FOURTH BIENNIAL REPORT

OF THE

BOARD OF CONTROL

OF

STATE INSTITUTIONS

OF

IOWA

FOR THE BIENNIAL PERIOD ENDING JUNE 30, 1905

DES MOINES, IOWA
BERNARD MURPHY, STATE PRINTER
1906

LETTER OF TRANSMITTAL

DES MOINES, IOWA, November 14, 1905.

To the Governor and Legislature:

Pursuant to the provisions of the law the Board of Control of State Institutions hereby presents its Fourth Biennial Report, for the period ending June 30, 1905, and embracing the reports, for the period, of the chief executive officers of the several institutions under the charge of this Board.

G. S. ROBINSON,

L. G. KINNE,

JOHN COWNIE.

Board of Control of State Institutions.

TABLE OF CONTENTS.

PART I.

CHAPTER I.

GENERAL OBSERVATIONS.

	PAGE.
Changes in per capita at various institutions.....	17
Hospital for inebriates	17
Expenses of care and investigation of insane. When paid by state.....	18
Punishing persons bringing opium, etc., into penitentiaries.....	18
Assistant deputy warden.....	18
Turnkeys and guards.....	18
Expenses of persons from abroad reading papers at conferences.....	18
Unclaimed moneys at institutions. How disposed of.	18
Gate money to be used to purchase books.....	18
Payment of expenses incurred in the capture of escaped patients	18
Appointment of state agent.....	18
Tuberculosis, report on.....	18
Disposition of state property at the Louisiana Purchase Exposition.....	18
Member Robinson becomes chairman.....	18
Appointments of chief executive officers.....	18
Designation of institutions to receive children.....	19
Visits to institutions.....	19
Fixing of salaries.....	19
Investigating books and accounts of educational institutions.....	20
Biennial estimates	20
Report of state agent.....	20
Statistics.....	20
Quarterly conferences.....	20
Land owned and its value.....	22
Movement of population.....	23
Income of institutions	24
Expenditures during period	24
Expenses of Board of Control.	26

CHAPTER II.

OUR STATE FARMS AND GARDENS.

Drainage.....	27
Fences	27
Live Stock.....	27
Barns.....	28
Poultry.....	28
Farm produce.....	28
Hauling coal.....	29
Land.....	30

CHAPTER III.

WATER SUPPLY.

Cherokee wells and cisterns	33
Eldora.....	34
Ft. Madison.....	35

Glenwood, additional water supply needed.....	35
Independence, deep well needed.....	36
Knoxville, water supply needed.....	37

CHAPTER IV.

FIRE PROTECTION AND LOSSES BY FIRE AND STORMS.

Anamosa.....	38
Clarinda.....	38
Council Bluffs.....	38
Davenport.....	39
Eldora.....	39
Ft. Madison.....	39
Glenwood.....	39
Independence.....	40
Knoxville.....	41
Marshalltown.....	41
Mitchellville.....	42
Mt. Pleasant.....	42
Recapitulation.....	43
Losses by fire and storms.....	43

CHAPTER V.

THE INSANE.

Number of.....	45
Additional accommodations for.....	45
Number in private and county institutions.....	46
Number transferred.....	47

CHAPTER VI.

DEPENDENT, NEGLECTED AND DELINQUENT CHILDREN.

Institutions to have charge of juveniles under the law.....	48
---	----

CHAPTER VII.

STATE AGENT.

Appointment of.....	49
Work of.....	49
Cost of.....	50

CHAPTER VIII.

LEGISLATION RECOMMENDED.

The Insane.....	51
Soldiers' Home.....	52
Industrial School for Boys.....	53

CHAPTER IX.

APPROPRIATIONS.

General.....	58
Soldiers' Orphans' Home.....	58
Soldiers' Home.....	58
College for the Blind.....	59
School for the Deaf.....	59
Industrial School for Boys.....	59
Industrial School for Girls.....	59
Institution for Feeble-Minded Children.....	60
Mt. Pleasant State Hospital.....	60
Independence State Hospital.....	60
Clarinda State Hospital.....	61
Cherokee State Hospital.....	61

CONTENTS.

State Hospital for Inebriates.....	61
Penitentiary at Ft. Madison.....	62
Penitentiary at Anamosa.....	62
Summary.....	62

CHAPTER X.

OBSERVATIONS RESPECTING INSTITUTIONS.

Changes in population.....	63
Additional room needed at the hospitals.....	64
Soldiers' Home—	
Purchase of land.....	64
Completion of Improvements.....	65
Fire escapes.....	65
Soldiers' Orphans' Home—	
Purchase of land.....	65
Completion of improvements.....	65
Duck Creek.....	66
College for the Blind—	
Paving and other improvements.....	67
Fire escapes.....	67
School for the Deaf—	
The new plant.....	67
Repairs made.....	68
Industrial School for Boys—	
Land purchased.....	69
Improvement made.....	69
Fire escapes.....	69
Industrial school for Girls—	
Fire equipment purchased.....	69
Ice house.....	69
Institution for Feeble-Minded Children—	
Land Purchased.....	70
Improvements made.....	69
Fire equipment.....	70
Mt. Pleasant State Hospital—	
Improvements made.....	70
Tunnels.....	71
Independence State Hospital—	
Land purchased.....	72
Improvements made.....	72
Fire escapes.....	72
Drainage.....	72
Clarinda State Hospital—	
Tiling.....	73
New cottage.....	72
Tunnel.....	73
Cherokee State Hospital—	
Land purchased.....	73
New cottage.....	73
Improving water supply.....	73
Other improvements.....	74
Penitentiary at Ft. Madison—	
New hospital building.....	74
Improvements made.....	74
Penitentiary at Anamosa—	
Purchase of land.....	75
New cell house.....	75
Cold storage building.....	75
State Hospital for Inebriates—	

CHAPTER XI.

VISITATIONS TO INSTITUTIONS.

When and by whom made.....	78
----------------------------	----

CHAPTER XII.

SALARIES AND WAGES PAID, AND POSITIONS HELD BY THE OFFICERS AND EMPLOYES OF THE BOARD OF CONTROL AND BY THE OFFICERS AND EMPLOYES OF THE SEVERAL INSTITUTIONS SUBJECT TO ITS CONTROL AS SHOWN BY THE PAY ROLL FOR JUNE 1905.

CHAPTER XIII.

THE EDUCATIONAL INSTITUTIONS.

State Normal School.....	105
College of Agriculture and Mechanic Arts	106
State University.....	107

CHAPTER XIV.

DISPOSITION OF STATE PROPERTY USED AT LOUISIANA PURCHASE EXPOSITION.

Action of the Board.....	109
Property delivered to the Board.....	109
Disposition of the property.....	110
Value of property sold.....	113
Disbursements.....	121
Wages and expenses of employes.....	123
Estimated value of property.....	124
Summary.....	124

PART II.

STATISTICS OF INSTITUTIONAL POPULATION AND FINANCE.

We present in Part II of this report statistical tables prepared under our direction by F. I. Herriott, Ph. D., Professor of Economics and Political Science in Drake University at Des Moines, Iowa.

DIVISION I—INSTITUTIONAL POPULATION.

PART 1.

CHAPTER I.

GENERAL OBSERVATIONS.

In pursuance of the recommendations made in our last biennial report the Thirtieth General Assembly enacted statutes relating to the institutions under our control as hereinafter set forth:

SOLDIER'S ORPHANS' HOME.

Amending section 2691 of the Code increasing the monthly per capita support from ten dollars to twelve dollars per month. Also repealing section 2692 of the Supplement to the Code and enacting in lieu thereof a provision making counties liable for sums paid by the home for the support of all of their children, other than the children of soldiers, to the extent of six dollars (\$6.00) per month. The sum in excess of said six dollars (\$6.00) per month to be paid by the state. Laws of 1904, Chapter 106.

COLLEGE FOR THE BLIND.

Providing for increasing the fees for non-resident pupils from fifty-five to sixty-six dollars per quarter. Laws of 1904, Chapter 107.

SCHOOL FOR THE DEAF.

Providing for increasing the fees for non-resident pupils from forty to sixty-six dollars per quarter. Laws of 1904, Chapter 108.

INDUSTRIAL SCHOOL FOR GIRLS.

Increasing the per capita allowance for support from twelve to thirteen dollars per month. Laws of 1904, Chapter 143.

HOSPITAL FOR INEBRIATES.

Establishing a State Hospital for Inebriates and providing for its erection, equipment and operation. Laws of 1904, Chapter 80.

STATE HOSPITALS.

Authorizing the payment in certain cases by the state of expenses which arise from the care and investigation of the insane. Laws of 1904, Chapter 78.

PENITENTIARIES.

Providing for punishing persons who bring into the state penitentiaries and other institutions mentioned, opium, morphine, cocaine, or other narcotics or intoxicating liquors, or any fire arm, weapon, explosive, or rope, ladder or other device to escape with. Laws of 1904, Chapter 134.

Providing for Assistant Deputy Wardens and fixing their compensation. Laws of 1904 Chapter 139.

Providing for the Classification of Turnkeys and Guards and fixing their compensation, Laws of 1904, Chapter 141.

GENERAL.

Authorizing this Board to procure plans, specifications and drawings from architects other than the state architect. Laws of 1904, Chapter 109.

Making an annual appropriation to pay the expenses of persons from abroad who may read papers at the quarterly meetings of the Board and Superintendents. Laws of 1904, Chapter III.

OTHER AMENDMENTS TO THE LAWS.

The Thirtieth General Assembly also provided for the disposition of unclaimed monies left by persons who had been inmates of the several state institutions. Laws of 1904, Chapter 112.

It also authorized this Board to use a certain portion of the gate money received at the penitentiaries for the purchase of books for other institutions. Laws of 1904, Chapter 140.

It also provided for payment by the state of expenses incurred in the capture and return of patients who escape from state hospitals. Laws of 1904, Chapter 79.

It also authorized the appointment of a state agent to look after the placing of children paroled from the Soldiers' Orphans' Home and the Industrial schools. Laws of 1904, Chapter 157.

It also instructed this board to investigate and report as to the extent of tuberculosis in Iowa and the best means of its prevention. Laws of 1904, Chapter 162.

It also provided for the disposition of the property of the state at the Louisiana Purchase Exposition. Laws of 1904, Chapter 165.

On April 6, 1904, Member Robinson became Chairman of the board in pursuance of provisions of the statute.

The following appointments of chief executive officers have been made during the biennial period.

APPOINTMENTS.

Institution.	Name.	Date of Appointment.	Term of Office.
Industrial school for Girls.....	F. P. Fitzgerald	March 17, '04	Four years from Apr. 1, 1904.
Penitentiary, Ft. Madison	N. N. Jones	March 19, '04	Four years from Apr. 1, 1904.
" Anamosa.	Wm. A. Hunter.	March 19, '04	Four years from Apr. 1, 1904.
Soldiers' Orphans' Home.....	F. J. Sessions...	June 4, '04....	Four years from July 1st, 1904.
" " "	" "	June 8, '04 ..	From June 8th, '04 to June 30, 1904.
Industrial School for Boys.	L. D. Drake	June 4, '04. :	Four years from July 1, 1904.
Mt. Pleasant State Hospital	C. F. Applegate, M. D	May 16, '05....	Four years from July 1, 1905.
State Hospital for Inebriates.....	O. C. Willhite, M. D	June 15, '05 ..	Date of beginning to be hereafter fixed.

On July 22, 1904, Miss Clare Lunbeck was appointed to the position of State Agent.

August 6, 1904, the Iowa Children's Home Society of Des Moines was designated to receive and have charge of such dependent and neglected children as might be sent to it in pursuance of Chapter 11 Acts of the Thirtieth General Assembly.

March 4, 1905, under the provisions of the same chapter the Industrial School for Boys was designated to receive delinquent male children and the Industrial School for Girls delinquent female children and the Soldier's Orphans' Home to receive normal dependant children and the Institution for Feeble-Minded Children to receive dependent and neglected children who may be feeble minded.

The system of keeping financial and store accounts has been further simplified during the period and the work of the storekeepers continues to show improvement and increased efficiency.

The number of visits made during the period by members of the board has increased over the preceding period, the many new buildings and improvements made frequent inspection desirable. A statement of the visits made and by whom made appears in Chapter XI of this report. The observations and conclusions of the board respecting the several institutions and their inmates, as required by law, will be found in Chapter X of this report.

The law requiring this board, subject to the approval of the governor, to fix the salaries of the officers and employes of the

several institutions under our control, has been complied with and in Chapter XII herein will be found the names, occupation and monthly salary allowed them, as well as of all officers and employes of this board.

The books and accounts of the Educational Institutions have been examined as required by law and the report thereof will be found in Chapter XIII hereof.

Farm and garden products are discussed in Chapter II.

The matter of water supply is considered in Chapter III.

Losses by fire and fire escapes are discussed in Chapter IV.

The Insane are discussed in Chapter V.

Dependent, neglected and delinquent children are considered in Chapter VI.

The biennial estimates of the several sums needed for all of the institutions under our control and suggestions respecting needed legislation, are set forth in Chapters VIII and IX respectively.

The work of the State Agent will be found discussed in Chapter VII.

The disposition of State property of the Louisiana Purchase Exposition is considered in Chapter XIV.

The statistical tables for this report have been prepared and compiled under the direction of the Board by Prof. Frank I. Herriott Ph. D., Professor of Economics and Political Science in Drake University.

The report of this Board on the matter of Tuberculosis in the State and the best means for its prevention and cure will be submitted to the General Assembly as directed by law.

The Conferences required by law to be held each quarter by the Superintendents and the Board of Control have been a source of great profit to the several Chief Executive officers and to each member of this Board. During the period the following persons from abroad have attended and read papers at some one of these Conferences, viz:

Col. James Compton, Commandant Minnesota Soldiers' Home.

A. H. Graham, Superintendent Indiana Soldiers' and Sailors' Orphans' Home.

W. M. Edwards, M. D., Superintendent Michigan Asylum for the Insane.

G. L. Smead, Superintendent Ohio State School for the Blind.

Mrs. Ophelia M. Amigh, Superintendent Illinois Training School for Girls.

We have continued the publication of the *Bulletin* and it is in constant demand.

The laboratories of the State Hospitals and of the Institution for Feeble Minded Children are all in successful operation.

Since our last report the new laboratory building at the Cherokee State Hospital has been fully equipped.

The several training schools have enjoyed a successful biennial period and are doing excellent work.

The system of purchasing supplies remains unchanged.

During the period we have been visited by a member-elect of the State Board of Control of Washington and by all of the members of the recently appointed Board of Control of Kansas.

During the period Member Kinne attended the meeting of the National Prison Association held at Louisville, Ky., in October, 1903, and the meeting of the National Conference of Charities and Correction held at Portland, Maine, in June, 1904. Member Robinson attended the meeting of the National Prison Association held at Quincy, Ill., in October, 1904.

At the close of the biennial period June 30th, 1905, there was in the State Treasury to the credit of the support fund of the several institutions the sum of \$122,924.54, and there is at this writing, September 30th, 1905, a balance of \$127,923.80 in the treasury to their credit. This balance will all be required to carry the institutions through the coming winter when the monthly per capita will not be sufficient to meet all needful expenditures.

From the annual inventories returned to this office by the Chief Executive officers, the following table has been prepared showing the number of acres of land owned by the state at each institution, the value of the personal property and of the buildings at each institution.

SUMMARY OF INVENTORIES OF PROPERTY JUNE 30, 1905.

Institutions.	Location.	Lands.		Buildings, value.	Live stock, value.	Personal property, value.	Total value.
		Acres.	Value.				
Soldiers' Home	Marshalltown	150	\$ 33,600.00	\$ 282,261.21	\$ 2,390.00	\$ 54,315.56	\$ 372,566.77
Soldiers' Orphans' Home	Davenport	298†	47,525.00	159,862.50	4,875.00	108,763.36	321,025.86
College for the Blind	Vinton	41	6,250.00	159,000.00	840.58	28,475.66	194,566.24

Hospital for Inebriates	Cherokee	33	218	235	18
Penitentiary	Ft. Madison	470	584	495	559
Penitentiary	Anamosa	411	163	201	373
Totals		7,069	5,431	4,967	7,539

* The number absent on parole or absent escaped at the beginning or at the end of the period and those discharged while thus absent are not separately shown above because the methods of reporting the returns are not uniform.
+ Those absent on parole or absent escaped are here considered among the discharges.
§ The population of the institution is for the most part dismissed for the summer vacation at this time.

The income of the institutions under our control for support is derived from monthly per capita allowances from the State Treasury and from the proceeds of sales of products of the farms, gardens and shops.

The income for improvements and betterments and for other special purposes is derived from special appropriations made by the Legislature.

The maximum per capita allowances for support from the State Treasury based upon the average monthly number of inmates per month are as follows:

	Per month
Soldiers Orphans' Home	\$ 12.00
Soldiers' Home	14.00
and additional per capita per month for each civilian employed, of ..	10.00
School for the Deaf	22.00
College for the Blind	22.00
Industrial School for Boys	10.00
Industrial School for Girls	13.00
Institution for Feeble Minded Children	12.00
Mt. Pleasant State Hospital	12.00
Independence State Hospital	12.00
Clarinda State Hospital	12.00
Cherokee State Hospital	14.00
State Penitentiary at Ft. Madison	9.00
State Penitentiary at Anamosa	9.50

There has been expended for all of the institutions under our control during the biennial period ending June 30th, 1905, the sum of \$3,426,549.05. Of this amount \$871,626.99 was paid for new buildings, extraordinary repairs, equipment, land, transportation and miscellaneous, and \$2,554,922.06 were for support as appears from the following table:

EXPENDITURES FOR SUPPORT.

Names and Location of Institutions.	Biennial Period Ending June 30th			
	1899.	1901.	1903.	1905.
	Amount.	Per capita	Amount.	Per capita

Total	\$ 2,114,619.75	...	\$ 2,167,906.07	...
			\$ 2,338,439.54	\$ 2,555,922.06

* Covers but a portion of the period.

† The sums given for the hospitals for inebriates represent only a portion of the true cost of the inebriate population as the main portion of the expense of supervision is paid out of the funds allowed the officers of the state hospitals.

This table shows the amount expended out of the general support fund during the biennial period, and the per capita expenses during such period, so far as they relate to the support fund.

The number of persons regularly employed in the office of the Board, exclusive of the members of the Board, the Secretary and the Architect, was in June 30th, 1903, nine, and the aggregate of their monthly salaries was \$598.33.

On June 30, 1905, the number was eight, and the aggregate of their monthly salaries was \$588.33. In neither case do we include the State Agent, nor the Statistician or others who are required temporarily.

CHAPTER II

OUR STATE FARMS AND GARDENS

A marked improvement in the care and management of our state farms has resulted during the last biennial period, and it can now be truthfully said that they were never in better condition than at present.

The excessive rainfall of the last two years during the growing season has proved the value of the appropriations made by the last General Assembly for tile drainage, several miles of tile having been laid at the state hospitals, the greater part of the work having been done by the patients, to the mutual advantage of themselves and the state. But there is still a large amount of tile drainage required to secure the best results from our farms, not only in seasons of excessive moisture, but also in dry seasons, it having been demonstrated long since that thorough drainage proves of value in the driest seasons as well as in seasons of extreme rainfall.

New fences of good materials and well constructed, posts firmly set on a straight line, end posts securely braced, and wires evenly spaced, and drawn taut, are fast taking the place of the crooked, dilapidated fences with their loose-hanging wires, that have so long been a disgrace to our state farms.

New and well-planned hog houses and feeding floors are being erected, to take the place of the old sheds, formerly the only shelter provided for one of the most valuable animals on the farm, and the success attending our efforts in the betterment of the condition of the hog is abundantly attested by the large number of hogs that have been successfully raised.

The weights secured in our herds have been especially gratifying; in one instance the entire lot, at ten months to twelve months old, averaging when slaughtered one pound, dressed, for each day from birth to date of slaughter.

On June 30, 1905, we had at the several state institutions 4,165 hogs, all thrifty, in good condition and gaining rapidly in

weight, the food consisting largely of refuse from the kitchens, supplemented by good pasture.

We now have at all our institutions good barns, but not of sufficient capacity for our cows, of which there were June 30, 1905, 698 head, and 105 heifers one to two years old. The value of milk as an article of diet, especially in institutions such as ours, is so well known that no argument is required in urging the necessity of the purchase of more land at a number of institutions that larger herds of cows may be kept, and more milk furnished the inmates.

The raising of poultry that had been formerly neglected is now receiving the most careful attention; new buildings and yards have been erected, and there has been an increase in the biennial period, in addition to the requirements for use, of 1,085 chickens and 436 ducks. Pigeons have increased from 400 to 3,000, and, with the young chickens, prove a valuable addition to the diet for the sick and convalescent.

All farm products that can be utilized in the institutions, garden vegetables and fruits, are being extensively raised.

The following table shows the amounts of the different articles produced at the institutions under our control for the biennial period ending June 30, 1905:

Apples.....	5,045 bus.	Lettuce.....	6,388 bus.
Asparagus.....	20,799 lbs.	Milk.....	653,697 gals.
Butter.....	15,455 lbs.	Mutton.....	1,476 lbs.
Beef.....	51,321 lbs.	Cats.....	16,129 bus.
Beans, string.....	1,686 bus.	Onions, green.....	38,883 doz.
Beans.....	2,910 bus.	Onions.....	10,956 bus.
Beets.....	12,630 bus.	Peas.....	2,357 bus.
Blackberries.....	17,221 qts.	Pumpkins.....	32 bus.
Blueberries.....	6 qts.	Potatoes, Irish.....	106,064 bus.
Buckwheat.....	197 bus.	Potatoes, sweet.....	1,944 bus.
Cabbage.....	217,763 bus.	Peppers.....	161 bus.
Cherries.....	14,002 qts.	Parsley.....	17 bus.
Chickens.....	2,711 lbs.	Peaches.....	59 bus.
Corn, field.....	53,068 bus.	Pumpkins.....	16,603 only
Corn, sweet.....	15,636 bus.	Parsnips.....	5,171 bus.
Corn, pop.....	28 bus.	Pears.....	3 bus.
Corn, broom.....	11,560 lbs.	Pickles.....	8,336 gals.
Corn fodder.....	1,593 tons.	Pork.....	384,253 lbs.
Cucumbers.....	2,534 bus.	Radishes.....	2,788 bus.
Cantaloupes.....	16,873 only	Rhubarb.....	105,921 lbs.
Carrots.....	3,864 bus.	Raspberries.....	12,622 qts.
Currents.....	2,419 qts.	Rye.....	390 bus.
Cauliflower.....	11,351 lbs.	Rutabagas.....	8 tons
Celery.....	8,490 bchs.	Savory.....	95 lbs.
Cider.....	305 gals.	Squash.....	24,323 only
Eggs.....	8,428 doz.	Strawberries.....	72,696 qts.
Egg plant.....	127 bus.	Spinach.....	1,679 bus.
Gooseberries.....	4,603 qts.	Sage.....	847 lbs.
Grapes.....	98,501 lbs.	Straw.....	286 tons
Greens.....	232 bus.	Salsify.....	11,106 lbs.
Hay.....	4,655 tons	Squash.....	29 doz.
Horseradish.....	16,470 lbs.	Tomatoes.....	9,102 bus.
Kraut, sauer.....	12,291 gals.	Turnips.....	8,034 bus.
Kale.....	200 lbs.	Timothy seed.....	353 bus.
Lard.....	149,594 lbs.	Watermelons.....	12,638 only

From the foregoing table it is seen that the results obtained on the farms, gardens and orchards are particularly gratifying, and the luxury of an abundant supply of fresh vegetables and fruit, produced by our own people on our land, without expense to the taxpayers of the state, is surely deserving of the highest commendation.

While the last two years have been rather unfavorable for the best results in agriculture on account of excessive moisture and low temperature, still the crops secured on our state farms have demonstrated that excellent results can be obtained, even with the most adverse conditions, when proper attention is given to all the details of farm work. No loss has occurred on account of poor seed corn at our state farms, our seed corn being carefully saved in the early autumn and an excellent stand secured by one planting.

Owing to the lack of switching facilities at the greater number of our state institutions it is necessary to haul all the coal required on wagons from the stations, which adds greatly to the labor required from the horses and mules. The colder and more inclement the weather the greater is the necessity for additional fuel, and at some of our institutions thirty to forty tons of coal being used daily during the winter, necessitates the hauling of coal every working day, regardless of the condition of the weather or of the roads. To say nothing in regard to the exposure of the men doing this work, it is readily apparent that horses compelled to draw the heaviest loads during the winter and spring months are in no condition to enter upon farm work, being worn out and exhausted at a time when all their strength is required to enable them to stand the hard work necessary in putting in the crops. It is certainly poor economy to use horses in hauling coal, when by the installing of a switch at each institution, as has been done at Anamosa, Clarinda, Davenport and Knoxville, all that would be required would be to shovel the coal direct from the cars to the coal shed. To wear out horses and wagons doing work that could be done by a railway company at a merely nominal expense is a condition that should not continue, and we trust that the next General Assembly will make such provision as will relieve both men and horses of this greatest of all drawbacks we have to contend with in the successful operation of our state farms.

The following table shows the number of horses, mules and other live stock on the state farms June 30, 1905:

325783

STATE LIBRARY COMMISSION OF IOWA

Historical Building

DES MOINES, IOWA 50139

	Number.	Value.
Horses	176	\$ 19,708.38
Mules	45	5,270.00
Bulls	16	1,115.00
Cows	698	25,107.50
Heifers	105	2,222.50
Calves	95	505.00
Hogs	4,165	25,134.00
Sheep	72	190.00
Chickens	3,639	1,027.48
Ducks	683	176.55
Geese	50	48.00
Turkeys	14	5.80
Pigeons	3,000	360.00
Hares	50	12.50
Total value,		\$ 81,182.71

That more cows and hogs could be kept with profit to the state does not admit of any question, but our farms are now stocked to the limit, and before our herds are enlarged to keep pace with the increase in population from year to year, it is necessary that more land should be secured. No doubt when the institutions were established it was considered that the land purchased would be ample for all requirements, but no one could then have foretold the large number of people that it would be necessary to provide for, and as we look back we are surprised that a larger acreage in land was not secured when it could have been purchased at a few dollars per acre. And in future years those who come after us will in like manner wonder why we did not provide more land at prices now current, for there is little doubt that the increase in value has not yet stopped, but will continue in the future as it has in the past.

With an aggregate of over nine thousand people, including inmates, officers and employes, supported in our state institutions and only 6,651 acres of land, it is readily apparent to those acquainted with the conditions as they exist that the state could make no better investment, both for present and future needs, than to secure sufficient land to insure an abundant supply of all farm and garden products for the use of the wards of the state. Especially is this true when it is considered that after the purchase is made there are no taxes to pay, and the labor being largely performed by the inmates of the institution, there is practically no outlay, the entire product being credited to the profit account.

The following table shows the number of inmates, officers and employees, and the number of acres of land owned by the state at the institutions named:

Institutions.	Location.	No. of inmates.	No. of officers and employees.	Total	No. of acres of land.
Soldiers' Orphans' Home	Davenport	469	73	542	298
Soldiers' Home	Marshalltown	702	113	815	150
College for the Blind	Vinton	152	45	197	41
School for the Deaf	Council Bluffs	234	61	295	165
Institution for Feeble-Minded Children	Glenwood	1,001	173	1,174	598
Industrial School for Boys	Eldora	441	48	489	840
Industrial School for Girls	Mitchellville	209	29	238	175
State Hospital	Mt Pleasant	1,050	155	1,205	911
State Hospital	Independence	1,049	166	1,215	1,228
State Hospital	Clarinda	930	164	1,094	859
State Hospital	Cherokee	732	123	855	950
*State Penitentiary	Anamosa	380	66	446	257
State Penitentiary	Ft Madison	567	73	640	16
Totals	7,916	1,289	9,205	6,651
*State Hospital for Inebriates	Knoxville				163

From the foregoing table it is seen that there is an average of less than three-fourths of an acre of land for each person at our state institutions, and when the proper deductions are made for lawns, groves, timber lots, yards and ground occupied by buildings, it is readily seen that there is not to exceed one-half acre for each person, which is altogether inadequate to supply the necessary farm, dairy and garden products, and allow the proper rotation of crops, so essential to success in agriculture.

In many of the institutions in other states two acres per capita has been provided, this amount being considered necessary by those who have given the matter that attention its importance demands. If this condition were required in our state, instead of having 6,651 acres of land, we would have 18,410 acres for the present population, to say nothing of the steady increase that is sure to follow each succeeding year.

For present use the institutions at Anamosa, Davenport and Marshalltown are fairly well provided for, but the institutions at Clarinda, Cherokee, Council Bluffs, Fort Madison, Glenwood, Mount Pleasant, Eldora, Mitchellville, Vinton and Knoxville all need more land, and it will never be secured at a lower price than at present. At the Fort Madison penitentiary the state does not own any land for cultivation, and not a potato or even an onion can be raised, but all must be purchased. At the college for the blind at Vinton the few acres owned by the state have been used for pasture so long that the grass gave way to noxious weeds, necessitating the plowing of the ground and putting it in crop the present year, with the result that we have

been without pasture for our cows all summer, but have raised sufficient potatoes to supply the institution for a year. At Knoxville 113.73 acres have been bought, making in all 163.73 acres, but more is needed to furnish employment to the inmates and insure a supply of farm and garden products sufficient for the wants of the institution.

There is still a number of old and worn-out horses at our state institutions, many of them prematurely aged, on account of heavy work hauling coal in all kinds of weather, and it is necessary to replace them with young and strong animals for which appropriations are necessary.

There is also need of more new vehicles and modern farm machines, implements and tools to enable us to secure the best results from our farms, gardens and orchards, it being our ambition to make the farms in connection with our institutions the best in the state, models in every respect, worthy of emulation by the best farmers in Iowa.

CHAPTER III.

WATER SUPPLY.

Some account of storage reservoirs and machinery and other appliances for obtaining and using water for fire purposes will be found in the chapter on Fire Protection and Losses by Fire and Storms. The supplies of water are substantially the same that they were two years ago at all the state institutions under our control, except as otherwise stated, as follows:

CHEROKEE.

Well No. 1 of the Cherokee State Hospital is 1,120 feet deep and yields an abundant supply of water, but the water contains elements which are very destructive to plumbing and render the water objectionable for steam and laundry purposes. Well No. 2 was drilled to a depth of 343 feet, but when our last report was filed the water could not be used on account of fine sand or sediment which the water held in suspension and which filled flush and other tanks when it was used, and injured the service pumps, and stopped the well pump so frequently that the use of the well was suspended. That was the condition of the well when the last General Assembly made an appropriation for improving the water supply. We made continuous efforts to find some means of separating the sediment from the water of well No. 2 and finally authorized the letting of a contract to Layne & Basye, of Rock Rapids, Iowa, to so change the bottom of the well and to use such devices as would make the water available without the sediment. The contractor agreed to so change the well and to furnish it with such apparatus that it would yield not less than 70,000 gallons of water every twenty-four hours which should be free from mud, sand, silt or other sediment that would clog mains, pipes or flush tanks or stop or injure any pump, and that this quantity and quality of water should be furnished continuously for one year from the final test of performance. In case the yield should be 100,000 gallons of water in 24 hours the contractor was to re-

ceive \$3,000, or if but 70,000 gallons in 24 hours \$2,000, and nothing if the quantity was less than that last named, or if the quality was not that required by the contract. The contractor was allowed freight on machinery, the hospital hauled it from and to the depot, and water, steam and board for some men were furnished by the hospital. The well was completed and tested in August, 1904, and more than 110,000 gallons of water were pumped therefrom in 24 hours of continuous pumping. The water is free from sediment, and of excellent quality and except for a short time there has been no change in quality or diminution of the quantity obtainable. For a brief time some weeks after the well had been pronounced completed the water was riley, but a defect was discovered and remedied and since that time the well has been satisfactory.

Believing, however, that the hospital should have in reserve a better water supply than that furnished by well No. 1, we authorized a contract with Layne & Basye for a second well twelve inches in diameter to be drilled and completed by the contractor, with conditions similar to those which applied to well No. 2. In case the well is satisfactory in all respects and furnishes more than 75,000 gallons, but less than 100,000 gallons of water in twenty-four hours, the contractor is to receive \$3,500.00, and \$4,000.00 if it furnish 100,000 gallons or more in the time specified. If the quality of the water is not as required, or if the quantity obtainable be less than 75,000 gallons daily, nothing is to be paid except the hauling of machinery from and to the depot, steam, water, board for men and some allowance for freight. Work on the well has been prosecuted since April, 1905, and there is reason to believe that it will be completed within a few months and prove to be as satisfactory as well No. 2.

Two cisterns for soft water, each with a capacity of 100,000 gallons, have been constructed and are being connected with the down spouts, and a pump will be provided and connections made with the boilers and laundry.

ELDORA.

Until recently the water supply of the Industrial School for Boys was obtained from a single well 65 feet deep. During the last year a well was drilled to a depth of 250 feet. This is cased from the top to a depth of 100 feet with 12-inch standard wrought iron pipe and for 20 feet below that point with 9-inch

pipe. From the bottom of the pipe to a depth of 200 feet the well is from $8\frac{1}{8}$ to $8\frac{1}{2}$ inches in diameter. Below that depth it is 4 inches in diameter without casing. The well is furnished with a Downie double acting pump and has a capacity of 70,000 gallons of water each day. The quality of the water is superior to that furnished by the old well and excellent for most purposes. Its effect on boilers has not yet been fully determined. A new pump was also installed in the first well in lieu of the old pump which was nearly worn out. The supply of water is now good and believed to be sufficient for all purposes.

FT. MADISON.

The construction of the new prison wall and the consequent enlargement and grading of the prison yard made it necessary to abandon the old well and provide new sources of water supply. Four new wells, one of 4 inches and three of three inches in diameter, have been drilled in the southwest part of the prison yard to a depth of 100 feet, a reservoir with a capacity of 15,000 gallons to receive the water as it flows from the wells has been constructed and a new air lift to replace the old one which was much worn has been installed. The prison now has the new air lift in service and the old one in reserve. The combined capacity of the wells is 30,000 gallons of water each hour. The water is of excellent quality.

GLENWOOD.

The great need of the institution for Feeble-Minded Children is an adequate supply of pure water. The present supply is obtained from a deep well, from a shallow surface well and from Keg Creek. The shallow well can furnish but a few thousand gallons of water daily, the deep well has a capacity of 80,000 gallons of water or more each day when in a perfect condition and when the pump is working well, but it often happens that the quantity of water obtained from this well is small, and at best it does not supply the needs of the institution. At this time it is subject to frequent clogging and stoppage from an inflow of sediment which we have not been able to control. Hence it is necessary to depend at all times upon water from Keg Creek for a large part of the quantity consumed. That creek flows through the city of Glenwood and is liable to contamination at all times and immediately after rains carries much sediment and is unfit for most uses for which it is needed.

A large addition to the water supply of the institution is an absolute necessity. Two methods of supplying the needed water have been advocated. One is to sink a second deep well at the site of the new power plant. The well would probably have to be drilled to a depth of 2,000 feet, and the cost of the well, pump house, pump and connections would be approximately \$13,000.00, and reservoirs and fire pump in addition would be required. The second method is the purchase of land in the Missouri River bottom nearly three miles distant from the institution, the sinking of shallow wells in it, the construction of a pump house and power plant and the installation of pumps and the laying of a water main from the pumps to a connection with the existing water system of the institution. The entire cost of the improvements in the water supply and fire protection, including machinery and reservoirs, would be about \$20,000.00 for the first method and about \$50,000.00 for the second. The superintendent of the institution recommends the second method.

INDEPENDENCE.

Nearly all the water used by the Independence State Hospital is supplied by the city of Independence. The cost for the last biennial period was \$4,217.08. The water is obtained from shallow wells which are supplied from the Wapsipinicon River. In case of fire, and sometimes in case of repairs, water is pumped from the river into the mains and is then often muddy and unfit for the use of the hospital. It is believed that the epidemics of typhoid fever, from which the institution has suffered in recent years, were caused by this water, and water for drinking purposes is still obtained with much labor from wells in the vicinity of the hospital. During last summer the supply furnished by the city was so small at one time that the storage reservoirs were nearly exhausted, and the institution was without adequate fire protection and on the verge of a water famine. We are of the opinion that the institution should have its own water supply. According to the statements of geologists this can probably be obtained at a depth not exceeding 1,600 feet. The probable cost of a well of that depth with pump house, pump and connections, is about \$12,000.00, and we recommend an appropriation of that amount to increase the water supply of the institution.

KNOXVILLE.

The hospital for Inebriates will have two sources of water supply when it opens. The first is a well 3 feet in diameter and 30 feet deep from which the water is raised by a hand pump. The second is connection with the water system of the city of Knoxville. The city water is taken from Whitebreast Creek, a small stream west of the city, and pumped thence some two miles and a half through a 6-inch main to a large open reservoir in which it is sometimes permitted to remain for months in hot weather. The hospital is connected with this main at a point about two miles from the creek, but at times when no water is being pumped from the creek the water is supplied from the reservoir. The water is probably good for boilers, but is unfit for drinking and other domestic uses. When the mains and machinery are in good order the city can furnish a sufficient quantity of water for hospital purposes, but it relies wholly upon one pump and one boiler at the creek, and both are old and cannot be relied upon to furnish the large daily supply of water the hospital will need. Moreover the city demands 15 cents per thousand gallons for all water it furnishes. In view of these facts we are of the opinion that the hospital should be provided with its own water supply, with storage reservoirs and the machinery needed to make the water available for all purposes.

CHAPTER IV.

FIRE PROTECTION AND LOSSES BY FIRE AND STORMS.

FIRE PROTECTION.

The matter of fire protection has received much attention since our last biennial was filed, and important additions have been made to the means of preventing and extinguishing fires, and to escaping from them. A more particular statement, setting out these additions, is as follows:

ANAMOSA.

The Penitentiary at Anamosa has added to its fire equipment 400 feet of 2½-inch fire hose, one fire hydrant and four fire extinguishers. The fire equipment is now satisfactory.

CHEROKEE STATE HOSPITAL.

Twelve hundred six feet of 6-inch and 864 feet of 4-inch fire mains have been laid, five fire hydrants have been set, 2800 feet of 1-inch hose with suitable appurtenances have been placed in wards and other places where additional fire protection was needed, and 16 fire extinguishers have been procured. Two soft water cisterns with a combined capacity of 200,000 gallons are practically completed and will be connected with the fire system. Some additional hose and a second hose cart are to be added. A fire station for the protection of ladder-truck, ladders, hose carts and hose is urgently needed.

CLARINDA STATE HOSPITAL.

This institution has added 318 feet of 6-inch, and 51 feet of 4-inch water mains, one fire hydrant and 16 fire extinguishers to its system for fire protection, and it is now in satisfactory condition.

COUNCIL BLUFFS.

The additions to the fire equipment of the School for the Deaf were small. They consist chiefly of 200 feet of 2-inch rubber hose and 24 fire extinguishers. Additional hose and storage cisterns are needed.

DAVENPORT.

The Soldiers' Orphans' Home has added 9 fire extinguishers to its equipment. It needs a hose cart and additional fire hose, and a house in which to store them.

ELDORA.

The Thirtieth General Assembly made an appropriation for the improvement of the water system of the Industrial School for Boys. When that was done the water for the institution was pumped into a tank of 50,000 gallons capacity, at an elevation so low that sufficient pressure for fire purposes could not be obtained. The pump and tank were old and liable to break down at any time, and the fire mains did not extend far enough to give protection to all the buildings. To give more adequate fire protection improvements have been made and machinery and other appliances have been supplied as follows:

Two reservoirs having a combined capacity of 200,000 gallons have been constructed, 360 feet of ten-inch and 860 feet of six-inch water mains have been laid, 9 fire hydrants have been added, an Underwriters fire pump with a capacity of 1000 gallons per minute and a service pump with a capacity of 400 gallons per minute have been installed. A hose cart, 600 feet of 2½ inch fire hose, a ladder truck and ladders, and eight fire extinguishers have been procured. Two iron fire escapes have been constructed on the main building. A few hundred feet of additional water mains and some hydrants are needed to complete the water system, a pump house for the old well, and a fire station to protect the fire equipment are also required. When they are added the system of fire protection will be adequate.

FT. MADISON.

The state penitentiary at Ft. Madison has added to its fire equipment the following:

Four wells each 100 feet deep, one 4 inches and three 3 inches in diameter having a combined capacity of 30,000 gallons per hour, 480 feet of 6-inch and 110 feet of 4-inch water mains, 200 feet of 2½-inch fire hose and 16 fire extinguishers. The fire equipment is now sufficient.

GLENWOOD.

During the latter part of last year the suction pipe connecting the pumping station of the Institution for Feeble-Minded Children at Glenwood with Keg Creek, its main source of supply of

water for fire purposes, and with the water system of the city of Glenwood, was found to be badly corroded, to have numerous holes and to be unfit for further use. It was also found that the water mains between the pumping station and water tower and various buildings of the Institution were of wrought iron, old and not of sufficient strength to sustain a heavy fire pressure. The mains were not so laid as to afford adequate protection to all buildings, and the fire hydrants in use were small and with but one hose connection. Steps were taken to remedy the defects as rapidly as possible. Eleven hundred fifty feet of eight-inch suction pipe were laid to Keg Creek and connected with the city mains, about 1200 feet of 8-inch, 2500 feet of 6-inch and 1200 feet of 4-inch heavy cast iron water mains have been laid, and twelve fire hydrants have been installed. There have been procured two hose carts and 500 feet of 2½-inch rubber fire hose, 600 feet of 1-inch hose for the interior of buildings, one ladder truck and ladders, twenty-six hand fire extinguishers and numerous appurtenances. Six fire escapes on the custodial building have been reconstructed. The institution has a large reservoir and a fire pump at its pumping station, but thus far we have been unable to make the reservoir hold more than about four feet of water or an insufficient supply, and the pump is old and worn. Moreover it is on a level about 120 feet lower than the average grade line of most of the buildings of the institution and has not sufficient capacity to give the pressure required at the sites of the buildings for fire purposes, and the tanks in the water tower are too small and not at a sufficient elevation to afford the pressure needed. Water reservoirs should be constructed on a level but little below the level of the average grade line of the institution buildings and connected with the supply pumps and a fire pump which should be installed in the new power plant. Additional water mains, fire hydrants and fire hose are also needed to give the requisite fire protection.

INDEPENDENCE.

The Independence State Hospital has added to its fire equipment the following: Three water reservoirs, having a combined capacity of 300,000 gallons; eight hundred and forty feet of 10-inch cast iron suction pipe; two hundred and twenty-eight feet of 8-inch cast iron water mains; one thousand seven hundred and sixty-four feet of 6-inch cast iron water mains; three fire

hydrants; one Underwriters fire pump, with a capacity of 1,000 gallons per minute; one service pump, with a capacity of 400 gallons per minute; one hose cart; fourteen hundred feet of 1-inch hose with appurtenances; four Kirker-Bender fire escapes.

A few hundred feet of water mains and hydrants are still needed to give satisfactory protection to some of the farm buildings.

KNOXVILLE.

The Hospital for Inebriates must depend for fire protection chiefly upon the city of Knoxville until an adequate fire system is provided. The Hospital now has fire equipment as follows:

One hose cart, 250 feet of 2½-inch fire hose, 300 feet of 1½-inch cotton hose with appurtenances for attaching to stand pipes in buildings, hose reels, and eight fire extinguishers from the St. Louis Exposition. The water system of the Hospital is connected with that of the city by a 4-inch main, and there is but one fire hydrant. That is so located that it might be inaccessible and therefore useless in case of fire in the old main building. The funds subject to our control have not been sufficient to provide adequate fire protection, but we have purchased the hose cart and fire hose and have ordered 144 feet of cast iron water pipe and two fire hydrants and expect to have them in service before the hospital is opened for patients. We are also arranging for a stand pipe and hose in the new power plant. The fire system, when the additions we have authorized are completed, although greatly superior to the system heretofore existing, will be wholly inadequate to furnish the fire protection needed. The 4-inch connection with the city main should be replaced by 6-inch cast iron water pipe, and fire mains should be laid about the buildings in such manner and fire hydrants installed in such places as to furnish two good fire streams for any building liable to burn. These changes and additions would require not less than 2,000 feet of fire mains and eight hydrants.

MARSHALLTOWN.

The fire equipment of the Soldiers' Home has been increased by the addition of the following:

One Underwriters fire pump with a capacity of 1,000 gallons per minute, one service pump with a capacity of 400 gallons per minute, six fire extinguishers, 100 feet of two-inch fire hose,

two iron fire escapes on the main building and one on the women's dormitory, one of wood on the old men's building and three of wood on the old people's building. These escapes are believed to be adequate for the buildings of the Home.

The city water mains which deliver water to the Home are so small and the distance from the pumps so great that even with the help of the new fire pump only one good fire stream can be procured when four or more may be needed. To remedy this defect storage cisterns of a capacity of not less than 200,000 gallons should be furnished as soon as possible. Sixteen hundred feet of 6-inch water mains and additional fire hydrants are needed to furnish all of the buildings with adequate fire protection. A hose cart, 500 feet of fire hose and a suitable hose house should also be added to the equipment.

MITCHELLVILLE.

The Industrial School for Girls has purchased one hose cart, 200 feet of 2½-inch and 600 feet of 1-inch hose, and 12 fire extinguishers. It needs new and larger standpipes in its cottages with suitable hose connections, more fire hose, a hose house and fire escapes for three cottages.

The last General Assembly appropriated \$450 for hose, hose truck and house, but the hose, appurtenances and hose truck cost \$300, and the lowest bid we were able to obtain on the house was nearly equal to the appropriation, hence the house has not been built.

MT. PLEASANT.

The Mt. Pleasant State Hospital has added to its fire equipment since our last report the following:

One cistern with a capacity of 100,000 gallons; three cisterns having an aggregate capacity of 120,000 gallons have been repaired and properly connected; a reservoir having a capacity of 1,500,000 gallons has been connected by means of 1,050 feet of three inch cast iron pipe with the new cistern, and an electric pump installed to make the water available for fire and other purposes. There have also been added:

Two hundred and thirty-five feet of six inch, and 564 feet of four inch cast iron water mains, and 1,368 feet of four inch cast iron mains have been placed in the basement of the main building; 300 feet of two and one-half inch fire hose, and 2,000 feet of one and one-half inch hose have been purchased; also one

hose cart, twenty-four fire extinguishers and a quantity of appurtenances for the apparatus specified.

The fire equipment is now complete.

VINTON.

The College for the Blind has added a Kirker-Bender fire escape to the girls' wing of the building and an iron fire escape to the boys' wing. It has also purchased 150 feet of 1½-inch fire hose.

RECAPITULATION.

The additions to the fire and fire escape systems are as follows:

Eight water reservoirs, total capacity 800,000 gallons; 1,200 feet of ten inch cast iron water pipe; 2,578 feet of eight inch cast iron water pipe; 7,363 feet of six inch cast iron water pipe; 4,157 feet of four inch cast iron water pipe; 1,050 feet of three inch cast iron water pipe; thirty-one fire hydrants; three fire pumps, capacity 1,000 gallons each per minute; three service pumps, capacity 400 gallons each per minute; 2,450 feet of two and one-half inch rubber fire hose; 300 feet of two inch rubber fire hose; 2,150 feet of one and one-half inch rubber fire hose; 5,100 feet of one inch rubber fire hose; 155 three gallon fire extinguishers; eight five gallon fire extinguishers; two hook and ladder trucks and ladders; six hose carts; five Kirker-Bender fire escapes; six iron fire escapes; ten wood fire escapes.

LOSSES.

The value of the property of the state devoted to the uses of its charitable, penal and educational institutions, on the first day of July, A. D., 1903, was as follows:

Subject to loss by fire—	
Buildings, including fixtures	\$6,339,386.86
Personal property	1,187,362.65
Total	\$7,526,749.51
Subject to loss by storms:	
Buildings, including fixtures	\$7,796,392.76
Personal property	1,229,795.23
Total	\$9,026,187.99

The losses during the biennial period ending June 30, 1905, as shown by the table submitted herewith, were:

By fire	\$ 2,150.00
And by lightning	85.00
	\$ 2,235.00

The losses by fire and storms during the preceding period aggregated \$156,262.25. The table referred to shows that the

value of the property of the state devoted to charitable, penal and educational purposes on the 30th day of June, A. D., 1905, subject to loss by fire, was \$8,763,880.53, and subject to loss by storm, \$10,255,348.18. The facts are set out more fully in the following table:

INSANE.

NE 30, 1903. TO JULY 1, 1905.

SUBJECT TO LOSS JUNE 30, 1905.						
T.	BY FIRE.			BY STORM.		
	Buildings and Fixtures.	Personal.	Total.	Buildings and Fixtures.	Personal.	Total.

ing corridors, and the institution, including the new cottage, will have all the patients it can accommodate properly after the inebriates are removed. The increase in the number of insane patients at Cherokee during the last biennial period was 97 and will probably be as great during the current period, therefore it is of

CHAPTER V.

THE INSANE.

The number of the insane of the state who require care and treatment in the state hospitals continues to increase. On the 30th day of June, 1899, our state hospitals contained 2,797 insane; on the day 30th of June, 1901, the number was 3,010; on the 30th day of June, 1903, it was 3,325, and on the 30th day of June, 1905, it was 3,679. It thus appears that the number of insane requiring state care increased 882 during the six years specified. But the increase was not uniform. Thus for the first period specified it was 213, for the second 315 and for the third 354. What the increase will be in the future cannot be foretold with accuracy, but it will probably not be less than in the past, and provision should be made for an increase of not less than 300 in each biennial period. The last General Assembly authorized the construction of two cottages for the insane, one at Cherokee and the other at Clarinda. The one at Cherokee is completed and occupied and the other will be ready for use in a short time. They are alike, and although originally planned for 100 patients, can probably be made to accommodate comfortably 140 each. In addition, the opening of the Hospital for Inebriates, will relieve to some extent three hospitals in which inebriates are now treated. This class numbered 95 on the 30th day of June, 1905, hence the additional room provided by the last General Assembly will accommodate 375 insane patients. But the patients at Cherokee now average more than 750 each month or 150 more than the hospital, exclusive of the cottage, can be made to accommodate satisfactorily. Patients have been crowded into wards and compelled to sleep in connecting corridors, and the institution, including the new cottage, will have all the patients it can accommodate properly after the inebriates are removed. The increase in the number of insane patients at Cherokee during the last biennial period was 97 and will probably be as great during the current period, therefore it is of

great importance that additional room for not less than 100 patients be provided at once. It will be needed before it can be made ready for use.

The Clarinda State Hospital, with the new cottage completed, will have accommodations for about 1,100 patients. During the last biennial period its insane population increased from 905 to 932, although during that time it transferred fifty patients to the Mt. Pleasant State Hospital, one of whom was sent back during the period. The real increase in the number from the Clarinda district was, therefore, 76. The accommodations for male patients are sufficient for the present, but the women's wards are crowded, and additional room is needed for women patients. The Independence State Hospital has accommodations for 1,050 patients in various buildings, not including wards in attics, and can accommodate fifty in these wards. But we consider them undesirable for patients and do not think they should be used unless in case of great need. Hence we believe we are justified in stating that the institution now has proper accommodations for but 1,050 patients. The number of insane it contained on the 30th day of June, 1905, was 1,037, an increase of 116 during the period. It therefore appears to us important to provide at once additional room for not less than 100 patients.

The Mt. Pleasant State Hospital has accommodations for 1,000 patients. The number of insane patients in the institution on the 30th day of June, 1905, was 994, an increase of 114 in the biennial period. However, this number includes fifty who were retransferred from the Clarinda State Hospital, less one who was retransferred; hence, the increase from the hospital district was sixty-five. The capacity of the institution is already fully taxed, and additional room must be made for a biennial increase of more than 100. Moreover, provisions must be made for female inebriates, who numbered thirteen on the 30th day of June, 1905. It is our purpose to have all female patients of that class sent to this hospital after the Hospital for Inebriates at Knoxville is opened for male patients. Therefore, we are of the opinion that provision for 100 additional patients should be made so soon as practicable.

The number of insane in county and private institutions in the state was, on June 30, 1899, 1,394; on June 30, 1901, 1,404; on June 30, 1903, 1,378, and on June 30, 1905, 1,349, a decrease in six years of forty-five. Deducting this number from the increase in the state hospitals, we find that the net increase of

insane in state, county and private institutions for the six years was 837.

The number of insane transferred from county institutions to state hospitals during the last biennial period was thirty-two, and the number transferred from the hospitals to county and private institutions was fifty-nine.

CHAPTER VI

DEPENDENT, NEGLECTED AND DELINQUENT CHILDREN.

Chapter 11 of the Acts of the Thirtieth General Assembly known as the Juvenile Court Act, enlarged the power of the District Court in regard to dependent, neglected and delinquent children. Section 14 of that act authorizes this board to designate and approve the institutions and associations to have charge of juveniles under the act and requires the court and institutions and associations to make to us annual reports in the first fifteen days in January of each year.

Acting under the provisions of that act on the sixth day of August, A. D., 1904, we approved and designated the Iowa Children's Home Society of Des Moines to receive children under the act, of the three classes specified. On the fourth day of March, 1905, we approved and designated the Industrial School for Boys at Eldora to have charge of delinquent male children, the Industrial School for Girls at Mitchellville to have charge of delinquent female children, the Iowa Soldiers' Orphans' Home at Davenport to have charge of normal dependent children and normal neglected children, and the Institution for Feeble-Minded Children at Glenwood to have charge of dependent children and neglected children who are feeble-minded.

We have received applications to approve and designate but one other institution to receive children, but we found it did not have adequate accommodations and withheld our approval until sufficient accommodations should be provided.

We have not received any of the reports which were due in January, A. D., 1905, for the portion of the year 1904 during which the law was in force.

CHAPTER VII.

STATE AGENT.

Chapter 157 of the Acts of the Thirtieth General Assembly authorized us to appoint some suitable person to act as state agent for the Soldiers' Orphans' Home and the Industrial schools. Acting under this authority we appointed Miss Clare Lunbeck to the position named at a salary of \$100 per month, and she entered upon the discharge of her duties October 1, 1904. These are to become acquainted so far as possible with the inmates of the institutions named, particularly with those who are to leave the institutions within a short time, to investigate the homes to which they are planning to go, and if found objectionable to find other homes, to secure places and employment for those needing them, to supervise boys and girls after they are placed and in case of boys and girls from industrial schools, if they are violating the conditions of their parole to return them to the institution from which they went, and to find new places for those who are not well treated.

The state agent came to the work with fourteen years of experience in finding homes for homeless children and has proved to be zealous and efficient in the discharge of her duties. During the nine months covered by this report she traveled more than 12,000 miles, investigated more than 100 homes, and found homes among strangers for 30 children. The larger part of her work was done for the inmates of the industrial school for boys and at the end of the period 107 of these who had been paroled were making regular monthly reports to her. Although the agent has been engaged in her work but a few months, the results already obtained and indicated show beyond question that the action of the General Assembly in providing for a state agent was eminently wise. But there is more work of this character needed than one agent can do. The full time of one can be spent for the inmates of the industrial school for boys.

with great profit to them and to the state. Of the 128 boys who were paroled under the supervision of the state agent the conduct of but six was reported to be unsatisfactory. The salary of the agent during the nine months of the period she served was \$900.00, and her net expenses were \$578.09. Total \$1,478.09.

CHAPTER VIII.

LEGISLATION RECOMMENDED.

THE INSANE.

During each year many non-resident insane persons whose places of legal settlement are known are taken into custody in this state. When a person of that kind is apprehended it becomes the duty of the county in which he is found, under the directions of this Board, to send him at its own expense to the place of his legal settlement. This imposes an unjust burden on the county, which is usually without fault, and the expense of the transfer is much greater than it would be if made by the state. Transfers by local authorities are usually made by inexperienced persons, of whom more are employed than are necessary, and all of whom have to be paid. If made by the state experienced persons in our hospitals would be employed without additional expense for service, fewer of them would be needed and the patient would receive better care. All the expenses of the arrest, care, investigation and commitment of such patients are now paid from the state treasury, and we recommend that the law be so changed as to authorize the transfer to other states to be made by us, and that the cost of the transfer also be paid from the state treasury.

Section 2287 of the code as amended by Chapter 79 of the Acts of the Thirtieth General Assembly, requires the superintendent of a hospital for the insane from which a patient has escaped to cause search for him to be made, and if he cannot soon be found to notify the commissioners of the county where he belongs, and if they find him they are authorized to return him to the hospital unless he be discharged or is otherwise provided for, and if returned the expense is paid from the state treasury.

Some abuses have grown up under these statutes which should, in our opinion, be prevented by proper changes. In a

few counties where escaped patients have been found the commissioners have had a meeting, ordered the return of the patient and issued their warrant therefor, and the warrant has been executed by an officer who called to his assistance one or more persons, none of whom were needed, and conveyed the patient back to the hospital. In cases of that kind, almost without exception, all that was necessary on the part of the local authorities was a notice to the proper superintendent that the escape had been found. The superintendent would then have sent an attendant who would have returned the patient to the hospital with but little expense, but the expense bill actually presented for payment is usually three or four times as large as the cost of the transfer by the state would have been. We recommend that the law be so changed as to require notice to be sent to the superintendent of all escaped patients taken into custody and that he cause the patient to be returned at once.

Questions frequently arise in regard to the legal settlement of patients and what counties, if any, are liable for their support, and we are frequently asked by state and county officials to decide such questions. In a few cases involving non-residents we have felt authorized to act as requested, but where the dispute is between counties we have considered the remedy pointed out by section 2,270 of the code as exclusive and have declined to act. The matter is complicated by the fact that under the opinion of a former attorney general a patient is charged to the county from which he is committed, although his legal settlement is known to be in another county, until that county acknowledges its liability. The result is the authorities of at least one county in the state have refused to act in the cases of persons known to be insane and needing hospital care who are believed to have legal settlements in other counties. It seems to us desirable that the procedure in such cases be made more definite and that action by the proper officers be compulsory.

SOLDIERS' HOME.

The law authorizes the admission to the Soldiers' Home of "dependent honorably discharged union soldiers, sailors and marines, their dependent widows, wives if married prior to the year 1885, and mothers, and dependent army nurses," and provides that the husband and wife may be permitted to occupy a cottage on the grounds or other quarters set apart for them.

It is the practice to admit to the Home not only soldiers of the

general government who served in the Civil war, but also soldiers in the regular army in times of peace and soldiers of the war with Spain. The general government allows to the state \$100 each year for every soldier in the Home who served in any war in which that government has been engaged, but refuses to allow anything for members who did not serve in any such war although in the regular army in time of peace. There were in the Home at the end of the last biennial period five soldiers of that description.

It is also the practice not to admit any wife to the Home unless accompanied by her husband. Some deserving wives who have been deserted by their husbands have been excluded under this practice. Also women who were wives of soldiers who had deserted them and from whom they were divorced have been excluded.

We submit these facts for such legislation if any as the general assembly may deem proper with the recommendation that wives deserted without fault on their part and not divorced be admitted.

INDUSTRIAL SCHOOLS.

ELDORA.

The allowance for the support of the Industrial School for boys is ten dollars per month for each inmate. When the average number of boys present is not less than 500 the allowance, although small, can be made to cover the necessary current expenses of the institution. All of these expenses except for food and clothing are fixed and do not change with the population. Hence when the average population is below 500 the allowance is not enough, expenses have to be scaled below the necessities of the institution and harm results. Since March, 1905, the population has been below 500 at all times and at the end of July was only 437. The result of this loss of population has been the loss of about \$3,000.00 to the support fund of the school. This has compelled severe economy and an entire lack of surplus at the beginning of the cold season when a surplus is much needed for the large supplies of food, clothing and coal. It appears to us to be the true policy to release the boys as rapidly as they can be fitted for release and be furnished with suitable employment or homes. With the aid of the state agent, authorized by the last General Assembly, we are able to place boys outside the institution more rapidly than ever before and

we are desirous of continuing this policy. But it can not be followed unless provision be made for carrying on the institution with a largely diminished population. We therefore recommend that the law be so amended as to allow to the institution not less than \$5,000 each month for its support fund.

The state holds for the benefit of the school at Eldora the southwest quarter of the southwest quarter (S.W. $\frac{1}{4}$ of S.W. $\frac{1}{4}$) of section 16, Township 87 north of Range 20 west. This tract was wooded, but the larger part of the trees have been cut off. It is rough, nearly four miles from the buildings of the school and of little if any practical value to the state for use. We recommend that its sale be authorized and the proceeds be a fund for the purchase of additional farm land for the school.

MITCHELLVILLE.

The Thirtieth General Assembly was asked to increase the per capita allowance for the inmates of the industrial school for girls from twelve to fourteen dollars per month, and increased it to thirteen dollars. We have found this allowance to be insufficient to maintain the high standard of the school which is desirable and to furnish all supplies which are necessary for the comfort and wellbeing of the inmates. The opening of the fourth cottage for girls entailed a large additional expense for employes, heat and light. Most of the girls upon entering the school have little knowledge of books or of any industry, and it is the aim of the managers of the school to give them a thorough training in the various branches of a common school education and in various domestic industries, to develop in them self-respect and high aspirations for right living, and to fit them for self support and responsible citizenship. To do this requires much time and training and many teachers and employes, and the small average number of inmates makes the per capita cost much larger than it would be with a large average number of inmates. We have found as stated that the per capita allowance of thirteen dollars per month is insufficient to accomplish what is possible for the inmates and are of the opinion that it should be increased to \$15.00. We recommend that this increase be made and to guard against a future loss of population we recommend that the minimum monthly allowance for the school be fixed at \$3,000.

CHAPLAINS.

The Chaplain of each penitentiary is required to give so much of his time as the condition and employment of the convicts shall

reasonably justify in giving them moral and religious instruction, and he is required to give those who are illiterate instruction in the ordinary branches of learning. It has been found that all of the time of the chaplain can be employed with profit to the prisoners in looking after their welfare, in carrying on the prison schools and in library work. Each chaplain gives his entire time to the work of his office. Each is able, diligent, painstaking and zealous in the discharge of every duty and deserves and we believe receives the confidence of the prisoners. For the services rendered the law allows a compensation of but \$70.00 per month. This is inadequate and we recommend that it be made not less than \$100.00 per month.

HOMES FOR FRIENDLESS CHILDREN.

Section 3260-j, Supplement to the Code, places under our supervision "all associations or societies" receiving children under the act relating to the care of friendless children of which the section is a part. We have found difficulty in many cases to determine whether institutions receiving, caring for and placing children are conducted by "associations or societies" or by individuals. If by the former they are within our jurisdiction and if by the latter they are not. It may well be questioned whether there is any good reason for a distinction in law between the two classes of institutions. Those carried on by individuals, sometimes called maternity hospitals, and baby farms, do the same kind of work as is done by some of the institutions conducted by associations and societies. Our inspector, whose work has brought him in contact with some of these baby farms, speaks of them as a dangerous and unnecessary evil. The buildings occupied by them vary from commodious homes to hovels and the sanitary and hygienic conditions of some are extremely bad. Few if any of the people conducting them are sufficiently skilled to perform properly the work which devolves upon them. In fact it is the opinion of the inspector that there are many abuses practiced, that in some of the places the children are neglected, and that proper disposition is not made of them. We earnestly recommend that provision be made for the inspection of all institutions of this class and for the correction of abuses found to exist.

PUBLICATION OF REPORTS.

Section 2727-a 12, Supplement to the Code, requires us to make biennial reports and to include therein the reports of the

executive officers of the various institutions under our control. This with other provisions of the law requires us to set out the name and salary of each officer and employee of the various institutions under our control, the name, age, sex, residence, place of nativity and cause of deafness if known of each pupil in the School for the Deaf, the name, age, sex, residence, place of nativity and cause of blindness of each pupil in the College for the Blind and many other facts, statistical and otherwise. It is our practice to digest the various institution reports and to present in as compact form as possible tables showing all statistics which are of interest to the general reader and to students and scientists engaged in sociological work. It is our aim to present in this manner and in our statements in regard to the condition and needs of the institutions, every thing of interest to the executive and legislative departments of the state and to the general public. The officers and employees of the institutions, especially those of subordinate positions, are constantly changing, and hundreds of employees at the end of a biennial period will have left the employment of the state before our report is filed. The salaries actually paid for any or all months of any year are always shown by permanent records of our office. If it be desired to have published the salaries paid by the state, this could readily be done by giving the maximum and minimum monthly salaries of each class of officers and employees. It is doubtful if the names of all pupils in the School for the Deaf and College for the Blind and other information required to be published are of sufficient general interest to justify their insertion in our biennial reports. These are already of large bulk and each general assembly adds to the matter which they must contain. It is our opinion that these reports would be as useful and more satisfactory if the institution reports were omitted. Certainly they would be more convenient for use and less expensive to print and circulate. If authority be given to omit the institution reports as suggested, provision should be made for publishing such reports in pamphlet form. There is much demand for the reports of different institutions by persons who do not care for our biennial reports. If our suggestions are carried out large sums of money will be saved to the state and information in regard to the institutions under our control will be in more convenient form for distribution and use. We therefore recommend the legislation necessary to carry these suggestions into effect,

PLACING OF CHILDREN.

The law authorizes the commitment of boys and girls to the industrial schools who are but seven years of age, and children less than a year old are frequently received at the Soldiers' Orphans' Home. Some of these children are orphans and these we are authorized by Chapter 157 of the Acts of the Thirtieth General Assembly to place. But only a small number are Orphans. Of the 475 children usually found in the Soldiers' Orphans' Home but about forty are orphans. Many of the children in the institutions under consideration have dissolute and vicious parents who should not be entrusted with the care of children. Under the law children received in the Soldiers' Orphans' Home must be discharged when they become sixteen years of age, and we have been compelled to release many children at that age to vicious parents, and in some cases girls to dissolute mothers and no doubt to ruin. This we were unable to prevent under existing laws. We recommend that they be so changed as to permit the placing of children who are committed to either of the industrial schools or to the Soldiers' Orphans' Home, when the proper authorities of the institution are satisfied that the parents are unfit to have charge of their children and that it is for the best interest of the children to be placed elsewhere.

MISCELLANEOUS.

We desire to renew in a general way the recommendations we have made in previous reports for the establishment of an epileptic colony, a Reformatory for Females over sixteen years of age, for a Reformatory for Males over sixteen and under thirty years of age, and for laws providing for the indeterminate sentence and for the paroling of prisoners sentenced for felonies. We are of the opinion that all of the institutions named should be established in the near future and that the need for the reformatory for young men, for the indeterminate sentence and for a suitable parole law is urgent and they can be furnished with small cost. In addition the employment of an officer whose duty it shall be to procure places and employment for prisoners about to be discharged from the penitentiaries and to exercise supervision of those released conditionally during the period of their parole should be authorized. We have no doubt that from the standpoint of economy alone the employment of such an officer would be justified.

CHAPTER IX.

APPROPRIATIONS.

The following appropriations are asked:

GENERAL.

To pay for the inspection of county and private institutions where insane persons are kept and for the inspection of homes for friendless children for the period.....	\$ 4,000.00
To pay the salary and expenses of the state agent for the period....	6,000.00
Total general appropriations.....	\$10,000.00

IOWA SOLDIERS' ORPHANS' HOME.

For finishing cottage for girls	\$1,200.00
For painting.....	2,000.00
For portico roof repairs.....	1,000.00
For the purchase of an engine and generator, (old).....	1,000.00
For flooring and ceiling engine room.....	700.00
For grading grounds.....	700.00
For new porches.....	700.00
For rear porch floors	300.00
For permanent walks.....	500.00
For fences.....	600.00
For gymnasium equipment.....	200.00
For bake ovens.....	1,200.00
For a hog house.....	1,200.00
For storm entrances to dining rooms.....	400.00
For changing old kitchen.....	300.00
For a tile floor and repairing hallways and stairways of Main building.....	700.00
For books and periodicals.....	500.00
For a contingent and repair fund.....	5,000.00
Total	\$18,200.00

IOWA SOLDIERS' HOME.

For a quartermaster's building and store house and for taking ing light, heat, water and sewer to the same and for equipping same	\$10,000.00
For a coal house	4,500.00
For an addition to the women's dormitory and for furnishing and equipping same.....	15,000.00
For an addition to the women's hall including equipment and furnishing.....	3,500.00
For enlarging pump room.....	1,200.00
For reservoir and connection with city water system.....	5,000.00
For new bake oven and setting.....	1,300.00
For new mangle	1,800.00

APPROPRIATIONS.

For cement floors, furniture and repair fund.....	8,000.00
For grand army hall and equipment.....	1,000.00
For improvement of grounds	2,000.00
For fire protection.....	1,800.00
Total.....	\$55,100.00

COLLEGE FOR THE BLIND.

For new boilers, smokestack and for enlarging and changing boiler house	\$12,000.00
For a new coal house.....	3,500.00
For a music hall and gymnasium and for furnishing and equipping same	20,000.00
For a contingent and repair fund.....	2,000.00
Total	\$37,500.00

IOWA SCHOOL FOR THE DEAF.

For fencing.....	\$ 500.00
For cement walks and grading grounds.....	5,000.00
For blackboard wall slate for school house	1,500.00
For a new boiler house, boiler attachments, connections, smokestack, laundry building, engine shop, machinery room, tunnels, equipment and for removing and reinstalling engines, dynamo and other machinery	50,000.00
For removing and reconstruction of temporary school building..	3,000.00
For an additional dynamo, engine and connections	3,500.00
For tools and machinery for the Industrial schools.....	500.00
For plastering and fitting up basement corridor and rooms of new building	2,500.00
For wrecking old kitchen, dining room and laundry, etc	1,000.00
For library, periodicals and binding	500.00
For a pigery.....	1,200.00
For a contingent and repair fund	3,000.00
Total	\$72,200.00

INDUSTRIAL SCHOOL FOR BOYS.

For a blacksmith and machine shop and for equipment, tools, forges, etc.....	\$ 8,000.00
For drain tile.....	4,000.00
For fencing.....	800.00
For agricultural implements	500.00
For cows and horses	1,200.00
For green house and steam and water connections.....	3,500.00
For furniture and furnishings	3,000.00
For band and orchestra instruments	250.00
For lectures, entertainments, and rewards for meritorious services and for transportation for penniless boys.....	300.00
For a hospital building and to equip and furnish same.....	18,000.00
For contingent and repair fund	6,000.00

Total..... \$45,550.00

INDUSTRIAL SCHOOL FOR GIRLS.

For an administration building.....	\$10,000.00
For equipping and furnishing same	3,500.00
For removal of, putting basement under and repairing superintendent's cottage	1,500.00
For library and periodicals.....	500.00
For a chaplains fund	300.00
For two new boilers and setting	3,200.00

For enlarging power plant and extending building.....	7,000.00
For additional for hose house.....	600.00
For permanent side walks.....	3,000.00
For stand pipes, connections, hose reels and hose.....	600.00
For horses and cows.....	1,600.00
For contingent and repair fund.....	3,000.00
Total.....	\$34,800.00

INSTITUTION FOR FEEBLE-MINDED CHILDREN.

For procuring a water supply.....	\$ 50,000.00
For a cottage for boys and for equipping and furnishing same.....	35,000.00
For a custodial building for boys and for equipping and furnishing same.....	75,000.00

Penitentiary at Anamosa.....	35,100.00
Grand Total.....	\$1,140,250.00

CHAPTER X.

OBSERVATIONS RESPECTING INSTITUTIONS.

GENERAL.

During the period and as shown by the average population for the month of June, 1905, as compared with that for June, 1903, the several institutions show gains or losses in population as indicated below:

Soldiers' Orphans' Home.....	Loss	23
Soldiers' Home.....	Gain	50
College for the Blind.....	Gain	4
School for the Deaf.....	Loss	29
Industrial School for Boys.....	Loss	74
Industrial School for Girls.....	Loss	3
Institution for Feeble-Minded Children.....	Gain	82
Mt. Pleasant State Hospital:		
Insane.....	Gain	118
Inebriates.....	Gain	2
Independence State Hospital:		
Insane.....	Gain	112
Inebriates.....	Loss	6
Clarinda State Hospital:		
Insane.....	Gain	19
Cherokee State Hospital:		
Insane.....	Gain	94
Inebriates.....	Loss	14
Penitentiary at Fort Madison.....	Gain	90
Penitentiary at Anamosa.....	Loss	37

From the above which may be treated as representing substantially the gains or losses for the entire period, it appears that the population at the College for the Blind, and at the Industrial School for Girls has remained practically the same as during the preceding period, that there has been a small falling off at the Soldiers' Orphans' Home and the School for the Deaf, for which no good reason appears; that there has been a large decrease at the Industrial School for Boys which should be considered temporary only as it has no doubt resulted from the change in the system of grading.

The penitentiary at Anamosa continues to show a loss in population due, no doubt, in part to a transfer heretofore made of some counties to the Fort Madison district. These counties have now been transferred back to the Anamosa district.

There has been, however, a decided increase in the prison population during the period.

The gain at the Institution for Feeble Minded Children is permanent and simply represents the increased capacity of the institution. There is constantly a large number of applicants for admission on the waiting list and were they all provided for, this institution would now have over eleven hundred inmates.

The problem is now presented as to how large a population this institution should undertake to care for.

It is the opinion of this Board that not more than twelve hundred inmates should be kept in this institution. To meet the demands for care of this class of people some further provision will soon have to be made.

If an epileptic colony were established and the two hundred and fifty epileptics in this institution removed to it, the opening of another institution for the feeble-minded would be unnecessary for many years.

There is a substantial gain in population at the Soldiers' Home and from the most reliable sources of information, it seems certain that this will continue for at least ten years longer before a decline in population may be expected.

There has been the usual increase in the insane population of the State Hospitals, amounting during this period to three hundred and forty-three. This ratio of increase has been so nearly constant during several preceding periods that it is reasonable to expect it will continue in the future. It therefore becomes necessary to provide every third biennial period for further facilities for housing and caring for one thousand additional patients.

For the present, at least, this want can be best and most economically met by the erection of additional cottages, and infirmaries in connection with our present hospitals.

Generally speaking the health of the inmates of all of the institutions has been good. There has been during the period, a slight epidemic of small-pox at the State Penitentiary at Fort Madison, but no deaths resulted.

SOLDIERS' HOME.

The sixteen acres of land adjoining the Home on the west has been purchased.

The new kitchen at the Hospital has been completed, the dining rooms enlarged which improvements have exhausted the

appropriations made for these purposes. A commodious new horse barn has been erected.

A new green house has been erected, but the amount appropriated for it was so small that it was impossible to build a structure of suitable size and character.

The appropriations for improving the water supply, for new floors, fire escapes and furniture have largely been expended. New pumps have been placed in the power house.

Fire escapes have been built and erected on the Dormitory, Main and Old Men's buildings and on the Old People's building.

The porches on the Main and the Old Men's buildings have been put in excellent condition.

New cement floors have been laid in the halls, smoking room and kitchen of the basement of the Main building and in the basement of the Hospital building.

The operating room in the Hospital building has been finished, furnished and equipped with all needed instruments and appliances.

The appropriation of \$15,000.00 for additional rooms for married people was not sufficient to permit the erection of an addition of such a size as was needed, but an addition has been erected which provides for rooms for twenty-four additional couples. This was in part furnished by beds and furniture from the Iowa building at the Louisiana Purchase Exposition.

A gate-way and lodge has been erected.

SOLDIERS' ORPHANS' HOME.

The Thirtieth General Assembly appropriated the sum of \$6,000.00 for the purchase of land.

Thirty-five acres were purchased for the sum of \$4,600.00. Other small sums were paid for recording, surveying and bringing the abstract down to date and the balance was reappropriated for the purpose of filling Duck creek.

Since our last report, the new boiler house, stack, engine house and coal house have been completed and equipped as fully as possible with the appropriations which were made therefor by the Twenty-ninth General Assembly. A new ice house, store room, cold storage and laundry have been completed.

Of the appropriation for additional equipment of the power house, nearly \$1,500.00 was paid for two new boilers, \$2,475.00 for generators and motors, \$1,857.00 for a new engine and gen-

erator, \$965.00 for two additional stokers. Additional breeching was provided, also a new hot water heater and pump.

Three new washers costing \$1,250.00 have been purchased and a new mangle, extracter and dry closet to cost over \$2,000.00 have been contracted for.

Since these washers were bought it appears that one of them is not needed and it has been shipped to the Hospital for Inebriates at Knoxville and will be paid for from the funds of that institution.

The fund for enlarging and reconstructing tunnels has all been expended and over 1,700 feet of tunnel has been built, requiring an expenditure in excess of the appropriation therefor and which was met from surplus in other funds available under the law for that purpose. The piping system has been enlarged and improved from the appropriation made therefor and the new system is ample and complete. Many excellent books and magazines have been purchased and more will be, and the growing useful library is in need of more room which can be had when the old kitchen is ready for use as a library.

Practically all of the funds available for filling Duck creek have been expended but the work is not yet fully completed.

During the period three hundred feet of cement walks have been completed.

Many other minor improvements have been made during the period and much needed machinery purchased, including a pipe cutting machine, also a large range for the kitchen and a new switch board and motors.

The schools have been successfully operated and the industrial departments developed as much as possible, considering the fact of the short stay of children in the institution. An excellent band of twenty-five pieces and an orchestra of twenty instruments both composed of children of the Home are maintained. New and modern school books have taken the place of those which had outlived their usefulness. The older boys have organized into a military company and drill regularly during the spring and summer months.

COLLEGE FOR THE BLIND.

The new hospital building has been completed and finished and the operating room well equipped.

Artificial eyes, lenses and glasses costing over \$100.00 have been furnished students needing them, free of charge.

Four students died during the period. In one case death resulted from being run over by the cars through no fault of the college authorities.

Some new paving has been laid in the rear of the main building and near the new hospital. The barns and sheds were moved back to make room for the new hospital building, thus greatly improving the appearance of the grounds.

Two new fire escapes have been erected and the building and inmates now have excellent fire protection. The usual progress has been made in the literary and industrial departments. Electric lights have been placed in all students' rooms. A tablet was placed in the hall of the main building appropriately inscribed in commemoration of the services of the late Captain Drummond, who rendered eminent service in the location of the institution.

SCHOOL FOR THE DEAF.

Notwithstanding the difficulties which this institution has labored under during the period by reason of the loss of its Main building by fire, the work has been carried on with the usual success.

Immediately after the appropriation of \$250,000.00 by the last General Assembly for building and equipping a new plant, contracts were let for the erection of the Main building and for a hospital building. Expenditures have been made and contracts entered into on account of these structures as follows:

General contract Main building.....	\$195,271.00
Extra for mantel breasts.....	265.00
Plumbing fixtures.....	3,601.25
Steam heating, pipe covering and heating plans.....	12,384.00
Plumbing work.....	3,112.79
Sundry articles such as pipe, beds, shades, fixtures, hot water system to Hospital, salary of superintendent of construction and furnishings for hospital.....	2,345.95
Hospital building.....	24,751.00
Heating and plumbing same.....	3,745.00

Making a total paid and contracted to be paid of \$245,475.99. In addition to these expenditures there will be an extra charge for increased depth of foundation, for extending the water and sewer system in the basement.

Adding the \$1500.00 appropriated for furniture, there will be near six thousand dollars available for plastering basement, electric light fixtures, furniture and furnishings. This will not be sufficient to finish the building as it should be.

The new hospital building is fully completed and furnished. Before the filing of this report it is expected the boys' wing of

the Main building will be all completed and the rest of the building completed so that it may be occupied during a portion of the winter.

Every effort has been made on our part to have the entire structure fully completed by October 1, 1905, but it has been impossible to attain that end. Our contract provides that the State shall have credit for all old brick used at the price fixed, and for all broken brick and stone used in concrete work. The new Main building has a capacity of three hundred students.

The appropriation for books has nearly all been expended in the purchase of a well selected library.

The money re-appropriated for repairs has all been expended and in addition thereto a large sum has been expended for repairs from the contingent and repair fund. The coal house has been erected and a balance in that fund used in needed repairs of other buildings.

The exterior walls of the school house have been repaired by replacing poor brick in the walls with good brick and the walls, wood-work and cornice have been painted and the roof put in good condition.

Some of the floors have been renewed and more will be as soon as the students now using the building as a dormitory can be moved into the new Main building.

The roof and exterior walls of the Gymnasium have been painted. The exterior walls of the store house, laundry and engine room have been repaired, a new gravel roof has been put on the laundry, engine room and dining rooms.

The boilers have been lowered and reset from the fund provided for that purpose. Most of the appropriation for fencing has been used and a neat, substantial fence has been erected enclosing the grounds along the public highways to the north and west of the institution. Large expenditures have been made out of the old appropriation for increasing the water supply in the purchase of pumps, pipe, traps and other articles needed. The fire which damaged the brick Industrial building by burning off a portion of the roof and otherwise damaging the building, made it necessary to put on a new roof, new plastering, etc.

About two thousand dollars were expended in making these repairs and in building new area ways, cement floors, etc.

Other appropriations not expended will be needed as soon as the new building is completed.

INDUSTRIAL SCHOOL FOR BOYS.

The amount appropriated for land was all expended in the purchase of eighty acres adjoining that heretofore owned by the State.

Since our last report the school building has been completed and equipped. The walls of the old building have been painted.

The cold storage building and store room is now being erected.

The appropriation for the improvement of the water supply has been expended in the purchase of two pumps, in putting down a new well, for pipe, hydrants, two new cisterns and in installing a complete water system.

Two excellent fire escapes have been erected on the Main building. Nearly all of the fire equipment appropriation has been used in the purchase of a hose cart, hose, hook and ladder equipment and fire extinguishers.

All of the appropriation for printing and binding outfit has been expended in the purchase of an excellent printing equipment.

New machinery has been installed in the shop building, including shafting and motors.

Some of the books and periodicals fund has been used in the purchase of good books and magazines and the balance of it will be needed.

INDUSTRIAL SCHOOL FOR GIRLS.

The new cottage has been completed and equipped and the ground around it graded and sodded since our last report was made.

Hose, nozzles and a hose cart have been purchased and we have endeavored to let a contract for a hose house, but the appropriation is so small that it is impossible to erect such a structure as is needed.

A new ice house and cold storage building has been erected, exhausting the appropriation therefor.

INSTITUTION FOR FEEBLE MINDED CHILDREN.

Since our last report the two cottages and the cow barn have been completed.

The last appropriation for repairing the Custodial building has all been expended and the building put in good condition in the interior, also all exterior porches have been rebuilt and painted. Some new exterior stairways affording

escapes from the upper stories in case of fire have been erected.

The new engine and boiler house are under contract and the smoke stack is completed. The tunnel is completed.

A new washer, extractor and starch cooker have been purchased from the fund for machinery and equipment for the laundry and a dry room has been contracted for.

The appropriation for kitchen equipment, furniture and furnishings, farm fences and farm implements have nearly all been expended for the purposes intended. The funds for plumbing, old cottages and for beds and bedding have all been used. The money available for the improvement of the grounds has not been used as the building of the tunnel and other necessary work prevented permanent improvements.

The appropriation for the equipment of the fire department has all been expended in the purchase of a hook and ladder truck and equipment, two hose carts and hose for the same; also fire extinguishers.

A large amount of grading and filling has been done by the inmates. Work in the making of brick has been vigorously prosecuted.

Out of the appropriation for the purchase of land, \$4,500 00 was paid for a block of land west of the institution and \$2,116.10 expended in the purchase of thirty acres lying west of the state land and east of the railroad right-of-way.

Two pieces of land owned by the railroad company and lying between the institution grounds and the railroad right-of-way have been purchased for \$900.00, which will leave a small balance in this fund.

MT. PLEASANT STATE HOSPITAL.

Out of the fund for the purchase of land the sum of \$2,489.65 was expended for 35.52 acres and negotiations are pending for a tract which if concluded will exhaust the balance of the appropriation.

Two new ovens have been erected, and as many brick from the old chimney were used there was a large saving to the State. Most of the balance of this fund was used towards the purchase of two additional boilers which were absolutely necessary for the heating plant and for which there was no special appropriation.

A considerable part of the painting fund has been expended and the balance will all be needed. All of the metal roofs,

gutters, down spouts and the exterior wood-work in the Main building and cottage and other out-buildings have been painted, also several inside rooms and wards.

Arrangements are being made for placing tempering coils to render more efficient the heating and ventilating system.

Much kitchen equipment has been added and more will be needed. Spray baths have been installed.

New roofs have been put on the kitchen, power house and work shop. Much of the cistern fund has been expended for a new soft water system and in making needed repairs to old cisterns and for connections.

The tunnel fund has been used in building a new tunnel from the power house to the laundry and for clearing out and repairing the tunnel between the power house and the Main building. New sewers have been laid from the laundry building and the west wing of the Main building to the main sewer.

The fund for walks and the improvement of the grounds has in part been spent for trees, shrubbery, plants, sidewalks and grading.

A portion of the fund for draining and fencing land has been expended although the work of draining has just begun.

The appropriation for the purchase of horses and wagons has all been used and was not sufficient for the purpose.

Since our last report was made, the following work has been completed:—Installing six dumb-waiters, completing and equipping the laundry building and cow barn. The large old chimney no longer in use, was wrecked and all material fit used in work about the institution.

A pump house has been erected and pumps installed.

New steam pipes have been laid from the boiler house to the Main building and laundry.

A heater and a purifier have been added to the boiler house equipment.

Houses have been moved from the farms which were purchased to a point on the service road where they are used for employees.

A new kitchen chimney has been built and extensive improvements made inside of the Main building.

A water main has been laid from the pond to the boiler house and an electric pump erected near the pond and the water is forced to the boiler room for use in the boilers.

INDEPENDENCE STATE HOSPITAL.

The following improvements have been completed since the filing of our last report:—The store house, fire house, fire escapes, laundry and dry room. The fund for the improvement of the water system has all been expended in the purchase and installation of pumps, an addition to the pump house, a new pump pit, three reservoirs, laying mains from the reservoir to the pumps and to a connection with the city water in basement of the Main building, extending fire main at Sunnyside cottage, renewing fire main to Grove Hall and Farmer's Lodge and the necessary hydrants for all new mains.

The fund for painting and decorating has all been expended. All wards for males have been painted. Two wards on the female side of the house and the kitchen, laundry, a portion of the interior of the Administration building and many gutters and much of the cornice have been painted.

Over one-half of the appropriation for carpets and rugs has been expended and some new carpets and rugs have been furnished the Administration building and ten wards have been supplied. The balance will all be needed.

Much furniture and over three hundred beds which were badly needed have been purchased from the appropriation for that purpose.

The Flooring fund has practically all been expended in the purchase of new flooring. Many new bath tubs have been installed in place of those which are worn out and unsanitary.

The appropriation for changing the elevator has not been expended. Four circular fire escapes have been erected at suitable places on the Main building.

The construction of the piggery is progressing.

Forty acres of land in front of the hospital grounds have been purchased. A large amount of fencing has been done and more is being completed as rapidly as possible.

The drainage work has been begun but the work to be done is extensive and will require considerable time.

A new tile floor has been laid in the main corridor of the Administration building and a new palm house erected.

CLARINDA STATE HOSPITAL.

The original contract for the erection of the new cottage called for the expenditure of \$58,412.50.

The contract for the work of plumbing and heating was

\$3,578.00. In addition to this the State furnished the plumbing and heating fixtures and goods and electrical fixtures and must equip and furnish the building.

The appropriation for a new shop building has all been exhausted, save the sum of \$10.00. The building is completed with the exception of a little work in the basement.

A coal house and ash elevator have been constructed. The money for new floors has mostly been expended for flooring which is being seasoned before being laid.

Over \$400.00 worth of new wood-working machinery has been placed in the new shop building. All of the roofs of the Main building have been repaired. Two new dry closets have been installed in the laundry. The green house has been enlarged.

A tunnel has been built from the boiler room to the new shop, green house and new cottage. Much has been done in grading and road making.

Considerable inside painting has been done and new plumbing installed.

Ten and one-half miles of tile has been laid on the farm. The house on one of the farms recently purchased by the State was moved to and joined to the house on the Beam place and the two made into one comfortable and commodious cottage which now accommodates twenty male patients, thus enlarging the accommodations of the hospital.

CHEROKEE STATE HOSPITAL.

Out of the land appropriation we purchased the east one-half (E. $\frac{1}{2}$) of southeast one-fourth (S. E. $\frac{1}{4}$) and northwest one-fourth (N. W. $\frac{1}{4}$) of southeast quarter (S. E. $\frac{1}{4}$) of section 20, township 92, range 4 West, for \$10,200.00. The appropriations for books and periodicals, equipment of pathological laboratory, repair of smoke stack, sterilizer, stereopticon and telephone system have been largely exhausted.

The contract for the new cottage exclusive of plumbing, heating, wiring and equipment and furnishing was let for \$55,597.50. This cottage is completed.

The appropriation for increasing and improving the water supply has largely been expended and in part as follows: Repairing the second well and fixing it so as to keep out the sand, \$3,000.00; contract for new well, \$4,000.00; furnishing pump house for second well \$1,400.00; contract for pump house for third well, \$2,240.00; two large soft water cisterns \$3,500.00.

Twelve hundred and six feet of six-inch water main have been laid in the rear of the Main building, eight hundred sixty-four feet of four-inch water main has been laid to the different buildings. Fire hydrants have been placed on all of these lines.

Sixteen hand fire extinguishers have been distributed through the Main and shop buildings. One hundred feet of one-inch hose has been placed in each ward, in the chapel, on the second floor of each supervisors section and on the fourth floor of the Administration building. One hundred feet of hose has been placed on each floor of the Industrial building. A main has been carried to the new cottage large enough to supply cottages which may be erected in that direction hereafter.

A DeLaval steam turbine engine and a dynamo have been provided for the engine room of less capacity than the old equipment so that it can be used when a light load only is needed, thus economizing in the amount of power used. With the facilities above stated and if the third well shall prove to be as good as the second, it would appear that the perplexing question of a good and abundant water supply and ample fire protection had been solved.

The appropriation for the equipment of the Industrial building has all been expended in the purchase of necessary machinery. The courts have all been paved and excellent cement walks completed in front of both the male and female sides of the Main building and from the Administration building to the main entrance of the institution grounds.

Much grading has been done and many thousands of trees planted. The damage to the smoke stack mentioned in our last report has been repaired. Much fencing has been done and more is needed.

PENITENTIARY AT FORT MADISON.

The new hospital and school building is nearly completed. Work on the new prison wall is progressing. The work of changing and improving buildings is in part completed and the equipment for the new bath room has been purchased.

The new kitchen, store room and cellar are completed. New roofs have been put on some of the old buildings which required them.

The earnings from convict labor for the period were \$93,456.05.

Three batteries of new boilers have been installed. Two new engines, a heater and a dynamo have been bought.

PENITENTIARY AT ANAMOSA.

During the period eighty acres of land adjoining that heretofore owned by the state were purchased for \$4,622.25.

The appropriations for constructing the cell bank, for galleries and grated doors and for heating, plumbing and for lavatories and closets amount in the aggregate to \$56,000.00 and has been expended as follows:

Steel cells, galleries, doors, etc., \$33,000.00; plumbing material, closets, lavatories, \$16,000.00.

The labor of erecting the cells and of putting in plumbing, lavatories, closets, etc., is to be done by the convicts. Several new machines have been purchased, including a punch and shears costing \$595.00, and an engine lathe costing \$676.00.

During the period the roof of the new cell house was put on with the labor of convicts, the stone floor placed in position and the building is now ready for the erection of the cell work and for the installation of the plumbing, steam heating, etc.

A new and substantial cold storage building has been erected, also a hot house, blacksmith shop and a kitchen and dining room at the quarry. The bridge at the quarry which was damaged by the floods has been repaired.

New laundry machinery has been installed.

The yard has been greatly beautified by the planting of trees, shrubs and flowers.

Much stone has been quarried, cut and shipped to Fort Madison for the exterior wall of the new hospital building and to Eldora for the foundation of the new store house and cold storage building and to Marshalltown for the new gateway and gate house, all at a great saving to the state and, had not this been done, the erection of some of these buildings would have been impossible owing to the small appropriations therefor.

STATE HOSPITAL FOR INEBRIATES.

In pursuance of the action of the Legislature establishing a State Hospital for Inebriates at Knoxville, we have purchased one hundred and thirteen and seventy-three one-hundredths acres of land, some of which joins the state's land on the east, and sixty-five acres lies directly across the highway south of the institution and twenty-four acres lies across the highway, directly west of the institution.

These several tracts of land including the recording of deeds

and extension of abstracts of title, cost in the aggregate \$18,741.39.

On the tract so bought south of the institution there is situated a one story cottage which was in poor condition. It had to be newly shingled, chimneys rebuilt, plastering repaired, papered inside and a tile drain laid to remove the water from the cellar, all of which cost \$210.74.

We were compelled to employ a farmer and farm hands to till the ground, put in crops and garden and to do other work.

We employed a competent man as Foreman of Construction to look after the work of erection of the new buildings and the alterations and improvements in the old buildings. Scales had to be repaired and certain repairs made to the old building not embraced in the general contract and posts and lumber were necessary. For all of these purposes we expended \$1,536.91.

The condition of the ground near the new buildings was such that in order to proceed with the work of construction and to keep basements, pump pit and tunnels free from water we were compelled to expend \$320.25 for tiling.

Owing to the action of the City of Knoxville in cutting off the state's sewer where it entered their ground we were compelled to purchase a tract of twenty-four acres of land in order to have a place to dispose of sewage from the institution. This entailed an expense of \$4,000.00 and to reach it we have laid about 1,600 feet of sewer at a further expense for tile, digging, plans, etc. of \$2,254.21. The contents of this sewer must be discharged into a small run until such time as an appropriation is available for the construction of a sewage disposal plant. This we are advised will cost \$4,600.00.

We contracted in advance of making contracts for buildings with the Chicago, Burlington & Quincy Railroad Company to build a switch from its main line to the site of the power and coal house, the State to pay all of the expenses except for rails, and to pay six per cent interest annually on the cost of the rails.

All full cars to be taken to and from the institution free of switching charges, providing they were received over or to be shipped over this railroad. For the construction of this switch, we have paid \$1,588.63, and for six months' interest \$28.44.

Contracts for new buildings and for repairs to old buildings and for equipment and improvements have been made as follows:

OBSERVATIONS RESPECTING INSTITUTIONS.

For new cottage.....	\$36,779.56
For power house and laundry.....	6,940.00
For Administration building.....	15,200.00
For remodeling old building.....	4,765.00
For a tunnel from boiler house to Administration building and cottages.....	3,326.00
For three tubular boilers and metal stack.....	4,280.00
For wiring old building.....	600.00
For engine, generator, switchboard and wiring.....	6,100.00
For a sewer, plumbing and heating.....	12,525.00
For connections in old building, etc.....	150.00
For laundry machinery.....	1,430.00
For washing walls and painting interior of old building.....	964.00

In addition to the above all of the buildings must be furnished and equipped. While we expect to be able to open the institution in the early winter, it will be with insufficient furnishings and equipment because of lack of funds.

CHAPTER XI.

VISITATIONS TO INSTITUTIONS.

Visitations made from July 1, 1903 to and including June 30, 1905. Showing when and by whom the visits were made.

SOLDIERS' ORPHANS' HOME.

Year	When Made	By Whom Made

CHAPTER XII.

Salaries and wages paid, and positions held by the officers and employees of the Board of Control and by the officers and employees of the several institutions subject to its control, as shown by the pay roll for June, 1905.

The asterisk opposite a name indicates that the person has served only a part of a month, and the amounts given are the monthly salaries allowed.

As the Iowa College for the Blind has no school in session in June, the pay roll for the month of May is given.

Name.	Occupation.	Monthly Salary.
<i>Members of the Board.</i>		
G. S. Robinson.....	Chairman.....	\$ 250.00

CHAPTER XIII.

THE EDUCATIONAL INSTITUTIONS.

THE STATE NORMAL SCHOOL.

On October 4th, 5th and 6th, 1905, as required by law, we investigated the reports and acts of the trustees and other officers of the State Normal School.

Since our last report the power plant, the new engine and dynamo building and the new gymnasium have been completed and occupied. These structures are well built and well adapted for the purposes for which they are used.

There is no provision in the law governing this institution touching the method to be adopted in auditing bills against it. We are advised that the Board of Trustees appoint from their number three persons whose duty it is to audit all bills. One of this committee is a resident of the city of Cedar Falls, the other two members reside in other places. The method adopted by this committee has been as follows: To require all claims to be approved by the President of the institution. To require all claims relating to or growing out of the erection of new buildings and in other cases where the facts are known to the Superintendent of Construction, to be approved also by him. The claims are then audited by the member of the committee residing in Cedar Falls, after which warrants are drawn in favor of the claimants and the bills paid. After this and the next time the other members of the auditing committee visit the institution, they also sign these bills. It thus appears, that in fact, all bills are paid after being audited by only one member of the committee and the signing and approval of the bills by the other members after they have been paid is a mere matter of form.

It appears to us that such a method is improper and unbusinesslike. If bills are to be audited, and they certainly should be, the work should be done by at least a majority of the committee appointed for that purpose before payment is made.

We do not wish to be understood as intimating that the bills as paid were not proper, or that the goods or articles were not received by the institution, but insist that such a method of auditing bills cannot be regarded as proper or businesslike and is open to grave objections, so obvious that it is unnecessary to mention them.

It should be said that the President and trustees of the school claim that it is not practicable to have all or even a majority of the auditing committee pass upon these bills in advance of their being paid. That the law makes no provision for monthly meetings of the trustees and that if the committee did so meet, the members would be compelled to pay their own expenses, and that to hold the bills unpaid for a considerable period would prevent the institution getting as favorable prices as in case it was known that all claims would be promptly paid.

It seems to us that the members of this auditing committee who reside in places distant from the institution, should be re-imburshed for all necessary expenses incurred in making monthly visits to the institution for the purpose of auditing bills and if the law does not now warrant such action, it should be amended so as to cover the case.

Aside from the matter above referred to, we are satisfied that the financial affairs of the institution are well managed and in a businesslike manner.

Great care appears to have been taken in the expenditure of the moneys which came into the hands of the officers and trustees and the state seems to have received the full value thereof. Moneys have been properly drawn and accounted for.

The institution is in a prosperous condition and well managed.

IOWA COLLEGE OF AGRICULTURE AND MECHANIC ARTS.

On November 7th, 8th and 9th we visited the above named institution and investigated its records, accounts, contracts and the method of conducting its business as required by law.

The purchasing committee which was appointed two years since has resulted in a saving to the institution. Contracts for buildings and other improvements have been let to the lowest bidder after due notice was given to contractors.

We found the business of the biennial period was represented by about ten thousand separate vouchers. Bills are paid at any time after being audited; the result is that in many cases the same person or firm will have several different bills during the same month against one fund.

If the plan of monthly payments was followed, as it could be without hardship in most cases, it would result in greatly lessening the number of claims and the work in the office of the Treasurer. We are satisfied that the authorities of the college can and will devise a plan regarding the payment of claims which will be a great improvement over the present system and considerably reduce the work and consequently the expense for clerical help in the Treasurer's office.

The records, contracts and accounts were found to be correct. The moneys legally drawn and expended and the affairs of the college managed with fidelity and painstaking care and ability.

STATE UNIVERSITY.

The examination of the books, accounts, records, vouchers and contracts of the State University at Iowa City for the biennial period ending June 30, 1905, was made by the Board of Control on the 25th and 26th days of October, 1905.

The records of the Board of Regents, the Executive Committee, and the Building Committee are full and complete, and being printed in pamphlet form, proved very convenient in the examination, and for reference as required.

In the awarding of contracts for new buildings, changes and repairs in old buildings, and other improvements, all necessary precautions appear to have been taken to secure full and fair competition, and the awards have been made to the lowest responsible bidder.

Owing to the increase of patients in the hospitals connected with the medical departments of the university, the purchase of equipment and supplies is given added importance, and while a store room has been provided and a good many staple articles are being bought at wholesale prices, there are still many articles that are used in large quantities, purchased at retail prices.

In many of the bills we found that purchases had been made, the cost only being given, with no indication whatever of the quantity or quality of the articles, and we would suggest that in future all purchases should in addition to cost indicate the amount, and when there are different grades also give quality as far as possible.

We believe that opportunity should be afforded for competition in the purchase of all supplies, and it could no doubt be arranged with the successful bidders to furnish the goods from time to time as they might be required. If this is done, there

would undoubtedly be a large saving effected, over purchasing at the highest retail prices.

If some person or committee connected with the University familiar with successful business methods, efficient and trustworthy, were employed to make all purchases, subject to the approval of the executive committee, we believe that more satisfactory results would be secured than by allowing many different persons to order goods, who from the nature of their vocation have neither the business experience, knowledge of values or market prices to enable them to purchase supplies to the best advantage for the state.

The treasurer's books and accounts were found to be well kept and accurate. The mortgages on real estate held by the University on June 30, 1905, aggregated \$233,945.00 with cash on hand \$1,175.00, which it was expected to loan in a short time. We commend the practice of loaning the funds of the University on farm lands in Johnson and adjoining counties, these lands being easily reached and their value readily determined.

We commend most heartily the work of the secretary in the improved methods in the keeping of the accounts, whereby we were enabled to make the examination in much less time, and with greater satisfaction than heretofore.

An examination of the records proves that the regents have been painstaking and faithful in the discharge of their duties, and that the best interests of the University have received their most careful attention.

CHAPTER XIV.

DISPOSITION OF STATE PROPERTY USED AT LOUISIANA PURCHASE EXPOSITION.

Chapter 165 of the acts of the Thirtieth General Assembly required the Louisiana Purchase Exposition Commission to deliver to us at the close of the exposition the Iowa building, including all fixtures and furnishings, and all other property acquired for the state by the commission and used at the exposition, and provided that we might do what should seem necessary and proper to protect property not owned by the state, but which had been furnished for use at the exposition, and which might come into our possession. The act required us to take possession of all the property which should be delivered to us under its provisions and cause the building to be taken down and the fixtures and materials therein and other property to be moved from the exposition grounds. The act authorizes us to make such disposition of the materials from the building and other property we should receive, as in our judgment should be for the best interests of the state. We were also authorized to distribute the property among the various institutions under our control or supervision, and to sell the building before it should be taken down, if we should deem it as advantageous to the state to do so. The sum of \$5,000 was appropriated by the act for the purpose of carrying out its provisions.

It was thought by some that the Iowa building should be taken down and reconstructed as a state institution, and thus be preserved as a lasting memorial of the Louisiana Purchase Exposition. This was found to be impracticable, because of the character of the structure and the great expense which would be necessary to reconstruct it of durable material. Moreover funds for such a purpose were available only for the Hospital for Inebriates at Knoxville, but the plan of the building was such that profitable use of it could not have been made at that institution.

In the latter part of September two members of this board with the state architect visited the exposition grounds at St. Louis to prepare for taking possession and disposing of the property contemplated by the act to which we have referred. We caused to be prepared specifications for taking down the Iowa building and solicited proposals from various contractors and others to purchase it or take it down. Early in November notices were published in daily papers of this state and of St. Louis asking proposals for the purchase of the building and also for wrecking it. These notices were supplemented by correspondence and personal interview, but were without any practical result. We were unable to secure any formal proposition to buy or wreck the building. Two of our number visited the exposition grounds a few days before the close of the exposition and after further but fruitless efforts to dispose of the building as it stood, arranged to take it down by a force we organized for that purpose. Mr. Henry Jones of Des Moines as general business agent and Mr. C. B. Williams, foreman of the industrial shop of the Clarinda State Hospital, in charge of the workmen, rendered most efficient and satisfactory service until the work was completed. Mr. P. V. Hart, engineer and electrician at the Clarinda State Hospital, rendered efficient service for a short time in taking out plumbing, electric light and other fixtures and in doing other work. These men received a moderate compensation for their labor and in addition their necessary expenses.

It was found advisable to employ watchmen for a considerable time and to furnish rooms in the Iowa building for them and for some of the other employees and this was done to the advantage of the state so long as they could be made comfortable and until the wrecking operations made it necessary for all who had been rooming in the building to find quarters elsewhere. Parts of the building were kept warm in cold winter weather by means of gas logs and gas and oil stoves, the only means available for warming it. This was done while much of the packing of furniture was being done, and one room which was kept intact so long as possible was so warmed for the benefit of the agent, foreman and workmen.

The Iowa Commission delivered to us on the 2d day of December, A. D., 1904, the Iowa building, its furniture and furnishings and the property of the state in five exposition buildings, comprising as we are informed all the property of

the state used at the exposition and not disposed of or removed by the commission. A few sales of exhibits and materials shown in the attached statement of account were made by us. All of the property owned by the state in the buildings of Agriculture and Horticulture not so sold, except the apples in the Horticultural exhibit and a few tools, were delivered to the Department of Agriculture of the state. The property so delivered included all grain, grasses, seeds and all exhibits of every kind pertaining to the Iowa exhibit in the building of agriculture, except the ear corn and potatoes sold, as elsewhere accounted for, and all cases, glass vessels of various shapes and sizes, all baskets, barrels, tools, nails, wire, step ladders, cloth, burlap, cotton batting, oil stoves, chairs, tables, triangular show-cases, glass-covered boxes, and all booth material not sold, including decorations and numerous other articles of small value, and samples of grasses and grains to be delivered to the Iowa College of Agriculture and Mechanic Arts, a map and other articles to be delivered to the Dairy Commissioner of the state.

The property so delivered from the building of Horticulture included all tables and railing used with the Iowa exhibit and an office desk, four chairs, plates for fruit, vases, cups, card holders, barrels and decoration. This property was so delivered on condition that all of the railing, tables, office desk, chairs, vases and card holders should be used for the benefit of the Department of Horticulture of the state. The apples remaining in the exhibit were also delivered to the Department to be exhibited in Des Moines and then returned. Certain iron railing used in the building of Agriculture and brass railing from the Manufactures building and a large glass case from the building of Horticulture used for the display of honey were also delivered to the Department of Agriculture. The apples, after being exhibited in Des Moines, were returned to us and sent to the Industrial School for Girls at Mitchellville.

So much of the cost of packing, loading and transporting to its destination of the property delivered to the Department of Agriculture as we felt authorized to defray was paid from the appropriation made for the purpose.

Among the property delivered to us was a large number of flags loaned to the Iowa Commission by the custodian of the State Capitol, a large glass show case and contents belonging to the Institution for Feeble Minded Children at Glenwood and

five cases of exhibits belonging to the East Des Moines High School. All of this property was returned to its owners. Of the property of the state there were delivered as follows:

One large wall map to the Executive Council;

Twenty-two large framed statistical charts used in the building of Education;

Three flags used at the Iowa building; to the Historical Department of Iowa.

A set of andirons and gas log to W. P. Payne, of Nevada, for the public library of that city.

Much preliminary work was done before the second day of December, A. D., 1904, and on that day the force we had organized commenced to collect and pack the personal property, to take down the Iowa building and remove the rubbish, and to load the furniture, fixtures and building material for shipment. This work was carried on steadily during the winter with some interruptions caused by storms and extremely cold weather until the latter part of March, A. D., 1905, when the work was fully completed. On the 28th day of that month the Secretary to the Director of Works certified that the Iowa building had been wrecked and the site restored to the entire satisfaction of the Louisiana Purchase Company and that this state was released from all obligations connected therewith.

Property of various kinds was sold for the aggregate amount of \$309.36. One large car load was shipped by the Department of Agriculture to Des Moines, two car loads of furniture and other property were shipped to Des Moines and there distributed; a part was delivered there and the remainder was sent to different institutions, ten car loads were sent to Knoxville for the Hospital for Inebriates and car loads were sent to various other state institutions. In addition, twenty-two large plaster vases, containing palms and other plants, were sent to various institutions of the state under our control. Property not needed elsewhere was sent to Knoxville.

Many of the articles delivered to us by the commission were found to be without any practical value. This was not due to any fault in the commission but to the fact that the articles had been used, were worn, or of no value to remove. This was especially true of lumber, cloth and other materials used in constructing and decorating booths and other places of exhibition, and of utensils and supplies of various kinds. The expensive interior decorations of the Iowa building were of necessity

almost wholly destroyed. The grand stairs, and other stairs, and the rich paneling and finishing of birch, including window, door and other casings, were sent to Knoxville, but the most expensive part of these, including the grand stairs, railing and panel work, cannot be used in their existing forms unless in some building planned for them. Portions of them may be used from time to time in cabinet work, or perhaps for other purposes, but the finding of any use for them is so uncertain that we have not placed any value on them.

The general rule followed in wrecking the Iowa building and the booths was to reject anything not having a special interest which would cost as much as it was worth to preserve, but when in doubt the property was saved. The result is we have a considerable quantity of material in store at Knoxville which cost much but which may not prove to be worth the cost of transportation and storage.

Statements showing the disposition of property received from the commission and its value, and the expenses incurred under the act of the general assembly specified are as follows:

PROPERTY SOLD.

1904.	
Dec. 3,	Corn, potatoes and booth material from agricultural exhibit,.....\$ 50.00

June 28,	Five sets andirons and gas logs, 15.00
Sept. 18,	One set andirons,..... 2.00

\$309.36

MATERIAL FROM THE IOWA BUILDING.

Of the material from the Iowa building about 140,000 feet of lumber were saved and shipped to this state. Of this quantity one carload of dimension lumber was shipped to the Soldiers' Orphans' Home at Davenport, one carload to the Industrial School for Boys at Eldora, one carload to the Institution for Feeble-Minded Children at Glenwood, one car load to the State Hospital at Independence, one car load to the Industrial School for Girls at Mitchellville, and the remainder, including about

12,000 feet of flooring, was shipped to Knoxville for the Hospital for Inebriates. In addition doors and door casings, windows and window casings, interior wood finish and a large quantity of plumbing and electrical fixtures and goods of various sorts were sent to Knoxville. A large number of doors, and windows, and casing, wood finish and flooring have been used in changing the old main building of the Hospital for Inebriates and in constructing a new building, and plumbing material and electrical goods have also been used in completing this Hospital.

A considerable portion of the Iowa building in the form of doors, windows, stairs, door and window frames and interior finish, and a quantity of pipe, bolts, rods and other material, none of which could be used in constructing the hospital at Knoxville, are there in store, and may be of value in the future. We show in the following statements the disposition of property received by us from the Iowa Commission and not sold as herein shown, which was considered of sufficient value to send to this state:

Sent to:

Executive Council, Des Moines,	
1 large mounted map of Iowa	(cost) \$ 1,800.00

Clay	Tank in attic	None; three interior stairways well located	One well and cistern	None; same to be supplied at once	Satisfactory, empties into cess-pool	Properly connected	Ventilators in ceiling	Lamps	Hot water	Very good	Good
Clayton	City fire protection	Two	City water	150 ft. 2½ in. hose	Good	Properly connected	Air flues and registers	Electricity	Steam	Very good	Good
Clinton	Large elevated tank and fire extinguishers	One outside stairway	One deep well	400 ft. 1 in. 30 ft. 2 in. hose	Good	Properly trapped	Ventilators in each room	Acetylene	Steam and hot air	Good	Good
Dallas	Large elevated tank and two air pressure tanks	One	Three wells and two cisterns	300 ft. 2 in. hose	Good	Properly connected	Air flues	Electricity	Steam	Very good	Good
Davis	Tank in attic	Two covered porches	One well	None	Good	Properly connected	Doors and windows	Lamps	Steam	Very good	Good except 1 room

TABLE NO. 8-CONTINUED.

County.	System.	Fire Protection.				Sanitary Conditions.					
		Fire escapes.	Source of water supply.	Fire hose.	System of sewerage.	Bath room and closet connections.	Method of ventilation.	Artificial light.	Method of heating.	Condition of rooms.	
										Care of	Light
Decatur	Compressed air tank in basement	One	One well and cistern	100 ft. 1½ in. hose	Good	Well trapped	Doors and windows	Lamps	Steam	Good	Good
Delaware	Nine chemical fire extinguishers	None	One deep well	None	Pipes lead to big tub from bath tub		Air flues	Lamps	Steam and stoves	Fair	Good
Des Moines	Compressed air tank in basement	Four	Two wells	Plenty on each floor	Good	Properly trapped	Direct and indirect system	Gasoline gas	Steam	Neat, clean, orderly	Good
Dubuque	Tank in attic; three fire extinguishers	One	Deep well and cistern	300 ft. 1 in. hose	Tile drain		Doors and windows	Lamps	Hot air and stoves	Clean and orderly	Fair
Fayette	Elevated tank	Two	125 ft. well and cistern	340 ft. 1½ in. hose	Good	Properly trapped	Air flues	Lamps	Steam	Excellent	Good
Floyd	Tank in attic	One	1 deep well and cistern	20 ft. ¾ inch hose	Good	Properly trapped	Doors and windows	Lamps	Hot water	Good	Good

TABLE NO. 8—CONTINUED.

County.	Systems.	Fire Protection.		Sanitary Conditions.				Condition of rooms.	
		Fire escapes.	Source of water supply.	Fire hose.	System of sewerage.	Bath room and closet connections.	Method of ventilation.	Artificial heating.	Care of
Franklin	Air pressure tank in basement	None; covered porch	Well	200 ft. 1 in. hose	Good; empties into cesspool	Properly trapped	Doors and windows	Lamps	Hot air
Fremont	Air pressure tank in basement	One	Two wells and two cisterns	100 ft. 1 in. hose	Good	Properly trapped	Doors and windows	Lamps	Steam
Grundy	None	None	Well and cistern	60 ft. 1 in. hose	None		Doors and windows	Lamps	Hot air
Hamilton	Tank in attic and four fire extinguishers	One	Two wells and two cisterns	None	Good; empties into creek	Properly trapped	Doors and windows	Lamps	Hot air
Hancock	Tank in attic and six fire extinguishers	None; three covered porches	Well and two cisterns	100 ft. 1 in. hose	Good	Properly connected	Doors and windows	Lamps	Steam

Hardin	Small tank in attic	None; three covered porches	One deep well and two cisterns	None	Empties into cesspool	Properly connected	Doors and windows	Lamps	Steam	Good	Good
Harrison	Elevated tank	None	Spring	120 ft. 1 in. hose	None		Doors and windows	Lamps	Steam	Fair	Good
Henry	Tank in attic and two fire extinguishers	One	Spring	180 ft. of 1 1/2 in. hose	Good	Fair	Flues	Lamps	Steam	Fair	Good
Jackson	Tank in attic	One	One deep well and three cisterns	None	Good	Properly trapped	Ventilators	Lamps	Steam		Good
Jasper	Air pressure tank in basement	One	One deep well	120 ft. 1 in. hose	Good	Properly connected	Doors, windows and flues	Lamps	Steam	Good	Fair
Jefferson	20 bbl. tank in attic	One	Two deep wells and cistern	200 ft. of 1 in. hose	Good; empties into creek	Well trapped	Flues	Lamps	Steam	Excellent	Good
Johnson	100 bbl. elevated tank	Five	Two wells and three cisterns	Plenty of floor	Good; empties into creek	Properly connected	Flues	Lamps	Steam	Good	Fair
Keokuk	Large elevated tank	Two	One deep well	Plenty of good new hose	Good	Properly connected	Flues	Gasoline lamps	Steam	Good	Fair

TABLE NO. 8—CONTINUED.

County.	System.	Fire Protection.			Sanitary Conditions.							Condition of Rooms.	
		Fire escapes.	Source of water supply.	Fire hose.	System of sewerage.	Bath room and closets and other conveniences.	Method of ventilation.	Artificial light.	Method of heating.	Care of	Light		
Kossuth	Small attic tank	None	Well and cistern	None	Defective permits gas to escape	Good	Doors and windows	Lamps	Hot water			Good on first and second floors; poor on third	
Lee	Tank in attic and four fire extinguishers	Four	Two wells and two cisterns	20 ft. of $1\frac{1}{2}$ in. hose	Good	Properly trapped	Doors and windows	Lamps	Steam	Fair	Fair		
Linn	Elevated tank	Two	Three deep wells	30 ft. of 2 in. hose on each hall	Good	Properly connected	Air shaft	Lamps	Steam	Good	Good		
Louisa	40 bbl. elevated tank in attic	Two	Deep well and cistern	25 ft. of $\frac{1}{2}$ in. hose	Good	Properly trapped	Flues	Gasoline gas	Steam	Good	Good		

Lucas	Two tanks in attic	Interior stairways ample	Well and cistern	None	Empties into ditch	Properly trapped	Flues	Lamps	Steam	Good	Good		
Mahaska	Elevated tank	Two	Four wells and cistern	150 ft. of $\frac{3}{4}$ in. hose	Good	Properly trapped	Doors and windows	Lamps	Steam		Fair		
Marion	Elevated tank	None	Deep well	150 ft. of $\frac{3}{4}$ in. hose	Good; empties into creek	Properly connected	Doors and windows	Lamps	Hot air	Fair	Fair		
Marshall	Elevated tank and six fire extinguishers	One	Deep well	150 ft. of $\frac{1}{2}$ in. hose	Good	Properly trapped	Air flues	Acetylene gas	Steam	Good	Good		
Mills	None	None; three interior stairways fairly well located	One well and cistern	None	None		Doors and windows	Lamps	Stoves	Fair	Good		
Mitchell	None	One	One well and two cisterns	None	Tile drain from bath tub	Good	Doors and windows	Lamps	Hot air	Fair	Good		
Montgomery	Two tanks in attic	One	One deep well and cistern	220 ft. 1 in. hose	Good	Properly trapped	Flues	Lamps	Steam	Excellent	Good		
Muscataine	40 bbl. elevated tank	One	Deep well	150 ft. $2\frac{3}{4}$ in. hose	Good	Properly trapped	Flues	Acetylene gas	Steam	Good	Good

* The quantities and aggregate cost value of breadstuffs and sundry provisions and other articles or supplies consumed are not given because the standards of measurement differed among the various institutions. Beginning July 1, 1905, uniformity has been enforced and such aggregates can be shown in the future.

The amounts specified are not comparable with the returns given in tables 5 and 34 for the reason that the figures given above represent the cost value of goods actually consumed, whereas the returns in the tables referred to represent the expenditures of funds by the Board in the purchase of supplies.

TABLE NO. 10—FINANCE

REPORTED VALUE OF PRODUCTS OF FARM, GARDEN, ORCHARD,
JUNE 30,

	Soldiers' Home, Marshalltown.	Soldiers' Orphans' Home, Davenport.	College for the Blind, Vinton.	School for the Deaf, Council Bluffs	Institution for Feeble-Minded Children, Glenwood.

a The Twenty-second General Assembly, chapter 121, amended by the Twenty-third General Assembly, chapter 58, in addition to per capita, granted the sum of \$1,050.00 per month for salaries and wages. Prior to May 16, 1890, the sum of \$6,000 00 per annum was allowed for this item.

b The Twenty-sixth General Assembly, Code section 2608, granted \$13,000 00 per annum for salaries and wages of officers and employees, to take effect October 1, 1897. This was amended by the Twenty-seventh General Assembly, chapter 72, fixing the per capita allowance at \$1400 per month, to take effect July 1, 1898. This allowance now includes salaries and wages, the \$13,000.00 per annum appropriation mentioned above having been repealed.

c The Twenty-ninth General Assembly, chapter 113, granted \$10 00 additional for "each officer and employee not a member of the home."

*The Nineteenth General Assembly, chapter 166, section 2, in addition to the per capita allowance, granted \$10,000 per annum for the support of the college and to meet ordinary expenses.

The Twenty-seventh General Assembly, chapter 82, made a reduction July 1, 1898, and continued the appropriation of \$10,000 per annum.

The amounts given in this column will not agree with published reports of institution, as the salaries of the secretary and treasurer of the board of trustees are here deducted; the same are included under total expenditures.

The Twenty-ninth General Assembly, chapter 121, changed the allowance from a quarterly to a monthly per capita for nine months of each year.

*The Nineteenth General Assembly, chapter 166, section 1, in addition to per capita allowance, granted \$21,000 to pay salaries of officers and teachers. See laws of Twentieth General Assembly, chapter 166, requisition for vacation quarter based on average number of pupils in attendance the last previous quarter.

The laws of the Twenty-seventh General Assembly, chapter 83, section 1, includes salaries and wages, appropriation in note "a" having been reduced to \$18,000; per capita allowance granted only for the nine months of the school year.

Includes salary paid treasurer of board of trustees.

The Twenty-ninth General Assembly, chapter 122, changed the allowance per capita from a quarterly to a monthly sum limited to nine months of each year.

* The Nineteenth General Assembly, chapter 40, section 9, prior to April 18, 1895, in addition to the per capita allowance, granted the sum of \$11,000.00 "for the ordinary expenses of the institution, including furniture, books, school apparatus, and compensation of officers and teachers." At this date the per annum allowance was raised to \$22,000.00 per annum (see Laws Twentieth General Assembly, chapter 50), and it was directed that "other employees" should also be paid out of this fund.

† The Twenty-seventh General Assembly, chapter 79, made a change April 12, 1898. This allowance includes items mentioned in Note.

‡ Includes salary paid treasurer of board of trustees.
