracted for by the executive council.

Your attention is most respectfully called to the following exhibits:

Exhibit "A" is a classified and itemized statement of all expenditure during the two years.

Exhibit "B" is a statement of all refuse material sold and money paid to the treasurer of state.

Exhibit "C" is an invoice of all material and tools on hand.

Exhibit "D"-invoice of furniture.

The Historical Building, or rather the east wing of the intended building, has been completed since I submitted my last

report to the Twenty-eighth General Assembly, and has been accepted by the executive council, and the expenses of taking care of same, as heating, lighting, water, and other repairs, are all included in this report.

By the removing of the historical collections, some very good rooms became vacant and were assigned to the use of the board

of control.

The attorney-general also required more room, and the council gave to his use the room then occupied by this office, after having made a partition through the room to give the attorney-general the much needed private office.

The room formerly occupied by the attorney-general is now used by the horticultural society, thereby relieving the board of health rooms, as both were before in the same rooms.

The custodian's office was then moved to the rooms to be jointly occupied with the bureau of labor commission.

The section which requires the custodian to make this report also charges him to make, and include in his report, a description of all state property at the seat of government.

The rooms occupied as repair shops by the engineer and carpenter were found to be too small, and as the rooms were needed for other purposes, the executive council decided to move the repair shop to the then unused front part of the boiler house, and this makes a very good and suitable location for the same. This leaves the old carpenter shop for the use of the much desired lunch room in the building, and in the old engineer's room is now located the mail carrier.

All these changes in the above named departments have materially increased the expenses of this department, but as the state's business is increasing rapidly, it became absolutely necessary to provide suitable room for the transaction of the same.

## CAPITOL SQUARE.

Containg 10.02 acres, deed by W. A. Scott and Harrison Lyon, April 28, 1856. On this square is built Iowa's great capitol, which, with the improvement of grounds, cost about \$3,000,000. It covers about 58,850 square feet, and there are in the basement, which is 13 feet 1 inch high, twenty-eight rooms, occupied by the board of control, dairy commission, pharmacy commission, land office, custodian's office, board of health, mine inspectors, labor commission, geological survey, G. A. R., supply department secretary

General Ed. Wright.

First Custodian of Capitol Building from 1884 to March 31, 1890.

of the executive council and document room. The other rooms are occupied as storerooms for the different departments.

On the first or main floor, which is 23 feet 9 inches high, are thirty rooms, occupied by the governor, auditor, superintendent of public instruction, treasurer, horticultural society, adjutant-general, attorney-general, clerk of the supreme court, railroad commissioners, agricultural society, six judges of the supreme court, consultation room, supreme court room, and secretary of state. On both of these floors, extending from the center space under the dome 66 feet in diameter, are corridors to the north and south, which are 18 feet wide, and to the east and west, which are 54 feet 6 inches wide, the full length and width of thebuilding.

On the second floor is located the state library in a room in the west wing, 52 feet 9 inches by 108 feet 4 inches, with a ceiling 44 feet 9 inches high. In the south wing is the senate chamber, 58 feet by 94 feet 4 inches, and 41 feet 9 inches in height. In the north wing is the house of representatives, 74 feet by 91 feet 4 inches, and 49 feet 9 inches high, besides there are special rooms on this floor for the lieutenant-governor and the speaker, and on this and the third floor are twenty-nine committee rooms and a postoffice for the general assembly.

The attic contains the nine ventilation shafts, each 6 feet in diameter, which connects with every room in the building, and are sufficiently large to renew the air in the whole building every 25 minutes. In the cellar are located all the main pipes for steam, high and low pressure, gas and also hot and cold water, the feeders for something over 40 miles of pipes scattered through all the rooms in the building. The cellar is also used for supplying the whole building with fresh air through some of the cellar windows, by drawing its greatest supply through a tunnel which connects the capitol with the boiler house, and which is about 10x10 feet in the clear, and extends from the north portico across Grand avenue.

The capitol has a length of 363 feet 8 inches by 246 feet II inches wide, and a total height of 275 feet, while the main roof is 92 feet 8 inches high. The whole building is practically fireproof, and while it was thought to be amply large enough for doing the state's business when it was built, and, in fact, a number of rooms stood vacant for a long time—all the rooms are now occupied, and large quantities of paper and books are piled in the corridor of the basement for the want of more room.

#### THE IOWA STATE CAPITOL.

The building is open to visitors from 7 A. M. to 6 P. M., and visitors can step in all of the state offices, house, senate and library, and policemen in charge will take pleasure in furnishing any information desired.

#### CAUTION.

Never lay anything of value down while in the building. If you do not wish to carry it, give it to a policeman and he will take care of same and return when called for.

The first act of the general assembly of Iowa, for the building of a new capitol building, one that would comport with the dignity of the state, was passed April 6, 1868.

Under this act, the "census board" were authorized to procure plans and specifications. Many plans were submitted, and from the best of these Messrs. Cochrane and Piquenard were commissioned to prepare a plan better suited to the wants of the state than any one submitted.

April 13, 1870, a law was passed creating the original board of capitol commissioners, and under their supervision the cellar was excavated and most of the foundation walls were built, and on Thursday, November 23, 1871, the corner stone was laid with appropriate ceremonies participated in by various state, military and civil organizations and societies, besides many distinguished citizens from abroad.

The corner stone is seven feet long, three feet wide and three feet thick, and was made from a "prairie boulder" procured in Buchanan county.

By an act of the general assembly, dated April 10, 1872, the board of capitol commissioners were reorganized with the governor as ex-officio president, and the following gentlemen as members: Messrs. John G. Foote, of Burlington; Maturin L. Fisher, of Farmersburg; Peter A. Day and R. S. Finkbine, of Iowa City.

When this board first organized, they appointed A. H. Piquenard, of Springfield, Ill., sole architect, and General Ed Wright as secretary of the board. They also made Mr. R. S. Finkbine superintendent of construction, and Mr. John G. Foote superintendent of finance.

This organization was preserved, except so far as death has removed its members. In November, 1876, Mr. Piquenard, the architect, died, and the following January, Messrs. Bell and Hackney, two young men who had been in the employ of Mr.

Piquenard in this work, were selected to carry out the original design in its true spirit. On the 5th day of February, 1879, Mr. Fisher was removed from the board by death, and Mr. Cyrus Foreman, of Osage, was appointed in his place.

The first act of the present board was to remove the original foundation, which was found to be defective, and replace it with more substantial material. This was done at the expense of \$52,352.76.

Since that time the work has progressed slowly on account of the small appropriations each year, but without material interruption. One of the greatest troubles the board and architects have had to contend with has been the selection of building stone that will stand the action of time in this climate.

It was the desire of the board to procure all of the stone, as well as other materials when practicable, within the borders of the state, but, after a vain search through the various quarries, it was deemed best to go elsewhere to procure the huge blocks which make its walls.

The original design for the main cornice and the domes, was to make them of cast and sheet iron, but with the consent of the general assembly these were changed to stone, covering only the hemispherical portion with metal, and this is of very heavy copper which is as durable as time.

The partitions are all of brick or other fireproof material, and the floors are made with iron beams and brick arches with either an encaustic tile or wood covering.

The rooms are all warmed with steam, with both direct and indirect radiation, from a battery of seven large boilers located in a building across the street on the north side, and the rooms are ventilated by exhausting the air ducts built in the walls.

The roof is made of iron frame work, covered with porous terra cotta and slate laid in cement mortar.

The corridoor floors are all made of encaustic tile laid in very rich patterns, and the wainscotings of the corridors and all the principal rooms of both office and second story are made of domestic and foreign marbles. The large columns in the house and senate and those in the upper part of the dome are made of Scagliola, not because it is a cheap imitation of marble, but because it is an imitation as good as marble and better suited to places where used.

The grand stairway is made of marble on an iron frame work, while the other stairways are all of iron.

[No. 8

The legislative portion of the building was completed and dedicated to its future use on the 17th day of January, 1884, and the Twentieth General Assembly held its deliberations in the spacious halls provided for this purpose.

A short time after this the valuable collection of books in the State Library were moved into the large rooms provided for them, and Governor Sherman occupied temporary quarters in two of the committee rooms on the second floor.

The Twenty-eighth General Assembly created by an act a capitol improvement commission, and Gov. L. M. Shaw appointed the following commissioners, Peter A. Day, Iowa City; Mr. Cummings, Des Moines; Mr. Joshlin, Cedar Rapids, to serve as such. Their duty was to examine and report to the Governor on the completion and necessary repairs required to be made on the capitol building.

#### KINDS OF STONE AND WHERE PROCURED.

The foundation stone are principally from the Bear Creek and Winterset quarries in this state.

The basement story is from the Iowa City quarries.

The buff colored stone in the superstructure is from St. Genevieve, Mo., and the blue stone is from Carroll County, Mo.

The granite in the base course was partially procured from prairie boulders in Buchanan County, but the dark colored pieces are from Sauk Rapids, Minnesota.

The outside steps and platforms are the Forest City stone, near Cleveland, Ohio. The rails are the Sauk Rapids granite.

The pilasters and piers in the interior of basement are from Anamosa, in this state, and Lemont, Illinois.

The red granite columns in the second story are from Iron, Mountain, Mo. The dark colored granite in base and cap of pedestials, is from Sauk Rapids, Minnesota. while the carved capitals, pilasters and piers are of Lamont stone.

## GENERAL DIMENSIONS.

Length north and south, including porticos	363 feet	8 inches	
Length east and west, including porticos	246 feet	11 inches	
Length north and south fronts	175 feet	0 inches	
Length east and west fronts	118 feet	8 inches	
Width, east and west through arcades	100 feet	10 inches	
Height to top of main cornice	92 feet	8 inches	
Height to top of balustrade	99 feet	8 inches	
Height to top of stylobate	114 feet	2 inches	
Height to top of dome balcony	219 feet	1 inch	
Height to top of lantern	249 feet	0 inches	
Height to top of ball above lantern	259 feet	0 inches	
Height to top of finale		0 inches	
Height to top of small domes	152 feet	0 inches	
Height of basement story	13 feet	1 inch	
Height of office story	23 feet	9 inches	
Height of second story	22 feet	9 inches	
Height of third story	20 feet	9 inches	
From office floor to first balcony in dome		6 inches	
From office floor to second balcony in dome		2 inches	

From office floor to canopy	175 feet	5 inches
The rotunda is in diameter	66 feet	8 inches
The exterior diameter of dome is	80 feet	0 inches
The house of reprepresentatives is 74x91 feet 4 inches by	47 feet	9 inches
The senate chamber is 58x91 feet 4 inches by	41 feet	9 inches

#### LOCATION OF ROOMS AND OFFICES.

In the north wing is the house of representatives, which is 74 feet by 91 feet 4 inches and 47 feet 9 inches high. It is larger than the senate chamber, but designed to correspond with it in other respects. The finish and furniture of this room are of black walnut, with marble. The frescoing of the house is of a brighter tone, and, instead of the allegorical paintings which decorate the senate ceiling, there has been introduced here the portraits of the following persons: Presidents, Washington and Lincoln; governors, Robert Lucas and James W. Grimes; justices of the supreme court, Caleb Baldwin and Charles Mason; speakers of the house of representatives, Rush Clark and James P. Carlton; generals, M. M. Crocker and S. R. Curtis.

There are one hundred desks for members of the house and fifty for the members of the senate.

Back of the house of representatives are rooms for the speaker, clerks and committees.

#### ITEMS.

There are 398 steps from the ground up to the dome platform or lookout.

There are 787 yards of carpet in the senate chamber and 994 yards in the house of representatives.

There are twenty-nine kinds of marble in the building.

The kinds of wood employed in the building are: Ash, red oak, white oak, black walnut, butternut, chestnut, cherry, mahogany, poplar, yellow pine, white pine and catalpa.

Cost of the building to July 1, 1885, \$2,615,170.87. Cost of furniture to July 1, 1885, \$82,780.80.

#### STATUARY.

Beginning with north of library door: History, Science, Law, Fame, Literature, Industry, Peace, Commerce, Agriculture, Victory, Truth and Progress.

The first door to the left as you approach the senate chamber is the entrance to the stairway leading to the dome. All the rooms on third floor are committee rooms, of which there are twenty-nine in number.

The dome is covered with gold leaf, at a cost of \$3,500.

The pictures on the ceiling of the supreme court room are of the type of Greek mythology.

No. 1. North end, the leading figure, Justice on her throne. To her left stands Columbia, ever ready to sustain her decisions by word or deed. The figure to the right of Justice rejoices that the decision is in her favor. The sitting figure on the right denotes sorrow as the decision is rendered against her, but is content when she finds by examining the law that the decision is according to law. To the left, a mother is explaining to her son the laws.

No. 2. Columbia reigning on her throne. Above the globe, in unity with the goddess of Justice, the patrons of the states come to pay their homage, bringing with them little children, which represent the territories. Iowa, who is a special favorite in Columbia's household, is seen sitting on the steps of the throne with club and coat of arms, ever ready to defend her friend (the Union), Columbia, in case of need. In front of the throne is chiseled in everlasting rock the memorable date 1776, the foundation of the republic. The American eagle is proudly soaring over all, holding in his talons the historical emblem and in his beak a streamer on which is inscribed "E Pluribus Unum."

No. 3. Justice and peace represented as ruling over the land bringing prosperity and plenty, culture and happiness, while on the other rebellion is restrained and smitten down by Justice's strong arm (General Grant).

No. 4 represents Ceres, the goddess of Agriculture.

The small pictures are simply agricultural scenes, by Fritz Melzer, Berlin, Germany.

## GOVERNOR'S SQUARE.

Containing 5.61 acres, deeded by T. K. Brooks and W. A. Scott, April 27, 1856; also lot A, Stewart's addition, according

to the plat, adjoining the square, of about one-half acre, deeded by J. B. Stewart, March 5, 1858. On this piece of ground there is no improvement, but the natural growth of timber is on it yet.

#### ASYLUM SOUARE OR STATE SQUARE.

Containing about 2.25 acres, deeded by J. B. Stewart, January 9, 1858. There is no building on this piece of ground.

#### MONUMENT.

This ground was occupied by the old state house, now by the soldiers' and sailors' monument, described as lots 11 and 12, block 6, Scott's addition, deeded by the Capitol Building association, October 24, 1864. There is built on the ground and completed the soldiers' and sailors' monument, and the grounds are all sodded and finished. The shaft is all of gray granite, ornamented by bronze castings. The total height is about 145 feet, and the total cost was about \$150,000.

#### CAPITOL HEATING HOUSE.

Lot 3, block 4, H. Lyon's addition to the town of Des Moines, deeded by Ed Wright, widower, April 5, 1878, the consideration being paid by the capitol commission, \$1,408.50.

Lot 4, block 7, Lyon's addition to the city of Des Moines, deeded by John M. Day and Jennie E. Day, his wife, June 17, 1880, consideration, \$1,720.

The ground was bought in order to have the heating apparatus, with its coal and ash dust and smoke, out of the capitol. There is located in the building occupying this ground a battery of seven boilers, each sixteen feet long and sixty inches in diameter, which will consume over thirty tons of coal per day in extreme cold weather to heat the capitol and make all rooms comfortable.

## GROUND NORTH OF HEATING PLANT.

Lots 9 and 10, block 4, of H. Lyon's addition to Des Moines, executor's deed, John V. Wise, executor for the heirs of John H. Wise, the consideration being \$2,750, deeded April 23, 1894. These lots were badly needed to dispose of all the ashes from the heating plant and refuse from the capitol. Of course only the back part of the grounds is used for such purpose, so that the front part of the lots might be put to some other use.

## GROUND EAST OF THE CAPITOL.

Lots I and 2, block 7, of Scott's addition to the town of Des Moines, deeded by Flora Wright, June 9, 1897, to the state of Iowa, the consideration being \$4,300. This piece of ground is located east from the capitol. This would be well adapted for the site of a state arsenal, as it is in near location to the capitol, and also to the heating plant, so that it would not be necessary to provide boilers, for such a building could easily be heated from the capitol boiler house. But the general assembly should provide more of the adjoining ground for the site of an arsenal, as a building such as that department needs would occupy nearly all the ground, and would not appear well as a public building, and in front of the capitol.

## HISTORICAL BUILDING.

The ground where one wing of the historical building is now erected occupies lots 1-5, of block 5, H. Lyon's addition to the town of Des Moines, and was bought from Eliza Jane Lyon, the purchase price being \$15,000. The west wing of the building is now completed.

Section 151 of the code contains a provision making it the duty of this office to take an inventory of all furniture, materials and tools in the capitol. I have, during December, 1901, made a careful invoice of the furniture in the capitol, historical building and boiler house, including all furniture which is in use by the offices outside the building.

Whenever possible, I have given in this invoice the purchase price of all furniture, but where such was not attainable I have estimated the same as nearly as possible in comparison with other furniture in the building.

I find the total value of the same is \$59,666.11 against a value two years ago of \$54,837.55, an increase of \$4,828.56, accounted for by additional furniture in the various offices. The invoice of all material and tools on hand is \$2,636.92, against \$2,281.41 two years ago, an increase of \$355.51.

## RECOMMENDATIONS.

It is the duty of this office to report the conditions and needed repairs of the public buildings at the seat of government, but as the Twenty-eighth General Assembly created a special commission for improvement of the capitol building and grounds, the

namber.

report of which has been filed, but has not been published, I do not deem it necessary to make further recommendation in reference to said repairs; in fact, their report will cover fully all work needed in that line.

I further would recommend the donation of a forty-foot strip of ground running east and west on the south side of the governor's square, for the use of a public street, said improvements made without expense to the state.

The walk on the north side of the state square has been removed by the city and put to grade, and the city has ordered a brick or cement walk, also the walk on the west side of said square is in very bad condition and should be replaced with a new one. I therefore would recommend the Twenty-ninth General Assembly to make an appropriation sufficient to cover the expenses of building those walks.

To keep a better and closer watch over the entire capitol building, to my opinion, the night watchmen when not on duty, should be permitted to sleep in the building during the night, enabling both men to be here in case of an accident where it requires more than a single man to protect the state's property. I would also suggest that some system would be adopted which would require the night watchman while on duty, to report hourly by telephone to the central telephone office, or by placing watchmen's clocks in different places in the building.

This office is very much crippled in the service of the state in not having a contingent fund for extra labor. The walks around the capitol and other state property have to be kept clean from snow and ice in the winter months, and needs some little repairs in summer. During state fair, or other occasions of large numbers of people being in Des Moines, there should be extra guides and police in the capitol. I, therefore, recommend an appropriation of \$250 per annum for extra labor.

To better reach the soldiers' and sailors' monument, there should be a cement walk built from the south steps of the capitol to Walnut street, and from Walnut street to the monument. As it now is, the visitors will walk across the lawn and flower beds. I would therefore recommend the building of such walk and an appropriation of \$500, or as much as needed thereof, to make that improvement.

It will be observed that the total expense for the period covered by this report is \$3,876.10 greater than for the last biennial period. This increase may be explained by the fact that there

[No. 8

have been added to the force two janitors at \$55 per month, and a janitress of the ladies' toilet room at a like salary; that the heating of the historical building has required an additional fireman at \$60 per month, and that water, gas and repairs for the historical building appear as part of the expenses.

In conclusion, I desire to tender my sincere thanks to all departments for the uniform assistance and continued courtesy extended to me during the time I have had charge of the capitol, and to testify to the ability and uniform fidelity of those I have had 'under my charge in the employment of the state as assistants, and to thank them for the faithful manner in which they have discharged the several duties assigned them. I believe their remuneration for the service performed is hardly sufficient to support their families, as, with increased prosperity of the whole country, the necessaries of life have also advanced in price while that of the faithful employes of the state have not.

J. D. McGarraugh, Custodian of Public Buildings and Property.

I, J. D. McGarraugh, as custodian of public buildings and property, being duly sworn, do hereby depose and say that these reports of expenses incurred, with the laws in force as given in each statement during the years 1900 and 1901, are correct to the best of my knowledge and belief.

J. D. McGarraugh, Custodian of Public Buildings and Property.

Subscribed and sworn to before me by J. D. McGarraugh, this of —, 1902.

H. M. Jones, Deputy Clerk Supreme Court, Iowa.

\$ 3,802.00
