# IOWA STATE BOARD OF EDUCATION

D. D. MURPHY, President.....Elkader  
W. H. GEMMILL, Secretary.....Des Moines

## MEMBERS OF THE BOARD.

TERM EXPIRES JULY 1, 1915.

James H. Trewin.....Cedar Rapids  
Roger Leavitt .....Cedar Falls  
Edw. P. Schoentgen .....Council Bluffs

TERM EXPIRES JULY 1, 1917.

A. B. Funk.....Spirit Lake  
Geo. T. Baker.....Davenport  
H. M. Eicher.....Washington

TERM EXPIRES JULY 1, 1919.

P. K. Holbrook.....Onawa  
Chas. R. Brenton.....Dallas Center  
D. D. Murphy.....Elkader

## STANDING COMMITTEES.

Faculty Committee—D. D. Murphy, James H. Trewin, A. B. Funk, P. K. Holbrook, H. M. Eicher.

Building and Business Committee—Chas. R. Brenton, James H. Trewin, Edw. P. Schoentgen, Geo. T. Baker, Roger Leavitt.

## FINANCE COMMITTEE.

W. R. Boyd, Chairman.....Cedar Rapids  
Thos. Lambert .....Sabula  
W. H. Gemmill, Secretary .....Des Moines

## INSPECTORS OF SECONDARY SCHOOLS.

P. E. McClenahan, Inspector .....Des Moines  
John E. Foster, Assistant.....Des Moines  
Leslie I. Reed, Assistant .....Des Moines

## LETTER OF TRANSMITTAL

---

DES MOINES, IOWA, SEPTEMBER 30, 1914.

*To His Excellency, G. W. Clarke, Governor of Iowa.*

Sir: In accordance with Section Nineteen of Chapter One Hundred and Seventy of the Acts of the Thirty-third General Assembly, I herewith transmit to you a report of the observations and conclusions of the Iowa State Board of Education respecting each of the institutions under its control, including also its report to the Legislature. This report contains also the reports of the executive officers of the several institutions under the control of the Board.

Very respectfully,

D. D. MURPHY,  
President.

## REPORT OF THE IOWA STATE BOARD OF EDUCATION

---

*To His Excellency, G. W. Clarke, Governor of Iowa.*

SIR: Chapter 170 of the laws of the Thirty-third General Assembly, creating the Iowa State Board of Education, makes it the duty of the Board to report to the Governor and Legislature its observations and conclusions respecting each of the following institutions: The State University, the State College of Agriculture and Mechanic Arts, and the State Teachers College, including the regular biennial report to the Legislature, covering the biennial period ending June 30th, preceding the regular session of the General Assembly. According to Chapter 141 of the Acts of the Thirty-fourth General Assembly, all control over the College for the Blind was transferred to the Iowa State Board of Education. Obedient to the obligation thus imposed, the Third Biennial Report is respectfully submitted.

The report of this Board to the last General Assembly was largely taken up with the presentation of the Board's program for the co-ordination of the three institutions of higher learning under its control. As stated therein, this action was undertaken in an effort to perform what the Board believed to be a duty imposed upon it by the General Assembly which created it. Opposition developed; it was organized and made appeal to the General Assembly. The General Assembly, by resolution, requested the Board to rescind its order of October 8, 1912, making certain changes in the courses of study at the State University, the State College of Agriculture and Mechanic Arts, and the State Teachers College. This request was complied with, and the Board has from that time sought in good faith to develop these institutions along the lines thus designated by the General Assembly. Manifestly, such a course entails expenditures inherent in such a system. This fact should be recognized when it comes to the consideration of requests for maintenance and development.

### LEGISLATIVE BUDGETS FOR THE BIENNIUM 1915-1917.

In making up the legislative budgets for the next biennium, we beg to say that the Board has exercised the greatest care in the

consideration of the askings of the Presidents of the several institutions. We recognize the fact that extraordinary and unforeseen conditions prevail, incident to the great war that is devastating Europe, demoralizing markets, curtailing credit, and clouding the future. Iowa as an agricultural state is as favored a spot as can be found on the face of the earth today, but even we may not escape the evil effects of the wholesale destruction of life and property resulting from this terrible conflict of nations.

These askings were first considered with the Presidents of the several Institutions at two meetings of the full Board. Every detail was gone over carefully. These discussions developed the Board's views. The askings were then referred to the Finance Committee for further investigation and report. This Committee gave much time and thought to this work, and, after a full consideration of the matter as a whole and in every detail and in the light of the Board's ideas as expressed in previous discussions, submitted a carefully considered report which was, in turn, carefully considered by the Board at a meeting held October 14th, 1914. The Board then agreed upon the askings to be made and they are set out in detail farther on in this report.

Our effort has been to assist the General Assembly to the fullest extent. We have failed to approve many a request which we would gladly have approved on its merits; but our dominant thought has been to make, at this time, no request for increased appropriations not absolutely necessary to the demands of the present hour and the immediate future. We cannot too emphatically state that we have brought these askings to an irreducible minimum. The legislative budgets are presented in detail, beginning on page 37.

#### PROBLEMS ALWAYS WITH US.

1. *Reasons for Increased Expenditures.* It is not alone the growth of these educational institutions in numbers that calls for constantly increasing support funds. More than the growth in numbers is the ever widening field of educational endeavor. Many high schools are today farther advanced in the matter of equipment and laboratory facilities, in general, than some very excellent colleges were thirty years ago. In large part, this expansion in education has been the direct result of popular demand for it. A university or a college is no longer looked upon as a segregated spot where scholars meet a select body of young people for purely

academic purposes. They are looked upon as great workshops, where world problems of the most practical nature are being worked out for the general good. While universities and colleges still maintain the scholastic ideal, they are more and more realizing that it is their duty to render to their immediate constituents and to the world at large a type of service which the educational institutions of our forefathers never dreamed would be attempted. Thus it has come about that, in all the great institutions of the country, many of the ablest and highest priced men do not teach at all. Their work is wholly along the lines of research; and the notable accomplishments of these men, working silently, sometimes for years, in their laboratories, are priceless. Who can compute in dollars and cents the value of Flexner's discovery and isolation of the spinal meningitis bacillus; and if, perchance, he has discovered and isolated the germ which causes infantile paralysis, who will be so bold as to reduce that to a monetary basis, albeit the monetary value will be enormous?

A considerable portion of the increased appropriations asked of the 36th General Assembly for these educational institutions is for the purpose of enlarging their scope in the direction of service to the public, rather than to serve especially the comparatively few who are at work for degrees. We believe that every laboratory supported by the State can be made to do a direct service to the people at large, and we believe that it is the duty, as well as the opportunity, of the State College of Agriculture and Mechanic Arts, through the medium of short courses in agriculture, home economics, and trade school courses in engineering, to render inestimable service to that large body of young men and young women who cannot take a four-year college course and who, perhaps, might not be benefited if they did take it. It is the Board's desire that these courses be increased in number and liberalized to such an extent that no young person who can be benefited thereby shall be excluded.

If the scope of our institutions had been held down to the old basis, we should years ago have given over asking increased appropriations, except as increased numbers necessitated such asking; and this factor alone would have been inconsiderable. Taking all these things into consideration, the askings of the Board for the next biennium are modest. We have not endorsed any asking and passed it up to the Legislature with our endorsement without convincing ourselves of its absolute necessity. On the other hand, we have withheld endorsement, for the time being, of not a few

propositions which we thoroughly approve, but which we withhold for what would appear to be a more auspicious time.

2. *Care of Individual Needs of the Student Body.* It will be conceded that the two most important things to be considered in connection with the students who now come in such large numbers to our institutions of higher learning, just as they leave the high school, are their physical and moral welfare. The great problem in this regard is how to best conserve these two things. There is undoubtedly an impression in the minds of many that students who attend large institutions do not receive the individual attention that is necessary to safe-guard them in these respects. This, however, is not correct, so far as the State educational institutions of Iowa are concerned. It always has been the policy and tradition of these institutions to look, first of all, to these fundamentals without which other attainments are of no value:

First. To see that the health of the young man and woman is conserved and developed, and,

Second. To see that they are safe-guarded and surrounded by proper moral influences.

There is an extreme in which this safe-guarding may run into paternalism, and this is to be avoided, as well as the other extreme of permitting young people to do as they please; for it has a tendency to destroy all initiative and judgment and will prevent the building up of that character and individuality which is the end sought by their attendance at such institutions. The necessary thing is such proper supervision as will develop individuality, strengthen ideals and implant right motives.

In the matter of attention to the physical well-being of students, reference may be made to athletics. These are valuable and we would not under-estimate their benefit. They reach, however, only a small minority, and even that for only a part of the year, and those reached are the ones least in need of physical exercise. To preserve the health of the youth, to correct any physical defects and to provide exercises for bodily development for the entire student body should be the main object sought. The ideal system is one where each student would be required to undergo a most careful physical examination at the hands of a specialist and then be turned over to a competent physical director whose business it would be to see that the needs of the individual student are supplied. No argument is necessary to show the importance of

this training, for good bodily health lies at the very basis of every achievement in this strenuous age. This points the duty of those who have charge of our higher educational institutions to provide adequate facilities for taking care of the physical needs of the students. So far as buildings and equipment for this purpose are concerned, very fair provision has been made at each one of the State institutions, but in the matter of the direction of this work there still remains much to be desired, and this is one of the things for which the Board hopes to be able to make ample provision in the near future.

So far as personal supervision of students is concerned, ample provision has been made. At each of the institutions there is a Dean of Women who devotes her entire time to the welfare of the girls under her charge. This official acts not only as an adviser, but as a supervisor. Recently a system of advisers for men has been worked out at each of the institutions and the boys are now as carefully looked after as the girls, in all matters that affect their physical and moral well-being. No student at any of the institutions is allowed to drift. Each one is guided carefully and wisely. Along with this faculty supervision and under its inspiration and direction, there has grown up a feeling of responsibility on the part of the more advanced classes. They aid, in every possible way, in safe-guarding the welfare of new students and starting them out in the proper way. Freshmen are no longer waylaid by hazing parties, but are welcomed by carefully selected committees of upper classmen, who, in a most helpful and kindly spirit, assist them in finding good places in which to live, and introduce them into the social activities of the institution. So marked has been this innovation that it has been commented upon in educational circles throughout the country.

#### DORMITORIES.

One of the first impressions that the Board of Education gained on taking over these institutions was this: That at each college the facilities for housing and feeding the students were inadequate. The first biennial report contained an argument in favor of the establishment of a dormitory system. Other and seemingly more pressing demands upon the funds available for building purposes have prevented the Board's making more than a beginning along this line, but the results of these beginnings have more than justified the Board's original thought in this matter. The dormitory

for girls at the University, designated as Currier Hall, was opened in September, 1913. Every room available was engaged in advance of its completion, and if we had at the University today three times that space, every room would be engaged in advance of the school year. Parents are insisting that their daughters be taken care of after this fashion.

Margaret Hall at Ames, which was built in 1895, has room for 94 young women and has long illustrated the useful ends attained by such a provision for student welfare. With the large increase of young women at this institution has come an insistent demand for increased dormitory facilities. This is met, in part, by the erection of a building which will take care of 74 young women, while at the State Teachers College a building to accommodate 130 is now in process of construction.

So far, nothing has been done for young men, but the Board believes that no better use of state funds could be made than to appropriate a sufficient amount to provide, at each of the institutions, a dormitory system which would at least care for the freshmen. The views here expressed seem to be those generally held by persons who have had experience in such matters, and they are being put into effect as rapidly as possible. One other thing needs to be emphasized in this connection. A dormitory system can, under proper management, be in effect a permanent endowment. Properly conducted, a dormitory ought to be made to pay at least savings bank interest. In the East, many of the colleges find that the most profitable investment of their endowment funds, in the way of interest returns, is that portion which is invested in dormitories.

The natural sequence of a dormitory system is to make provision for feeding students properly. The experience at Currier Hall at the University, and Margaret Hall at the State College, proves that good board, furnished under the most sanitary conditions, can be provided at a moderate cost.

The Board has now under investigation plans for establishing, at each of the institutions, cafeterias, where good wholesome food can be furnished to students at the lowest possible cost. Pending the working out of these plans in detail, no effort is being spared to do everything that can be done to safeguard student interests along these lines. The State Food and Dairy Commissioner has been asked by the Board to inspect all places where food is offered for sale to students at Iowa City, Ames, Cedar Falls, and Vinton.

Commissioner Barney is co-operating with the Board in the best possible spirit. Local water supplies are carefully looked after, so far as the Board has jurisdiction. Where anything suspicious has developed, provisions have been made to furnish the buildings a supply of pure water.

#### REPORTS OF THE REGISTRARS.

The reports of the Registrars of the State University, the State College of Agriculture and Mechanic Arts, and the State Teachers College, contain valuable and interesting statistics regarding the number of students who have been enrolled during the biennium, their distribution, and many other important facts. These data deserve careful consideration. While figures are sometimes uninteresting, yet, for those who desire it, the tables that appear in this report contain much information concerning the institutions under the control of the State Board of Education. A careful comparison of these tables with those appearing in the last report will show wherein the institutions have grown and developed during the biennium.

#### SUMMER SCHOOLS.

The extraordinary and unforeseen growth of the summer school is an event of no small importance. Its value cannot be estimated. Hundreds of teachers who are denied the privilege of attending school during the regular year, are taking advantage of the excellent opportunities thus afforded them. Many earnest students who must labor during the rest of the year avail themselves of the privileges offered by the strong courses in the summer schools.

It is wasteful to have these large plants lying practically idle during the three summer months. It is to be hoped that before long Iowa institutions of higher learning will have sufficient appropriations to provide for instruction during the entire year.

#### MATTERS OF SPECIAL INTEREST.

The Board's policy toward professional schools at the University, and toward the development of short courses in agriculture, home economics and trade schools, and trade schools extension work at the State College of Agriculture and Mechanic Arts, was set out in detail in our report to the Thirty-fifth General Assembly; and we would respectfully call attention thereto, and to the following additional matters which demand attention:

*The Graduate College.* The time has come for more effective recognition of the needs and the possibilities of the graduate college. It embodies the highest ideals of culture, refinement, investigation, and scholarship; and it is the one college to which all the other colleges and divisions lead and in which they all culminate. Its function is research and the training for research. These research problems cover the principal fields of the human mind. The output in trained investigators and in contributions to science, literature, and art is splendid; but the work has never received the financial impetus which it deserves. Graduate work, therefore, is in the midst of a critical transitional period. No one can reasonably doubt the mission of the State in promoting research in pure science, for that is the largest, most effective and most permanent way of making knowledge useful. It should, however, be remembered that the tendency of research at the present time is distinctly toward applied science. The principles and the spirit of pure science are effectively carried out in applied science. The tendency at the present time is to apply science to life, and in this the graduate school holds the highest leadership. It delves into actual problems of education, of health, of beauty and comfort, of society, of government, of plant and animal growth, of manufacture and machinery. All these now present fertile fields of scientific investigation.

*Schools of Education.* Never has the public regarded the teaching profession so highly as at the present time. Never has the influence of the teacher been so marked. The demand for competent teachers is increasing every year. Recognizing that the teacher is such an important factor in the life of every boy and girl, the Board has earnestly considered the preparation of trained teachers, and it has provided special teacher training courses in each of the State institutions of higher learning. The following is a resume of the work done in each of the institutions:

1. *College of Education of the State University.* Not only is the scholastic side of education developed in this College, but training for expert service in teaching is also provided. In addition to courses in the organization, management and supervision of schools, courses relating to all secondary school subjects are offered. Recently arrangements have been made with the board of education of the Iowa City public schools whereby a plan of co-operation has been established so that students of the college of education who are preparing to teach in high schools may have observation

lessons and practice teaching. The Board intends to develop this model school to the highest degree of efficiency.

The Board hopes to establish an experimental elementary school where practical problems will be solved for the benefit of students who expect to become city superintendents.

2. *Department of Agricultural Education of the State College.* The establishment of agricultural education at the Iowa State College of Agriculture and Mechanic Arts was the direct result of legislative action requiring all teachers to qualify in agriculture, home economics and manual training.

The larger recognition of agriculture and the industries suggested in the courses of study, is in keeping with the very best school theories that the interests of the community should receive vital recognition in school work.

Recent investigations show that farming is unusually permanent. This means that it is possible to educate farmers and thereby insure the results of that education to the State and the community.

What is true of agriculture for men is equally true of domestic science for women. Girls work in the home as children and all look to the home as their final and permanent work. We are quite sure that the teaching of home economics on a practical basis to the girls of the State will produce good results in the life of the State and the community.

3. *Iowa State Teachers' College.* The work that is being done at the State Teachers' College in the preparation of kindergarten teachers, primary teachers, grade teachers, and teachers of home economics is so well and favorably known that further comment is unnecessary.

During the last biennial period the Board has erected a special building, costing \$150,000.00, for the home of laboratory work in teaching. This building is one of the most modern and best equipped structures in the United States for the practical phases of education. The various departments are supervised by the director of professional training in teaching, and are managed by an organized faculty, all of whom are especially qualified to conduct the business of teacher training.

*Study Centers.* During the latter half of the academic year of 1913-1914, the State Teachers College organized what is known as teacher study centers, in the counties that are near to Cedar Falls. By this method, instruction is given by various members of the faculty who go to the different counties where the teachers are employed and meet them in classes on Saturdays. This is an undertaking in which the teachers are given superior help at the least possible expense. Eight counties volunteered to co-operate with the Teachers College in attempting such organized instruction, and the results of the efforts obtained have proved that such a method of instruction and management is desirable. This year, centers will undoubtedly be organized in at least twenty-five counties. With sufficient financial support to provide for the necessary instruction, supervision and direction, this system can be expanded until it has reached every teacher in the State, and especially those who need specific instruction in school management and in a better spirit of endeavor. It is the judgment of the Board that this kind of work is of the greatest value and should have the largest encouragement.

A full discussion of this plan is given in the report of the President of the State Teachers College under the title "The Teachers' Study Center System."

*Rural Demonstration Schools.* Educators agree that the great problem in education today is that of the rural school. With this fact in mind, a department for the training of teachers for such schools was established at the State Teachers College during the past year. In order to provide efficient teacher training for those enrolled in the department, ten rural independent school districts, within a radius of six miles from Cedar Falls, are affiliated with the college. The organization of these demonstration schools is somewhat similar to that of the training school located on the campus.

A full discussion of this plan is given in the report of the President of the State Teachers College, under the title of "The Rural Demonstration School and the Teachers' College."

*College of Dentistry.* The College of Dentistry at the University has been doing the best work possible with the funds available; but the time has now arrived when the necessities and standards of the times demand that the same policy inaugurated for the development of the College of Medicine some years ago be applied

to the development of the College of Dentistry. Increased laboratory facilities are imperative. The faculty should be strengthened by the addition of a number of high-class specialists. The increased enrollment in this department of the University this fall has been very embarrassing, because funds were not available for the employment of a sufficient number of additional instructors to take care of this increase as it should be taken care of.

The Board has it in mind, both in the College of Dentistry and the College of Medicine, to rearrange the tuition fees so that non-resident students will contribute a sum that will approximately reimburse the state for the expenditures made in their behalf.

*College of Homeopathic Medicine.* It was the opinion of the Board of Education that the best interests of the students in the College of Homeopathic Medicine would be served by having them take an increased amount of instruction in the regular College of Medicine. The didactic work, that is anatomy, physiology, and chemistry, has for many years been taken in common. Two years ago the Board ordered that the work in surgery,—eye, ear, nose and throat, gynecology and obstetrics—should be taken in common, because in these departments the work is identical. The legislature, however, thought best to order the re-establishment of these chairs as distinct parts of the College of Homeopathic Medicine. If this policy is to be continued, the responsibility thus assumed should be followed by a substantial appropriation for the maintenance and development of these departments as distinct from similar departments of the regular college. In justice to this college, and as a logical result of the legislative policy already referred to, the hospital facilities of the College of Homeopathic Medicine should be increased. The building now used as a homeopathic hospital is small, illy arranged and poorly constructed. The faculty of the College of Homeopathic Medicine has asked the Board to appropriate money out of the millage tax to increase the hospital facilities. On account of other very pressing demands, the Board has not been able to see its way clear to do this.

#### COLLEGE FOR THE BLIND.

The Board of Education is greatly gratified at the progress made at the College for the Blind. When the legislature entrusted this institution to the care of this Board, a systematic study of

schools of this character was entered upon, to the end that the Board might have an intelligent knowledge of what was being done in this field of endeavor and of how far our own institution fell short of approximating modern standards.

Thanks to the generosity of the 35th General Assembly, this institution is now comfortably housed. The building has been practically made new, sanitary and safe. In the near future a kindergarten building should be erected to take care of the younger students apart from the older students. This is a policy which prevails in the best institutions throughout the country, and should be inaugurated here; but, in view of the many demands to be made upon this legislature, this asking is deferred; and the 36th General Assembly will be asked for a comparatively modest sum for the additional needs of this institution. This will be set forth elsewhere under the proper heading.

In this connection, we would like again to call attention to the imperative need of some action which would bring before the public in the most forcible manner the methods that should be everywhere understood and employed for the prevention of blindness. It is a sad fact that a considerable portion of blindness might have been prevented if, first, doctors and midwives had done their duty when the child was born; and, second, if proper care had been exercised when accidents happened to the eye. The eyes of every child, irrespective of who its parents may be, should be treated at birth in such a manner as to insure against ophthalmia neonatorum. The process is very simple, and could be administered by inexperienced persons if they simply knew what to use and how to use it. A second most prolific cause of blindness is sympathetic ophthalmia, which means the loss of vision in an uninjured eye through sympathy with one that has been injured. A general knowledge of a few simple facts would reduce by a large percentage this most pitiful affliction. Whatever can be done through statutory enactment should be attempted.

#### CARE OF PHYSICAL PROPERTY.

Once more the Board refers, with a feeling of satisfaction, to what has been accomplished in the direction of better care of physical property of the institutions under its jurisdiction. The value of this physical property aggregates many millions of dollars. Its maintenance and up-keep is most important. The sev-

eral superintendents of buildings and grounds are carefully trained and thoroughly competent experts, not only in construction, but in all matters incident to heating, lighting and ventilation. By reason of this fact, we have a system of administration that is well-nigh perfect. The economies effected have been many, and the amount saved annually is many times the salaries of these men.

#### COLLEGE ARCHITECTURE.

The style of architecture adopted by the State Board of Education for new buildings erected at the various state educational institutions is simple, dignified and appropriate. The lighting is exceptionally good, and increases materially the educational efficiency of laboratory, lecture and class rooms. The construction throughout is fireproof. While ornamentation and decoration have been reduced to a minimum, yet the buildings are beautiful, harmonious and imposing. There has been no false economy. In all of the new buildings at each institution, the plan that is now established will be followed, with variations to suit local conditions.

#### NEW BUILDINGS.

During the last biennium, the following buildings have been constructed at the state educational institutions:

##### STATE UNIVERSITY.

Women's Dormitory (Currier Hall).  
Addition to the University Hospital, West Wing.  
Hospital Heating Plant.  
Improvements in Chemical Building.  
Store Room.  
Engineering Shops Foundry.  
Nurses' Home (under construction).  
Men's Gymnasium (under construction).  
Women's Gymnasium (under construction).  
Animal House.

##### IOWA STATE COLLEGE.

Chemistry Building.  
Steam and Gas Engine Laboratory.  
Transportation Building.  
Hog Cholera Serum Plant.  
Women's Dormitory (under construction).  
Plant Propagation Building (under construction).

## THIRD BIENNIAL REPORT

## STATE TEACHERS COLLEGE.

Training School.

Women's Dormitory (under construction).

## COLLEGE FOR THE BLIND.

Remodeling and Extension of Main Building.

## MILLAGE TAX.

It becomes necessary to ask the 36th General Assembly for a renewal of the millage tax. The first levy should be made in 1917, and for four years thereafter. In view of the fact that valuations have increased, the Board will not ask for as large a tax as has hitherto been levied, namely one-fifth mills each for the State University and the State College of Agriculture and Mechanic Arts, and one-tenth mills for the State Teachers College; but, in lieu thereof, would suggest the following:

For the State University of Iowa.....	$\frac{3}{20}$	mills
For the State College of Agriculture and Mechanic Arts.....	$\frac{3}{20}$	mills
For the State Teachers College.....	$\frac{1}{20}$	mills

No other fiscal policy inaugurated by the State has been productive of better results than this method of providing for the physical needs of the several institutions. This method has enabled the governing boards to map out for each of the institutions, a comprehensive plan of future development, which, when completed, will give us as well housed institutions as can anywhere be found. Practically every building constructed out of the millage tax is fireproof. The increased initial expenditure has been more than compensated for in the lessened cost of up-keep, in safety to valuable public property, and, in the case of dormitories, in safety to human life.

BRIEF REPORT OF THE WORK DONE BY THE HOG CHOLERA  
SERUM PLANT LOCATED AT IOWA STATE  
COLLEGE, AMES, IOWA.

The last Assembly made an appropriation of \$35,000 to provide for the production of biological products, especially hog cholera serum and for the distribution of this product and virus. The same law and appropriation cover the careful supervision of plants within the state which were making and distributing these products. Records are available to prove that the serum and virus distributed from the new plant at Iowa State College

during the past season have effected a saving of not less than \$3,000,000 to the state. When the law became effective, there was already a heavy demand for reliable serum and virus, and temporary quarters were provided so that the work might start as promptly as possible. Permanent buildings are now in use, representing an expenditure of about \$20,000, while stock and cash on hand represent a value almost equal to the original appropriation.

Permits to use virus have been issued to more than 1,200 veterinarians and farmers. These permits, under the law, are given only to farmers who wish to use the virus in their own herds or to practicing veterinarians who are deemed competent. Most of the persons holding permits visited the laboratory and received instruction before being authorized to use virus.

Fifty-nine permits have been issued to commercial concerns selling serum and virus within the State. Four of these permits have been revoked on account of serum not meeting the required standard. Seven applications for permits to sell serum and virus have been refused. Very great care has been taken in connection with authorizing distribution and use of virus.

With the aid of the Agricultural Extension Department, much educational work has been done in all parts of the State. Four veterinarians are engaged constantly in this work and their efforts have been liberally supplemented from time to time.

It is worthy of note that, owing to the limitation of the State funds and the need of getting the work started rapidly, over \$12,000 was advanced by private individuals and concerns, including several banks, so that a larger quantity of serum could be manufactured and placed in storage last winter awaiting a heavy demand which was expected to come; and it did come, early in the summer season.

Altogether practically 10,000,000 cubic centimeters of serum have been produced, and 4,714 herds have been treated, with the showing that in healthy herds  $2\frac{8}{10}\%$  of the hogs died after treatment with serum alone, which is considered a remarkably good showing; with the simultaneous treatment the loss was only  $2\frac{2}{10}\%$ . Elsewhere the corresponding loss has been reported as high as 8%. Often the treatment is not applied until a con-

siderable portion of the hogs are sick, but even in such cases the records show favorable results. Where serum alone was used the loss after treatment was 29% and where the simultaneous treatment was used the loss in diseased herds was 11%. In both cases the percentage of sick hogs in the herds was higher than the percentage of deaths after treatment. The simultaneous treatment is used in the majority of cases, and reports show that in 76% of the herds having this treatment there was not a single loss.

# THIRD ANNUAL REPORT

OF P. E. McCLENAHAN, INSPECTOR OF SECONDARY SCHOOLS,  
TO THE IOWA STATE BOARD OF EDUCATION  
FOR THE YEAR ENDING JUNE 30, 1914

*To the President and Honorable Members of Iowa State Board of Education.*

GENTLEMEN: The present Inspector of Secondary Schools has just completed his third year of work under your direction, and now deems it proper that he make a definite, complete report of the work under his supervision.

## INTRODUCTION.

The question is frequently asked, "What is the matter with our schools?" No one feels they are perfect, yet there are many reasons for feeling gratified at the results attained by our present system. Iowa has less illiteracy than any other State in the Union. In 1900 the illiteracy was 2.3% and in ten years our school system reduced it to 1.7%. In 1900 Iowa had 483,969 pupils between the ages of 5 and 20 years in attendance in the public schools; in a decade the number increased to 487,453, making a gain of 3,484. During this period the total population of the state was decreasing. Last year we had 22.7% of our total population enrolled in school.

The industrial, social, and political life of our great State has changed rapidly to keep pace with the new ideals and the new conscience of the nation; and our schools have changed in methods to meet the ideals. The school system has correlated with the great industrial and ethical forces which form a basis for our greatness as a state, but in it all we must not forget that we need contented workmen as well as skilled workmen, and our education must not only appeal to skill in mechanical work but it must also be of such a nature that the student may get a relative viewpoint and find his proper adjustment in the larger social, civic and ethical community by which he is surrounded.

## ACCREDITING.

The accrediting of high schools has been in vogue in Iowa since 1881. The significance of the accredited relation to high schools

and colleges has become larger with every succeeding year. Thirty-two high schools were on the accredited list in 1881, but at present three hundred and nineteen receive this recognition, and the number is increasing. As the idea develops of having an articulated system of education from the kindergarten through the college or university for this commonwealth of more than two million people, the function of accrediting and inspection becomes clearer.

Without legislative enactment, but by a process of evolution, there has developed in Iowa during the past forty years a method of articulation of elementary, secondary and higher schools that has been far-reaching in its influence and efficient in its administration. It has the sanction of custom and could have been made no more potent by statutory action because it is the intelligent expression of the ideas of conscientious and practical educators.

#### GROWTH.

When I began the work of inspection there were 272 schools on the accredited list; now there are 319, an increase of 47. An examination of the amount of work the former inspector had to do showed that he had been cramped in the development of inspection because he did not have assistance. As a result, many schools had not been visited for three years, and a few had not had a thorough inspection for five or six years. The State Board of Education, realizing the importance of this work, and also its extent, secured new men as soon as they found it possible to do so.

Mr. John E. Foster was secured to assist, and during the past year Mr. Foster visited 132 high schools, assisted in the preparation of three bulletins, taught in the summer school of the Iowa State College, delivered a number of public addresses, and held many conferences with school officers, teachers and patrons.

The work has been constantly growing, and on February 15, 1914, Superintendent Leslie I. Reed, of Missouri Valley, was appointed assistant inspector. This appointment was made upon the recommendation of the present inspector, and of President John G. Bowman of the Iowa State University, President H. H. Seerley of the Iowa State Teachers College, and President R. A. Pearson of the Iowa State College of Agriculture and Mechanic Arts. Since he began his work, Mr. Reed has visited 65 high schools and has held conferences in many places with teachers and school boards. He delivered commencement addresses at Emerson and Bayard, spoke at the dedication of the new high school building at Villisca, and

addressed the South West Iowa Teachers' Association at Council Bluffs, and the Northwestern Iowa Library Association at Sac City. Mr. Reed also gave a series of addresses before the summer schools at Iowa State Teachers College and in Mt. St. Mary's Academy in Cherokee.

#### FIELD OF INSPECTION.

How completely the high school situation in Iowa is covered by the inspection under the State Board of Education is shown by the following facts. The number of schools now accredited is 319, enrolling 40,085 students, taught by 2,273 teachers, and graduating in 1914, 6,117 students. There are only 187 unaccredited high schools approved by the State Department of Public Instruction. These schools enroll less than 4,000 students. Therefore, 90% of the high school pupils of Iowa are enrolled in high schools directly and constructively supervised by the State Board of Education. There are 104 four-year unaccredited high schools approved by the State Department of Public Instruction. Of this number 34 have been visited by one of our inspectors at the request of those in authority, and are preparing for the accredited relation under our direction. The total number of unaccredited schools visited during the past year is 61, of which about half were placed on the accredited list.

#### BULLETINS.

Three bulletins were issued in the year 1913-14 with the following titles:

Bulletin No. 2.—History of High School Inspection.

Bulletin No. 3.—Classification of High Schools.

Bulletin No. 4.—The High School and the College.

#### ENTRANCE EXAMINATIONS.

On the suggestion of the registrars of the institutions of higher learning, this office arranged for conducting a college entrance examination for pupils in unaccredited schools. The questions were prepared by the registrars and were sent to the various schools that asked for them. In this way pupils were saved the expense of going to the institution, and they could also tell whether they could enter the institution of their choice before the time to enter college.

As there is no machinery in this office for marking such papers, they were sent to the institution where the pupil indicated his desire to attend.

the schools are accredited for one year. Mr. P. E. McClenahan is the official State representative at this Association.

The work of the Association has had so much favor in the South that in 1912 a group of southern educators visited the meeting at Chicago, and studied its methods, standards, and ideals. As a result, in 1913 they organized a South Central Association, embracing a large number of states, and adopted practically the same standards as the North Central Association. The work has thus been extended to cover a very large portion of the United States, and no doubt sooner or later some organization will be perfected that will embrace practically all of the United States.

Colleges have found that graduates from North Central Association schools are able to do the work in advanced courses in a creditable way, and now the work of students done in these schools is being recognized by institutions of higher learning which formerly accepted no students except on examination. The work of the Association has thus been of inestimable value to students, teachers, colleges and the cause of education in general.

We are realizing as never before that our nation is not only an economic unit but an educational one as well. Our facilities for travel,—the railroad, the automobile, the improved roads,—and our ease of communication by telephone and telegraph, have brought the different sections of our country closer together than ever before, and students of education realize more fully that we have a universal problem of education as well as a local unit of consideration.

Following is a list of the board of inspectors, the standards of the Association, and a list of the schools in Iowa accredited by this Association:

#### BOARD OF INSPECTORS.

Aiton, G. B., State of Minnesota, Minneapolis.  
Butterworth, J. E., University of Wyoming, Laramie.  
Childs, Herbert G., University of Indiana, Bloomington.  
Davee, H. A., State of Montana, Helena.  
Davis, C. O., University of Michigan, Ann Arbor.  
Elliff, J. D., University of Missouri, Columbia.  
Heyward, Richard, State of North Dakota, Grand Forks.  
Johnson, W. H., University of Kansas, Lawrence.  
McClenahan, P. E., State of Iowa, Des Moines.  
Parsons, A. C., University of Oklahoma, Norman.  
Pearson, F. B., Ohio State University, Columbus.  
Reed, A. A., University of Nebraska, Lincoln.  
Thompson, Frank E., University of Colorado, Boulder.  
Tressler, A. W., University of Wisconsin, Madison.  
Young, Oliver O., Public Instruction, Pierre, So. Dakota.  
Hollister, H. A., University of Illinois, Champaign, Chairman.

The standards of accrediting for the North Central Association of Colleges and Secondary Schools may be found in Bulletin No. 3, which may be secured at the office of the Inspector.

# IOWA HIGH SCHOOLS ACCREDITED BY THE NORTH CENTRAL ASSOCIATION.

LIST ADOPTED MARCH 20, 1914.

Albia	Centerville

## ACCREDITED HIGH SCHOOLS IN IOWA.

The following schools have been accredited under authority of the State Board of Education. It is recommended that graduates of these schools be received in higher institutions of learning without examination, so far as credits duly certified meet the entrance requirements of courses to which admission is sought.

Des Moines, Iowa, August 1, 1914.

TABLE SHOWING PREPARATION, IN MONTHS, OF TEACHERS IN NORTH CENTRAL ASSOCIATION HIGH SCHOOLS OF IOWA.

The following table deals with the distribution of the college training of the teachers, who, in the academic year 1913-14, taught in the sixty-five Iowa high schools accredited by the North Central Association of Colleges and Secondary Schools. The table indicates the total number of months of attendance by these teachers in the institutions mentioned. If a teacher attended the State University of Iowa two years and the Iowa State Teachers College two years, each institution would be credited with eighteen months in the table. This table should be read as follows:

To the teachers who, in the academic year 1913-14, taught in the 65 Iowa High Schools, accredited by the North Central Association of Colleges and Secondary Schools, the State University of Iowa gave 5,162 months of training.

The table shows that the three state institutions are providing 47% of the college training of the teachers in the sixty-five schools considered.

1—Iowa State University .....	5,162
2—Iowa State Teachers College.....	2,451
3—Grinnell College .....	2,170
4—Cornell College .....	1,104
5—Simpson College .....	1,039
6—Drake—College and Normal .....	935
7—Coe College .....	868
8—Iowa State College of Agriculture and Mechanic Arts.	791
9—Parsons College .....	387
10—Penn College .....	284
11—Des Moines College .....	281
12—Iowa Wesleyan .....	276
13—Morning Side .....	275
14—Upper Iowa .....	270
15—Lenox College .....	259
16—Highland Park College and Normal.....	249
17—Leander Clark .....	202
18—Tabor .....	153
19—Central College .....	146
20—Amity College .....	72
21—Buena Vista .....	54
22—Decorah Normal .....	48
23—Burlington Normal .....	40
24—Davenport Normal .....	39
25—Charles City College .....	36
26—Ellsworth College .....	36
27—Epworth Seminary .....	27
28—Cedar Rapids Business College .....	12
29—Capital City Commercial College.....	10
30—Denison Normal .....	9

STATISTICS REGARDING IOWA ACCREDITED HIGH SCHOOLS  
FOR 1913-1914.

The following tables give the essential statistics for the accredited high schools of Iowa. The first table shows the facts in regard to the 65 Iowa high schools accredited by the North Central Association of Colleges and Secondary Schools:

STATISTICS FOR SCHOOLS ACCREDITED BY THE NORTH CENTRAL ASSOCIATION.

Number of schools .....	65
Number of individuals on teaching staff .....	1,004
Number volumes in libraries.....	57,003
Number volumes added this year .....	5,354
Value of volumes added this year.....	\$ 6,061
Value of equipment	
Physics .....	51,759
Domestic science .....	34,550
Agriculture .....	5,770
Chemistry .....	22,072
Botany .....	11,352
Commercial .....	18,010
Added this year to laboratories .....	20,185
High school enrollment December 1, 1913—	
Total .....	19,285
Graduates June, 1913 .....	2,872
Seniors .....	3,003
Juniors .....	3,110
Sophomores .....	3,962
Freshmen .....	5,350
Special and postgraduate .....	3,860

OTHER ACCREDITED HIGH SCHOOLS.

Number schools .....	254
Number teachers including superintendents.....	1,269
Number teachers with M. A. degree .....	65
Number teachers with B. A. degree.....	776
Number teachers non-college graduates.....	424
Number volumes in libraries .....	227,126
Value .....	\$205,610
Number volumes added this year.....	14,660
Value .....	\$16,547
Number volumes in grade libraries .....	59,840
Value .....	\$26,163
Value of laboratory equipment—	
Physics .....	\$92,551
Domestic science .....	41,704

High school enrollment October 1, 1913—	
Total .....	20,800
Graduates June, 1913 .....	3,245
Seniors .....	3,712

## High school enrollment October 1, 1913—Concluded

Juniors .....	4,433
Sophomores .....	5,325
Freshmen .....	7,267
Special and postgraduate .....	63

## SUMMARY FOR ALL ACCREDITED HIGH SCHOOLS.

Number schools .....	319
Total number teachers .....	2,273
Number of volumes in libraries .....	284,129
Number of volumes added in 1913-1914 .....	20,014
Value of volumes added in 1913-1914 .....	\$22,608

## Value of equipment—

Physics .....	\$144,310
Domestic science .....	76,254
Agriculture .....	10,347
Chemistry .....	40,103
Botany .....	29,303
Commercial .....	33,405
Physical geography .....	9,565
Manual training .....	27,328

Total ..... \$370,615

Value of equipment added this year to laboratories..... 42,291

## High school enrollment, fall of 1913—

Total .....	40,085
Graduates 1913 .....	6,117
Seniors .....	6,715
Juniors .....	7,543
Sophomores .....	9,287
Freshmen .....	12,617
Special and postgraduate .....	3,923

## RECOMMENDATIONS AND SUGGESTIONS.

The Board on Secondary School Relations has recommended to the faculties of the three State institutions of higher learning:

a. That they allow entrance credit for one-half unit of pedagogy and one-half unit of psychology taken during the third or fourth year in an accredited high school.

b. That the foreign language requirements be eliminated.

c. That the requirement of third semester algebra be eliminated.

None of these recommendations has been adopted by all of the institutions, therefore none is operative in any institution.

It seems desirable and practicable to arrange for the acceptance by the State institutions of advanced work done in certain accredited high schools. Such a plan would permit many students to take one or two years of college work in their high school.

The present standards of accrediting are very liberal and flexible. About one-half of the work of the high school is pre-

scribed for college entrance and these subjects are such as are recognized by all educators as essential. However, the new law passed by the last legislature makes some changes, and schools that meet the demands for normal training courses find these courses short on college entrance subjects. Some adjustment of entrance subjects should be made, at least so that those who wish to take advanced work for teaching will not be hampered in entering our best institutions.

Respectfully submitted,

June 30, 1914.

P. E. McCLENAHAN.  
Inspector of Secondary Schools.

# SUMMARY OF APPROPRIATIONS RECOMMENDED BY THE IOWA STATE BOARD OF EDUCATION FOR THE UNIVERSITY.

## A. INCREASE OF MAINTENANCE APPROPRIATIONS—ANNUAL.

1. Colleges of Applied Science, Liberal Arts, Law, Pharmacy, and Medicine .....	\$ 52,050.00
2. College of Dentistry .....	23,725.00
3. College of Education .....	20,000.00
4. School of Commerce .....	7,500.00
5. College of Fine Arts .....	7,100.00
6. Summer School .....	8,000.00
7. Graduate College .....	6,000.00
8. University Extension .....	10,000.00
9. Repair and Contingent .....	5,000.00
10. Department of Buildings and Grounds .....	12,000.00
11. Administration .....	6,225.00
Total annually .....	<u>\$157,600.00</u>

## B. SPECIAL APPROPRIATIONS FOR THE BIENNIUM 1915-1917.

1. Equipment and Supplies .....	\$ 15,000.00
2. Equipment of Buildings and Buildings Partially Equipped .....	50,000.00
3. Electrical Equipment .....	10,000.00
4. Purchase of Land .....	30,000.00
5. Paving, Cement Walks and Care of Grounds .....	10,000.00
6. Enlarged Heating Plant (to be available 1st year) .....	18,000.00
7. Tunnel to New Buildings (to be available 1st year) .....	6,000.00
Total for the Biennium .....	<u>\$139,000.00</u>

The University, having but little landed or other permanent endowment, and no benefit from land grants or other subsidies of the general government, is largely dependent upon legislative support. Fortunately, the growth of our State in wealth has enabled our legislators to be generous to our educational institutions, and by direct appropriation to meet the lack of endowment. These appropriations have so far kept pace with the University's development. In a most important sense, a university is a great business enterprise; it rests upon a financial basis; and, whatever the out-put, income and expenditure must be related, exactly as in any commercial enterprise. Overhead charges, fluctuation in wages, cost of machinery, supplies, renewal and repair—all these things concern a university exactly as they do the best manufacturing plant in the country. If we increase the size of the plant, we increase the cost of operation. More buildings call for more heat, more light, more care. Such expenses, Iowans have long since learned to call contingent. They are part of the cost of the business.

At the University, they are not only doing more business from year to year, but they are doing it better. Primitive, combustible buildings are being replaced with beautiful, well-appointed, fire-proof structures, worthy of the work and the dignity of the commonwealth.

For all these reasons, legislative support will require constant readjustment so long as the State continues to advance in wealth, intelligence, and power. It is, therefore, with sincere confidence that we state the needs of the University and of all the other institutions under the control of the State Board of Education.

To proffer no such request would mean that the institutions were stagnant, moribund, inefficient and incompetent.

The special need of the University today lies in the direction of additions to the faculties. This is made necessary, not alone by growth in the student body, but by the enlarged scope of educational effort. In several departments, there is imperative need for additional strong men.

#### BRIEF STATEMENTS IN SUPPORT OF RECOMMENDATIONS FOR APPROPRIATIONS.

##### A. INCREASE OF MAINTENANCE APPROPRIATIONS—ANNUAL.

1. Colleges of Applied Science, Liberal Arts, Law,  
Pharmacy and Medicine .....\$52,050.00

To meet the new demands in a very moderate way in the Colleges just designated, this increased appropriation is needed annually.

2. College of Dentistry .....\$23,725.00

For years the College of Dentistry has had wholly inadequate support. Today it is crowded with students whom we can care for only in most inadequate fashion, both in the matter of instruction and room for work. To reinforce the instructional staff, this amount is needed.

3. College of Education .....\$20,000.00

The University with all its libraries, laboratories, museums, and colleges, affords, and must ever afford, an ideal place for the training of teachers, notably those called upon to serve the state as high school principals and superintendents of our city schools. We are unable to meet the demand in this field of our work. To this particular phase of higher education, to meet an absolute necessity in towns and cities, other states about us are appropriating hundreds of thousands of dollars to be used at their universities. The University of Iowa would make a beginning with the amount set out above.

4. School of Commerce .....\$ 7,500.00

Near in importance to the training of superintendents and principals, lies the training of those who serve in the world of business, in municipal and governmental employ. Our great commercial enterprises, our cities, as well as our civil government, in all branches, demand the service of educated men trained to particular work. To meet the call for such efficient service, the University School of Commerce is engaged. To meet the varied phases of its problem, it needs the additional support indicated above.

5. College of Fine Arts.....\$ 7,100.00

The latest college added to the group that constitutes today the University of Iowa is the College of Fine Arts. This college includes at present the Department of Graphic and Plastic Arts, and the School of Music. Never was proffered instruction more timely than that offered today by the College of Fine Arts to the State of Iowa. The widespread increase in wealth shared by our people in unexampled fortune, gives opportunity for the use of art as a factor in everyday life as never before in our history. That the opportunity may be rightly used, our people need instruction. The University aims to afford this instruction, and asks this amount for the College of Fine Arts.

6. Summer School .....\$ 8,000.00

For some years, the University has maintained a summer session, beginning immediately after commencement and continuing six weeks. This procedure has not only been increasingly popular, but it has made the University plant serviceable at minimum of cost at a time when it were otherwise idle. It is proposed to extend the service of the summer session by lengthening the period of instruction from six weeks to nine weeks. This will accommodate a very large number of students, giving to teachers, particularly, opportunity to use the University during their long vacation. For this purpose, the amount designated is needed.

7. Graduate College .....\$ 6,000.00

The Graduate College stands for research. Its appeal is to those anxious to enlarge the bounds of human knowledge, to prepare the way for the manufacturer and the inventor, as well as to maintain, in our State, scholarship, the love of letters, and the spirit of sound learning. For the conduct of the graduate work of the University, in an effort to serve all colleges in Iowa, an appropriation is recommended as set out above.

8. University Extension .....\$10,000.00

The Thirty-fifth General Assembly made provision for University Extension; and for less than two years attempt has been made to bring to Iowa communities all sorts of information of a practical sort; information in matters sanitary, municipal, educational and social. This effort has developed a public interest, a response which is nothing less than surprising. One phase, in particular, of this work seems to meet, everywhere, public approbation: the work done for the welfare and health of

children. There is urgent call for a research station for child welfare, the instruction in this matter to reach every community in Iowa. To establish such station of research and organize this form of University Extension, there should be the additional appropriation indicated.

9. Repair and Contingent .....\$ 5,000.00

An increase is now needed to assist in keeping in good condition the larger number of buildings, as well as the increased amount of equipment and steam lines. At present, this fund is inadequate. It is in the interest of economy that the buildings should be kept in good repair. To do this, an increase is imperative.

10. Department of Buildings and Grounds.....\$12,000.00

To provide for the further improvement of the buildings and grounds as well as to assist in keeping the buildings in good condition, this amount is needed.

11. Administration .....\$ 6,000.00

For years, the President of the University has not had a Secretary, and a man should be provided who can take care of a large part of the detail work that has been done by the President. Additional help is also needed in the Registrar's office. It is believed that this amount will be sufficient.

B. SPECIAL APPROPRIATIONS FOR THE BIENNIUM 1915-1917.

1. Equipment and Supplies .....\$15,000.00

This is the same amount that was appropriated by the last General Assembly.

2. Equipment of Buildings and Buildings Partially  
Equipped .....\$50,000.00

This is a reduction of \$10,000.00 from the same item of two years ago.

3. Electrical Equipment .....\$10,000.00

This is a new item, and it is made necessary because of the growth of the University plant.

4. Purchase of Land .....\$30,000.00

In each of its previous reports, the Board has urged upon the General Assembly that it would be economy to make a large appropriation for the purchase of additional land for the use of the University. Every year that passes adds to the value of the property that necessarily must be purchased by the State sooner or later. Many, many thousands of dollars would have been saved if this matter could have been taken up years ago, and settled in a large way. The Board recognizes the exigencies of the present time, however, and has reduced the request for money to purchase additional land to the absolute needs of the next two years.

5. Paving, Cement Walks, and Care of Grounds.....\$10,000.00

This is the same amount that was appropriated by the last general assembly.

6. Enlarged Heating Plant .....\$18,000.00

This asking is made necessary because of the growth of the University plant. The fund should be made available for the first year of the biennium.

7. Tunnel to New Buildings.....\$ 6,000.00

This amount is needed for the extension of tunnels to the new buildings now being constructed. The appropriation made by the last General Assembly for a similar purpose was \$10,000.00.

The above special appropriation requested for the University for the biennium, 1915-1917, are less than the aggregate of those granted two years ago.

### SUMMARY OF APPROPRIATIONS RECOMMENDED FOR THE IOWA STATE COLLEGE OF AGRICULTURE AND MECHANIC ARTS.

#### A. PRESENT MAINTENANCE HALF MILL TAX TO BE CONTINUED— ANNUAL .....\$377,500.00

- |  |              |
|--|--------------|
| 1. Support for Collegiate Departments.....   | \$125,000.00 |
| 2. Agricultural Extension, including Home Economics.....                               | 48,000.00    |
| 3. Agricultural Experiment Station Farm and Work.....                                  | 57,000.00    |
| 4. Agricultural and Home Economics One and Two Year<br>Non-Collegiate Courses .....    | 12,500.00    |
| 5. Trade School and Engineering Extension.....   | 25,000.00    |
| 6. Engineering Experiment Station .....  | 5,000.00     |
| 7. Veterinary Practitioners' Courses .....   | 5,000.00     |
| 8. Veterinary Investigations .....   | 10,000.00    |
| 9. Repair and Contingent .....   | 10,000.00    |
| 10. Two and Four Year Courses in Home Economics for Home-<br>makers and Teachers ..... | 20,000.00    |
| 11. Equipment of Departments and Buildings.....  | 40,000.00    |
| 12. Maintenance and Improvements of Public Grounds.....                                | 10,000.00    |
| 13. Enlargement of Buildings and Small Additional Buildings .....                      | 10,000.00    |

Total annually .....\$377,500.00

#### B. INCREASE OF MAINTENANCE APPROPRIATIONS—ANNUAL.

- |  |              |
|--|--------------|
| 1. Support for Collegiate Departments.....   | \$125,000.00 |
| 2. Support for Summer Session.....   | 10,000.00    |
| 3. Agricultural Experiment Station .....   | 25,000.00    |
| 4. Engineering Experiment Station .....  | 5,000.00     |
| 5. Veterinary Investigations .....   | 5,000.00     |
| 6. Sub-Collegiate Courses in Agriculture, Home Economics,<br>and Trade Schools in Engineering..... | 16,500.00    |

7. Agricultural and Home Economics Extension.....	26,625.00
8. Engineering Extension .....	7,500.00
Total annually .....	\$220,625.00

C. SPECIAL APPROPRIATIONS FOR THE IMPROVEMENT AND ENLARGEMENT OF BUILDINGS, FOR THE BIENNIUM 1915-1917.

1. Additional Equipment and Furnishings for Buildings and Departments .....	\$ 30,000.00
2. Extension of Heating System and Equipment of Heating Plant .....	39,600.00
3. Repairs and Improvements for Dairy Building, Old Agricultural Hall and Barns, and Temporary Provision for Fruit Storage .....	8,000.00
4. Temporary Provision for Home Economics Laboratory..	1,500.00
5. For Enlargement of Buildings and Additional Small Buildings .....	20,000.00
Total for the biennium.....	\$ 99,100.00

One-half of the above special appropriations may be used each year of the biennial period beginning July 1, 1915.

D. SPECIAL APPROPRIATIONS FOR EQUIPMENT AND FURNISHINGS FOR THE BIENNIUM 1915-1917.

1. Equipment and Furnishings for Chemistry Building....	\$ 50,000.00
2. Equipment for Science Building.....	5,000.00
3. Settling and Storage Tank.....	15,000.00
Total for the biennium.....	\$ 70,000.00

BRIEF STATEMENTS IN SUPPORT OF RECOMMENDATIONS FOR APPROPRIATIONS.

A. PRESENT HALF MILL TAX TO BE CONTINUED—ANNUAL—

.....\$377,500.00

The above half mill tax, not to exceed \$377,500.00, was made available for each of the two years ending December 31, 1915, by Chapter 228, laws of the Thirty-fifth General Assembly, 1913, providing for a one-half mill tax. It is necessary that this be renewed, or that it be made a regular annual appropriation.

B. INCREASE OF MAINTENANCE APPROPRIATIONS, BEGINNING JULY 1, 1915—ANNUAL.

1. Support for Collegiate Departments.....	\$125,000.00
--	--------------

This increase is needed chiefly for additional teachers to care for the rapidly increasing number of students. The increase in enrollment of resident students for the college year 1911-12 to 1912-13 was 240, from 1912-13 to 1913-14 it was 420, and from 1913-14 to 1914-15 it is about 260. Thus the enrollment at the present time is nearly 1,000 in excess of the enrollment when estimates were being prepared for the last General

Assembly, and the attendance is nearly 700 in excess of the attendance exactly two years ago. The present Freshmen class numbers more than were enrolled in all the college departments of the college nine years ago. It is practically certain that large increases of enrollment will continue through the next biennium, especially in Agriculture and Home Economics.

About \$40,000.00 of the increase is for general expenses, including especially \$10,000.00 additional for fuel and \$5,000.00 additional for janitor service. Almost every department is subject to increase of its expense because of increased enrollment. Some departments, such as Chemistry, increase their enrollment almost as much as the entire college, because the work of such departments is fundamental to all courses, and it is taken practically by all students.

With the development and constantly wider application of science to industries, it becomes necessary to widen the scope of subjects taught in colleges, and this means the occasional establishment of a new department or sub-department. At the present time, subjects greatly needing such recognition are plant disease, nutrition, and farm management.

## 2. Support for Summer Session.....\$10,000.00

The Summer Session has received a great impetus by reason of legislation enacted by the last General Assembly, which requires agriculture, home economics and trade school work to be taught in public schools throughout the State. There is now an enormous demand from teachers who have had years of experience for instruction along these new lines, so that they may comply with the provisions of the law. In other states where the pressure upon teachers to qualify along these new lines is even less than in Iowa, the land grant institutions are heavily burdened by the demands made upon them. The Summer Session at this college was attended in 1913 by 215 students. A year later the enrollment was 618, an increase of nearly 200 per cent. It is confidently expected that the enrollment next year, if facilities permit, will exceed 1,000. Plans are under consideration, also, for extending the length of the summer term.

## 3. Agricultural Experiment Station .....\$25,000.00

The Station is doing much work on the economical feeding of animals, especially in reference to silage, alfalfa, and other roughage; also orchard spraying, soil fertility maintenance, crop rotation, correction of soil acidity, poultry problems, dairy manufacturing, and agricultural engineering. The last General Assembly provided an experimental farm on which important agronomy experiments in reference to plant production are already under way. It is proposed to continue all useful lines of work now in progress and to extend operations so as to include additional and serious difficulties which are presenting themselves to the farmers of the State. Among these are the economical production of beef and pork on valuable Iowa land, the causes of variation in milk flow, preservative treatment of timbers, orchard humus, storage of fruit,

injury to foliage by common sprays, apple breeding, orchard management, seed improvement and selection, corn ear worms, cabbage disease immunity, irrigation, and other subjects. These have vital influence on operations within the State which amount to many millions of dollars annually. What industrial problem in the State is of greater importance than to determine and establish agricultural methods which will increase production, decrease cost, and leave the soil as good or better as each year passes on? Where precaution has not been taken, states and nations have gone to ruin.

4. Engineering Experiment Station .....\$ 5,000.00

The Engineering Experiment Station is devoted to the study of engineering problems of greatest concern to the State. Among those now in hand are the utilization of clay products with test of fire clay materials, work with drain tile and sewer pipe and methods of reinforcement of same, study of highway bridges with reference to distribution of loads and necessary supporting strength, central power plants, and numerous other subjects. It is proposed to further develop this work by including studies of Iowa coal with reference to most efficient combustion.

5. Veterinary Investigations .....\$ 5,000.00

New animal diseases are constantly appearing. These may, and sometimes do, quickly cause enormous losses. The study of certain complications arising in connection with hog cholera is now being made. There are now two serious animal diseases in this State which are not understood and which need thorough investigation. With the increase indicated, it is proposed to investigate these diseases.

6. Sub-Collegiate Courses in Agriculture, Home Economics, and Trade Schools in Engineering.....\$16,500.00

Work of this character should be encouraged for the large number of young men and young women who have not finished accredited high school courses and wish to spend one or two years in preparation for useful vocations. The work has high value, and should be placed upon a basis to attract many more persons than are now availing themselves of these opportunities. The newer courses in trade school and home-making, started under authority of the last legislature, are making promising beginnings.

7. Agricultural and Home Economics Extension.....\$26,625.00

In the biennium, this will amount to \$53,250.00, and the amount is to be used to offset appropriations by the United States government under the provisions of the Smith-Lever bill which call for co-operative efforts by states accepting the terms of this bill. The funds appropriated by the State are to be administered at the State College, as well as those appropriated by the Federal Government, and in accordance with plans approved by both the United States government and the College. The amounts available from the government are, for the first year of the biennium, \$18,794.00, and for the second year, \$34,456.00, a total of

\$53,250.00. The increased appropriation from Nation and State will permit the increasing of the valuable work being done in the line of agricultural and home economics extension in rural districts, and it will permit home economics extension to be carried on in connection with engineering extension work, especially for the benefit of people employed in factories.

8. Engineering Extension .....\$ 7,500.00

This line of work, begun under the provisions of an act of the last General Assembly, is proving highly valuable. With the increase it is proposed to establish more trade courses throughout the State, develop correspondence study work for young men and women employed in factories, conduct trade schools in the interest of automobile manufacturing and repairing, and other such activities. The expenses of trade school courses are borne largely by fees which the pupils pay, the State appropriations being supplementary.

C. SPECIAL APPROPRIATIONS FOR THE IMPROVEMENT AND ENLARGEMENT OF BUILDINGS FOR THE BIENNUM 1915-1917.

1. Additional Equipment and Furnishings for Buildings and Departments .....\$30,000.00

This request is due to the great need for additional live stock, more equipment for mining engineering, more scientific works of reference in the library, and other lesser items. It is proposed during the biennium to purchase typical high class animals of various strains and breeds for the purpose of increasing the stock which may be used in class room instruction and in experimental work. It is highly desirable, in this great live stock state, that the college should have representative animals of all the types that are economically important. There should be at least one stallion and two mares belonging to the principal draft breeds, and one bull and a few cows belonging to the principal beef and dairy breeds, also typical specimens of hog and sheep breeds. After a few years, some of the present stock and the progeny of present and prospective stock can be sold to advantage.

It is proposed to install for the mining engineering department important equipment which is now entirely lacking. This includes ore dressing and coal washing machinery and certain other apparatus to enable this department to present as strong a course as the large mining interests of the State should have.

One of the greatest needs of this college is a better reference library. Scientific investigators in the faculty and research students are constantly handicapped by having to send away for scientific works needed temporarily. Too often the necessary works cannot be borrowed. The library has been poorly quartered and almost starved. To properly equip it in the single line of veterinary science so that we might have available the records of work done by German and French investigators and others throughout the world, would cost \$15,000.00. Money spent in this way is an economy because it enables investigators in the laboratories

of the college to quickly and accurately learn of the results of experiments elsewhere, and thus saves time and the cost of duplicating experiments here. An expenditure of \$50,000.00 for new books could not be called extravagant as compared with the needs of the case.

2. Extension of Heating System and Equipment for  
Heating Plant .....\$39,600.00

The following items are included:

2 500 H. P. boilers.....	\$ 7,000.00
2 sets chain grate stokers.....	3,425.00
Piping for boilers .....	1,200.00
Foundations and settings .....	2,100.00
Coal hopper .....	1,500.00
Ash conveyor .....	2,500.00
Turrell regulator .....	675.00
Railroad scales .....	1,500.00
Car moving apparatus .....	425.00
Feed water pump for boilers.....	750.00
Breeching for boilers.....	450.00
Exciter and alternating current machine.....	1,475.00
Vacuum system for heating three buildings.....	1,000.00
600 ft. heating tunnel to complete the tunnel loop.....	7,200.00
700 ft. heating tunnel to new buildings.....	8,400.00
Total .....	\$39,600.00

These items are self-explanatory. They are made necessary by reason of the growth of the institution.

3. Repairs and Improvements for Dairy Building,  
Old Agricultural Hall and Barns, and Tem-  
porary Provision for Fruit Storage.....\$ 8,000.00

This item is to provide for utilizing valuable space which can be made available at relatively small cost, especially in the large basement of the Old Agricultural Building and in the basement and attic of the Dairy Building. It is necessary to do some reconstruction of old, heavy walls so as to admit light, and new floors and partitions are needed. Certain old barns need considerable overhauling to provide modern systems of ventilation and to allow portions of these buildings to be used for different purposes than originally planned. A small building is needed in the college orchard where fruit may be collected in the fall and held for a short time until provision is made for marketing.

4. Temporary Provision for Home Economics Lab-  
oratories .....\$ 1,500.00

It has become necessary to conduct some of the Home Economics work in rooms outside of the Home Economics Building. Four or five laboratories should be fitted up next year. These will require the installation of cabinets and fitting rooms. The more expensive\*laboratory equipment in this department relates to cooking, and all of this will be confined to the present Home Economics Building if possible, but at least one of the sewing and fitting laboratories will have to be altered for cooking purposes.

5. For Enlargement of Buildings and Additional Small  
Buildings .....\$20,000.00

A considerable number of small buildings are needed to properly supplement the larger buildings and to provide for instructional and experimental requirements distant from the main campus. The item asked for would be sufficient to somewhat relieve the situation. Among the buildings most urgently needed are the following:

(a) *Repair Shop.* Carpenters, plumbers, painters and electricians working on the campus need suitable headquarters for their materials and work. An old building is now being used, but it is not convenient to places where most of the work is done, and valuable time is lost on this account. It is not large enough for the requirements and it is not in condition to serve much longer. It is one of the oldest buildings on the campus.

(b) *Barn for Dairy Farm.* Separate quarters are desirable for the several bulls which have to be maintained to represent different leading breeds at the Dairy Farm.

(c) *Poultry Houses.* Additional houses are needed to provide instruction for larger classes in poultry husbandry.

(d) *Agricultural Engineering Annex.* The Agricultural Engineering Department needs suitable quarters for storing and demonstrating large tractors and other agricultural machinery. About \$25,000.00 worth of such apparatus has been loaned to the college and much of it cannot be given good care because of limited building space. The structure proposed is a cheap but durable shed building.

(e) *Student Quarters, Cattle Shed and Judging Pavilion.* As the Dairy Farm is about a mile from the college campus, it is necessary that a shed or pavilion be provided for stock judging and demonstration work on the farm. It is also desirable to have students' quarters provided there for the accommodation of limited numbers of students who are assigned to the work of caring for stock and obtaining practical instruction.

(f) *Shelter for Rattler and Grinding Machines.* It is proposed to build a small addition to one of the engineering buildings at a point which will not disfigure the building, to accommodate the rattler and grinding machines which are noise and dirt producers and should be kept in quarters separate from other lines of work.

(g) *Outside Kiln and Shed for Ceramics.* The need for this is due to the fact that the kilns are now located in a space which is used also for other purposes; and these other purposes must be sacrificed when a blast is on, because of uncomfortable heat.

(h) *Cottages for Foremen and Laborers.* The greatest difficulty is experienced in securing and holding good help on the college farm and other premises, because of distance from available residences for such persons. It is desirable also to have at least a few reliable men quartered near the college buildings to furnish help at a time of fire or other emergency.

(i) *Storehouse for Foundry Castings and Supplies.* At the present time, these castings and supplies are stored out of doors, and they are

deteriorating because of exposure to the weather. There are losses, also, which would not occur if a suitable building were used.

(j) *Building for Ore Dressing and Coal Washing.* This is to house equipment which is needed to permit necessary practical instruction in mining engineering.

(k) *Temporary Building for Trade School Courses.* These courses are making a good beginning. Laboratory rooms are needed for some of the work which it has not been feasible to provide for in the regular college laboratories. Later, with the enlargement of the college plant, the laboratories may be provided, but in the meantime a temporary building would serve the purpose.

#### D. SPECIAL APPROPRIATIONS FOR EQUIPMENT AND FURNISHINGS FOR THE BIENNIUM 1915-1917.

##### 1. Equipment and Furnishings of Chemistry Building. \$50,000.00

This item is of the utmost importance. The Chemistry Department was burned out about two years ago. A special appropriation was made by the last General Assembly, but it was \$60,000.00 less than recommended. The new building is filled with temporary equipment. The welfare of nearly 1,800 students is concerned.

##### 2. Equipment for Science Building. . . . . \$ 5,000.00

This equipment is for a new building to be provided from the millage tax.

##### 3. Settling and Storage Water Tank. . . . . \$15,000.00

The college water supply, at times, is as brown as chocolate, due to the heavy iron content. The matter has been studied by competent engineers, and they agree that a settling tank will provide the best remedy.

### SUMMARY OF APPROPRIATIONS RECOMMENDED FOR THE IOWA STATE TEACHERS' COLLEGE.

#### A. INCREASE OF MAINTENANCE APPROPRIATIONS—ANNUAL.

1. Additional Teachers' Fund . . . . .	\$10,000.00
2. Additional Contingent Fund . . . . .	8,200.00
3. Additional Summer Term Fund . . . . .	25,500.00
4. Additional Librarian's Salary Fund . . . . .	1,500.00
5. Additional Hospital Fund . . . . .	1,000.00
6. Extension Service Fund . . . . .	20,000.00

Total annually . . . . . \$66,200.00

#### B. SPECIAL APPROPRIATIONS FOR THE BIENNIUM 1915-1917.

1. Furniture Fund for New Dormitory . . . . .	\$15,000.00
2. Paving Fund . . . . .	1,600.00

Total for the Biennium . . . . . \$16,600.00

BRIEF STATEMENTS IN SUPPORT OF RECOMMENDATIONS  
FOR APPROPRIATIONS.

A. INCREASE OF MAINTENANCE APPROPRIATIONS, BEGINNING JULY  
1, 1915—ANNUAL.

1. Teachers' Salary Support .....\$10,000.00

The increase of the expense of living, the demand for superior teachers in every educational institution of the country, the growth of the student body requiring additional teachers, and the absolute need to keep pace with the standards set by other states in the payment of salaries or else lose the best professors now employed, are the causes for the request to increase the teachers' fund during the next biennial period. The constant losses to the staff of instruction by appointment elsewhere should be avoided or else the efficiency must be reduced. It is necessary to spend about one-half of the proposed amount for new teachers in the vocational and rural educational lines recently developed and improved. These new industrial phases of education are of such importance that the training of teachers for such work has more than ordinary reason for recognition.

2. Contingent .....\$ 8,200.00

The increase of buildings at the institution, resulting in the need for more fuel, janitor work and employees is responsible for the request for the expansion of the Contingent fund. Night service will need to cover the full time of twenty-four hours with the opening of the dormitory in September, 1915, and, since the expansion of the work of the College now includes the hours 7:30 a. m. to 9:30 p. m., the expense for such maintenance is a constant quantity easily estimated. With the gradual increase of students and the expected expansion of the summer term to twelve weeks, the contingent expenses are computed on a very strict basis of economy. No special provision for renewal of furniture has been made in a number of years, and hence the importance of keeping it in good condition. With eight acres of floors in all departments, the problems of maintenance are computed on actual conditions known to exist.

3. Summer Term .....\$25,500.00

The Summer Term fund already provided for by a permanent annual appropriation is sufficient to pay the expenses of a six weeks' session. The teachers in the service of the State are specially benefited by the summer term. Last summer 2,022 students were enrolled during their vacation. The condition of the scholarship and efficiency of these teachers is such that their improvement in successful management and in methods of instruction is imperative. It is the intention of the Board of Education to extend this session to twelve weeks and thus have the institution render all the service of which the plant, the equipment and the faculty are capable. Since free tuition is accorded to all such students, the expense is here estimated on the basis that the present six weeks' session has cost in previous years.

4. Librarian's Salary .....\$ 1,500.00

The increase of the librarian's salary fund is due to the extension of the summer term to twelve weeks, the amount requested being the actual expense that such additional time will require.

5. Hospital .....\$ 1,000.00

The hospital service will need to be maintained during the additional six weeks added to the summer term, and a nurse for the conducting of the detention or emergency hospital must be added. The support fund now granted is not sufficient to carry the expense of the hospital service, and the visiting and inspecting nurse service now required. The additional fund requested will give the care and the protection that the welfare of the students demands. Inspection of the temporarily sick is an economic method of management, since it is common to postpone calling a physician until the condition is serious. Since the college does not maintain a resident physician, this nurse service is of great importance.

6. Extension Service .....\$20,000.00

During the year 1914-1915 an extension service has been conducted. In this service, instruction is given by an itinerant faculty going to the several counties where the teachers are employed and there meeting them in classes on Saturdays. This service is known by the name "Teacher Study Centers," and is an undertaking in which the teachers are given superior help at the least possible expense. During 1913-14, 1,040 such different students were enrolled, and during 1914-15, it is anticipated that more than 3,000 will be enrolled. It is the judgment of the Board that this kind of work is of the greatest value and should have the largest encouragement. The amount requested in this appropriation will not be sufficient to provide for every county in the State, but it is hoped that economic management may be able to provide, from other sources, the amount that may be required in addition.

B. SPECIAL APPROPRIATIONS FOR THE BIENNUM 1915-1917.

1. Furniture for New Dormitory .....\$15,000.00

The new dormitory will need to provide for the accommodation of 125 women students. This calls for furniture for the reception rooms, offices, dining room, kitchen, lodgings for the officers and the assistants, and for lodgings for the students. Careful estimates on good, plain, substantial furniture indicate that the amount asked must be prudently invested to suitably equip this new building on the basis suggested.

2. Paving Fund .....\$ 1,600.00

Twenty-Third Street has been partially paved by a previous appropriation. The City of Cedar Falls and the residents of this street desire to take steps to pave the remainder during the next biennial period. This unpaved part of the street passes along the location of the new dormitory, and for the purpose of cleanliness and sanitation this paving should be granted. The estimates here given include the curbing and the paving with brick of the State's half of the street adjoining the College grounds.

## SUMMARY OF APPROPRIATIONS RECOMMENDED FOR THE COLLEGE FOR THE BLIND.

### SPECIALS FOR THE BIENNIUM 1915-1917.

1. Oculist Fund .....	\$ 200.00
2. Electric Light Plant .....	3,000.00
3. Pianos and Furniture .....	5,000.00
4. Barns and Silo .....	4,500.00
5. Paving, Sidewalks and Improvement of Grounds.	2,500.00
6. Printing Plant .....	2,000.00

Total .....\$17,200.00

The Thirty-fifth General Assembly, by a continuous appropriation, took care of the General Support Fund and the Contingent Fund of this institution. These funds provide for the maintenance of the institution, economically administered, and no increase is asked for the next biennium.

### BRIEF STATEMENTS IN SUPPORT OF RECOMMENDATIONS FOR APPROPRIATIONS.

1. Oculist Fund .....\$ 200.00

The Oculist Fund is one that has been granted by General Assemblies for many years. It is doubtful if the State receives as great a return on any investment. The vision of many of the children enrolled at this institution has been materially helped by the specialist who takes care of the children for this pittance; and some have been helped to such a degree that they have been able to attend seeing schools. The above is the amount asked for the biennium.

2. Electric Light Plant .....\$ 3,000.00

We are now paying over \$1,000.00 a year for electric lighting. A plant of our own would reduce this annual expenditure very materially, as the exhaust steam from the engine would be utilized in heating the buildings. A careful estimate of this has been made by an expert. The amount indicated above is the sum asked for this purpose.

3. Pianos and Furniture .....\$ 5,000.00

It is well known that piano tuning is one of the most lucrative employments open to the blind, and this must always be taught at our institution. The pianos on hand are practically worn out, and will need to be replaced. The amount designated above is asked for this purpose.

4. Barns and Silo .....\$ 4,500.00

Nearly all the small buildings at this institution are practically worn out and must be replaced with new ones. We ask from this General Assembly \$4,500.00 for barns and silo. The latter will be very desirable for the feeding of stock at the institution.

5. Paving, Sidewalks and Improvement of Grounds..\$ 2,500.00

It has been a long time since anything has been done regarding the improvement of grounds. The main driveway should be paved, and

considerable sidewalk is wanted. \$2,500.00 is requested for this purpose.

6. Printing Plant .....\$ 2,000.00

The matter of securing books and other printed matter for the blind is very expensive. If we installed a printing plant of our own for printing books and music, it would not only be of inestimable value to the students and teachers, but, in the end, it would save the State considerable money. As a beginning in this direction, the above appropriation is requested.

---

FINANCIAL AND EXPENSE REPORT

OF THE

Board and Finance Committee

FOR THE

BIENNIAL PERIOD, 1912-1914

---

Endowment Fund College of Agriculture;  
Per Diem, Mileage and Expense of the Members of the Board;  
Salaries and Expense of the Finance Committee and Employes;  
General Office Expenses

---

## ENDOWMENT FUND IOWA STATE COLLEGE OF AGRICULTURE AND MECHANIC ARTS

The Endowment Fund of the Iowa State College of Agriculture and Mechanic Arts as reported at the close of the preceding biennial period, stood as follows:

Loans in force June 30, 1912 .....	\$683,800.00
Cash in hands of Treasurer of State June 30, 1912..	3,017.97
	<hr/>
Total fund June 30, 1912.....	\$686,817.97

During the biennial period ending June 30, 1914, the movement of this fund has been as follows:

Loans in force June 30, 1912.....	\$683,800.00
Loans made during the present biennium .....	\$195,200.00
Loans paid during the present biennium .....	193,450.00
	<hr/>
Loans increase during the present biennium.....	1,750.00
	<hr/>
Loans in force June 30, 1914.....	\$685,550.00
Cash in hands of Treasurer of State June 30, 1914	1,267.97
	<hr/>
Total endowment fund June 30, 1914.....	\$686,817.97

Loans amounting to \$67,500.00 were renewed for periods ranging from five to ten years. The interest rate on the most of these renewals was increased from five to five and one-half per cent per annum.

The cash in the hands of the Treasurer of State is shown above to be in amount of \$1,267.97. Of this amount, \$1,250.00 is the proceeds of a prepaid loan due October 1, 1918, being number 684, and having privileges of prepayments on interest paying dates, and the interest thereon was prepaid to October 1, 1914, leaving only \$17.97 of the Endowment Fund not bearing interest.

### PER DIEM, MILEAGE AND EXPENSE OF MEMBERS.

For the members of the State Board of Education, from July 1, 1912, to June 30, 1914, inclusive. - III. Report of the Treasurer.
- IV. Report of the Registrar.

## LETTER OF TRANSMITTAL.

TO THE IOWA STATE BOARD OF EDUCATION:

Gentlemen: In accordance with the Code, Section 2641, I have the honor to submit herewith the President's report for the bien-nium from July 1, 1912, to June 30, 1914. The reports of the deans of the several colleges are made a part of this report, are on file, and are herein more or less extensively quoted.

Respectfully submitted,

THOMAS H. MACBRIDE,  
President.

September 30, 1914.

## REPORT OF PRESIDENT MACBRIDE

---

### I. THE ADMINISTRATION AND THE STAFF.

#### CHANGES.

In any great institution where large numbers of men are concerned, changes in personnel are constantly occurring. The biennium just closing records for Iowa comparatively few. President Bowman left us in March of the present year, to be succeeded by the author of this report. In June, Dean Dunn, of the College of Law, for reasons purely personal, resigned his position, to be succeeded by Judge Emlin McClain, who returns to the work of teaching after some years of service in the Supreme Court of the State. At the same time, Professor Barry Gilbert accepted a professorship in the School of Jurisprudence of the University of California, to be succeeded by Judge Robert L. Henry, Jr., recently dean of the School of Law of the University of North Dakota. Professor Gustav Schoettle resigned the directorate of the School of Music; Assistant Professor Heilman has left us to accept a position in the University of Illinois; while Professor Edwin D. Starbuck returns to his former place in the Department of Philosophy and Psychology. Dean Hosford, after twelve years of faithful service as Dean of the College of Dentistry, retired, to be succeeded by his colleague, Dr. F. T. Breene. Dr. William Jepson, for many years Professor of Surgery, resigned in September, 1912, to be succeeded temporarily by Dr. W. R. Whiteis, and later by Dr. Charles J. Rowan, of Chicago.

During the first year of the biennium, Professor I. A. Loos enjoyed leave of absence from the Department of Political Economy and Sociology; and Professor T. H. Macbride was employed in the forests of the Pacific Coast. During the year just closing, Professor B. Shimek has had a few months' leave of absence in Europe and has given a series of lectures in the University of Prague and addresses in various part of the Austrian Empire. Professor Ellsworth Faris and Professor James L. Deming were employed, during the second year of the biennium, in the Departments of Philosophy and Economics respectively.

At the beginning of the biennium, the Department of Home Economics was established at the University, in connection with the College of Liberal Arts, and placed in charge of Professor Ruth A. Wardall, who came to us from the University of Ohio.

#### SERVICE TO STUDENTS.

Of those above the rank of assistant, the total number giving instruction in the University at this time, including administrative officers, is approximately 225. The total number receiving instruction at the same time is 2,669. The number of students for each teacher is about 12. The ratio in eastern colleges is about 7; in Michigan and Minnesota, 15; so that it is evident that our teaching staff is not too great. No doubt, with the increased registration of the present year and no increase in the teaching staff, the showing will be still more to our disadvantage.

#### SALARIES.

Notwithstanding the generous support accorded the University during the last five years, the salaries paid still range conspicuously lower than those paid for similar services in neighboring institutions of the same rank. The continuous service of strong men year after year in any institution is a very important factor in its individuality and power; and while it is well known that educational service is, and always has been, everywhere rendered with only secondary or minor respect to financial reward, nevertheless, other things being equal, it is evident that in these days of competition we may not long continue an unequal contest, as we call to the service of Iowa new men of first-class ability and training. This may claim our attention again on another page. In any case, the adjustment of salaries to our rapidly changing economic conditions, as well as to the ever-increasing call for men, is a great problem in present day administration, nor less so in the conduct of a great university.

#### RETIRING ALLOWANCES.

In this immediate connection a word on the subject of pensions or retiring allowances may not be inappropriate. The Carnegie Foundation has forced this idea upon all educational institutions and has introduced a new element into all our fiscal management. In other words, the expectancy of a retiring allowance becomes a matter of financial consideration to be estimated when the question of salary is in issue.

Any reputable insurance company will sell an endowment policy which will provide a retiring allowance based upon age, and other suitable conditions. The cost of administration has hitherto been so great as to make such policies less convenient. It is believed that, did the State undertake the administration of such insurance, the cost would be so small that retiring allowances might be at the service, not of teachers and professors only, but of wage-earners generally; and thus such foundations as that of Mr. Carnegie might become of less consequence, while beneficiaries would enjoy an independence which seems scarcely possible under any system of benefaction privately administered and sustained.

In the meantime, and pending definite legislative action, I recommend the plan suggested by President Seerley, by which a professor entitled to retirement may be assigned to detached service at a salary equivalent to the so-called retiring allowance, or to such proportion of full salary as the Board may appoint.

## II. THE STUDENTS.

### GENERAL SUPERVISION.

For the students the University exists. For their good fortune, buildings, libraries, equipment, lectures, teachers—all are here. That such provision may be largely and wisely used is the business of all administration. To care for several thousand students in such manner that from week to week, even from day to day, the history of each individual student may be accurately known and followed, is the ideal sought. By our system of reports and by the activity of advisers, in the case of undergraduate students, this ideal has been quite fairly realized. Such is the general *morale* of the student body that in the great majority of cases, such supervision is unnecessary; in this sense our system is for the benefit of comparatively few. Experience proves that students more frequently bring with them the tendencies which are likely to interfere with their own success and which demand special solicitude on the part of the University administration. It is a pleasure to note, by the report of the Dean having this work immediately in charge, that cases of discipline are indeed few, and that there is good reason to expect for the future a diminished number.

### HOUSING OF STUDENTS.

The great accomplishment of the biennium was the opening of Currier Hall, a home for University women. This building, which

accommodates 154 students, was put into commission in September, 1913, and excellently organized by our efficient Dean of Women, Miss Anna M. Klingenhagen. So great has been the success of the hall that one wonders how we got on without it. For the year 1914-15, every room was taken long in advance; and did we have another building of the same size, it would be immediately occupied. Had we three more of the same capacity they would all be filled at once, and even then more than one-third of the women would be left to care for themselves. The contribution which this modern and efficient method of caring for students makes to the general *morale* and tone of student life is notably of inestimable service.

It is planned to extend, just as rapidly as possible, the dormitory method. A series of halls for men will be begun at the earliest moment. Only in this way, it is believed, can the young people, who are already to be counted by thousands, be properly and sanely cared for in comfort and health.

#### HALLS FOR LITERARY SOCIETIES.

The literary societies of the University have never had the recognition they deserve. In a democracy such as ours the training they offer is of the highest service. For years, these organizations have patriotically maintained themselves, largely at their own cost. They have given, to the country, men prominent everywhere in public service. They should be cared for and provision should be made as rapidly as possible to afford these young men and women suitable halls. The solution of the problem may not be found until permanent quarters can be provided for all forensic work. This is one of the pressing needs in connection with matters of immediate student concern.

#### FRATERNITIES AND SORORITIES.

These organizations are simply student clubs. In connection with the University, there are to-day nineteen fraternities and nine sororities. Several of these own their houses; others are tenants and generally pay a high rental. The number of students caring thus for themselves is considerable, perhaps 425 during the last year. These organizations have their advantages and their disadvantages. They may afford opportunity for disorder and abuses of various sorts; but when properly managed and under just supervision, they may become centers of University spirit and

loyalty, and in every way efficient factors for good. Nearly all these organizations are national in character and are represented in many of the universities of the United States.

#### THE IOWA UNION.

This is simply a more democratic and local fraternity for men. It is, in a way, a protest against the old-fashioned commercial boarding-house, and emphasizes the imminent necessity for men's dormitories or commons, as already discussed. An organization of students, guided largely by the Junior Dean of Men, has rented the old St. James Hotel. These students take care of themselves. The fact is that, with the great increase in the number of our students sure to occur in the near future, boarding-house facilities in Iowa City will be entirely inadequate.

#### HEALTH AND MORALE.

The health of the student body has been uniformly good. We have had no general epidemics. The military service maintained in connection with the United States Army affords general exercise for men in the open field during the greater part of the year. To the same end contributes our work in physical education, maintained for both men and women. Two new gymnasia will be available within the next twelve-month and will, when completed, afford ample opportunity, it is believed, for regular, methodic physical exercise for all our students.

#### RELIGIOUS LIFE.

The Y. M. C. A. and the Y. W. C. A. of the University own a convenient building and have been in successful operation for many years. In addition to this, the local churches of all denominations are well organized, well managed, and hospitable in every way. More recently, as an especial effort to meet the students and if possible offer them the same religious service they might enjoy at home, several churches have employed assistant pastors whose entire time is given to the welfare of young men and women who, in connection with their work in the University, are temporary residents of the city. While during the last year there have been no regular formal religious services in connection with the University as such, nevertheless the men and women having this great institution in charge are by no means indifferent to religious life; and the whole atmosphere of the University is Christian, and profoundly so.

It is hoped to begin in the academic year 1914-1915 a regular series of vesper services on Sunday afternoons. These, while entirely non-sectarian, shall be of the highest religious tone. It is planned to give students of the University an opportunity to hear the best representatives of religious thought and the most successful pastors now active in the country.

### III. UNIVERSITY WORK: THE COLLEGES.

Ten colleges at present make up the University of Iowa. The reports of the deans of these colleges are hereby made a part of this report, and are on file in the President's office. The abstracts and annotations following will give some view of our present status as an efficient agency for service.

#### 1. THE COLLEGE OF LIBERAL ARTS,

W. C. WILCOX, DEAN.

The report of Dean Wilcox is in part as follows:

I herewith submit my annual report as Dean of the College of Liberal Arts for the year just ending.

#### SOME FORTUNATE FACTS.

It is a matter of much pride that factionalism plays so small a part in the College of Liberal Arts. It is doubtful whether any institution of this size is as free from this evil as is this college.

As a rule, the instructors in the College of Liberal Arts are devoted to their work. Much of their work is done beyond absolute requirements and in a truly unselfish spirit.

Departmental conferences have been emphasized. It is desirable in every department where the instructional staff is at all numerous that these instructors meet together at stated intervals for conference. In some departments the beneficial results of this are very noticeable. In some others, perhaps, the results would be better if the practice were more rigidly adopted. Each member of a department ought to know what the other members are doing and what is expected of him.

Our present system of departmental headships seems to be working well. The committee system of departmental management, much in vogue in some institutions, would not work well here. Our instructional staff is not sufficiently large to justify it. The fact that one man is a recognized permanent head of a department has produced very good results.

#### RECENT DEPARTURES IN ADMINISTRATION.

The new phase of University Extension is worth noting. The old style of Extension lecture has been superseded by an attempt to correlate University activities with the life of the state. Just how far this movement can go remains to be seen. Many mistakes can easily be made, but

these may be necessary to point out the right way. Another recent departure in administration is the co-operation between the local high school and our work in Education. So far this co-operation has produced the very best results. The plan is being extended. It is a benefit to the high school and to our College of Education as well.

Another change which is going on and which ought to be noticed is that each department is being encouraged to give courses in the teaching of the subject involved. These courses are recognized by the College of Education. The results are beneficial in two ways. It brings the department of education into closer touch with the other departments of the College of Liberal Arts, and it also provides a specialist in the art of teaching the subject.

The need of building is very general. A women's gymnasium will soon be under way. But a building is needed very badly for library purposes. The same thing is true of botany and geology. Most valuable collections are here housed in a building which is subject to destruction at any time.

There is great demand for a new chemical laboratory. The present crowded condition can be relieved temporarily, but it is only a question of a short time before a new chemical building will be a necessity.

There is already a demand for a building for public speaking. A building erected for this purpose should not only afford an auditorium, but consultation, office, and class rooms. This is a sort of work which is annoying to adjacent departments. Public speaking ought to have a building of its own.

The College of Education needs separate quarters. A building devoted to this purpose is generally found in most of the leading universities. At present the work in education is crowded into inadequate space and is badly decentralized.

There should be a building for the literary and forensic societies. If not a separate building, then these organizations should be accommodated in the building designed for public speaking. The present quarters are unsuitable in every respect and the literary societies are at the lowest point in their history.

There is demand also for a women's building on the main campus. This should contain rest rooms, study rooms, and possibly a lunch room. The women ought to have some building devoted exclusively to themselves, as the present students' union is devoted exclusively to the men.

There is a strong movement on foot to abolish foreign language as a college entrance requirement. This would almost certainly mean the teaching of beginning Latin in the University. Whether desirable or not, this change is likely to come; and preparation must be made to meet it.

Still another problem which confronts us is the development of the Summer Session to meet the needs of students as required by law. This may mean adding normal courses to our Summer Session curriculum. It may also mean the extending of the time of the Summer Session to eight weeks or possibly twelve weeks. The recent action of the state legislature has brought this matter up in an acute form.

## IN CONCLUSION.

There is almost no limit to the needs of the College of Liberal Arts. Similarly, there is no limit to the problems that confront it. If one were to confine his scrutiny simply to needs and problems, he might easily become discouraged; but there is a larger view. When one compares the College of Liberal Arts to-day with what it was ten or twenty years ago, the comparison is gratifying. Genuine progress has been made. The work of real education has advanced. Furniture may be lacking, equipment may be inadequate, space may be crowded, supplies may fall short; but if the movement is in the right direction, if the right spirit is guiding the work, the outcome will take care of itself.

## HOME ECONOMICS.

I believe it is proper to say that the courses in Home Economics have proved the most popular ever offered to the young women of the University. They were no sooner announced than accepted to the complete occupancy of all provision made. Already at the opening of our second year we find ourselves handicapped in every way—in room, equipment, and teaching staff. Miss Wardall says:

We have no means of judging of the demand on the individual courses on the part of any young women not now at the University; but this first year has brought from other institutions a number of young women who have asked for advanced work in this department. We, of course, offered only freshman and sophomore courses, and could not offer any work to this group of students; but have indicated our plans to offer more work next year.

During our first year in this department, 81 young women registered in textiles (freshman), but all classes were represented in this course and we are not expecting more than 50 or 55 next year. In foods (sophomore) we have had ten, but Dr. Rockwood reports 48 young women taking freshman chemistry as a prerequisite to that course in this department. There are 16 young women now carrying work in this department who will be of junior rank in September. These young women will expect the courses in sanitation and the house, and part of them will expect the course in dietetics and in clothing. The six young women of senior rank next fall will expect household management and teachers' course, in addition to the junior subjects.

I feel that our work will be seriously crippled in case we have no additional instructors, due to the facts that valuable courses will be omitted, and that the small teaching force will probably attempt to do more than is wise. It really means breaking faith with a group of young women who have pursued work in the University this year, but I believe that it will not come to this.

## 2. THE COLLEGE OF LAW,

HENRY W. DUNN, DEAN.

Herewith I submit, as requested, my report of the work of the College of Law for the biennium now closing:

An account of what has been done during the last two years and an outline of plans for the future will be better understood if prefaced by a brief statement of the general policy which lies behind all specific measures and the reasons why that policy has been adopted.

The Law College of the State University is maintained by the state at public expense, not primarily for the purpose of conferring a benefit on that very small fraction of the population represented by the students who attend the school, but in order that the state may have a competent and well-trained bar for the service of the people at large. The need of the state is not for *more* lawyers; but every state needs the *best* lawyers it is practicable under present conditions to produce. Any citizen may find himself in a position where the continued enjoyment of life or liberty, or if not those, of rights and benefits second only to them in importance, will depend upon the services of a sound legal adviser or a skillful and capable advocate; and possibly in no other profession is it so difficult for the layman to judge for himself of the qualifications of the practitioner.

Obviously, then, the first duty of a state law school is to the public whom its graduates are to serve; and this duty requires it not merely to give to each student the most thorough training possible, but to set a standard of attainment reasonably commensurate with the importance of the duties which the state expects its graduates to discharge, and to withhold the stamp of its approval from those who are unable or unwilling to meet this standard; in order that its degree may be, so far as reasonably possible, a guaranty of fitness on which the people of the state may safely rely.

In carrying out the policy thus indicated, two cautions must be observed. First, arbitrary standards must not be set up without reference to existing conditions. The requirements must be no higher than any Iowa boy, reasonably fitted by natural capacity for the legal profession, can by proper effort be expected to meet. Secondly, the efficiency of the instruction given to those who are competent and earnest must not be sacrificed by excessive attention to the incompetent or indifferent, and to that end the latter must be eliminated as soon as their classification is certain. This involves a correlative obligation to make very sure of the classification.

By action of the Board of Education last year, on recommendation of the faculty, it was provided that students entering in the fall of 1914 must have completed successfully one full year of work in a college of liberal arts; while those entering in 1915 and thereafter must have completed two years of college work.

Provision is made in the rule for the exceptional case of mature students who have not had the required college work and cannot afford the time to secure it, but who satisfy the faculty of their ability to carry the work of the law school. Such applicants will be admitted as special

students, and on completion of the course will be given an official certificate; but the degree will be awarded only to those who have fulfilled the college requirement.

A very encouraging feature is noted in this year's registration. For many years past the number of students who took only one year in the school, and abandoned their law course after successfully passing the first year's work, has been disproportionately large. Such a condition is unfortunate, since it means a good deal of effort and money expended for which neither the students concerned nor the people of the state receive a full return. It is therefore a source of a good deal of satisfaction that last fall, in spite of a steady increase in scholarship requirements, which resulted in more first year men being dropped last year for scholarship deficiencies than ever before, the number of students returning for the second year was larger than for many years.

### 3. THE COLLEGE OF MEDICINE,

JAMES R. GUTHRIE, DEAN.

The College of Medicine has the honor to be ranked today among the very best in the United States. By the American Medical Association it is given a ranking of "A plus." This fact is a gratification to the faculty, to the State Board of Education, and to the people of the State of Iowa. The following is the report of Dean Guthrie:

During the biennium the College of Medicine has made progress in every way: its courses of study have been enriched; its hospital has been greatly improved and enlarged; its clinical material has been abundant and varied; its graduates have been superior in qualification and attainment. The more rigid requirements for admission, and the more exacting work in class-room, have reduced the attendance at medical colleges throughout the country; many have been entirely abandoned. With us the graduating class has accordingly been much smaller than heretofore, but we are satisfied that the excellence of service, both to the student himself and to the community, is abundant compensation. The present arrangement makes it an advantage for a man seeking medicine as a profession to enter the College of Medicine of the University; his diploma is more than a recommendation, it is the beginning of a reputation. For these reasons there is no doubt that the attendance will presently increase beyond our present limits of instruction.

Homes for nurses have been provided. These care for all those engaged in the training school as well. The training school is a department of the University Hospital affording its pupil nurses advantages in all departments of nursing, including medical, surgical, gynecological, and obstetrical, as well as the special diseases of children and of the eye, ear, nose and throat. Beginning with a class of five in 1900, we now have seventy pupil nurses, a number which will be increased to meet the demands of the hospital.

Our laboratory work in hygiene has outrun present limitations, and other real needs are upon us.

One of the pressing needs to-day is the erection of a new laboratory building for the Department of Pathology and Bacteriology and the Department of Public Health, known perhaps as the Institute of Pathology and Public Health. The very close relationship between these departments makes this arrangement the natural one. Public sentiment is urgently demanding rapid progress in preventive medicine. No college of medicine can do its work for the people or fill its mission for the State unless it leads in preventive medicine and furnishes its students the best there is along these lines. In Minnesota they have built such a building. It has proved too small. Just now the public mind is awake to this need, and an appeal will certainly be heard and a liberal appropriation secured. In this building, room could be had for a proper hygienic laboratory with all modern equipment; and a laboratory for experimental pathology and bacteriology is becoming daily more important. This association of departments in a new, properly constructed building would be ideal and we urge this as the next progressive step for the College of Medicine.

From the latest report of Dr. Henry Albert, I quote the following statistics:

"During the past biennium 35,432 examinations were made and preventive treatments given in the bacteriological laboratories of the Iowa State Board of Health. Twenty-seven thousand two hundred seventy-six examinations were made, and 3,104 preventive treatments were given at the central laboratory at Iowa City; and 5,052 examinations were made in the auxiliary laboratories of the State Board of Health. Of the total number, there were 15,684 examinations for diphtheria, 4,180 examinations for typhoid fever, 7,086 examinations for tuberculosis, 5,378 miscellaneous examinations, 1,925 preventive treatments for rabies, 723 vaccinations for smallpox, and 456 vaccinations for typhoid fever.

Just now public sentiment is demanding that something be done for crippled and deformed children, and it seems certain that Iowa will soon build a home for these unfortunates. Can we not secure the "Iowa Home for Crippled and Deformed Children?" No argument is needed in favor of such a home, nor to show its value to our clinics. It would likewise be a saving to the state. With an organized effort, we believe such a home will be provided for by the next legislature.

A psychopathic hospital would add much to our college in completing the medical course and in giving our students the benefit of proper training in the management of nervous or mental diseases, and would enable us to do something in investigation of insanity as a disease and likewise as to its cause; also to do some work along preventive lines.

A state psychopathic hospital would be a strong centralizing force and keep the University in vital touch with all other hospitals of the state."

#### 4. THE COLLEGE OF HOMEOPATHIC MEDICINE,

GEORGE ROYAL, DEAN.

The College of Homeopathic Medicine is the alma mater of a large number of the homeopathic physicians and surgeons of our

State. The dean in his biennial report emphasizes various needs, but especially refers to the unsafe character of the present building. He says:

If possible, there should be \$75,000 expended for the purpose of building an up-to-date addition to the present hospital building of the College of Homeopathic Medicine. This is needed because the present building is unsanitary, unsafe, and inconvenient; unsafe especially from its liability to fire, and inconvenient for the escape of the patients.

At the present time the private room is sought by patients. Several times during the current year patients have been obliged to wait because there were no private rooms, all being occupied. Patients who want private rooms are just as good for clinical purposes, and at the same time increase the revenue of the hospital more than ward patients.

The condition of the present building has caused both patients and students desiring homeopathic treatment to go to Chicago and elsewhere; therefore I would most earnestly solicit your prompt action upon this request, and state as the main one of many reasons the unsafe condition of the present building.

#### 5. THE COLLEGE OF DENTISTRY,

FRANK T. BREENE, DEAN.

In this college the present dean succeeded Dr. W. S. Hosford less than a year ago. The history of this college has been one of steady progress and development, until now we have entirely over-run our capacity for work. We are obliged to limit registration. Dean Breene reports in part as follows:

It was the understanding of the head of this college when taking over the duties of administration, that a reorganization of the teaching staff and the institution of better business methods was desired. Careful reorganization is necessary to reach the standards of our associating schools, of the Dental Faculties Association of American Universities.

It has long been evident that a modern college building was necessary. Ample space and equipment for teaching progressive dentistry is required. Aseptic methods can not be well taught in our present surroundings. The ideals of dental education, as interpreted by modern methods, can only be well presented under modern conditions. Of the seven universities holding membership in the Dental Faculties Association of American Universities, five have recently constructed buildings with an individual expenditure of \$150,000 to \$500,000 exclusive of equipment.

Dental metallurgy is of vital importance to our students. Some arrangement should be made with the Department of Chemistry whereby a thorough course of instruction could be presented. Laboratory facilities for instructional work in metallurgy are inadequate. A laboratory equipment for dental purposes could be installed at an expense of three to four thousand dollars.

Students in dentistry should receive more instruction in anaesthesia. If a department of anaesthesia could be established, it would be to the advantage of the medical and dental colleges.

#### 6. THE COLLEGE OF PHARMACY,

WILBER J. TEETERS, DEAN.

The College of Pharmacy has made constant progress in excellence of service, and in the accomplishments of its graduates. Although not large, it enjoys deservedly a fine reputation. This year, as for several years past, every graduate taking the examinations of the State Board of Pharmaceutical Examiners was successful. Dean Teeters especially commends his colleagues for able and faithful service, and continues:

I think the time is at hand when the college should have a man to take charge of pharmacognosy and give it his entire time. I have been teaching this subject for a number of years as a supply, waiting for a time when it could be taken up as a special subject.

With regard to the assistant hospital pharmacist, I should prefer to make this an honorary position, to go to the member of the senior class best qualified for the place, all things being considered.

The lectures on salesmanship and business are important, and I should prefer to bring to the University from several of the larger towns of the State, men who are qualified to lecture and who are in actual business. Most of these can be secured for a few lectures by paying their expenses.

#### 7. THE GRADUATE COLLEGE,

CARL E. SEASHORE, DEAN.

As Dean of the Graduate College, I have the honor to submit a report on the College for the academic year 1913-14:

In graduate work Iowa ranks well—fourth—among state universities. Two of those which rank higher are easily accounted for: California by the state requirement of a master's degree from all high school teachers, and Wisconsin by the very large appropriation spent for the development of research.

During the past year, the system of securing records of the achievement of individual students registered from each college has been begun. An efficiency report of this kind, covering the fourteen years of the existence of the college, was issued during the year to Coe College. This record is now regarded by the Association of American Universities as an important aid in the classification and standardizing of the colleges.

This University has practically no system for the publication of learned works. As a result, our output is scattered in the various magazines and much remains unpublished for lack of funds. The sum available this year, \$500, has enabled us to pay for only a few reprints in physics and part of the cost of publication of a monograph in zoology, and Volume 6 of the University of Iowa Studies in Psychology. As stated in the budget

submitted, it is recommended that the Board of Publications, which is now a senate committee, be made a committee of the Graduate College.

The University needs a summer station for research in the biological sciences. All things being taken into account, the present site of the Lakeside Laboratory on Lake Okoboji is perhaps the most favorable. I would, therefore, most heartily commend the plans of the promoters of this laboratory with these specific recommendations:

1. That the Graduate College of the University establish a *research station* for the biological sciences, purely in the interest of research. The station should be open and in full operation during the summer months, but available in exceptional cases throughout the year.

2. That the University acquire additional land for this purpose, in accordance with the recommendations of the founder.

3. That the University co-operate with the present Lakeside Laboratory Association in developing further the elementary interests, with extension into popular lecture courses in science, in co-operation with the research station.

4. That the Lakeside Laboratory Association be encouraged to develop on these grounds certain permanent annual *conferences* in the social and mental sciences.

The cost of the property and the cost of maintenance will be trifling in comparison with the possible returns. The buildings can be chiefly of summer structure, and are operated at the time of year when little is needed for light and heat. Stipends given by the University to research men for well planned work might acquire a double justification by the requirement that these experts in the various sciences shall give a limited number of lectures in the courses of popular and elementary instruction which are maintained on the same grounds as the research station, but as a separate organization. No lectures and no courses are needed for the research station. Its facilities should be limited to those who have already found themselves in research, and are capable of conducting independent investigation. The station should be a summer camp for men of science, and should provide facilities for comradeship and co-operation in inquiries into nature, while leading the simple life on the beautiful banks of the lake in the summer.

The ideal of the Graduate College is not to have a few isolated research professors. We aim rather to make it the duty of every member of the staff to take on the two-fold function of teaching and research. Research cannot be done by proxy, and it is the task of a life time. We need in every department a joining of hands of the mature man, with long experience and broad outlook, and the young man just fresh from his graduate apprenticeship in research. To get this, we must set aside time for research as well as for teaching. Very few departments now have adequate provision for this purpose.

There is danger of making new appointments in the lower ranks of the staff in response to demands for elementary teaching. With the lock-step system of promotion this gives the death blow to research. Teaching is the first and the larger function of the university, but we must abandon the practice of selecting new men solely on the ground of teach-

ing ability. We cannot always combine genius in teaching with genius for research. As appointments may sometimes be made solely on the ground of teaching ability, it may be equally demanded that some appointments should be made solely on the ground of research ability. The ideal is, however, a happy combination of the two.

Academic life is a privilege, a luxury, a prize, for which men are willing to sacrifice. The university man does not get his pay all in money, but somewhere in the system there should be ample provision for the economic comforts of a learned career. In this respect, we have much to learn from the universities of the Old World, from the older universities in this country, and even from our more progressive neighbors. While Illinois, Wisconsin, Minnesota, and Michigan, have about the same scale of salary for instructors as we have, their standards for the full professorships are very much higher, and in many cases nearly twice as high. This is one of the essential signs of the progressive university.

#### 8. THE COLLEGE OF APPLIED SCIENCE,

WM. G. RAYMOND, DEAN.

The College of Applied Science, altogether uninterrupted by the discussions of two years since, has gone steadily forward. The spirit of the college is fine, and its progress in equipment and attendance is set forth in the sentences following, from the dean's report:

During the biennium the electrical laboratory, the senior recitation room, lecture room and faculty offices have been removed from the old brick building back of the Old Capitol to the new Physics Building. New equipment to the value of approximately \$6,000 has been added to the laboratory.

The year just passed saw the beginning of instruction in molding in the Department of Mechanical Engineering, equipment being purchased for this work with funds furnished by the special appropriation of the last General Assembly. A foundry has been asked for and ordered by the Board of Education, and construction on it has begun. It is expected that it will be occupied the coming fall, when we shall for the first time be able to offer instruction in the four principal lines of shop practice, namely: smith work, wood work, machine work, and foundry work.

The Department of Mechanical Engineering, co-operating with the Superintendent of Grounds and Buildings, has instituted efficiency tests of the University heating plants. These tests are of educational value to the students taking part, and of economic value to the University, in that they show where the plants are deficient and what remedies should be adopted. The first test indicates that very considerable economies in fuel consumption can be realized.

During the four or five years following the financial depression of 1907, attendance in engineering schools fell off materially throughout the United States. Statistics of many years show that such decreased attendance is to be expected after every financial crisis and that the low water mark in

attendance is reached in from four to five years after the beginning of the financial depression. Our College of Applied Science was among the first to begin to recover, the entering class of the fall of 1912 being about 50% larger than that of the preceding year, the entering class of the fall of 1913 being about 35% larger than that of the fall of 1912, while the total attendance for the year just passed has amounted to 228, an increase of 29% over that of the previous year. With the passing of the small upper classes and a reasonably large incoming freshman class, the fall of 1914 should see the largest attendance that the college has yet had.

What I count to be the most important step taken during the biennium is an arrangement proposed to the colleges of the state, and already accepted by Grinnell College and under favorable consideration by Coe College. By this arrangement, a student of engineering may pursue a course for three years in any standard college of liberal arts and two or three years in the College of Applied Science, receiving at the end of his fourth year of college work an arts degree from the liberal arts college in which his first three years' work was done, at the end of his fifth year a bachelor's degree in engineering from the College of Applied Science, and at the end of the sixth year, should he choose to take it, a professional degree in engineering from the College of Applied Science.

This arrangement involves no new policy or principle on the part of the University. The only new policy involved is on the part of the colleges of the state accepting the arrangement, and lies in their acceptance of one year's work in the College of Applied Science for their bachelor's degree in arts or science. This arrangement was made long ago with the College of Liberal Arts of the University.

## 9. THE COLLEGE OF FINE ARTS.

CLARK F. ANSLEY, DEAN.

The fine arts have only recently found place in the organization of the University. Some form of art has indeed never been lacking in University life, but the effort to develop the subject has lacked coherence and the results have accordingly been only partially successful. The Ranney Fund has been a great stimulus in the right direction and gives great hope for future development. Work in drawing, painting, and plastic arts is going rapidly forward. Art exhibits are frequent and have attracted wide attention.

The School of Music, after a checkered history, encouraged, recognized, affiliated, partially supported, has at length received definite place and is to-day for the first time a part of the University. The School will, in the near future, it is believed, give such account of itself as will command the recognition and support its importance so well merits.

Just now the opportunity for service in the realm of art is very great. The increasing wealth of our people is fraught with danger

unless right principles and correct information in matters artistic are quickly set up and made dominant everywhere. Here is the opportunity and the immediate duty of the College of Fine Arts.

#### 10. THE COLLEGE OF EDUCATION,

WALTER A. JESSUP, DEAN.

The College of Education has before it almost the entire work of its own organization, with possibilities of development almost unlimited. This college has been latest to receive recognition and to be set in true relation to the service of Iowa's public schools.

During the biennium, aside from the ordinary work of the Department of Education, with its several chairs, the college has been efficient in a number of ways. Much attention has been given to the training of superintendents, high school principals, and high school teachers in literature and science. For this purpose, a model school, in connection with the city school system, has been maintained; and opportunity to serve the high schools of Iowa opens more rapidly than our present resources can possibly meet. In connection with University Extension a system of school survey has been undertaken which must eventually result in a great stimulus to all our schools in the direction of improved service to our communities, and in the accumulation of data of supreme importance in the further educational effort of the state.

Dean Jessup's report is, in part, as follows:

The University is the head of the educational system of the state. Her leadership can be attained only on condition that the University recognize the situation by sending out her teachers trained for the type of service demanded. With the changes that have come about in connection with the inspection of high schools, many educational leaders say that the University can now be of greatest service through the training of teachers who understand present day educational demands.

Therefore the State should make special provision for the thorough training of superintendents, principals, and supervisors. Inasmuch as these men must have a liberal education as a basis for their specialized, technical, or professional work, it would seem to be wise to establish such training facilities at the University.

#### IV. UNIVERSITY WORK—GENERAL.

##### 1. EXTENSION DIVISION,

O. E. KLINGAMAN, ACTING DIRECTOR.

Although the idea of University Extension is by no means new in the history of University service, we here record for the first

time an organized effort in this direction, based upon a specific appropriation for this purpose. For reasons unnecessary to relate, the organization of the work has been somewhat delayed. At present, however, a clear view of our field is before us, ninety-eight counties have been visited, and work for the academic year beginning in September, 1914, is fairly under way. Mr. Klingaman reports as follows:

Our Bureau of Municipal Information was officially endorsed by the Iowa League of Municipalities at their meeting in Marshalltown in September, 1913. The Bureau has been very active in furnishing information of various kinds to the municipalities of the state. It has been called upon to furnish information on telephone franchises, electric light and power franchises, electricity for pumping city water, electric light rates of all kinds, water rates, water analyses, and paving of all sorts.

A "Municipal Day" was also established by this Bureau. This is a day which is set apart for the consideration of specific problems offered by the municipalities. This year the problem was municipal lighting. The meeting was held on February 4th. Owing to a cold wave which swept over Iowa the night before, the attendance was considerably reduced, but in spite of this the meeting was so well attended that it was decided to make this an annual feature. City officials were invited to come, and responded quite well. It is of interest to note that three members of the city council of Denison, where the franchise for electric light plant was about to expire, were present on that day, having come almost three hundred miles.

Within this Bureau of Municipal Information there has been organized a line of extension work which aims to be of service to the Iowa retailers. During the past year this division paid Mr. C. F. Kurtz for part-time service as an extension worker in business. The lines of Business Extension have been confined this year chiefly to the so-called business institutes. The following lines of work are given the retailers themselves: Salesmanship, Advertising, Store Management, Accounting Systems, Show Window and Store Lighting, and Store Survey.

The work in Business Extension has been so well received by the retailers that it shall be pushed with great vigor next year. The Division has found that a great need exists in Iowa for this work, and that it is gladly received.

Next year the Bureau of Municipal Information will be continued. There will be two men employed in the field of Business Extension. At present but one man has been engaged, viz.: Mr. C. F. Kurtz. Miss Bessie E. McClenahan takes charge of the field of Social Service. A Department of Educational Survey has been organized. Mr. E. J. Ashbaugh will be in charge of this. Other appointments remain to be filled.

Plans for the establishment of a library in this Division are under way. Exhibit material is being prepared. Everything points to a successful year.

I cannot conclude my report of the year's work without mentioning the close co-operation which exists between the various colleges of the

University and the Extension Division. I am grateful to all the faculty men who have so kindly given me so much of their time and the benefit of their wise counsel.

## 2. THE SUMMER SESSION OF 1914,

WALTER A. JESSUP, SECRETARY.

The Summer Session work of the University is an attempt to keep our great educational plant constantly at work. While recognizing the fact that teachers employed indoors for nine or ten months of the year need, for highest efficiency, the customary vacation of summer, nevertheless we also recognize the patent fact that for hundreds of people these same summer months afford the only opportunity of securing university instruction and advantages. For these reasons the universities of the country are likely soon to show open doors throughout the year. Dr. Jessup reports on this subject as follows:

A new attitude in regard to summer school attendance is noted throughout the whole country. Commissioner Claxton, of the United States Bureau of Education, says that there will be something like 175,000 students in attendance at the summer sessions this year. Indeed, this disposition to attend school during the summer has reached the high school and the elementary school in the public school system. Hundreds of cities are maintaining summer sessions of from six to twelve weeks. In other words, we are face to face with a tendency on the part of the American school-going public to go to school the year around. This is a part of the general movement for the conservation of all of our facilities.

It should be noted that the attendance at the summer session of the State University of Iowa has steadily increased during late years. Indeed, it can be shown by actual figures that in the departments which have received liberal financial support, enabling them to offer a suitable range of courses, the attendance has been very satisfactory. The graduate courses in this University have been well maintained for a number of years, the result of which is that at the present time the number of graduate students in attendance at the summer session ranks very high among state universities. Experience elsewhere indicates clearly, however, that a large number of undergraduate courses are needed in order to satisfy the demands of the Iowa students.

The Thirty-fifth General Assembly passed an act requiring all teachers to make special preparation for teaching during a period of at least twelve weeks, unless they had attended a college for one year, or graduated from a normal training high school. Similar legislation was passed in the state of Indiana in 1907. This results in a necessity on the part of the state university to maintain a three months summer session.

In view of the experience elsewhere, it seems reasonable to suppose that Iowa should offer some work in the summer session in the Colleges of Engineering, Pharmacy, Law, and possibly the College of Medicine and the College of Fine Arts, as well as the colleges now represented.

Again, almost all of the high schools in the State offer the commercial branches, but we offer no work in this field. The head of the department of commercial work in Davenport wrote a special letter last year urging us to recognize the claims of the commercial teachers for this service. We had no funds with which to do this. In manual training we are offering only two courses, whereas neighboring institutions offer from six to twelve courses. The same can be said for agriculture, drawing, music, and a number of other subjects.

In consideration of all these facts, it is recommended that the number of courses offered be doubled; that the length of the summer session be increased from six to nine weeks; that the instructional staff be paid at the same rate as they are paid during the academic year.

In connection with our summer session work, the University halls were open this year as usual to the Iowa Summer Library School. This affords many young people their only opportunity for training in library service. It has been very serviceable in the past and is, we believe, in the way of still greater service for years to come. For the successful session of 1914 the University is indebted to Miss Harriet E. Howe, of the Library of Western Reserve University, Cleveland, a most efficient director, and to Miss Jennie E. Roberts, Acting Librarian of the University.

### 3. THE UNIVERSITY LIBRARY, JENNIE E. ROBERTS, ACTING LIBRARIAN.

Miss Roberts has most efficiently cared for our great and growing library. She reports in part as follows:

During the year 8,121 additions have been made to the library; 5,292 were secured by purchase, 1,278 were gifts, and 1,551 were periodicals and transactions bound. Our reference collection has been enlarged by the addition of a number of Poole sets, and the completion of some sets already started.

The crowded condition of the library cannot be emphasized too strongly. Sets have to be put in places far removed from their regular classification because of cramped conditions. During the summer more cases must be extended to the ceiling, a most unsatisfactory arrangement. It will be necessary soon, if not the coming year, to box up some of our least used books and store them away. Our crowded condition makes it more necessary that we have a larger fund for help by the hour, since we need to be constantly shifting and re-arranging our shelves.

We are constantly reminded that our own collection of books, periodicals, and transactions is quite inadequate. We are constantly finding it necessary to borrow references from other libraries for our research students. The library pays the transportation both ways and the books are gotten from the nearest library. I think I can safely say that we borrow on an average of one book a week during the school year. This only emphasizes repeatedly that our book fund should be increased.

### 4. THE DEAN OF WOMEN, ANNA M. KLINGENHAGEN, DEAN.

The people of Iowa have as yet small idea of the service which the University is rendering and can render to the women of the

State. Within the last few years, especially, the opportunities for women in university work have been greatly enlarged and improved. Courses in which women are specially concerned have been multiplied—courses in the fine arts, in home economics, in literature. Much of what is now possible for the comfort and health of young women attending the University is due to the activity of our present Dean of Women. Her report is here presented in full:

The most important event of the biennium, as far as the social life of the young women is concerned, was the building and opening of Currier Hall. The Hall has proved very popular. Several weeks before the opening of the collegiate year in September, 1913, all the rooms had been taken; and the demand for rooms for the year 1914-15 is even greater than last year. Two months before the opening of University, every place is rented, and there is a waiting list in anticipation of possible withdrawals; and, without doubt, many young women will appear in September, hoping to be able to engage rooms at that time.

In view of the demand for rooms and in view of the fact that the Hall has been successful from a financial standpoint, it would seem desirable to erect another hall of similar capacity as soon as possible. From several quarters have come expressions of greater confidence in the ability of the University properly to take care of its young women. These expressions have come from mothers interested in the right living conditions of their daughters while away from home. With another building it would be possible to have all first year women live in a University hall. At the present time, with only one building, it does not seem wise to adopt such a policy and exclude upper class women, because of the great value that lies to the freshmen in the daily contact with upper class women, who can initiate them at once into the right attitude toward University life and work. The experience of the past year at Currier Hall has shown that the majority of upper class students can be relied upon for loyal co-operation in establishing and maintaining high standards of conduct.

Three years ago the dean of women was made academic adviser for all first year women, and as many second year women as she may wish to retain under her especial care. As a consequence, the freshmen women are registered in the fall in the office of the dean of women, who is thus enabled to meet every girl upon her entrance into college life. During the year, she talks over their work with them, discusses with them their plans for the future, and tries to direct them into the courses that will be of value in the work they are planning to take up after leaving college. Many students, while unwilling to enter the teaching profession, do not know what other possibilities there are in the business world. An effort has been made to furnish some vocational guidance for such women. Books dealing with the subject and giving expert advice and definite data have been obtained. A series of lectures along the same line was given last winter. It was insisted that the lectures should give concise information and, when dealing with any particular vocation, should state

the definite qualifications and training required; and this was done. The first talk, given by the dean of women, presented several matters of interest to all women who must earn their living, and also dealt with the teaching profession. It was followed by a talk on vocational psychology by Dr. Seashore, one on training for library work by Miss Shaffer, and one by Miss Wardall on the opportunities for young women who take up the study of home economics. Miss Bennett, the manager of the Vocation Bureau established by the Chicago branch of the Association of Collegiate Alumnae, kindly consented to come to Iowa City to speak to the women, and gave a most valuable talk on the openings in the business world and the qualities demanded of applicants for positions. It is hoped that it will be possible to extend the scope of these lectures during the coming year.

In the last biennial report a reference was made to a new senior organization, Staff and Circle, composed of twelve young women, who are selected by their classmates, as the leading representative women of the class, and whose chief function is to act as an advisory council to the dean of women. The organization has been of the greatest help, both indirectly in creating a better spirit along certain social lines, and directly in undertaking definite pieces of work. It was this group which in 1913 originated and furthered the movement which resulted in the formation of the Woman's League, an organization to which all University women may belong and which looks forward to student self-government. Each fall, the group is helpful in welcoming the new students and in calling on and aiding in various ways such as may need assistance in adjusting themselves to their new life.

#### 5. THE DEAN OF MEN,

FOREST C. ENSIGN, DEAN.

The office of Dean of Men is the outcome of several years' experience in an attempt to maintain a thorough and most efficient supervision of the student in all his relations to the University. Such supervision aims to afford advice, assistance, and encouragement in all phases of student life, within the class-room and without. It will be noted that the service of the Dean of Men is not limited to students of the College of Liberal Arts alone; all men of the University may consult him and are entitled to his service and assistance. An excerpt from his first annual report is here presented. Since the report was written, Mr. Rienow has been given the title of Junior Dean of Men; and, in addition to a systematic course of lectures to freshmen, he finds himself abundantly occupied with various student problems. He is in constant touch with the men of the University, "on the street, in their fraternities and rooming-places, at the Iowa Union, and as a participant in their social functions." Dean Ensign reports, in part:

The office of Dean of Men was created by the Iowa State Board of Education on July 15, 1913, and the writer was appointed as its first incumbent, with the title of Dean of Men and Registrar. The purpose in creating this office was to extend the advisory system, to enable the University to serve the young men more effectively, to advance standards of individual scholarship, and to secure to the students a more wholesome moral life.

For eight years a system of advising students in the College of Liberal Arts had been in operation. On October 11, 1911, the faculty adopted a new plan, providing for a smaller number of advisers, and more definitely fixing responsibility. Its principal provisions follow:

1. All Juniors and Seniors are to be assigned advisers in the department in which the major is taken.
2. All Freshmen and Sophomore women are to be advised by the Dean of Women, or by members of the instructional or administrative staff whom she may call to her aid.
3. All men, except Juniors and Seniors, are to be advised by an adviser elected by the faculty, on nomination of the President. The adviser may call to his aid members of the instructional or administrative staff.

The present Dean of Men was nominated adviser, and was duly elected by vote of the faculty.

The scholarship records indicate that the system of advising first and second year students reduced the number of failures, and that on the whole it was fairly adequate for the needs of the College of Liberal Arts. It seemed desirable to extend certain features of the advisory system to men not in that college, and to provide an officer whose duty it should be to co-operate with all the men of the University, should need arise, and to have definite interest in their social and moral welfare. Then followed the creation of this office.

The Dean of Men built his work for the past year upon the advisory system already established, and in successful operation for two years. Assistant Professor Robert E. Rienow was called to the University; and, though nominally attached to the Department of Education, he was able to give the larger part of his time to the interests of the men. No other members of the staff were called to assist in the work of advising Freshmen and Sophomores, Mr. Rienow devoting himself largely to Freshmen, the writer keeping in his charge the Sophomores. The centralization of this work has proven satisfactory, and in the light of experience gained, still better results may be expected in the future.

The office of Dean of Men in this institution is too new for us to attempt to define or delimit its functions. New duties will constantly be laid upon it, duties which have to do with the moral and physical welfare of our students, as well as with their intellectual advancement. Already the life of the men has been touched in so many ways that in a brief report it is not possible to present a full outline of all our work.

## 6. SUPERINTENDENT OF GROUNDS AND BUILDINGS,

JOHN M. FISK, SUPERINTENDENT.

Mr. Fisk's report, in part, is as follows:

The buildings which the University has built during the biennium ending June 30, 1914, are: women's dormitory, northwest wing to University Hospital, and University storehouse. Money was also appropriated from the Building Fund covering certain repairs and alterations to the Chemistry Building, an addition to the Medical Building for an animal house, and the building of a tunnel to the women's dormitory. For the above purposes the following appropriations were made:

Women's dormitory .....	\$150,000.00
Wing to hospital .....	115,000.00
Storehouse .....	3,000.00
Repairs to Chemistry Building .....	8,000.00
Animal house .....	12,000.00
Addition authorized by Executive Council.....	1,500.00
Tunnel to Currier Hall .....	13,000.00

From these reports, I believe I am here permitted to congratulate the Board and the people of Iowa on the prosperity and progress of this great institution. As noted by the Dean of the College of Liberal Arts, evidence of division or fraction here is entirely lacking; our faculties are one in spirit and enthusiasm; strong men, known throughout the country, and the world, devoted to highest ideals, creating here an atmosphere of learning and scholarship which can not fail to impress, as the years go by, the character and ambitions of all our people. The intellectual, the spiritual life of Iowa, must be forever the profound meaning of this great University, founded by the pioneers, by their children still maintained.

## OLD CAPITOL BUILDING.

In this connection, I beg to call the attention to the Board to the fact that in their keeping, on the campus of the University, is to be found our most interesting historic monument. I refer to the Old Capitol, old as the organization of the State. This building, beautiful in itself, and to be esteemed more and more dearly by our successors, by our children's children, let us hope, is almost the only such object worthy of the consideration of the State entire. This building is *not fireproof*; it is liable to destruction by lightning in any summer storm; has been struck more than once, fortunately without serious damage. I believe the patriotism of our people will justify a special appropriation to be expended in making this historic and noble structure fireproof.

## CHILD WELFARE.

There is still one other matter of a general nature concerning which I think it advisable to inform the Board, and on which I believe every University man and every citizen of Iowa, for that matter, will hope for favorable legislative action. I refer to the important matter already mentioned under the general term of child welfare.

It has long been obvious that the children of the State have been suffering unnecessary handicaps, and constantly passing on to manhood and womanhood burdened by infirmities entirely avoidable and remediable, if properly considered at the proper time.

To meet this situation the women of Iowa ask the University for help. It is proposed to use all the appropriate forces of the University in the investigation and control of this problem, that the children of the State may have at least a fair chance of coming to healthful and happy maturity and citizenship. It is proposed to organize at Iowa City a central child welfare station, and for this purpose at least \$24,000.00 per year will be needed. I invite your attention to this because the call is insistent, is statewide in its unanimity. The University is urged to afford this hospitality and to lend its organization to the carrying out of this beneficent intent.

Respectfully submitted,

THOMAS H. MACBRIDE,

President.

September 30, 1914.

# ANNUAL REPORT

OF THE SECRETARY OF THE STATE UNIVERSITY OF IOWA  
TO THE IOWA STATE BOARD OF EDUCATION,  
FOR THE YEAR 1912-1913—JULY 1, 1913.

Salaries .....	19,475.00	
Supplies and incidentals .....	182.20	19,657.20

**College of Medicine:**

Salaries .....	51,222.31	
Supplies, apparatus, etc. ....	9,346.34	60,568.65

**College of Homeopathic Medicine:**

Salaries .....	3,150.00	
Supplies, apparatus, etc. ....	96.00	3,246.00

**College of Dentistry:**

Salaries .....	20,049.24	
Supplies, apparatus, etc. ....	5,398.54	25,447.78

**College of Pharmacy:**

Salaries .....	5,400.00	
Supplies, apparatus, etc. ....	1,860.53	7,260.53

**Graduate College:**

Fellowships and Scholarships .....	6,490.00	
Supplies, etc. ....	349.01	6,839.01

**Summer Session:**

Salaries .....	7,955.07	
Supplies and Incidentals .....	120.00	8,075.07

**General Library:**

Salaries .....	8,280.00	
Supplies and assistance by the hour .....	1,589.47	9,869.47

**Administration:**

Salaries .....	20,101.65	
Supplies and assistance by the hour .....	3,137.83	23,239.48

## Alumni Bureau:

Salaries .....	2,708.45	
Supplies, stenographic service, etc. ....	343.31	3,051.76
<hr/>		
University Extension expenses and Lakeside Laboratory .....		672.60
Law Loan Book Account expenditures .....		75.15
Engineering Testing Laboratory expenditures .....		22.96
University Hospital expenditures .....		53,144.20
General expenditures from Income Fund .....		96,878.60
Tuitions refunded by order of Finance Committee ..		170.00
Music Tuitions—Collected by the Secretary and turned over to the Director of the School .....		6,960.00
University Homeopathic Hospital Expenditures ...		7,970.34
<hr/>		
Total expenditures from Income Fund, 1912-13		\$534,060.01
Balance cash on hand June 30, 1913 .....		79,625.87
<hr/>		
Grand total .....		\$613,685.88

## ITEMIZED EXPENDITURES—COLLEGE OF LIBERAL ARTS:

## Botany:

Thos. H. Macbride, Professor .....	\$ 1,750.00	
Bohumil Shimek, Professor .....	2,500.00	
R. B. Wylie, Professor .....	2,200.00	
Lucy M. Cavanagh, Assistant Curator .....	900.00	
Clifford H. Farr, Assistant .....	600.00	
L. A. Giddings, Assistant .....	600.00	
Supplies, etc. ....		\$ 837.32

## Chemistry:

E. W. Rockwood, Professor .....	3,000.00	
W. J. Karslake, Assistant Professor .....	1,800.00	
J. N. Pearce, Assistant Professor .....	1,800.00	
A. W. Hixson, Assistant Professor .....	1,800.00	
Edward Wolesensky, Instructor .....	1,100.00	
Edward X. Anderson, Instructor .....	1,000.00	
J. E. Booge, Instructor .....	1,000.00	
C. M. Alexander, Assistant Instructor .....	900.00	
R. H. Carter, Assistant .....	500.00	
John Coleman, Storekeeper .....	700.00	
C. E. Clindinin, Assistant .....	300.00	
Supplies and apparatus .....		4,634.52

## Education:

W. A. Jessup, Professor and Director .....	3,000.00	
H. C. Dorcas, Professor .....	2,500.00	
Irving King, Assistant Professor .....	1,800.00	
R. M. Stewart, Assistant Professor .....	1,500.00	
John J. Dynes, Assistant .....	200.00	
James W. Richardson, Assistant .....	200.00	
Lyman H. Van Houten, Assistant .....	200.00	
Mabelle E. Edwards, Stenographer .....	720.00	
Supplies, traveling expenses, etc. ....		231.93

## English:

C. F. Ansley, Professor and Dean College of Fine Arts .....	3,500.00	
S. B. Sloan, Assistant Professor .....	1,800.00	

## English—Concluded

Percival Hunt, Assistant Professor .....	1,800.00	
E. F. Pieper, Assistant Professor .....	1,800.00	
E. N. S. Thompson, Assistant Professor .....	1,800.00	
Marlow A. Shaw, Assistant Professor .....	1,800.00	
May Shuck, Instructor .....	1,200.00	
Ellen Geyer, Instructor .....	1,200.00	
Florence Joy, Instructor .....	1,200.00	
Walter Myers, Instructor .....	1,000.00	
Chester A. Corey, Assistant .....	250.00	
Supplies, etc. ....		88.00
Theme readers .....		1,500.00

## Chair of Public Speaking:

G. N. Merry, Assistant Professor .....	1,500.00	
Norma R. Harrison, Instructor .....	1,200.00	
Supplies, etc. ....		46.76
Supplies, etc., Forensic League .....		169.61

## Geology:

George F. Kay, Professor .....	2,600.00	
A. C. Trowbridge, Professor .....	2,000.00	
A. O. Thomas, Instructor .....	1,400.00	
Stuart St. Clair, Assistant .....	500.00	
J. W. Carville, Attendant .....	600.00	
Supplies, etc. ....		668.78

## German:

C. B. Wilson, Professor .....	3,000.00	
F. B. Sturm, Assistant Professor .....	1,500.00	
W. F. Luebke, Assistant Professor .....	1,500.00	
E. H. Lauer, Assistant Professor .....	1,500.00	
F. W. Kracher, Instructor .....	1,200.00	
Wm. T. Runzler, Instructor .....	1,200.00	

## Scandinavian:

Anna Heyberger, Assistant .....	200.00	
Supplies, etc. ....		107.64
Assistance by the hour .....		106.00

## Greek:

C. H. Weller, Professor and University Editor ...	2,700.00	
N. A. Kellogg, Instructor .....	400.00	
Supplies, etc. ....		95.15

## History:

W. C. Wilcox, Professor and Dean .....	3,500.00	
H. G. Plum, Professor .....	2,000.00	
Louis Pelzer, Assistant Professor .....	2,000.00	
Clara M. Daley, Instructor .....	1,200.00	
Frieda Kurz, Assistant .....	500.00	
Supplies, etc. ....		42.00

## Latin:

F. C. Eastman, Professor .....	3,000.00	
F. H. Potter, Professor .....	2,000.00	
F. M. Foster, Instructor .....	1,500.00	
Supplies, etc. ....		114.36

## Mathematics: .

A. G. Smith, Professor .....	2,900.00	
R. P. Baker, Assistant Professor .....	1,600.00	
J. F. Reilly, Assistant Professor .....	1,600.00	
Sarah E. Cronin, Instructor .....	1,200.00	
George A. Chaney, Instructor .....	1,100.00	
Cornelius Gouwens, Instructor .....	1,100.00	
Supplies, etc. ....		49.35

## Military Science:

Morton C. Mumma, Prof. and Command't (2 mo.) ..	83.32	
James A. Mars, Prof. and Commandant (4 mo.) ..	166.64	
C. S. Hoffman, Prof. and Commandant (6 mo.) ..	250.04	
O. E. Van Doren, Bandmaster .....	500.00	
Wm. De F. Rahming, Assistant .....	500.00	
Band members .....	465.00	
Supplies, etc. ....		243.88

## Philosophy and Psychology:

C. E. Seashore, Professor and Dean of the Graduate College .....	3,500.00	
Edw. L. Schaub, Associate Professor .....	2,400.00	
G. T. W. Patrick, Professor .....	1,500.00	
Mabel C. Williams, Assistant Professor .....	1,500.00	
Supplies, etc. ....		295.71

## Physical Training and Athletics:

N. A. Kellogg, Director in charge of Athletics ...	1,000.00	
E. G. Schroeder, Director in charge of Physical Training for Men .....	1,500.00	
Alice C. Wilkinson, Director in charge of Physical Training for Women .....	1,500.00	
Alice H. Wilmarth, Assistant in Physical Training for Women .....	600.00	
Mary Maher, Matron Woman's Gymnasium .....	300.00	
Dr. Zella White Stewart, Medical Examiner, Physical Training for Women.....	150.00	
Supplies, men's gymnasium .....		246.84
Supplies, women's gymnasium .....		271.42
Pianist .....		104.00

## Physics:

George W. Stewart, Professor .....	3,000.00	
Lee P. Sieg, Assistant Professor .....	1,700.00	
F. C. Brown, Assistant Professor .....	1,700.00	
H. L. Dodge, Assistant Instructor .....	700.00	
F. R. York, Assistant .....	600.00	
M. H. Teeuwen, Mechanician (12 mo.) .....	1,200.00	
T. Ingvaldson, Undergraduate Assistant .....	75.00	
H. A. Wolcott, Undergraduate Assistant .....	75.00	
E. E. Gray, Undergraduate Assistant .....	50.00	

## Political Economy and Sociology:

I. A. Loos, Professor and Director .....	3,000.00	
Paul S. Pierce, Professor .....	2,400.00	
Jos. L. Deming, Associate Professor (2d Sem.) ..	1,100.00	
C. W. Wassam, Assistant Professor .....	1,700.00	
Karl D. Loos, Assistant .....	500.00	
L. H. Mounts, Assistant .....	300.00	
Supplies, etc. ....		40.16
Assistance by the hour .....		265.17

## Political Science:

B. F. Shambaugh, Professor .....	\$ 2,100.00	
F. E. Horack, Assistant Professor .....	1,500.00	
Assistance by the hour .....		96.96

## Romance Languages:

S. H. Bush, Professor .....	2,700.00
Hertha L. Voss, Assistant Professor .....	1,500.00
Mathilde Laigle, Instructor .....	1,400.00
Jacob A. Wernli, Instructor .....	1,000.00

## Zoology:

C. C. Nutting, Professor .....	3,000.00	
Gilbert L. Houser, Professor .....	2,200.00	
H. F. Wickham, Professor .....	2,000.00	
H. R. Dill, Assistant Professor and Taxidermist (12 mo.) .....	1,800.00	
F. A. Stromsten, Assistant Professor .....	1,500.00	
Albert Kuntz, Instructor .....	1,000.00	
Dayton Stoner, Assistant .....	900.00	
Edna Foster, Assistant .....	400.00	
E. P. Churchill, Assistant in Animal Biology ....	350.00	
A. B. DeFreece, Undergraduate Assistant in An- imal Biology .....	50.00	
Carl F. Jordan, Undergraduate Assistant in An- imal Biology .....	50.00	
Ralph E. Thorn, Storekeeper in Animal Biology .	50.00	
H. E. Farnsworth, Mimeographer .....	50.00	
Assistance in Museum .....		32.80
Supplies, etc., for Animal Biology .....		440.94
Supplies, etc., for Zoology and Museum .....		536.91
Helen C. Gilchrist, Clerk to the Dean (12 mo.) ..	960.00	

Total salaries, College of Liberal Arts .....\$156,645.00

Total departmental expenses, College of Liberal  
Arts ..... 11,266.21

Grand total .....\$167,911.21

## ITEMIZED EXPENDITURES—COLLEGE OF APPLIED SCIENCE.

## Civil Engineering:

Wm. G. Raymond, Professor and Dean .....	\$ 5,000.00
B. J. Lambert, Professor of Structural Engineer- ing .....	2,700.00
J. H. Dunlap, Assistant Professor of Hydraulics and Sanitary Engineering .....	1,700.00
R. B. Kittredge, Instructor .....	1,400.00

## Drawing and Descriptive Geometry:

F. G. Higbee, Professor .....	2,100.00
R. B. Dale, Instructor .....	1,500.00
D. P. Gilmore, Instructor .....	1,400.00

## Electrical Engineering:

A. H. Ford, Professor .....	2,700.00
J. B. Hill, Assistant Professor .....	2,000.00

## Mechanical Engineering:

B. P. Fleming, Professor of Steam Engineering..	2,900.00
Ralph S. Wilbur, Instructor in Steam Engineering .....	1,500.00
R. W. Stewart, Jr., Superintendent of Shops ....	1,000.00
George J. Keller, Instructor .....	900.00
George Hedges, Assistant in Steam Laboratory...	330.00

## Mechanics:

S. M. Woodward, Professor .....	2,900.00
F. C. Young, Instructor .....	1,500.00
O. D. Jones, Instructor (9 mo.) .....	810.00
Elizabeth Martin, Clerk to the Dean .....	660.00

Total salaries, College of Applied Science .....	\$ 33,000.00
--	--------------

## ITEMIZED EXPENDITURES—COLLEGE OF LAW.

Henry G. Dunn, Professor and Dean .....	4,500.00	
E. A. Wilcox, Professor .....	2,500.00	
H. C. Horack, Professor .....	3,000.00	
Barry Gilbert, Professor .....	3,100.00	
Percy Bordwell, Professor .....	3,000.00	
Ralph M. Otto, Professor .....	2,500.00	
Neal M. Monroe, Library Desk Assistant .....	275.00	
D. J. Gilchrist, Library Assistant .....	50.00	
Otis Gilbrecht, Library Assistant .....	50.00	
Carroll Martin, Stenographer to the Dean .....	500.00	
Supplies and incidentals .....		157.20
Practice court incidentals .....		25.00
Total salaries, College of Law .....	\$ 19,475.00	
Total supplies, College of Law .....		182.20
Grand total .....		\$ 19,657.20

## ITEMIZED EXPENDITURES—COLLEGE OF MEDICINE.

## Anatomy, Histology and Embryology:

H. J. Prentiss, Professor .....	\$ 4,600.00	
J. J. Lambert, Assistant Professor .....	2,000.00	
D. H. Osborn, Demonstrator .....	1,400.00	
E. M. McEwen, Assistant Professor .....	600.00	
W. W. Larson, Undergraduate Assistant .....	100.00	
R. M. Arey, Undergraduate Assistant .....	75.00	
F. A. Stevens, Undergraduate Assistant .....	50.00	
Alex Story, Attendant .....	840.00	
Supplies .....		\$ 681.66
Dissecting material .....		1,837.31

## Gynecology and Obstetrics:

J. R. Guthrie, Professor and Dean .....	1,200.00	
W. R. Whiteis, Professor of Obstetrics and Assistant in Gynecology .....	1,600.00	
Paul Reed, Assistant .....	1,000.00	
Louis W. Harding, Assistant .....	500.00	
Supplies, etc. ....		33.10
Clinical obstetrics fund .....		598.71

## Materia Medica:

C. S. Chase, Professor .....	2,400.00	
J. B. Hanson, Demonstrator in Pharmacology ..	1,200.00	
Ray Gittens, Undergraduate Assistant .....	75.00	
Supplies, etc. ....		353.08

## Ophthalmology, Otology, Rhinology and Laryngology:

L. W. Dean, Professor .....	1,100.00	
W. F. Boiler, Assistant Professor .....	1,000.00	
Mary K. Heard, Assistant Professor .....	1,200.00	
Elmer Weih, Clinical Assistant .....	500.00	
Supplies, etc. ....		2,340.14

## Pathology and Bacteriology:

Henry Albert, Professor .....	4,000.00	
A. L. Grover, Instructor .....	1,800.00	
Mildred Scheetz, Assistant .....	400.00	
C. E. Royce, Hospital Pathologist (11 mo.) ....	1,625.00	
Anna Stach, Stenographer (12 mo.) .....	180.00	
Joseph Anderson, Attendant (12 mo.) .....	780.00	
John Donlon, Attendant (9 mo.) .....	315.00	
Earl C. Hobert, Attendant .....	90.00	
Supplies, etc. ....		829.33

## Physiology:

J. T. McClintock, Professor and Junior Dean ....	2,800.00	
H. W. Coffin, Instructor .....	1,350.00	
B. A. Baird, Undergraduate Assistant .....	125.00	
Supplies, etc. ....		341.48
Assistance by the hour .....		65.37

## Surgery:

Wm. Jepson, Professor .....	1,100.00	
A. J. Burge, Assistant Professor .....	1,500.00	
F. L. Love, Assistant .....	250.00	
Clara B. Whitmore, Assistant .....	250.00	
Supplies, etc. ....		23.85

## Theory and Practice of Medicine:

C. P. Howard, Professor .....	4,500.00	
Clarence Van Epps, Professor .....	2,000.00	
Louis Baumann, Assistant Professor .....	2,500.00	
C. S. Grant, Instructor .....	500.00	
C. W. McClure, Lecturer .....	1,200.00	
M. F. Andrews, Hospital Radiographer .....	600.00	
Mary Shaffer, Masseuse (10 mo.) .....	500.00	
Jacob Krupp, Attendant (9 mo.) .....	442.31	
Supplies, apparatus, etc. ....		1,723.70

## Lecturers:

Max E. Witte, Lecturer on Mental Diseases .....	200.00	
J. B. Kessler, Lecturer on Dermatology .....	300.00	
H. V. Scarborough, Lecturer on Tuberculosis ...	100.00	
Charles L. Updegraff, Hospital Interne .....	125.00	
R. C. Coleman, Hospital Interne .....	125.00	
Frank J. Rohner, Hospital Interne .....	125.00	

Medical Alumni Clinic ..... 518.61

Total salaries, College of Medicine.....	\$ 51,222.31	
Total supplies, college of Medicine .....		\$ 9,346.34
Grand total .....		\$ 60,568.65

## ITEMIZED EXPENDITURES—COLLEGE OF HOMEOPATHIC MEDICINE.

## Materia Medica:

George Royal, Professor and Dean .....	\$ 1,200.00	
T. L. Hazard, Assistant Professor and Director of Homeopathic Hospital .....	1,000.00	
Supplies, etc. ....		\$ 31.00

## Theory and Practice:

Erwin Schenck, Professor .....	950.00	
Supplies .....		65.00

Total salaries, College of Homeopathic Medicine	\$ 3,150.00	
Total supplies, College of Homeopathic Medicine		\$ 96.00

Grand total .....		\$ 3,246.00
-------------------	--	-------------

## ITEMIZED EXPENDITURES—COLLEGE OF DENTISTRY.

## Operative Dentistry:

F. T. Breene, Professor .....	\$ 1,200.00	
R. H. Volland, Professor .....	2,800.00	
Frank B. Whinery, Demonstrator and Lecturer ..	2,000.00	

## Orthodontia:

Richard Summa, Professor .....	1,200.00	
--------------------------------	----------	--

## Prosthetic Dentistry:

W. S. Hosford, Professor and Dean .....	2,200.00	
J. E. Packard, Demonstrator .....	1,500.00	
W. E. Spence, Demonstrator .....	1,200.00	

## Regional Anatomy and Clinical Dentistry:

E. A. Rogers, Professor and Superintendent of Clinics .....	2,500.00	
W. E. Gordon, Demonstrator .....	1,500.00	
A. W. Bryan, Demonstrator .....	1,519.24	
M. C. Roberts, Demonstrator (8 mo.) .....	1,230.00	
Helen Baschnagel, Clerk (12 mo.) .....	700.00	
Mary Otto, Assistant (12 mo.) .....	500.00	
Dental Clinic expenses .....		\$ 4,347.40
Dental Laboratory expenses .....		698.87
Dental Alumni Clinic .....		352.27

Total salaries, College of Dentistry .....	\$ 20,049.24	
Total supplies, etc., College of Dentistry .....		\$ 5,398.54

Grand total .....		\$ 25,447.78
-------------------	--	--------------

## ITEMIZED EXPENDITURES—COLLEGE OF PHARMACY.

W. J. Teeters, Professor and Dean .....	\$ 2,600.00	
R. A. Kuever, Assistant Professor .....	1,600.00	
Zada M. Cooper, Assistant Professor .....	1,200.00	
Pharmacy supplies, etc. ....		\$ 1,750.39
Stenographic service .....		110.14

Total salaries, College of Pharmacy .....	\$ 5,400.00	
Total supplies, etc., College of Pharmacy .....		\$ 1,860.53

Grand total .....		\$ 7,260.53
-------------------	--	-------------

## ITEMIZED EXPENDITURES—GRADUATE COLLEGE.

Clarence R. Aurner, Senior Fellow in Education . . . \$	500.00	
Nellie S. Aurner, Fellow in English . . . . .	300.00	
Sudhindra Bose, Fellow in Political Science . . . . .	300.00	
Nellie A. Chase, Fellow in History . . . . .	300.00	
Roy J. Clampitt, Fellow in Education . . . . .	300.00	
Raymond A. French, Fellow in Botany . . . . .	300.00	
Beryl Hart, Fellow in Botany . . . . .	300.00	
Victor J. Hays, Fellow in Animal Biology . . . . .	300.00	
C. F. Malmberg, Fellow in Psychology . . . . .	300.00	
Katherine L. Stewart, Fellow in Botany . . . . .	300.00	
Thos. F. Vance, Fellow in Psychology . . . . .	300.00	
Helen A. Bean, Scholar in English . . . . .	150.00	
Fred C. Bruene, Scholar in Psychology . . . . .	150.00	
Gladys Chew, Scholar in Physics . . . . .	150.00	
Ola L. Chew, Scholar in Latin . . . . .	150.00	
L. E. Dodd, Scholar in Physics . . . . .	150.00	
Lucy E. Edwards, Scholar in German . . . . .	150.00	
Willard H. Farr, Scholar in Chemistry . . . . .	150.00	
Joseph Gadbury, Scholar in Polit. Economy (6 mo.)	90.00	
C. W. Hazelett, Scholar in Physics . . . . .	150.00	
Lonia Krenz, Scholar in German . . . . .	150.00	
M. M. Leighton, Scholar in Geology . . . . .	150.00	
Thos. E. Moore, Scholar in Chemistry . . . . .	150.00	
Odis K. Patton, Scholar in Political Science . . . . .	150.00	
James N. Potter, Scholar in Education . . . . .	150.00	
Joyce Reed, Scholar in Botany . . . . .	150.00	
Esther E. Thomas, Scholar in English . . . . .	150.00	
Chas. A. Vannoy, Scholar in Greek . . . . .	150.00	
Fred Vorhies, Scholar in Physics . . . . .	150.00	
Vera Z. Whittacre, Scholar in History . . . . .	150.00	
A. J. Williams, Scholar in Geology . . . . .	150.00	
Dr. Gunther Jacoby, Lecturer . . . . .	50.00	
Stenographic service . . . . .		\$ 224.21
Supplies, etc. . . . .		124.80
<hr/>		
Total fellowships and scholarships, Graduate College . . . . . \$	6,490.00	
Total supplies, etc., Graduate College . . . . .		\$ 349.01
<hr/>		
Grand total . . . . .		\$ 6,839.01

## ITEMIZED EXPENDITURES—SUMMER SESSION.

R. B. Wylie, Professor in Botany . . . . . \$	250.00
A. F. Ewers, Instructor in Botany . . . . .	100.00
Noah D. Knupp, Assistant in Botany . . . . .	50.00
E. W. Rockwood, Professor in Chemistry . . . . .	300.00
Otis M. Weigle, Assistant in Chemistry . . . . .	50.00
F. E. Bolton, Professor in Education . . . . .	500.00
H. C. Dorcas, Professor in Education . . . . .	250.00
J. Stanley Brown, Lecturer in Education . . . . .	119.50
David Snedden, Lecturer in Education . . . . .	75.00
Wm. E. Chancellor, Lecturer in Education . . . . .	125.00
Carroll G. Pearce, Lecturer in Education . . . . .	135.57
J. E. Butterworth, Assistant in Education . . . . .	50.00
C. F. Ansley, Professor in English . . . . .	300.00
Percival Hunt, Assistant Professor in English . . . . .	150.00
Ellen Geyer, Instructor in English . . . . .	100.00
Aleeth Willard, Instructor in Public Speaking . . . . .	100.00

Nellie S. Aurner, Assistant in English .....	33.34	
Beryl Hart, Assistant in English .....	33.33	
Winifred Byrne, Assistant in English .....	33.33	
A. C. Trowbridge, Professor in Geology .....	250.00	
Morris M. Leighton, Assistant in Geology .....	50.00	
C. B. Wilson, Professor in German .....	300.00	
E. H. Lauer, Instructor in German .....	100.00	
C. H. Weller, Professor in Greek .....	100.00	
W. C. Wilcox, Professor in History .....	500.00	
F. C. Eastman, Professor in Latin .....	300.00	
F. H. Potter, Professor in Latin .....	250.00	
A. G. Smith, Professor in Mathematics .....	300.00	
J. F. Reilly, Assistant in Mathematics .....	150.00	
C. E. Seashore, Professor in Philosophy and Psychology .....	165.00	
E. D. Starbuck, Professor in Philosophy and Psychology .....	250.00	
Luther A. Weigle, Professor in Philosophy and Psychology .....	235.00	
Mabel C. Williams, Assistant Professor in Philosophy and Psychology .....	150.00	
G. W. Stewart, Professor in Physics .....	300.00	
Harold Stiles, Lecturer in Physics .....	100.00	
Paul H. Dike, Lecturer in Physics .....	100.00

Total supplies, etc., Alumni Bureau .....		343.31
Grand total .....		\$ 3,051.76

## ITEMIZED EXPENDITURES—ADMINISTRATION.

## President's Office:

John G. Bowman, President .....	\$ 6,000.00	
M. Imogen Benson, Executive Clerk .....	1,200.00	
Supplies, etc. ....		\$ 99.85

## Secretary and Treasurer's Office:

W. J. McChesney, Sec. and Treasurer (3 mo.)	750.00	
W. J. McChesney, Treasurer (9 mo.) .....	1,125.00	
W. H. Bates, Assistant Secretary (3 mo.) .....	375.00	
W. H. Bates, Acting Secretary (9 mo.) .....	1,350.00	
Kathryn M. Close, Clerk and Stenographer .....	900.00	
S. E. Stover, Assistant (10 mo.) .....	540.00	
Supplies, etc. ....		\$ 56.10

## Registrar's Office:

F. C. Ensign, Registrar and Examiner .....	2,750.00	
Hazeldean Toof, Recorder (8 mo.) .....	680.00	
Theodore A. Wanerus, Recorder (5 mo.) .....	425.00	
Edith Rigler, Assistant .....	780.00	
James D. Sims, Stenographer .....	960.00	
Rena Sporleder, Stenographer .....	183.33	
Supplies, etc. ....		309.78
Assistance by the hour .....		2,053.03

## Dean of Women:

Anna M. Klingenhagen, Dean .....	2,083.32	
Assistance and supplies .....		269.17
University Editor, stenographic service .....		349.90

Total salaries, Administration .....	\$ 20,101.65	
Total supplies, stenographic service, etc., Administration .....		\$ 3,137.83
Grand total .....		\$ 23,239.48

## ITEMIZED EXPENDITURES—UNIVERSITY EXTENSION.

Expended for traveling expenses for University Extension work.	\$ 22.60	
Lakeside Laboratory scholarships .....	650.00	
Total .....		\$ 672.60

## GENERAL EXPENDITURES FROM INCOME FUND.

President's traveling expenses .....	\$ 514.77	
Commencement expenses .....	747.52	
General unclassified account .....	6,623.36	
This sum was expended for items for which no special appropriations were made.		
Mimeographic and stenographic supplies for all departments..		266.90

Board of Publication .....	355.84
This sum was expended for reprints of articles in the <i>Physical Review</i> by Assistant Professors F. C. Brown and Leo P. Sieg; also for printing 500 copies of bulletin from the Department of Latin, and 500 copies of Natural History Bulletin.	
General Lectures .....	276.92
This sum was expended in paying expenses of lecturers for University assemblies, vesper services, etc., as follows: Dr. J. C. Pomeroy, Dr. George Herbert Palmer, Rev. J. F. Nugent, Prof. Hartley Burr Alexander, Prof. D. W. Morehouse, Prof. R. A. Milliken, Prof. John A. Lomax, Prof. C. T. Kipp, Prof. F. E. Turneure, Hon. John H. Taylor, Mr. R. M. Anderson, Katherine Jewell Everts.	
Printing and paper .....	2,533.16
Printing, stationery, and miscellaneous publications.	
Calendars and announcements .....	2,442.29
Cost of printing and paper for calendars and announcements for all schools and colleges.	
Postage .....	3,341.90
On general and second-class matter.	
Telegrams .....	116.56
Advertising .....	2,467.43
Advertising the University in miscellaneous publications.	
Janitor service .....	19,166.30
Janitors are paid from \$45 to \$55 a month; student help is paid 15c an hour.	
Janitor supplies .....	1,911.43
Heating Plant service .....	7,738.77
There are from six to twelve firemen, varying according to the season of the year, who are paid from \$50 to \$60 a month each.	
Heating plant supplies .....	840.22
Hydro-Electric plant service .....	1,940.51
Two operators at the Hydro-Electric plant are paid \$67.50 per month each, and one at the sub-station \$55 a month.	
Hydraulic plant supplies .....	201.53
Fuel .....	23,996.60
Contract for the year 1912-13 was awarded to Hatch-Wilcoxson Coal Co., Chicago, for Superior, Ill., mine run at \$2.88 a ton; Superior, Ill., screenings at \$2.15 a ton; Superior, Ill., nut coal at \$2.60 a ton, all f. o. b. cars, Iowa City, Iowa. Hauling costs 25c a ton. Consumption about 10,000 tons.	
Water service .....	3,662.22
For all water used in all University buildings, the water rate is 6½c a thousand gallons.	
Gas and electric light .....	2,811.36
Gas costs \$1.00 a 1,000 cubic ft. and electric light 14c a k. w. hour.	

Telephones .....	903.30
Y. M. C. A. rent .....	800.00
The University rents three halls for the use of the literary societies, and the gymnasium for use as a woman's gymnasium, paying \$800 per annum, besides heating the building from the University heating plant.	
Y. M. C. A. Support .....	400.00
Money expended to maintain an employment bureau and to make a directory of rooming and boarding places.	
University Laundry—Wages .....	1,407.59
Garbage service .....	268.75
Ice, \$2.50 per ton .....	1,813.35
Hauling extra.	
Stenographic service .....	203.45
For all departments and for the administrative offices, paid at the rate of 25c an hour.	
University Hospital Equipment .....	4,089.70
This sum was expended for equipment for the University Hospital.	
J. M. Fisk, Superintendent of Grounds and Buildings (part salary) .....	1,200.00
Mr. Fisk received a salary of \$2,400.00 for the year, \$1,200.00 being charged to the Building Tax Fund.	
Assistants to Superintendent of Grounds and Buildings .....	556.87
F. B. McFadden, Assistant to Superintendent ....\$	135.00
Arthur Smith, Assistant to Superintendent .....	58.62
Adelaide Bright, Stenographer .....	135.25
Mrs. Mayme Hirsher Wagner, Stenographer .....	228.00
S. E. Shaff, University Electrician .....	1,440.00
F. P. Englert, University Carpenter .....	880.00
Ellsworth Bright, Head Janitor .....	960.00
Total general expenditures, Income Fund .....	\$ 96,878.60

## LAW LOAN BOOK ACCOUNT.

Balance in Income Fund to credit of the Law Loan Book Account, July 1, 1912 .....	\$ 83.50

Special Land Fund .....	12,395.59

\*These funds are in the nature of University trusts, the proceeds being used for scholarships, prizes, etc.

Mark Ranney memorial interest fund.....	\$ 3,891.70	
A. Whitney Carr scholarship int. fund.....	2,330.00	
F. O. Lowden prize int. fund.....	150.00	
Waite Lowry Gifford memorial int. fund.....	182.05	
W. J. Bryan prize int. fund.....	10.00	
		<hr/>
Total expenditures .....		\$ 944,058.75
Total balance on hand, June 30, 1914.....		94,936.52
		<hr/>
Grand total .....		\$1,038,995.27

## INCOME FUND—1913-1914.

## RECEIPTS.

## From state appropriations:

32d G. A., chapter 212, section 2.....	\$ 188,375.00	
32d G. A., chapter 214, section 2.....	32,083.30	
33d G. A., chapter 244, section 1.....	20,166.65	
34th G. A., chapter 200, section 1.....	90,016.65	
34th G. A., chapter 200, section 1.....	22,916.65	
35th G. A., chapter 328, section 1.....	63,250.00	\$ 416,808.25

## From tuitions:

College of Liberal Arts.....	23,995.50	
College of Applied Science .....	4,411.75	
College of Law .....	9,784.00	
College of Medicine .....	5,401.00	
College of Homeopathic Medicine.....	245.25	
College of Dentistry .....	13,521.00	
College of Pharmacy .....	3,000.75	
College of Fine Arts .....	8,717.50	
Graduate College .....	405.00	
Summer Session and Library School.....	1,175.00	70,656.75

## From miscellaneous sources:

University Homeopathic Hospital receipts...	8,025.92	
Diploma fees .....	4,077.00	
University Hospital receipts .....	50,235.84	
Ophthalmology and Otology receipts .....	1,367.17	
Dental Clinic receipts .....	8,711.15	
Law Loan Book Account receipts .....	356.85	
Engineering Testing Laboratory receipts.....	41.22	
Currier Hall receipts .....	26,908.63	
Rents .....	1,203.00	
Interest on daily bank balance .....	3,803.94	
Miscellaneous cash—material sold, laboratory breakage, locker rentals, etc. ....	1,774.36	106,505.08

From interest on permanent land fund.....	13,052.65
Warrants cancelled .....	296.61

Total receipts—income fund—1913-1914.....	\$ 607,319.34
Balance cash on hand July 1, 1913.....	79,625.87
	<hr/>
Grand total .....	\$ 686,945.21

## SUMMARY OF EXPENDITURES.

## College of Liberal Arts:

Salaries .....	\$ 183,008.00	
Departmental expenses .....	13,981.18	\$ 196,989.18

## College of Applied Science:

Salaries .....	34,880.00	
Lectures .....	185.40	35,065.40

## College of Law:

Salaries .....	23,975.00	
Supplies and incidentals .....	500.12	24,475.12

## College of Medicine:

Salaries .....	58,769.51	
Supplies, apparatus, etc. ....	10,738.43	69,507.94

## College of Homeopathic Medicine:

Salaries .....	5,300.00	
Supplies, apparatus, etc. ....	77.61	5,377.61

## College of Dentistry:

Salaries .....	25,100.00	
Supplies, apparatus, etc. ....	7,732.42	32,832.42

## College of Pharmacy:

Salaries .....	5,600.00	
Supplies, apparatus, etc. ....	1,913.05	7,513.05

## College of Fine Arts:

Salaries .....	3,200.00	3,200.00
----------------	----------	----------

## Graduate College:

Fellowships and scholarships .....	5,520.00	
Supplies, etc. ....	371.03	5,891.03

## Summer Session:

Salaries .....	9,648.35	
Supplies .....	145.47	9,793.82

## General Library:

Salaries .....	7,123.32	
Supplies and assistance by the hour .....	1,445.80	8,569.12

## Administration:

Salaries .....	20,307.41	
Supplies and assistance by the hour .....	4,127.40	24,434.81

## Alumni Bureau and Publicity:

Salaries .....	2,720.00	
Supplies and assistance .....	1,026.71	3,746.71

University Hospital expenditures .....		61,644.01
University Homeopathic Hospital expenditures .....		9,116.42
Currier Hall expenditures .....		19,267.80
Law Loan Book Account expenditures .....		168.40
Storehouse expenditures .....		1,880.93

General expenditures from income fund.....	111,712.73
Tuitions refunded by order Finance Committee.....	25.00
Music Tuitions .....	6,412.22
	<hr/>
Total expenditures from income fund, 1913-14.....	\$ 637,623.72
Balance cash on hand, June 30, 1914.....	49,321.49
	<hr/>
Grand total .....	\$ 686,945.21

## ITEMIZED EXPENDITURES—COLLEGE OF LIBERAL ARTS.

## Botany:

Thos. H. Macbride, Professor (7 mo.).....	\$ 1,400.00	
Bohumil Shimek, Professor .....	2,500.00	
R. B. Wylie, Professor .....	2,400.00	
Lucy Cavanagh, Asst. Curator .....	900.00	
C. H. Farr, Assistant .....	800.00	
L. A. Giddings, Assistant .....	800.00	
Supplies, etc. ....		\$ 873.88

## Chemistry:

E. W. Rockwood, Professor .....	3,000.00	
W. J. Karslake, Asst. Professor .....	1,900.00	
J. N. Pearce, Asst. Professor .....	1,800.00	
A. W. Hixson, Asst. Professor .....	1,800.00	
Edw. Wolesensky, Instructor .....	1,200.00	
W. J. Stephens, Instructor .....	1,000.00	
J. E. Booge, Instructor .....	600.00	
L. O. Potterf, Instructor .....	1,000.00	
Roy B. Davis, Asst. ....	900.00	
R. H. Carter, Asst. ....	500.00	
J. C. Andrews, Asst. ....	300.00	
J. V. Howell, Asst. ....	100.00	
John Coleman, Asst. ....	700.00	
John Coleman—Summer—storekeeper .....	116.66	
Supplies, etc. ....		5,081.95

## Education:

W. A. Jessup, Professor and Dean .....	3,500.00
H. C. Dorcas, Professor .....	2,500.00
Irving King, Asst. Professor .....	1,800.00
R. N. Stewart, Asst. Professor .....	1,600.00
E. E. Lewis, Assoc. Professor .....	2,200.00
Robert E. Rienow, Asst. Professor .....	2,000.00
C. R. Aurner, Lecturer .....	500.00
Marcella Hotz, Stenographer (13 mo.) .....	780.00

## Model School:

Ellen M. Geyer .....	600.00	
Nell M. Buckner .....	80.00	
Ethel R. Golden .....	80.00	
Jessie P. Hastings .....	80.00	
Edith F. O'Brien .....	80.00	
Lucia C. Otto .....	80.00	
Mary L. Sporleder .....	80.00	
Antonia J. Stober .....	80.00	
Flora Waterbury .....	80.00	
Supplies, assistance, etc. ....		779.83

## English:

C. F. Ansley, Professor and Dean .....	3,500.00	
S. B. Sloan, Asst. Professor .....	1,900.00	
Percival Hunt, Asst. Professor .....	1,900.00	
E. F. Piper, Asst. Professor .....	1,900.00	
M. A. Shaw, Asst. Professor .....	1,900.00	
E. N. S. Thompson, Asst. Professor .....	1,900.00	
May G. Shuck, Instructor .....	1,200.00	
Ellen Geyer, Instructor .....	300.00	
Florence Joy, Instructor .....	1,200.00	
Beryl G. Hart, Instructor .....	1,000.00	
Mary G. Chawner, Instructor .....	1,000.00	
Anna Lindbloom, Instructor .....	300.00	
Mrs. Nellie Aurner, Asst. ....	60.00	
Supplies, etc. ....		50.73
Theme Readers .....		1,705.00

## Chair of Public Speaking:

Glenn N. Merry, Asst. Professor .....	1,650.00	
Norma Harrison, Instructor .....	1,200.00	
Forensic League and supplies .....		318.52

## Geology:

G. F. Kay, Professor .....	2,600.00	
A. C. Trowbridge, Professor .....	2,100.00	
A. O. Thomas, Instructor .....	1,500.00	
A. J. Williams, Assistant .....	500.00	
John W. Carville, Attendant .....	600.00	
Supplies, etc. ....		660.40

## German:

C. B. Wilson, Professor .....	3,000.00	
F. B. Sturm, Assistant Professor .....	1,650.00	
W. F. Luebke, Assistant Professor .....	1,500.00	
E. H. Lauer, Assistant Professor .....	1,650.00	
F. W. Kracher, Instructor .....	1,350.00	
W. T. Runzler, Instructor .....	1,200.00	
Anna Heyberger, Assistant .....	200.00	
Ernest A. Heilman, Instructor (2d Sem.) ....	600.00	
Supplies, etc. ....		92.94
Stenographic assistance .....		85.00

## Greek:

C. H. Weller, Professor and University Editor	3,000.00	
N. A. Kellogg, Instructor .....	400.00	
Supplies, etc. ....		106.34

## History:

W. C. Wilcox, Professor and Dean .....	3,500.00	
H. G. Plum, Professor .....	2,100.00	
Louis Pelzer, Assistant Professor .....	2,000.00	
Lorin Stuckey, Instructor .....	1,500.00	
Raymond H. Durboraw, Assistant .....	500.00	
Ruth A. Gallaher, Assistant .....	200.00	
Supplies, etc. ....		41.14

## Latin:

F. C. Eastman, Professor .....	3,000.00	
F. H. Potter, Professor .....	2,100.00	
F. M. Foster, Instructor .....	1,500.00	
Supplies, etc. ....		15.97

## Mathematics:

A. G. Smith, Professor .....	3,000.00	
R. P. Baker, Assistant Professor .....	1,750.00	
J. F. Reilley, Assistant Professor .....	1,750.00	
C. W. Wester, Instructor .....	1,200.00	
C. Gouwens, Instructor .....	1,200.00	
O. H. Truman, Instructor .....	1,000.00	
Olaf Hovda, Instructor (2d Sem.) .....	600.00	
C. W. Gallaher, Assistant .....	18.00	
Supplies, etc. ....		57.13

## Military Science:

C. S. Hoffman, Commandant (2 mo.) .....	83.32	
Robert T. Phinney, Commandant (9 mo.) .....	375.02	
Wm. De F. Rahming, Assistant .....	550.00	
O. E. Van Doren, Bandmaster .....	500.00	
Band members .....	500.00	
Supplies and equipment, etc. ....		523.17

## Philosophy and Psychology:

C. E. Seashore, Professor and Dean .....	3,500.00	
G. T. W. Patrick, Professor .....	2,500.00	
Ellsworth Faris, Assistant Professor .....	2,000.00	
R. H. Sylvester, Assistant Professor .....	1,600.00	
Mabel C. Williams, Assistant Professor .....	1,500.00	
Supplies and equipment, etc. ....		312.14

## Physical Training and Athletics for Men:

N. A. Kellogg, Director in charge of Athletics.	1,800.00	
E. G. Schroeder, Director in charge of Physical Training for Men .....	1,200.00	
Troy Swallum, Assistant .....	300.00	
Supplies .....		345.32

## Physical Training for Women:

Alice C. Wilkinson, Director in charge of Physical Training for Women .....	1,500.00	
Alice H. Wilmarth, Assistant .....	800.00	
Carrie A. Rupp, Assistant (2d Sem.) .....	300.00	
Mary Maher, Matron Woman's Gymnasium ..	300.00	
Dr. Zella White Stewart, Medical Examiner...	250.00	
Supplies, etc. ....		248.70
Pianist Women's Gymnasium .....		171.88

## Physics:

G. W. Stewart, Professor .....	3,000.00	
L. P. Sieg, Assistant Professor .....	1,850.00	
F. C. Brown, Assistant Professor .....	1,850.00	
H. L. Dodge, Instructor .....	1,000.00	
F. R. York, Assistant .....	700.00	
M. H. Teeuwen, Mechanician (12 mo.) .....	1,350.00	
H. A. Wolcott, Undergraduate Assistant .....	75.00	
T. Ingvaldson, Undergraduate Assistant .....	75.00	
P. S. Helmick, Undergraduate Assistant .....	75.00	

## Political Economy and Sociology:

I. A. Loos, Professor .....	2,000.00	
Paul S. Peirce, Professor .....	2,400.00	
J. L. Deming, Associate Professor .....	2,200.00	
C. W. Wassam, Assistant Professor .....	1,800.00	

## Political Economy and Sociology—Concluded

Karl D. Loos, Assistant .....	500.00	
Ralph E. Heilman, Assistant Professor .....	2,200.00	
L. H. Mounts, Assistant .....	300.00	
Supplies, etc. ....		91.52
Stenographic Assistance .....		264.94

## Political Science:

B. F. Shambaugh, Professor .....	2,600.00	
F. E. Horack, Assistant Professor .....	1,650.00	
Jacob Van der Zee, Instructor .....	500.00	
Odis K. Patton, Assistant .....	500.00	
Sudhindra Bose, Assistant .....	500.00	
Dan E. Clark, Lecturer .....	100.00	
Supplies and assistance .....		167.75

## Romance Languages:

S. H. Bush, Professor .....	2,800.00	
Hertha L. Voss, Assistant Professor .....	1,500.00	
Jacob Wernli, Instructor .....	1,100.00	
S. M. Delson, Instructor .....	1,100.00	
Supplies, etc. ....		69.05

## Zoology:

C. C. Nutting, Professor and Director .....	3,000.00	
G. L. Houser, Professor .....	2,300.00	
H. F. Wickham, Professor .....	2,100.00	
H. R. Dill, Assistant Professor .....	1,900.00	
F. A. Stromsten, Assistant Professor .....	1,600.00	
D. M. Brumfiel, Instructor .....	1,100.00	
Dayton Stoner, Assistant .....	1,000.00	
Ruth Cotton, Assistant .....	400.00	
Carl F. Jordan, Assistant .....	350.00	
E. J. Bashe, Assistant .....	200.00	
Frank Menagh, Undergraduate Assistant .....	50.00	
Chas. E. McCrory, Undergraduate Assistant ..	50.00	
Isom Rankin, Storekeeper .....	50.00	
Everett Ostling, Mimeographer (8 mo.) .....	40.00	
Geo. Johnson, Mimeographer (2 mo.) .....	10.00	
Supplies, etc., Zoology .....		225.72
Supplies, etc., Animal Biology .....		679.84
Museum Assistance .....		340.03

## Home Economics:

Ruth A. Wardall, Professor .....	2,800.00	
Alice Crane, Instructor .....	1,200.00	
Catherine C. Cramer, Instructor .....	1,200.00	
Supplies, etc., and assistance .....		672.29
Helen C. Gilchrist, Clerk to the Dean .....	960.00	

Total salaries College of Liberal Arts .....	\$ 183,008.00	
Total departmental expenditures College of Liberal Arts .....		\$ 13,981.18
Total .....		\$ 196,989.18

## ITEMIZED EXPENDITURES—COLLEGE OF APPLIED SCIENCE.

## Civil Engineering:

Wm. G. Raymond, Professor and Dean .....	\$ 5,000.00
B. J. Lambert, Professor of Structural Engineering .....	2,900.00
J. H. Dunlap, Assistant Professor .....	1,900.00
R. B. Kittredge, Assistant Professor .....	1,600.00

## Drawing and Descriptive Geometry:

F. G. Higbee, Professor .....	2,200.00
R. E. Hutchins, Instructor .....	1,600.00
Benjamin Boer, Instructor .....	800.00

## Electrical Engineering:

A. H. Ford, Professor .....	2,900.00
J. B. Hill, Assistant Professor .....	2,200.00

## Mechanical Engineering:

B. P. Fleming, Professor .....	3,000.00
Ralph S. Wilbur, Instructor .....	1,600.00
G. J. Keller, Instructor .....	1,200.00
R. W. Stewart, Jr., Superintendent of Shops ..	1,100.00
John M. Bray, Instructor (7 mo.) .....	630.00

## Mechanics:

S. M. Woodward, Professor .....	3,000.00
F. C. Young, Instructor (1st Sem.) .....	850.00
D. P. Gilmore, Instructor .....	1,500.00

Bess Martin, Clerk to the Dean (12 mo.) ..... 900.00

Lectures, College of Applied Science ..... \$ 185.40

Total salaries, College of Applied Science ...\$ 34,880.00

Total expenses lecturers and assistance.... \$ 185.40

Total ..... \$ 35,065.40

## ITEMIZED EXPENDITURES—COLLEGE OF LAW.

Henry G. Dunn, Professor and Dean .....	\$ 4,800.00
E. A. Wilcox, Professor .....	3,000.00
H. C. Horack, Professor .....	3,500.00
Barry Gilbert, Professor .....	3,500.00
Percy Bordwell, Professor .....	3,500.00
Ralph Otto, Professor .....	3,000.00
Oscar R. Ewing, Instructor .....	1,800.00
Guy H. Dunn, Library Desk Assistant .....	325.00
Otis Gilbrecht, Library Desk Assistant .....	50.00
Chas. M. Maurer, Library Desk Assistant .....	50.00
Carroll B. Martin, Stenographer .....	450.00
Supplies, etc. ....	\$ 306.98
Assistance Quiz Masters, etc. ....	193.14

Total salaries, College of Law .....\$ 23,975.00

Total supplies and assistants, College of Law \$ 500.12

Total ..... \$ 24,475.12

## ITEMIZED EXPENDITURES—COLLEGE OF MEDICINE.

## Anatomy, Histology and Embryology:

H. J. Prentiss, Professor and Director .....	\$ 4,600.00	
J. J. Lambert, Assistant Professor .....	2,000.00	
D. H. Osborn, Demonstrator .....	1,700.00	
E. W. McEwen, Assistant .....	1,000.00	
R. N. Arey, Undergraduate Assistant .....	100.00	
F. W. Stevens, Undergraduate Assistant .....	75.00	
C. Fields, Undergraduate Assistant .....	50.00	
Alex Story, Attendant .....	840.00	
Supplies and equipment .....		623.83
Dissecting material .....		2,012.37

## Gynecology and Obstetrics:

J. R. Guthrie, Professor and Dean .....	1,200.00	
W. R. Whiteis, Professor .....	1,600.00	
Paul Reed, Instructor .....	1,100.00	
L. W. Harding, Assistant .....	500.00	
Supplies and Equipment .....		72.43
Obstetrical Clinic .....		524.10

## Materia Medica:

C. S. Chase, Professor .....	2,400.00	
J. B. Hanson, Demonstrator .....	1,300.00	
Raymond Harvey, Undergraduate Assistant ..	37.50	
C. H. Herman, Undergraduate Asst. (2d Sem.)	27.00	
Supplies, etc. ....		426.51

## Ophthalmology and Otology:

L. W. Dean, Professor .....	1,100.00	
W. F. Boiler, Assistant Professor .....	1,000.00	
Mary K. Heard, Assistant Professor .....	1,200.00	
L. R. Tripp, Clinical Assistant .....	500.00	
Supplies, etc. ....		2,813.17

## Pathology and Bacteriology:

Henry Albert, Professor .....	4,000.00	
A. L. Grover, Instructor .....	1,900.00	
C. E. Royce, Hospital Pathologist (12 mo.) ..	1,600.00	
Mildred Scheetz, Assistant .....	900.00	
Minnie Hamilton, Stenographer (9 mo.) .....	135.00	
Joseph Anderson, Technician .....	800.00	
Leonard Kloos, Attendant .....	400.00	
M. Novak, Attendant (12 mo.) .....	420.00	
Anna Stach, Stenographer (3 mo.) .....	49.98	
Supplies, etc. ....		777.63

## Physiology:

J. T. McClintock, Professor and Junior Dean	3,100.00	
H. W. Coffin, Instructor .....	650.00	
Benjamin Kramer, Instructor .....	1,400.00	
J. I. Marker, Undergraduate Assistant .....	700.00	
Supplies, etc. ....		406.06
Assistance by the hour .....		33.13

## Surgery:

Chas. J. Rowan, Professor (6 mo.) .....	2,100.00	
W. R. Whiteis, Professor (4 mo.) .....	500.00	
L. W. Bremerman, Acting Professor (9 mo.) ..	900.00	
A. Steindler, Instructor (9 mo.) .....	720.00	
H. L. Beye, Assistant Professor (5 mo.) .....	881.71	
Frank Love, Assistant (6 mo.) .....	600.00	

## Surgery—Concluded

L. W. Harding, Anaesthetist .....	200.00	
R. C. Christianson, Assistant 1911-12 .....	200.00	
R. E. Brisbane, Assistant 1911-12 .....	600.00	
Frank Russell, Surg. Interne (1 mo.) .....	100.00	
Supplies, etc. ....		325.85

## Theory and Practice:

C. P. Howard, Professor .....	4,500.00	
C. Van Epps, Assistant Professor .....	2,000.00	
L. Baumann, Assistant Professor .....	2,500.00	
C. S. Grant, Instructor .....	500.00	
C. W. McClure, Lecturer (12 mo.) .....	1,500.00	
M. F. Andrews, Radiographer (12 mo.) .....	700.00	
Mary Shaffer, Masseuse (2 mo.) .....	100.00	
Jacob Krupp, Attendant (12 mo.) .....	600.00	
Supplies, etc. ....		1,200.86
X-Ray supplies and equipment .....		1,522.49

## Lectures:

Max E. Witte, Mental Diseases .....	200.00
J. B. Kessler, Dermatology .....	300.00
H. V. Scarborough, Tuberculosis .....	100.00
C. M. Dutcher, Jurisprudence .....	60.00
R. M. Otto, Jurisprudence .....	40.00

## Hospital Internes:

John O. Weaver .....	54.16
Louis A. Packard .....	54.16
Edith Stockton Lott .....	125.00
R. H. Lott .....	125.00
T. A. Minassian .....	125.00

Total salaries College of Medicine .....	\$ 58,769.51	
Total supplies and equipment, College of Medicine .....		\$ 10,738.43
Total .....		\$ 69,507.94

## ITEMIZED EXPENDITURES—COLLEGE OF HOMEOPATHIC MEDICINE.

## Materia Medica and Therapeutics:

George Royal, Professor and Dean .....	\$ 1,200.00
--	-------------

## Gynecology and Obstetrics:

J. W. Cogswell, Professor .....	1,000.00	
Supplies, etc. ....		\$ 53.46

## Ophthalmology and Otology:

W. L. Bywater, Professor and Vice Dean .....	850.00	
Supplies .....		24.15

## Surgery:

F. C. Titzell, Professor .....	1,000.00
--------------------------------	----------

## Theory and Practice:

Erwin Schenck, Professor .....	950.00
T. L. Hazard, Lecturer on Pediatrics .....	200.00
William Rohrbacher, Anaesthetist .....	100.00

Total salaries, College of Homeopathic Med. \$	5,300.00	
Total supplies, College of Homeopathic Med.		\$ 77.61
Total .....		\$ 5,377.61

## ITEMIZED EXPENDITURES—COLLEGE OF DENTISTRY.

## Operative Dentistry:

F. T. Breene, Professor (5 mo.) .....	\$ 600.00
F. T. Breene, Professor and Dean (5 mo.) .....	2,250.00
R. H. Volland, Professor .....	2,000.00
F. B. Whinery, Demonstrator .....	2,200.00
H. J. Altfillisch, Demonstrator .....	1,600.00

## Orthodontia:

Richard Summa, Professor .....	1,200.00
--------------------------------	----------

## Prosthetic Dentistry:

W. S. Hosford, Professor .....	2,200.00
R. A. Fenton, Demonstrator .....	1,600.00
W. E. Spence, Demonstrator .....	1,200.00
J. E. Packard, Demonstrator .....	1,600.00

## Clinical Dentistry:

Thos. J. McLernon, Dean (5 mo.) .....	1,750.00

# REPORT

## OF THE REGISTRAR OF THE STATE UNIVERSITY OF IOWA FOR THE ACADEMIC YEARS 1912-1913 AND 1913-1914.

*To the President of the University and the Iowa State Board of Education:*

Gentlemen: I respectfully submit herewith the report of the Registrar of the University for the academic years 1912-1913 and 1913-1914.

It will be noted that attendance for the biennium just closed is considerably in excess of the attendance of the preceding biennium. The total registration in 1912-1913 was 2,255, an increase of 7.8 per cent over that of the preceding year. The attendance for the second year of the biennium just closed was 2,669, an advance of 18 per cent over that of the preceding year, and larger by about 200 than the total registration of any preceding year.

I should like to call your attention to the fact that in the last decade attendance in the University has increased 91.6 per cent.

Under the head, Ages of Students, it will be observed that during the last academic year there were registered 69 men and 50 women more than thirty-five years of age. These persons were registered in the Graduate and Professional Colleges. This indicates that the courses offered in the University are attracting in increasing numbers mature men and women.

For the first time in the history of the University, I believe, students were registered during the last biennium from every county in the state. The proportion of students residing beyond the boundaries of Iowa is not large, yet twelve other states furnish six or more each, while thirty-eight students come from homes representing states and territories in almost every part of the Union. Thirty-eight students are registered from foreign countries, the larger proportion of these coming from the countries of the Orient.

Almost one-third of all the students registered in the University come from the country, 32 per cent, indicating that the occupation of their parents is agriculture of some form.

The religious census deserves notice. In the interests of brevity, we have indicated but nine principal groups, all other students from scattering denominations being classified under the head, Other Denominations. In the registration of 1913-1914, 94 men and 24 women did not indicate any church or religious preference.

Respectfully submitted,

FOREST C. ENSIGN,  
Registrar.

## SUMMARY OF REGISTRATION, 1912-1913

## ATTENDANCE BY COLLEGES.

## SUMMARY OF REGISTRATION 1913-1914.

## ATTENDANCE BY COLLEGES.

	Men	Women	Total
The College of Liberal Arts—			
Fourth year .....	60	108	168
Third year .....	98	100	198
Second year .....	179	136	315
First year .....	278	216	494
Unclassified .....	45	38	83
	660	508	1,258
Summer session .....	92	144	236
	752	742	1,494
Duplicates .....	46	56	102
Total excluding duplicates .....	706	686	1,392
The College of Law—			
Third year .....	46		46
Second year .....	70		70
First year .....	85	2	87
Total .....	201	2	203
The College of Medicine—			
Fourth year .....	13		13
Third year .....	25	1	26
Second year .....	34	1	35
First year .....	33	1	34
Unclassified .....	1		1
Total .....	106	3	109
Nurses .....		86	86
The College of Homeopathic Medicine—			
Third year .....	2		2
First year .....	3		3
Total .....	5		5
Nurses .....		14	14
The College of Dentistry—			
Third year .....	50	1	51
Second year .....	67	1	68
First year .....	123	3	126
Unclassified .....	1		1
Total .....	241	5	246
The College of Pharmacy—			
Regular course—			
Third year .....	1		1
Second year .....	18	2	20
First year .....	31	5	36
Practitioner's Course—			
First year .....	3		3
Summer session .....	2		2
Total .....	55	7	62
The Graduate College—			
Enrolled September to June .....	125	44	169
Enrolled summer session .....	92	67	159
	217	111	328
Duplicates .....	36	16	52
Total excluding duplicates .....	181	95	276

Of this total the enrollment as candidates for various degrees was as follows:

	Men	Women	Total
Doctor of Philosophy.....	38	3	41
Master of Arts.....	68	37	105
Master of Science.....	32	6	38
Master of Science in Medicine.....	6		6
Not Candidates for degrees.....	38	48	86
Total.....	182	94	276
The College of Applied Science—			
Chemistry—			
Fourth year.....	2		2
Third year.....	4		4
Second year.....	1		1
Civil Engineering—			
Fourth year.....	8		8
Third year.....	6		6
Second year.....	29		29
Electrical Engineering—			
Fourth year.....	5		5
Third year.....	10		10
Second year.....	22		22
General Engineering—			
Fourth year.....	3		3
Third year.....	2		2
Second year.....	8		8
Mechanical Engineering—			
Fourth year.....	6		6
Third year.....	5		5
Second year.....	6		6
First Year—(The work of the freshman year is the same in all engineering courses).....	111		111
Total.....	228		228
The College of Fine Arts—			
Fourth year.....		1	1
Third year.....	1	3	4
Second year.....		9	9
First year.....	2	27	29
Special and unclassified.....	15	82	97
Summer Session (Music).....	18	122	140
	3	13	16
Duplicates.....	21	135	156
	5	32	37
Total, excluding duplicates.....	16	103	119
The Summer Session, 1913—			
The College of Liberal Arts.....	83	134	217
The Graduate College.....	88	57	145
Summer School for Library Training.....	1	22	23
The College of Pharmacy.....	2		2
Music.....	3	13	16
Duplicates.....	177	226	403
	1	3	4
At the Macbride Lakeside Laboratory, at Okoboji—			
The College of Liberal Arts.....	9	10	19
The Graduate College.....	4	10	14
Total for the Summer Session.....	13	20	33
	189	243	432

These figures appear also in the summaries of the colleges and schools named.

## SUMMARY.

Net Total to March 26, 1914 -----	1,679	990	2,669

## STATISTICS FOR THE ACADEMIC YEAR 1913-1914.

## DEGREES AND CERTIFICATES GRANTED, 1913-1914.

	Men	Women	Total
Advanced Degrees:			
Doctor of Philosophy -----	4		4
Master of Arts -----	13	10	23
Master of Science -----	9	4	13
Master of Science in Medicine -----	5		5
Civil Engineer -----	17		17
Engineer of Mines -----	1		1
Mechanical Engineer -----	1		1
Electrical Engineer -----	2		2
Chemist -----	1		1
Total Advanced Degrees -----	52	14	67
First Degrees:			
Bachelor of Arts -----	72	108	180
Bachelor of Science -----	7		7
Bachelor of Laws -----	43		43
Doctor of Medicine -----	13		13
Doctor of Dental Surgery -----	48	1	49
Graduate in Pharmacy -----	14	1	15
Pharmaceutical Chemist -----	2		2
Bachelor of Engineering -----	16		16
Bachelor of Science in Chemistry -----	1		1
Bachelor of Science (Applied Science) -----	4		4
Bachelor of Arts (Fine Arts) -----		1	1
Bachelor of Music -----		2	2
Total First Degrees -----	220	113	333
Certificates:			
College of Education -----	19	92	111
Practitioner's Certificate in Pharmacy -----	1		1
Nurses Training School -----		17	17
Nurses Training School (Homeopathic) -----		1	1
Resident Physicians -----	1		1
Clinical Assistant's Certificate -----	2		2
Total Certificates -----	23	110	133

\*These figures include students registered in the respective colleges in the Summer Session only.

## LETTER OF TRANSMITTAL

### IOWA STATE COLLEGE OF AGRICULTURE AND MECHANIC ARTS.

*To the Iowa State Board of Education.*

Gentlemen: I have the honor to submit to you herewith recommendations for appropriations for educational work, improvements, and enlargements at the Iowa State College of Agriculture and Mechanic Arts in the biennium, July 1, 1915, to June 30, 1917; and my report on educational work, improvements, and enlargements at the college in the biennium, July 1, 1912, to June 30, 1914.

Through your unanimous action, it became my privilege to begin service as President of the Iowa State College of Agriculture and Mechanic Arts in September, 1912. In this, my first formal and required report, I desire to express my appreciation to all members of the Board of Education and Finance Committee for their support. In accepting the position as President, I realized the great opportunity and responsibility of the office. Two years of service have made me the more appreciative of the responsibility and opportunity of this position and the more determined to assist to the extent of my ability in carrying forward the great work of the college along lines clearly specified in the National and State laws under which the college is founded, and in accordance with the wishes of the Board of Education, the legislature and the people of the State.

It is a pleasure to acknowledge the valuable service of Acting President Stanton, who administered the affairs of the college for a period of two years prior to the beginning of my service. As recognition of his long and efficient service and to assure his continued connection with the most important affairs of the college, you have elected him, upon my recommendation, permanent Vice-President of the college.

Very respectfully,

Ames, Iowa.  
September 23, 1914.

R. A. PEARSON,  
President.

## APPROPRIATIONS RECOMMENDED FOR EDUCATIONAL WORK, IMPROVEMENTS AND ENLARGEMENTS AT THE COLLEGE.

IN THE BIENNIUM JULY 1, 1915 TO JUNE 30, 1917.

### A. PRESENT APPROPRIATIONS TO BE CONTINUED ANNUALLY.

It is recommended that the following appropriations, which were available for the purposes indicated (including experiment and extension work) in each of the two years ending December 31, 1915, under provision of Chapter 228 of the laws of the Thirty-fifth General Assembly, 1913, providing for a one-half mill tax, be made regular annual appropriations:

Support for collegiate departments.....	\$ 125,000
Agricultural Extension, including home economics.....	48,000
Agricultural Experiment Station farm and work.....	57,000
Agricultural and home economics one and two year non-collegiate courses .....	12,500
Trade School and Engineering Extension.....	25,000
Engineering Experiment Station .....	5,000
Veterinary Practitioners' Course .....	5,000
Veterinary Investigations .....	10,000
Repair and Contingent .....	10,000
Two and four year courses in home economics for home makers and teachers .....	20,000
Equipment of departments and buildings .....	40,000
Maintenance and improvements of public grounds.....	10,000
Enlargement of buildings and small additional buildings.....	10,000
Total .....	\$ 377,500

*This asking is in no sense an increase.* It has been the custom for the legislature to make permanent annual appropriations for regular maintenance items at all institutions. Such items are being paid to the institutions without further legislative action. But in this case the items were provided for by special millage tax of limited duration, hence necessity of asking renewal. If this renewal is allowed, work will continue as at present. If it is not allowed, work which is now being carried on will have to be abandoned.

### B. ADDITIONAL MAINTENANCE FOR EDUCATIONAL WORK AT THE COLLEGE, ANNUALLY BEGINNING JULY 1, 1915.

1. Support for collegiate departments and Summer Session....	\$ 190,000
2. Sub-collegiate courses in agriculture and home economics, and trade schools in engineering .....	30,000
3. Winter short courses in agriculture, home making, and trades and trade school work.....	9,500

C. SPECIAL APPROPRIATIONS FOR IMPROVEMENTS AT THE COLLEGE, INCLUDING EQUIPMENT, REPAIRS AND MINOR STRUCTURES, ONE-HALF OF WHICH AGGREGATE MAY BE USED EACH YEAR OF THE BIENNIAL PERIOD BEGINNING JULY 1, 1915.

4. Additional equipment and furnishings for buildings and departments, including buildings now under construction....	\$ 106,000
5. Extension of heating system and equipment for heating plant.	39,600
6. Repairs and improvements for dairy building, old agricultural hall, and barns, and provision for fruit storage.....	8,000
7. Temporary provision for home economics laboratories.....	1,500
8. For enlargements of buildings and additional small buildings.	30,000
9. Settling and storage water tank and filter.....	15,000

In connection with the above recommendations, attention is called to appropriations by the last General Assembly amounting to \$92,000 to supplement certain items in the millage tax measure. With the arrangement of appropriations as indicated above, such supplementary item will not have to be requested for the coming biennium.

D. A SPECIAL ADDITIONAL APPROPRIATION FOR ENLARGEMENTS, INCLUDING BUILDINGS AND LAND, TO SUPPLEMENT THE BUILDING MILLAGE TAX, IS URGENTLY RECOMMENDED.

The following buildings and land are most needed at this time:

(This list includes buildings which may be erected on the special building millage tax.)

10. Animal husbandry laboratories .....	\$ 85,000
11. Science building .....	65,000
12. Hospital .....	30,000
13. Dairy cattle barn .....	20,000
14. Library building .....	225,000
15. Addition to dairy building .....	25,000
16. Home economics building .....	175,000
17. Women's dormitories and dining hall.....	180,000
18. Poultry building .....	100,000
19. Veterinary building enlargement .....	47,000
20. Beef cattle barn.....	20,000
21. Abattoir .....	25,000
22. Physics building .....	150,000
23. Agricultural engineering building .....	150,000
24. Judging pavilion and drill hall.....	200,000
25. Animal husbandry farm and buildings.....	60,000
26. Horticultural experiment farm .....	10,000
27. Veterinary research and serum farm.....	32,000
28. Additional land near the campus.....	35,000

It is recommended that approval of plans be secured for such buildings as it may be possible to erect during the biennium.

## BRIEF STATEMENTS IN SUPPORT OF RECOMMENDATIONS FOR APPROPRIATIONS.

## 1. Support for Collegiate Departments and Summer Session....\$190,000

Enrollment this year, excluding the Summer Session, is practically double the enrollment of ten years ago. The increased support is needed chiefly for additional teachers, not to care for an anticipated further increase of enrollment, but to properly teach the present student body. The increase of the college support fund by the last Assembly relieved the abnormal pressure under which the faculty was then working. It was not sufficient to provide for the increase of enrollment that has occurred during the past two years. The additional 659 students of the last two years could not have been cared for except that the faculty was willing to take on additional work in excess of what should be expected of them. If the faculty is relieved of its present pressure by the appointment of additional teachers, it is expected they will be able to care for such increase of enrollment as occurs in the present biennium.

It is estimated that additional fuel and light and janitor service for the new buildings will cost \$20,000 annually.

Members of the present faculty are entitled to some salary increase. Salaries at Ames are very low as compared with other institutions. Salaries of corresponding positions in the University of Illinois average nearly \$1,000 more per year. Better salaries and perquisites at other neighboring institutions are a constant handicap in securing and holding the best teachers at the State College.

With the widening application of science to the industries, it becomes necessary to widen the scope of instruction, and this means an occasional establishment of a new department or sub-department. Such enlargements needed at this college include animal breeding, plant breeding, plant physiology, plant pathology, animal nutrition, telephone engineering, and highway engineering.

The Summer Session should have at least \$17,000 additional to permit the best instruction for the rural and grade teachers who wish to learn something of agriculture, trade school work, and home economics. The attendance at this session has been rapidly increasing. In 1914 it was 618 as compared with 215 in 1913. In 1915 it may be expected to exceed 1,000. It is proposed to double the length of the course so as to give the best possible assistance to the many hundreds of teachers who are forced by state legislation to prepare themselves along vocational lines.

It is recommended that not to exceed five per cent of the total amount paid for salaries by the college shall be made available for retiring allowances at the discretion of the Board of Education. In this way the efficiency of the faculty will be increased without increased expense to the state.

## 2. Sub-Collegiate Courses in Agriculture and Home Economics and Trade Schools in Engineering.....\$ 30,000

Work of this grade should be strengthened for the large number of young men and women who have not finished accredited high school courses and wish to spend one or two years in preparation for useful vocations. With the educational environment and sympathies at this college and the complete equipment which is provided for collegiate work, these courses can be given to greatest advantage.

## 3. Winter Short Courses in Agriculture, Home Making, Trades and Trade School Work .....\$ 9,500

This is to partially provide for short and intensely practical courses, largely for mature people who come to the college for a short period during the winter holidays. This instruction is given to many people who

could not secure it in any other way. The lives and work of many citizens are made more efficient by these courses. Special attention is given to live stock, field crops, horticulture, dairying, home economics, painting and house decorating. With added support, the scope can be enlarged to include other branches which are insistently demanding attention. At least two-thirds of this appropriation should be directed to the strictly agricultural and home economics work.

4. Additional equipment and furnishings for Buildings and Departments, including Buildings now under construction .....\$106,000

This item is of the utmost importance. The college is without suitable equipment in chemistry, where 1,764 students are enrolled. The chemistry equipment was burned in the chemistry building about two years ago. As is customary, this state building was not insured. A special appropriation was made by the last Assembly but it was \$60,000 less than recommended. The new chemistry building is now fitted throughout with temporary equipment. The welfare of the majority of the students in the institution is concerned. At least \$60,000 is needed for chemistry equipment. It should be noted that most of this is permanent equipment such as laboratory benches, and the asking will not need to be repeated when once granted.

New equipment also will be needed for the science division and the hospital when located in larger quarters.

The item requested also would provide for urgent needs in the Animal Husbandry Department where animals of different breeds are needed, both to provide for the increasing number of students and to replace stock which has outgrown its usefulness. The college should have representative animals of all types that are economically important in Iowa. There should be at least one stallion and two mares belonging to each of the principal draft breeds, and one bull and two cows belonging to each of the principal beef and dairy breeds, also typical specimens of hog and sheep breeds. At least \$20,000 should be expended for live stock and necessary accompanying equipment.

One of the greatest needs of this college is a better reference library. Scientific investigations by members of the faculty and research students are severely handicapped by having to send away for scientific works needed temporarily. Too often the necessary books cannot be borrowed. The library has been poorly quartered and almost starved. To properly equip it in the single line of veterinary science so that it would contain the records of the best work done in Europe and America, would cost at least \$15,000. Money spent for reference books is an economy because it enables investigators to quickly and accurately learn results of experiments elsewhere and thus it saves time and cost of duplicating experiments here. An expenditure of \$25,000 could not be called extravagant as compared with the needs.

Other departments are in need of much equipment to replace what is worn out and to increase the teaching facilities which are needed for larger classes.

The equipment askings represent purchases which are needed at this time. It is difficult to see how a reduction of the items can result otherwise than merely to postpone some purchases and continue to that extent the embarrassment suffered by lack of equipment. In making these estimates for equipment effort has been made to hold them to the minimum.

5. Extension of Heating System and equipment for Heating Plant .....\$ 39,600

This is made necessary by increased demands for heat for new buildings, including the extension of the heating tunnel and steam and other pipe

lines. An economy will be effected when the tunnel loop is finished as indicated. The items making up the total are as follows:

2 500 H. P. boilers .....	\$ 7,000
2 sets chain grate stokers.....	3,425
Piping for boilers .....	1,200
Foundations and settings .....	2,100
Coal hopper .....	1,500
Ash conveyor .....	2,500
Turrell regulator .....	675
Railroad scales .....	1,500
Car moving apparatus .....	425
Feed water pump for boilers.....	750
Breeching to boilers .....	450
Exciter and alternating current machine.....	1,475
Vacuum system for heating three buildings.....	1,000
600 ft. heating tunnel to complete the tunnel loop.....	7,200
700 ft. heating tunnel to new buildings.....	8,400
	<hr/>
	\$ 39,600

6. Repairs and Improvements for Dairy Building, Old Agricultural Hall, Barns, and Provision for Fruit Storage .....\$ 8,000

Considerable space now useless or partially used can be made available. Some of the barns need overhauling to provide modern systems of ventilation and to allow portions of these buildings to be used for different purposes than originally planned. A small building is needed for temporary protection of fruit when it is collected in the fall and must be held for a short time prior to marketing. The value of such a building could be saved in one or two seasons by the protection it would afford.

If provision is made for a new agricultural engineering building during the biennium, \$15,000 should be provided for remodeling the building which that department now occupies so that it may be used for other lines of work.

7. Temporary provision for Home Economics Laboratories .....\$ 1,500

Nearly 600 students are now taking work in the home economics building which was planned for about 250. Four laboratories will need to be fitted up next year in some other building. These will require cabinets and fitting rooms and they will be regarded as temporary because no other building can permanently spare the space. Some further changes also should be made in the laboratories of the present building to provide for the handling of larger classes.

8. Enlargements of buildings and temporary small buildings ....\$30,000

A considerable number of small buildings are needed to properly supplement the larger buildings and to provide for instructional and experimental requirements distant from the main campus. At least \$50,000 could be used to decided advantage in this manner, but the item named would be sufficient to somewhat relieve the situation. Among the buildings most urgently needed are the following:

(a) Cottages for foremen and laborers.....\$14,000

The greatest difficulty is experienced in securing and holding good help on the college farms and other premises because of distance from residences for such persons. It is desirable also to have at least a few reliable men quartered near the college buildings to furnish help at a time of fire or other emergency.

- (b) Barn for Dairy Bulls.....\$2,000

Separate quarters are desirable for the several bulls which have to be maintained to represent different leading breeds at the Dairy Farm.

- (c) Poultry Houses .....\$1,350

Additional houses are needed to provide instruction for larger classes in poultry husbandry.

- (d) Agricultural Engineering Annex.....\$10,000

The agricultural engineering department needs suitable quarters for storing and demonstrating large tractors and other agricultural machinery. About \$25,000 worth of such apparatus has been loaned to the college and much of it cannot be given good care because of limited space. The structure proposed is a cheap but durable shed building.

- (e) Student quarters, cattle shed and judging pavilion.....\$10,000

As the dairy farm is about a mile from the campus, it is necessary that a shed or pavilion be provided for stock judging and demonstration work on farms. It is also desirable to have students' quarters provided there for the accommodation of limited numbers of students who are assigned to the work of caring for stock and obtaining practical instruction.

- (f) Shelter for rattler and grinding machines.....\$950

It is proposed to build a small addition to one of the engineering buildings, at a point which will not disfigure the building, to accommodate the rattler and grinding machines which are noise and dirt producers and should be kept in quarters separate from other lines of work.

- (g) Outside kiln and shed for ceramics.....\$1,000

The need for this is due to the fact that the kilns are now located in a space which is also used for other purposes and these other purposes must be sacrificed when a blast is on because of uncomfortable heat.

- (h) Storehouse for foundry castings and supplies.....\$1,000

At the present time these castings and supplies are stored out of doors and they are deteriorating because of exposure to the weather. There are losses, also, which would not occur if a suitable building were used.

- (i) Building for ore dressing and coal washing.....\$7,000

This is to house equipment which is needed to permit necessary practical instruction in mining engineering.

- (j) Temporary building for Trade School courses.....\$4,000

These courses are making a good beginning. Laboratory rooms are needed for some of the work which it has not been feasible to provide for in the regular college laboratories. Later, with the enlargement of the college plant, permanent laboratories may be provided, but in the meantime a temporary building would serve the purpose.

- (k) Practice cottage for the home economics division.....\$5,000

- (l) Small animal building and rendering plant for the veterinary  
division .....\$7,000

- (m) Indoor Rifle Range .....\$8,000

This is much needed in the military training department. Military training is required at this college as a consideration in connection with the federal appropriations. Thus far special equipment has not been furnished, but the United States Government is becoming more and more insistent in this matter.

- (n) Experimental Farm Buildings including storage quarters and other small structures .....\$4,000
9. Settling and Storage Water Tank and Filter.....\$15,000

The college water supply at times is as brown as coffee due to heavy iron content. The matter has been studied by competent engineers and they agree that a settling and storage tank with gravity filter will prove a satisfactory remedy. The amount requested is the result of a careful estimate.

10. Animal Husbandry Laboratories.....\$85,000

The Animal Husbandry department needs more building space on account of its increased enrollment and to permit widening the scope of its work.

11. Science Building .....\$65,000

Almost all of the departments in the Division of Science are severely taxed in efficiency on account of their limited space. These departments carry heavy work for all divisions of the college. The division is particularly short of laboratory space and it is proposed that two departments giving much laboratory work, namely, bacteriology and zoology, shall be quartered in the building. By removing these departments from their present quarters, other departments will be able to expand into the space vacated. This would provide for about twenty additional class rooms which are needed.

12. Hospital .....\$30,000

Hospital facilities are urgently needed. At present there is an old residence building in use as a hospital. It is frequently overcrowded and many sick students must remain in their boarding houses. There are several thousand calls for help at the hospital every year and several hundred bed cases.

13. Dairy Cattle Barn .....\$20,000

A modern dairy barn is needed to suitably care for the stock in hand and to show the latest and best ideas in dairy barn construction. The present building could easily be adapted for a stock judging pavilion which is greatly needed on the dairy farm.

14. Library Building .....\$225,000

The college work is greatly handicapped for the want of a library building. The urgent recommendation of the Faculty Library Committee, that an adequate fireproof building be erected in the near future for library purposes, is strongly approved. The library occupies a few recitation rooms and some corridor space in Central building. The Faculty room has been given up for a general reading and study room. These quarters are entirely too small. New books cannot be properly cared for. Seminar work, which is so important in a scientific institution, is greatly handicapped. Research work is interfered with. Students' efforts in connection with debating and literary societies are discouraged. A new library building would be an immense relief. It should have space where students can profitably spend spare hours between recitations and laboratory work and facilities where they may go to look up special subjects assigned to them for study. Necessary space for literary societies should be provided in this building.

In the library building, or separately, there should be provided an auditorium for general meetings. It should have seating space for at least 2,500 people. Such a building is needed many times for convocations and

for lectures and musical events, besides commencement and special occasions. There is now no hall on the campus large enough to hold even the freshman class. For any such purpose the gymnasium must be seated at considerable cost, besides inconvenience to the required physical training work for one or two days.

15. Addition to Dairy Building .....\$25,000

The present building has been in service several years and is now outgrown. It does not have space for instruction in cheesemaking because this work has been crowded out by market milk. The proposed addition would provide for cheesemaking, certain phases of market milk, and ice cream work, and a class room and laboratory.

16. Home Economics Building .....\$175,000

The Home Economics division is growing more rapidly than any other division in the college. It will continue to grow rapidly. The present building was intended to accommodate 250 to 300 students. Double the number are now taking their work in that building and overflow rooms outside. The present home economics building could be utilized by other departments of the college with almost negligible cost for alterations. The division, which stands pre-eminently for woman's work at the college should have a structure commensurate with its importance and dignity.

17. Women's Dormitories and Dining Hall .....\$180,000

The limit of available accommodations in Ames has been reached. Furthermore, the impression is getting out through the state that students should not come to this college because suitable living quarters cannot be found. The question of rooming the student body is one which is causing much anxiety. In the last biennium, when the enrollment of young women increased more than 250, the state has provided additional accommodations for less than half this number. Fireproof dormitories should be provided as soon as possible for all women students. No one can see a student rooming house in flames without coming to this conviction,—and such an experience has been had one or more times in practically every college in the country. Already too many students are living in rooms which they should not be compelled to occupy. The erection of dormitories for young women students means a benefit to the entire student body because they would serve to vacate houses now occupied by young women and which are greatly needed by the increasing numbers of young men. The college is receiving more and more demands from parents who insist that their daughters shall be located in buildings that are entirely under college control. These buildings can be made to pay all their expenses, and money spent in them should be looked upon as an investment.

18. Poultry Building .....\$100,000

The poultry products of the state are reported as worth over \$50,000,000. This great industry concerns almost every one who lives in the country and a large number of residents of towns. Instruction is needed and it is asked for. A modest structure for the interests concerned could be provided for the amount named,

19. Veterinary Building Enlargement .....\$47,000

The veterinary buildings are large enough except in respect to a few phases of the work. These include instruction to the increasing numbers of agricultural students, and research. It is proposed to enlarge one of the wings.

## 20. Beef Cattle Barn .....\$20,000

The present beef cattle barn was built many years ago. It might have been a good structure for certain purposes but it is not now well adapted for housing animals. It is old and unsafe and causes much criticism from farmers who themselves have far better equipment.

## 21. Abattoir .....\$25,000

Provision needs to be given for instruction in slaughtering animals, and dressing and caring for meats, especially for local markets. A large amount of slaughtering is now going on in temporary quarters in connection with hog cholera serum manufacture and the slaughtering of animals in the Animal Husbandry department.

## 22. Physics Building .....\$150,000

The Physics Department is one of the largest in the college. The work given by the department has nearly doubled in three years and the present quarters are inadequate and also not adapted to the work. The department is unable to give laboratory work with some of its courses because of lack of space. A new building adapted to the work would greatly increase the efficiency of the instruction given.

## 23. Agricultural Engineering Building .....\$150,000

Nearly 1,800 students are taking work in the Agricultural Engineering Department. A large amount of equipment having high value is loaned by manufacturers. The department needs more room for instruction and more room for storage. This department has grown so rapidly and has become so firmly established that it should have a building better adapted to its needs. The building which it now occupies could well be used for sub-collegiate work.

## 24. Judging Pavilion and Drill Hall .....\$200,000

The charter of this college requires instruction in military tactics. A large sum of money is received annually from the United States Government with the understanding that this provision of the charter will be faithfully observed. The War Department has been lenient with this and other institutions, but their requirements are becoming more exacting. It is of the highest importance that, in case of need, college trained young men shall be qualified to serve as lieutenants in the army. There is probably no point in the state where military training can be given to better advantage than at the land grant college. The same structure would serve advantageously as a judging pavilion when large quarters are needed. Also, it would serve for agricultural shows and demonstrations. In these respects it would serve a valuable purpose.

## 25. Animal Husbandry Farm and Building .....\$60,000

The educational and experimental work of the Animal Husbandry Department is greatly handicapped because of lack of farm facilities. This department stands for the greatest activities of the state. It should have considerable land area and farm buildings so that it can develop and illustrate its teachings.

## 26. Horticultural Experiment Farm .....\$10,000

The Horticultural Department needs a farm at a point distant from Ames where soil conditions and climate are somewhat different, for the purpose of developing and testing varieties and supplementing the work which is under way on the college farm.

27. Veterinary Research and Serum Farm .....\$32,000

To satisfactorily conduct veterinary research, a farm is needed for the accommodation of animals under observation and other animals used in the production of protective lymphs and anti-toxins, etc.

28. Additional Land near the Campus .....\$35,000

Additional land for college purposes is certain to be needed in the very near future, and it would be an economy to secure it at this time before prices are further advanced. The need of the land arises especially in connection with housing of students and providing suitable exercise grounds.

---

## REPORT ON EDUCATIONAL WORK, IMPROVEMENTS, AND ENLARGEMENTS AT THE COLLEGE IN THE BIENNIUM JULY 1, 1912, TO JUNE 30, 1914.

---

### THE STUDENT BODY.

#### ENROLLMENT.

The rapid increase of enrollment in recent years in this land grant college and in similar land grant colleges in other leading states is one of the most striking developments of the day in the educational world. To care for our increase of enrollment, which is 659 in two years, is our chief problem and explains our chief needs. The increase of 659 does not include Short Course or Summer Session students but those who are in the college for the full academic year.

The following table and accompanying chart show the enrollment for the year 1897-98 and each year since:

# ENROLLMENT AT IOWA STATE COLLEGE.

\*Estimated.

It will be noted that the largest increase is in agriculture and the next largest is in home economics. These two lines of work have attracted the greatest increases in student enrollment generally throughout the country. The reason is easy to understand. A vast store of knowledge concerning agriculture and home making has been developed during the last few years. This is now in form to be given to the people. The benefits of having this knowledge are being realized more and more. A new State law requires vocational instruction in the public schools, which means many teachers must be trained in agriculture, trade school work and domestic science. In a short time college enrollment in these two subjects may be expected to reach its normal level as has been the experience in other lines of instruction, which were earlier established in schools and colleges and have had their periods of rapid growth.

Enrollment in engineering courses shows a decrease in recent years at the State College but not as much decrease as was experienced at most other institutions. This was due to economic conditions throughout the whole country and already there is evidence that conditions are changing and the engineering enrollment will show an increase.

The decrease shown in enrollment in veterinary medicine was due to raising the entrance requirements so that this work would rest on the same educational basis as other important branches. The decrease of enrollment in industrial science is an indication of the preference of young people to prepare themselves for the more practical special technical lines rather than in the general sciences, which may not offer as many well paying positions. The following tables show the number of students in each class and course in the years 1912-13 and 1913-14:

If the student enrollment appears large it should be remembered that enormous interests are to be served. A large number of well trained men and women will be required in the State of Iowa to maintain her present standing against the increasing difficulties that come with increasing years of settlement and to develop her resources and maintain her position as compared with other states where wonderful progress is being made in connection with investigation and education along technical lines. In this connection some statistical data are of interest.

According to the 1910 census for the United States, Iowa had 217,044 farms with a total value of farm property of \$3,745,860,544. The value increased 104% in the ten years ending 1910. Of this amount \$2,801,973,729 was in land; \$455,405,671 was in buildings; \$95,477,948 in implements and machinery and \$393,003,196 in live stock. The value of corn, Iowa's chief crop, exceeds \$200,000,000 per year.

According also to federal authority, in 1909 Iowa had 5,528 manufacturing establishments, which employed an average of 78,360 persons and paid out during the year \$43,514,000 in salaries and wages. The value of all manufactured products was \$259,238,000. The State Bureau of Labor Statistics estimates the value of manufactured products for the year 1913 as \$406,225,576, which is an increase of about 57 per cent over the amount reported

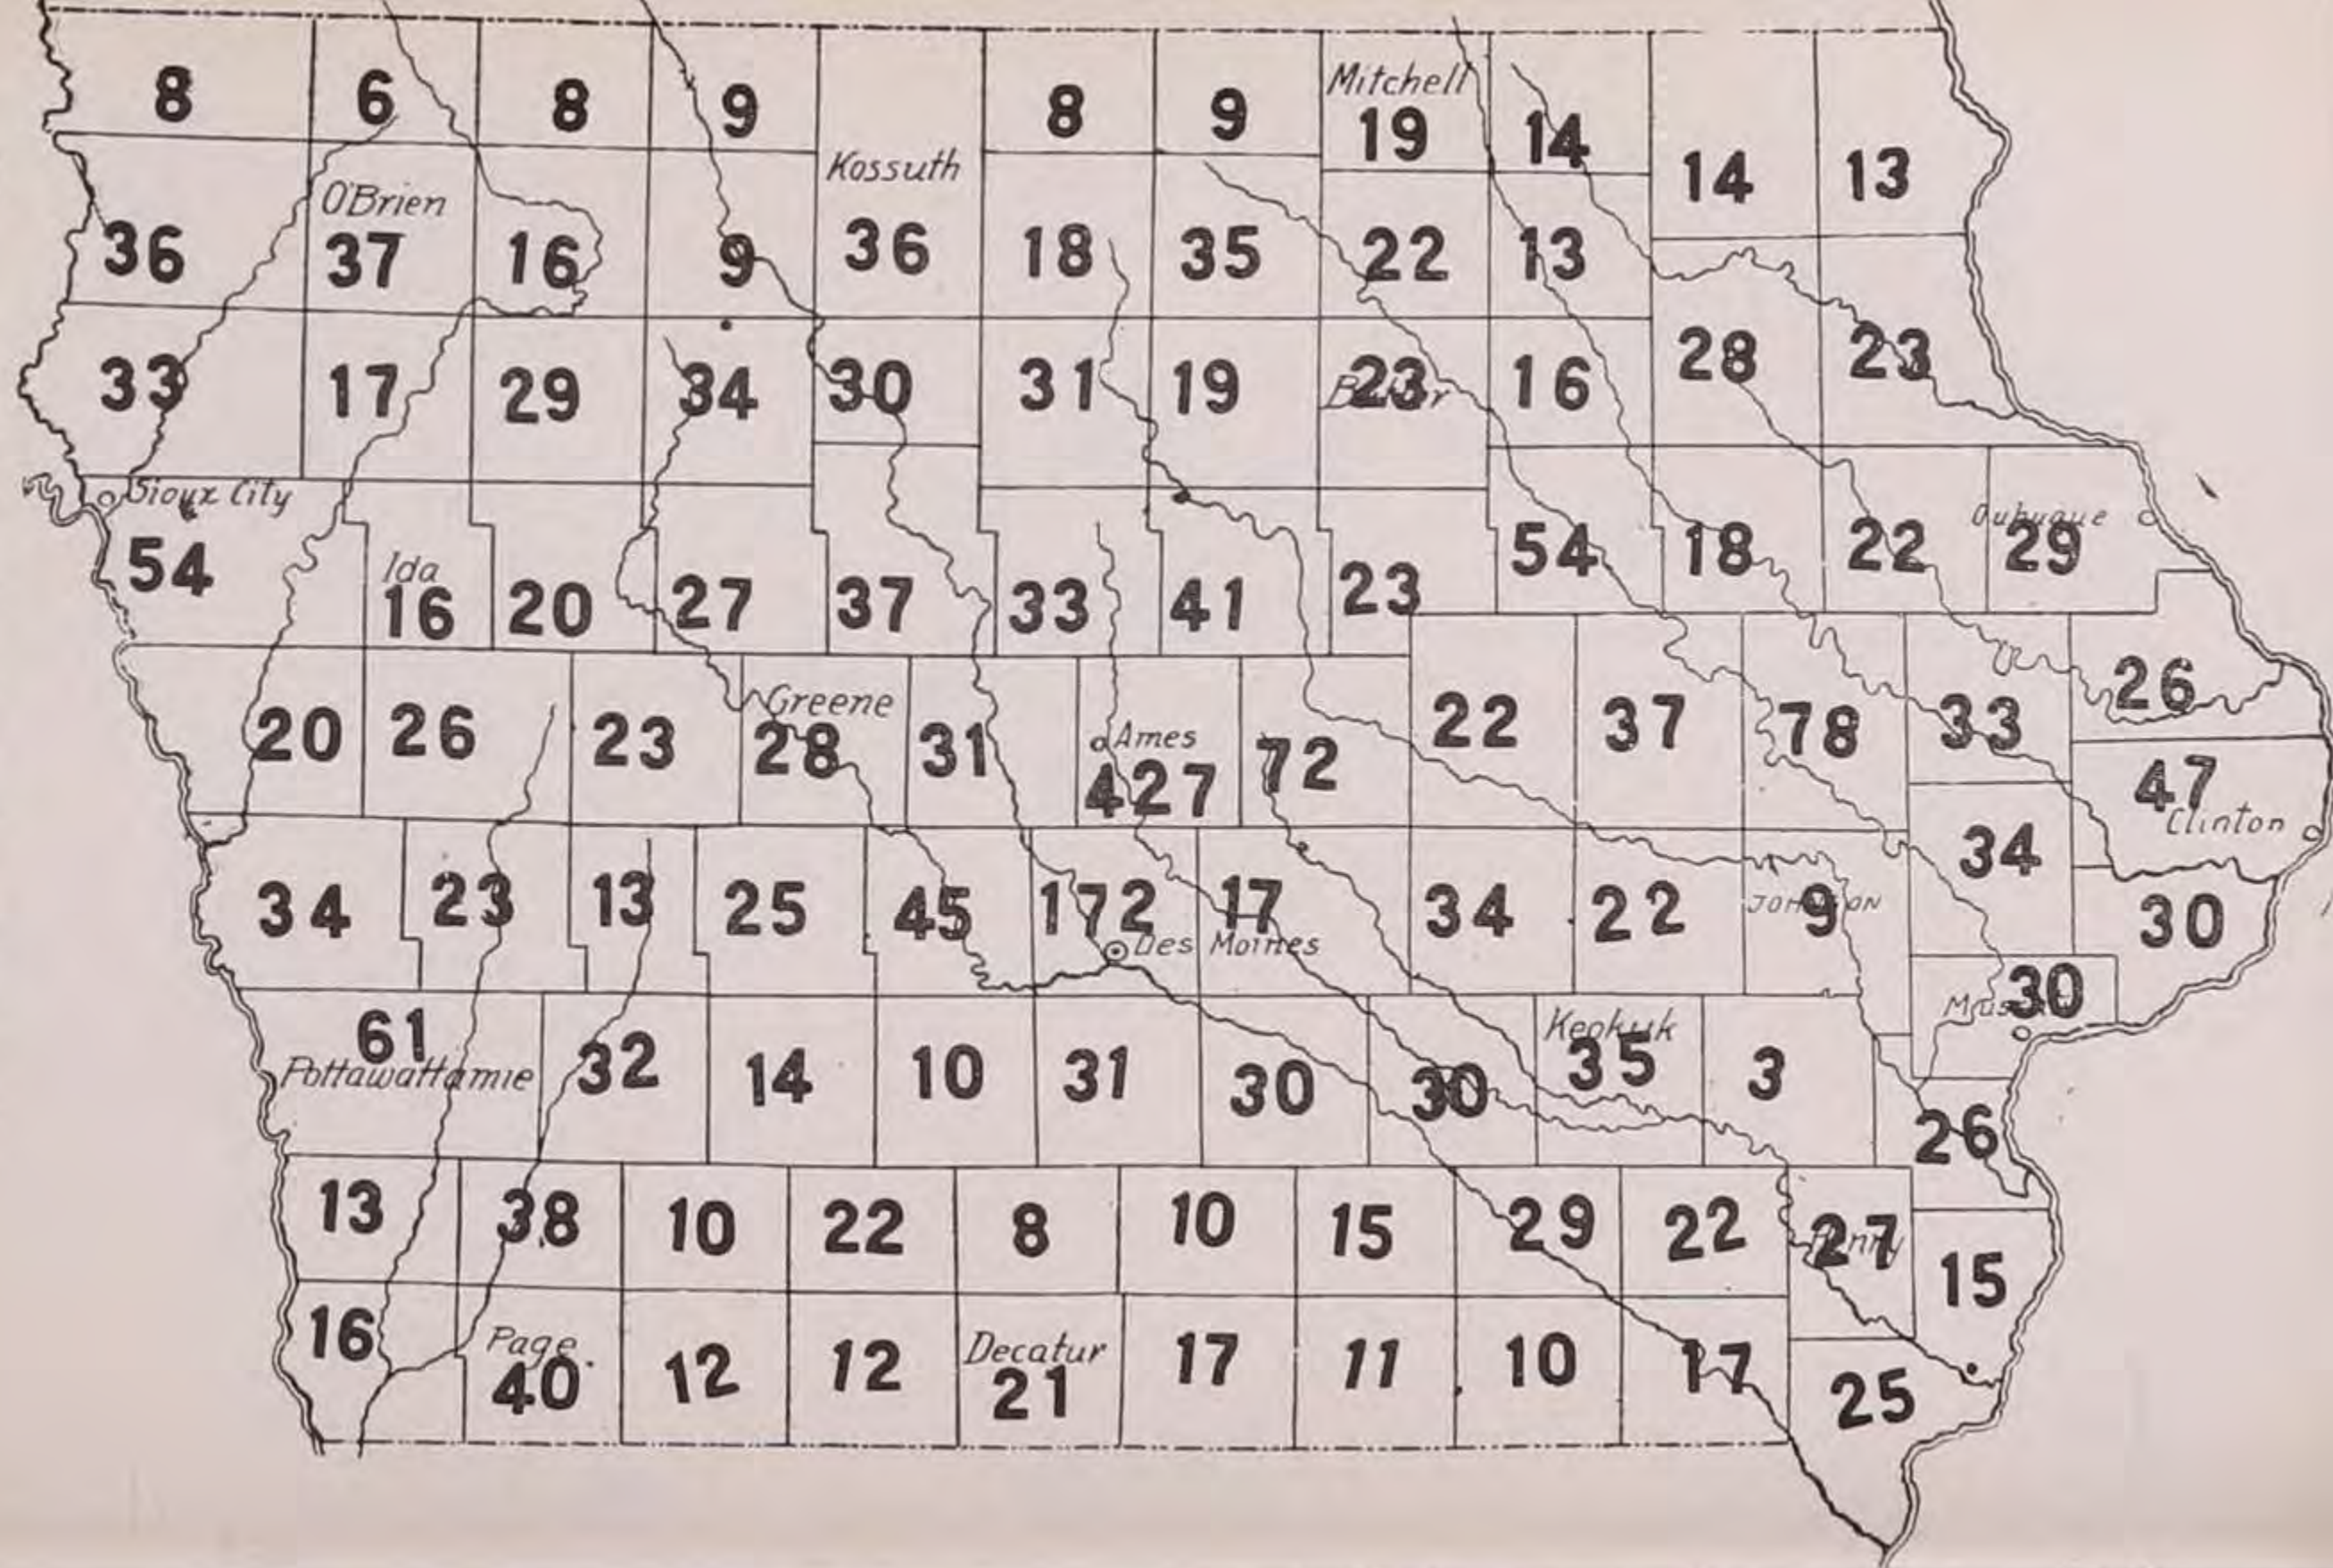

by the United States census for 1909. Iowa also produced products to the amount of \$13,877,781 from mines and quarries.

Every county in the State is represented by a good-sized delegation in the student enrollment. The number from Story county is particularly large because many families move to Ames and make this city their home while the young people are being educated. In 1912-13 seven families in Iowa were represented by three children in the College. One hundred and three families were represented by two members. Thirty-five families in Ames sent two or more students, or altogether 76, to the College. There is a considerable number of students from other states but they do not equal in number the Iowa students enrolled in other states.

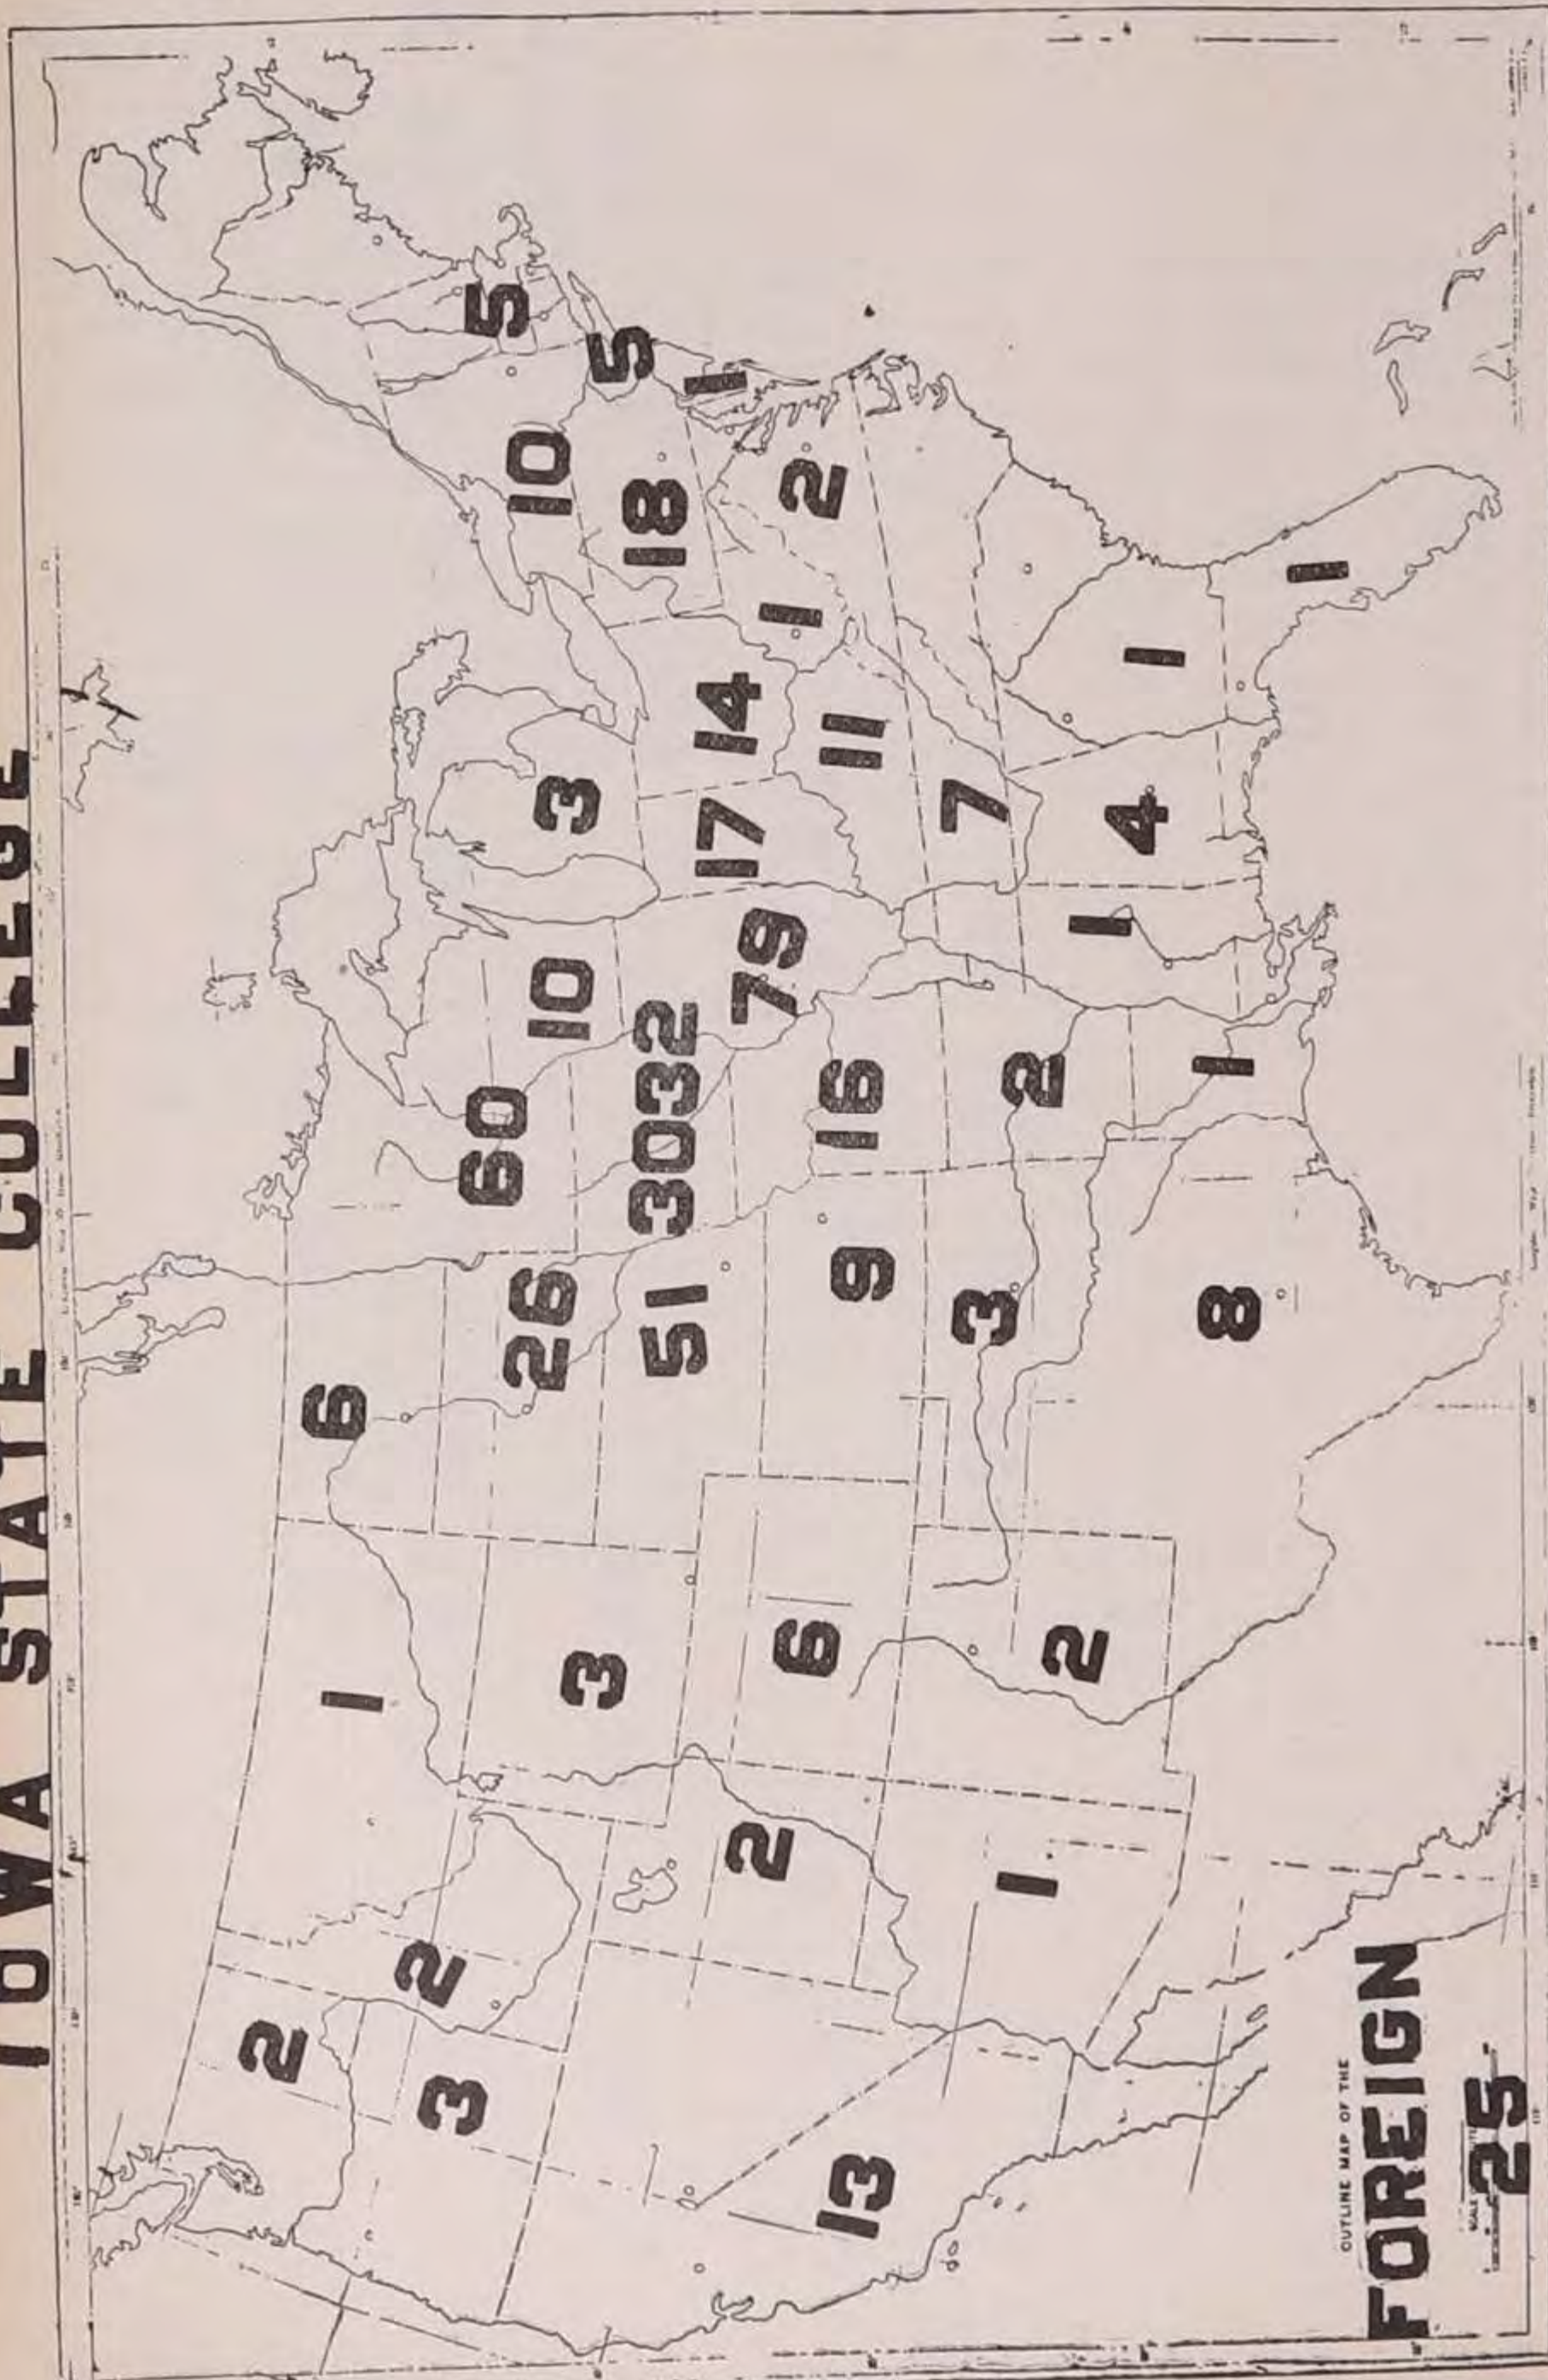

A small number of foreign students is included in our enrollment. These pay the additional tuition fee required of students from out of the State. In a personal letter the United States Commissioner of Education, Honorable P. P. Claxton, calls attention to the fact that the European war may be expected to have the effect of sending more foreign students to American institutions of higher learning. Some may come from the countries that are at war but more from South American and other peaceful countries whose young men have been going to England and Germany and France. In addition, the American students who would go abroad will now ask for instruction at home. Iowa State College will feel the effect of this added demand caused by the deplorable conditions in Europe. The graphic on page 229 shows the student enrollment by counties for the academic year of 1913-1914 and the one on page 230 shows the enrollment by states for the same year.

ENROLLMENT

## EFFICIENCY LECTURES.

The chief drawback to good scholarship in the case of too many of our new students is that they do not know how to study. They have not learned to concentrate their efforts on one subject. The students readily acknowledge this fact. Its result is that many a student does not get into the heart of his work until he has spent some months in college classes. A new plan has been adopted whereby all freshmen students are given five efficiency lectures early in their first semester. In the fall of 1913 these lectures were first given and the speakers were:

October 6—Student Economics,

By President Pearson.

October 13—College Spirit,

By Mrs. Hattie Moore Mitchell, of Des Moines.

October 27—(For Men) Personal Hygiene,

By Professor Hackett.

(For Women) Same Subject,

By Dr. Frances Brown Sherbon, of Colfax.

November 10—(For Men) Student Habits,

By Rev. Howland Hanson, of Des Moines.

(For Women) Same Subject,

By Mrs. S. K. Stevenson, of Iowa City.

November 24—(For Men) Disease Carriers,

By Dean Buchanan.

Later—(For Women) Same Subject, Same Speaker.

## SELF-SUPPORT.

The students attending this College are an earnest, high-minded group. Cliques and snobbery and shiftlessness do not prevail. The young man or woman of small means, if character is right, has the same standing as any other student even though it is necessary to do menial work to help pay expenses. A few students wholly support themselves; a large number of students partly support themselves. This class is encouraged in every way possible, but all students are advised to provide themselves with sufficient funds to cover all expenses for the first year of work. This permits them to get acquainted with conditions and to find suitable location for their second year where they may earn money and, most important, it enables them to put their whole strength upon the important foundation work of the freshman year. Some statistics showing the extent to which students contribute to their own support while in college, as reported by the Y. M. C. A. Employment Bureau, are as follows:

About 350 earn their board by working as stewards, treasurers, waiters, dishwashers, and helpers in clubs, fraternities and cafes.

Nearly every club, fraternity and rooming house, and a number of private homes furnish rooms to students who take care of furnaces and do odd jobs.

Six earn all their college expenses as stenographers. Others do some work of this kind to help out on expenses.

Two men earn their college expenses by photographic work.

One man pays his expenses by mending shoes.

Eight students act as agents for laundries.

Three deliver daily papers.

Several students canvass clubs, etc., representing wholesale grocery and supply houses.

Several students receive rooms in college buildings for janitor work which they do.

Two hundred work at odd jobs Saturdays and other days when they have time off.

The college departments employ student help in so far as possible. Advanced students assist to a limited extent in laboratories and they assist professors in getting together materials for lectures and laboratories. Other work for the College includes labor on the farm, in the orchards and experimental plats, in the barns, mailing bulletins, correcting essays, etc.

The College treasurer's books show that in one recent year 802 students received \$26,436 for work done for the College; 642 of them received less than \$50 each, 46 received from \$100 to \$200 each. It is estimated that other student earnings amount to about \$20,000 per year. Many students earn a large part of their expenses during the long summer vacation.

#### FEES.

Under provision of the law, tuition is free for students residing in Iowa. For others it is \$25 per semester or \$50 per year. Your Board has allowed eight free tuition scholarships annually for each of the four classes. This is in recognition of the fact that a large part of the support of this College is from the National Government and therefore is paid by other states and we have some obligation to these other states for this reason and because they, without charge, or in some cases for only nominal charge, are educating large numbers of youth from Iowa. There is some advantage, also, to a student body in having a few bright minds from other states and colleges mingling among them and through these few scholarships such students are encouraged to attend this college.

All students are charged fees to cover cost of material supplied to them for class room and laboratory work. These cover mimeograph notes which in a large measure take the place of expensive text books, and chemical substances which are used in experiments, and breakage of glassware which has been loaned to students. There is a general fee to cover incidental charges such as janitor services and hospital services and certain other necessary items. This has been reduced by the Board of Education from \$10 to \$9 per semester and should be further reduced whenever possible. The total amount of required fees is about \$20 a semester or \$40 a year.

#### ROOMING FACILITIES.

In general the rooming facilities are good. The majority of students are located in private rooming houses. Some are in club or fraternity houses, but there is a shortage of rooms. Prominent business men of Ames and members of the faculty have recently organized a Building and Loan Association and this is expected to make it easier for responsible people without ready capital to build homes and thus to relieve in part the pressing need for more rooms for students. City authorities state that about 150 houses were erected in the summer of 1914. The faculty committee on Public Safety has done good work in getting fire escapes put onto many houses, but the fire risk is still a large risk.

#### ORGANIZATIONS.

There are many students' organizations and these are encouraged in so far as good service is rendered. There are literary societies, technical clubs and fraternities, sororities and other social and general organizations. Membership in fraternities and sororities is dependent upon scholarship and this restriction appears to be approved by the societies as well as the Scholarship Committee.

#### PUBLICATIONS.

There are several publications controlled by students, including the following:

- Iowa State Student, published three times a week.
- Iowa Agriculturist, published monthly during the College year.
- Iowa Engineer, published monthly during the College year.
- The Bomb, annual publication by the junior class.
- I. S. C. Alumnus, monthly ten months of the year.

During this biennium some interesting and promising innovations in connection with student conduct and the management of certain college affairs have been introduced.

## FACULTY ADVISERS.

All freshmen students are now assigned to faculty members who serve as their special friendly advisers. Each member of the faculty who is able and willing to assume the task (and this includes practically all) has from five to ten freshmen students assigned to him or her, and endeavors to keep in close touch with these students through the year. Friendly conferences are held. The student is given to understand that the faculty adviser wishes to assist in every way possible. This relationship in many instances becomes close, friendly and most helpful as is shown by the records in the registrar's office and otherwise. In some cases the faculty member is assisted by a senior student.

## STUDENT AND FACULTY CO-OPERATION.

Certain faculty committees are now assisted by students who are elected by their classes for this purpose. In many cases students are as much interested and are as efficient in looking after the college interests as a faculty member could be. It is a valuable training to the student to serve, and this service helps to promote close and friendly relationship between students and faculty. At present the student co-operation with the faculty committees is on the following basis:

## Grounds and Buildings Committee—

- 3 members from each class.
- 2 members from two-year agricultural courses.
- 1 member from two-year home makers' course.
- 1 member from two-year trade school courses.

## Moral Welfare Committee—

- 3 members from each class.
- 2 members from two-year agricultural courses.
- 1 member from two-year home makers' course.
- 1 member from two-year trade school courses.

## Public Health Committee—

- 3 members from each class.
- 2 members from two-year agricultural courses.
- 1 member from two-year home makers' course.
- 1 member from two-year trade school courses.

## Publicity Committee—

- 4 members from each of the three upper classes.

## Public Safety Committee—

- 3 members from each class.
- 2 members from two-year agricultural courses.
- 1 member from two-year home makers' course.
- 1 member from two-year trade school courses.

## Public Service—

- 4 members from each of the two upper classes.

## Gymnasium Evening Committee—

- 5 members from each of the two lower classes.

At first it was planned that the students would have their own organization and assist the faculty committees, but in October, 1913, at a conference attended by the President and the Chairmen of the above named faculty committees, and representative members of the corresponding student committees, it was unanimously agreed that:

- (1) All student members should receive notice of all meetings of the Faculty Committees with which they co-operate.
- (2) All students should attend certain of these meetings when especially requested.
- (3) Selected representatives of the students should attend every meeting of the Faculty Committee with which they co-operate.
- (4) Students should hold separate meetings as desired.
- (5) Each student should have the same voting right as a member of the Faculty Committee.
- (6) The different classes should be requested to make the present appointments on these co-operating committees permanent for the College year.
- (7) Members of committees should be permitted to retain their badges after the period of service.

## PROTECTION OF COLLEGE PROPERTY.

A new plan of making the whole student body feel responsible for and interested in the protection of college property is being tried. Every college suffers more or less loss through petty thefts of property and unnecessary breakage or other injury to its property. These losses have to be considered by administrative officers in making up the budgets. The losses are very often due to persons who have no connection with the institution. In order to check such losses to the utmost and in order to remove the chance of any person getting the idea that, because of unnecessary loss or injury, money appropriated by the legislature is used to repair or replace equipment already paid for by the State, the Board of Education set aside last year \$2,000 from the amount paid in by the students as incidental fees. It was announced that from

the fund thus created all payments would be made for replacing college property which was removed or unnecessarily injured, and that the balance would be turned back to the student body for such use as they might wish in connection with improvements upon the campus, or for the college welfare. The student body became interested in reducing such items of expense. They became more watchful, and losses decreased. At the close of the year it was found that only \$283.63 had been paid out, leaving a balance of \$1,761.37 to be turned back to the student body, for some improvement or betterment.

A helpful influence toward the maintenance of the highest standards of good order was furnished by the class of 1914. When they were juniors, in October, 1912, this class adopted a resolution, pledging themselves to assist in developing such standards in the interest of the good name of the college.

#### MORAL INFLUENCES.

The moral standing of the student body and moral influences operating within it are worthy of note. The religious preferences of students are indicated by the following data collected by the registrar, for the year 1913-14.

Methodist .....	810	German Reform .....	2
Baptist .....	148	Free Reform .....	2
Congregational .....	335	Reformed .....	4
Presbyterian .....	386	United Brethren .....	23
Catholic .....	109	Latter Day Saints.....	4
Evangelical .....	19	Progressive Brethren .....	2
Lutheran .....	124	Jewish .....	5
Mission .....	1	Mennonite .....	1
London Mission .....	1	Church of God.....	1
Swedish Mission .....	2	Christadelphian .....	3
Episcopalian .....	73	Friends .....	20
Christian Science .....	15	Armenian .....	1
United Presbyterian .....	21	St. Jacob's Reformed.....	1
Christian .....	154	Dunkard .....	1
Unitarian .....	13	Church of England.....	1
Free Methodist .....	1	African M. E.....	1
People's Liberal Church.....	1	No preference given.....	311
Restitution .....	2		
Universal .....	3	Total .....	2,611

Among the more evident moral influences in operation throughout the year are the following:

1. The Sunday morning chapel services held in agricultural auditorium and addressed by ministers of all denominations who

accept special invitations to come to the college for this single service. These services are well attended. Often the hall is filled to its capacity of nearly 900. An attractive feature of the service is the music furnished by a choir of college students.

During last year the speakers included:

Bishop H. S. Longley, Des Moines, Iowa, Episcopal Church.  
Mr. A. J. Elliott, General Secretary, Y. M. C. A., New York City.  
President A. E. Craig, Morningside College, Sioux City, Iowa.  
Dr. E. A. Steiner, Grinnell College, Grinnell, Iowa.  
Mr. E. P. Colton, General Secretary, Y. M. C. A., New York City.  
Dr. J. F. Newton, Cedar Rapids, Iowa.  
President D. E. Jenkins, Theological Seminary, Omaha, Neb.  
President R. W. Cooper, Upper Iowa University, Fayette, Iowa.  
President E. E. Sparks, Pennsylvania State College.  
Dr. Osborne, Congregational Church, Burlington, Iowa.  
Dr. Howland Hanson, Baptist Church (First), Des Moines, Iowa.  
Dr. E. E. Hastings, President of Presbyterian Synod, Iowa.  
Bishop Henderson, Bishop in Methodist Episcopal Church.  
Dr. Walter Rauschenbusch, Rochester Theological Seminary, New York.  
Dr. C. S. Medbury, Christian Church, Des Moines, Iowa.  
Dr. J. J. Fitzpatrick, St. Mary's Catholic Church, Marshalltown, Iowa.  
Dr. Herbert Martin, Drake Theological Seminary, Des Moines, Iowa.  
Dr. R. C. Hughes, Secretary, Educational Board of Presbyterian Church.  
Dr. B. S. Hayward, Kansas City, Mo.  
President J. A. Earle, President of Des Moines College.  
Dr. Harry D. Ward, Boston Theological Seminary, Boston.

2. Morning chapel service from 7:45 to 8:00 o'clock five mornings of the week. This service is conducted by the college chaplain with different members of the faculty usually serving as speakers. Prominent visitors to the college are sometimes heard. The attendance at this service is voluntary and usually falls between 100 and 400.

3. Churches of leading denominations in the city of Ames. The city is particularly fortunate in its churches and ministers, and large numbers of students attend such services regularly. They are encouraged to do so. Some affiliate themselves with churches while enrolled in the College. Many students are helpful in the church and its different organizations.

4. The Y. M. C. A. and Y. W. C. A. These are quartered in Alumni Hall on the campus and have paid secretaries. Last year over 85% of the young women students belonged to their association. The young men's association is well patronized. There is a Catholic Club, a Luther League, and Brotherhood of St. Andrew.

5. Bible Classes. A large number of Bible classes are conducted in fraternity and club houses once each week. Members of the faculty and senior students serve as leaders. These classes are well attended.

6. Student Pastors. Three churches now maintain student pastors at Ames. These men work in conjunction with their church and with the religious organizations on the campus. They are exerting a helpful influence.

7. Student religious services, including class prayer meetings, which are conducted entirely by the students.

#### RELATIONS BETWEEN LOWER CLASSES.

The relations between the two lower classes in this College, contrary to the long standing tradition of many higher educational institutions, have been placed upon a friendly, helpful basis. The idea of changing the attitude between the two lower classes from antagonism to friendliness has attracted considerable attention. It is hoped this will become a permanent tradition at Iowa State College. Credit for this unique action must be given to the Class of 1916. Near the close of its freshman year, in May, 1913, the following resolutions were unanimously adopted:

Whereas, it has long been a custom for varying degrees of antagonism to exist between the freshman and sophomore classes in institutions of learning; and,

Whereas, this feeling of antagonism frequently has led to violence; and,

Whereas, this traditional opposition between sophomores and freshmen is rapidly dying out in leading institutions of learning, and such opposition has no advantage but is detrimental to the best interests of the institutions and the student body; and,

Whereas, there are abundant reasons why the sophomore class should assist the freshman class in taking up new work in a strange institution, therefore, be it

Resolved, That this Class of 1916 in the Iowa State College of Agriculture and Mechanic Arts hereby expresses its emphatic disapproval of the idea of further continuing the traditional attitude of antagonism or unfriendliness between sophomores and freshmen, and records itself as favoring an attitude of friendliness and helpfulness.

We, the members of the Class of 1916, hereby pledge ourselves collectively and individually to use our best influence to prevent all acts of lawlessness or violence against members of the Class of 1917, and assert it to be our purpose to assist the members of the incoming class to become well established in their work as promptly as possible. It is our desire to hold friendly contests with the incoming class, such contests to be arranged by a joint committee; and be it further

Resolved, That the president of this class (1916) be instructed to appoint a committee of not less than thirty (30) members of this class (1916) to be known as a Freshman Reception Committee to meet freshmen on arrival prior to the opening of the college in September, and to co-operate with the Y. M. C. A. in providing for them in any way beneficial to their comfort. Members of said committee should be provided with badges and will be expected in all good faith to carry out in every possible way the letter and spirit of these resolutions.

A. Earle Holmes, President, 1916.

The members of the class faithfully lived up to their resolutions and the Class of 1917 appreciated the good treatment received at the hands of the sophomores. This class in turn adopted resolutions early in their freshmen year as follows:

Whereas, the Class of 1916 has this year adopted a new policy in respect to the relations between sophomores and freshmen and through a committee has extended assistance to members of the Class of 1917; and,

Whereas, the entire Class of 1916, the whole student body and the faculty have shown in every possible way their desire to assist members of this class to make a good start in our college work, therefore, be it

Resolved, That this Class of 1917 hereby expresses its appreciation and thanks to members of the Class of 1916 and all others for the splendid welcome and treatment we have received, and we declare it to be our purpose to reciprocate whenever opportunity offers; and, be it further

Resolved, That in harmony with action of the Class of 1916 this class goes on record as in favor of contests between the two classes and under supervision of committees duly appointed; and, be it further

Resolved, That these resolutions be spread upon the minutes of this class and the secretary is hereby directed to transmit copies to the president of the Class of 1916 and to the editor of the I. S. C. Student.

Roscoe Packer, President,

Jeannette Knapp, Secretary.

Class of 1917.

Near the close of their freshman year, in March, 1914, the members of the Class of 1917 took further definite steps in the interest of the next incoming class by adopting the following:

Resolved, That this class, having adopted a resolution of appreciation on account of the attitude of the Class of 1916 toward us, and having expressed ourselves as desiring to reciprocate, the president of the class is hereby authorized to appoint a committee of thirty-five (35) to act as a Reception Committee to members of the Class of 1918, and to carry out in good spirit the custom which is coming to be established at Iowa State College; namely: an attitude of friendliness and helpfulness between sophomores and freshmen instead of an attitude of antagonism, as has long been the rule in institutions of higher learning.

E. N. McDonnell, President, 1917.

The committee authorized by the resolution sent a cordial letter to each member of the new class besides otherwise carrying out the provisions of the class action.

#### CONTRIBUTIONS.

It is worthy of note that the student body has raised funds for especially worthy purposes on several occasions. By popular contribution they sent an old soldier to the reunion at Gettysburg. A fund was raised for the flood sufferers in Ohio.

#### WOMEN STUDENTS.

Last year there were 514 young women students. They are quartered in Margaret Hall, in a few sorority houses and in numerous other houses accommodating from 18 to 25 and under the supervision of the College. A chaperon resides in each house. Every effort is made to safeguard the health and protect the young women and promote their educational interests. The new women's dormitory is expected to accommodate about 100 young women and to be ready for occupancy after the first of January, 1915.

#### OCCUPATION OF GRADUATES.

Graduates from technical courses usually follow the line of work for which they have prepared themselves. A chief reason for this is that technical courses are hard and students do not enter them unless they really want to make use of the instruction. Often it has been said that college courses in agriculture educate young men away from the farm. The records show the contrary. Dean Curtiss has collected data regarding the occupation of 579 alumni from the Division of Agriculture from 1872 to 1913. Only 64 of these are not connected with agriculture. The remainder are connected with agriculture. For the five years, 1909 to 1913, data have been tabulated from 271 agricultural alumni whose employment is known. All but eleven of these are connected with agriculture. The largest group is engaged in farming, some are in special agricultural lines such as dairying or agricultural journalism. About one-third are teaching agriculture and a few are in agricultural experiment station work.

Professor Pew has collected data from all the 97 graduates from the Animal Husbandry course in 1910, 1911, and 1912, with the following interesting findings:

78 are farmers.

8 are college instructors and experiment station workers.

6 are teachers of agriculture in high schools.

2 are in agricultural journalism.

2 are salesmen.

1 is the expert of the Iowa Beef Producers Association.

We have not heard the criticism that engineering and veterinary students fail to follow the lines for which they are trained. The fact is that graduates from these divisions also are making good in their chosen work in all parts of the State. Naturally some graduates locate in other states. Every State institution has this experience, and it should be remembered that Iowa receives benefits from institutions in other states through probably more college graduates than she sends into other states.

The Faculty Appointment Committee reports having helped, in 1913-14, 58 graduates to secure teaching positions. Of these, 35 are in Home Economics positions; 16 are in Agriculture; 4 are in Science; and 3 are in supervisory positions. Thirty-eight of the positions are in Iowa. Minnesota took nine because of her advanced position in reference to vocational training, which is accompanied by good teachers' salaries. The salaries of the 58 appointments range from \$70 to \$150 per month.

The young men who take the two year course in agriculture almost always return to the farm. Many of them are carrying on large and important farm operations in the State.

#### NAMES OF GRADUATES.

The names of those receiving degrees and certificates during the biennium are as follows:

##### Graduates January 1, 1913.

Degree—Bachelor of Science in Agronomy.

Hugo Jordan Guerra  
Paul Clifford Taff

D. Harold Zentmire

Degree—Bachelor of Science in Animal Husbandry.

Winthrop Kellogg Dyer  
Guy E. Harmon  
Rudolph H. Hicken

Robert C. McChord  
James R. VanDeventer  
Herbert Hopkins Whitehead

Degree—Bachelor of Science in Home Economics.

Caroline Mary Dean

Carrie Elinor Lake

Degree—Bachelor of Science in Mechanical Engineering.

Edward C. Cutler  
Leland R. Miner

Carl Oscar Negaard

## Degree—Bachelor of Science in Animal Husbandry.

Max Merwyn Allender	Paul Allen Johnson
Howard Clinton Barker	Oral Harry Joy
Daniel Thomas Batchelder	Paul Frank Kriethe
Harry John Boyts	Forrest Wilkins McBride
Oran Russell Brasted	Roy Wilson McDonald
Charles Anson Burge	Harry A. McMichael
Charles Lloyd Burlingham	Harry Ward Milligan
Lloyd Elliot Burnett	Harry M. Nordstrum
Clyde Burdette Campbell	Edward Sanford Olson
Morris Earl Cochran	Roscoe C. Pollock
Roy Emery Coverdale	Bryce Alfonzo Quint
Thomas Farmer Crocker	John William Schwab
Sherman Dickinson	A. Jay Terrall
Eleazer Robert Divine	Bruce R. Vale
Valente F. Dolcini	Ralph Hammond Van Keuren
David Earl Elijah	Edward Vaughn
Howard Claude Ferguson	Harry Eugene Ward
Ray Gatewood	Jerub Harry Warner
Lester Sidney Gillette	Edward Arthur Weyrauch
Earl S. Girton	Charles E. Wheatley
Joseph B. Gratiot	Dick Grady Whitaker
Fred Eugene Hartnell	Foster W. Wilson
Earl Hilden Johnson	Leslie O. Wise
Isaac B. Johnson	Burton Henry Wormley

## Degree—Bachelor of Science in Horticulture.

Jacob Peter Anderson	Manly Secor
Clyde F. Cochran	

## Degree—Bachelor of Science in Forestry.

Hal Beck Clark	Edwin H. Steffen
Rudolph Louis Hensel	Lyle Ford Watts
Horace Ives Ringheim	

## Degree—Bachelor of Science in Agricultural Engineering.

William Wallace Ashby	Manly Alexander Raymond
James Arentson	Kelley
Ralph Upshaw Blasingame	James Byron Kelley
Carl Richard Hoff	Ralph T. Vincent
James C. Olsen	Wesley W. Warsaw
	Donald S. Wormley

## Degree—Bachelor of Science in Agricultural Education.

Shirley Marker Hackett	Arthur Floyd Scott
------------------------	--------------------

## Degree—Bachelor of Science in Science and Agriculture.

Luke J. Baxter
----------------

## Degree—Bachelor of Science in Home Economics.

Willa Tirrill Richardson	Gladys Bonner
Helen D. Gage	Lena Fay Thompson
Faith Fenton	Lila Wygle
Iva Adeline Beatrice Fuchs	Jennie F. Mitchell
Marie Hanson	Nellie R. Patterson
Georgena Hawks	Helen White
Edna May Arthur	Leila Huebsch
Lilla M. Voss	Forrest Fern Rush
Edna E. Prine	Eunice Ethel Woody
Blanche Hopkins	Miriam Hood Wills
Edna Tong	Clara Hanson
Callie May Bliss	Zelma Zentmire

## Degree—Doctor of Veterinary Medicine.

Forest Ward Cairy	Ralph J. Laird
Roy Glenden Ross	Bernard L. Doyle
Harry W. Hall	Herman H. Jonker
Royal F. Nordstrum	Carl Francis Neis
Chris E. Juhl	Harold Eugene Johnston
Arthur C. Swanson	Robert Gorden Moore
David B. Wilson	Harry C. Paine
William Edward Macklin	Glenn Darbyshire
Charles Dobbs Rice	Lewis F. Doty
Frank V. Helsel	Nathaniel S. Nutty
Percy Lester Ellis	Charles Purl Wilson

## Degree—Bachelor of Science in Mechanical Engineering.

Harry Prentice Allstrand	Raymond B. Reis
Myton M. Bonsteel	Raymond R. Rogers
Benjamin Jones Egert	Cornelius G. Sauerberg
Clifford H. Glaze	Ferdinand Edward Schmidt
Virgil W. Hale	James K. Shallenburger
Frank Alois Hill	Fred E. Triggs
Reuben Kuempel	Leon Joseph Wells
Ichabod A. Lawton	Fred T. Whiting
Robert Nathaniel McKitterick	Floyd Everett Worley
S. Oscar Nelson	G. Edward Wray

## Degree—Bachelor of Science in Civil Engineering.

Herbert Miller	Wayne Wilson
J. Raymond Johnston	Ivan Emery Trottnow
Harvey B. Armour	William Neil Adams
Merle Cadwell Tyler	Frank Alexander Mosher
William F. Cochrane	Leo C. Vader
Curtiss D. Weller	Adelbert Estey Wallace
Jacob Butler Sullivan	John A. Illeman
Boyd H. Tong	John Richard Hamm
Perry Judson Preston	W. Earl Barker
John Henry Schwertley	Levi Sabin Gates
Everett Harrold Frazier	Harry Clyde Hunter

## Degree—Bachelor of Science in Civil Engineering—Continued.

Joseph Pickus	Harry M. House
Mark O. Chamberlain	Amos Melberg
Rudolph Martin Evans	David Eugene Adams
Edwin Monroe Westbrook	Charles Capper
Orville W. Crowley	Homer X. White

## Degree—Bachelor of Science in Electrical Engineering.

Seth A. Brown	Don H. Kilby
Paul Spencer Clapp	Everett Flint Knight
Glenn L. Conlee	Claude H. Mott
Harold E. Conlee	Frank Roberson
Arthur E. Hartung	Joseph James Shoemaker
Denver Wayne Hoot	Earle R. Thornburg
Albert Lynn Hopkins	Joseph N. Walton
Paul R. Howland	Harry F. Good
Claron B. Hutchison	

## Degree—Bachelor of Science in Mining Engineering.

Lyle Alden Butler	Arthur Ware Hess
Alva Jesse Crawford	Raymond Layton Hurst
Clifford King Clark	

## Degree—Bachelor of Science in Ceramics.

Hans Christian Pfund

## Degree—Bachelor of Science.

Myrtle McDonald	Edward Sawtelle Welles
Elizabeth McKim	Clyde Houghton Lissenden
Ruby Moss Lynch	Leona Peshak
Anna Marie Wolfe	William R. Tydeman
Ruby H. Hopkins	Elizabeth Deacon
Mildred Cady Walls	Mary Georgeanna Miller

## Graduates February 6, 1914.

## Degree—Bachelor of Science in Agronomy.

Harlan W. Johnson	Polcarpo Garza
-------------------	----------------

## Degree—Bachelor of Science in Animal Husbandry.

J. Fernando Grass	Paul F. McLean
Paul E. Levson	

## Degree—Bachelor of Science in Forestry.

J. Clifford Sterret

## Degree—Bachelor of Science in Horticulture.

Virgil P. Johnson

## Degree—Bachelor of Science in Civil Engineering.

Leroy D. Snyder

## Degree—Bachelor of Science.

Iva B. Fuchs

## Graduates June, 1914.

## Degree—Bachelor of Science in Agricultural Education.

Lewis K. Bennett

Ross Paul White

Milton Elwood Scandrett

## Degree—Bachelor of Science in Agricultural Engineering.

Edgar V. Collins

William G. Kaiser

George Le Roy Costigan

Emil W. Lehmann

Fred. C. Fenton

Charles A. Norman

Harry Frank Good

Frank Stuart Rodger

Clyde I. Griffith

Arthur W. Schultz

Arthur Henry Hoffman

Claude Kedzie Shedd

Milton H. Hoffman

Earl George Welch

George W. Iverson

## Degree—Bachelor of Science in Agronomy.

Frank Vail Farr

Wallace W. Reynolds

Fred L. French

Ola Evertt Rider

Howell E. Gholson

Luman P. Sewell

Fred R. Glassburner

A. Lee Smith

Luis S. Gonzalez

Robert Nelson Spencer

Ross McKinney Gridley

Clay William Stafford

Ward Vladimir Gousseff

Herman Steen

C. Wayne Hammans

Harold E. Stone

Earl S. Haseltine

Ralph J. Sunderlin

## Degree—Bachelor of Science and Animal Husbandry—Continued.

Aubrey J. Swift	John Higgins Warburton
Theron A. Thornburg	E. Harry Watsabaugh
Orville C. Ufford	Russell Webb
Harry J. Venning	Edwin C. Wetherbee
Harley Walker	

## Degree—Bachelor of Science in Chemical Engineering.

Edwin John Hull	Lidmil Leo Palda
-----------------	------------------

## Degree—Bachelor of Science in Civil Engineering.

Earl Capel	Vernon S. Lawrence
Allen Howard Connolly	Frederick John Longer
Frank D'Autremont	Lisle Nicholson
William Henry De Butts	Henry M. Noel
William Livingstone Fahey	Lee S. Packman
Charles M. Fisher	Frank D. Pearce
Field Bradford Forbes	Donald De Witt Rait
Joseph A. Goodbarn	William Alfred Reeves
Liono Leslie Grand Pre	Paul Bilsborough Reis
Ole G. Herm	Vernon Harrison Roller
Robert S. Johnson	Fred Sarvis
Robert Tillman Johnson	Russell A. Smith

## Degree—Bachelor of Science in Dairying.

Fayette Clifton Barney	Guy Lee Noble
Arthur F. Carlson	Harry E. Ritter
Willoughby A. Lee	Edward J. Shima
Hugh M. Linn	Verner H. Stork
John Albert Luithly, Jr.	Thomas Henry Wright, Jr.

## Degree—Bachelor of Science in Electrical Engineering.

Edgar M. Bouton	Irving Eugene Loveland
John Henry Brumhall	Edgar Eugene Martin
Guy Chatburn	Robert Horace Milner
Harry K. Davis	Earle Glenn Nichols
Glenn Gladstone Hoskins	James Bruce Patterson
William John Hudson	Harry B. Porter
Lauren Everett Hulse	David Roy Scott
Charles Neff Hutchinson	George R. Shaw
Charles Edward Ide	Lloyd G. Swanson
Carl Voigt Kriechbaum	Claire H. Webster

## Degree—Bachelor of Science in Forestry.

Willard Claire Hassel	Serrin S. Van Boskirk
Ralph W. Hayes	Ernest T. Wolf
William Max Nagel	Ray M. Wolven
Robert G. Schreck	

## Degree—Bachelor of Science in Home Economics.

Alice Bortine Anderson	Frances Laffer
Jessie Campbell	Marjorie Townsend McIntosh
Ruth Cessna	Grace Mae Martfeld
Grace Marie Conlon	Margaret Niles
Elsie Myrtle Corwin	Mary Margaret Nordstrom
Charlotte Dryden	Mabel Clare Parsons
Helen Margaret Flint	Mabel C. Peters
Lura Mae Fogleman	Ilma G. Pitts
Helen Dean Frink	Beth Pryor
Dorothy May Gallivan	Emma Reno
Edna Murray Garvin	Mildred Reynolds
Maude Lillian Guthrie	Clara Irene Shinkle
Irene E. Hagglund	Ellen Skegg
Eleanor Marie Hallock	May Blanche Statler
Florence Jensen	Maisie Gail Stephenson
Laura Lucinda Jones	Lora Kristine Thompson
Kate Esther Kerr	Mary Elizabeth Vaughn
Lucy Kimball	Ruth Vincent
Mabel Fay Kingsbury	Helen Ames Wentworth
Mayme Kirkpatrick	Jessie Witmer
Marian Hermine Knapp	Maude Campbell

## Degree—Bachelor of Science in Horticulture.

Wayne W. Downing	Frank Drew Millar
Ellis L. Kirkpatrick	Edward Esher Smith

## Degree—Bachelor of Science in Mechanical Engineering.

Donald Shearon Barry	Paul V. Miller
Elmer H. Borg	Harry J. Renken
Earl F. Borg	Ralph Ewing Reuling
Earl F. Bragg	Raymond A. Schreiber
Robert C. Campbell	Herbert Sigfrid Selindh
Herbert Edwin Freund	Carl Wesley Stookey
Charles Henry Hartnell	Harlan Edward Tracy
William John Hudson	Morris B. Wilder
George Simon Lafrentz	J. Ora Winchell
Walter Garfield Madison	

## Degree—Bachelor of Science in Mining Engineering.

Elmer August Almquist	George Thomas Wright
Emil James Kratoska	

## Degree—Bachelor of Science.

George W. Baker	Madge Elliott
Berenice Lillian Blake	Annie Elizabeth Farnum
Bernice Lucian Bradford	Frances D. George
Dorothy Childs Cross	Merrill Milo Manning
Cleo Grace Day	Helen Tabitha Osler
Maude M. Donohue	Blythe Viola Victoria Poage

## Degree—Bachelor of Science in Veterinary Medicine.

Clayton L. Crider  
Ecson Lee Finley  
Harry A. Gamrath  
Clifford Meron Gilchrist  
Charles Henry Haggard  
Howard C. Johnson  
Thomas Seeter Leith  
Harry Winter Paxton

Crittenden Ross  
Karl William Schalk  
Fred W. Shinn  
Mark Speaker  
Mulford Dell Studebaker  
Rollin Mathias Thomas  
Irl Donaker Wilson  
Logan Alexander White

## Degree—Master of Science in Agriculture.

Kenneth Cole Ikeler

## Degree—Civil Engineer.

Charles William Okey  
William Japhia Schlick  
Wilbur M. Wilson  
Louis D. Kelsey  
Wilbur L. Fulton

Ray Floyd Weirick  
Tansey Radford Agg  
Roy Winchester Crum  
Ralph Z. Kirkpatrick  
Charles Sabin Nichols

## Degree—Mechanical Engineer.

Frank S. Vincent  
Jesse Greenleaf Hummel  
Oscar Anton Olson

George G. Dana  
Peter M. King

## Degree—Chemical Engineer.

Edward N. Eaton

## Degree—Electrical Engineer.

Wilson Lee Campbell

Morris E. Packman

## Degree—Agricultural Engineer.

Leon Wilson Chase

## Degree—Doctor of Science.

George L. McKay

James Wilson

The following table shows the number of degrees granted in the different courses during each year of the biennium, and total number of degrees granted up to June 30, 1914:

Summary of Graduates.

	1912-13	1913-14	Grand Total to June 30, 1914
Number of first degrees granted.....	250	258	3,401
Present Courses			
Agricultural Education .....	2	3	5
Agricultural Engineering .....	10	15	31
Agronomy .....	19	18	127
Animal Husbandry .....	54	58	334
Ceramics .....	1	0	5
Chemical Engineering .....	0	2	2
Civil Engineering .....	37	25	555
Dairying .....	12	10	66
Electrical Engineering.....	17	20	380
Home Economics .....	26	42	128
Forestry .....	0	8	8
Horticulture and Forestry.....	8	0	51
Horticulture .....	0	5	5
Industrial Chemistry .....	0	0	2
Industrial Science .....	13	14	508
Mechanical Engineering .....	23	19	322
Mining Engineering .....	5	3	53
Science and Agriculture.....	1	0	3
Veterinary Medicine .....	22	16	291
Courses Discontinued			
Agricultural Course, leading to Degree B. S., 1872-1880.....			102
Agricultural Course, leading to Degree B. S. A., 1883-1888 and 1894-1904.....			86
Science and Agriculture Course, leading to Degree B. S., 1889-1890 and 1909-1911			47
General Science Course for Ladies, 1872-1880 and 1904 .....			48
General and Domestic Science Course, leading to Degree of B. S., 1887-1899..			93
General and Domestic Science Course, leading to Degree of B. Ph., 1899-1900.			21
General and Domestic Science Course, leading to Degree of B. S., 1901-1908...			78
Agronomy Course, leading to Degree B. Ag., 1891-1898 .....			50

## Higher Degrees—

Master of Science in Agriculture.....	0	1	56
Master of Science.....	1	0	42
Other Master Degrees.....	5	0	16
Engineers .....	6	19	81
Honorary Degrees .....	0	2	14
Advanced Degrees in Veterinary Medi- cine .....	0	0	4

## THE TEACHING STAFF.

The College faculty is composed of the president, full professors and associate professors. It is the legislative body of the institution. Each division has its faculty, which is the legislative body for that division. All faculty actions are within lines established by the Board of Education or are subject to approval by the Board.

The following changes in the personnel of the staff occurred during the biennium:

## RESIGNATIONS.

*Professors, Associate Professors, and Assistant Professors:*

Professor A. V. Storm, Head of the Agricultural Education Department, resigned to accept a position with the University of Minnesota. Professor B. H. Hibbard, Head of the Department of Economics, resigned to accept a position with the University of Wisconsin. Associate Professor John Piper Watson, Director of Physical Training, resigned to accept a position with the State University of Iowa. Assistant Professor A. S. Thompson and Mrs. A. S. Thompson resigned as Director and Vice-Director of the Music Department, respectively, to accept similar positions elsewhere. Associate Professor E. N. Wentworth of the Animal Husbandry Department resigned to accept a position on the editorial staff of the *Breeders' Gazette*. Professor A. MacMurray, Head of the Public Speaking Department, resigned to accept a similar position with the University of Kansas. Other resignations were as follows: Assistant Professor C. O. Alexander of the Agricultural Engineering Department; Assistant Professor Nelson C. Brown of the Forestry Department; Associate Professor Lola A. Placeway of the Chemistry Department; Associate Professor A. H. Hoffman of the Physics Department; Assistant Professor Arden R. Johnson of the Chemistry Department; Assistant Professor Walter Henry Cooper of the Dairy Department; Professor Willard John Kennedy of the Animal Husbandry Department transferred to the Agricultural Extension Department as Temporary Director, later resigned.

## DEATHS.

There was one death in the instructing staff. Mr. Clyde F. Cornwall, who held a teaching fellowship in the Department of Bacteriology, died January 5, 1914, from heart failure following too strenuous physical exercise.

## LEAVES OF ABSENCE.

Professor A. A. Bennett, Head of the Department of Chemistry, who served until the close of the college year 1912-13, following a service of twenty-eight years in this College and four years additional of college teaching, was given leave of absence with part salary for one year and without salary thereafter. During four years of the period at Ames he held the position of Professor of both Chemistry and Physics. Professor Bennett has rendered valuable service to the College and to the State.

Assistant Professor Ward M. Jones was granted leave of absence for one year without salary so that he might take up the work of Secretary of the Alumni Association. Associate Professor C. C. Fowler of the Chemistry Department was granted leave of absence for one year to enable him to complete his graduate work for the doctor's degree. Associate Professor I. A. Williams of the Mining Engineering Department was granted leave of absence for one year from September 1, 1912. Miss Jessie Mildred MacLean is absent on account of sickness.

## APPOINTMENTS.

*Professors, Associate Professors, and Assistant Professors:*

- Honorable James Wilson, Emeritus Professor of Agriculture. M. S. A., Iowa State College, 1907; LL. D., University of Wisconsin, 1904; LL. D., University of Edinburgh, 1913; D. Sc., Iowa State College, 1913; Secretary, U. S. Department of Agriculture, 1896 to 1912.
- George Melvin Turpin, Professor of Poultry Husbandry. B. S. in Agr., Utah Agricultural College, 1909.
- Guy Mitchel Wilson, Professor of Agricultural Education and Director of the Summer Session. A. B., Indiana University, 1900; M. A., 1908.
- Allen H. Kimball, Associate Professor of Structure Design, in charge of Department. B. L., University of California, 1910; B. S., Massachusetts Institute of Technology, 1912; M. S., 1913.
- H. B. Munger, Professor of Farm Management. B. S., Cornell University, 1912.
- Jaffrey C. Harris, Associate Professor of Music and Head of Department. A. B., Cornell University.
- Amos Peaslee Potts, Associate Professor of Ceramics in the Mining Engineering Department. Ceramic Engineer, Ohio State University, 1912.
- George Chester Morbeck, Assistant Professor of Forestry. B. S. in Forestry, Michigan Agricultural College, 1904.
- Ernest Muchmore Mervine, Assistant Professor of Agricultural Engineering. M. E., Lehigh University, 1909.
- Charles Byron Williams, Assistant Professor of Agricultural Economics in the Department of Economics and Social Science. A. B., University of Chicago, 1900.
- George Ernest Hesse, Assistant Professor of English. B. A., Ohio State University, 1910; A. M., Columbia University, 1912.
- George Henry Von Tungeln, Assistant Professor of Rural Sociology in the Department of Economics and Social Science. Ph. B., Central Wesleyan College, 1909; M. A., Northwestern University, 1910.

- Arthur William Rudnick, Assistant Professor of Dairying. B. S., Iowa State College, 1910.
- George Waddel Snedecar, Assistant Professor of Mathematics. B. S., University of Alabama, 1905; M. A., University of Michigan, 1912.
- Louis Agassiz Test, Associate Professor of Chemistry. B. M. E., Purdue University, 1894; A. C., 1896; Ph. D., University of Chicago, 1907.
- John Anderson Wilkinson, Assistant Professor of Chemistry. B. Sc., Ohio State University, 1903; Ph. D., Cornell University, 1909.
- Raemer R. Renshaw, Assistant Professor of Chemistry. B. S., University of Oregon, 1902; M. S., 1903; Ph. D., Columbia University, 1907.
- T. Radford Agg, Assistant Professor of Civil Engineering. B. S. in E. E., Iowa State College, 1905.
- Harrison B. Kinney, Assistant Professor of Soils. B. Sc., Drake University, 1911.
- George Arthur Chaney, Assistant Professor of Mathematics. M. S., Highland Park College, 1906; M. A., University of Wisconsin, 1910.
- Ned A. Merriam, Assistant Professor in Physical Training.
- Henry William Vaughan, Assistant Professor of Animal Husbandry. B. Sc. in Agr., Ohio State University, 1908; M. Sc. in Agr., 1909.
- Clyde McKee, Assistant Professor of Farm Crops. B. S. in Agr., Kansas State Agricultural College, 1910.
- Sidney Longman Galpin, Assistant Professor of Geology in the Department of Mining Engineering and Geology. A. B., Western Reserve University, 1907; A. M., Cornell University, 1910; Ph. D., 1912.
- Arthur Tabor Jones, Assistant Professor of Physics. B. S., University of Chicago, 1899; Ph. D., Clark University, 1913.
- Rudolph Ray Bolton, Assistant Professor of Practice and Diagnosis in the Division of Veterinary Medicine. A. B., Ohio University, 1909; D. V. M., Cornell University, 1912.
- Arden Richard Johnson, Assistant Professor of Chemistry. B. S., Chem. Eng., University of Wisconsin, 1906; M. S., 1908; Ph. D., 1911.
- Orren Lloyd Jones, Assistant Professor of Animal Husbandry. B. S., University of Wisconsin, 1908; M. S., 1911; Ph. D., 1913.
- Grace Schermerhorn, Assistant Professor in charge of Practice Teaching in Home Economics in the Agricultural Education Department. B. S., Columbia University, 1912.

#### PROMOTIONS.

*Vice-President, Deans, Professors, Associate Professors, and Assistant Professors in Collegiate Work:*

- Edgar Williams Stanton appointed as Vice-President of the College. (In addition to other duties.)
- Catherine J. MacKay from Professor of Home Economics to Acting Dean of the Division of Home Economics.
- Robert Earle Buchanan appointed as Acting Dean of the Division of Industrial Science. (In addition to other duties.)
- William Wallace Dimock appointed as Vice-Dean of the Veterinary Division. (In addition to other duties.)

- William Harper Pew from Associate Professor to Professor of Animal Husbandry and Head of Department.
- Winfred Forrest Coover from Associate Professor to Professor of Chemistry.
- John Edward Brindley from Associate Professor to Professor of Economics.
- Harold Edward Bemis from Associate Professor to Professor of Veterinary Surgery and Obstetrics.
- Howard Sylvester Murphey from Associate Professor to Professor of Veterinary Anatomy and Histology.
- John Edward Kirkham from Associate Professor to Professor of Structural Engineering in the Civil Engineering Department.
- Everett Edgar King from Associate Professor to Professor of Railway Engineering in the Civil Engineering Department.
- Gilmour Beyers MacDonald from Associate Professor to Professor of Forestry.
- Maria M. Roberts from Associate Professor of Mathematics to Professor of Mathematics.
- Clyde Williams from Athletic Coach to Professor of Physical Training.
- Percy Edward Brown from Assistant Professor to Associate Professor of Soil Bacteriology.
- Harold Criswell Bartholomew from Assistant Professor to Associate Professor of Electrical Engineering.
- Henry Dale Bergman from Assistant Professor to Associate Professor of Veterinary Physiology and Pharmacology.
- Julia Trueman Colpitts from Assistant Professor to Associate Professor of Mathematics.
- Morris Irwin Evinger from Assistant Professor to Associate Professor of Civil Engineering.
- Evan F. Ferrin from Assistant Professor to Associate Professor of Animal Husbandry.
- Chester Charles Fowler from Assistant Professor to Associate Professor of Chemistry.
- George Andrew Gabriel from Assistant Professor to Associate Professor of Industrial Chemistry.
- Joseph Edward Guthrie from Assistant Professor to Associate Professor of Zoology.
- Andrew R. Hackett from Assistant Professor to Associate Professor of Physical Training.
- Bernard W. Hammer from Assistant Professor to Associate Professor of Dairying.
- Ward Murray Jones from Assistant Professor to Associate Professor of Mathematics.
- John Nathan Martin from Assistant Professor to Associate Professor of Botany.
- Ruth E. Michaels from Instructor to Associate Professor of Home Economics.
- Charles Murray from Instructor to Associate Professor of Veterinary Pathology and Bacteriology.

Roy Hiram Porter from Assistant Professor to Associate Professor of Mechanical Engineering.

Amos Penslee Potts from Assistant Professor to Associate Professor of Ceramics.

William Randolph Raymond from Assistant Professor to Associate Professor of English.

Arthur Laurence Bakke from Instructor to Assistant Professor of Botany.

Winifred Sarah Gettemy from Instructor to Assistant Professor of Home Economics.

Bruce Magill Harrison from Instructor to Assistant Professor of Zoology.

William Roy Hechler from Instructor to Assistant Professor of Farm Crops.

John Hug from Instructor to Assistant Professor of Mechanical Engineering.

William Kunerth from Instructor to Assistant Professor of Physics.

Jesse Mildred MacLean from Instructor to Assistant Professor of English.

Frank D. Paine from Instructor to Assistant Professor of Electrical Engineering.

Herbert John Plagge from Instructor to Assistant Professor of Physics.

Frank Anson Robbins from Instructor to Assistant Professor of Electrical Engineering.

Ruth B. Safford from Instructor to Assistant Professor of English.

Fredrica Von Trice Shattuck from Instructor to Assistant Professor of Public Speaking.

Phineas Stevens Shearer from Instructor to Assistant Professor of Animal Husbandry.

Ross Madison Sherwood from Instructor to Assistant Professor of Poultry Husbandry.

Roland Schanel Wallis from Instructor to Assistant Professor of Civil Engineering.

Samuel Eugene Conybeare from Assistant to Assistant Professor of Agricultural Journalism.

*Professors, Associate Professors, and Assistant Professors in Sub-Collegiate Work:*

Jules Cunningham from Assistant Professor to Professor of Horticulture and Botany.

Mark G. Thornburg from Assistant Professor to Associate Professor of Animal Husbandry.

Henry Louis Eichling from Instructor to Assistant Professor of Agronomy.

Esther Lieper Cooper from Instructor to Assistant Professor of English.

Paul Revere Lisher from Instructor to Assistant Professor of Animal Husbandry.

Frederick L. Overly from Instructor to Assistant Professor of Horticulture and Botany.

Mogens Rasmussen Tolstrup from Instructor to Assistant Professor of Dairying.

The number and rank of teachers of all grades in collegiate work in the years 1912-13 and 1913-14 are indicated by the following tables:

1912-13

	Deans	Professors	Associate Professors	Assistant Professors	Instructors	Assistants	Part time Instructors	Fellows and Scholars
Agriculture -----	1	10	5	6	6	1		
Agricultural Engineering -----		1	1	1	3			
Engineering -----	1	4	10	9	15	1		
Home Economics -----		1	1	1	4			
Science -----	1	10	9	17	33	4		
Veterinary Medicine -----	1	1	2	2	2			
Total -----	4	27	28	36	63	6		

1913-14

Agriculture -----	1	12	5	13	8	2	1	3
Agricultural Engineering -----		1	1	1	4			1
Engineering -----	1	6	12	12	10	1		
Home Economics -----	1		2	1	8			
Science -----	1	11	10	21	28	12	4	2
Veterinary Medicine -----	1	3	2	1	1	2		
Total -----	5	33	32	49	59	17	5	6

Standing committees of the College faculty include the following: Advanced Standings and Substitutions, Appointments, Course of Study, Dates of Events, Entrance Requirements and Secondary School Relations, Fraternities, Graduate Study, Grounds and Buildings, Library, Literary Societies, Moral Welfare, Publicity, Public Health, Public Safety, Public Service, Rules, Scholarship, Student Accommodations, Student Social Life, Thesis, and Tuition Scholarships. Special committees are appointed as occasion requires. Student co-operative members, selected by the different classes, are associated with the faculty committees on Grounds and Buildings, Moral Welfare, Publicity, Public Health, Public Safety, and Public Service.

It is an unfortunate fact that many of the teachers in this College are much overworked. In the year 1912-13 the situation in three departments in the Division of Science, as reported by the Dean of the Division, was as follows:

Department	Enrollment 1912-13	Number of Instructors	Number of students per Instructor	Maximum No. each Instructor can handle to advantage	Number of Instructors required
English .....	926	9	103	60	16
Chemistry .....	229	14½	84	30	24
Mathematics .....	677	8	85	60	11

Remarks: Classes in English recite two and three hours per week. Classes in Chemistry recite two and three hours per week, but have in addition a large amount of laboratory work. Classes in Mathematics recite three and five hours per week.

In the year of 1913-14 the head of the Physics Department submitted data which showed the excessive amount of work required of teachers in his department. Data were shown from twenty-one leading universities and colleges in the United States. The average showed that one instructor cared for 42.5 students or 313 credit hours. At this college the average instructor in the Physics Department cared for 108 students or 532 student credit hours. It is needless to pretend that we can give as good work as our students should enjoy when members of the teaching staff are overloaded as these figures indicate.

In numerous departments at the beginning of the last biennium it seemed that the teachers were doing as much work as could be fairly expected of them but they have cheerfully and generously taken on additional numbers of students, and this largely has made it possible for the institution to show an increased attendance in two years of nearly 700. I have no hesitation in saying that at many other institutions a large part of these students would have been turned away with the statement that there were not enough teachers to instruct them.

#### SALARIES.

The salaries of members of our faculty and investigating staff were increased at the beginning of the year 1913-14 by reason of the increased appropriations made by the last General As-

sembly, but in many cases the salaries are yet below what they should be. The following is a comparison with the corresponding branches of work in the University of Illinois:

University of Illinois.

	Agriculture		Engineering		Liberal Arts and Science		Law	
	Number	Salary	Number	Salary	Number	Salary	Number	Salary
Professor -----	15	\$ 3,713	14	\$ 3,803	38	\$ 3,330	6	\$ 3,433
Associate Professor -----			1	3,000	8	2,825		
Assistant Professor -----	14	2,628	19	2,286	28	2,378		
Associate -----	33	1,866	14	1,771	19	1,684		
Instructor -----	28	1,453	49	1,456	53	1,351		
Assistant -----	29	1,107	13	1,034	21	1,010		
Total -----	119		110		167		6	

Iowa State College.

(For the Year 1914-1915.)

	Agriculture		Engineering		Science		Veterinary Medicine	
	Number	Salary	Number	Salary	Number	Salary	Number	Salary
Professor -----	16	\$ 2,735	6	\$ 2,817	10	\$ 2,690	4	\$ 2,375
Associate Professor -----	13	1,886	13	2,016	17	1,744	2	1,950
Assistant Professor -----	11	1,668	10	1,430	14	1,407	1	1,800
Instructor -----	21	1,297	13	1,039	37	1,067		
Assistant -----	1	1,000			6	882	2	1,200
Total -----	62		42		84		9	

It will be seen that the average difference in leading positions of corresponding rank is about \$1,000 per year in favor of the teachers in Illinois.

In this College it frequently happens that a graduate student secures a position at a better salary than the instructors who taught this student themselves receive.

It would be an advantage if we could establish minimum salaries for different grades of teaching service as follows: Full professors, \$2,750; associate professors, \$2,250; assistant professors, \$1,600; instructors, \$1,000; assistants, \$800.

Low salaries are compensated for to a very small degree by a policy of allowing traveling expenses for members of the faculty when attending scientific meetings which they may do to the advantage of the college. These trips are in addition to necessary official trips, such as to investigate buildings or educational policies elsewhere or to accompany classes of students on educational trips. The following statement shows the amounts expended in the last College year for traveling expenses for different purposes outside of extension work, experiment station work, and hog cholera serum work.

To accompany classes.....	\$ 706.70
For interviews with candidates.....	450.49
To buy live stock and supplies.....	121.12
To attend scientific meetings, etc.....	2,751.77
To study methods at other colleges.....	423.52
Part compensation for services.....	61.37
Buildings inspections and to consult architect.....	63.72
International Live Stock Exposition and Fairs.....	342.99
Miscellaneous .....	334.17
Total .....	\$5,255.85

It will be noted that the amount expended on account of attending scientific meetings, etc., is only \$2,751.77 or an average of less than \$14 per teacher. It is believed that this small amount gives more satisfaction to the faculty and larger returns to the State as it is being used than if it were added to the salary payments.

The American Association of Agricultural Colleges and Experiment Stations has approved a plan, which it is hoped may be worked out with the co-operation of the United States Department of Agriculture, whereby members of agricultural faculties who are entitled to sabbatical leave of absence may combine this absence with a study along their special line in some foreign country for a period from a few months to a year. Under this plan the college would continue to pay a part or all of the salary during the absence and the Federal government would pay expenses and any appropri-

ate supplementary salary. It is believed that such trips would prove of great benefit to the institutions represented and they would do much to strengthen the spirit of loyalty on the part of the faculty.

#### RETIRING ALLOWANCES.

The Legislature of Iowa has taken the necessary steps for a legislature to secure pension benefits from the Carnegie Foundation. The Board of Education has done its part. But pensions are not as yet provided. Much might be said upon this subject. Criticism has been made of late, by persons whose opinions must be respected, to the effect that the State of Iowa should provide the small sum necessary to give retiring allowances to teachers who deserve this recognition, rather than ask for such aid from another source. The Legislature has gone on record as desiring to have a pension system. It is well known that college teachers are poorly paid, and the fact is evident to many who are closely in touch with the situation that efficiency of a college teaching staff is seriously affected when teachers who should no longer be in service are continued in service, as is now the practice and will certainly remain the practice until some appropriate plan is put into operation to care for them at least in part.

This subject has been thoroughly studied by Dean Eugene Davenport of the University of Illinois, and he has shown that an institution with a given amount of money for salary payments will secure larger and better returns if it sets aside a small portion of this fund to be used for retiring allowances and requires full and efficient service from all persons on the salary roll. In other words, a faculty made up entirely of strong, vigorous teachers, whose total salary payments amount to a given sum, is more efficient than a faculty including a few who have passed their period of efficiency, though this latter faculty receives a larger amount in salaries.

It is urgently recommended that provision be made by the legislature whereby a reasonable proportion of funds available for salaries may be set aside by the Board of Education annually for use as retiring allowances as the Board of Education may determine, the benefits to be extended to those who have served long and faithfully, and, to a limited extent, to their dependents.

## COLLEGIATE WORK.

---

In 1911 a circular was issued by the United States Bureau of Education in which it was attempted to classify universities and colleges with reference to the value of their educational work. Class I includes many of the leading institutions of the country. Its definition is as follows: "Institutions whose graduates would ordinarily be able to take the Master's Degree at any of the leading graduate schools in one year after receiving the Bachelor's Degree without necessarily doing more than the amount of work regularly prescribed for such high degree."

In accordance with this definition, Iowa State College of Agriculture and Mechanic Arts may be included in the Class I list with her corresponding sister institutions in the adjoining and more distant states.

Through action of the Board of Education, steps have been taken to establish profitable co-operative arrangements between the State College of Agriculture and Mechanic Arts and other universities and colleges of the State, whereby students may take three years of work in the other institution, then two years of technical work at this College, a total of five years in the two institutions, and receive a degree from each. It is believed this arrangement will be profitable on both sides. It will, for example, permit many young men interested in agriculture or engineering to take their preliminary foundation work, which is mostly covered by our freshman and sophomore years, in another institution of their choice, and come to Ames for the two years work which are given to juniors and seniors. This will tend to lessen the number of students in the lower classes in this College and may benefit some by permitting them to take a part of their college work nearer home or in an institution favored by themselves or their parents for any reason, and it will relieve the other institution of the necessity of duplicating the expensive equipment provided here by the State for giving technical instruction. The five years of work should result in a course somewhat stronger along so-called cultural lines than

a four-year course in this College. It has an advantage also in leading to a degree from each institution. The plan depends upon a thorough understanding between the two institutions, whereby each is willing to accept the work of the other, and under which the courses will be worked out jointly so that there will be no question concerning the work in one institution fitting that given to the student at the other place. Co-operative arrangements are now under consideration with several institutions.

Steps have been taken to bring the different divisions of this College into closer relations by providing for visiting committees in the different division faculties to attend meetings of other division faculties. There has been some embarrassment because important subjects in courses of study leading to a degree are not represented in the division faculty in immediate charge of that degree. For example, the botany department has not been represented in the agricultural faculty, and the department of mathematics has not been represented in the engineering faculty. Both botany and mathematics are taught in departments in the Division of Industrial Science. Physics has not been represented in the home economics faculty or agricultural faculty, although it is an important subject in agricultural and home economics courses. The physics department is included in the Division of Engineering, where most of its work is required. Under the new plan, each division is represented by a committee of three of its teachers in each other division faculty. Further progress along this line is being considered with the hope that a plan may be developed which will bring together representatives of all departments or divisions which give important instruction leading to any degree, in the faculty which is primarily in charge of that degree.

The State Board of Examiners is charged with important duties in connection with the supervision of teachers. The State College is not represented in the membership of the Board. As a considerable number of students from this College enter the teaching profession, and it is highly desirable that they should do so, it would seem that this College should be represented on the Board, together with the State University and the State Teachers' College. It is believed that the State law should be amended to so provide.

It may be well here again to emphasize that the national Land Grand Act of 1862, under which this College is founded, provides in no uncertain terms for collegiate grade of instruction in agriculture, engineering, and all other lines of work included in our cur-

riculum. The Land Grant Act does not exclude other and lower grades of educational work, but in various ways it specifically provides for collegiate work. As late as 1890 the author of the law, Hon. Justin S. Morrill of Vermont, wrote that he hoped no effort would be successful in reducing a land grant institution below the rank of a college, and he continued, "It was of course intended by giving the lead to Agriculture and the Mechanic Arts to enable the sons of farmers to obtain an education to fit them as farmers or for any other vocation which they might choose. It was hoped to be particularly valuable to the industrial classes but it was never intended to exclude education of the highest dignity."

From time to time even now, the question is raised as to whether land grant colleges are expected to do collegiate work. It is pointed out by some critics that as they are to serve the industrial classes it must be that Congress intended them to do a lower grade of work. As if the industrial classes are not entitled to the best! Farmers and mechanics chiefly make up our industrial classes. Thus far in our history the industrial classes have contributed the most important part of the learned men of the country. A better interpretation of the law would be that Congress wished to place the best educational facilities at the disposal of the great bulk of our population instead of having these advantages limited to comparatively few who are well to do or who might have special help in securing an education in a private institution.

This national law provides for a college where the leading object is to be to teach such branches of learning as are related to agriculture and the mechanic arts. This college teaching must be done to promote the liberal and practical education of the industrial classes in the several pursuits and professions of life. This is called for by the national law and with the addition that it is to be without excluding other scientific and classical studies and that it is to include military tactics.

Collegiate work was started at land grant colleges in many States, both in agriculture and mechanic arts, under the provisions of this national law. The situation was well known in Congress when section 4, which refers to the grade of instruction, was amended in 1883. If Congress had wished to lower the grade of work in agriculture or mechanic arts from the collegiate grade, they could have made further amendments in section 4, but the part of this section which relates directly and indirectly to the grade of work to be given was carefully left without change.

The provisions of the Federal Land Grant Act have been accepted by the State of Iowa and the carrying out of these provisions has been entrusted to the Iowa State College of Agriculture and Mechanic Arts. The legislatures of Iowa have repeatedly shown that they want collegiate work of high character to be given at this College. This, of course, does not preclude sub-collegiate, experimental, extension and short course work, but collegiate courses offered should be at least equal to corresponding courses in other land grant institutions, else they would not be good enough for many young men and young women of this State who have chosen agriculture or engineering for their life work and who wish to have the best possible preparation. In these days it is recognized that agriculture or mechanic arts is as difficult to master as is law or liberal arts, and a thorough collegiate education is as profitable in the one as in the other. To advocate that education in agriculture of as high scholastic standard as education in other lines should not be offered in a great agricultural State, would be to indicate that agriculture is an inferior industry; at least it would be so regarded by the best and most promising young men and they would avoid such a calling. The same is true of engineering, veterinary medicine or industrial science, and it is true for young women in home economics.

The giving of collegiate instruction is the largest activity of this College. Doubtless it will always be so. The great purpose underlying collegiate courses is to prepare young men and young women for the best possible service along technical lines. The college begins where the schools leave off. As the public school system becomes better developed and reaches higher and higher, college courses are correspondingly changed. At the present time work is given in colleges which later will be undertaken by the schools, and this will allow the college to raise its entrance requirements and reach higher in the junior and senior years. On account of the enormous addition to our knowledge being made available through investigations and discoveries, there is a large store of knowledge which it is becoming desirable to include in the college curriculum as rapidly as possible.

#### AGRICULTURE.

The agricultural courses are intended to meet the requirements of the many who wish to secure collegiate instruction in the various phases of agriculture that are important in this State.

Almost everyone of the departments in the Agricultural Division is in need of additional facilities to enable it to keep up with the demands made upon it. It is not necessary to dwell upon the importance of animal husbandry or field crops or other such well known and well established subjects. Too much could hardly be asked for them. The prosperity of the State depends upon them. Every industry in Iowa is influenced by them. But it does seem necessary at times to emphasize the need of developing new lines of work for interests in the State that are less prominent but in themselves of great importance.

The scope of agricultural education is broadening each year. This is largely due to changing economic conditions. The average person would say that *bee keeping* is unimportant but more than one farm in eight has bees. Their product is net gain to the State and besides this it would be impossible to overstate their importance in fertilizing fruit and plant blossoms. And now the bees have their diseases and other troubles and they must be cared for intelligently.

Another subject which is certain to impress itself more and more as needing attention is forestry, especially *farm forestry*. The timbered area of this State amounts to 2,500,000 acres or seven per cent of the State. This is the same percentage as is given for Illinois. Many timber plantations have paid good returns in addition to their value for aesthetic purposes and prevention of erosion. It is estimated that annually in this State the lumber used in wood-working industries is worth more than \$8,000,000. Additional lumber is used to the value of more than \$7,000,000 and fence posts to the value of \$5,000,000. The fuel, railroad ties, posts and mine timbers are estimated to be worth annually \$10,000,000. When we consider the influence of forestry on temperature, wind, rain, stream flow and soil erosion in addition to lumber values, we find that the subject of forestry in Iowa is one of large importance.

*Floriculture* is another subject, the importance of which is not recognized, yet this is a large industry and affects the welfare of many people in Iowa. In 1908 the Iowa Horticultural Society gave considerable emphasis to the need of instruction in floriculture. The College receives requests from a good many persons desiring instruction along this line. A beginning is being made.

*Market Milk Inspection.* This is a subject of growing importance. It affects the business of a large number of people and the health of almost every family living in city or town.

There has been gratifying growth throughout the Agricultural Division. An important change has been made in connection with the supervision of the department of agricultural engineering. This department has made a remarkable growth in recent years, due to sympathetic co-operation between the divisions of agriculture and engineering. The work of the collegiate course in agricultural engineering is drawn from both divisions but the larger part is from engineering. The students taking the course are about equally divided as to whether they will follow professional engineering or agricultural work. In order to give the department the best that the institution can afford, the Board of Education in July, 1913, directed that it shall be administered jointly by the deans of agriculture and engineering.

Dean C. F. Curtiss calls special attention to the need of more liberal salaries if the best teachers are to be secured and held in the work of the College. Members of the faculty are resigning to accept better paying positions in states having much smaller agricultural interests. The following is taken from the Dean's report:

The total enrollment of collegiate students in the Division of Agriculture during the year ending June 30, 1914, was 954; in the sub-collegiate one and two year courses it was 275, making a total of 1,229 enrolled for the full year's work. In addition to this, there were 604 winter short course students enrolled for two weeks, making a total of 1,883 in the Division of Agriculture. The freshmen, sophomores, juniors and seniors show an increase of 297 in number enrolled in the last college year as compared with two years earlier. This is a 47% increase. In the same period the number of sub-collegiate students increased about 25%.

The educational work in the Division of Agriculture includes the following departments: Animal Husbandry, including Dairy Husbandry and Poultry Husbandry; Agronomy, including Soils, Farm Crops and Farm Management; Horticulture and Forestry; Dairying; Agricultural Engineering; Agricultural Journalism; and Agricultural Education. In the Animal Husbandry courses there is a Dairy Husbandry group of studies and a Poultry Husbandry group amounting to special courses in these subjects. In the Forestry Department a five-year collegiate course is offered in addition to the four-year course. In the Horticultural Department, Pomology and Gardening group subjects are offered which virtually amount to special courses in these subjects.

All of the courses in the Division of Agriculture are organized upon an excellent basis, with thorough instruction in technical subjects properly strengthened and supported by work in the natural sciences which come into close relation with the technical training. Emphasis has always been placed upon practical work in this institution in connection with the scientific and technical training. At least six months of practical

work are required of all students before graduation, and a large majority of the students spend all of their vacations in practical farm work of some kind. In addition to this, many of the students who enroll in the agricultural courses come from farms, where they have had practical farm experience for a number of years. An interesting development in agricultural education, however, is found in the fact that a considerable number of students entering both the two and four-year courses in agriculture come from cities and towns, with comparatively little previous farm experience. This number has increased constantly from year to year, not only in this institution but in other institutions in the Mississippi Valley. In some cases from one-fourth to one-third of the students have come from the cities, and in a few instances nearly one-half the students enrolled in some of the agricultural courses have been boys from the cities and towns. These students are necessarily somewhat handicapped by lack of practical experience. Most of them are required to spend all of their vacations in practical farm work, and in many cases this handicap is fully overcome and such students have been able, within a year or two after graduation, to take strong rank among agricultural college graduates. Some students drop out and take a year of practical work during their college course.

There appears to be an increasing demand for five-year courses, either in the form of extending the course by an additional year of instruction, or by adding a year of post-graduate work. The post graduate courses are taken mainly by those students who expect to engage in educational or research work.

#### *Animal Husbandry Department.*

The faculty of the Animal Husbandry Department consists of Professor W. H. Pew, three associate professors, three assistant professors, one fellow, one graduate assistant, one professor of Poultry Husbandry, and one assistant professor of Poultry Husbandry. This is the largest department in the institution. Its work is well organized and the instruction given has attracted students from all parts of the United States and from many foreign countries. Following are the courses of instruction and the number of students enrolled in each.

No. of Course	Subject of Course	No. of Students
1.	Market types of cattle and sheep.....	447
2.	Market types of dairy cattle, horses and swine.....	407
3.	Breed types of cattle and sheep.....	196
4.	Breed types of dairy cattle, horses and swine.....	191
6.	Advanced live stock judging.....	59
7.	Herd book study.....	81
8.	Animal breeding.....	70
9.	Animal nutrition.....	60
10.	Thesis.....	58
11.		
12.	Feeding and Management of live stock.....	164
13.	Advanced work in beef production.....	75
14.	Advanced work in pork production.....	62
15.	Milk production.....	81
16.	Advanced work in mutton and wool production.....	71

17. Advanced work in horse feeding.....	72
20. Animal feeding .....	48
21. Principles of breeding.....	33
22. Seminar .....	267
23. ....	
25. Advanced types and breeds of farm animals.....	45
26. Market and breed types of beef cattle and sheep.....	23
27. Market and breed types of dairy cattle, horses and swine.....	27
46. General poultry husbandry.....	272
47. ....	
48. Breed types and judging.....	6
51. Incubation .....	5
52. Brooding .....	6
55. Marketing and judging poultry products.....	6
Total .....	2,832

The above enrollment shows an increase of 453 students over the Animal Husbandry enrollment during the year 1912-13.

Fifty-eight men graduated from the four-year course in Animal Husbandry at the close of the last collegiate year. Forty of these men are engaged in practical farm work at present. Some of these young men are taking post graduate work and some have taken up college and experiment station work. Others have secured positions with stock yard companies and in other lines of work directly connected with agriculture. It is needless to say that not all the young men completing a college course are situated so that they can become proprietors of farms immediately. Some of the men are in debt when they leave college and have no available capital with which to engage in farming. It is the ambition, however, of practically every graduate from the agricultural courses to take up farming as soon as possible.

The enrollment in the Animal Husbandry Department has increased so rapidly that there is now urgent need for larger quarters, better facilities for giving the work, and increased equipment, both in live stock and in laboratories. The most urgent need in the way of buildings is for an Animal Husbandry laboratory, for which the last legislature authorized an expenditure of \$50,000 from millage tax funds when available. A building of this kind, with equipment for the careful study and analysis of meat products in their finished form, sustains a vital relation to the field of animal husbandry. The work of the department has been seriously handicapped by the lack of these facilities. No other state has anything like as extensive interests in animal production as has Iowa, and no other institution has anything like as large a number of students enrolled in the Animal Husbandry courses as we have at Ames. It is highly important that proper facilities be provided for the best instruction in this important branch of agriculture.

The Dairy Husbandry work and Poultry Husbandry work have been seriously handicapped by lack of suitable laboratories and other buildings. Both of these lines represent very important branches of Animal Husbandry work. The poultry industry of this State is of large magnitude and outranks the poultry interests of all other states. It serves a most important purpose in contributing to the food supply of the State and of the Nation.

Iowa's dairy interests have come to be recognized as vitally related to the permanence and prosperity of the agricultural industry, and the dairy educational work should be strongly organized in this institution. The constantly increasing enrollment has greatly increased the demand for live stock equipment for class use, and the expansion of building operations has made some encroachment upon the grounds formerly used for live stock. To meet this situation we ought to have additional farm lands for maintaining a portion of the breeding herds and flocks and for growing feed for the same. This additional land should be purchased soon while land is available at moderate prices. Values are now fully 100 per cent higher than they were eight or ten years ago, and there is every prospect that values will be still further increased.

The poultry department is urgently in need of a laboratory building. At the present time some rooms in the Chemistry Building are being used as temporary quarters. A poultry laboratory building should be provided in the near future. Such a building should have ample provision for educational and research work and be of fireproof construction.

The buildings on the Dairy Farm are of cheap construction and are not altogether suited to their purpose. They also lack capacity for carrying on the work. A portion of the old building can be utilized for a judging pavilion, and new buildings should be provided. To furnish proper buildings and equipment will require an expenditure of not less than \$35,000. The Animal Husbandry Department should have not less than 200 acres of additional land, which will cost not less than \$200 per acre. This will amount to \$40,000.

#### *Agronomy Department.*

The Agronomy Department includes the work of Soils, Farm Crops and Farm Management. The faculty consists of Professor W. H. Stevenson, head of the department and professor of Soils; Professor Hughes, head of the Farm Crops work, and Professor Munger, head of the Farm Management work; one professor of Soil Bacteriology, two associate professors, two assistant professors, three instructors, two graduate assistants, two student assistants.

The work of this department is fundamental to all successful agriculture. It deals primarily with soil, with crop production and with farm management. We have been fortunate in securing for the Farm Management Professor H. B. Munger, of Cornell University, who has had excellent training and preparation in this field. Agriculture has been sadly lacking, in many instances, in business organization and system. The Farm Management instruction takes into account the essentials of successful organization and administration and the application of sound business policies to agriculture. It deals with the important problem of farm tenancy. During the past summer we have made a careful survey of one hundred farms in four counties in Iowa. During two years past Professor Lloyd has been making a careful study of the farm tenancy conditions in this State. Some very important and interesting information has been obtained which will be published soon in the form of a bulletin which will be used as the basis of instruction and further investigation.

The courses offered and the number of students enrolled in the Agronomy Department during the past year are as follows:

No. of Course	Subject of Course	No. of Students
Soils.		
1.	Physics .....	168
2.	Fertility .....	149
3.	Research in physics.....	8
4.	Research in Fertility.....	21
6.	Advanced fertility .....	72
7.	Investigation of special soils.....	12
8.	Bacteriology .....	15
11.	Thesis—three-hour credit .....	7
12.	Thesis—five-hour credit .....	5
13.	Soils survey and mapping.....	17
14.	Advanced bacteriology .....	0
15.	Advanced physics .....	2
16.	Advanced fertility .....	3
17.	Seminar .....	24
18.	Seminar .....	15
Total .....		518
Farm Crops.		
1.	Corn growing and judging.....	410
2.	Small grain .....	372
3.	Corn and small grain judging.....	71
4.	Corn and small grain breeding.....	29
8.	Farm management .....	47
9.	Research .....	21
10.	Thesis .....	4
15.	Grasses, forage and fiber crops.....	124
16.	Seminar .....	30
17.	Special advanced judging.....	45
19.	Total .....	1,153

The work of the department has been seriously handicapped by lack of laboratory room. Some changes in the assignment of chemistry work to the new building will afford temporary relief by the use of additional laboratories during the coming year; but there is an urgent need for a new, modern, well equipped building to provide for the work in the Soils, Farm Crops and Farm Management Departments. Such a building should be of fireproof construction and in harmony with the principal buildings upon the campus, and can be erected at a cost of not less than \$100,000 if it is made large enough to provide for the needs of these lines of work in the near future. The enrollment in this course has shown a very large increase during the past year, and with the work more completely organized as it is now, there is every assurance that there will be a constant increase in the future.

*Horticulture and Forestry.*

The faculty of the Horticulture and Forestry Department consists of Professor S. A. Beach, head of the department; Professor G. B. MacDonald, Professor of Forestry; Professor Erwin in charge of Truck Gardening; Professor Culley, in charge of Landscape Gardening; two associate professors, two assistant professors, three instructors and two student assistants.

The work of this department is now well organized. It has been seriously handicapped during the past two or three years by a lack of suitable laboratories and facilities for giving the work. The limitations have been such that we have been obliged to abandon a part of the work that has been offered in the Horticultural course during the past two years. With the completion of the new greenhouses and horticultural laboratory, which will constitute a wing of the Plant Industry Building to be erected later, the work of the department will be on a good basis and the immediate needs well provided for.

A division has been made during the past year between the forestry and horticultural work, and distinct four and five-year courses are now offered in forestry. The Forestry courses now compare favorably with the best offered in any of the forestry schools and the graduates from the forestry work in this institution have taken exceptionally high rank in civil service examinations and in government forestry work. Provision for giving three months of practical work in a forestry camp in Minnesota during the summer vacation has been of material assistance in strengthening the work of this department.

The garden and truck farm interests of the State have grown to large proportions. For a number of years the institution has been called upon for more extensive service in this field than we have been able to render. The horticultural course is now organized with a group of studies having special reference to the training of students for gardening and truck farming. Some remarkably successful results have been obtained by practical men in the gardening and truck farming work in parts of the State where this work has become a specialty. Without question the State's resources and attractiveness can be very greatly increased by the development of this phase of horticultural work.

Landscape gardening serves a most important purpose in a comparatively new agricultural State. The improvement and adornment of the farm home and surrounding grounds has a vital relation to the success and permanency of Iowa agriculture, and to the maintenance of a stable rural population. The landscape gardening work is equally serviceable to the residents of cities and towns.

Courses offered and students enrolled are as follows:

No. of Course	Subject of Course	No. of Students
<i>Horticulture.</i>		
3.	Orcharding .....	421
4.	Plant breeding .....	49
5.	Systematic pomology .....	9
8.	Landscape gardening .....	152
11.	Amateur floriculture .....	12
13.	Thesis .....	1
28.	Seminar .....	25
29.		
31.	Landscape design .....	11
30.	Fruit judging .....	11
32.	Landscape design .....	11
33.	Truck farming .....	31
34 and 35.	Greenhouse management .....	38
37.	Orchard practice .....	3
38.	Plant propagation .....	33
39.	Nursery and orchard practice.....	30
40.	Small fruits .....	10
46.	Fruit farm management.....	5
47.	Care of street and park trees.....	20
Total .....		842
<i>Forestry.</i>		
1.	Farm forestry .....	293
3.	Forest planting .....	15
9.	Forest management .....	10
10.	Forest valuation and finance.....	..
11.	Forest protection .....	15
12.	Forest administration .....	9
15.	Forest research .....	..
16.	Camp technique .....	15
17.	Forestry history and policy.....	21
18.		
19.	Seminar .....	25
21.	Lumbering .....	..
22.	Forest mensuration .....	..
23.	Forest utilization .....	..
25.	Wood technology .....	6
Total .....		409
Total number enrolled in horticulture and forestry four- year courses .....		1,251

*Dairy Department.*

The faculty of the Dairy Department consists of Professor Mortensen, one associate professor, one assistant professor, and four instructors.

This department has attained very high rank among the dairy schools of the United States. Its work has been strong and efficient, both in scientific and practical instruction. Following are the courses offered and the number of students enrolled in each:

No. of Course	Subject of Course	No. of Students
10.	Domestic dairying .....	23
11.	Cheese making .....	16
12.	Farm dairying .....	430
13.	Milk testing and milk inspection .....	35
14.	Advanced butter making .....	18
16.	Technology of milk .....	12
17.	Dairy bacteriology .....	21
19.	Seminar .....	9
20.	Factory management .....	10
21.	Ice cream and ices .....	7
23.	Thesis .....	9
24.	Fancy cheese making .....	16
25.	Advanced dairy bacteriology .....	1
26.	Judging dairy products .....	16
27.	Advanced butter making .....	13
28.	Advanced butter judging .....	11
Total .....		647

The investigations and instruction work of this department have established a high standard of efficiency in the dairy industry of this State and other states. Provision has been made during the past year for instruction in commercial milk production. The problem of improved methods in the production, manufacture and marketing of dairy products is one of the greatest importance to the agricultural industry and to the welfare of all of the people of the state and nation. No branch of agriculture in Iowa has made more marked progress in recent years than dairying. Where modern, intelligent methods have been followed it has brought profit to the dairy farm and restored fertility to impoverished soil. No branch of agriculture has a more direct relation to the maintenance of prosperous and successful rural life than dairying.

The Dairy Department is in urgent need of a \$25,000 additional building. The present building is entirely inadequate to meet the rapidly increasing needs of the dairy work.

#### *Agricultural Engineering Department.*

The faculty of this department consists of Professor Davidson, one associate professor, one assistant professor, four instructors and one scholar. The department is administered jointly by the Dean of Agriculture and the Dean of Engineering.

This department has made marked growth during the past biennial period. It is recognized as occupying the foremost rank among similar departments of the United States. It was the first to offer a four-year collegiate course in Agricultural Engineering. The courses offered and the student enrollment are as follows:

No. of Course	Subject of Course	No. of Students
1.	Shop work .....	687
2.		
3.	Farm blacksmithing and horseshoeing .....	19
4.	Agricultural surveying .....	157
5.	Farm machinery and farm motors .....	125

6.	Farm structures .....	5
9.	Research .....	11
10.		
11.	Thesis .....	14
12.		
13.	Gas and oil engines and tractors.....	23
14.		
15.	Seminar .....	30
16.	Farm machinery .....	43
17.	Farm motors .....	34
18.	Farm motors .....	22
19.	Rural sanitation .....	24
20.	Irrigation and drainage.....	2
21.	Concrete construction .....	4
22.	Horticultural machinery .....	10
23.	Dairy engineering .....	10
24.	Farm structures .....	19
25.		
26.	Technical lectures .....	126
27.	Drainage engineering .....	2
28.	Irrigation .....	New
29.	Graphic methods .....	254
30.	Farm structures .....	2
31.	Irrigation and drainage.....	36
32.	Irrigation engineering .....	New
33.	Drainage engineering .....	New
	Total .....	1,658

The following table indicates the number of freshmen enrolled in Agricultural Engineering since the announcement of the special course.

Freshmen in the Agricultural Engineering course:

1909 .....	3
1910 .....	20
1911 .....	36
1912 .....	51
1913 .....	70

The following table indicates the number of graduates in Agricultural Engineering for the past five years and the increase from year to year.

Graduates in Agricultural Engineering:

1910 .....	1
1911 .....	2
1912 .....	3
1913 .....	10
1914 .....	15

There is a most urgent need for strengthening and extending the work of the Department of Agricultural Engineering. The total investment in farm machinery in this State, according to the last census, was \$95,000,000. No other state approaches this expenditure for agricultural machinery. The question of the economical construction, lighting, ventilation and sanitation of farm buildings is a problem of vital importance that has received very little consideration in the past. The whole field of rural architecture and rural engineering has been neglected. The Agricultural

Engineering Department in this institution has entirely outgrown its present quarters and a new building is urgently needed. Such a building should constitute one of the permanent fireproof buildings of the campus, and if properly planned and constructed to meet the immediate and future needs, a suitable building will cost \$200,000.

*Agricultural Education Department.*

The faculty of the Department of Agricultural Education consists of Professor G. M. Wilson, one assistant professor, one director of practice teaching in Home Economics and one director of practice teaching in Agriculture.

This department has grown out of the demand made upon this institution for the training of teachers of agriculture for the secondary schools. In at least twenty states the teaching of agriculture is required by law in all of the public schools. In 1910 there were 630 high schools and secondary schools in the United States giving instruction in agriculture. At the present time there are probably 2,500 high schools and schools of secondary grade giving instruction in agriculture. The demand for teachers is increasing more rapidly than they can be supplied by the agricultural colleges and by the other institutions giving limited training in agriculture.

The enrollment of students in the Department of Agricultural Education has made a marked increase during the past three years, as shown by the following tabulation:

No. of Course	Subject of Course	No. Students 1912-13	No. Students 1913-14
1.	Principles of education.....	13	88
2.	Principles of education.....	7	34
3.	Secondary education .....	..	17
4.	Secondary education .....	..	19
5.	History of education.....	15	17
6.	History of education.....	12	19
8.	Industrial education .....	16	..
9.	School administration .....	..	6
10.	School administration .....	..	4
11.	Practice teaching .....	..	47
12.	Practice teaching .....	..	45
Total .....		63	296

There is no longer any uncertainty about the demand for industrial training in the public schools. It has come to be regarded as a fundamental and essential part of our educational system. The Thirty-fifth General Assembly made provision for the teaching of agriculture and home economics in all of the public schools of Iowa, beginning in 1915. The Department of Agricultural Education, in conjunction with the other departments, provides for the training of teachers of agriculture and home economics. There is no single field of work in which the institution has had, in recent years, such an overwhelming demand for its graduates as in the preparation of teachers of these two branches. This demand is so extensive that it will be impossible for all of the educational institutions combined to furnish an adequate supply of teachers in the immediate years to come.

To render the largest possible service in this field, provision should be made for a School of Agriculture in connection with this institution. Such a school of agriculture would serve as a model for all the communities of the State where this work is to be established. It would meet a most important need in connection with the practice work in the training of teachers, and would command a large enrollment of students from the beginning.

#### *Agricultural Journalism.*

This department is in charge of Professor F. W. Beckman. Its work includes instruction of students who wish to prepare themselves for work in agricultural journalism. It also includes a large amount of editorial work for the Division of Agriculture and the Agricultural Experiment Station and certain publicity work of the college. This department endeavors to give to the press the most important news items concerning the college and its educational work and many items of information originating at the college that might be helpful in the various fields of industry which the college seeks to serve. This is one of the chief ways in which the college sends out information to the people who maintain it.

The department needs additional help and it is desirable to somewhat enlarge its scope so as to increase its usefulness, but within the field of work assigned to this college. There is an increasing demand for trained young men and women in journalism devoted to the interests of agriculture, engineering and home making. Such positions require thorough training in the technical subjects even more than journalistic training, although the latter has now become almost vitally important. This latter could be cared for with slight additional cost and it would increase the service of the technical departments which are already sufficiently equipped.

Through the department of agricultural journalism the college could render valuable service to country editors, some of whom need a better understanding of agriculture and rural life. The country newspapers and their associated job offices represent an investment of millions of dollars, thousands of men are employed, and the product directly influences the characters and activities of a large portion of the population of the State. In so far as it is appropriate to do so this college could render most valuable service to these interests.

#### ENGINEERING.

From time to time the question is raised as to whether the term "Mechanic Arts" in the original law establishing land grant institutions should be construed to mean "Engineering" as that term is understood today. The perusal of standard dictionaries in use in 1862 brings out the fact that the meanings of these two terms have been almost reversed in the last fifty years. In 1862 "Mechanic Arts" meant as nearly as possible what today we understand by the term "Engineering," and in 1862 the term "Engineering" had a very restricted meaning. It is easy to show that

the provisions of the original law justify and even require such grade of instruction in engineering as is now given in this and others of the best known land grant institutions.

This matter is covered by a resolution unanimously adopted at the Twenty-third Annual Meeting of the Association of American Agricultural Colleges and Experiment Stations, held in Portland, Oregon, in 1909, which reads:

*Resolved*, That it is the sense of this association that the national laws which constitute the charter of the land grant colleges distinctly prescribe work of collegiate grade in agriculture and mechanic arts, including engineering in all its branches, and the sciences related to the industries, irrespective of whether the colleges are established separately or as parts of universities.

The United States government recognizes such a standard in its regulations.

The Board of Education has expressed itself firmly of the opinion that engineering instruction belongs at this institution with agriculture. In taking this position the Board is in true harmony with the leading agricultural thought. Ex-Secretary of Agriculture Hon. James Wilson was asked his opinion as to the desirability of maintaining engineering instruction in a college where agriculture is taught and he replied as follows:

"I am well satisfied that the interests of engineering and agriculture are so closely related in Iowa as to require close association of the educational work in these two lines. Second, I have no doubt whatever but that a wise interpretation of the Morrill law would lead one to reach the conclusion that it did require instruction in engineering such as has been given at practically all of the land grant colleges."

The fact is that both agriculture and engineering are highly technical subjects and they supplement one another. Each is helpful to the other. Agricultural work is coming to depend more and more upon engineering knowledge. This relates especially to land drainage, building construction, and the utilization of power and complicated machinery. An attempt to restrict or reduce engineering instruction in a land grant college would injure agriculture.

All the departments in the Engineering Division are well equipped and their equipment has been improved during the last biennium. Further equipment is needed. Even with these improvements and those contemplated, the average cost per student enrolled in engineering at Ames is low as compared with other institutions of equal rank.

The Dean of Engineering has been honored by election to the

presidency of the Society for the Promotion of Engineering Education and the presidency of the Land Grant College Engineering Association.

The following is taken from the report of Dean A. Marston:

*General Developments.*

The general developments in engineering at the Iowa State College during the past biennium have all been of a nature which adapts the work to the special requirements of Iowa while at the same time broadening its character and improving its general quality. New lines of collegiate work taken up during the past biennium are Highway Engineering, Structure Design and Transportation Engineering.

The Iowa State College has the honor of being the first to organize formally at one institution all three of the great lines of engineering educational work now recognized, viz:

Professional Engineering Education,  
An Engineering Experiment Station,  
Engineering Extension (including Trade School).

Especial attention is being given by the great engineering schools at the present time to the comparatively new subjects of experiment station and extension work. A recent circular inquiry has brought reports from almost all showing their great interest. It is now coming to be realized that the wide extension of mechanic arts instruction beyond the walls of colleges is a vital necessity to the state and nation. Inquiries as to our work and plans have been received during the year from all over the United States.

*Co-operation With Other College Divisions.*

A marked improvement has been made in our college during the past biennium toward greater efficiency by closer co-operation between the different divisions. Agricultural and science students can now elect some engineering subjects, and engineering students some agriculture and advanced science. The Engineering and the Science Divisions unite in a combined five-year course in science and engineering, whereby any student may in five years secure two degrees, in Science and in Engineering, respectively.

*Co operation With Other Iowa Colleges.*

We have to report that the new plan of co-operation of the Iowa State College with other colleges is proving a success in our work. We now have graduates of other good colleges in the State entering here for engineering degrees, which they secure by two years additional work. Other prospective students are arranging by correspondence for five-year co-operative courses with other colleges whereby the Science degree is granted by the other college and the Engineering degree here.

*Professional Engineering Educational Work.*

Educating professional engineers continues the most important work of the Engineering Division. We now offer eight four-year and six five-year professional engineering courses of the highest grade, with the usual standard entrance requirements—graduation from an accredited four year

high school. Our engineering equipment is large and growing, though not yet nearly what it should be. It is housed in ten engineering buildings.

#### *Agricultural Engineering.*

This department is administered jointly through the Deans of Agriculture and Engineering. The work in agricultural engineering has had a most remarkable growth. The number taking the professional four year course increased during the biennium from 57 to 135. In addition all agricultural students take some of this work, and the civil engineering students take irrigation and drainage. The total number of student classifications in agricultural engineering subjects increased from 1,174 to 1,658 during the last two years.

The greatly increased amount of work demands additional instructors and equipment. Also, a new agricultural engineering building is greatly needed. At present the department is incompletely and inconveniently housed in an old building erected for another purpose. It is recommended that a new building be provided which is adapted to this line of work, at a cost of \$225,000.

#### *Civil Engineering.*

Civil engineering has been one of our strongest four-year courses ever since the college was started. Structural engineering, railway engineering, highway engineering, hydraulic and sanitary engineering, geodesy and surveying, civil engineering laboratories, and civil engineering drawing are each in responsible charge of a competent professor. The quality of the work has been greatly improved during the last two years.

Some addition will need to be made to the instruction staff of the department to assist in laboratory and surveying work. Also the department needs a large amount of new laboratory and geodetic equipment.

#### *Electrical Engineering.*

Electrical engineering has the largest student enrollment of any of our engineering courses but has only four men in its faculty. The faculty should be increased by the addition of an associate or assistant professor of telephone engineering and by a new laboratory assistant. The telephone industry is very important in Iowa, where a telephone is found in nearly every farmer's home. The telephone interests of the State are making strenuous demands upon us for better facilities for instruction in their line. The college has been giving instruction in telephony for several years, and steps have been taken for enlarging this branch of work.

The electrical engineering department needs considerably more space for new laboratories, computing and class rooms. It also needs a large amount of new and modern equipment.

#### *Mechanical Engineering.*

Mechanical engineering is one of our oldest and strongest engineering courses, established when the college was started. The department gives instruction in shop work, in mechanical drawing and in mechanics, to all engineering students.

The biennium has seen the completion and main equipment of the new Steam and Gas Laboratory, one of the best in the country. Since the completion of the new Transportation Engineering Building, with its locomotive and automobile testing laboratories, the instruction by the mechanical engineering department in railway mechanical engineering and in automobile engineering has been greatly improved and extended. Additional laboratory and shop equipment is needed in considerable amount to complete the equipment of buildings already erected.

*Mining Engineering and Geology.*

This department has charge of several lines of work, as follows: Mining engineering, ceramic engineering, chemical engineering, and geology. In the first three lines of work regular four year professional engineering courses are offered. All of these departments are very important to Iowa, but are expensive and difficult to build up and properly maintain. They do not as a rule attract many students in the various institutions maintaining them. Nevertheless they offer great opportunities to graduates and are absolutely essential to the proper development of Iowa industries. We should use every effort by providing additional equipment to develop these three lines of engineering work. In chemical engineering the completion of the new Chemistry Building and the general improvements of our work in chemistry, together with the greatly increased demands for chemists, have materially increased the enrollment of students. The European war is forcing attention to the manufacture of chemical products in the United States.

A small building should be provided for ore dressing, coal washing and kiln and furnace, at cost of about \$7,000.

We feel that there is great need in this State for special development of geology as applied to agriculture, and are pleased to report considerable progress in this direction. A number of members of the agricultural division faculty are taking post-graduate work in this line. Elective work in the same subject is offered to all agricultural students.

*Physics and Illuminating Engineering.*

Owing to the recent great increase in the number of agricultural and home economics students taking physics, a critical stage in the work of this department has been reached. All the agricultural and home economics students are now required to take physics at the proper times in their courses of study.

The number of student credit hours in physics has increased from 2313 in 1911-12 to 3296 for 1913-14, and an estimated total of 4204 for 1914-15. Thus the work has nearly doubled in three years. As a consequence, the inadequate instructing staff of the department has been carrying a heavy burden, and although some relief has been afforded in the past year, additional help is still needed. Additional laboratories properly equipped must be made available for the department as soon as possible.

Besides improving the already excellent work in physics for engineering students, it is proposed to develop at once new laboratory

courses in the special applications of physics to home economics and to agriculture.

It is recommended that a new physics building be provided to house the physics department at a cost of \$150,000.

#### *Structure Design.*

The new department of structure design, created to do pioneer work in the application of architecture to industrial structures, farm structures and the home, has already enrolled so many students as to demand the services of a competent associate or assistant professor next year. Additional equipment is needed. Three special courses are being prepared for the benefit of the students in home economics, engineering and agriculture, respectively dealing with the application of structure design to homes, individual structures and farm structures.

#### *Transportation Engineering.*

The great and rapidly increasing use of power vehicles on our public roads is rapidly making economic highway transportation a mechanical problem. Interurban railways seem certain of a great future development. Steam railways have reached a point in development where scientific tests of all equipment in the interests of economy are a necessity. During the biennium we have constructed and are now equipping our new Transportation Engineering Laboratory, which is the only place west of the Mississippi river where complete scientific tests can be made of locomotives of all sizes, automobiles and signal and brake equipment. No dynamometer has as yet been supplied for the locomotive laboratory and the one desired would cost \$8,000. About \$2,000 additional is needed for miscellaneous transportation engineering equipment.

#### HOME ECONOMICS.

In 1913, by action of the State Board of Education, the home economics work was reorganized as the Division of Home Economics. Previously it had been a department in the Division of Agriculture. It was considered that the work had become of sufficient importance to be recognized as equal with other main branches of work conducted by the college. Miss Catherine J. MacKay, who had been head of the department, was made acting dean of the division and she has since been made dean.

This division has made remarkable growth in enrollment during the biennium. The student attendance in collegiate work has increased from 206 in 1911-12 to 446 in 1913-14, or an increase of 117%. It is performing a most useful work and naturally its needs must increase if it is to meet the increasing demands. The graduates enter largely into teaching work but statistics show that very many of them soon become home makers. The work in home economics is developed strongly along technical lines but the course

includes studies in the Industrial Science Division, in English, languages, history, economics, and public speaking, and in the Engineering Division in physics and drawing, and in certain agricultural studies. In February, 1913, there were 253 home economics students registered in agricultural subjects including dairying, gardening, horticulture, forestry, landscape gardening, farm crops, poultry husbandry, agricultural botany, agricultural education and agricultural journalism. A canvass of the senior and junior classes showed that three times as many students preferred agricultural electives to liberal arts electives. This does not seem so strange when we remember that the farm land in Iowa operated by women is equivalent in area to a small state. Through the courtesy of the United States Census Bureau, exact data were compiled from the Census of 1910 for Page county and Story county as follows:

In Page county 43 farms are operated by women who own them. These include 4,662 acres valued at \$642,100. There are 145 farms in Page county owned by women and rented to tenants or others. These comprise 19,561 acres valued at \$2,427,550.

In Story county 43 farms are owned and operated by women and 12 others are operated by women. These 55 farms comprise 3,937 acres valued at \$510,590. In this county 183 farms are owned by women and rented to tenants or others. They comprise 31,176 acres valued at \$3,587,750.

These are believed to be representative counties, and on the basis of these data it would appear that the farm land in Iowa owned and operated by women and owned by women and rented to tenants or others is worth between \$300,000,000 and \$400,000,000. It is natural and right that there should be a large demand from women for instruction in home economics and agriculture combined.

The following is taken from Dean MacKay's report:

The purpose of the division is to train women as home makers and as teachers of and professional workers in home economics. A special effort is made to give a course that is properly balanced with reference to the needs of such women. The technical side of the work is given chief emphasis but work in literary, economics and other suitable subjects is included. Positions open for college trained women are dietitians in dormitories, clubs and hospitals, managers of dining and lunch rooms and cafeterias, food and sanitary officers, public lecturers and demonstrators, writers for women's columns, extension workers, county supervisors in home economics, social workers, designers for manufacturing establishments, milliners and dressmakers, and teachers.

The instruction in home economics has been given under two groups:

Domestic Science, which includes food preparation, cookery, home nursing, household management, nutrition, personal hygiene and theory and practice teaching.

Domestic Art, which includes sewing, elementary and advanced dress-making, elementary and advanced textiles, textile design, millinery, applied design, history of art and costume design.

The physical culture department, which has charge of physical exercise for women students, recently has been transferred to this division for administration.

In connection with the department of agricultural education, courses in education are given which meet the requirements for State certificates. Work in practice teaching for senior students is carried on in co-operation with the public schools of Ames. The Ames high school maintains a normal training department, and domestic science and domestic art are required subjects of study. These subjects also are required in the public schools of lower grade. Senior students in home economics are given the privilege of teaching under expert observation. This work has been very successful and satisfactory. By its aid the graduates have been more thoroughly trained in class room methods and they have developed both ability and confidence. In connection with the public schools, classes have been formed for parents and others not attending school. These classes are under the supervision of the critic teachers and are taught by selected students of the senior class.

In domestic art the work is given with a view to developing appreciation and judgment of art in home planning, house furnishing and decorating and costume design as well as in the more commonly recognized lines. Such work broadens and develops an interest in decorative art in the home and in the community. A small amount of instruction is given in drawing, which is especially applicable to the needs of home economics students.

Dean MacKay puts special emphasis upon the need of additional teachers and the necessity of increasing salaries of professors and instructors to enable the College to retain the services of the best. Too often it happens that when a good teacher has been found and has been in the work long enough to become thoroughly familiar with it and thoroughly efficient, another institution induces her to leave because of less required teaching work or larger salary, or both. If our standards of instruction are to be maintained the best prepared and trained teachers should be secured and kept in service at least a reasonable length of time.

The home economics building was erected when there were 95 students in the department. In 1914-15, including students in the Industrial Science Division who take work in home economics, there will be approximately 600 students. Partitions have been removed to enlarge class rooms and laboratories, thereby reducing the number of rooms available. There are now only two class rooms left in the building and it is necessary to find additional space in some other building. There is no room in the home economics building large enough to assemble the lower classes, or even the upper classes.

A new building is urgently recommended. There are abundant evidences that the enrollment will continue to increase for some years to come. Suitable class rooms, laboratories, cloak rooms, study and rest rooms, and storage rooms are essential to good work. Space should be provided for department exhibits having educational value. Numerous minor improvements are also needed. It is recommended that a swimming pool be provided in connection with the young women's gymnasium.

#### INDUSTRIAL SCIENCE.

Dr. R. E. Buchanan, head of the Department of Bacteriology, was appointed Acting Dean of this Division in 1913, and since has been made Dean.

This division is given the name Industrial Science to emphasize the fact that its work is planned and conducted with a view to the application of science to the practical affairs of life. Under the organization of the college which has obtained for many years, a large part of the fundamental scientific work given to students in agriculture, engineering and home economics courses falls within this division. For example: chemistry is given in a department of the Division of Industrial Science. This division teaches about three-fifths of all the class work and about one-third of all the laboratory work given in the entire college. About ninety (90) per cent of the funds expended through the Division of Industrial Science is directly for the benefit of students in other divisions. About two-thirds of the salaries and current expenses of this division are directly for the benefit of students in agriculture and home economics. Practically every course offered by the Industrial Science departments is for the benefit of students in the other technical divisions named. Perhaps three or four per cent of the 350 courses in the Industrial Science Division are available as electives only to students seeking the Industrial Science degree. It is likely that these courses will be made useful also to a limited number of students in other courses permitting elective work.

To leave no doubt as to the purpose of the faculty of this division to meet the requirements of other divisions in connection with work given for these other divisions, the faculty of the Division of Industrial Science in the year 1912-13 expressed itself by the following resolution:

*Resolved:* That it is the sense of the faculty of the Division of Industrial Science that the subjects taught by them and required in other divisions of the College be specifically outlined in the fullest coöperation with the respective departments for which such subjects are taught.

This shows that in all studies emphasis is given to the practical applications. For example: the Department of History and Psychology recognizes that students taking its work are in this College to specialize in agriculture, engineering, industrial science, or home economics, and the courses are arranged accordingly. They are not arranged to meet the needs of those who wish to specialize in these subjects, nor are they treated simply as cultural studies, but as studies having a practical bearing on present day affairs. In the history department brief courses are included which deal with the history of industrial development of the United States and of the state of Iowa. Special attention is given to the history of agricultural development and the growth of manufacturing industries. The history of the public domain is included. In psychology instruction is given which bears directly upon the needs of the business man and the employer of labor. Courses are given also to meet the minimum requirements for those desiring to secure teachers' certificates.

The course leading to a degree in industrial science is not attended by a very large number of students but it is one of the vital features of the College work. A land grant institution without such a course would be an anomaly. Men who have taken this course today are filling positions of the highest importance in the world of science, especially agricultural science. They are experts upon plant diseases, insect pests, economic botany including grasses and forage plants, and horticulture. These men may be found in leading teaching and investigating positions in colleges, experiment stations, and the United States government service. By a co-operative course overlapping agriculture and industrial science a student may now prepare himself in the best manner possible for such positions as were just referred to.

The following is taken from the report of Dean R. E. Buchanan:

Several Departments in the Division of Industrial Science have been reorganized within the past year partially or wholly upon a committee basis, the committees in charge consisting of members of the staff with rank of assistant professor or above. The committee chairmen are appointed annually by the president. The departments at present thus organized are: Applied Economics and Social Science, Chemistry, and Physical Training.

*Needs of the Division.*

The departments of this division are greatly in need of additional teachers and recitation and laboratory room space. It must be borne in mind that the needs of this division increase rapidly inasmuch as

increases in enrollment in all divisions of the institution increase proportionately the amount of work to be given by the teachers within this division. It is urgent that an effort should be made to house the following departments in new buildings during the ensuing biennium: Zoology, Bacteriology and Hygiene, Botany, Library, and Military Science and Tactics.

It will be necessary to find additional room also for the following departments: English, Modern Languages, Mathematics, and Applied Economics and Social Science.

*Department of Bacteriology and Hygiene.*

The work of the Department of Bacteriology is directed along several distinct lines: General Bacteriology (in preparation for more technical bacteriology), Home Economics Bacteriology, Sanitary Bacteriology, Soil Bacteriology, Dairy Bacteriology, and Veterinary Bacteriology.

It has been the effort of this department to develop all of the phases of the science of bacteriology which would prove of value to the students in technology. During the past biennium we have started to develop and emphasize the work in Home Economics and Sanitary Bacteriology.

The great increase in the size of freshmen agricultural and home economics classes during the past several years is making itself felt in the work in bacteriology, which comes for the most part in the junior years of these courses. The increase in the amount of class and laboratory work will require additional instructors within the next biennium.

The present quarters for Sanitary Bacteriology and Household Bacteriology are inadequate and within a year will become seriously crowded; furthermore, the room now occupied is greatly needed by other departments. Plans are now being drawn for a new building. A portion of it is to house the departments of Bacteriology and Zoology jointly and is needed at once, and it is recommended that this portion of the building be built during the year 1915-16, and that the entire building be completed as soon thereafter as practicable. Provision will need to be made for equipping and furnishing this building, together with some additional special departmental equipment.

*Department of Botany.*

The teaching required of this department has increased very rapidly during the past biennium. Recognition of the fundamental nature of botany in its application is accorded in the various courses in four of the divisions of the institution. During the past biennium a serious effort has been made to place the instruction in morphology and physiology upon a firmer basis. The department needs an assistant or an associate professor in plant pathology, and additional assistants.

Additional space is required for this department and temporary relief will be given with the removal of Bacteriology from Central Building. This building, however, is not well adapted to laboratory purposes and it is urgently recommended, therefore, that plans should be made in the immediate future for the removal of botany to a new building in the science or plant industry group.

*Department of Chemistry.*

At the present time the Department of Chemistry is installed in its new building which takes the place of the Chemistry Building which was destroyed by fire in the spring of 1913. The fact that practically every student in this institution is required to take chemistry testifies to the fundamental nature of the work. In consequence the number of students enrolled in courses in chemistry has increased from 600 in 1910 to 1,800 in 1914. The urgent needs of the department are three in number: First: Permanent desks, lockers and plumbing for laboratories. Second: Additional new departmental equipment to replace equipment destroyed by fire. Third: Additional instructors.

*Department of Economics and Social Science.*

The work of this department has been strengthened during the past biennium by providing instructors to give agricultural economics and rural sociology courses to students in agriculture and home economics. It is proposed to still further strengthen the work of the department by providing further courses in agricultural law and forest economics in the fall of 1914. It is recommended that provision be made for an instructor to teach accountancy in the year 1915-16. This subject is of utmost importance in connection with farm management. Within the next biennium this department will unquestionably need additional recitation and office rooms.

*Department of English.*

The staff of the Department of English has been divided into three committees consisting respectively of the teachers who have to do with English primarily for students in agriculture, engineering and home economics. Each committee is headed by a chairman and it is planned that the chairmen will get in touch with the technical division faculties so that the work in the English Department may be coördinated with the work in the technical department.

The teaching force of the Department of English has been increased during the past biennium until the amount of work required of each teacher is now more reasonable than in 1912-13; it is still larger than the maximum of efficiency would demand. Several new instructors will be needed during the ensuing biennium. It will be necessary to provide additional recitation rooms during the coming biennium on account of the increasing enrollment of students.

*Department of History and Psychology.*

The number of students has now increased to more than 150 in elementary classes in this subject in addition to the advanced classes. The staff of this department will be strengthened the coming year by the addition of an assistant professor to teach the elementary work in psychology. The courses given are well adapted to the type of education for which this institution stands, and include courses in industrial and economic history in which American public land policies are outlined, also the Western Movement and Industrial History of the United States and England.

*Library.*

During the past biennium the library has been moved from its old quarters in Morrill Hall to temporary quarters in Central Building. The primary purpose of this move was to provide fireproof quarters for housing the books. Adequate space, however, is not available in Central Building.

On account of the crowded condition of the library, strong departmental libraries have come into existence. The engineering library is housed in Engineering Hall, the agricultural library in Agricultural Hall, and most of the books on history, bacteriology, botany and chemistry and many of those for the Department of Economics, particularly the Catt Library, are housed in the respective departments.

The following needs of the library are emphatic: The experiment station and research work of this institution is seriously hampered by the inadequate library facilities. The need of a larger support fund has been recognized by general faculty action. At a regular meeting of the faculty in the spring of 1914, a resolution was adopted asking that at least \$15,000 annually additional be appropriated to the library for books and periodicals.

A new library building should be constructed in the near future. It should be large enough to provide for the growth of the library for a long period of years. Additional help is necessary. Six additional assistants should be provided.

*Department of Mathematics.*

As a result of the rapid increase of students in the freshman and sophomore years, a considerable increase in the staff of the department was imperative in 1912-13 and 1913-14. Some further additions will be necessary during the ensuing biennium. A conservative estimate of the needs of this department shows that with the use of rooms at their present efficiency, a net increase of five recitation rooms and four offices will be necessary. The courses in mathematics have been greatly strengthened during the past two years by the addition of elective courses in technical and engineering mathematics.

*Department of Military Science.*

All men are required to drill two periods per week during their freshman year and the subject is optional with physical training or athletics during their sophomore year. This department is seriously handicapped by its inadequate housing. In the spring of 1914, the department moved into rooms temporarily provided in the new Transportation Building for storing of arms and for office. But still the department does not have an adequate place for drilling in inclement weather and much time is lost for this reason. Other institutions of this character are erecting large buildings for this purpose. As soon as practicable, adequate facilities should be provided.

*Department of Modern Languages.*

The subject of modern languages was dropped as a required subject from the courses in engineering last year. This permitted the dropping

of one instructor in German. It is probable, however, that the unexpected increase in the number of students registering in courses in scientific German will necessitate the addition of an instructor in this subject in the near future. The Department of Modern Languages is unique among other similar departments in institutions of this character in the emphasis which has been laid upon the courses in scientific German and French in contrast to the literary and dramatic. It is estimated that within the biennium two additional recitation rooms and two more offices and a modern language library and seminar room should be provided.

#### *Department of Music.*

The Department of Music has been entirely reorganized during the past biennium. Musical instruction for which college credit is allowed is under the direct jurisdiction of the Department of Music. All private lessons for which tuition is charged are cared for by a separate organization, the Music Council. The need of proper housing and facilities for the department is urgent. The work of the department during the last year is to be commended because of its emphasis on music for the many rather than music for the few.

#### *Department of Physical Training.*

This department is now housed in a new building with adequate facilities for the best work, and takes care of the regular instruction work in physical training for which students receive credit on the books of the registrar. The greatest needs of this department at the present time are the completion of the playgrounds located west of the engineering group of buildings and a fence about the athletic field. The athletics are managed by a separate organization, the Athletic Council.

#### *Department of Public Speaking.*

It is the policy of this department to teach public speaking—not elocution. Its most important work undoubtedly is the training which it gives in extemporaneous speaking. Its courses are deservedly popular. Considerable attention is being devoted to the encouragement of literary societies.

#### *Department of Zoology.*

Considerable relief will be afforded to the Department of Zoology the coming year by the housing of entomology in the Chemistry Building and the assignment of a portion of chemistry emergency building for laboratory work in elementary zoology. As has been previously noted, it is hoped that the Department of Zoology will be housed in a building to be erected next year—a building to be shared with the Department of Bacteriology.

By the development of courses in entomology and apiculture during the coming year, the work of the department will be greatly strengthened. Probably there is no science of more importance to agriculture and horticulture than entomology.

It is probable that within the next biennium one instructor and two assistants will be needed in addition to the present staff.

## VETERINARY MEDICINE.

The Veterinary Division of this College is included in the list of accredited veterinary colleges of the United States as issued by the United States Bureau of Animal Industry. It was extensively written up and with most favorable comments in the *American Journal of Veterinary Medicine* for October, 1912. The work of the division is expanding and its value to the State is increasing, as would be expected of an institution newly provided with first class equipment and established by the State to serve live stock interests representing hundreds of millions of dollars. It should be kept in mind that the older a state becomes the more does it develop problems relating to animal disease. These are sometimes very acute. A disease may make its appearance and cause enormous losses in only a few weeks. As an insurance measure against such losses it is well to have a strong veterinary department. The work of the division along research lines, in the extension field and in the production of hog cholera serum, is referred to elsewhere. All these activities are of great value to the training of veterinarians for whom there is a large demand in Iowa and this work is the chief function of the division.

An important innovation has been tried whereby senior students are assigned for two weeks practice with leading veterinarians throughout the State. This is to give them a further insight into the many phases of the veterinarian's daily work. The students receive no compensation, but they do everything possible to assist the veterinarians to whom they are assigned. The experiment promises so well that the practice probably will be continued until a satisfactory ambulatory clinic can be organized.

Another development which was made possible by a special appropriation by the last General Assembly is the *Veterinary Practitioners' Course*, which continued one week and was attended by about seventy veterinarians who were given lectures and demonstrations and opportunity to discuss late developments of their science. This course was received with enthusiasm by the veterinarians and a marked increase of attendance is expected when the next course is given. Hereafter it will probably be conducted by the Veterinary Division and the Extension Department forces.

In 1910 the entrance requirements to the veterinary course were raised and made equal to the requirements for other college courses. There was a marked decrease in total attendance but it is interesting to note that the first class which entered under the higher

requirements graduated in 1914 eighty-five (85) per cent of its entering members, whereas the four preceding classes graduated respectively 41%, 47%, 56% and 41%. The second class entering under the new requirements, whose members are now juniors, is represented in College by 94% of its entering members.

In addition to veterinary students, the division has given instruction to a large number of students classified in other divisions, especially animal husbandry students. In one year about 100 such students take work in pathology and bacteriology, about 350 in anatomy and histology, about 100 in physiology, and about 175 in surgery.

Dean C. H. Stange points out the importance of enlarging and strengthening the veterinary faculty in order that it may keep even with the increasing demands made upon it. The undergraduate veterinary students are now increasing in number, student enrollment from other divisions is rapidly increasing, and there is a marked increase in number of graduate students. Additional help is needed also to operate an ambulatory clinic. The dean points out that members of the veterinary staff are making every effort to improve their work. Several of them are studying German in order that they may be able better to keep in touch with veterinary developments reported in that language. An urgent request is made for adequate salaries for the staff. Some of these experts have received and declined offers paying much more than they are paid by the College.

In order to keep the important lines of work in the division well balanced, Dean Stange recommends special assistance during the next biennium for the departments of surgery, practice and physiology. He says that lack of funds has forced the surgery and practice departments to practically dispense with their free clinics and charge for such work done at the hospital. This reduces the calls for help and correspondingly reduces the educational training which the students should have. In 1913-14 the record shows 1,204 surgical cases treated, of which 504 were on account of internal diseases. In physiology more work should be given on digestion. This is being called for more and more by advanced students in animal husbandry. Enterprising breeders of Iowa are going to schools in other states in search of such information which could be given here at slight additional cost. The largest benefit from stronger work along this line would come to the state through the veterinary student who later should become the reliable adviser to his many clients. Recommendation again is made for the establishment of an ambulatory clinic. For five years the need of this has been emphasized and now we find other and some smaller schools operating these clinics successfully. The plan of these clinics provides for taking a small group of students to the sick animal in the vicinity of the College. In this way many valuable cases of internal diseases, which are not otherwise accessible, are made available to the students.

In reference to funds for general support, Dean Stange points out that liberal increases are greatly needed. In some cases practically all the funds available have to be used for stenographic and janitor service, leaving very little for supplies, materials and special temporary help. The departments of pathology and anatomy have lost much valuable material for educational purposes because of insufficient funds to care for it. Better library facilities are also urgently recommended. Advanced work is handicapped by lack of scientific reference books and periodicals.

As to new buildings, Dean Stange recommends the following:

"The completion of the southwest building of the veterinary group for the research and diagnostic laboratories to relieve the pressure in some of the other buildings;

"An additional story to the pathology and anatomy wings to relieve the pressure in these departments;

"The construction of a laboratory building for biological products and a small-animal breeding building especially to relieve urgent needs of the serum and research work."

The dean also points out the importance of his division having a farm of about 160 acres to be used especially for clinical material and for research work and serum manufacture. Such a farm would be a distinct economy to a plant carrying on veterinary work of such character and in such quantity as now obtains at this College.

### POST-GRADUATE WORK.

For many years this College has given post-graduate work, but this work now has been organized as a separate branch. By action of the Board of Education on July 15, 1913, a distinct division was created to be known as the Graduate Division. The President was designated as Acting Dean, but one who can give considerable time to this work should be appointed to this position, and he should be a specialist in one of the leading lines of technical work conducted at this College and in demand by graduate students. The increase in enrollment is chiefly in agricultural lines.

The importance of developing graduate work is felt especially in connection with the training of investigators for experiment station work and teachers for college work. Already some of the leading institutions of the country are discriminating against candidates for such positions who have not earned an advanced degree. More and more also we are to feel the demand for post-graduate study from persons who are to enter into practical work but wish first to fit themselves as highly trained specialists in the different phases of agriculture, engineering, home economics, industrial science and veterinary medicine.

The graduate work is given by members of the regular college faculty and thus far they have been able to carry the additional work without materially increasing the cost. A few graduate students have a decided effect in stimulating both undergraduates and teachers to their best efforts.

### SUB-COLLEGIATE WORK.

The two-year sub-collegiate courses are making it possible for the facilities of the College to be used by a great many people who are entitled to this consideration and who will make good return to the State for the cost they incur. These courses should be further developed and made more widely known.

Gradually the introduction of vocational work into high schools will duplicate or replace certain phases of work given in these two year sub-collegiate courses, but it is doubtful if high schools ever can give the equivalent of work offered in a special two year course at a strictly technical institution.

The College is frequently urged to offer to students in the two-year sub-collegiate courses a limited amount of additional work which will enable them to qualify for teachers' positions in rural schools and schools of higher grade which do not require their teachers to be college graduates.

### IN AGRICULTURE.

The two-year course in agriculture is becoming better known and it is believed it is destined to greatly increase in enrollment and service. This course is intended primarily for young men who have finished the eighth grade but have not graduated from an accredited high school and, therefore, are not eligible for admission to the four-year courses. Other provision is made for those who are eligible for admission to the four-year courses and can remain in college only two years. The work in the two-year sub-collegiate course is very strong on the practical side but theory is given proper emphasis. There is now an abundance of evidence to prove the value of this work. The students are given every facility to advance themselves, and any student in this course, as in other courses, who is thoroughly in earnest will find that he is respected and will be assisted by his fellow students as well as by the faculty. Some of the most industrious students in the College are registered in the two-year course in agriculture. They are a credit to themselves and their communities and this institution. The records show that these young men as a rule return to their farms and put into practice what they have learned. About 99 per cent of the two-year students in agriculture are planning to live on farms.

A separate building with suitable class rooms, laboratories, and equipment should be provided for this work. Secondary schools of agriculture, similar to our two-year course, are in successful operation in Kansas, Nebraska, Minnesota, and several other states. It is not the purpose of these schools to serve as preparatory schools for college entrance, but to fit young people for practical and successful rural life.

The one-year course in dairying is maintaining its high standard.

#### IN HOME MAKING.

This course was given for the first time in 1913-14 as the result of special provision made by the last general assembly. Through it the Division of Home Economics is able to give much practical instruction on household problems to women who have not completed a high school course but have finished the eighth grade. The work has made a favorable beginning and doubtless will show rapid development if well supported.

As to the purpose of the course, Dean MacKay states that it aims to dignify all occupations of the home by placing them upon a scientific and aesthetic basis, preparing girls for the duties and responsibilities of the home, giving them a broader view of life and a knowledge and training that will enable them to meet home conditions in a thoroughly practical and capable manner. It is possible for those who complete this course to use their education to some definite purpose. The training is such that young women will be able to obtain positions as tea room managers, institutional workers, dressmakers, milliners, designers and demonstrators.

Each subject is planned in progressive sequence throughout the four semesters. A high standard of work is maintained. A systematic and proportionate use of time for study is insisted upon.

Most of the work in this course is given in the home economics, science and agricultural divisions. Work offered in agriculture includes small fruits, vegetables, landscape gardening and dairying.

The need of a practice house for laboratory work in this course is felt keenly. Additional class rooms and sewing and cooking laboratory space also are needed because of increased enrollment.

#### IN ENGINEERING AND TRADE SCHOOL WORK.

Instruction of this character for young men who have finished the eighth grade but not an accredited high school course was started in the year 1913-14 as the result of an enactment by the last general assembly. The work is new and offers great promise, especially to many young men in cities and towns who wish to acquire a useful vocation. These courses will naturally become the culmination of a State system of industrial education with further development of vocational work in the schools, as is now provided for. Students taking these courses are expected to be prepared for such positions as surveyors, road makers, mechanical and structural draftsmen, electricians, stationary engineers, construction and shop foremen and expert mechanics. After a year or two of experience courses of study can be laid down which will best meet the requirements. It is a new field of work in this State and a little time is necessary to develop it along the most efficient lines.

## SUMMER SESSION.

The Summer Sessions in 1913 and 1914 were successful from the standpoint of both instruction given and enrollment. These courses are helping to meet a great need, especially on the part of school teachers throughout the State who, under the provision of a law enacted by the last General Assembly, must prepare themselves to teach agriculture, trade school work and home economics. Some college courses are repeated in the Summer Session for the benefit of students who wish to get ahead in their work or make up shortages. Effort has been made in the Summer Session to hold down expenses for the students and with considerable success. Some families maintained camps on the border of the campus where a camping site is provided.

The enrollment in the Summer Session of 1914 was 618 as compared with 215 in 1913 and 128 in 1912. The 1914 enrollment represented 92 counties of Iowa. In the 1914 enrollment 419 were women, of whom 298 were in the grade and rural teachers' course, 25 were in the home makers' course and 96 in college credit courses; and 199 were men, of whom 10 were in the grade and rural teachers' course and 189 in college credit courses. The enrollment in 1914 included 37 school superintendents, 18 principals, 74 high school teachers, 308 grade and rural teachers, 150 college students, 5 college instructors and 19 farmers and housekeepers. In 1913 the enrollment included 55 superintendents, 40 high school teachers, 45 grade and rural teachers, 65 college students and 10 farmers and housekeepers.

In the Summer Session, emphasis is placed on the industrial subjects—agriculture, trade school work and home economics. A limited amount of work is given in other subjects to accommodate persons who are here to take one or more lines of technical work. Most of the Summer Session work is given in the divisions of agriculture and industrial science but the engineering division contributes important courses in manual training and engineering drawing. About 150 men and women, mostly teachers, were enrolled in manual training in 1914. The facilities of the engineering division are capable of accommodating a much larger number if teachers are provided. An interesting feature of the Summer Session is the conferences held during its progress. These are related especially to country life affairs.

The Summer Session has been limited to six weeks. In order to meet the demands that will be made next year, and doubtless annually, the session should continue at least twelve weeks with provision to enroll students for the first or a later six weeks period. This will necessitate a larger appropriation but it will make it possible for a great many more teachers to get the benefits of the work and prepare themselves as the recent legislation requires.

The faculty of the Summer Session each year was appointed chiefly from the regular college faculty with the addition of a few experts from other institutions.

The Summer Session Council which was created by the Board of Education in December, 1913, has general supervision of the work. It is composed of the president, the deans of the divisions cooperating (agriculture, engineering, home economics and industrial science), and the director. Professor G. M. Wilson, head of the department of agricultural education, serves as director. He points out that while the student enrollment increased about 188% from 1913 to 1914, the cost per student fell from about \$36.50 in 1913 to about \$19.50 in 1914, owing to economies that could be effected with the larger classes.

Director Wilson also calls special attention to the very large increase of enrollment of rural and grade teachers. This is in part due to the action of the Board of Education whereby free tuition is allowed rural and grade teachers. This action was taken to make the tuition charges here conform to the general practice of the State.

Work for these teachers' courses was given in accordance with the rules of the State Board of Examiners requiring that courses in agriculture, manual training and home economics be offered for the entire six weeks period. As supplementary work, a limited amount of instruction was given in the common branches, didactics and in the first grade certificate subjects.

Instruction in connection with the model school, which was given to teachers only as supplementary to vocational courses, proved to be popular with the pupils, all of whom came from the vicinity, as well as with the teachers. Vocational training was included with other subjects for the pupils. In a large way the school served as a model for rural and grade work.

It is interesting to note that in the rural and grade teachers' course there was a very general selection of industrial subjects, while the selection of common school and first grade certificate subjects was scattered and there was relatively a small number in these latter courses.

College credit courses were offered in 1914 in several departments. Because of pressure from the State Department and the recommendation of the Educational Council of the State Teachers' Association, many

teachers preparing for high school work enrolled in College credit courses instead of in the general courses. This increased the enrollment in College credit work which was as follows, by departments:

Agricultural education .....	76	Farm crops .....	95
Agricultural engineering .....	19	Home economics .....	56
Animal husbandry .....	116	Horticulture .....	35
Bacteriology .....	21	Mathematics .....	11
Botany .....	23	Mechanical engineering .....	48
Chemistry .....	61	Physics .....	15
Dairy .....	13	Poultry .....	12
Economics .....	13	Psychology .....	27
English .....	36	Soils .....	40

The high character of the students' work in the Summer Session was commented upon by the instructors. A study of grades made in the summer and corresponding grades in the regular college year seemed to show conclusively that the Summer Session work is thoroughly well done.

Much good should come from the rural life conferences held in connection with the Summer Sessions. The attendance was 77 in 1913. In 1912 it was 20. In 1913 Professor T. N. Carver, of Harvard University, gave daily lectures on rural economics. Many Summer Session students attended these lectures and others given by agricultural experts. Local ministers were especially helpful in developing the rural life conferences. United States Commissioner of Education, P. P. Claxton, was a speaker at this conference in 1914.

Examinations for teachers' certificates were held at the College each year. In 1913, 13 teachers took the June examination and 27 the July examination. In 1914, 121 took the examination in June. Director Wilson calls attention to the fact that the legislation regarding vocational work in schools is only one phase in a general movement looking toward the modification of courses of study and the more general introduction of the useful vocational studies into the common school curricula.

In connection with the summer work excursions are arranged, general lectures are provided and a few social functions are held.

## WINTER COURSES.

The service and value of the winter courses in agriculture are well known throughout the State. The work is both educational and inspiring. It is given during the winter vacation when regular college students are at their homes; thus the whole equipment of the college is available. The agricultural courses have included work in home economics. In the winter of 1913-14, similar courses were given for the first time in certain lines of engineering work and trades work. These courses could be extended to the great advantage of many people who would profit by a little additional technical training.

## IN AGRICULTURE AND HOME ECONOMICS.

The short winter courses in agriculture have been continued as usual. The last one extended from December 29, 1913, to January 9, 1914. It included instruction in Agronomy, Animal Husbandry, Poultry, Dairying, Horticulture, Soils, Agricultural Engineering, Home Economics and Botany. All who come with a real desire to learn are admitted to these short courses and the attendance includes men and women, boys and girls. Sometimes father and mother and children come together. Instruction is given chiefly through lectures and practical exercises in the laboratories and stock judging pavilions. The class work is scheduled from 8 a. m. to 5 p. m. daily, except Sunday, and educational programs are provided for most of the evenings. Some of these evening programs are in charge of agricultural associations which hold their meetings during the short course period.

Registration in the last two short courses was as follows:

1912-13 .....	691
1913-14 .....	658

Special Silo Schools were held in 1912-13, which were attended by 73 persons.

## IN ENGINEERING AND THE TRADES.

An innovation was made during the holidays in 1913-14 in the starting of short courses for persons engaged in engineering work and the trades. The subjects and dates of these courses were as follows:

General Engineering Subjects...	Dec. 29, 1913 to Jan. 9, 1914
Highway Engineering.....	Dec. 29, 1913, to Jan. 7, 1914
Interior Painters and Decorators.....	Jan. 6 to 9, 1914

The number in attendance at each was as follows:

General Engineering Subjects.....	51
Highway Engineering .....	81
Interior Painters and Decorators.....	57
Total .....	189

These courses were the result of action by the last General Assembly which made definite provision for starting engineering and trade school extension and short courses in connection with the work of this College. The need of such courses cannot be questioned. Their popularity seems to have been established by this effort.

The painters were a high type of men, ambitious to learn the best and they spent their time most diligently. A resolution adopted by the Master House Painters and Decorators of the United States and Canada at their meeting in Cincinnati, in March, 1913, shows the feeling of this craft towards their special short course work. It is as follows:

It was moved and seconded that the president and faculty of the Iowa State College be commended on their advanced progressiveness in the matter of educating the young men in the building trades, and that we, the International Association of Master House Painters and Decorators of the United States and Canada, send them fraternal greetings, with the desire that every effort put forth by them will be successful, and that we stand ready and willing to furnish every aid of whatsoever description possible toward the success of their undertaking.

The county engineers in their special short course found much to instruct and interest them. One such officer who had attended every session regarded the short course as a big event in his life.

#### IN VETERINARY MEDICINE.

Reference to the short Veterinary Practitioners' Course will be found in connection with the report on collegiate work in the Veterinary Division

---

### COLLEGE FUNCTIONS.

---

At Commencement in 1913 the baccalaureate sermon was delivered by Rev. Charles R. Henderson of Chicago University and the commencement address was delivered by Gov. Adolph O. Eberhart of Minnesota. At Commencement in 1914 the baccalaureate sermon was delivered by President Henry Churchill King of Oberlin College and the commencement address by Dean A. W. Small of Chicago University.

#### RELIGIOUS SERVICES.

On account of the distance of the campus and the principal student residential portion of the city from the city churches and in order to allow our student body to hear the best ministers of the day, the practice has long been maintained of having Sunday morning chapel services with non-resident speakers. All leading denominations are represented, including Protestant and Catholic. The services formerly were held in the chapel in Morrill Hall but that room was not large enough and they are now held in Agricultural Auditorium and a larger room should be available for this purpose. The daily morning chapel services from 7:45 to 8:00 are attended by from 100 to 400 students and faculty members. All these religious services are attended voluntarily.

#### CONVOCATIONS.

On rare occasions throughout the year the entire College work is suspended for a half hour or an hour and students and faculty gather in the gymnasium for a special address or celebration. On these occasions the speakers have been the president of the College, Senator W. S. Kenyon, Governor Clarke, Ex-Secretary of Agriculture James Wilson, and others. A convocation held March 12, 1913, was in honor of Secretary Wilson, who long served in the faculty of this College and was called from here by

President McKinley to accept a place in the President's cabinet, where he made a record for a continuous service of sixteen years as well as a record for his supervision of the department during a period of great development in agricultural affairs. This convocation was attended by many notable persons of the State. It was followed by a banquet for the guest of honor which was provided for jointly by members of the faculty and business men of Ames.

Governor Clarke spoke on "The Day's Work of a Governor" on October 24, 1913.

Other speakers who have addressed audiences at the College during the biennium are the following:

Dr. J. M. Coulter, Head Professor of Botany, University of Chicago, December 13, 1912, "Relation of Science to Agriculture."

Dr. Herbert N. McCoy, Professor of Physical Chemistry, University of Chicago, on "Radium and Radio-activity," April 18, 1914, under the auspices of the Department of Chemistry.

Professor C. C. Nutting, Head of the Department of Zoology of the State University of Iowa, on the "Making and Use of a Research Museum in Zoology," February 28, 1913.

Bishop Theodore Henderson, February 11, 1914.

United States Senator Wm. S. Kenyon, November 10, 1913.

Ex-Secretary James Wilson, March 12, 1913.

Mayor James R. Hanna, of Des Moines, on "The Day's Work of a Mayor," May 19, 1914.

Frederick B. Wright, of Washington, D. C., Travelogue Lecture on "Children I Have Seen in Different Lands," March 17, 1914.

Dr. Crocker of the University of Chicago, on "Vegetable Physiology," April 30, 1914.

Plans are being made for free lectures by prominent persons to be given at intervals next year and at a time when students and faculty generally will be able to attend. These lectures will occur usually late in the afternoon. They will cover subjects of general interest and they will be planned so as to emphasize their educational and broadening influence, often referred to as "cultural."

#### MUSIC.

To a large extent the music events of the College are directed by a Music Council which is organized under special action of the Board of Education. Among the attractions brought to Ames by the council in 1913-14 was the Minneapolis Symphony Orchestra, which drew an audience of nearly 1800 people. This shows the appreciation of the community for high class music. A concert of this character has high value in a college community, and plans are being made for more such self-supporting entertainments in the future.

## INTERCOLLEGIATE ATHLETICS.

By action of the Board of Education, intercollegiate athletics are under the management of the Athletic Council, which includes the President of the College, who is chairman, the Treasurer of the College, who is treasurer, the ranking professor in the Physical Training Department, two to four members of the faculty and four students. From receipts from games and contributions the council bears the expense of all such contests, including the expense of coaching and training teams for these purposes. State funds are not used for the support of intercollegiate contests. The greatest emphasis is placed upon clean, honorable playing. This College is among the leaders in suppressing unfair and dishonest practices in athletics. One of the chief methods by which athletic games and relationships are being improved is through the growing policy of leaving final authority with the College faculty, as has been provided for this College through the organization of the Athletic Council.

## ALUMNI BUREAU.

During the biennium, the Alumni Association established a bureau with permanent headquarters in Alumni Hall, and with Professor Ward M. Jones as secretary. This bureau is rendering valuable service to the College by maintaining a directory of all alumni and helping to maintain their interest in their Alma Mater. It means much to the alumni to have their own headquarters where they may call for information and where they may meet when returning to the College.

The measure of work done by a college is best shown by the Alumni. Many an institution regards its Alumni body as its strongest resource. In such case the Alumni are well organized and are enthusiastic supporters of the institution. It means much to this College that the Alumni are giving attention to more efficient organization and cooperation.

### THE CAMPUS.

Necessarily there are changes on the campus when an institution is rapidly growing and new buildings are being erected, but with all the changes a determined effort is being made to preserve the central quadrangle from encroachment and to preserve the hilly ground on the south side of the main campus as an attractive natural park. The problem of campus development has been studied by eminent landscape architects and, in the main, their reports are in harmony. So far as possible their ideas are being carried out, but the institution is now larger than they or perhaps anyone in their time supposed it could be. The further services of a landscape architect are now needed. Superintendent Sloss is entitled to much credit for his efforts to preserve the natural beauty of the campus.

The trolley line has been re-located by diverting it east of the central power plant and carrying the track directly toward the veterinary buildings. This has eliminated two very sharp curves and makes it possible to bring locomotives to the new transportation laboratory. It also vacated a site needed for the new greenhouses.

Arrangements have been made with the aid and coöperation of the State Board of Control for opening a road northward from the campus in extension of the road passing the front of the veterinary buildings. This road will be carried over a concrete bridge crossing Squaw Creek and will connect with the public road north of the College property. It is expected also to open a road on the south side of the Chicago and North-Western Railroad right of way from near the east line of the campus to the "north road" and later to extend this westward to connect with the road to Ontario near the northwest corner of the college grounds on the south side of the railroad. Another improvement made possible through the assistance of the Board of Control is the filling of the ditch adjacent to Boone street and almost directly south from the agricultural building. This ditch has long been a dangerous place as well as most unsightly. In these improvements and certain other campus improvements the College has availed itself of convict labor, a camp being established, and from about twenty to fifty convicts being employed. From the standpoint of the College this labor was satisfactory.

## BUILDINGS AND LAND.

## BUILDINGS.

Special effort is made at all times to keep the buildings in good repair and clean. The newer buildings are fireproof, or practically so, but in these and all others fire precautions are observed. Nevertheless the College suffered a heavy loss in the spring of 1913 when the old chemistry building was totally destroyed by fire. The origin of the fire could not be determined. The building contained much wood construction and this with chemicals in almost every room made it impossible to successfully fight the fire, although streams of water were soon running and an abundant supply of water was available.

The efficiency of class rooms and laboratories has been made a subject of study by a special faculty committee. Through their efforts some changes have been made in the schedule to more evenly distribute the demands on building space. There is, however, in several departments a great shortage of class rooms and laboratories.

The gymnasium which was started in the previous biennium was finished before the close of the first year of the biennium. The Steam and Gas Engine Laboratory was also completed comparatively early in the biennium. These have afforded much needed space and relief. The completion of the Gymnasium has permitted systematic physical exercise for hundreds of young men who were seriously in need of it. Young men coming to college from active work, often out of doors, must have more or less vigorous exercise along with their college studies if their health is to be maintained. The Gymnasium furnishes a suitable meeting place for large gatherings. Heretofore it has been impossible to get even one-half of the College community into the largest available room on the campus. In warm weather tents have been hired for important large meetings such as Commencement. The Gymnasium also provides splendid accommodations for the State Corn Show and for various College social functions.

The women's gymnasium facilities in Margaret Hall have been greatly improved by constructing locker and shower bath quarters in the basement under the gymnasium floor. Heretofore the space has been unused. It required only a little excavating and some underpinning for the walls to make the space available for improve-

ment. It is hoped that a swimming tank can be provided for the young women students in additional space under the gymnasium which is available for this improvement.

The available working space in Old Agricultural Building has been greatly increased also by making the basement usable, which has been done at small cost.

The old building formerly occupied by the Veterinary Division, which has been used as a store house, has been repaired and now provides headquarters for the construction and repair forces of the College under the direction of the Superintendent of Grounds and Buildings, and also for their materials.

The new Chemistry Building, which was begun in June, 1913, was finished in time for beginning the work of 1914-15. It is located north of Central Hall and just north of the trolley track. This building is fireproof. It has especially secure and safe storage for dangerous chemicals. It is built with a view to economy and efficiency. The plans were made after a study of plans of the best chemistry buildings in other States, and we believe we have secured the most possible for the money expended. The materials are brick, steel and concrete. It is as plain a building as a factory, and lighted and ventilated as well as possible. The new building contains slightly over 100,000 square feet of floor space. The cost of the building without equipment is approximately \$250,000. It should be remembered that a large amount of chemistry work is required in the technical courses offered at this College. Next year approximately 1,800 students will be registered in chemistry courses. This large registration brings the number of square feet of floor space per student in the new building considerably below the space allowed in other institutions of the same grade, yet it is expected that first class work will be done. The building is a little larger than was intended because it was found that wing space planned for the future could be provided with the main contract at a remarkably low figure and it was considered the best economy to have it built at once, deferring some other building needed. This has resulted in making it possible to loan a limited amount of space in the Chemistry Building to other overcrowded departments.

The locomotive and automobile testing laboratory, which is a shop building costing about \$65,000, was practically completed during the biennium. It stands west of Engineering Annex. Acknowledgment is made to President Gardner of the Chicago and North-

Western Railway Company, who arranged for Mr. R. Quayle, General Superintendent of Motive Power and Car Department, and Mr. W. E. Dunham, Supervisor of Motive Power and Machinery, to visit Ames and assist in completing the plans for this building. It is admirably adapted to instruction work such as a college should give in connection with locomotives and automobiles, their construction, power and efficiency. In these times men having scientific training along the lines indicated are in demand.

A new building for plant industry work, especially horticulture, was practically finished during the biennium at a cost of about \$60,000. This building is located directly north of the auditorium of the Agricultural Building and is planned to constitute the southeast wing of a future building corresponding to the present Agricultural Building and standing about five hundred feet directly north of it. Attached to the building are greenhouses covering above one-half acre of ground. They will afford much needed space and facilities for giving instruction in plant propagation, plant breeding, truck gardening and commercial floriculture. The last two items represent very large and rapidly growing interests in the State. Credit for assistance in planning the greenhouses is given to Mr. Wesley Greene, Secretary of the State Horticultural Society, Mr. I. O. Kemble of Marshalltown, Mr. J. W. Dunford of Sioux City, Mr. C. N. Page of Des Moines, Mr. Roy F. Wilcox of Council Bluffs, Mr. Blaine C. Wilcox of Council Bluffs, Mr. Merritt Greene of Marshalltown, and Mr. J. S. Wilson of Des Moines, most of whom are engaged in greenhouse work on a large scale and all of whom are deeply interested in the development of this industry along right lines. These gentlemen visited Ames and advised with members of the faculty concerning the location and arrangement of the new greenhouses. The location was decided after much careful study. It seemed to be the best from the standpoint of sunshine throughout the entire day as well as accessibility for large numbers of students who can use the greenhouses in this location for short periods of spare time when they could not do so if the building were at some distant point. This location also will be a convenience to the many visitors on the campus.

The dormitory for women, to cost about \$55,000, will be ready for occupancy about the first of January, 1915. This building, which is fireproof up to and including the attic floor, is a special

credit to the architects, Proudfoot, Bird & Rawson, because of its excellent arrangement and its very low average cost per occupant. The building is of brick and Colonial in style. It is intended to accommodate seventy-four young women students, but more will be cared for when it is possible to use in this way additional space in the building that will become available on account of completing plans to heat the building from the central heating plant instead of by an individual plant. The location for this building, on an attractive elevation across the valley southeast of the Dairy Building, was determined after receiving an opinion from the Attorney General to the effect that it would not be necessary to place the building adjacent to Margaret Hall, which is not a fireproof structure. The site selected seems to be ideal for a group of dormitory buildings for women. It is planned to make this new dormitory entirely self-supporting, and preliminary estimates show that this will be possible with reasonable charges for rooms and meals.

The State has purchased the residences on the campus formerly belonging to Professor Holden and Mrs. Beardshear. The latter home was built after the death of President Beardshear, by his family, but they now wish to have a smaller house and it proved to be advantageous for the College to take this property and use it together with the other residence for young women students.

The main agricultural building has been considerably relieved by transferring work which has been conducted in that building to suitable space in other buildings. The Chemical Section of the Agricultural Experiment Station is now well located in the new Chemistry Building, and the Agricultural Extension offices and the document rooms have been transferred to Morrill Hall.

Another increase of equipment, which is equivalent to a laboratory building, is the experimental farm located two miles south of the campus and purchased about one year ago. This farm is well adapted to its use for field and crop experiments and is destined to produce results of great value to the State.

Inexpensive buildings have been erected a short distance north of the veterinary group for the manufacture of hog cholera serum. A somewhat more distant location would have been better but with the limited appropriation and other limitations it was not possible to build elsewhere.

Much should be said concerning the need of new buildings. The increase of student enrollment produces the most urgent need. When this has been met the State doubtless will wish to replace

some of the old and unsuitable buildings with others that are safer and better but now no building can be spared if it will protect from rain and cold. A temporary wooden shed of the cheapest construction possible was erected as an emergency building for the chemistry department after the old building was burned and when the new one was under construction. It was expected to use this temporary building only one year but when the chemists moved out of it, four urgent requests were filed by department heads who wished to use it, and it has been allowed to remain although it is not as well built a structure as many a barn or cheap warehouse in the State.

New buildings which are greatly needed include the following: Library, auditorium, dormitories, animal husbandry building, science building, hospital, home economics building, dairy cattle barn, physics building, agricultural engineering building, poultry building, beef cattle barn, judging pavilion and drill hall, abattoir, rifle range, an addition to the dairy building and an addition to the veterinary buildings.

Facilities for furnishing pure and clear water for use on the campus are again asked for. At the present time there is a good water supply but the water contains much iron and often it is as brown as coffee when drawn from spigots in the buildings. It is estimated that a settling and storage tank with filter could be provided for \$15,000.

#### LAND.

Additional land is needed for the following purposes:

Dormitory space and exercise grounds near the campus. . .	\$35,000
An animal husbandry farm of about 200 acres—estimated	
value of land and buildings. . . . .	60,000
A horticultural experimental farm. . . . .	10,000
A veterinary research farm. . . . .	32,000

Special arguments for the buildings and land indicated will be found in connection with the tabulated statement of askings and in connection with the reports on educational work.

## EQUIPMENT.

---

Reference should be made to the Secretary's report for a full statement of equipment of the College.

With the appropriations available for equipment it has been impossible to replace that which should be discarded because of age or poor condition and increase the equipment in proportion to the demands of the increased number of students. A liberal increase of the appropriation for equipment is recommended. Especially is this increase needed because of the loss of equipment in the Chemistry Building fire. As the State does not carry insurance on its property it becomes necessary to replace the chemistry equipment from State appropriations. The purchase of much department equipment has been postponed by necessity of getting equipment for new buildings, which has drawn heavily upon the limited funds. Although there are many urgent needs at this time only two others will be mentioned here: Books for the Library and live stock. A considerable fund could be used to advantage in respect to both of these kinds of equipment.

It is a pleasure to record the gift of an oil painting portrait of President S. A. Knapp from the Class of 1884. At present this hangs in the President's Office but it is hoped that when a new Library Building is erected a better place may be provided. A similar gift is acknowledged from the family of Professor Isaac P. Roberts, who was in charge of the agricultural work for a period in the early days of the College. It is planned also that this portrait will occupy a prominent position in a permanent College building.

## ADMINISTRATIVE WORK.

---

While all administrative matters are subject to the approval of the Board of Education, there are many which need not be considered by the Board because they are merely incident to carrying out policies already established. The President's Office is the chief administrative office of the College but a large volume of work is handled elsewhere.

The Secretary's Office serves as a college auditing office and keeps records concerning available funds, bills, expenditures, and balances. This office also keeps records of meetings of the Board of Education and the Finance Committee in so far as matters are transacted which relate to this College. In the same office the work of the Junior Dean is cared for. This involves close scrutiny of class standings of all freshman and sophomore students and personal conferences with such students as need individual attention on account of the character of their records. The Junior Dean also classifies or assigns to classes all freshman and sophomore students. This has become an intricate and difficult task because of the necessity of keeping classes filled to the proper number and yet not overcrowded and because of the many conflicts that occur in the schedules of students.

The Treasurer's Office cares for all funds and is comparable with a bank. Funds are received and paid out as directed by the Finance Committee, the Board of Education, or, in certain routine and emergency matters, as directed by the Secretary's Office. The Treasurer's Office serves also as the registration office for the College. All students are listed here. The Purchasing Committee for the College is associated with the Treasurer's Office. This committee is charged with the responsibility of issuing orders for supplies and securing bids when the order is of sufficient importance.

The deans of the various divisions and the dean and vice-dean of the Junior College with the President constitute the Board of Deans, which meets weekly. This body does not legislate but takes under consideration the uniform administration of policies and rules throughout the entire institution. As stated elsewhere, the Faculty is the legislative body for the College.

One of the pleasant functions of the President's Office is to receive visitors. It is worthy of note that in June, 1913, Dr. Lauro Muller, the Brazilian Minister of Foreign Affairs, accompanied by military and naval aides representing the Brazilian and the United States governments, spent a day at the College with a view to getting suggestions for the development of educational work in Brazil. And in June, 1914, about sixty prominent eastern advertising men started a tour of Iowa by visiting this College. On account of the difficulty in securing special railroad rates, the College does not have as many excursions as in former years, yet very many visitors come to the campus throughout the year. In April, 1914, 318 Clay County farmers and their families visited the College.

The clerical work in the administrative offices is increasing rapidly, as would be expected on account of the increasing enrollment and campus developments. The College has been very economical in respect to this kind of service but some increases should be made in the near future. It is likely also that ways will have to be devised to relieve some of the administrative officers from the details which they are now forced to carry, to the detriment of more important duties which they should perform.

The supervision of the campus and the College buildings is in charge of the Superintendent of Grounds and Buildings, who reports directly to the President. The superintendent also has supervision of the College heating plant and the workmen employed on the campus for general purposes, including janitor work in the buildings.

The College Hospital is supported by a reservation of two dollars from the incidental fee of each student. A physician and trained nurse are in constant attendance. In February and March, 1914, there were several mild cases of small pox which led to the required vaccination of all persons in the College who had not been thus protected. The hospital is rendering a most important service as indicated by its report for the last two years on the number of cases handled, which is as follows:

	1912-13	1913-14
Total number of bed cases.....	264	367
Total number of dispensary cases.....	16,401	21,311
Total .....	16,665	21,678

In 1912-13 there was one fatal case (typhoid), and in 1913-14 one fatal case (pneumonia).

A new hospital is urgently needed. Last year there were times when more than a score of students were obliged to remain in their boarding houses when they should have been cared for at the hospital.

The official publications of the College include the following:

Catalogue, college directory, and publications giving information in regard to the College and its courses of instruction.

Bulletins of the experiment stations.

Bulletins of the extension departments.

## FINANCES.

The financial operations of the College are given in detail in the reports of the Secretary and Treasurer. The State appropriations which will be available in 1913-14 for regular teaching work at the College and for equipment, maintenance of equipment, improvements and contingent requirements are as follows:

Acts and Purposes	Educational work at Ames	Equipment, repairs, improve- ments, etc.
212-1-32-1907-Support	\$ 135,000	
215-1-32-1907-Additional support	20,000	
212-1-32-1907-Book and periodicals		\$ 2,400
212-1-32-1907-Contingent and repair		23,000
244-2-33-1909-Additional support	15,000	
244-2-33-1909-Repair, minor improvement and contingent		13,000
244-2-33-1909-Library book fund		2,500
200-3-34-1911-Additional support	25,000	
200-3-34-1911-Additional support	50,000	
200-3-34-1911-Two year Agricultural course	25,000	
228-2-35-1913-Millage tax including—		
Additional support of collegiate departments	125,000	
Repair and contingent		10,000
Maintenance and improvement of grounds		10,000
Enlargement of buildings and small additional buildings		10,000
Equipment of departments and buildings		40,000
Two and four year home economics	20,000	
Veterinary practitioners' short course	5,000	
One and two year non-collegiate courses	12,500	
Totals	\$ 432,500	\$ 110,900

National funds, including endowment funds, available for educational work amount to practically \$85,000.00.

A one-fifth mill state tax provides a fund which is used for the construction and equipment of buildings.

It is desirable to emphasize that a large part of the appropriations made to the College are for the support of other lines of work than teaching at the College. These are referred to elsewhere. The error is frequently made of assuming that Experiment Station funds and all other money appropriated for the College are used for regular instruction work.

The administrative officers of the College and the Finance Committee of the Board have found it difficult during the past year to care for needed expenditures, and the pressure became so heavy that a few weeks before the end of the fiscal year it became necessary to revoke all Educational Support Funds which had been allotted to the different departments, but not already expended, in order that this money might be used as was most urgently demanded on account of caring for the increased enrollment of students. Similar action was taken in reference to Equipment Funds.

The financial needs are stated elsewhere. It is obvious that the College should have as much support as it is now receiving and an additional amount because of its growth. The increase of educational funds being recommended is with a view to making the teaching staff, equipment and other facilities suitable for the present demands. If this is done it is believed that the faculty will gladly take care of the additional students who come during the next biennium as has been done during the last biennium. The developments taking place in other states, including liberal funds raised by special millage taxes, offer additional reason for liberality to these educational needs in Iowa, whose young men and young women should have the best possible opportunities.

Respectfully submitted,

R. A. PEARSON,  
*President.*

INDUSTRIAL SERVICE, INCLUDING EXPERIMENTAL AND EXTENSION WORK; RECOMMENDATIONS AND REPORTS.

---

LETTER OF TRANSMITTAL

---

IOWA STATE COLLEGE OF AGRICULTURE  
AND MECHANIC ARTS.

---

*To the Iowa State Board of Education:*

Gentlemen—I have the honor to submit to you herewith recommendations for appropriations for industrial service, including experimental and extension work, at and from the Iowa State College of Agriculture and Mechanic Arts in the biennium July 1, 1915, to June 30, 1917. Also, I hand you herewith my report on such work in the biennium July 1, 1912, to June 30, 1914.

Very respectfully,

Ames, Iowa,  
September 23, 1914.

R. A. PEARSON,  
*President.*

APPROPRIATIONS RECOMMENDED FOR INDUSTRIAL SERVICE, INCLUDING EXPERIMENTAL AND EXTENSION WORK IN THE BIENNIUM JULY 1, 1915, TO JUNE 30, 1917

---

*A. Present Appropriations to Be Continued Annually.*

Note—These items are referred to in connection with list of askings for educational items provided by millage tax. Their renewal does not represent an increase, but will provide for continuation of work on the present basis.

*B. Additional Maintenance for Industrial Service, Including Experimental and Extension Work Annually, Beginning July 1, 1915.*

Appropriations for experiment station work, investigations, and extension work are in the interest of protection of property, discoveries and the development of the natural resources of the State. Such expenditures are returned many fold to the wealth of the State. Large sums can be used to advantage. The following items indicate some of the more pressing needs along these lines:

1. Agricultural Experiment Station.

New problems continually arise on the farms and affect the welfare of the entire State. Perhaps the greatest of these for a number of years is a new disease of the corn plant. The value of the annual corn crop of Iowa is over two hundred million dollars. Experts estimate that the value was reduced by at least ten million dollars by the mysterious corn disease or diseases which were found scattered over a considerable area of the state in the season of 1914. Another great economic problem is furnished by the ravages of the Hessian fly. Other serious problems are awaiting satisfactory solution, and vast amounts of money and values in property are at stake. Studies of such problems cannot be properly undertaken with the current funds of the experiment station and an additional appropriation of at least \$50,000 could be used profitably. With this addition, the funds for agricultural experimental work in Iowa will still be less than the funds in several other states, including Illinois, Minnesota, California, Ohio, and Kentucky.

2. Engineering Experiment Station.

The efficient combustion of Iowa coal, the study of water supply and sewage disposal, the investigation of drainage, and road problems are questions needing attention, and their solution means hundreds of thousands of dollars to the state in the saving of waste and protection of health. An appropriation of at least \$16,000 would permit work to be started and enlarged along the lines indicated.

### 3. Veterinary Investigations.

New animal diseases frequently appear. These sometimes cause enormous losses. Complications have now appeared in connection with hog cholera. Two other new and threatening animal diseases have appeared in the state, not including foot and mouth disease. Live stock worth four hundred million dollars is concerned. Fifteen thousand dollars would provide for additional experts and the investigation of live stock maladies on a more satisfactory scale.

### 4. Agricultural and Home Economics Extension.

During the biennium, \$53,250 will become available from the United States government for extension work in agriculture and home economics, provided the state equals these appropriations, under provisions of the Smith-Lever law. The amount required, therefore, would be \$26,625 each year of the biennium. The funds appropriated by the State, as well as those from the federal government, are to be administered by the State College in accordance with plans approved by both the United States government and the College. It will be necessary, however, for the State legislature to formally accept the appropriations from the United States government and the general terms of the law directing their expenditure for agriculture and home economics. Such acceptance has been given already by the Governor of the State pending action by the Legislature. Increased appropriations from nation and State also would permit increasing the valuable work being done by county experts stationed throughout the State. It would permit further extension of agricultural and home economics knowledge through the usual lines and by correspondence courses, and especially it would permit home economics work to be carried on in connection with engineering extension work already provided for.

### 5. Engineering Extension.

Large numbers of young men in cities and towns, as well as many young women, would be glad of an opportunity to improve themselves along engineering or trade school lines by aid of correspondence courses, similar to the work which has been carried on with great success in Wisconsin. Courses in the trades are being called for, and enough of this work has been given to prove its popularity and value. Such courses are offered at points throughout the State and are comparable with the agricultural short courses. Additional instruction is needed also in manual training for schools. An appropriation of \$15,000 would make it possible to develop these useful lines of work.

### 6. Serum Production.

Attention is invited to the question as to whether the hog cholera serum plant should be enlarged. The law passed by the Thirty-fifth General Assembly to provide for the manufacture of hog cholera serum, also requires certain executive work in connection with serum made elsewhere; it would seem a special appropriation for this work should be made rather than to require it to be supported from income from the manufacture of serum.

REPORT ON INDUSTRIAL SERVICE WORK, INCLUDING EXPERIMENTAL AND EXTENSION WORK, IN THE BIENNIUM JULY 1, 1912, TO JUNE 30, 1914.

---

EXPERIMENTAL WORK.

The chief developments of the biennium in experimental work were the establishment of the new experimental farm, and the beginning of veterinary investigations, especially in reference to hog cholera, as provided for by the Thirty-fifth General Assembly.

AGRICULTURAL EXPERIMENT STATION.

That the Agricultural Experiment Station is appreciated by the people of the State is shown by their requests for advice and their urgent appeals for help when a pest or other trouble which is new and not understood presents itself. The Corn Belt Meat Producers' Association in December, 1913, passed a resolution commending the practical work done at the Experiment Station in reference to feeding and management of cattle, hogs, and sheep. And they expressed their particular interest in continuing this work to include the production cost of calves raised on Iowa's high priced land, with a view to demonstrating the possibilities of profitable beef production in this part of the corn belt and with the marked change of land values.

The newest and largest problem, apparently, that has come to the Experiment Station is a peculiar condition of corn, which indicates a disease of the corn stalk. With this affection, the corn stalks are easily broken at the joints and much of the corn is down. The disease has been found in central, western and southern Iowa. How much farther it has extended is not known. The trouble locally, generally, has been attributed to worms or windstorms, but expert investigation has convinced the farmers concerned that these causes were not responsible. It appears that the trouble may be a combination of fungous diseases. One fungus attacks the roots, causing them to become red and decomposed; another attacks the

joints, breaking down the pith and causing the plant to break off. The losses due to this disease in 1914 are estimated to considerably exceed ten millions of dollars. Much careful work will have to be done in the laboratory and in the field to determine the life history of the fungi and conditions affecting them.

The importance of further studying the soil fertility problem has been strongly emphasized. This subject becomes more important each year because of the heavy losses being incurred under our system of farming. In the Mississippi Valley farmers are doing what was done in New England, New York, and other Eastern states years ago. They are decreasing their wealth of plant food. They are not putting into the soil as much as is taken out. This subject should receive far more attention than it is now getting. Attention is invited to statements concerning the importance of agricultural experiment station work and recommendations as published in the last biennial report of the Board of Education.

The following is from the reports of Director Curtiss for the two years of the biennium:

Investigations were completed and publications issued, as follows:

Agronomy: Bulletins numbers—133, Growing Winter Wheat in Iowa; 135, The Germination Test of Seed Corn; 137, Alfalfa Management in Iowa; 138, Silver King, A Corn for Northern Iowa; 150, The Fertility of Iowa Soils; 150 (popular edition.) The Fertility of Iowa Soils. Research Bulletins numbers—8, Bacteria at Different Depths in Some Typical Iowa Soils; 9, Amino Acids and Acid Amides as Sources of Ammonia in Soils; 11, Methods for Bacteriological Examination of Soils; 13, Bacteriological Studies of Field Soils III, the Effects of Barn-Yard Manure.

Dairy: Bulletins numbers—134, Bacteria and Ice Cream; 139, Creamery Organization and Construction; 140, Lacto, A Frozen Dairy Product. Research bulletins numbers—14, The specific Heat of Milk and Milk Derivatives; 15, A Bacteriological Study of Blue Milk.

Chemistry: Research Bulletins numbers—7, The Volatile Aliphatic Acids of Corn Silage; 12, Chemical Studies of Lime-Sulphur, Lead Arsenate Spray Mixture; 10, Lactic Acid in Corn Silage.

Horticulture and Forestry: Bulletins numbers—127, Spraying Practice for Orchard and Garden; 142, The Wood-Using Industries of Iowa; 144, Cold Storage for Iowa Grown Apples; 148, Effect of Potato Scab Treatment on Seed Vitality; 149, Better Methods of Potato Production for Iowa.

Agricultural Engineering: Bulletins numbers—139, Creamery Organization and Construction (in cooperation with Dairy Section); 141, Modern Silo Construction.

Animal Husbandry: Bulletins numbers—136, Forage Crops for Swine; 143, Hogging-Down Corn.

Botany: Bulletins numbers—145, The Effect of City Smoke on Vegetation; 146, Iowa Seed Analyses, 1910-1913.

Entomology: Bulletins numbers—147, the Codling Moth in Iowa.

Circulars were issued as follows:

- No. 2, Liming Iowa Soils (Reprint).
- No. 3, Growing Alfalfa in Iowa.
- No. 4, Good Seed Corn for 1913.

- No. 5, Unlawful Iowa Weeds and Their Extermination.
  - No. 6, Feeding Corn Silage to Farm Animals.
  - No. 7, Bacteria and Soil Fertility.
  - No. 8, Inoculation of Legumes.
  - No. 9, Farm Manures.
  - No. 10, Green Manuring and Soil Fertility.
  - No. 11, Smut in Small Grains.
  - No. 12, Soiling Crops to Supplement Iowa Pastures.
  - No. 13, Potatoes.
  - No. 14, Some Common Internal Parasites (Worms) of Hogs and Their Treatment.
  - No. 15, Testing Soils in Laboratory and Field.
  - No. 16, Care, Feed and Management of the Dairy Herd.
  - No. 17, Rearing Chicks Successfully.
  - No. 18, Iowa 403, A. New Seedling Apple.
- Press Bulletins were issued as follows:
- No. 33, The Variegated Cutworm.
  - No. 34, Soil Experiment Fields for Iowa.
  - No. 35, Tuberculosis in Farm Poultry.

The above publications include 1,366 pages and the total number of copies in all editions exceeded 800,000, representing about ten million printed pages for each year of the biennium.

A large amount of material, showing results of investigations completed during the biennium awaits publication, and many other investigations are in progress. A valuable line of experiments is being conducted with the United States Department of Agriculture in reference to improvements of cereal and forage crops, farm tenantry, and soil survey work. Co-operative experiments are being conducted also with many individual farmers throughout the State.

On March 1, 1914, the station came into possession of a 160-acre farm, situated about one mile south of the Dairy Farm. This tract of land will be used for field experimental work of the Farm Crops and Soils Sections. The greater portion of the farm has already been laid out in experimental plots. Forty acres will be devoted to Soils investigations and the remainder of the area will be used for various Farm Crops investigations, with special reference to cereal breeding, alfalfa growing, variety and cultural tests, etc.

The removal of the greater part of the Soils and Farm Crops field experiments from the College Farm to the new Agronomy Experiment Farm has made it possible to transfer fifteen acres of land to the Truck Crops Section. This tract will enable this section to carry on some important investigations which have been handicapped, to some extent, heretofore, by a lack of land.

During the summer of 1914, two barns on the Agronomy Experiment Farm were completely rebuilt and enlarged. An appropriation was also made for the erection of a small office and laboratory building on this farm. This structure will be used until more adequate buildings can be provided.

A thorough drainage system has been planned for the farm referred to above, and an appropriation made to install a portion of the system.

During the year extensive improvements were made on the Dairy Building. These will prove distinctly helpful from the standpoint of the work of the Dairy Section.

The new plant laboratory and greenhouses which are under construction are notable additions to the building equipment of the experiment station. The plant laboratory has a cellar, basement, ground floor, and first floor. Opening from this laboratory on the south is a range of greenhouses of modern construction, covering an area of about one-half acre. It is expected that the greenhouses will be ready for occupancy early in the fall of 1914.

In the cellar is to be installed a cold storage room for cut flowers, and six refrigeration rooms for the use of the college and experiment station work in truck crops and pomology. The basement floor includes three plant propagation laboratories. The ground floor and first floor will be used in part for laboratories for the college work and in part for experiment station laboratories and offices.

The Chemical Section has been provided with commodious quarters in the new Chemistry Building. This change in location will give this section more adequate office and laboratory facilities.

#### *Changes in the Staff.*

Comparatively few changes in the staff are to be noted for the biennium. The following resignations were accepted:

1912-13—M. L. King, Assistant Chief in Agricultural Engineering; S. L. Jodidi, Assistant Chief in Soil Chemistry; H. C. Cosgriff, Field Superintendent; H. B. Kinney, Assistant in Soils; F. N. Marcellus, Assistant Chief in Poultry Husbandry; E. J. Strausbaugh, Herdsman.

1913-14—Arthur W. Griffin, Assistant Chief in Agricultural Engineering; Charles R. Forest, Field Superintendent; E. H. Kellogg, Assistant in Soil Chemistry; George S. Tilley, Assistant Chief in Dairy; W. E. Ruth, Assistant in Chemistry.

The following appointments were made:

1912-13—Arthur W. Griffin, Assistant Chief in Agricultural Engineering; Charles R. Forest, Field Superintendent; Geo. M. Turpin, Assistant Chief in Poultry Husbandry; D. B. Adams, Herdsman; W. E. Ruth, Assistant in Chemistry.

1913-14—C. W. Porter, Assistant in Agricultural Engineering; R. S. Potter, Assistant in Soil Chemistry; F. B. Howe, Assistant in Soil Survey; M. E. Sar, Assistant in Soil Survey; M. E. Olson, Field Superintendent; P. L. Blumenthal, Assistant in Chemistry; George S. Tilley, Assistant Chief in Dairy.

The station staff did not lose even one chief of a division during the year. The total list of resignations from the staff is small. On the other hand, the organization has been strengthened by the addition of a Chief in Farm Management and a number of well trained assistants.

The station is in closer touch with the agricultural problems of the State than ever before. The different sections are carrying on a very large number of cooperative experiments with farmers, county agents, and other parties. This work has the endorsement of those in touch with it and it gives promise of rendering a distinct and valuable service to the crop, live stock and horticultural interests of Iowa.

During the last year of the biennium, a larger sum was expended for station bulletins and other publications than in any previous year. This increased expenditure was due to the large number of projects that were completed, and also to the exceedingly heavy demand for certain publications, which has called for reprints of several bulletins and circulars and large editions of new publications.

The station maintains high standards for its work of a strictly scientific character. But it does not overlook the fact that there are statewide problems of the utmost importance to the agriculture of the State. Therefore, the staff endeavors at all times to work with enthusiasm in each of its fields, to the end that the station may be really useful and helpful and a leader in agricultural progress.

#### ENGINEERING EXPERIMENT STATION.

The Engineering Experiment Station has made good progress during the biennium. The work has been completely reorganized so as to secure the maximum efficiency, approaching in this respect that of a commercial organization. A new system of conducting the work and keeping the records has been inaugurated and is showing excellent results. The staff has been improved both in numbers and in quality. The output of the Station in the way of bulletins has also been improving both in quality and quantity. The service of the Station to the State has been widely extended and is receiving better recognition than ever before. Beginning with 1913, it became possible to use the appropriation for Good Roads Experimentation for work of a laboratory and scientific character exclusively. This came about by the creation of a new State Highway Commission by the legislature, as a separate State department. In the continuation of the Good Roads Experimentation work, however, we have acted throughout in cooperation with the State Highway Commission.

The following is taken from the report of Director A. Marston for the biennium:

The Engineering Experiment Station staff consists of the following men:

One director, six professors and two associate professors, who devote only a limited portion of their time to the work, and whose duties are, to an important degree, of an administrative character, although they are expected to do as much investigational work and writing of bulletins as practicable.

The following constitute the staff for conducting most of the regular investigational and testing work of the station:

One assistant to the director, eleven-twentieths time.

One associate professor, two-fifths time.

One industrial engineer, one-half time.

Five assistant engineers, full time,

Two laboratory assistants, full time.

One laboratory instructor, one-eighth time.

Of the total salary roll, only \$1,500 per year is paid to the eight men, other than the director, whose duties are largely of an administrative nature. Every effort is being made to secure the utmost amount of actual results in the way of tests and scientific investigations possible for the money available.

*Engineering Experiment Station Bulletins and Investigations.*

During the biennial period of 1912-1914 nine experiment station bulletins were published and widely distributed, and the manuscripts for three more were practically completed for publication. The experiment station bulletins seem to be receiving more favorable attention from residents of the State and from engineers and others outside the State than ever before. We receive calls from foreign countries for our bulletins. The Executive Committee of the American Society for Testing Materials passed a resolution thanking the station for its cooperation in connection with the publication of bulletin No. 36 on Tests of Drain Tile. Some 36 special technical investigations are at present in progress in all stages of completion.

*Engineering Experiment Station Services to Iowa—1912-1914.*

In addition to the completion of the technical investigations and bulletins above mentioned, a large amount of additional service was rendered to the public.

A summary of the number of commercial tests made for cities, counties, state departments, manufacturing establishments and individuals, on special request, shows 485 for 1912-13, and 717 for 1913-14. Many thousands of other tests were made in connection with the technical investigations.

The station made special tests for 15 state departments or institutions, 1912-13, and 16, 1913-14.

Seven counties were served in a similar way 1912-13, and 29, 1913-14.

Tests or analyses were made or other special services rendered for 18 cities of the State 1912-13, and 54, 1913-14.

During the two years of the biennial period the experiment station rendered special technical service on request to 112 different industrial companies of Iowa.

The increased demands for service to the public cannot be met without a corresponding increase of resources.

VETERINARY INVESTIGATIONS.

This work was organized under provisions made by the Thirty-fifth General Assembly. Dr. Kurt Schern, who has had thorough training and extensive experience in connection with the investigation of animal diseases in Germany, was appointed to take charge of this work. Unfortunately, he is now obliged to be absent on account of the European war. Considerable information concerning hemorrhagic septicemia in cattle has been secured, and other

diseases have been studied. Much time has been given to hog cholera and complications of this disease.

Dean Stange emphasizes the importance of having veterinary investigations well supported and conducted by men highly trained in the science. Persons not familiar with this work seldom appreciate the difficulties surrounding it. An appropriation sufficient to provide for additional help and equipment is recommended. Especially is it pointed out that for research work some land should be available for the care of experimental animals.

### EXTENSION WORK.

By action of the Board of Education, the extension work of the College, which now relates to all of the Divisions of the College, was placed under the immediate supervision of the President. As far as possible it is carried on in coöperation with the deans and staffs of the different divisions.

#### AGRICULTURAL EXTENSION WORK.

(Including Home Economics, Science and Veterinary Medicine.)

During this biennium, agricultural extension work was conducted along the usual lines with important expansion which was made possible by increased appropriations. Colt shows have been organized and are proving helpful to Iowa farmers. The department cooperated in the operation of special trains in the interest of beef cattle, dairy cattle, fruit growing, and alfalfa growing. Much attention was given to hog cholera. On account of the great prevalence of the disease these years, there was an unusually large demand for information. The county adviser work has been strengthened and additional counties have organized and others are seriously considering this movement.

Near the close of the biennium, Temporary Director W. J. Kennedy resigned, and Paul C. Taff was appointed Acting Director. The following is taken from Professor Taff's report covering the two years:

The work of the Department of Agricultural Extension is firmly established in Iowa. Since the Thirty-first General Assembly of Iowa made the initial appropriation of \$15,000, the demand for extension work has grown faster than funds and instructional force could supply. There is no doubt but that this demand will continue. As counties are now organizing and employing county advisers, it will mean that the method of conducting extension work will change form somewhat. This does not mean that there will be less to do on account of the county agricultural experts. On the other hand it has been found that these men

need our specialists and call for them very frequently. A strong effort is being made to assist in every way possible to further county work by supporting it in the college and experiment station.

Every line of work inaugurated has grown rapidly the past few years. The following lines of work were begun before the period covered by this report: Animal Husbandry, Farm Crops, Soils, Home Economics, Horticulture, Dairy and Schools. Since then, six new lines of work have been added: Veterinary Medicine, Agricultural Engineering, Dairy Manufactures, Truck Crops, Agricultural Economics, and Agricultural Education.

Agricultural Extension work will be assisted greatly through the help of the funds made available under the Smith-Lever act of the National Congress. It will be necessary for the State to appropriate an equal amount to any above the \$10,000 which is given unconditionally.

In the short courses held during the biennial period ending June 30, 1914, there were enrolled 48,360 persons. The department assisted in Farmers' Institutes attended by 52,291 persons, and speakers addressed picnics and other meetings attended by more than half a million people. The data for the two years are given as follows:

	1912-13	1913-14
Attendance at short courses.....	21,885	26,475
Attendance at institutes.....	22,600	29,691
Attendance at other meetings (estimated)...	300,000	400,000
Number of short courses held.....	99	140

The additional means the department has of reaching and instructing the people other than in meetings are numerous. Publications are becoming a large factor in disseminating information. The farming class as a rule is reading much more than formerly. A large number of bulletins, circulars and pamphlets has been published. Correspondence also has carried out an immense amount of information.

The dairy interests of Iowa are receiving much help from the ten cow test associations now in operation, and the data being collected will prove most valuable not only to those in the immediate vicinity where the work is being done, but to all dairymen. The questions of feeds and care will be much better understood after this material is finally assembled.

Home Economics courses are proving especially popular. The staff of extension workers in this line should be given great credit for the careful and systematic manner in which they have organized their work. A plan in use in this division probably could be well adopted in other lines of work, namely, using leaflets and pamphlets as a means of follow-up work. About twelve circulars for each year's course have been prepared, covering all subjects taught. These are distributed as the subjects are taken up in the class room. This leaves information with the people in written form instead of asking audiences to depend entirely upon their memory. Other departments are being urged to adopt this method. The work of the Home Economics Division is undoubtedly destined to continue to grow rapidly in this State.

The figures given above do not show the full number of people reached, as those visiting our traveling educational exhibits are not shown. Three different sets of exhibits have been made up and sent to county and district fairs. Each exhibit reaches about six fairs each season. An exhibit is also made at the State Fair each year. Short course exhibit cars are also sent along with the corps of workers. In each case a man who is capable of answering questions and explaining the material has charge of the exhibits. It is estimated that 100,000 people have profited from these exhibits.

There is a growing tendency in favor of teaching by demonstration instead of the purely lecture method. This is evidenced in the growth of the county agent movement. The agent is largely a demonstrator, and the chief demand is for demonstration fields, spraying and pruning demonstrations, cow test associations, etc. There is no question but that this is a development in the right direction. It is urged that work be developed in this direction as much as possible.

The U. S. Department of Agriculture has been liberal with support, both financial and otherwise. Cooperation has been established in the county agent work, boys' and girls' club demonstrations, and the eradication of hog cholera under their Project A. National assistance for the coming year has been promised, with additional help. With the Smith-Lever act in full operation, and the above work continued, the federal government will be a large factor in extension work.

The success of extension work depends largely upon the working staff. It would be only proper to say that members of our staff have been loyal and active in their respective lines and that they should have the credit for any success achieved. That they are loyal is proven by the fact that though the department has experienced a most important change, not a member of the staff of over thirty workers has resigned in the past nine months, though several have received attractive inducements.

Some of the new lines of work which are under consideration and which should be developed as rapidly as possible, are: Correspondence courses, entomology, rural architecture and landscape gardening, rural social welfare, farm management, and botany.

Special attention is called to the provisions of the Federal Act known as the Smith-Lever Law, which provides for payments from the national treasury to the various states for extension work in agriculture and home economics. Under this law, Iowa is now receiving \$10,000 per year. By action of the Governor, the funds are paid to the Iowa State College of Agriculture and Mechanic Arts. This action holds until the Legislature has opportunity to act. The bill provides for further payments to the different states, provided such payments are duplicated by the states for the same purpose.

The amount available for this State will be \$18,794 in the year 1915-16, and \$34,456 in the year 1916-17. It is recommended that funds amounting to this total, or \$26,625 for each year in the bien-

nium, be provided so that the federal funds will become available, and that the entire amount be administered at the State College in furtherance of extension work in agriculture and home economics already under way.

#### ENGINEERING EXTENSION.

This useful line of work is being developed with the aid of successful experience in other States. It promises to be of great value to a large number of people. Dean Marston is temporarily assisting the President in organizing and supervising this work. He reports as follows:

In accordance with an act of the Thirty-fifth General Assembly, the Engineering Extension Department was organized in the summer of 1913. Professor K. G. Smith, formerly of Wisconsin, was placed in charge. His experience and other qualifications have enabled him to organize and develop this work with great success.

A strong staff of six men gives full time to the work, besides an Industrial Engineer who divides his time between station and extension work in connection with the Technical Service Bureau. Eight instructors devote part time to the work at the College. Another eight men have been employed on part time as local instructors of evening classes in various cities of the State.

During the winter of 1913-14 we inaugurated a new development in extension work by conducting Automobile Institutes in 27 cities of the State for the instruction of owners and users of cars. Local organizations bore part of the cost. About 3,000 persons received the instruction. Large as this number seems, especially for the first attempt ever made at such work, it constitutes only 3% of the automobile owners of Iowa. Probably \$100,000,000 is invested in automobiles in this State. Our work in this line should be continued and extended.

Probably the most important part of the engineering extension work consists in the development of correspondence study, in cooperation with personal supervision from traveling instructors and local evening and day classes, under part time resident instructors. By this work every mechanic in the State is being afforded an opportunity to secure technical education training at home and at nominal expense, while continuing to earn his living at his trade.

We have conducted classes in six different cities the first year under eight different local instructors. The work is done in cooperation with the public schools, the Y. M. C. A.'s, the Commercial Clubs, the factory owners and other employers, and the labor organizations. The difficulty and cost of organizing, maintaining and conducting this work are great, but not too great in view of its importance. Two hundred and fifty students were enrolled for correspondence and class study courses the first year.

Manual training is another subject in which the engineering extension department has rendered an important service to the rural teachers and

to the boys of the State. The work is in close cooperation with the Agricultural Extension Department, and has occupied much of the time of one man.

Technical lectures have been given in a number of different cities. The new Technical Service Bureau will undoubtedly render great service this coming year to the cities, counties and factories of Iowa.

It is estimated that the Engineering Extension Department has rendered direct service of the various classes described to nearly 19,000 persons in Iowa in the first year of its work, without counting those reached in the manual training work.

Attention is called to the fact that the appropriation expires with 1915. It will not be repeated for next year unless the legislature takes action.

#### HOG CHOLERA SERUM.

The last General Assembly made an appropriation of \$35,000 to provide for the production of biological products, especially hog cholera serum, and the distribution of this product and virus. The same law and appropriation cover the careful supervision of plants within the State which are making and distributing these latter products. Records are available to show that the serum and virus distributed from the new plant at Iowa State College during the past season have effected a saving of not less than \$3,000,000 to the State. There was already a heavy demand for reliable serum and virus when the law became effective, and temporary quarters were provided so that the work might start as promptly as possible. Permanent buildings are now in use, representing an expenditure of about \$20,000, and stock and cash on hand represent a value in excess of the balance of the original appropriation. Thus, on short notice, the plant could be closed and the entire value of the plant could be recovered by the State.

Permits to use virus have been issued to more than 1,200 veterinarians and farmers. These permits, under the law, are given only to farmers who wish to use the virus in their own herds or to practicing veterinarians who are deemed competent. Most of the persons holding permits visited the laboratory and received instruction before being authorized to use virus.

Fifty-nine permits have been issued to commercial concerns selling serum and virus within the State. Four of these permits have been revoked on account of serum not meeting the required standard. Seven applications for permits to sell serum and virus have been refused. Very great care has been taken in connection with authorizing distribution and use of virus.

With the aid of the Agricultural Extension Department much educational work has been done in all parts of the State. Four veterinarians are engaged constantly in this work and their efforts have been liberally supplemented from time to time.

It is worthy of note that, owing to the limitation of the State funds and the need of getting the work started rapidly, over \$12,000 was advanced by private individuals and concerns, including several banks, so that a larger quantity of serum could be manufactured and placed in storage last winter awaiting a heavy demand which was expected to come, and did come, early in the summer season.

Director Stange reports that altogether practically 10,000,000 cubic centimeters of serum have been produced, and that 4,714 herds have been treated, with the showing that in healthy herds only 2.8% of the hogs died after treatment with serum alone, which is considered a remarkably good showing. With the simultaneous treatment, the loss was only 2.2%. Elsewhere the corresponding loss has been reported as high as 8%. Often the treatment is not applied until a considerable portion of the hogs are sick, but even in such cases the records show favorable results. Where serum alone was used the loss after treatment was 29%, and where the simultaneous treatment was used the loss in diseased herds was 11%. In both cases the percentage of sick hogs in the herds was higher than the percentage of deaths after treatment. The simultaneous treatment is used in the majority of cases, and reports show that in 76% of the herds having this treatment there was not a single loss.

Great care has been exercised by Director Stange in organizing this work. Dr. C. G. Cole, who had been engaged in the manufacture of serum for the United States Government, was placed in direct charge.

## FINANCES

The finances of the industrial service work performed at and from the College are reported by the Secretary and Treasurer. The amounts available from State appropriations for industrial service work, including experiment and extension work, during the year 1914-15 are as follows:

Acts and Purposes	Amount
212-1-32-1907—Experiment Station Support.....	\$ 25,000
216-2-32-1907—Agricultural Extension .....	27,000
212-1-32-1907—Engineering Experiment Station.....	3,500
212-1-32-1907—Good Roads Experimentation.....	5,000
244-2-33-1909—Engineering Experiment Station.....	1,500
200-3-34-1911—Agricultural Experiment Station.....	15,000
200-3-34-1911—Agricultural Experiment Station.....	15,000
200-3-34-1911—Agricultural Extension .....	5,000
200-3-34-1911—Agricultural Extension .....	10,000
200-3-34-1911—Engineering Experiment Station.....	5,000
200-3-34-1911—Good Roads Experimentation.....	5,000
228-2-35-1913—Engineering Experiment Station.....	5,000
228-2-35-1913—Engineering Extension .....	25,000
228-2-35-1913—Veterinary Investigations .....	10,000
228-2-35-1913—Agricultural Extension .....	48,000
228-2-35-1913—Agricultural Experiment Station.....	57,000
	\$262,000

These appropriations support the different branches of work as follows:

Agricultural Experiment Station.....	\$112,000
Engineering .....	25,000
Veterinary Investigations.....	10,000
Agricultural Extension.....	90,000
Engineering Extension.....	25,000
	\$262,000

The appropriation to establish a hog cholera serum plant was \$35,000.

The federal government appropriates \$30,000 for agricultural experiment station work and \$10,000 for agricultural extension.

The need of funds for the continuance and development of industrial service work is referred to on previous pages.

Respectfully submitted,

R. A. PEARSON,

*President.*

# BIENNIAL REPORT

OF THE SECRETARY OF THE IOWA STATE COLLEGE OF  
AGRICULTURE AND MECHANIC ARTS, TO THE IOWA  
STATE BOARD OF EDUCATION FOR THE  
BIENNIUM 1912-1914

---

As the College has grown into new lines of work, its financial operations have widened and its accounting system has become more and more complex. It is aimed, however, in this report to take account of this added work, and, at the same time, so connect this report with previous ones as to make them, taken together, constitute a continuous and logical history of college finances. The report will deal with the following funds:

- Collegiate Support fund.
- Non-Collegiate Support funds.
- Student Fees.
- Extension Work.
- Experiment funds.
- Building and Improvement funds.
- Hog Cholera Serum fund.

It will give in condensed form the receipts and expenditures of each fund, the balances at the beginning and close of the biennial period, the funds available for the present year and the purposes to which they have been appropriated by the Board of Education and the finance committee.

As preliminary to such exhibit a summary of the inventory of College property is given.

## COLLEGE PROPERTY.

An inventory clerk is employed who takes account of the inventoried property at the beginning of each year, the purchases and sales made during the year, and the property on hand at the close of the year. The following is a summary of the inventory at the end of the biennial period, June 30, 1914.

## SUMMARY OF INVENTORY.

## REAL ESTATE:

Farm proper, 660.38 acres at \$150.....	\$ 99,057.00
Dairy Farm, 200 acres at \$150.....	30,000.00
Experiment Station Grounds, 60 acres at \$150.....	9,000.00
Plot for Horticultural Experiments, 13 acres at \$150.....	1,950.00
Orchard and Arboretum, 25 acres at \$150.....	3,750.00
Horticulture and Forestry, 55.50 acres at \$125.....	6,937.50
College Campus, 125 acres at \$175.....	21,875.00
College Park, 37 acres at \$125.....	4,625.00
Experimental Farm 163 acres at \$195.....	31,785.00
Total for 1,338.88 acres.....	\$ 208,979.50

## BUILDINGS:

Agricultural Hall .....	\$ 340,000.00
Agricultural Engineering .....	105,000.00
Barn, Cattle .....	10,000.00
Barn, Experiment Station.....	17,100.00
Barn, Horse .....	8,000.00
Barn, Horticultural .....	5,500.00
Barn, Sheep .....	1,000.00
Book Store .....	2,250.00
Carpenter Shop and Store Room.....	2,500.00
Central .....	381,425.00
Central Heating Plant .....	57,202.98
Ceramics .....	15,000.00
Chemistry (uncompleted) .....	116,073.38
Chemistry, Emergency .....	4,040.42
Dairy .....	60,000.00
Dairy Farm Barns.....	15,750.00
Dairy Farm House.....	2,250.00
Engineering Hall .....	195,000.00
Engineering Annex .....	35,750.00
Fire Department .....	150.00
Forge Shop .....	4,500.00
Foundry .....	4,500.00
Greenhouse .....	18,000.00
Gymnasium .....	150,000.00
Hog House .....	1,500.00
Hog Houses, movable.....	500.00
Home Economics .....	75,000.00
Horticultural Laboratory .....	8,000.00
Hospital .....	7,500.00
Hospital Annex .....	1,000.00
Machine Shop .....	18,000.00
Margaret Hall .....	50,000.00
Margaret Hall Annex.....	5,600.00
Mechanical Laboratory .....	50,000.00
Morrill Hall .....	35,000.00
Music Hall .....	5,000.00
Office Building .....	6,000.00
Pattern Shop .....	6,000.00
Pavilion No. 1 (old wooden).....	4,000.00
Pavilion No. 2.....	12,000.00
Pavilion No. 3.....	13,500.00
Poultry Farm Buildings.....	5,250.00
Serum Plant .....	11,821.02
Serum Plant Sheds .....	1,781.05
Shed, Farm Crops Tool.....	450.00
Sheds, Feeding .....	2,250.00
Shed in Field.....	250.00
Structural and Hydraulic Laboratory.....	25,000.00
Tower for Chimes.....	6,650.00
Transportation Building .....	50,000.00
Veterinary Hospital .....	150,000.00

## RESIDENCES OCCUPIED BY:

President Pearson .....	\$ 12,000.00
Professor Beach .....	5,250.00
Professor Curtiss .....	5,000.00
Professor Marston .....	5,250.00
Professor Meeker .....	2,000.00
Professor Mortensen .....	2,250.00
Professor Noble .....	2,750.00
Professor Stanton .....	6,000.00
Professor Summers .....	2,000.00
Superintendent Sloss .....	6,500.00

Boarding Club .....	500.00
Experiment Station Foreman .....	1,200.00
Farm Foreman .....	1,800.00
Farm Laborer .....	700.00
Herdsmen .....	1,200.00
Public Grounds Residence .....	1,800.00

Total buildings ..... \$ 2,150,243.85

## GENERAL EQUIPMENT:

Waterworks, including water tower, deep well, pumping machinery, reservoir, fire pump and piping system.....	\$ 52,393.64
Old Power Plant, including pump and two boilers.....	2,500.00
Heating station, including two 250 H. P. boilers and four 500 H. P. boilers, with mechanical stokers and induced draft apparatus, one 250 H. P. Corliss engine, directly connected with generator, three boiler feed pumps, feed water heater and piping system, coal and ash handling machinery, air compressor and other power plant apparatus .....	68,258.98
Electric light, including switchboard appliances, pole line and transformers .....	14,190.19
Heating tunnel, complete with steam and return main.....	69,878.01
Sewage system .....	13,500.00
Sewage disposal system.....	3,700.00
Fire department .....	1,000.00
Gas mains .....	1,750.00

Total general equipment..... \$ 227,170.82

## RECEIPTS FOR THE BIENNIAL PERIOD.

The following are the receipts on account of the different funds during the past two years, and the sources from which they were derived:

## I. COLLEGIATE SUPPORT FUNDS.

	1912-13	1913-14
From National Government:		
Interest on endowment fund .....	\$ 35,486.20	\$ 35,191.86
Morrill funds .....	50,000.00	50,000.00
From State:		
Annual appropriations, permanent .....	245,000.00	245,000.00
Two-year millage tax—		
1/2 of annual amount set aside for college departments .....		75,000.00
1/2 of amount set aside for college work in home economics .....		9,000.00
Special appropriation for college departments .....		20,000.00
Annual appropriation for library, permanent .....	4,900.00	4,900.00
From Miscellaneous Sources:		
Tuition charged students from outside the state .....	9,460.00	11,867.50
Scholarship funds .....	1,410.00	1,325.00
Clay fund for support of agricultural journalism .....	1,000.00	1,000.00
Interest on treasurer's balances .....	3,676.34	2,946.64
Cancelled checks .....	46.28	101.10
Totals .....	\$ 350,978.82	\$ 456,332.10

## II. NON-COLLEGIATE SUPPORT FUNDS.

	1912-13	1913-14
Agriculture:		
Annual appropriation, permanent.....	\$ 25,000.00	\$ 25,000.00
½ of annual amount set aside from two-year millage tax.....		4,500.00
Portion of special appropriation set aside for this work.....		2,400.00
Home Economics:		
½ of annual amount set aside from two-year millage tax for this department.....		6,000.00
Amount of special appropriation devoted to this work.....		1,500.00
Engineering:		
Amount of legislative appropriation and two-year millage tax assigned to trade school work at the college.....		6,500.00
Veterinary Science:		
½ of annual amount set aside from two-year millage tax for practitioner's course.....		5,000.00
Totals.....	\$ 25,000.00	\$ 49,000.00

## III. STUDENT FEES.

All Courses:		
Incidental fees.....	\$ 32,309.95	\$ 31,730.24
Students' repair fund.....		2,000.00
Hospital.....	5,071.50	8,176.00
Music (including rental of pianos).....	194.50	239.55
Physical culture.....	352.60	612.50
Physical training.....	321.00	2,871.20
Reclassification (credited to F. L. & I.).....	72.00	184.00
Organ practices (credited to F. L. & I.).....	38.50	3.50
Four-Year Courses:		
Agricultural engineering.....	2,095.00	2,981.80
Animal husbandry.....	3,531.45	4,021.67
Bacteriology.....	841.50	1,048.05
Botany.....	1,837.50	2,804.55
Chemistry.....	11,511.09	15,321.93
Civil engineering.....	1,002.35	407.00
Dairy.....	2,054.50	2,657.40
Diploma (credited to registrar's office).....	1,330.00	1,364.00
Electrical engineering.....	414.00	426.00
English.....	270.25	364.25
Farm crops.....	2,128.40	2,174.87
Home economics.....	2,572.25	3,827.68
Horticulture.....	424.22	456.50
Forestry.....	23.00	117.00
Mechanical engineering.....	2,547.23	2,733.98
Mining engineering.....	82.00	10.00
Physics.....	1,482.25	1,021.00
Special examinations (credited to library).....	520.50	442.25
Special students.....	292.00	85.00
Soils.....	1,434.45	1,694.25
Summer school.....	769.85	1,213.25
Short course in engineering.....		247.50
Veterinary department.....	1,068.50	
Anatomy.....		442.00
Pathology.....		265.00
Physiology.....		46.00
Surgery and obstetrics.....		164.00
Zoology.....	1,023.35	1,062.40
Photography.....		72.00
Poultry.....		183.00
Two-Year Courses:		
Agriculture—		
Agronomy.....	477.50	659.14
Agricultural engineering.....	721.36	811.10
Animal husbandry.....	994.25	1,066.04
Botany and horticulture.....	518.65	665.54
Dairy.....	476.25	902.61
Home economics.....		178.00
Engineering—		
Trade school at college.....		190.27
Engineering correspondence fees.....		973.30
Totals.....	\$ 80,753.70	\$ 98,917.32

## IV. EXTENSION WORK.

	1912-13	1913-14
<b>Agriculture:</b>		
Annual appropriation, permanent .....	\$ 50,000.00	\$ 42,000.00
Special appropriation .....		7,000.00
$\frac{3}{8}$ of annual amount set aside from two-year millage tax for this purpose .....		28,800.00
Totals agricultural extension .....	\$ 50,000.00	\$ 77,800.00
<b>Engineering:</b>		
Special appropriation .....		10,000.00
Millage tax (\$15,000 less \$6,500 set aside for two-year trade school work) .....		8,500.00
Totals .....	\$ 50,000.00	\$ 96,300.00

## V. EXPERIMENT FUNDS.

<b>Agricultural Experiment Station:</b>		
From National Government—		
Hatch act .....	\$ 15,000.00	\$ 15,000.00
Adams act .....	15,000.00	15,000.00
From State—		
Annual appropriation, permanent .....	55,000.00	55,000.00
$\frac{3}{8}$ of annual apportionment from two-year millage tax .....		34,200.00
Special appropriation .....		10,000.00
Totals agricultural experiment station .....	\$ 85,000.00	\$ 129,200.00
<b>Engineering Experiment Station:</b>		
From State—		
Annual appropriation, permanent .....	\$ 10,000.00	\$ 10,000.00
$\frac{3}{8}$ of annual apportionment from two-year millage tax .....		3,000.00
<b>Good Roads Experimentation:</b>		
From State—		
Annual appropriation, permanent .....	10,000.00	10,000.00
<b>Veterinary Investigations:</b>		
From State—		
$\frac{3}{8}$ of annual apportionment from two-year millage tax .....		6,000.00
Special appropriation .....		3,000.00
<b>Horse Breeding Experiment</b> .....	360.00	1,564.19
Totals .....	\$ 105,360.00	\$ 162,764.19

## VI. BUILDING AND EQUIPMENT FUNDS.

<b>From State—Drawn from State Treasury—</b>		
Repair and Contingent—		
Annual appropriation .....	\$ 36,000.00	\$ 36,000.00
Special appropriation .....		8,000.00
Millage tax apportionment .....		6,000.00
Special Building Tax .....	101,433.44	206,453.27
Chemistry building and equipment .....	10,272.24	56,208.90
Additional department equipment .....	30,230.64	12,269.36
Public grounds improvement .....	1,893.85	4,878.15
Heating plant .....	38,200.00	16,994.28
Equipment of buildings and departments .....		3,465.31
Totals from state .....	\$ 218,030.17	\$ 350,269.27
<b>From Student and Others (credited to Room Rent account)—</b>		
Rental of rooms .....	\$ 2,865.91	\$ 4,497.14
Sale of wreckage .....	153.27	43.36
Rental of residence lot .....	1.00	1.00

	1912-13	1913-14
Net receipts of superintendent's store-room .....	814.64	-----
Sale of old furniture .....	-----	83.22
Totals .....	\$ 221,864.99	\$ 354,893.99

## VII. HOG CHOLERA SERUM FUND.

From State— Special appropriation .....	\$ 2,520.39	\$ 32,479.61
--	-------------	--------------

## SUMMARY OF RECEIPTS.

	1912-13	1913-14
I. Collegiate support funds .....	\$ 350,978.82	\$ 456,332.10
II. Non-collegiate support funds .....	25,000.00	49,000.00
III. Student fees .....	80,753.70	98,917.32
IV. Extension work funds .....	50,000.00	96,300.00
V. Experiment funds .....	105,360.00	162,764.19
VI. Building and improvement funds .....	221,864.99	354,893.99
VII. Hog cholera serum fund .....	2,520.39	32,479.61
Totals .....	\$ 836,477.90	\$ 1,250,687.21

The foregoing exhibit does not include refunds, nor department sales. These are omitted for they constitute no part of the real income of the college. Tuition and fees returned to the student are not available to meet department expenses; and receipts from products sold are, in general, fully offset by their cost of production. These refunds and sales are, therefore, stricken out of both sides of the account. They total as follows for the biennial period:

	1912-13	1913-14
Refunds .....	\$ 5,412.32	\$ 6,656.61
Sales .....	90,918.56	234,582.34
	\$ 96,330.88	\$ 241,238.95

These amounts will need to be added to the receipts and expenditures as shown by this report, in order to make the totals agree with those of the treasurer.

The following are the sales by departments:

### SALES.

	1912-13	1913-14
Agricultural engineering .....	\$ 1,461.09	\$ 861.68
Animal husbandry .....	72.50	317.15
Bacteriology .....	97.94	12.91
Botany .....	2.75	
Chemistry .....	619.58	997.05
Civil engineering .....	141.30	
Dairy .....	34,060.08	28,995.23
Dairy farm .....	4,834.92	5,198.45
Farm .....	10,489.52	13,214.62
Farm crops .....	81.67	86.64
Fires, lights and incidentals .....	6,143.18	5,909.54
Home economics .....	4.38	25.52
Horticulture .....	1,854.44	2,735.09
Hospital .....	668.64	1,279.46
Janitor fund .....		16.02
Library .....	58.60	64.07
Mechanical engineering .....	693.66	696.08
Military .....		54.00
Mining engineering .....	48.60	7.99
Pathology .....		23.05
Physical culture .....		12.00
Physical training .....		21.85
Physics .....		2.50
Poultry .....	552.59	825.26
Printing .....		521.79
Public grounds .....	38.50	92.82
Publicity .....		20.10
Surgery .....		2,281.39
Veterinary .....	2,368.43	5.76
Zoology .....		57.85
Total sales for departments .....	\$ 64,287.37	\$ 64,335.87
Agricultural experiment station .....	16,077.86	15,028.01
Engineering experiment station .....	943.25	1,582.64
Agricultural extension .....	579.98	761.43
Serum fund .....	2,779.66	142,267.01
Store room .....	6,250.44	10,603.89
Two-year agriculture .....		3.49
Total sales .....	\$ 90,918.56	\$ 234,582.34

It will be noticed that these sales are made up, in large part, of the products of the farm, creamery and serum plant, together with transfers from the store room.

## EXPENDITURES DURING THE BIENNIAL PERIOD

The expenditures during the biennial period, omitting the refunds, transfers, and that portion of the cost of department products covered by sales, as already explained, total as follows:

	1912-13	1913-14
College educational work .....	\$ 429,811.07	\$ 550,206.61
Non-collegiate educational work .....	27,849.08	46,540.32
Extension work .....	50,424.68	87,844.40
Experimentation .....	112,785.47	166,667.42
Buildings, improvements and equipment .....	229,239.68	359,486.68
Hog cholera serum department .....	2,520.39	10,699.87
Totals .....	\$ 852,630.37	\$ 1,221,445.30

These expenditures represent the cost of running the institution in the various divisions of its work, and repairing, enlarging and improving its plant. The permanent additions to its assets, made during the last two years, as shown by the increase in the college inventory, aggregate \$587,270.86. All these expenditures are made in accordance with carefully prepared annual budgets. The heads of the different departments present their department needs in detail to the President of the College. These are considered by the Deans, the President, the committees of the Board of Education and finally by the Board itself. The askings which are the most necessary and urgent are allowed in so far as the funds available will permit. A reasonable amount is reserved in each fund as a working balance, and to meet emergencies. This balance varies during the year, but is kept large enough at all times to fully protect the institution against financial embarrassment.

In the exhibits of expenditures, the amount paid from fees, and the amount charged to the Support Fund are put in separate columns in order that the cost of the different lines of work to the state and nation may be readily seen. The fees are paid by students. They cover expenditures for laboratory material used by them, and in part the cost of supplying heat, light and janitor service for the laboratories and recitation rooms.

The following exhibit shows somewhat in detail the expenditures on account of the regular educational work of the College:

## I. COLLEGE EDUCATIONAL WORK.

## EXPENDITURES.

For What Purpose	1912-1913		1913-1914	
	From Fees	From Support Fund	From Fees	From Support Fund
I. Salaries:				
Professors, associate professors and assistant professors, and administrative officers		\$163,130.71		\$ 212,491.98
Instructors and assistants		63,359.56		82,109.90

Zoology	1,023.35	972.10	1,062.40	1,246.87
III. Scholarship funds:				
Clay-Robinson fellowship		350.00		375.00
Fruit-judging scholarship				225.00
International Harvester Co.		400.00		250.00
Meinrad Rumley scholarship		250.00		
State Fair scholarship		931.24		512.50
IV. Administrative and general expenses, including office help and expenses of the executive and administrative offices; printing, advertising, commencement, Sabbath services, ringing chimes, etc.	1,330.00	25,617.58	1,364.00	35,362.57
V. Maintenance of buildings and grounds:				
Buildings: heat, light and janitor service	32,420.45	26,322.86	31,917.74	44,394.83
Student repair fund			238.63	
Grounds: labor, equipment and supplies		23,126.75		13,783.96
Totals	\$ 75,757.93	\$354,053.14	\$ 91,958.57	\$ 458,248.04

## SUMMARY.

	1912-13	1913-14
Salaries -----	\$ 226,490.27	\$ 294,601.88
Department expenses and equipment -----	98,129.41	127,419.13
Scholarship funds -----	1,931.24	1,362.50
Administrative and general expenses -----	26,947.58	36,726.57
Maintenance of buildings and grounds -----	76,312.57	90,096.53
Totals -----	\$ 429,811.07	\$ 550,206.61

It has been the policy of the authorities hitherto to charge the administrative expenses and the cost of maintaining the plant almost entirely to the Collegiate Support fund. Beginning with the new fiscal year, these expenses are to be divided more evenly among the different divisions.

## II. NON-COLLEGIATE WORK.

The Legislature of 1911 appropriated \$25,000 annually for the support of a two year non-collegiate course in Agriculture. The course met with such decided success that the last legislature increased the appropriation and extended the non-collegiate work to Home Economics, Engineering and Veterinary Science. This work is distinctly separated from that of the regular four-year college courses. It has its own corps of teachers, and its own support funds. Reporting upon the income and expenditures of each of these courses for the biennial period, we have:

## (a) NON-COLLEGIATE COURSE IN AGRICULTURE.

This includes a two-year course in Agriculture and a one-year course in Dairying. At the time the Board asked the last legislature to grant this work an additional annual support fund of \$12,500, Home Economics was included in the Agricultural division. Special accent was placed on the desirability of establishing and maintaining this feature of the non-collegiate work. The appropriation was granted with this understanding. In the year following the meeting of the legislature, Home Economics, because of its rapid development, was made a division by itself. In dividing the new tax fund, \$5,000 was set aside for Home Economics and \$7,500 was reserved for Agriculture. The receipts and expenditures for Home Economics are shown further on in this report; the expenditures for the Agricultural work proper are set forth in the exhibit which follows, and the receipts will be found in the summary attached thereto.

## EXPENDITURES.

For What Purpose	1912-13		1913-14	
	From Fees	From Support Fund	From Fees	From Support Fund
I. Salaries:				
Professors, and assistant professors		\$ 8,849.98		\$ 12,002.55
Instructors and assistants		9,468.49		10,517.51
II. Current expenses and equipment:				
Agronomy	\$ 477.50	444.68	\$ 659.14	820.22
Agricultural engineering	721.36	482.94	811.10	1,488.33
Animal husbandry	994.25	493.88	1,066.04	928.09
Botany	363.30	1,862.98		
Chemistry				.83
Dairy	476.25	19.68	902.61	682.97
English		634.27		347.53
History		24.36		38.66
Horticulture	155.05	687.59	665.54	1,615.80
Mathematics				5.88
Public speaking		10.00		9.50
III. Administrative Expenses:				
Agricultural dean		182.22		174.98
IV. Heat and Light		1,500.00		1,100.00
Totals	\$ 3,188.01	\$ 24,661.07	\$ 4,104.43	\$ 30,632.85

The following is a summary of the financial operations of this part of the non-collegiate work for the two years:

## RECEIPTS.

Cash balance July 1, 1912		\$ 10,508.50
Income for 1912-13:		
Annual appropriation	\$ 25,000.00	
Student fees as shown above	3,188.01	28,188.01
Income for 1913-14:		
Annual appropriation	\$ 25,000.00	
Millage tax, $\frac{2}{3}$ of annual apportionment	4,500.00	
Special appropriation; amount allotted to this department	2,400.00	
Student fees as shown above	4,104.43	36,004.43
Total		\$ 74,700.94

## DISBURSEMENTS.

For 1912-13 as shown in expenditure exhibit	\$ 27,849.08	
For 1913-14 as shown in expenditure exhibit	34,737.28	\$ 62,586.36
Cash balance on hand July 1, 1914		12,114.58
Total		\$ 74,700.94

Of this amount, \$2,000 will need to be reserved as a working balance; the remainder is available for the purchase of equipment and furniture. The following sums have been set aside for these purposes:

	Equipment	Furniture
Animal husbandry .....	\$ 4,090.00	\$ 262.00
Agricultural engineering .....	1,062.75	-----
Agronomy .....	222.80	129.50
Dairy .....	105.00	26.45
Horticulture .....	103.75	300.00
Botany and bacteriology .....	730.50	310.10
Chemistry .....	1,080.50	79.50
English .....	145.00	81.00
Totals .....	\$ 7,540.30	\$ 1,188.55

## SUMMARY.

Equipment .....	\$ 7,540.30
Furniture .....	1,188.55
Total .....	\$ 8,728.85

This leaves about \$1,400 for the further purchase of equipment.

## TWO-YEAR HOME ECONOMICS.

In addition to the sums allotted to this work from the appropriations for Agriculture and Home Economics, as already explained, the annual sum of \$20,000 was set aside by the legislature from the two-year millage tax for four-year and two-year Home Economics work. Of this amount, the non-collegiate course was allowed \$5,000 annually. No portion of these amounts was available during the first year of the biennium, and in the second year only one of the semi-annual tax payments, amounting to about three-fifths of the annual tax collected had been paid in. These items, together with the student fees, aggregate as follows:

## RECEIPTS.

Millage tax for agriculture and home economics; $\frac{2}{3}$ of annual allotment.....	\$ 3,000.00
Millage tax for four-year and two-year home economics; $\frac{2}{3}$ of annual allotment .....	3,000.00
Special appropriation for agriculture and home economics, amount allowed home economics .....	1,600.00
Student fees .....	178.00
Total .....	\$ 7,778.00

## EXPENDITURES.

The following are the expenditures for the year:

Salaries .....	\$ 5,598.29
Current expenses .....	943.54
Equipment .....	496.13
Heat and light .....	500.00
Total expenditures .....	\$ 7,537.96
Balance .....	240.04
	\$ 7,778.00

The above balance has been already appropriated for equipment and furniture.

## ENGINEERING TRADE SCHOOL.

The last legislature made the following appropriations for Engineering Extension and Trade School work:

Special appropriation .....	\$ 10,000.00
Two year millage tax, \$25,000.00; $\frac{2}{3}$ of annual apportionment available during the year.....	15,000.00
Total .....	\$ 25,000.00

Of this amount the College authorities set aside \$6,500 for the local Trade School. The student fees amounted to \$190.27, making a total of \$6,690.27 available for this work which was inaugurated at the beginning of the fiscal year of 1913-14. The expenses for the year are shown below:

## EXPENDITURES.

Salaries of professors and instructors.....	\$ 2,629.60
Current expenses .....	600.18
Equipment and furniture.....	46.74
Heat and light.....	400.00
Total .....	\$ 3,676.52

This leaves a balance on hand for local trade school purposes of \$3,013.75 which is treated, however, as a reserve or working balance needed to carry the work through the first nine months of the next year when the receipts from tax collections are low as compared with the other three months.

## PRACTITIONERS' COURSE.

In apportioning the two year millage tax the last general assembly set aside \$5,000 annually for the support of this course. Of this sum only one tax payment or about three-fifths of the annual fund allotted was available in the last biennium. The first course was given in August, 1914, after the expiration of the biennial period. The advertising, material purchased, and other expenses incurred in preparation, during the biennial period, amounted to \$588.86.

This course, though not a college course, is quite different from the other non-collegiate courses. It is, as its name implies, a practitioners' course, and is attended by many graduates of veterinary schools.

The following is a summary of the expenditures on account of the non-collegiate courses, and shows the cost of this non-collegiate work to the institution.

## SUMMARY OF EXPENDITURES—Non-collegiate courses.

	1912-13	1913-14
Two-year Agricultural course.....	\$ 27,849.08	\$ 34,737.28
Two-year Home Economics.....		7,537.96
Two-year Local Trade School.....		3,676.52
Practitioners' course .....		588.56
Totals .....	\$ 27,849.08	\$ 46,540.32

In comparing with the treasurer's books, there should be added to this summary the following:

	1912-13	1913-14
Refunds -----	\$ 233.29	\$ 537.94
Sales -----		3.49
Total -----	\$ 233.29	\$ 541.43

## BUDGETS OF NON-COLLEGIATE COURSES.

(1914-1915.)

Each of these courses has a support fund of its own, and therefore a separate budget. In the industrial divisions of the work each instructor teaches in a particular course. In the Science divisions, the instructors teach in one or more of the courses. The Science part of the budget is therefore given first, and its totals used in the different course budgets following. Each of these latter budgets is preceded by a statement showing the income of the course.

### SCIENCE BUDGET.

(Non-collegiate—1914-15.)

	Agri- culture	Home Economics	Trade School	Total
<b>Bacteriology and Botany:</b>				
*J. O. Cunningham, professor, three-fifths time -----	\$ 1,320.00			\$ 1,320.00
Anna Wolfe, instructor -----	500.00	600.00		1,100.00
**Edward Isaac, one-half time, instructor -----	600.00			600.00
Current expenses -----		100.00		100.00
<b>Chemistry:</b>				
***Jean MacKinnon, instructor -----		1,000.00		1,000.00
W. H. Lancelot, instructor -----	750.00	150.00		
Student assistant -----		150.00		150.00
Current expenses -----	100.00	40.00		140.00
<b>Economic Science:</b>				
****Charlotte Dryden, instructor, part time -----		100.00		100.00
J. H. Peters, instructor, part time -----	200.00			200.00
<b>English:</b>				
E. Maclean, professor -----	1,050.00	400.00	350.00	1,800.00
Esther L. Cooper, assistant professor -----	900.00	200.00	100.00	1,200.00
Mabel Fleming, instructor -----	650.00	325.00	75.00	1,050.00
Mrs. E. S. Youtz, instructor -----	650.00	200.00	150.00	1,000.00
Current expenses -----	100.00	50.00		150.00

\*Professor Cunningham receives \$880 from Horticulture for the other two-fifths of his time.

\*\*Mr. Isaac receives \$600 from Horticulture for the other one-half of his time.

\*\*\*Miss MacKinnon receives also \$300 from the Chemistry department.

\*\*\*\*Miss Dryden's total salary is \$800, charged as follows:

Economic Science -----	\$ 100.00
Public Speaking -----	600.00
Zoology -----	100.00

## SCIENCE BUDGET—Continued

	Agri- culture	Home Economics	Trade School	Total
History:				
T. G. Watson, instructor, part time.....	200.00	100.00	-----	300.00
Current expenses .....	20.00	-----	-----	20.00
Mathematics:				
Gertrude Herr, instructor.....	450.00	200.00	450.00	1,100.00
Mary Miller, half time, instructor.....	170.00	60.00	170.00	400.00
Student assistant .....	85.00	30.00	85.00	200.00
Current expenses .....	15.00	-----	-----	15.00
Modern Languages:				
Mildred Semmons, half time, instructor.....	300.00	200.00	100.00	600.00
Public Speaking:				
Charlotte Dryden, part time, instructor.....	300.00	150.00	-----	450.00
Current expenses .....	10.00	-----	-----	10.00
Zoology:				
Charlotte Dryden, part time, instructor.....	100.00	-----	-----	100.00
	\$ 8,470.00	\$ 3,905.00	\$ 1,630.00	\$ 14,155.00

The course budgets which follow, and in which the totals of the Science budget are used, give a full showing of the income and proposed expenditures on account of the non-collegiate work for 1914-15.

## AGRICULTURE—INCOME AND BUDGET.

(Non-collegiate, 1914-15)

## INCOME.

Annual appropriation .....	\$ 25,000.00
Annual allotment from two year millage tax.....	7,500.00
Total .....	\$ 32,500.00

## BUDGET.

Administrative expenses .....	\$ 175.00
Fires, lights and janitor service.....	1,400.00
	\$ 1,575.00

## Department Salaries and Expenses—

Agriculture Engineering:			
C. K. Shedd, associate professor.....	\$ 2,100.00		
Charles Miller, instructor.....	1,100.00		
H. C. Cameron, instructor, two-thirds time.....	667.00		
Current expenses .....	675.00	\$ 4,542.00	
Agromony:			
H. L. Elchling, associate professor.....	\$ 2,100.00		
D. Zentmire, instructor.....	1,400.00		
Peter Hanson, instructor.....	1,000.00		
Current expenses .....	350.00	\$ 4,850.00	
Animal Husbandry:			
M. G. Thornburg, professor.....	\$ 2,200.00		
P. L. Lisher, associate professor.....	1,600.00		
R. C. McChord, assistant professor.....	1,300.00		
Assistant in Poultry.....	250.00		
Current expenses .....	400.00	\$ 5,750.00	

Dairying:	
M. R. Tolstrup, assistant professor.....	\$ 1,700.00
N. S. Golding, instructor.....	1,200.00
Current expenses .....	300.00 \$ 3,200.00
Horticulture:	
J. C. Cunningham, professor, two-fifths time.....	\$ 880.00
E. L. Overly, assistant professor.....	1,600.00
Edward Isaac, one-half time.....	600.00
Current expenses (including Field Superintendent).....	375.00 \$ 3,455.00
Science departments:	
Total of Agricultural column in Science budget.....	\$ 8,470.00
Total .....	\$ 31,842.00

## SUMMARY.

Income .....	\$ 32,500.00
Proposed expenditures .....	31,842.00
Balance unappropriated .....	\$ 658.00

This balance is needed to meet emergencies.

An analysis of the budget shows the following as the expenses along the different lines:

Administration .....	\$ 175.00
Salaries .....	27,922.00
Department current expenses.....	2,345.00
Heating, lighting and janitor service.....	1,400.00
Total .....	\$ 31,842.00

## HOME ECONOMICS—INCOME AND BUDGETS.

(Non-collegiate, 1914-15.)

## INCOME.

Share of annual allotment from millage tax for Agriculture and Home Economics .....	\$ 5,000.00
Share of annual allotment from millage tax for two and four year courses in Home Economics.....	5,000.00
Total .....	\$ 10,000.00

## BUDGET.

Department Salaries and Expenses—	
Home Economics proper:	
Joan Hamilton, supervisor.....	\$ 1,500.00
Annie H. Hawkes, instructor.....	1,200.00
Current expenses .....	1,625.00 \$ 4,325.00
Fires, lights and janitor service.....	700.00
Science Department:	
Total of Home Economics column in Science budget.....	3,905.00
Equipment for Chemistry Department:	
(\$154.50 less \$20.04 from last year's balance).....	134.46
Total .....	\$ 9,064.46

## SUMMARY.

Income .....	\$ 10,000.00
Proposed expenditures .....	9,064.46
Balance unappropriated .....	\$ 935.54

## THIRD BIENNIAL REPORT

Askings for additional instruction and equipment sufficient to use up this entire balance are in the hands of the president.

The account analyzed shows expenditures along the following lines:

Salaries .....	\$ 6,415.00
Current expenses.....	1,815.00
Equipment .....	134.46
Heating, lighting and janitor service.....	700.00
Total .....	\$ 9,064.46

## ENGINEERING—INCOME AND BUDGET.

(Non-collegiate, 1914-15.)

## BUDGET.

Amount set aside for local Trade School from annual appropriation of \$25,000.00 .....	\$ 6,545.00
--	-------------

## INCOME.

## Salaries:

*K. G. Smith, professor, part time.....	\$ 800.00
*R. B. Dale, assistant professor, part time.....	900.00
H. E. Freund, instructor.....	1,000.00
Current expenses .....	1,365.00
	\$ 4,065.00
Heating, lighting and janitor service.....	500.00
Contingencies .....	350.00
Science Departments:	
Total of Trade School in Science budget.....	1,630.00
Total .....	\$ 6,545.00

## SUMMARY.

Amount allotted to Trade School.....	\$ 6,545.00
Proposed expenditures, including balance for contingencies.....	6,545.00

The working balance for this fund is provided for by reserving for that purpose last year's balance, as already explained.

The analysis of expenditures shows the following:

Salaries .....	\$ 4,330.00
Current expenses .....	1,365.00
Heating, lighting and janitor service.....	500.00
Contingencies .....	350.00
Total .....	\$ 6,545.00

The budget for the Extension part of this joint appropriation of \$25,000 is taken care of with the other Extension work under the heading "Extension Work."

\*Professors Smith and Dale appear also in the Extension budget, receiving there additional salaries of \$2,400.00 and \$900.00 respectively.

## PRACTITIONERS' COURSE—INCOME AND BUDGET.

(Non-collegiate, 1914-15.)

As the fund which maintains this course is derived from the millage tax, and as one of the two courses given is always held in the first or second month of each fiscal year, it is necessary to bring over a considerable balance from the previous year in order to meet expenses. The balance from last year is \$2,411.44. An equal balance should be carried over to next year's account. This would leave the annual appropriation of \$5,000 from the two year millage tax as the sum available for this year's budget. This amount will be sufficient to employ lecturers, provide material and meet all incidental expenses.

## III. EXTENSION WORK.

The College carries on the following lines of extension work:

1. Agricultural Extension.
2. Engineering Extension.

Considering these in their order, we have:

## 1. AGRICULTURAL EXTENSION.

This work was begun in 1906. Its first annual appropriation was \$15,000. This was gradually increased until last year it reached \$77,800. This year, when it will receive its full annual allowance from the two-year millage tax, its income from the state will be \$90,000. It will also receive \$10,000 from the National Government under the Lever bill.

The following shows the receipts and expenditures of the department during the biennial period together with the balances at the beginning and close of such period:

## RECEIPTS.

For 1912-13:		
Balance on hand July 1, 1912		\$ 11,012.33
Annual appropriation		50,000.00
For 1913-14:		
Annual appropriation	\$ 42,000.00	
Special appropriation	7,000.00	
Millage tax, three-fifths of annual allotment	28,000.00	77,800.00
Total		\$ 138,812.33

## EXPENDITURES.

	1912-13	1913-14
Salaries of staff	\$ 29,123.13	\$ 43,673.51
Office help	5,706.88	5,452.51
Outside help	3,626.52	4,537.99
Stationery and postage	1,699.81	1,886.25
Printing, bulletins, etc.	3,132.16	6,054.29
Charts, maps and photos	221.69	272.93
General supplies	2,477.15	2,300.55
Freight, express and drayage	511.61	593.73
Telegrams and telephone	324.49	278.72
Furniture and equipment	495.31	946.67

## EXPENDITURES—Continued

	1912-13	1912-14
State Fair expenses.....	198.71	200.00
Traveling expenses.....	3,487.20	5,363.53
Hog cholera expense.....		2,644.38
Totals.....	\$ 51,004.66	\$ 74,205.06
Less receipts for testing, etc.....	579.98	761.43
Net expenditures.....	\$ 50,424.68	\$ 73,443.63

## SUMMARY.

Available funds.....		\$ 138,812.33
Expended in 1912-13.....	\$ 50,424.68	
Expended in 1913-14.....	73,443.63	123,868.31
Balance on hand June 30, 1914.....		\$ 14,944.02

In drawing from the State Treasury the portion of this fund which comes from the two year millage tax, the amount drawn in the fall is about \$10,000 less than that drawn in the spring. The fund on hand is, therefore, about the amount needed for a working balance. The budget for 1913-14 is consequently limited to the income for the year without taking this balance into account.

## AGRICULTURAL EXTENSION—INCOME AND BUDGET.

1914-15.

## INCOME.

From State:		
Annual appropriation, permanent.....	\$ 42,000.00	
Annual appropriation from two year millage tax.....	48,000.00	\$ 90,000.00
From National Government:		
Lever bill.....		10,000.00
Total.....		\$ 100,000.00

## BUDGET.

## Salaries:

R. K. Bliss.....	Director.....	\$ 3,000.00
Paul C. Taff.....	Extension assistant professor of Soils and Farm Crops.....	2,200.00
E. C. Bishop.....	*State leader of Junior work.....	900.00
R. K. Farrar.....	Extension professor of Agricultural Education.....	2,200.00
M. A. Hauser.....	Extension professor of Soils and Farm Crops.....	2,400.00
K. W. Stouder.....	Extension professor of Veterinary Medicine.....	2,800.00
Neal S. Knowles.....	Extension professor of Home Economics.....	1,900.00
Louise H. Campbell.....	Extension professor of Home Economics.....	1,800.00
J. W. Coverdale.....	**Supervisor of County work.....	1,050.00
R. S. Herrick.....	Extension associate professor of Pomology.....	2,200.00
C. L. Fitch.....	Extension associate professor of Truck Gardening.....	2,200.00
R. F. O'Donnell.....	Extension associate professor of Animal Husbandry.....	2,200.00

\*The United States Department of Agriculture pays Professor Bishop \$1,800.00 additional, with the understanding that the college will pay his expenses not to exceed \$900.00, including trip to annual conference, to be charged against the Traveling Expense account.

\*\*United States Department of Agriculture pays \$1,650.00 additional, with same understanding as above.

## BUDGET—Continued

Kate R. Logan.....	*Assistant state leader of Junior work.....	600.00	
H. A. Bittenbender..	Extension associate professor of Poultry Husbandry .....	2,000.00	
M. H. Hoffman.....	Extension associate professor of Agricultural Engineering .....	2,000.00	
Idaho Sutherland.....	Extension assistant professor of Home Economics .....	1,500.00	
Mabel Bently.....	Extension assistant professor of Home Economics .....	1,500.00	
T. R. Douglass.....	Extension associate professor of Soils and Farm Crops .....	2,000.00	
Haden Hart.....	Extension assistant professor of Animal Husbandry .....	1,600.00	
C. B. Williams.....	**Assistant professor of Rural Sociology.....	900.00	
	Extension assistant professor of Social Welfare .....	1,600.00	
Fred C. Fenton.....	Extension assistant professor of Agricultural Engineering .....	1,200.00	
George Dunlop.....	Extension assistant professor of Soils and Farm Crops .....	1,700.00	
W. A. Buchanan.....	Extension assistant professor of Animal Husbandry .....	1,600.00	
C. D. Rice.....	Extension assistant professor of Veterinary Medicine .....	1,800.00	
W. E. Simonson.....	Extension assistant professor of Veterinary Medicine .....	1,800.00	
L. E. Willey.....	Extension assistant professor of Veterinary Medicine (July 1, 1914).....	1,800.00	
Mary B Richardson..	Extension assistant in Home Economics, Junior work (July 1, 1914).....	1,200.00	
James Watson.....	Extension assistant in Dairy Manufactures.....	1,400.00	
H. C. Barker.....	Extension assistant in Dairy Production.....	1,400.00	
Charles Dorchester..	Extension assistant in Soils and Farm Crops .....	1,300.00	
Donald Hunt.....	Extension assistant in Soils and Farm Crops .....	1,200.00	
Jessie Campbell.....	Extension assistant professor in Home Economics .....	1,000.00	
A. A. Smith.....	Secretary .....	1,400.00	
Six county advisers at \$50.00 a month.....		3,600.00	\$ 60,950.00

## Current Expenses:

Office help .....	\$ 7,500.00	
Printing .....	7,500.00	
General supplies .....	5,500.00	
Travelling expenses .....	6,000.00	
Outside help (Dairy test work, short course, and institute help, by day, week or month).....	4,000.00	
Stationery and postage.....	2,500.00	
State Fair fund.....	200.00	
Janitor (\$100.00), heat and light (\$700.00).....	800.00	
Reserve fund .....	3,150.00	\$ 37,150.00
Balance unappropriated .....		1,900.00
Total .....		\$ 100,000.00

## (2) ENGINEERING EXTENSION.

This work began with the last fiscal year, the fund for its support being included in the joint appropriation of \$25,000 for Trade School and Engineering Extension. The amount set aside from the appropriation for the extension work was \$18,500.00. The sum of \$973.30 was received as correspondence fees, making a total available of \$19,473.30.

\*Miss Logan receives in addition \$1,000.00 from the United States Agricultural Department.

\*\*Also receives \$900.00 from Economics department of college.

The following shows the expenditures for the year:

## EXPENDITURES.

Salaries of staff .....	\$ 8,435.86
Traveling expenses .....	1,761.76
Office help .....	799.07
Exhibit material for automobile exhibit .....	120.65
Other equipment and furniture .....	689.12
Current expenses .....	2,594.31
Total .....	\$ 14,400.77

This leaves a balance on hand of \$5,072.53 which is needed as a working balance to carry the work through until the millage tax, by which the extension department is maintained, is collected.

The following shows the amount set aside for the work of the present year and the budget voted by the Board:

## INCOME AND BUDGET.

1914-15.

## INCOME.

Amount of joint appropriation for Trade School and Extension set aside for Extension .....	\$ 18,455.00
--	--------------

## BUDGET.

Salaries:	
K. G. Smith, professor .....	\$2,400.00*
J. W. Parry, secretary and associate professor of engineering extension .....	2,000.00
R. B. Dale, assistant professor .....	900.00**
O. H. Johnson, field instructor .....	1,500.00
E. S. Shortess, state organizer .....	1,800.00
D. C. Faber, industrial engineer .....	1,000.00***
R. E. Davis, part time automobile instructor .....	500.00
	\$ 10,100.00
Current expenses .....	8,205.00
Fires, lights and janitor service .....	150.00
Total .....	\$ 18,455.00

The following is a summary of Extension fund expenditures for the biennium:

Agricultural Extension:	
For 1912-1913 .....	\$ 50,424.08
For 1913-1914 .....	73,443.63
	\$ 123,867.71
Engineering Extension:	
For 1913-1914 .....	14,400.77
Total .....	\$ 138,268.48

\*Receives \$800 additional from trade school.

\*\*Receives \$900 additional from trade school.

\*\*\*Receives \$1,000 additional from engineering experiment station.

## IV. EXPERIMENT FUNDS.

These include the following:

1. Agricultural Experiment Station.
2. Horse Breeding Experimentation.
3. Engineering Experiment Station.
4. Good Roads Experimentation.
5. Veterinary Investigations.

They are taken up in order.

## 1. AGRICULTURAL EXPERIMENT STATION.

The Station is supported jointly by the state and nation. It was established in 1887 by the congressional act which appropriated \$15,000 annually for its maintenance. This was increased in 1905 by the Adams Act which provided an additional annual fund of \$15,000, making \$30,000 which the national government now contributes toward the support of the Station. The state appropriated \$10,000 in 1902. Successive legislatures have added to this amount until the present income from the state totals \$112,000.00.

The following shows the receipts and expenditures of the Station for the biennial period:

## RECEIPTS.

Cash balance on hand July 1, 1912.....		\$ 23,027.70
Receipts 1912-13:		
From National Government, Hatch Act.....	\$ 15,000.00	
From National Government, Adams Act.....	15,000.00	
From State, annual appropriation, permanent.....	55,000.00	85,000.00
Receipts 1913-14:		
From National Government, Hatch Act.....	\$ 15,000.00	
From National Government, Adams Act.....	15,000.00	
From State, annual appropriation, permanent.....	55,000.00	
From State, special appropriation.....	10,000.00	
From two-year millage tax.....	34,200.00	129,200.00
Total .....		\$ 237,227.70

## EXPENDITURES.

	1912-13	1913-14
Salaries of station staff.....	\$ 39,418.69	\$ 49,738.46
Salaries of station assistants.....	1,627.70	1,435.00
Agricultural engineering section.....	2,574.92	2,823.42
Animal husbandry section.....	15,954.28	16,666.88
Bacteriology section.....	284.52	549.61
Botany section.....	1,187.78	1,272.68
Bulletin section.....	7,839.61	8,655.27
Chemical section.....	3,663.05	3,886.43
Dairy section.....	2,618.74	2,237.61
Dairy farm section.....	2,404.50	3,182.91
Director's section.....	1,791.90	1,462.45
Entomology section.....	1,105.35	952.63
Farm crops section.....	5,829.06	10,051.52
Forestry section.....	1,327.87	1,372.59
General expenses.....	211.82	200.00
Horticulture section.....	7,553.31	8,030.89
Photo section.....	1,679.33	1,906.82
Poultry section.....	1,500.82	1,743.95
Soils section.....	7,180.80	11,346.17
Veterinary section.....	403.26	27.50
Totals .....	\$106,247.31	\$ 127,542.79

Less sales .....	16,077.86	15,028.01
	<u>\$ 90,169.45</u>	<u>\$ 112,514.78</u>
Part payment on purchase of additional farm.....		21,123.33
	<u>\$ 90,169.45</u>	<u>\$ 133,638.11</u>
Total expenditures of national and state funds.....		

## SUMMARY.

Total receipts .....		\$ 237,227.70
Expenditures, 1912-13 .....	\$ 90,169.45	
Expenditures, 1913-14 .....	133,638.11	223,807.56
	<u></u>	<u></u>
Balance on hand June 30, 1914.....		\$ 13,420.14

In addition to the auditing of these accounts by the Finance Committee of the Board of Education, they have been examined and approved by a representative of the United States Department of Agriculture.

Among the expenditures for 1913-14 appears an item of \$21,123.33, part payment on the purchase price of additional farm to be used for experimental purposes. The last legislature authorized the use of \$35,000 of the Station appropriation for this purpose. A tract of 163 acres located about two miles south of the college grounds was contracted for. The price agreed upon, including interest on deferred payments, was \$31,508.33. The final payment of \$10,375.000, due Nov. 1, 1914, will be paid from the balance of \$13,420.14, brought over from last year. This will leave \$3,045.14 to apply on further land purchases contemplated by the Board. If the entire \$35,000 is used in buying land, it will be necessary to appropriate to this purpose the sum of \$446.53 from the reserve fund in the budget of 1914-15. The following exhibit shows the income for that year, and the purposes to which it is devoted in the budget:

### AGRICULTURAL EXPERIMENT STATION INCOME AND BUDGET FOR 1914-1915.

## INCOME.

From National Government:		
Hatch Act .....	\$ 15,000.00	
Adams Act .....	15,000.00	\$ 30,000.00
	<u></u>	<u></u>
From State:		
Annual appropriation, permanent.....	\$ 55,000.00	
Millage tax running two years.....	57,000.00	112,000.00
	<u></u>	<u></u>
Total .....		\$ 142,000.00

## BUDGET.

Salaries of station staff as shown in general salary budget given later in this report.....	\$ 64,613.00
Expenses of Sections:	
Bulletin section .....	\$ 9,000.00
Agricultural engineering .....	3,200.00
Animal husbandry .....	7,700.00
Dairy husbandry .....	3,150.00
Poultry .....	1,700.00
Soils section .....	12,400.00
Farm crops section .....	7,325.00
Pomology .....	4,800.00
Truck crops .....	1,200.00
Forestry .....	1,300.00
Farm management .....	2,500.00
Dairy .....	2,400.00
Chemistry .....	3,700.00
Botany .....	1,450.00
Bacteriology .....	550.00
Photography .....	800.00

Director's office .....	2,100.00	
State fair .....	200.00	
Entomology .....	1,300.00	\$ 66,775.00
Fires, lights and janitor service.....		3,900.00
Special items:		
Improvements including land, tiling, fencing and corn crib.....	\$ 4,000.00	
Reserve .....	2,500.00	6,500.00
Balance unappropriated .....		212.00
Total .....		\$ 142,000.00

This leaves a balance unappropriated of \$212.00, as shown above. In order that bills against the Station may be promptly paid it will be necessary that some of the heavier expenditures be postponed until the latter part of the year. The demands upon the Station funds have increased to such an extent that the Board of Education is asking of the Legislature an additional annual appropriation of \$25,000.00.

## 2. HORSE BREEDING EXPERIMENTATION.

The General Assembly of 1907 passed an act appropriating for experiments in breeding and developing a hardier type of horses an annual sum equal to that which might be allotted to the College, for such purpose, by the United States Department of Agriculture. The appropriation from the state was limited, however, to \$7,500 annually. Under this law the following sums were drawn from the State Treasury and expended prior to the last biennial period:

Fiscal Year:	Amount
1907-8 .....	\$ 1,125.00
1908-9 .....	5,000.00
1910-11 .....	1,400.00
1911-12 .....	450.00
Total prior to last biennium.....	\$ 7,975.00

The following shows the amounts drawn and expended during the last biennium:

### DRAWN FROM STATE TREASURY.

During fiscal year 1912-13.....	\$ 360.00
During fiscal year 1913-14.....	1,564.19
Total .....	\$ 1,924.19

### EXPENDITURES.

During fiscal year 1912-13:		
Salary of horseman .....	\$ 260.00	
Cablegrams .....	8.50	\$ 268.50
During fiscal year 1913-14:		
Salary of horseman .....	\$ 65.00	
Feeding and care of horses.....	1,584.00	1,649.00
Total expenditures .....		\$ 1,917.50
Balance on hand June 30, 1914.....		6.69
Total .....		\$ 1,924.19

The amount of state funds devoted to this work during the coming year will depend upon the allotment made by the Agricultural Department at Washington.

## 3. ENGINEERING EXPERIMENT STATION.

The appropriation for this work has been gradually increased from the \$3,000 granted it in 1904, when it was established, up to the present annual appropriation of \$15,000. The following shows the receipts and expenditures for the last biennium:

## RECEIPTS.

Cash on hand July 1, 1912.....		\$ 2,367.31
From state, annual appropriation, 1912-13.....		10,000.00
From state, annual appropriation, 1913-14.....	\$ 10,000.00	
From state, millage tax, 1913-14.....	3,000.00	13,000.00
Total .....		\$ 25,367.31

## EXPENDITURES.

Salaries:	1912-1913	1913-1914
A. Marston .....	\$ 500.00	\$ 333.30
G. A. Gabriel.....	100.00	16.66
M. F. Beecher.....	620.83	729.16
A. O. Anderson.....	1,500.00	
C. S. Nichols.....	791.67	633.33
O. M. Smith.....	1,200.00	533.36
H. W. Wagner.....	1,345.84	1,500.00
W. H. Meeker.....		166.66
L. B. Spinney.....		166.67
F. A. Fish.....		166.66
S. W. Beyer.....		83.26
R. W. Crum.....		83.26
M. I. Evinger.....		83.33
W. J. Schlick.....		900.00
J. S. Coye.....		350.06
G. W. Armstrong.....		450.00
Total salaries .....	\$ 6,058.34	\$ 6,195.71
Office help .....	478.61	702.85
General and experimental labor.....	487.61	1,230.49
Water tax .....	8.76	7.24
Gas .....	44.40	213.30
Cuts and printing .....	2,728.33	684.83
Office supplies .....	293.76	327.99
Freight, express and drayage.....	103.72	113.34
Miscellaneous supplies .....	764.37	1,458.27
Gasoline and oil.....	28.23	6.41
Traveling expenses .....	913.81	1,724.96
Photos .....	15.36	
Electricity .....	38.76	28.04
Postage .....	140.29	175.00
Lumber .....	25.79	49.16
Furniture .....	34.43	35.60
Telegrams and telephones.....	41.84	60.04
Repairs .....	15.85	22.19
Ice .....	.60	.80
Coal .....	64.52	
Equipment .....	217.25	1,609.15
Chemical analysis .....		200.05
Total .....	\$ 12,504.63	\$ 14,845.42
Less sales, etc.....	943.25	1,582.64
Total expenditures .....	\$ 11,561.38	\$ 13,262.78

## SUMMARY.

Total receipts .....		\$ 25,367.31
Expenditures, 1912-1913 .....	\$ 11,561.38	
Expenditures, 1913-1914 .....	13,262.31	24,823.69
Balance on hand, June 30, 1914.....		\$ 533.62

The cash on hand is treated as a working balance and not available for budget purposes. The following shows the income for 1914-15, and the expenditures decided upon by the Board:

ENGINEERING EXPERIMENT STATION—INCOME AND BUDGET.  
1914-15.

## INCOME.

Annual appropriation, permanent.....	\$ 10,000.00
Annual allotment from two year millage tax.....	5,000.00
Total .....	\$ 15,000.00

## BUDGET.

## \*Salaries:

A. Marston, director .....	\$ 300.00	
O. S. Nichols, assistant to director.....	600.00	
S. W. Beyer, mining engineer.....	100.00	
W. H. Meeker, mechanical engineer.....	200.00	
F. A. Fish, electrical engineer.....	200.00	
L. B. Spinney, illuminating engineer.....	200.00	
J. E. Brindley, engineering economist.....	100.00	
M. I. Evinger, hydraulic engineer.....	100.00	
R. W. Crum, structural engineer.....	200.00	
J. S. Coye, chemist.....	400.00	
H. W. Wagner, assistant engineer in mechanical and electrical engineering .....	1,600.00	
M. F. Beecher, assistant engineer in ceramics.....	1,000.00	
W. J. Schlick, drainage engineer.....	1,200.00	
C. G. Armstrong, assistant chemist.....	600.00	
, analyst .....	900.00	
H. F. Clemmer, testing engineer.....	800.00	
Max Levine, bacteriologist .....	200.00	
D. C. Faber, industrial engineer.....	600.00	
, junior research fellow.....	300.00	\$ 9,600.00
Current expenses:		
Stationery, printing and office help.....	\$ 2,100.00	
Fires, lights and janitor service.....	900.00	
Investigational and traveling expenses.....	2,000.00	
Total .....	\$ 14,600.00	
Balance unappropriated .....	400.00	
Total .....	\$ 15,000.00	

The work of the Station having developed much beyond the means available for its maintenance, the Board of Education asks the Legislature that its annual support fund be increased from \$15,000 to \$20,000.

## 4. GOOD ROADS EXPERIMENTATION.

The State provides an annual appropriation of \$10,000 for this purpose. The work naturally connects itself closely with that of the Engineering Experiment Station; it is, in fact, in its object, a part of that Station. Since it has, however, a special support fund of its own, its financial operations are given separate presentation in this report.

The following shows its receipts and expenditures for the biennium, together with the cash balances on hand at the beginning and end of the period.

## RECEIPTS.

Balance on hand, July 1, 1912.....	\$ 3,137.52	
Annual appropriation, 1912-1913 .....	\$ 10,000.00	
Annual appropriation, 1913-1914 .....	10,000.00	20,000.00
Total .....	\$ 23,137.52	

\*A number of the station staff devote only a portion of their time to the station work. Their total salaries and the division of the same will be found in the general salary budget given later in this report.

## EXPENDITURES.

Salaries:	1912-1913	1913-1914
T. H. MacDonald.....	\$ 1,983.32	-----
J. H. Ames.....	870.00	-----
J. E. Kirkham.....	250.00	-----
C. B. McCullough.....	1,225.00	-----
F. R. White.....	1,200.00	-----
A. Marston.....	-----	166.70

Office help, general labor and traveling expenses.....	2,779.20	1,884.75
Investigation of bridge patents.....	250.00	-----
Office supplies, postage, freight, express, drayage, telegrams and telephones, furniture, equipment, photos, lantern slides, print- ing and repairs.....	2,228.62	3,077.61
Total.....	\$ 10,786.14	\$ 9,128.84

## SUMMARY.

Total receipts.....		\$ 23,137.52
Expenditures, 1912-1913.....	\$ 10,786.14	
Expenditures, 1913-1914.....	9,128.84	19,914.98
Balance on hand, June 30, 1914.....		\$ 3,222.54

The balance on hand is treated as a working and emergency balance, and is not considered as available for the budget purposes of the present year.

The following shows the available income and the budget for 1914-1915:

## INCOME.

State, annual appropriation, permanent.....	\$ 10,000.00
---	--------------

## BUDGET.

*Salaries:		
A. Marston, director.....	\$ 200.00	
O. S. Nichols, assistant to director.....	500.00	
S. W. Beyer, mining engineer.....	100.00	
R. W. Crum, structural engineer.....	100.00	
T. R. Agg, road engineer.....	1,000.00	
J. S. Coye, chemist.....	1,400.00	
M. F. Beecher, assistant engineer in road materials.....	600.00	
W. J. Schlick, drainage engineer.....	600.00	
C. G. Armstrong, assistant chemist.....	400.00	
H. F. Clemmer, testing engineer.....	400.00	
D. O. Faber, industrial engineer.....	400.00	
_____, senior research fellow.....	500.00	\$ 6,200.00
Current expenses:		
Stationery, printing and office help.....		\$ 900.00
Fires, lights and janitor service.....		600.00
Investigational and traveling expenses.....		2,300.00
Total.....		\$ 10,000.00

## 5. VETERINARY INVESTIGATIONS.

In answer to the demands of the live stock interests of the state that investigation be made of animal diseases, an annual fund of \$10,000 was provided by the last legislature for this purpose. No part of it, however, was available until the second year of the biennial period and

\*Salaries listed here are the partial salaries charged to this fund. For the full salaries, see the general salary budget given later in this report.

then not the full annual appropriation. The receipts for the year, together with the expenditures, are shown in the following exhibit:

## RECEIPTS.

Special state appropriation.....	\$ 3,000.00
Millage tax; $\frac{1}{2}$ of annual allotment.....	6,000.00
Total .....	\$ 9,000.00

## EXPENDITURES.

Salaries:	
Dr. Kurt Schern.....	\$ 2,103.43
Dr. C. H. Stange.....	225.00
Paul Parwin, laboratory assistant.....	371.20
General and expert work.....	402.80
Care of animals.....	129.65
Traveling expenses.....	201.43
Office supplies.....	46.78
Postage.....	10.00
General supplies.....	2,475.60
Dissectors.....	769.35
Equipment.....	2,044.94
Lumber.....	133.84
Telephones and telegrams.....	4.57
Freight, express and drayage.....	28.02
Gas.....	29.93
Ice.....	12.15
Total expenditures.....	\$ 8,988.60
Unexpended balance, June 30, 1914.....	11.31
Total .....	\$ 9,000.00

Leaving the balance to cover small emergency items, the fund available for the present year, and the use to which it is to be put are shown in the following:

VETERINARY INVESTIGATIONS—INCOME AND BUDGET  
1914-15.

## INCOME.

Appropriation from two year millage tax .....	\$ 10,000.00
---	--------------

## BUDGET.

Kurt Schern, professor .....	\$ 2,400.00
Dr. C. H. Stange .....	300.00
Heating, lighting and janitor service .....	350.00
Current Expenses:	
Assistants, care of animals, traveling expenses, supplies, equipment and working balance .....	6,950.00
	\$ 10,000.00

As the work is in the formative stage of development, it is not feasible to make, in advance, any very accurate estimate of the different items of expenditure for the present year. Since, however, considerable equipment was purchased with last year's fund, it is hoped that a larger proportion of the appropriation can be used directly for investigation purposes. The work already done has emphasized the need of such investigations, and has led the Board of Education to ask the legislature for an additional annual fund of \$5,000.

The following is a summary of the expenditures for experiment work during the biennium:

SUMMARY OF EXPERIMENT FUND EXPENDITURES.

	1912-13	1913-14
Agricultural experiment station .....	\$ 90,169.45	\$ 133,638.11
Horse breeding experimentation .....	268.50	1,649.00
Engineering experiment station .....	11,561.38	13,262.78
Good roads experimentation .....	10,786.14	9,128.84
Veterinary investigations .....		8,988.69
Totals .....	\$112,785.47	\$ 166,667.42

## V. BUILDINGS, IMPROVEMENTS AND EQUIPMENT.

A sharp line of distinction is drawn between the department Support funds and funds which add to the plant and its equipment, and keep them in condition for efficient use. These latter funds include:

- (a) The Special Building Tax.
- (b) The special appropriations for Chemistry building, equipment and supplies; and for the central heating plant.
- (c) The appropriations from the two year millage tax for improvements, equipment and small buildings, and the direct appropriations for the same purposes.
- (d) The annual repair and contingent fund, and the rental of rooms, used for repairs and improvements.

### (a) SPECIAL BUILDING TAX.

The expenditures under the Special Building Tax during the biennium have to do with the small balances brought over from the previous biennium as well as the larger sums used in the new building enterprises of the two years. Some of these larger buildings are not yet completed, and therefore only a part of the funds set aside for their erection has been expended.

The following are the smaller balances coming forward into the period to be accounted for.

	Balance July 1, 1912	Expended	Balance July 1, 1914
Central building .....	\$ 1,304.22		
Used for repairing walls, floors, etc., in dairy building from fund reserved on Schleuter contract as explained on page 396 of last biennial report.....		\$ 606.48	\$ 697.74
Agricultural hall .....	21.96	17.26	4.70
Fixtures for photographic room .....	642.48		
Engineering hall annex.....			
Lighting fixtures .....	\$226.83		
Plumbing .....	303.43		
Painting .....	16.79		
Radiation .....	95.43		
	\$642.48	642.48	

## SPECIAL BUILDING TAX—Continued

Ceramics building	397.74		397.74
Domestic technology building	1,579.24		
Screens	\$347.24		
New door and frame, painting floors, re- moving partitions, floors in elevator shaft, cupboards, glass doors and shelv- ing	379.12		
General	32.40		
	\$758.76	758.76	820.48
Judging pavilion	966.26		
Proudfoot, Bird and Rawson	\$ 7.09		
Grading	51.44		
Shades	23.20		
	\$455.86	455.86	510.40
Totals	\$ 4,911.90	\$ 2,480.84	\$ 2,431.06

The following are the larger items of the Building Tax expenditures, and are, therefore, given fuller statement:

## VETERINARY BUILDING.

The amount set aside for this building was \$150,000. The unexpended balance at the beginning of the biennium was \$9,570.70.

The following are the expenditures during the two years:

Balance on Benson and Marxer's contract		\$ 4,876.71
Balance reserved at beginning of period as shown on page 399 of last biennial report	\$ 5,252.60	
Deductions made including charge of \$750 for 15 days delay in completing contract	\$ 801.30	
Extras allowed	425.41	
Net deduction	375.89	
Balance paid	\$ 4,876.71	
Proudfoot, Bird & Rawson		1,038.05
Grahl & Herman, balance on sheet metal contract		175.00
Elevator		250.00
Screens		190.76
Fitting up research laboratory		441.05
Fitting up room for Vice Dean Dimock		145.20
Heating, lighting and plumbing		108.86
Six single horse stalls, three box stalls, cement floor for basements of buildings 1, 2 and 6; doors for all box stalls in building No. 4, together with minor expense items		2,344.09
Total expended		\$ 9,569.72
Balance unexpended		.98
Total		\$ 9,570.70

## GYMNASIUM.

The amount of Special Building Tax set aside for the erection of the Gymnasium was \$150,000. Work was begun on the building in the spring of 1911. The expenditures from that time to the beginning of the last biennial period amounted to \$69,321.10. These are summarized on page 400 of the last biennial report. The balance unexpended July 1, 1912, was therefore \$80,678.90

The following are the expenditures during the biennium:

Balance on O. E. Heaps' contract on brick work		\$ 17,315.31
Balance of contract unpaid July 1, 1912, as shown on page 400 of last biennial report	\$ 16,366.91	
Extras allowed	948.40	
Balance paid	\$ 17,315.31	
C. G. Hipwell, on contract for sheet metal work and roof		\$ 5,858.81
Amount of contract	5,847.00	
Extras allowed	\$ 140.25	
Deductions for material returned	128.44	
Net extras		11.81
Amount paid	\$ 5,858.81	
Crown Iron Works, contract for ornamental iron		4,123.00
Fraley & Young, contract for plastering		2,788.00
McClelland & Co., balance of contract of \$6,124.00 for mill work		4,976.50
Art Mosaic Tile Co., terrazzo and cement work		3,824.54
Amount of contract	\$ 4,200.00	
Deductions for work done by college and \$200 for 20 days delay in completing contract	375.46	
Amount paid	\$ 3,824.54	
Andreas Stone and Marble Co.		4,329.00
Amount of contract	4,829.00	
Deduction because of delay in completing contract	500.00	
Amount paid	\$ 4,329.00	
Des Moines Sheet and Metal Co., contract for metal lath work		1,750.00
National Regulator Co., contract		1,269.00
Proudfoot, Bird & Rawson, balance of architects' fees on basis of 2½% of cost of building		1,864.64
Grahl-Herman Co., contract on metal work		1,382.00
Garver Hardware Co.		1,517.05
Amount of contract	1,650.00	
Deductions	221.20	
Extras allowed	88.25	
Net deductions		132.95
Amount paid	\$ 1,517.05	
A. E. Shorthill Co., balance of \$15,000 contract for structural steel and iron		1,184.54
Balance unpaid July 1, 1912	1,579.54	
Deduction for delay in work	400.00	
Extras allowed	5.00	
Net deduction		395.00
Amount paid	\$ 1,184.54	
Central Chandelier Co., lighting fixtures		450.45
Painting		1,304.28
Plumbing		3,702.65
Lighting		871.51
Heating		8,230.74
General labor and material:		
Running track	1,413.00	
Floor construction main exercise room	2,534.00	
Handball court special exercise room	807.35	
Main roof monitor	3,120.00	
Reinforced floors, balconies	2,875.00	
Swimming pool except lining	790.00	
Placing of all millwork	1,800.00	
Grounds for plaster	140.00	
False frames	150.00	
Anchors, nails and bolts	250.00	13,879.35
Total expended		\$ 80,621.37
Unexpended balance June 30, 1914		57.53
		\$ 80,678.90

This balance of \$57.53 will be used to cover minor items in finishing the building.

### MECHANICAL ENGINEERING LABORATORY.

The sum of \$50,000.00 was set aside by the legislature for the erection and equipment of this building. The building was erected, under contract, by C. E. Heaps. The heating, lighting and plumbing work was done by the College under the direction of Mr. Sloss, Superintendent of Buildings; the purchase and installation of equipment was under the direct charge of Professor Meeker, head of the Mechanical Engineering department who also acted as superintendent, having general oversight of all expenditures under the appropriation.

The following is a condensed exhibit of the expenditures during the biennium:

C. E. Heaps, on contract .....		\$ 38,910.65
Original contract .....	\$ 39,400.00	
Extras allowed .....	\$ 549.65	
Deductions agreed upon .....	39.00	
Net above original contract .....	510.65	
Total .....	\$ 39,910.65	
Reserved until roof is put in satisfactory shape.....	1,000.00	
Amount paid .....	\$ 38,910.65	
Cost of wrecking old building .....		489.37
Proudfoot, Bird & Rawson, architects' fee $2\frac{1}{2}\%$ on cost of building .....		1,033.36
Plumbing .....		1,027.40
Lighting .....		389.35
Heating .....		1,481.50
Heating tunnel .....		82.64
Material and labor, setting boiler .....		476.10
Concrete floor and foundations for machinery.....		485.98
Installing apparatus .....		742.41
Piping, valves, and labor connecting machinery with boiler .....		2,469.00
General items; freight, express, telegrams, traveling expenses, etc. ....		139.36
Total .....		\$ 47,727.72
Balance unexpended .....		2,272.28
		\$ 50,000.00

The balance of \$2,272.28 will be needed to cover the following:

Payment of amount reserved on contract for completion of building.....	\$ 1,000.00
Completing concrete floors .....	450.00
Material and labor installing steam turbine, and coal and ash handling machinery, and making proper connections.....	822.28
Total .....	\$ 2,272.28

## TRANSPORTATION BUILDING.

The appropriation for this purpose from the Special Building Tax was \$65,000. The contract for the erection of the building was let to A. H. Neumann & Co.; the heating, lighting, plumbing, painting, sewers and other construction work were assigned to Superintendent Sloss while Professor King had charge of the purchase and installing of the equipment. The expenditures along these lines during the biennium were as follows:

## EXPENDITURES.

A. H. Neumann & Co., contract.....		\$ 43,502.85
Original contract .....	\$ 42,830.00	
Extras allowed .....	972.85	
Total .....	\$ 43,802.85	
Reserved until completion of contract .....	300.00	
Amount paid .....	\$ 43,502.85	
Proudfoot, Bird & Rawson, architects' fee (2½% on cost).....		1,188.72
Plumbing .....		1,129.38
Lighting .....		705.47
Heating .....		2,289.05
Painting .....		103.87
Sewers .....		584.66
Tunnel and water main .....		234.01
General expenses .....		78.54
Total expended .....		\$ 49,816.55
Balance unexpended .....		15,183.45
		\$ 65,000.00

This balance has been set aside for the following:

Payment of amount reserved on Neumann & Co.'s contract.....		\$ 300.00
Plumbing .....		19.67
Equipment:		
4 Alden brakes .....	\$ 2,800.00	
1 crane .....	1,343.09	
4 bearings for locomotive support wheels .....	1,524.00	
8 short supports for track .....	225.00	
6 bedplates for locomotive support wheels .....	2,914.00	
Gate valves for feed water tanks .....	44.16	
Rails for track .....	129.56	
Turnbuckles for track .....	75.00	
Lumber .....	45.78	
Piping for water supply .....	1,100.00	
Drawbar for dynamometer .....	155.00	
Temporary dynamometer .....	500.00	
Stack for locomotive .....	500.00	
Shades for building .....	100.00	
Safety links for dynamometer .....	328.00	
Labor installing above equipment .....	2,200.00	
Freight .....	300.00	
Incidentals .....	180.19	14,863.78
Total .....		\$ 15,183.45

## CHEMISTRY BUILDING.

The authority for the erection of this building is found in Joint Resolution No. 14 of the Thirty-fifth General Assembly, and Chapter 329 of the Laws of said Assembly. The joint resolution approves "plans and specifications for the erection of a Chemistry building at a cost not to exceed \$250,000, to be built and erected under the provisions of Chapter 201 of the Acts of the Thirty-fourth General Assembly," which chapter

provides for the levying of a special building tax for the state educational institutions. Chapter 329, referred to above, appropriates \$125,000 "as an emergency fund to be used as an additional fund for the construction of a chemistry building and the equipment of the same, and the purchase of laboratory supplies." Since this chapter authorizes the use of \$25,000 for equipment and supplies, and the joint resolution provides that \$250,000 may be used in the erection of the building, the College authorities have construed the two as placing a limit of \$275,000 on *building and supplies* to be divided between the special building tax and the special appropriation as follows:

Special building tax .....	\$ 150,000.00
Special appropriation .....	125,000.00
Total .....	\$ 275,000.00

The contract for the erection of the building proper was let to the McCarthy Improvement Company for \$200,000. It was directed that the heating, lighting and plumbing, and all other work necessary to complete the building should be done directly by the College under the supervision of Superintendent Sloss. The following are the expenditures from the building tax fund during the last biennial period:

## EXPENDITURES.

McCarthy Improvement Co., on contract .....	\$ 111,013.38
Proudfoot, Bird & Rawson, on architects' fee .....	4,500.00
Electric light wiring .....	422.28
Power .....	77.72
Total .....	\$ 116,073.38

This leaves an unexpended balance of \$33,926.62 of the \$150,000 of Special Building Tax set aside for this building. This balance has been reserved to cover the following:

McCarthy Improvement Co., on contract .....	\$ 32,486.62
Proudfoot, Bird & Rawson, on architects' fees .....	1,440.00
Total .....	\$ 33,926.62

The expenditures charged the Special Appropriation of \$125,000 and the further items to be paid from any unexpended balance to its credit will be found later in this report under "Special Appropriations."

## WOMEN'S DORMITORY.

The Thirty-fourth General Assembly set aside \$55,000 from the Special Building Tax for the erection of an addition to Margaret Hall. This addition is in the shape of a Woman's dormitory. The contract for its erection was let to W. F. Kucharo and Company for \$55,000. The remainder of the work is to be done under the direct charge of Superintendent Sloss. The expenditures in the last biennium were as follows:

## EXPENDITURES.

Proudfoot, Bird & Rawson, architects' fees .....	\$ 927.50
Excavating .....	480.91
Sewers .....	109.83
Miscellaneous expenses .....	12.94
Total .....	\$ 1,531.18

The following is Superintendent Sloss's itemized estimate of the cost of the building when completed:

W. F. Kucharo's contract .....	\$ 40,457.50
Extras on building .....	1,900.00
Excavating .....	490.00
Heating and plumbing .....	8,000.00
Electric wiring .....	1,000.00
Electric fixtures .....	300.00
Cistern .....	200.00
Sewers .....	400.00
Kitchen equipment .....	400.00
Architects' fee .....	1,325.00
Lift .....	250.00
General expenses including inspector's salary .....	277.50
Total .....	\$ 55,000.00

## HORTICULTURAL LABORATORY AND GREENHOUSES.

The last legislature set aside \$95,000 from the Special Building Tax for the erection of Agricultural laboratories. Of this amount, the Board of Education appropriated \$60,000 toward the erection of a Horticultural laboratory and greenhouses. These are now under construction. The expenditures, prior to July 1, 1914, amounted to only \$107.19, covering bills for clearing the site, excavating, and a few minor items of general expense.

The following summary shows the entire expenditures of the Special Building Tax fund during the biennial period, together with the balance in the hands of the College Treasurer at the beginning of the period and the annual amounts drawn by him from the State Treasury during the biennium:

## SPECIAL BUILDING TAX SUMMARY.

COLLEGE TREASURER'S RECEIPTS AND DISBURSEMENTS.  
1912-14.

## RECEIPTS.

Balance in hands of college treasurer July 1, 1912 .....	\$ 41.24
Drawn from state treasury:	
During fiscal year 1912-1913 .....	101,433.44
During fiscal year 1913-1914 .....	206,453.27
Total .....	\$ 307,927.95

## EXPENDITURES.

Central building .....	\$ 606.48
Hall of agriculture .....	17.26
Engineering hall annex .....	642.48
Domestic technology building .....	758.76
Judging pavilion .....	455.86
Veterinary building .....	9,569.72
Gymnasium .....	80,621.37
Mechanical engineering laboratory .....	47,727.72
Transportation building .....	49,816.55
Chemistry building .....	116,073.38
Women's dormitory .....	1,531.18
Horticultural laboratory—greenhouses .....	107.19
<b>Total .....</b>	<b>\$ 307,927.95</b>

The combined accounts of the College and the State Treasurer, which give the condition of this fund as a whole, show the following:

## RECEIPTS.

Cash in hands of state treasurer July 1, 1912 .....	\$ 91,274.67	
Cash in hands of college treasurer July 1, 1912 .....	41.24	\$ 91,315.91
Collected during fiscal year 1912-13 .....	\$149,068.60	
Collected during fiscal year 1913-14 .....	169,528.97	318,597.57
<b>Total .....</b>		<b>\$ 409,913.48</b>

## EXPENDITURES.

Expended in the erection of buildings, as shown by college treasurer's books .....	\$ 307,927.95
Balance in hands of state treasurer at close of biennial period after deducting all drafts of college treasurer included by him in accounts of the last fiscal year .....	101,985.53
<b>Total .....</b>	<b>\$ 409,913.48</b>

In looking to the future of this fund, it is more convenient to deal with calendar than fiscal years. Transferring to this basis, we have as the amount available during the remained of the present calendar year the following:

Cash on hand July 1, 1914 .....	\$ 101,985.53
Estimated income July 1, 1914, to Jan. 1, 1915 .....	72,000.00
<b>Total .....</b>	<b>\$ 173,985.53</b>

Against this amount stand the following claims:

Central building .....	\$ 697.74
Agricultural hall .....	4.70
Ceramics .....	397.74
Domestic Technology building .....	820.48
Judging pavillion .....	510.40
Veterinary building .....	.98
Gymnasium .....	57.53
Mechanical Engineering laboratory .....	2,272.28
Transportation building .....	15,183.45
Chemistry building .....	33,926.62
Women's dormitory .....	53,468.82
Horticultural laboratory .....	59,892.81
	<b>\$ 167,233.55</b>

This will leave an estimated balance, after completing the foregoing buildings, of nearly \$7,000. The tax collections for 1915 on account of the Special Building Tax will amount to about \$180,000, making the sum of \$187,000 available for building purposes during the calendar year 1915. It is recommended by the Building Committee of the Board of Education that plans be submitted to the Thirty-sixth General Assembly for the erection of the following buildings:

Animal Husbandry building .....	\$ 80,000.00
Bacteriological and Zoological building.....	65,000.00
College hospital .....	30,000.00
	<hr/>
	\$ 175,000.00

The last levy under the present tax law will be made in 1916, to be collected in 1917.

#### (b) SPECIAL APPROPRIATION FOR CHEMISTRY.

As already stated, the last legislature appropriated to the College the sum of \$125,000 "as an additional fund for the construction of a chemistry building and the equipment of the same, and the purchase of laboratory supplies."

The following shows the expenditures, on account of this appropriation, during the biennial period:

##### EXPENDITURES.

McCarthy Improvement Co., on contract.....	\$ 22,355.83
Excavations and foundations.....	10,089.18
Sewers and water mains.....	1,808.02
Sash and sills in basement.....	827.00
Ducts in basement.....	1,248.61
Wiring for electric lighting.....	2,742.87
Heating and plumbing, including plumbing to and in laboratory tables.....	11,036.37
Laboratory tables and sinks used at first in the Emergency building and then transferred to Chemistry building.....	2,062.43
Grading in basement.....	79.35
Apparatus and supplies.....	10,591.70
Wiring for power and direct current.....	1,682.78
High pressure steam.....	140.73
General expenses, including traveling expenses, salary of foreman, telegrams, telephone, drafting, tools and other minor items.....	1,816.27
	<hr/>
Total expended .....	\$ 66,481.14
Unexpended balance .....	58,518.86
	<hr/>
	\$ 125,000.00

The following is Superintendent Sloss's estimate of the way in which the unexpended balance will need to be used:

Balance of McCarthy Improvement Co.'s contract.....	\$ 34,144.17
Extras on building after deducting stone furnished contractor.....	2,515.00
Sewers .....	39.35
Ducts in basement.....	653.33
Wiring for electric lighting.....	618.56
Heating and plumbing.....	10,762.94
Grading in basement.....	515.43

Basement fans for general ventilation.....	1,527.24
Partitions in wings.....	7,292.84
General, including salary of foreman.....	450.00
Total .....	\$ 58,518.86

## CENTRAL HEATING PLANT.

At the beginning of the biennial period there remained of the \$43,000 appropriated by the Thirty-fourth General Assembly for the extension of the Central Heating system, an unexpended balance of \$39,217.35. The last legislature added to this, for the further equipment of the central station and extensions of the tunnel, the sum of \$30,000. The College had asked for \$50,000. The reduction compelled Superintendent Sloss to postpone some greatly needed improvements in the plant, and use the new fund available almost entirely in tunnel extensions to the new buildings. The following shows the funds available during the two years, and the purposes for which they were used:

## RECEIPTS.

Unexpended balance July 1, 1912.....	\$ 38,217.35
Appropriation by Thirty-fifth general assembly.....	30,000.00
Total amount available.....	\$ 68,217.35

## EXPENDITURES.

## For 1912-1913:

Coal and ash handling machinery.....	\$ 15,749.93
Water heater.....	1,517.10
Two 469 horse power boilers, chain grates, foundations and installation .....	13,982.21
High pressure mains in tunnel.....	3,276.58
Tunnel in gymnasium.....	3,692.23
	\$ 38,217.35

## For 1913-1914:

Tunnel extensions .....	\$ 1,106.91
Chimney .....	3,750.50
Piping in tunnels.....	602.15
Tunnel in Chemistry building.....	7,203.85
Tunnel to Transportation building.....	1,636.12
High pressure steam main.....	384.52
High tension line in tunnel.....	2,310.23
	16,994.28

Total expenditures .....	\$ 55,211.63
Unexpended balance June 30, 1914.....	13,005.72
Total .....	\$ 68,217.35

It is proposed to use the unexpended balance of \$13,005.72 for the following purposes:

High pressure steam mains.....	\$ 4,875.89
Chimney .....	3,746.21
Roof of central station.....	4,068.14
High tension electric light wires.....	307.17
Chemistry building tunnel.....	8.31
Total .....	\$ 13,005.72

The tunnel extensions to the new buildings to be erected in the next two years, and the added equipment in the central plant and existing tunnels made necessary thereby, will require an appropriation from the

next legislature of at least \$39,600. The following are the items making up such necessary askings:

Equipment:

Two 500 H. P. boilers.....	\$ 7,000.00	
Two sets chain grate stokers.....	3,425.00	
Piping for boilers.....	1,200.00	
Foundations and settings.....	2,500.00	
Coal hoppers.....	1,500.00	
Ash conveyors.....	2,500.00	
Turrell regulator.....	675.00	
Railroad scales.....	1,500.00	
Car moving apparatus.....	425.00	
Feed water pump to boilers.....	750.00	
Breeching to boilers.....	450.00	
Exciter for alternating current machine (old one worn out).....	1,475.00	\$ 23,400.00

Repairs and Improvements:

600 ft. tunnel postoffice to Chemistry building.....	\$ 7,200.00	
300 ft. tunnel old Agricultural building to Science buildings.....	3,600.00	
400 ft. tunnel to Animal Husbandry buildings.....	4,800.00	
500 ft. tunnel water pipe to new building.....	600.00	16,200.00

Total ..... \$ 39,600.00

(c) PUBLIC GROUNDS IMPROVEMENTS.

The Thirty-fourth General Assembly appropriated \$13,500 for the improvement of the College campus; of this amount there was on hand at the beginning of the biennium an unexpended balance of \$6,771.32. The Thirty-fifth General Assembly set aside from the two year millage tax an annual fund of \$10,000 for the maintenance and improvement of public grounds. Collections under this tax began with the calendar year 1914, and three-fifths of the fund for that year became available before the close of the biennial period ending June 30, 1914. This amount, however, was not drawn from the State Treasury until after the beginning of the new biennium. The balance of the earlier appropriation was drawn, and the following is the account with this portion of the campus improvement fund:

RECEIPTS.

Balance of appropriation of Thirty-fourth general assembly..... \$ 6,771.32

EXPENDITURES.

On wagon bridge across College creek.....	\$ 28.51	
On new concrete roads.....	44,028.52	
Cement for future roads and bridge.....	2,016.00	\$ 6,073.03
Unexpended balance June 30, 1914.....		\$ 698.29
Total.....		\$ 6,771.32

The amount available for the fiscal year 1914-15, and the proposed expenditures are as follows:

(c)<sup>1</sup> FUND AVAILABLE FOR PUBLIC GROUND MAINTENANCE AND IMPROVEMENT,  
1914-15.

Balance from last year.....	\$ 698.29	
Three-fifths of annual tax fund available in last biennial period, but not used.....	6,000.00	
Annual tax fund for 1914-15.....	10,000.00	
Total.....		\$ 16,698.29

## PROPOSED EXPENDITURES.

Maintenance of public grounds.....	\$ 4,700.00	
Road past Professor Coover's residence, Dairy building and farm house and north to railroad track and thence west to Veterinary building, parallel to track and east to farm road, including bridge across south campus creek.....	5,395.00	
Outlet for storm sewer.....	1,985.00	
Road from Quarantine hospital to the Chemistry building.....	4,090.33	
Sidewalk to Ridge avenue.....	12.50	
Grading around Chemistry building.....	600.00	
Grading around Women's dormitory.....	300.00	
Sidewalk from pavement north of Morrill hall to trolley track and grading road.....	823.81	
Drive from Farm house to old Agricultural hall.....	155.17	
Grading around Plant Propagation building.....	300.00	\$ 18,861.81
Less amount of cement purchased last year, and to be used in above improvements.....		1,663.52
Total.....		\$ 16,698.29

## (d) SPECIAL DEPARTMENT EQUIPMENT APPROPRIATION.

The amount appropriated for this purpose by the Thirty-fourth General Assembly was \$75,000. This was divided equally between the fiscal years ending June 30, 1912, and June 30, 1913. Only the latter year is included in the biennial period covered by this report. The unexpended balance from the previous year is, however, taken into account. The showing for the biennium is as follows:

## RECEIPTS.

Unexpended balance on hand July 1, 1912.....	\$ 5,120.46
Apportionment for year ending June 30, 1913.....	37,500.00
Total available fund.....	\$ 42,620.46

## EXPENDITURES.

Agricultural Education.....	\$ 274.38
Agricultural Engineering.....	1,178.00
Animal Husbandry.....	2,369.60
Bacteriology.....	1,359.25
Botany.....	585.00
Chemistry.....	1,102.25
Civil Engineering.....	2,162.39
Dairy.....	1,139.06
Dairy Farm.....	1,676.36
Electrical Engineering.....	1,284.45
Engineering dean.....	153.39
English.....	124.50
Farm.....	301.30
Farm Crops.....	153.44
History.....	91.57
Home Economics.....	738.70
Horticulture.....	606.81
Forestry.....	751.54
Library.....	1,198.99
Mechanical Engineering.....	4,197.68
Military.....	50.00
Mining Engineering.....	1,417.15
Modern Languages.....	24.83
Physics.....	1,358.85
Physical Culture.....	96.70
Physical Training.....	7,350.95
Poultry.....	522.41
President's office.....	100.00
Public Speaking.....	62.38
Soils.....	1,037.25
Transportation.....	305.95
Veterinary.....	7,393.74
Water line to Anamosa camp.....	120.00
Zoology.....	1,331.59
Total.....	\$ 42,620.46

## (e) EQUIPMENT OF BUILDINGS AND DEPARTMENTS.

The law creating the two year millage tax sets aside an annual fund of \$40,000 for the "equipment of buildings and departments." Three-fifths of the first annual amount (\$24,000), was available in the fiscal year ending July 1, 1914. The expenditures for the different departments were as follows:

## EXPENDITURES.

Animal Husbandry .....	\$ 526.19
Botany .....	351.19
Chemistry .....	408.35
Dairy .....	232.05
Electrical Engineering.....	188.53
Farm .....	189.70
Dairy Farm.....	400.00
Home Economics.....	104.57
Physics .....	346.36
Physical Culture.....	520.87
Physical Training.....	17.00
Zoology .....	180.50
Total .....	\$ 3,465.31

This leaves an unexpended balance of 20,534.69. It will be noted that the fund is designed to equip buildings as well as departments. In equipping buildings, it has been used to provide the special equipment necessary to fit buildings for their particular use. In the matter of the Chemistry building, for instance, there has been charged to this fund the expense of laboratory tables, special plumbing and special laboratory ventilation and power.

The following exhibit shows the amount available for the present year and the purposes for which it is proposed to use it.

## EQUIPMENT FUND.

## AVAILABLE 1914-15.

Balance from last year .....	\$ 20,534.69
Annual fund for 1914-15 .....	40,000.00

## PROPOSED EXPENDITURES.

## Chemistry Building Equipment—

## Chemistry proper:

Electric wiring for power.....	\$ 1,850.00
Basement fan for special laboratory ventilating system.....	5,462.76
Attic fans for ventilating system.....	2,675.00
Sheet metal work connected with special ventilating system.....	8,500.00
Hoods for professors' laboratories.....	300.00
Temporary and permanent laboratory tables with plumbing to and in the tables; also shelving.....	10,637.24
Auditorium laboratory tables.....	450.00
	\$ 29,875.00

## Other departments having rooms in Chemistry building—

## Chemistry Section of Agricultural Experiment Station:

Hoods with lockers and drawers, shelving, laboratory tables, fans, sinks, piping and casings.....	\$ 2,140.00
--	-------------

Chemical Section of Engineering Experiment Station, equip- ment and installation.....	750.00
--	--------

Chemical Engineering, installing in new quarters.....	500.00
---	--------

## Photography:

Sinks, shelves, benches, lockers, cases, blands for dark rooms, electrical apparatus and necessary wiring.....	1,000.00
---	----------

## Plant Physiology and Entomology:

Desks and platforms for two rooms.....	450.00	
Entomology equipment .....	50.00	4,890.00
Plant propagation equipment, as per list in secretary's office .....		4,000.00
Steam and Gas Laboratory:		
Engine .....	\$ 4,280.00	
Condensers .....	926.15	
Steam turbine.....	2,500.00	
Steam superheater.....	1,000.00	
Feed water heater.....	200.00	
Gas calorimeter.....	300.00	
Freight, drayage and setting machinery.....	387.48	9,593.63
Transportation Building:		
Furniture for Transportation building.....	\$ 787.14	
3 Alden brakes for Locomotive laboratory.....	2,100.00	
4 bearings for locomotive wheel supports.....	824.00	
2 weighing and 1 feed water tank for Locomotive laboratory.....	400.00	
2 scales for weighing water, and 1 for weighing coal in Locomotive laboratory .....	190.00	
1 charging barrow for handling coal.....	37.35	
10 hydraulic gages for water system in Locomotive laboratory.....	32.50	
Indicators for testing locomotives.....	377.25	
Recording apparatus for determining speed and R. P. M. in Automobile and Locomotive laboratory.....	414.70	
36" fan and motor for Automobile laboratory.....	323.00	
1-5, 1/8" shaft for Automobile Testing plant.....	36.66	
2 roller bearings for Automobile laboratory.....	150.00	
2 floor stands for Automobile laboratory.....	56.00	
2 housings for bearings, Automobile laboratory.....	75.00	
1 Alden dynamometer, Automobile laboratory.....	250.00	
Tools (large) for shop and laboratories.....	115.50	
1 motor for shop.....	49.50	
2 wood pulleys for Automobile laboratory.....	94.50	
Lockers .....	69.00	
Drafting for equipment.....	79.25	
Freight on equipment.....	55.50	
Miscellaneous items .....	251.20	6,768.05
Electrical Engineering:		
Oscillagraph .....		451.55
Junior Dean's Office:		
Filing cases .....		225.00
Agricultural Engineering:		
Freight truck wheels and tires.....		175.00
Total .....	\$ 55,978.23	
Balance unappropriated .....		4,556.46
		\$ 60,534.69

#### SPECIAL APPROPRIATION FOR ENGINEERING ANNEX FURNITURE.

Of the \$5,000 appropriated by the Thirty-fourth General Assembly for this purpose there was remaining at the beginning of the biennial period a small balance of \$186.63 which was expended for electric light fixtures.

#### REPAIR AND CONTINGENT FUND.

Prior to the meeting of the last legislature, the amount of this annual fund was \$36,000. The legislature of that year added \$10,000 to this amount from the two year millage tax; three-fifths of the first annual payment of which became available in the last year of the biennial period. The legislature also made a special repair appropriation of \$8,000 for this year. Summarizing these amounts and the balance on hand at the beginning of the biennial period, and grouping the expenditures under the different buildings and the general expense account, we have the following showing of receipts and expenditures for the two years:

## THIRD BIENNIAL REPORT

## REPAIR AND CONTINGENT FUND EXPENDITURES—Continued.

## RECEIPTS.

Cash balance on hand July 1, 1912.....	\$ 21,127.39
Annual appropriation, 1912-1913.....	36,000.00
Annual appropriation, 1913-14.....	\$ 36,000.00
Three-fifths of annual millage tax appropriation.....	6,000.00
Special appropriation, 1913-1914.....	8,000.00 50,000.00
Total available for the biennial period.....	\$ 107,127.39

## EXPENDITURES.

## Agricultural Engineering Building:

Rewiring.....	\$ 1,087.89
High pressure steam.....	210.40
Roofing and repairing.....	4,994.32
Enclosing repair room.....	56.26
Office repairing, plastering and tinting.....	919.16
Laboratory tables.....	132.00
Extension of smoke pipes.....	128.31
Fitting up three class rooms.....	452.10
Gas piping in basement, and new floor in elevator.....	9.41
General repairs.....	416.75 \$ 8,559.12

## Campus and Grounds:

Veterinary building grading.....	\$ 286.34
One light wagon.....	94.89
Sewer maintenance.....	486.58
Sewage disposal.....	339.62
Two new pumps for water supply.....	3,870.32
Campus maps for building committee.....	48.37
Sewage plant enlargement.....	4,072.74
Water pipe to Anamosa camp.....	219.52
Part purchase price of Holden house.....	1,617.00
General repairs.....	286.87 11,322.25

## Central Building:

Shelving and other repairs in treasurer's office.....	\$ 30.07
Refinishing corridors.....	563.86
Installing library.....	1,386.24
Partitions in room 320 and blackboard in room 309.....	49.34
Sinks, water and gas in Bacteriology department.....	72.11
Corridor seats.....	47.40
Storm doors.....	87.57
General repairs.....	634.03 2,870.62

## Chemistry Building:

Repairing and replacing waste pipes.....	\$ 20.53
Refitting sinks and laboratory tables.....	201.40
Shelving (150 ft.).....	15.20
Kalsomining and varnishing on three floors.....	247.03
5 doz. Eagle keyless locks, and 2 doz. padlocks.....	67.48
Laboratory shingling.....	43.84
General repairs.....	73.49
Emergency building for use of Chemistry department.....	4,040.42
Apparatus for distilled water and installing two electric furnaces.....	346.10
Expenses of Professor Coover and Architect Proudfoot, investigating other chemical buildings.....	164.83
Wrecking old building.....	474.03
Sanitary and storm sewer from new Chemistry building and gas and water connections.....	1,176.96
Emergency repairs on old Chemistry building and on Chemistry emergency building.....	2,217.12 9,088.43

## Dairy Building:

Screen doors.....	\$ 10.65
Cement steps outside of ice cream room; high pressure steam for cheese room; gas connection for testing room; shelving in supply room; table for weighing room; blackboards.....	74.06
Window shades.....	38.98
Filter for Creamery.....	179.87
Alterations for guinea pig room.....	49.71
General repairs.....	290.11 643.33

## Domestic Technology Building.....

83.40

## REPAIR AND CONTINGENT FUND EXPENDITURES—Continued.

## Engineering Buildings:

Two sanitary drinking fountains.....	\$ 115.19	
Moving and storing Mechanical Engineering equipment.....	222.63	
Establishing Civil Engineering surveying monuments.....	200.00	
Moving direct current equipment.....	91.68	
Painting Engineering annex.....	80.84	
Replacing and repairing dark curtains.....	64.46	
Dark curtains for Engineering assembly.....	25.64	
Illumination in lecture room, Physics department.....	41.99	
Extension of water main between Engineering building and annex.....	142.38	
Shafting and pulleys for testing machine, Civil Engineering department.....	111.35	
Sewer for Steam laboratory.....	328.19	
Electric wiring and lamps, Mechanical Engineering laboratory.....	55.00	
Repairing Engineering annex machine shop and slate roof.....	2,453.28	
Table lights, Electrical Engineering department.....	32.41	
Radiators, room 314, Engineering building.....	42.54	
Changing conduits, room 116.....	13.16	
Rebuilding assay furnaces.....	26.68	
Installing apparatus, Mechanical Engineering laboratory.....	1,792.32	
Radiation in Engineering annex.....	380.92	
Connecting pattern shop motor.....	71.97	
Chemistry shelving.....	224.24	
Painting walls and floors, old Engineering hall.....	72.14	
General repairs.....	1,064.80	7,653.81

## Farm Buildings and Equipment:

Substitution of cement and iron stalls in old cattle barn.....	\$ 562.08	
Fencing between bull pasture and calf pasture.....	15.04	
Isolation building for Dairy farm.....	73.94	
Repairing farm buildings.....	157.38	
Repairing and rewiring Experiment barn, cow barn and horse barn.....	56.58	
Repairs in house at Dairy farm.....	65.43	
Painting buildings, Dairy farm.....	320.81	
Repairs on barn, Dairy farm.....	56.41	
Ten fire extinguishers, Dairy farm.....	58.03	
Painting poultry buildings and farm house.....	101.89	
Silo for farm department.....	354.78	
Poultry colony houses.....	90.72	
Bull shed.....	334.01	
Shingling sheep barns.....	233.21	
New driveway in hay barn; new plank entrance way.....	163.58	
Tile drain at Dairy farm.....	110.38	
New floor in pavilion No. 2.....	162.84	
Ten poultry colony houses.....	303.18	
Repairing and painting machinery shed.....	41.70	
Repairing cattle barn.....	103.03	
Repairing central hog house.....	324.63	
Moveable hog houses.....	286.29	
Installing electric motor.....	146.11	
Repairs, herdsman's cottage.....	83.11	
Experimental feeding shed repairs.....	50.31	
Sanitary improvements, farm buildings.....	449.32	
General repairs.....	802.26	5,457.10

## Farm Improvements

Drainage, grading, fruit trees and shrubbery at Poultry farm.....	\$ 372.86	
Water supply for forage crops and hog lots.....	99.28	
Cinder paths, Poultry farm.....	32.00	
Repairing farm fences and gates.....	489.48	
General repairs.....	11.46	1,005.08

## Fires, Lights and Incidentals:

General repairs.....		7,594.39
----------------------	--	----------

## Gymnasium:

Lighting fixtures.....	\$ 1,323.85	
Filter system.....	1,009.88	
General repairs.....	164.81	2,528.54

## General Buildings:

Painting.....	\$ 710.76	
Sewer from Central heating plant and Experiment barns to septic tanks.....	731.86	
Night watchman's clock.....	61.05	
Drain from Power Plant to Squaw creek.....	752.75	

## REPAIR AND CONTINGENT FUND EXPENDITURES—Continued.

Repairing and rewiring Farm superintendent's residence.....	29.42	
Roof and gutters on Experiment station cottage.....	99.10	
Steam line to Farm superintendent's house.....	100.75	
General repairs.....	650.24	
Remodeling old Veterinary barn for use as superintendent's workshop and storeroom.....	986.22	3,177.78
Office expenses in connection with accounting of Repair and Contingent fund .....		66.67
Salaries:		
Half salary superintendent Grounds and Buildings (for two years) .....	\$ 2,583.33	
Part salary college treasurer two years.....	200.00	
Part salary first carpenter, 2 years.....	1,391.50	
Part salary second carpenter, two years.....	1,020.50	
Part salary third carpenter, 2 years.....	1,034.25	
Salary of teamster, 2 years.....	1,150.00	
Salary of painter, two years.....	1,910.00	
Part salary, finance committee clerk, two years.....	1,205.59	10,495.15
Total expended .....	\$ 96,793.50	
Balance on hand.....		10,333.89
		\$ 107,127.39

REPAIR AND CONTINGENT FUND BUDGET.  
1914-15.

## AVAILABLE FUNDS.

Cash balance from last year.....	\$ 10,333.89
Annual appropriation, permanent .....	36,000.00
Allotment from two year millage tax.....	10,000.00
Total .....	\$ 56,333.89

## PROPOSED EXPENDITURES.

(1) Fixed Charges:		
Thomas Sloss, superintendent, part salary.....	\$ 1,350.00	
Herman Knapp, treasurer, part salary.....	100.00	
Fred Stocker, head carpenter, salary .....	738.00	
B. F. Seymour, second carpenter, salary.....	546.00	
F. A. Fox, third carpenter, salary.....	561.00	
Tom Fultz, teamster.....	600.00	
J. P. Reid, painter.....	1,020.00	
Harriette Carmichael, clerk .....	600.00	
Office expenses connected with accounting of building and repair funds .....	100.00	
Sewer maintenance .....	150.00	
Sewage disposal .....	500.00	
Superintendent's emergency fund .....	1,500.00	
Fires, lights and incidentals.....	5,500.00	\$ 13,325.00
(2) Reappropriated to complete repairs and improvements under-way:		
Fitting up basement of Old Agricultural Hall.....	\$ 1,200.00	
Gas connections in basement of Old Agricultural Hall.....	10.46	
Fireproof hoods in Ceramics laboratory.....	200.00	
Lantern screens, Physics department.....	30.00	
Installing apparatus, Mechanical Engineering laboratory.....	248.68	
Repairing central hog house.....	76.32	
Sanitary improvements on farm buildings.....	550.68	
Water supply to lower hog lots.....	7.00	
Fires, lights and incidentals department, repairs and improvements .....	4,521.57	
Repairing campanile and clock.....	31.00	
Soils lockers, Agricultural Hall.....	52.78	
Women's rest rom, Agricultural Hall.....	155.68	
Electric lights in superintendent's residence.....	1.99	
Steam line to residence occupied by Vice-President Stanton.....	224.57	7,310.73
(3) New appropriations:		

## SCIENCE DIVISION.

English Department:	
13 screens for offices.....	\$ 20.00
29 screens for class rooms.....	45.00
Shelving for essay file room.....	25.00

## THIRD BIENNIAL REPORT

## REPAIR AND CONTINGENT FUND BUDGET—Continued.

Partition in room 17.....	50.00	\$	140.00
History Department:			
Shelving .....			20.00
Library:			
Electric lift .....	\$	100.00	
Buzzer from delivery desk to ground floor.....		2.00	
Buzzer from librarian's office to delivery desk.....		3.00	
20 new shelves for stacks in English room.....		12.00	
Spring for main door to library.....		6.00	123.00
Zoology:			
12 place physiological desks.....	\$	240.00	
1 sink .....		12.00	
Plumbing in new physiological desks.....		60.00	312.00
Totals for Science division.....			\$ 595.00

## DIVISION OF AGRICULTURE.

Agricultural Journalism:			
8 screens for rooms 15, 16, 17 and 18.....	\$	12.00	
Animal Husbandry Department:			
Remodeling old pavilion and providing locker boxes .....	\$	75.00	
Blackboard .....		15.00	90.00
Dairy Farm:			
Painting dairy room .....	\$	10.00	
Repairing floors in horse stalls.....		75.00	
New grates for boiler.....		15.00	
Panels in shed adjoining the Dairy barn and also one to divide the quarantine building.....		20.00	
New wagon scales (if Supt. Sloss and Prof. Meeker find present scales useless).....		140.00	
Extension of tile drain from Dairy buildings.....		50.00	
4 individual hog houses .....		120.00	
Repairing present fences .....		150.00	
Repainting fence posts about the barn lot and along the roadway out to the farm.....		50.00	
2 gates .....		20.00	
Improved ventilation .....		25.00	675.00
Poultry Farm:			
Completion of poultry tight fence around the farm .....	\$	150.00	
Cherry trees and planting to complete orchard.....		150.00	300.00
Animal Husbandry Section:			
Concrete floors in the present long cattle feeding shed .....	\$	300.00	
Repairing cistern .....		25.00	
Piggery .....		600.00	925.00
Dairy:			
50 steel lockers.....			200.00
Farm:			
Shelter for cattle and horses.....	\$	500.00	
Cement water trough for cattle barn.....		30.00	530.00
Farm Crops:			
Oiling floors in Farm Crops offices.....	\$	8.00	
Movable blackboard for pavilion.....		9.00	
Refinishing blackboards in room 307.....		1.00	18.00
Horticulture:			
Repainting side walls of greenhouse .....	\$	50.00	
Repair of bench bottoms and supports in greenhouses .....		40.00	
Repainting old greenhouses.....		100.00	
Repair of down spouts.....		40.00	
Repair of greenhouse ventilators.....		25.00	
Catch basin for tile drain north of Horticultural barn .....		15.00	
Water plant for orchard north of C. & N. W. railway .....		125.00	
Storage room in basement of barn.....		150.00	

## REPAIR AND CONTINGENT FUND BUDGET—Continued.

Ventilator flue for storage room.....	40.00	585.00
Photographic Department:		
25 steel lockers at \$2.25 each.....		56.25
Soils Department:		
Repair on hood in room 4.....	\$ 5.00	
2 shelves in room 6.....	5.00	
Plate glass for table tops.....	41.00	
Repairs on hoods in rooms 8, 11 and research laboratory.....	25.00	76.00
Total for division of Agriculture.....		\$ 3,467.25
Agricultural Engineering:		
Retinting walls in Annex.....	\$ 50.00	
Repair blackboards in rooms 205, 208.....	10.00	
Wiring for lantern in room 205.....	25.00	
Black shades in room 205.....	25.00	
Lavatory in room 203.....	43.00	
Steam connections for the tunnel to new laboratory in basement of Old Agricultural Hall to run engines; also moving equipment and installing same.....	200.00	
Ventilator fan for repair shop.....	20.00	
100 lockers for freshmen and sophomore classes (to be made by students).....	200.00	
Scales, etc. ....	50.00	\$ 623.00
Total for Agricultural Engineering.....		\$ 623.00

## DIVISION OF ENGINEERING.

Civil Engineering:		
Reservoir for pump section and storage.....	\$ 475.00	
Installation of equipment on hand.....	400.00	
Piping in hydraulic laboratory for friction tests.....	200.00	
Drinking fountain.....	35.00	
New locks for building.....	50.00	1,160.00
Electrical Engineering:		
Ventilating registers and fan in room 205.....	\$ 100.00	
Partition in room 210, Engineering Hall.....	75.00	175.00
Mechanical Engineering:		
Installing coal and ash handling machinery for gas and steam laboratory.....		2,000.00
Mining Engineering:		
Installing apparatus.....		50.00
Physies:		
2 oak cases for apparatus in Junior laboratory.....	\$ 110.00	
Oak case for apparatus for room 209.....	30.00	
Extending compressed air connections to rooms 110 and 116.....	50.00	
Installing 680 square feet of blackboard in rooms 210, 214 and 216.....	70.00	260.00
Transportation Building:		
Building shelving and cases.....	\$ 200.00	
Coat hooks.....	10.00	210.00
Total for division of Engineering.....		\$ 3,855.00

## DIVISION OF HOME ECONOMICS.

Domestic Science:		
Painting floors.....	\$ 50.00	
Re-enameling desks in cooking laboratory.....	40.00	
Enameling bases of tables in cooking laboratory.....	35.00	\$ 125.00
Total for division of Home Economics.....		\$ 125.00

## DIVISION OF VETERINARY MEDICINE.

Dean's Office:		
Picture rail in library and museum.....	\$ 10.00	
Lettering doors.....	50.00	\$ 60.00

## THIRD BIENNIAL REPORT

## REPAIR AND CONTINGENT FUND BUDGET—Continued.

Anatomy:			
Partition in dissecting room.....	\$	75.00	
24 hooks for dissecting instruments.....		20.00	95.00
Pathology and Bacteriology:			
2 doors .....	\$	25.00	
1 double door with felt between halves for incubator room .....		50.00	
Whitewash three rooms .....		15.00	
Repair still .....		6.25	
Heater and thermostat for incubator room.....		30.00	126.25
Physiology and Pharmacology:			
Screens for office and private laboratory.....	\$	12.00	
Cement pedestal .....		10.00	
Wall table in Pharmacy laboratory.....		8.00	30.00
Practice and Diagnosis:			
Radiator installed in room 109.....	\$	15.00	
Drawers in dispensary repaired and labeled.....		10.00	25.00
Surgery and Obstetrics:			
Stall for foot bath.....	\$	10.00	
Change in feed bin and hay pulley.....		25.00	
Cabinet for operative surgery repaired.....		10.00	
Ceiling in corridor .....		260.00	
Ventilators on roof of corridor controlled by air system .....		196.00	501.00
Painting for all departments.....			
Of which \$50 is to be charged to the Serum fund .....	\$	500.00	
		-50.00	450.00
Total for division of Veterinary Medicine.....			\$ 1,287.25

## TWO-YEAR AGRICULTURE.

Agronomy:			
Partition wall .....	\$	15.00	
Horticulture, Botany and Bacteriology:			
45 feet of treated tables attached to walls.....		150.00	
Total for Two-Year Agriculture.....			\$ 165.00

General:			
Cistern for Home Economics.....	\$	400.00	
Furnishings and fixtures for Women's Dormitory, in addition to \$4,000 appropriated for equipment .....		500.00	
Partitions and alterations in Chemistry Emergency building, which is to be occupied by Zoology and Plant Physiology .....		300.00	
Remodeling locker room in Margaret Hall for use as rooms for girls.....		400.00	
Store room in Central building.....		300.00	
Drinking fountains: 1 for Home Economics building; 1 for old Agricultural Hall; 1 for Veterinary building .....		125.00	
Tile building for housing locomotive.....		400.00	
Fencing, including all fences requested for Farm, Animal Husbandry department and section, except Dairy and Poultry farms.....		600.00	
Professor Beach's Residence:			
Decoration of walls.....	\$	50.00	
Refinishing floors and woodwork.....		15.00	65.00
Dean Curtiss's Residence:			
Hardwood floors .....	\$	100.00	
Completion of painting and papering.....		20.00	
Plastering ceilings of 3 rooms in basement.....		50.00	170.00
Professor Summers's Residence:			
Repairing sunken wall of kitchen.....	\$	50.00	
Hardwood floors .....		150.00	200.00
Chemistry Building:			
Shades .....	\$	700.00	

## \* REPAIR AND CONTINGENT FUND EXPENDITURES—Continued.

Library and other shelving.....	500.00	
Blackboards .....	550.00	
Transfer of temporary and permanent equipment .....	1,500.00	3,250.00
Heating tunnel to new Women's Dormitory.....		6,000.00
Swimming tank at Margaret Hall, to be constructed January 1st, if balance permits.....		3,000.00
Light and power for Dairy and Poultry farms, to be installed December 1st, if balance permits.....		1,000.00
Repairs and improvements on the Dairy building for the coming year.....		602.00
Reinforced concrete cattle pass over Ft. Dodge, Des Moines and Southern Railway Co. tracks.....		583.00
General repairs on buildings.....		602.40
Painting outside of sixteen buildings, and such other painting as is necessary.....		1,500.00
Repairing old gymnasium in Margaret Hall, fitting it up for use of girls.....		400.00
Grading lane near barns leading to pasture.....		150.00
Shed for freight trucks and superintendent's auto- mobile .....		1,000.00
Blackboards for Chemistry building.....		50.00
Expenses of moving Engineering Extension depart- ment from Morrill Hall to Chemistry building.....		10.00
Starter for automobile, used by Superintendent of grounds .....		25.00
Additional appropriation for coal conveying machin- ery for Mechanical Engineering department.....		500.00
Doorway in Electrical Engineering department.....		50.00
Repairs in Soil laboratories.....		185.00
Steam heat in office of Farm Superintendent at horse barn .....		85.00
Bill of Proudfoot, Bird and Rawson for plans and specifications for improvements made on the residence occupied by Vice-President.....		22.50
Total for general.....		\$ 22,474.90
Grand total .....		\$ 53,228.13

## SUMMARY.

Amount available for 1914-15.....	\$ 56,333.89
Total of appropriations .....	53,228.13
Balance unappropriated .....	\$ 3,105.76

The two items of Swimming Pool for Women, \$3,000, and Electric Light and Power for Dairy and Poultry Farms, \$1,000, in the foregoing list, are provisional appropriations dependent upon funds being available. It looks as if they would have to be cancelled in order to have a sufficient emergency fund for the balance of the year.

## ROOM RENT.

The income derived from rental of rooms in College dormitories and other buildings, sale of wreckage, and other small items of revenue from College buildings, is credited to this account. This income is used to meet expenses connected with the buildings furnishing such revenue.

The following shows the receipts and expenditures during the bien-nium:

## RECEIPTS.

Unexpended balance July 1, 1912.....			\$ 3,268.05
For 1912-13:			
Rental of rooms .....	\$ 2,865.91		
Sale of wreckage .....	153.27		
Rental of donated land .....	1.00		
Net receipts—storeroom .....	814.64	\$ 3,834.82	
For 1913-14:			
Rental of rooms .....	\$ 4,497.14		
Sale of wreckage .....	43.36		
Rental of donated land .....	1.00		
Sale of old furniture, etc. ....	83.22	4,624.72	
Total receipts .....			8,459.54
Total funds available .....			\$ 11,727.59

## EXPENDITURES.

For 1912-13:			
Salaries .....	\$ 1,200.00		
Furniture and repairs .....	464.95		
Wreckage .....	.43		
Superintendent's office expense .....	24.28	\$ 1,689.66	
For 1913-14:			
Salaries .....	\$ 1,351.75		
Office building repairs .....	77.87		
Margaret Hall repairs and supplies .....	432.75		
Margaret Hall, painting .....	585.90		
Superintendent's office expense .....	11.25		
Net expenditures, store room account .....	108.22		
Margaret Hall Annex:			
Part purchase of Holden house .....	\$ 4,000.00		
Remodeling .....	889.24		
Furniture .....	1,109.58		
Matron's board .....	101.23		
General expense .....	109.26	5,709.31	8,277.05
Total expenditures .....			9,966.71
Unexpended balance June 30, 1914 .....			\$ 1,760.88
Total .....			\$ 11,727.59

This balance is divisible as follows:

Room rent account proper .....	\$ 1,055.56
Store room account .....	705.32
	\$ 1,760.88

It will appear hereafter under these two separate headings.

The following shows the estimated income and expenditures on account of this fund for the coming year:

## ROOM RENT.

1914-15.

## ESTIMATED INCOME.

Balance brought over from last year .....	\$ 1,055.56
Rental of rooms .....	7,500.00
	\$ 8,555.56

## ESTIMATED EXPENDITURES.

Salaries:			
Part salary of first carpenter.....	\$	342.00	
Part salary of second carpenter.....		414.00	
Part salary of third carpenter.....		279.00	
Part salary of Mrs. Phillips, clerk.....		300.00	\$ 1,335.00
Board of matron at Margaret Hall Annex (estimated).....			140.00
Beardshear House:			
Furniture.....	\$	1,000.00	
Repairs.....		500.00	
Board of matron (estimated).....		140.00	
Rental at \$40 per month for 11 months.....		440.00	2,080.00
Repairs on old North Hall, addition to Margaret Hall.....			300.00
Repairs on buildings rented, and repairs and purchase of furniture for same.....			4,700.56
			<u>\$ 8,555.56</u>

The following is a summary of the entire expenditures on account of buildings and improvements. For easy reference and comparison, these are given for each year:

## SUMMARY.

## BUILDING AND EQUIPMENT FUND EXPENDITURES.

The expenditures for buildings, repairs and equipment during the biennial period may be summarized as follows:

	1912-13	1913-14
Repairs and contingencies.....	\$ 45,196.63	\$ 51,596.87
Special building tax:		
Hall of Agriculture.....	17.26	
Engineering Hall Annex.....	533.86	108.62
Domestic Technology building.....	317.40	441.36
Dairy building.....		606.48
Veterinary building.....	8,590.73	972.99
Judging pavilion.....	353.84	102.02
Gymnasium.....	78,620.54	2,000.83
Chemistry building.....		116,073.88
Mechanical Engineering laboratory.....	12,978.05	34,748.77
Transportation building.....	14.86	49,801.69
Girl's dormitory.....		1,531.18
Horticultural laboratory.....		107.19
Central heating plant.....	38,217.35	16,994.28
Chemistry building.....	10,272.24	56,208.90
Public grounds improvement.....	1,863.17	4,179.86
Engineering Hall Annex furniture.....	186.63	
Additional department equipment.....	30,350.50	12,269.90
Equipment of departments and buildings.....		3,465.31
Room rent.....	1,679.66	8,277.05
Totals.....	\$229,239.68	\$ 359,486.68
Grand total for the two years.....		\$ 588,726.36

## VI. HOG CHOLERA SERUM PLANT.

The law of the last legislature, establishing at the College a Hog Cholera Serum laboratory, appropriated \$35,000 for carrying out the provisions of the act.

The account with the fund shows the following:

## RECEIPTS.

Appropriation of Thirty-fifth General Assembly.....	\$ 35,000.00
---	--------------

## EXPENDITURES.

Construction of building.....	\$ 16,633.28
Temporary hog sheds.....	1,781.05
Refrigerator room.....	193.31
Virus plant.....	182.74
Lumber.....	264.39

Furniture and equipment .....	4,648.53		
Horse .....	184.94	\$ 23,893.24	
Salaries .....	\$ 6,463.60		
General labor .....	8,655.49		
Office help .....	2,608.81		
Traveling expense .....	376.02	18,103.92	
Serum purchased .....	\$ 15,063.69		
Serum returned .....	1,220.96		
Hogs purchased .....	80,313.01		
Veterinary services .....	30.00		
Feed stuffs .....	9,057.77		
Miscellaneous supplies .....	7,450.66		
Coal .....	144.81		
Ice .....	390.17		
Laundry .....	226.98		
Electricity and gas .....	103.13		
Water .....	118.87		
Office supplies .....	681.34		
Photos .....	21.49		
Postage .....	549.50		
Freight, express and drayage .....	307.84		
Telephones and telegrams .....	174.62		
Printing .....	333.21		
Repairs .....	86.72	116,269.77	
Total expenditures .....			\$ 158,266.93
Less sales .....			
For 1912-13 .....		\$ 2,779.66	
For 1913-14 .....		142,267.01	145,046.67
Net expenditures .....			\$ 13,220.26
Balance on hand June 30, 1914 .....			21,779.74
Total .....			\$ 35,000.00

It is proposed to use the balance of the Serum Fund appropriation to erect two small buildings, to cost about \$12,000.00, one for a rendering plant, and the other a slaughter house. The remainder of the fund is to be used in the manufacture of a stock of serum which shall constitute a reserve, to be drawn upon in case of emergency.

A statement of the total expenditures for all purposes for the biennial period will be found at the beginning of that part of this report which discusses the expenditures for the different lines of work.

## FUNDS AVAILABLE FOR 1914-15.

The amounts available for the coming year in the various funds have already been considered with the single exception of the Collegiate Support Fund. The balance to the credit of this fund at the close of the last fiscal year was \$71,354.87. Of this sum, \$25,000 is reserved as a working balance, leaving \$46,354.87, available. From this amount, the following sums have been appropriated for equipment and furniture:

	Equipment	Furniture	Total for Department	Total for Division
Science Division:				
Dean's office		\$ 33.25	\$ 33.25	
Bacteriology	\$ 260.00		260.00	
Botany	800.00	535.00	1,335.00	
Chemistry	3,000.00	1,000.00	4,000.00	
Economic Science		35.00	35.00	
English		201.00	201.00	
History and Psychology	100.00	33.25	133.25	
Library—general	1,000.00			
Books for special departments	512.50			
Books for Agricultural Education	100.00	90.00	1,702.50	
Mathematics		70.00	70.00	
Military	35.00		35.00	
Music	12.50	68.00	80.50	
Physical Training	248.00		248.00	
Zoology	800.00	804.00	1,604.00	
Totals for Science	\$ 2,773.00	\$ 1,032.00		\$ 3,805.00
Division of Agriculture:				
Agricultural Education	\$ 50.00	\$ 176.90	\$ 226.90	
Agricultural Journalism	25.00	158.00	183.00	
Animal Husbandry	4,400.00	183.00	4,583.00	
Dairy	1,181.02	50.00	1,231.02	
Farm Crops	148.00	403.39	551.39	
Forestry	292.00	130.00	422.00	
Horticulture	490.00	80.00	570.00	
Photography	400.00	68.00	468.00	
Soils	733.20	41.00	774.20	
Totals for Division of Agriculture	\$ 7,719.22	\$ 1,290.29		\$ 9,009.51
Department of Agricultural Engineering	\$ 501.00	\$ 209.00		\$ 710.00
Division of Engineering:				
Civil Engineering	\$ 1,797.00		\$ 1,797.00	
Electrical Engineering	1,332.00	\$ 70.00	1,402.00	
Mechanical Engineering	200.00		200.00	
Mining Engineering	450.00	25.00	475.00	
Physics	1,480.00	266.00	1,746.60	
Structure Design	375.00	150.00	525.00	
Transportation building	1,185.00		1,185.00	
Totals	\$ 6,819.00	\$ 511.00		\$ 7,330.50
Home Economics Division:				
Domestic Science	\$ 930.00	\$ 260.00	\$ 1,190.00	
Domestic Art	1,159.00	237.00	1,396.00	
Dean's office		65.00	65.00	
Physical Culture		65.75		
Totals	\$ 2,089.00	\$ 627.75		\$ 2,716.75

## FUNDS AVAILABLE FOR 1914-15—Continued

	Equipment	Furniture	Total for Department	Total for Division
Veterinary Division:				
Anatomy .....	\$ 265.50	\$ 125.00	\$ 390.50	
Pathology and Bacteriology .....	180.00	43.00	223.00	
Physiology and Pharmacology .....	150.00	25.00	175.00	
Practice and Diagnosis .....	100.00	65.00	165.00

Chemistry building, chairs .....	2,552.00			
Totals for General .....	\$ 8,715.80	\$ 225.00		\$ 8,940.80

Total appropriated .....	\$ 33,626.06
Total available for appropriation .....	12,728.81
	\$ 46,354.87

The balance given above is available for the purchase of permanent equipment, but cannot be used for the regular annual budget without causing the regular annual expenditures to exceed the regular annual income. The amount available for the collegiate educational budget for 1914-15 is as follows:

From National sources .....	\$ 85,000.00
From State:	
Permanent annual appropriations .....	249,900.00
From two year millage tax (including \$15,000 apportioned to the four year Home Economics course from the \$20,000.00 set aside for the four year and two year Home Economics courses) .....	140,000.00
From Miscellaneous sources:	
Tuition collected from students coming from outside the state .....	10,000.00
Interest on bank balances .....	2,000.00
	\$ 486,900.00

The budget is as follows:

## EDUCATIONAL SUPPORT FUND BUDGET 1914-15.

I. Salaries:	
Professors, assistant professors and administrative officers .....	\$234,033.83
Instructors and assistants .....	110,937.79
	\$ 344,971.62
II. Department expenses and ordinary additions to equipment:	
Agricultural Education .....	\$ 1,200.00
Agricultural Journalism .....	850.00
Animal Husbandry .....	2,000.00
Agricultural Engineering .....	2,446.56
Bacteriology .....	1,300.00
Botany .....	950.00
Chemistry .....	1,625.00
Civil Engineering .....	1,450.00

Dairy .....	1,800.00	
Dairy Farm .....	1,800.00	
Economics .....	750.00	
Electrical Engineering .....	1,200.00	
English .....	700.00	
Farm .....	2,700.00

Zoology .....	650.00	
Summer School fees reappropriated .....	1,039.59	51,708.06
<hr/>		
III. Maintenance of Buildings:		
Heating and lighting and incidentals .....	\$ 27,600.00	
Janitor fund .....	17,400.00	45,000.00
<hr/>		
IV. Administrative and General:		
Agricultural Dean (including \$200 State Fair) .....	\$ 1,400.00	
Engineering Dean (including \$200 State Fair) .....	1,600.00	
Science Dean .....	300.00	
Assignment Committee .....	615.00	
Carrying Campus mail .....	300.00	
Catalogues and Bulletins .....	3,250.00	
Commencement week expense .....	450.00	
Inventory Clerk .....	770.00	
Junior College Dean .....	2,360.00	
Matron's Office .....	1,180.00	
Non-resident Lecture fund .....	600.00	
President's Contingent fund .....	900.00	
President's Office .....	2,800.00	
Publicity .....	2,604.67	
Purchasing department .....	3,340.00	
Ringling chimes, care of clock and tower .....	190.00	
Registrar's Office .....	2,565.00	
Sabbath Service .....	700.00	
Secretary's Office .....	2,425.00	
State Teachers' Assn., headquarters .....	50.00	
Telephone service .....	200.00	
Y. M. C. A. Information Bureau .....	400.00	
Printing Section .....	300.00	
Treasurer's Office .....	4,260.00	33,559.67
<hr/>		
V. Summer Session .....		10,000.00
		<hr/>
		\$ 485,239.35

## SUMMARY.

I. Salaries .....	\$ 344,971.62
II. Department expenses and ordinary additions to equipment .....	51,708.06
III. Maintenance of buildings .....	45,000.00
IV. Administrative and general .....	33,559.67
V. Summer School .....	10,000.00
<hr/>	
Total .....	\$ 485,239.35

The total of the budget is \$485,239.35, while the funds to meet it aggregate \$485,900.00.

The salary list constitutes the largest item in the budget. It is as follows:

SALARIES OF PROFESSORS, ASSISTANT PROFESSORS AND  
ADMINISTRATIVE OFFICERS.

	Support fund	Agricultural experiment station	Other college funds	Totals
Administrative—				
Raymond A. Pearson, president.....	\$ 7,500.00			\$ 7,500.00
E. W. Stanton, vice-president, secretary, dean of junior college and professor of mathematics.....	4,000.00			4,000.00
C. F. Curtiss, dean of agriculture and director of experiment station.....	2,500.00	\$ 2,000.00		4,500.00
Anson Marston, dean of engineering, civil engineering.....	4,000.00		(c) \$200.00 (d) 300.00	4,500.00

Ned A. Merriam, physical training (also receives \$750 from athletic council)	750.00			750.00
E. M. Mervine, agricultural engineering	1,800.00			1,800.00
F. D. Paine, electrical engineering	1,400.00			1,400.00
H. J. Plagge, physics	1,300.00			1,300.00
F. A. Robbins, electrical engineering	1,500.00			1,500.00
A. W. Rudnick, dairying	1,900.00			1,900.00
Ruth B. Safford, English	1,000.00			1,000.00
Grace Schermerhorn, agricultural education	1,500.00			1,500.00
H. E. Scullen, zoology	1,300.00			1,300.00
H. G. Stiles, physics	1,500.00			1,500.00
G. E. Thompson, physics	1,500.00			1,500.00
Winifred R. Tilden, physical culture	1,300.00			1,300.00
Dora G. Tompkins, English	1,250.00			1,250.00
T. F. Vance, history	1,500.00			1,500.00
R. S. Wallis, civil engineering	1,400.00			1,400.00
C. B. Williams, economic science (also receives \$900 from agricultural extension)	900.00		(b) 900.00	1,800.00
Harriett Sessions, reference librarian	1,000.00			1,000.00
C. G. Lang, physical training	1,800.00			1,800.00
Mrs. Emily Cunningham, adviser to women	1,000.00			1,000.00
C. H. Schemann, assistant to the president	2,100.00			2,100.00
Thomas Sloss, superintendent of grounds and buildings	1,350.00		(e) 1,350.00	2,700.00
C. G. Tilden, college physician			(f) 2,200.00	2,200.00
C. S. Nichols, assistant to dean of engineering	900.00		(d) 600.00 (c) 500.00	2,000.00
J. Buchanan, superintendent of co-operative experiments		2,350.00		2,350.00
L. C. Burnett, assistant chief in cereal breeding (also receives \$1,250 from U. S. Government)		1,250.00		1,250.00
A. W. Dox, chief in chemistry		2,500.00		2,500.00
A. T. Erwin, assistant chief in truck crops		2,500.00		2,500.00
J. M. Evvard, assistant chief in animal husbandry		2,600.00		2,600.00
L. Greene, assistant chief in pomology		2,500.00		2,500.00
O. G. Loyd, assistant chief in farm management		1,900.00		1,900.00
C. M. King, assistant chief in botany		1,300.00		1,300.00
R. L. Webster, assistant chief in entomology		1,900.00		1,900.00
Totals	\$235,700.00	\$ 42,700.00	\$ 17,350.00	\$ 295,750.00

(b) Agricultural Extension.  
 (a) John Clay Endowment.  
 (c) Good Roads.  
 (d) Engineering Experiment Station.  
 (e) Repair and Improvement.

(f) Hospital.  
 (g) Serum Fund.  
 (h) Veterinary Investigation.  
 (i) Engineering Extension.  
 (j) Trade School.

Houses on the college grounds are occupied by President Pearson; Deans Stanton, Curtiss and Marston; Professors Beach, Mortensen, Meeker, Summers, Noble and Superintendent Sloss.

In the cases of President Pearson and Superintendent Sloss the houses are heated and lighted.

The foregoing salaries are for the College year running from Sept. 1, 1914. In order to obtain the amount which will be expended for salaries during the fiscal year, beginning July 1, 1914, the additions and deductions given below must be made. The salary total for the year will then stand as follows:

Salaries as given above in the Support fund column	\$ 235,700.00
Add salaries for the last college year of those who have resigned or have been transferred to other work	3,116.33
	\$ 238,816.33
Deduct saving in salaries due to the fact that new salaries and increases in salaries do not go into effect until September 1st, or two months after the beginning of the fiscal year	4,782.50
Total of salary roll of professors and administrative officers for fiscal year 1914-15	\$ 234,033.83

The following is the list of instructors and assistants for the coming year with the salary of each and the fund to which it is chargeable:

#### SALARIES OF INSTRUCTORS AND ASSISTANTS.

	Support fund	Agricultural experiment station	Other college funds	Totals
Mabel Adams, Domestic Science	\$ 1,200.00			\$ 1,200.00
H. G. Anderson, Physics	1,000.00			1,000.00
D. E. Bailey, Chemistry	800.00			800.00
H. J. Burtis, Public Speaking	1,100.00			1,100.00
E. G. Bassett, Modern Languages	1,200.00			1,200.00
C. A. Baughman, Civil Engineering	800.00			800.00
Alma B. Booth, Domestic Art	1,000.00			1,000.00
J. W. Bowen, Chemistry	900.00			900.00
L. J. Bredvold, English	1,000.00			1,000.00
J. H. Buchanan, Chemistry	1,300.00			1,300.00
Helen A. Burling, Bacteriology	600.00			600.00
J. W. Cameron, Mechanical Engineering	1,050.00			1,050.00
Grace Campbell, Mathematics	500.00			500.00
R. R. Clem, Agricultural Engineering	1,100.00			1,100.00
A. F. Carlson, Dairy	1,200.00			1,200.00
E. C. Coad, Agricultural Education	1,000.00			1,000.00
Marian Daniels, Mathematics	1,200.00			1,200.00
J. R. Derby, English	1,100.00			1,100.00
L. DeVries, Modern Languages	1,200.00			1,200.00
H. S. Doty, Botany	800.00			800.00
J. F. H. Douglas, Physics	1,200.00			1,200.00
F. A. Dragoun	1,000.00			1,000.00
Anna M. Earhart, English	950.00			950.00
E. E. Eastman, Soils	600.00			600.00
F. Eberson, Bacteriology	500.00			500.00
Ruth Edgerton, Physical Culture	1,000.00			1,000.00
G. V. Emery, Physics and Mathematics	1,000.00			1,000.00
Mrs. Mary P. Fairfield, Modern Languages	1,200.00			1,200.00
Genevieve Fisher, Domestic Science	1,400.00			1,400.00
Elsie Franck, Domestic Art	1,000.00			1,000.00
J. H. Fraser, Zoology	600.00			600.00
L. S. Gillette, Dairy Husbandry	1,500.00			1,500.00
Helen R. Goodrich, Domestic Art	1,000.00			1,000.00
A. J. Hauser, Dairy	1,500.00			1,500.00
M. H. Havenhill, Agricultural Engineering	1,100.00			1,100.00

## SALARIES OF INSTRUCTORS AND ASSISTANTS--Continued

	Support fund	Agricultural experiment station	Other college funds	Totals
Frank Harrington, Horticulture	1,300.00			1,300.00
Ada Hayden, Botany	900.00			900.00
H. C. Hetzel, Pomology	1,300.00			1,300.00
F. F. Householder, Physics	1,000.00			1,000.00
H. C. Hubbard, Physical Training (Also receives \$1,300 from Athletic Council funds)	300.00			300.00
Margaret Irving, Public Speaking	800.00			800.00
Geo. Judisch, Physiology and Pharmacology	400.00			400.00
Rosemond Kedzie, Domestic Science	1,000.00			1,000.00
J. B. Kelley, Agricultural Engineering	1,300.00			1,300.00
J. A. Krall, Farm Crops	1,200.00			1,200.00

## PER CAPITA COST OF THE EDUCATIONAL WORK AT THE COLLEGE.

The foregoing budget of the collegiate educational departments, and the budgets for the two year non-collegiate courses give a clear idea of the cost of maintaining the educational work at Ames. In determining this cost, it will be noticed that certain items of the total disbursements of the institution for the year are not taken into account. These are omitted for the reason that they do not legitimately constitute a part of the annual expense of maintaining the educational departments. The following are the items stricken out:

1. *Extension work.* This work is important. It is educational; it should not, however, be charged to the student body at Ames. If its cost is included in the dividend in this problem, the thousands attending short courses throughout the state should be counted in the divisor. Both are omitted.

2. *All lines of experimentation.* This work too, is of immense value. It is of state wide concern, and should be supported by legislative appropriation. It should, however, be charged to the state as a whole, and not appear as an item in the per capita cost of instructional work.

3. *Cost of buildings, permanent improvements and permanent equipment.* These have been excluded because it would be obviously unfair to charge the half million dollars of improvements made at Ames during the past two years to the students of that period. The cost of repairs and maintenance is counted in but not the cost of the original buildings and equipment.

The items included in the cost of educational work at Ames are the following:

1. Salaries of professors, instructors and administrative officers.....	\$ 344,971.62
2. Administrative and general expenses over and above salaries of administrative officers .....	33,559.67
3. Current expenses of educational departments, including the cost of departmental investigations, repair of apparatus and the purchase of equipment to replace that worn out.....	51,708.06
4. Care of public grounds and the heating, lighting and janitor service in public buildings .....	45,000.00
5. The cost of keeping the college plant in repair and making minor improvements .....	46,000.00
6. Summer session .....	10,000.00
7. Non-collegiate courses .....	49,045.00
	<hr/>
	\$ 580,284.35

The Registrar reports the attendance this year at 3,200. This does not include the students attending the winter short course at the College, though the expense of this course is charged to the educational departments.

Dividing the cost of the educational work by the number of students gives a per capita cost of \$181.33. Reducing summer sessions to the yearly basis the college would still have an attendance of at least 2,800. Dividing this into the total cost would give a cost per capita of \$207.24. These figures are certainly very reasonable as compared with the per capita cost at other institutions, when similar items are included in the aggregate amount.

\* \* \* \* \*

This report is prepared for those who desire to become thoroughly acquainted with the financial operations of the last biennium, and with the budgets for the present year. It is submitted to their considerate judgment.

Respectfully,

E. W. STANTON,

*Secretary.*

ANNUAL REPORT OF THE TREASURER OF THE IOWA STATE COLLEGE OF AGRICULTURE AND MECHANIC  
ARTS TO THE IOWA STATE BOARD OF EDUCATION, FOR THE YEAR 1912-1913, JULY 1, 1913.

396

EDUCATIONAL SUPPORT.

The following is a complete statement of the transactions of accounts for the fiscal year ending June 30, 1913.

	Balance July 1, 1912	Fiscal Year		Total		Support Fund	
		Expenditures	Receipts	Expenditures	Receipts	Net Expenditures	Net Receipts
Balance support funds.....	\$ 73,059.99				\$73,059.99		\$ 73,059.99

Respectfully submitted,

HERMAN KNAPP,  
Treasurer.

ANNUAL REPORT OF THE TREASURER OF THE IOWA STATE COLLEGE OF AGRICULTURE AND MECHANIC  
ARTS TO THE IOWA STATE BOARD OF EDUCATION, FOR THE YEAR 1913-1914, JULY 1, 1914.

EDUCATIONAL SUPPORT.

The following is a complete statement of the transaction of accounts for the fiscal year ending June 30, 1914.

	Balance July 1, 1913	Fiscal Year		Total		Support Fund	
		Expenditures	Receipts	Expenditures	Receipts	Net Expenditures	Net Receipts
Balance support funds	\$71,101.17		\$ 101.10		\$ 71,202.27		\$ 71,202.27
Endowment interest fund			35,191.86		35,191.86		35,191.86
Interest treasurer's balance			2,946.64		2,946.64		2,946.64
Morrill support fund			50,000.00		50,000.00		50,000.00
State education support			349,000.00		349,000.00		349,000.00
Special instruction and equipment			85.00		85.00		85.00
Tuition		\$ 1,105.00	12,972.50	\$ 1,105.00	12,972.50		11,867.50
Salaries—educational support		212,491.98		212,491.98		\$212,491.98

TWENTIETH BIENNIAL REPORT

OF THE

Iowa State Teachers College

CEDAR FALLS, IOWA

---

REPORTS

FOR THE PERIOD BEGINNING JULY 1, 1912 AND  
ENDING JUNE 30, 1914

---

- I. Report of the President
- II. Report of the Secretary
- III. Report of the Treasurer

## LETTER OF TRANSMITTAL.

TO THE IOWA STATE BOARD OF EDUCATION,

Gentlemen:

As required by Section 2680, Code of Iowa, and Chapter 104, Laws of the Thirtieth General Assembly, as amended by Chapter 170, Laws of the Thirty-third General Assembly, and in accordance with the resolution of the State Board of Education May 25, 1910, the officers of the Iowa State Teachers College herewith file their reports covering the Biennial Period July 1, 1912, to June 30, 1914.

Respectfully submitted,

H. H. SEERLEY,

September 19, 1914.

President.

## REPORT OF THE PRESIDENT

### GENERAL STATISTICS.

The following tables give the statistics required by law as a part of this biennial report:

#### 1. FACULTY STATISTICS.

Rank	1912-13	1913-14
President .....	1	1
Head professors .....	18	18
Professors .....	35	38
Assistant professors .....	14	15
Instructors .....	20	25
Assistants .....	10	18
Student assistants .....	15	16
Total .....	113	126

#### 2. OTHER EMPLOYES.

Librarian .....	1	1
Library assistants .....	7	9
Library student assistants .....	16	27
Office secretaries .....	2	2
Office clerks and stenographers .....	7	10
Superintendent of buildings and grounds .....	1	1
Janitors .....	14	17
Engineers and mechanics .....	14	15
Other employes—matron of hospital .....	1	1
Total .....	63	83

#### 3. STUDENTS GRADUATING DURING PERIOD.

Rank of Diploma		
College Courses—		
M. D. Degree—professional course for college graduates .....	6	3
M. D. Degree—professional course for college graduates .....	6	3
*M. D. Diploma—three year course .....	34	16
B. D. Diploma—two year course .....	77	66
Special Teacher Diploma—two year course .....	135	164
Normal Courses—not high school graduates—		
Normal Diploma—three year course .....	18	17
†Rural Teacher—two year course .....	7	6
Total .....	329	320

\*This course dropped in 1914.

†This course new in 1913.

## 4. SUMMARY OF STUDENTS, 1912-13.

	Men	Women	Total
College graduates at entrance .....	5	48	53

## COLLEGE COURSES.

1. General College Courses—			
Freshman class .....	55	184	239
Sophomore class .....	38	149	187
Junior class .....	20	59	79
Senior class .....	23	68	91
2. Two Year Diploma Courses—consisting of students of Freshman and Sophomore rank—			
Primary Teachers .....		211	211
Kindergarten Teachers .....		43	43
Public School Music Teachers .....	2	49	51
Manual Training Teachers .....	13	2	15
Drawing Teachers .....		10	10
Physical Education Teachers .....	2	11	13
Home Economics Teachers .....		139	139
Grade Teachers .....		15	15
Commercial Teachers .....	2	4	6
Total .....	160	992	1,152
3. Normal Courses—not high school graduates—			
Rural and Grade Teachers .....	176	582	758
Special Teachers .....	4	64	68
Total .....	180	646	826
4. Special Music Courses—			
Voice, Violin, Piano, Organ .....	3	31	34
5. Unclassified as to Course—			
Attending for special reasons, all varieties of entrance .....	53	627	680
Total Teacher Students in College .....	396	2,296	2,692

## TRAINING DEPARTMENT PUPILS.

	Boys	Girls	Total
Advanced Grades, grammar and high school .....	120	123	243
Primary Grades .....	35	34	69
Kindergarten Grades—3 kindergartens, 2 in city, 1 on campus .....	48	58	106
High School and Grammar Grade classes in Home Economics in city .....		112	112
Total .....	203	327	530
Grand total .....	599	2,623	3,222

## CLASSIFIED AS TO TERMS.

	Men	Women	Total
Fall, Winter and Spring Terms, all courses .....	295	1,285	1,580
Training Department, Fall, Winter and Spring .....	203	327	530
Total .....	498	1,612	2,110
Summer Term .....	137	1,193	1,330
Total .....	635	2,805	3,440
Counted twice .....	36	182	218
Grand total .....	599	2,623	3,222

## 5. SUMMARY OF STUDENTS, 1913-14.

	Men	Women	Total
College graduates at entrance .....	12	33	45

## COLLEGE COURSES.

1. General College Courses—			
Freshman class .....	49	82	131
Sophomore class .....	37	54	91
Junior class .....	21	47	68
Senior class .....	24	61	85
2. Two Year Diploma Courses—consisting of students of Freshman and Sophomore rank—			
Primary Teachers .....		259	259
Kindergarten Teachers .....		44	44
Public School Music Teachers .....	1	57	58
Manual Training Teachers .....	15	3	18
Drawing Teachers .....		12	12
Physical Education Teachers .....	3	21	24

## GENERAL INFORMATION.

## DISTRIBUTION OF STUDENTS AS TO RESIDENCE.

To assist in the analysis of the statistics of enrollment here given, the following map has been prepared to show the residence of students as regards the counties in which they claimed their homes at the time of enrolling for work. This map shows that a special school will have a patronage of its own and that it will reach localities that would hardly be expected by those who are acquainted with the situation in liberal arts colleges. It is frequently said that the patronage of any educational institution is within the radius of one hundred miles. This fact may have been true years ago when the transportation was limited to slow systems, but today a few hundred miles do not constitute a hindrance to going to a school somewhat remote from a student's home. Many teacher-students are self-supporting, and hence they can claim a legal residence wherever they are at work. Such as these enroll as being from the last county in which they were employed. If they do not so enroll, then they claim a residence in which the Teachers College is located. In addition to these men and women who are already teachers and who have their residence wherever they are at work, there are many families who move to Cedar Falls for the four years their children are in school. This gives Black Hawk county an extraordinary enrollment that is not in accordance with the facts. For this reason those who are recorded as being in Cedar Falls, City and Fourth Ward, are listed separately and placed in columns below the map with the students who claim residence in other states than Iowa. In a similar way many families take up residence in Waterloo, five miles from the Teachers College, and send their children by electric railway to the daily sessions. Such individuals as these cannot be separated from the regular Black Hawk county residents, and are counted on the map as belonging to this county.

The young people of Cedar Falls who do not intend to undertake the work of teaching as a vocation do not attend the Teachers College, but go elsewhere for their education.

ties have been decidedly magnified by the changing status of the teaching vocation imposed by many new laws and by the modified policies of the State as to the true province and the complete function of popular education. Amid these confused conditions the faculty, the students and the people of the State have reached a better knowledge of the problems involved, while the accomplishments secured have been of such largeness and of such special nature that the State of Iowa has gained unusual reputation for its teacher-training undertakings. In the meantime, the graduates of the Teachers College have been in unusual demand within and without the State; and they have shown a success that is unprecedented and commendable as experts in the instructing of children and youth, while they have reached administrative rank and executive management to an extent not known by the graduates of other state teachers' schools. In so far as efficiency can be considered and practical service identified, it is no longer necessary to study elsewhere than in the State of Iowa in order to be certain of securing the most progressive and the most practical teacher training that is obtainable in the United States. It is not boastful to say that Iowa has today a teachers' training school which is recognized everywhere as having reached superior rank in quality and in decisive helpfulness to popular education.

This honorable status has been attained because the State has been liberal in providing the extraordinary financial means for the support and for the development of the College to the extent that such an enterprise has required. This has come because there has been esteem for and confidence in the comprehensive plans adopted and executed, and because each additional step of progress that has been taken has been found to be acceptable and successful. The management has recognized continuously the great importance of a right spirit among those engaged in the endeavor to be made, as well as the attainment of the proper attitude of the students who are being trained for public service; and hence it has made as the chief aim the development of the character and the acquirement of efficiency in the personality of all concerned. If these qualifications can be gained in all their fullness, then the rest of the work to be done in the training of an efficient teacher will follow as a matter of course. If the public schools are ever to reach a suitably high standard of service, it can be obtained only through the placing of efficient educators in every class room. Such standards will be impossible unless the profession of teaching shall be recognized

as a permanent business for men and women of large promise in capability. In reaching such a position of recognition, it is necessary for such an educational institution's environment to be so free from selfish and mercantile conceptions as to what is most desirable in a career that its students can accept the fact that service to civilization is the greatest purpose to which a life can be devoted. In this regard, the environment of the Iowa State Teachers College has been exceptionally favorable for the development of a noble and pure idealism regarding what is the highest and the best in manhood and womanhood. The students are in daily contact with teachers and associates who act on the assumption that power, wealth and prominence are not the sole characteristics that are the most desirable of attainment.

#### THE TEACHING CAREER.

The chief purpose of a teachers' college is to give a special education for a special career, all of its instruction and training having, as a single end, that of a leadership in the world-wide movements that assist children and youth to find themselves so well educated and so well trained that they can with positive capability and enlarging efficiency, enter the activities that may be chosen as an occupation. Such education as this is technical rather than liberal; it is positive rather than negative; it is constructive rather than preparative; it has in mind vocational guidance rather than general aims and culture; it accepts the fact that the end of training is definite and clear rather than unknown and uncertain. Such a function gives educational organization and management a main purpose and insures that the end reached can not be doubtful or experimental. The students at a teachers' college are seeking a solution of specific problems without hesitation, and the studies they pursue are vocational in their influence and development, rather than cultural and general. The instruction that they are granted is of a notable type as to thoroughness, comprehensiveness and distinctiveness; and scholarship always means an increase of usefulness and a definiteness of design. A faculty in a true teachers' college can not be indifferent as to progress of the students; they can not forget their need for supreme accuracy and thorough mastery; they can afford to adopt and enforce standards without fear of being unreasonable in the exactions made; and they can secure a degree of cooperation and of response that is impossible under less vocational influences.

The teaching career has its limitations, but it also has its compensations. It reaches its maximum of expertness and of utility in a teachers' college because in such an institution expertness of instruction is absolutely essential, while excellence of manner and of motive can not be omitted from the standards emphasized. Teaching under such circumstances calls for initiative, skill, self control, continual growth and ready adaptability, as the functions imposed demand geniality, sympathy and humaneness to great degrees. To secure scholars of such views of service, of such breadth of duty, of such largeness of standard and of such greatness of purpose is a very arduous undertaking; and, hence, when such are found they should be worthy of the best salaries that the commonwealth can afford to pay. In seeking improvement in such a propaganda as education undertakes for improving civilization, the key to this situation is in the teachers' schools. It is here that the motives of improvement must be born and the disposition to attain superiority cultivated, because from them are to come the persons who are to help the fathers and the mothers of the community in the training of the coming generation for a better grade of citizenship.

#### THE STANDARD OF PUBLIC SCHOOL TEACHING.

The license system of defining the legal status of a public school teacher in Iowa is of such a low standard of scholarship and training that it is left entirely to the option of a holder of a teacher's certificate of the lowest grade whether or not any future improvement shall be made. Such a situation places, in the majority of schools, teachers without any worthy qualifications as to scholarship or capability and lacking in a notable spirit of improvement. At the same time the salaries paid to these low grade teachers are comparatively better than are paid those who have graduated from teachers' colleges and have the highest certificates, because they have made so little investment in their preparation for their work that their expenses were immaterial. What need have these incompetent persons to go to school at large personal expenditure and why should they train themselves for larger efficiency when the conditions that exist encourage them to take a remunerative income without sacrifice or superior preparation? All these conditions are permitted to exist because the people have been willing to let them continue and because they seem to feel themselves helpless in any attempt to remedy the known evils. The only source

of guidance that they really have concerning the quality of competency in the teachers is that given by the state in conferring authority to teach; and since that information is no absolute guarantee of competency, their despair of success accumulates from repeated failures to secure capability in instruction, leaving them to conclude that the school system is a fraud and the supervision provided a useless expense. Under present systems of measurement confirmed by law and by practice, this deplorable situation is irremediable.

#### THE EXPANSION OF THE COURSE OF STUDY OF ELEMENTARY SCHOOLS.

The General Assembly has provided whereby all public schools shall give instruction in agriculture, home economics, and manual training by July 1, 1915. This expansion of requirement has occurred at a time when the common branches, and in addition, civics, economics, physics, and algebra, are not yet well mastered or taught in the majority of elementary schools. This happens because the teachers are not scholastically qualified to meet the requirements now made. Furthermore, the teachers' licenses that are now held under the title, second and first grade uniform county and state certificates, are perpetual licenses that can not require at any future time any actual knowledge of these 1915 new branches. Hence, all that this legal expansion can mean will be that of requiring that an examination be passed in these new branches by the recruits who are to be annually added to the ranks of the teachers who drill the public school army. To put it briefly, instruction is required of all but no guarantee of fitness of the teacher is exacted.

#### THE REMEDY FOR THE UNSATISFACTORY SITUATION.

The only remedy for this undesirable situation is for the State to adopt an advanced plan of granting new licenses as teachers only on graduation from a creditable course of study. This plan would discontinue the wasteful and incompetent method of formal examination as sufficient evidence of competency to certificate new teachers. Then the teachers now in the service should be required to go to school during their long summer vacations and also to take work on Saturdays during term time, until they have reached a proper and reasonable standard of scholarship and training. The country schools must be taken out of their indifference and their unsatisfactoriness in order to bring them to an efficient standard of

excellence and usefulness. This can be done by the State's adopting a policy of enlightenment and of enforcement, rather than maintaining a practice of delay and of neglect. The active teaching force of the State should undertake a systematic course of study which will give such a grade of efficiency as the work required now demands; and all those who do not secure this necessary condition within a reasonable length of time should be eliminated from the educational system for their incapability and their insufficiency. The experience of the past twenty-five years indicates that it is impossible to get the rank and file of the public school teachers to go to the organized educational institutions in order to be trained. To meet this situation the faculties of these institutions should be sent out into the State in order that they may give to the teachers in service such instruction as their scholastic and professional conditions may make necessary. All such teachers should be compelled to be identified with this study and progress until the minimum standard that has been adopted has been reached. Such a solution is practicable if the entrance of new teachers who are not properly qualified be prohibited and the necessary compulsion enforced upon those who are in the service and are below the grade of qualification imposed. If such a plan as this were undertaken in a systematic way, the State could accomplish within a few years the improvement of present day conditions with the least possible expense, while the standard imposed could then be permanently maintained by the institutions now established. The day has come when the State of Iowa must send the teacher to the people rather than to continue to require that all the workers who need to be served should be compelled to come to the public institutions where they are located or permanently give up the opportunity to be instructed and trained for a larger career.

#### THE TEACHERS' STUDY CENTER SYSTEM.

During the latter half of the college year 1913-1914, the State Teachers College made a test of the practicability of an Extension Service on the plan of a "Teachers' Study Center System." This part of a year's work has been conducted as a demonstration rather than as an attempt to cover completely any certain territory. It has been tested in such counties as were nearest to Cedar Falls, because the instructors who were employed to conduct this special service were otherwise regularly engaged in their class room duties at the Teachers College during the days of the school week and

could give only their Saturdays to this extension teaching. This was done for the purpose of testing the possibilities of such endeavors fitting the needs of the teachers at work. Eight counties volunteered to coöperate with the Teachers College in attempting such organized instruction and the results of the efforts obtained have proved to the faculty and to the students that such a method of management and instruction would be acceptable and successful. Some of the coöperating counties delayed their organization until they were assured that the first attempts made elsewhere were sure to be satisfactory, and hence they had few such meetings as it took considerable time to get properly started. The following report shows the work that was accomplished, the counties served, the enrollment secured and the meetings held:

Counties	Centers	Meetings	Av. Attendance
Black Hawk .....	Hudson .....	3	17
Black Hawk .....	La Porte City ...	3	31
Black Hawk .....	Waterloo .....	3	87
Butler .....	Clarksville .....	4	56
Butler .....	Dumont .....	1	39
Butler .....	New Hartford ..	4	24
Benton .....	Vinton .....	2	61
Bremer .....	Waverly .....	2	52
Cerro Gordo .....	Clear Lake.....	1	44
Cerro Gordo .....	Mason City .....	1	93
Cerro Gordo .....	Swaledale .....	1	17
Floyd .....	Charles City ....	1	128
Floyd .....	Rockford .....	2	26
Tama .....	Gladbrook .....	1	28
Tama .....	Traer .....	1	53
Worth .....	Manly .....	1	49

#### OTHER STATISTICS OF THE WORK DONE.

Number of centers organized .....	16
Number of meetings held .....	31
Number of different instructors in the service.....	23
Grand total of teachers attending the several classes in all the centers .....	1449
Total of different individual teachers instructed in all the centers, counting each teacher but once .....	1040
Average attendance per meeting held.....	46

The plan on which these Study Centers were projected was that of the class room system, sufficient instructors being sent to each center meeting to divide the teachers assembled into suitable sections. Three lessons of an hour each were given each division each

day, some one branch of study being thus given much intensive attention by development of the subject matter and of the method of instruction. This work as now organized will be continued at these same locations for the year 1914-15, and in addition, there will be accepted as many other counties with new Study Centers as the time and the strength of the faculty will permit. It is also the intention to secure the assistance of other well qualified instructors who are not members of the College faculty but who can be depended upon to do superior work under the auspices of the Teachers College, as the demands of the work may require. With sufficient financial support to provide for the necessary instruction, supervision and direction, such a Study Center system can be expanded until it has reached effectively all the teachers of the State who should have specific instruction in scholarship, in school management and in a better spirit of endeavor.

At the opening of the Fall term of the Teachers College in September, 1914, the Director of the Study Center work for 1914-15 announced that at least fifty centers representing the teachers of twenty-five counties would be provided. At this date it is not possible to know what this endeavor will produce in enrollment for the year, but it is fair to estimate that at least 3,000 teachers will take advantage of the opportunities thus provided. Under such auspicious circumstances it is certainly desirable that the General Assembly grant such financial assistance as is commensurate with the importance and possibilities of the extension service.

#### THE RURAL DEMONSTRATION SCHOOL AND THE TEACHERS COLLEGE.

During the last college year, a new undertaking for the improvement of the rural school and for the training of rural school teachers has been promoted at the Teachers College. To make a proper demonstration of what can be done with good teaching and good management, ten rural independent school districts have been affiliated with the education and the training in teaching departments of the Teachers College. These schools are within a radius of six miles from the college campus and have all the typical conditions of rural communities and of one room rural schools. In accepting this new educational work, it was recognized that the one room country school is the present day problem of most Iowa rural communities and that when State subsidies and voluntary consolidation have reduced these small school districts to the minimum, yet in many localities there will remain the single school

with its limitations as the elementary educational institution of the people. It is rightly inferred that the merit of consolidation consists in simplifying the problems involved and in instituting a more economic management; and for these reasons alone such a plan should be approved, commended, accepted and adopted. The demonstration here undertaken does not imply that actual consolidation of territory is unnecessary or undesirable, but that such an enterprise should proceed upon a plan of coöperation and affiliation with the belief that these are fair substitutes when physical consolidation is not popular or acceptable. Under the plan adopted the Teachers College has a large part in the selection of teachers and in the supervision of the schools in session. It has also supervision of the vocational endeavors of the pupils in these schools during the entire year, so far as their farm and home duties are concerned, treating such study and work as a definite part of the authorized course of study. The parents of these pupils become the assistant instructors and supervisors of their children in all these vocational enterprises and coöperate with the teachers in giving helpful encouragement and active direction. The school boards provide larger funds than heretofore for the support of these schools, and they are pledged to favor proper opportunity for community meetings and social center work by erecting such additional rooms and by giving such other facilities as the developments of the work shall prove to be necessary and desirable. The course of study used in these demonstration schools is the regular printed State course as published by the Department of Public Instruction, with such adaptations and modifications as experience shall show to be important and essential for each school district. In addition, these demonstration schools have become the actual laboratories that are employed in giving graduates from the rural teachers' training course actual experience and marked efficiency as instructors. By so doing, these teachers in training will live for a suitable length of time in these country communities, thus getting a direct knowledge of the social activities that are organized and conducted, and thereby gain a proper appreciation of rural life and of rural people.

This new division of the educational work at the Teachers College has become possible during the past two years because (1) of the minimum wage law that has gone into effect and (2) of the several other laws that now require a small amount of actual training in teaching before being granted a teacher's certificate, and

(3) of the growing public interest in the true welfare and absolute needs of country children. All of these developments have made the people more willing to spend their money on the improvement of community education, and have produced recognition of the truth that good teachers should be more adequately paid for their services while incompetent or ordinary teachers should be prohibited from holding any permanent place in the system because their education and training are not commensurate with the high standards required by present day civilization.

The enthusiasm and the satisfaction that have been shown by the patrons of these demonstration schools during the first year of the undertaking have been of such a marked character as to give good reason to believe that every rural school district in Iowa is now ready for definite progress and real improvement, if the General Assembly can devise ways and means for such successful accomplishment.

Enough experience has been had by the faculty and the management to justify the opinion that a new step of real progress would be taken if a successful demonstration school were organized and maintained for every three or four township school districts in each county, and directed by an expert specialist in rural school work so that all the beginning teachers for such counties could be given successful training. This work should depend upon quality and should require efficiency in service before the would-be teacher could be placed in charge of any individual school. The hope of the future consists in bringing competency and personality into such relationships that the people may know from experience when quality of teaching has been actually obtained.

#### THE TEACHERS COLLEGE AND THE TEACHERS AT WORK.

There is a notable demand for a practical, efficient extension service in the lines of educational conferences, addresses, lectures and social discussions. Such activities include commercial clubs, teachers' clubs, teachers' associations, teachers' institutes, farmers' institutes, women's clubs and literary organizations of many kinds. These forms of popular organizations make plans for the consideration of many educational topics on their yearly programs. These activities solicit the assistance of the members of the faculty of the Teachers College on lines where their experience enables them to have first hand knowledge, and such coöperation is expected without hesitation because of the faculty being in the employment of the

State. All of this coöperation is worth while as it assists in securing progress and enlightenment and should be considered as of a nature appropriate to the public service of a State institution. During the past biennial period the members of the faculty have appeared in such programs more than 500 times and a work has been accomplished that has added much to the customary duties of the faculty commonly represented by the program of the weekly class hours and the assigned laboratory work on the campus.

#### THE SUMMER TERM EXTENSION TO TWELVE WEEKS.

For some years a six weeks summer term has been maintained in June and July at the Teachers College. This session occurs at a time when the public schools are closed. The students that attend this session are the teachers of the State who are regularly employed in school work during the other months of the year. The fact that these teachers are extremely anxious to make improvement is shown by the large numbers that enroll at the opening of the term and continue their studies without relaxation to the end. Many of these teacher-students have been in attendance from year to year for a number of sessions, seeking to complete their respective courses and to graduate from the institution. Some individuals have been enrolled for seven successive years and have exhibited remarkable energy, endurance and ambition. It can be easily seen that an extension of the summer term to a full session of twelve weeks would double the present opportunities at the Teachers College to give instruction and training to such students. It is right that this additional privilege should be offered by the State and thus open every advantage for instruction and training to such teachers in service as can not afford to resign their regular work in order to go to school. The expenses of most public school teachers are equally as large during vacation as they are during employment, and hence the privilege of studying during vacation would enable them to complete an education without any extraordinary expenditure of time or of personal savings. The necessary appropriations which must be given to expand the actual service and privileges of the College for the additional six weeks of the summer would give immediate returns to the State in increased competency and efficiency in the schools. In making this additional provision it should be recognized that it is not necessary that the regular faculty of the Teachers College be required to give this much additional time annually, as efficient plans can be

formulated so that the regular members of the faculty can have their annual vacations at any time of the year that is most desirable for their comfort and convenience. Such a change in policy would mean that the summer term faculty would be employed for this special work independent of the regular sessions of the College.

It is to be said, in addition, that the Summer term enrollment is regularly increasing and that 2500 students will be in attendance the coming biennial period, provided publicity be given to the proposed enlarged plans for extending the session. The following enrollment has occurred during the past three sessions:

Summer 1912—1330 students.

Summer 1913—1537 students.

Summer 1914—2022 students.

#### THE RETIREMENT OF AGED FACULTY MEMBERS FROM ACTIVE TEACHING.

The system of pensioning aged professors now provided by many educational institutions has brought a necessity for Iowa to meet the new requirement in a fair and business-like way. Under present conditions, the state educational institutions can not compete in the securing of teaching staffs on a par with these pension assured institutions, as either the salaries proposed by the State must be much larger than those offered elsewhere or other inducements must be given. It would be neither trouble nor loss to the State to arrange such a plan of detached service for aged professors, at a reduced salary, as is commensurate with reason and in accordance with the work assigned. This would be more helpful than a straight pension system, as it is better for such persons to continue work and receive remuneration than to retire to idleness and inactivity. Every educational institution has such opportunities for detached service, and these problems should be studied and assignments should be made in accordance with public policy and economic management.

#### THE DORMITORY DEMANDS AND NEEDS.

By authority of the General Assembly the Board of Education is constructing a dormitory for women that will give accommodations for 125 students, September, 1915. The information at hand shows that many more people of the State will expect to have the privileges of the dormitory than can be accommodated. It appears

that there will be a demand for three times the space now provided and that this feeling is due to the fact that private lodgings are not satisfactory to many patrons of the Teachers College. It is imperative that provision of a good kind should be made for the proper housing of students at Cedar Falls. Private initiative has its limitations because it depends upon business motives for its existence. Since boarding and lodging students can not be made a remunerative business at the prices the students can pay, the supply of good accommodations is always less than the demand. Since the Teachers College provides facilities for instruction and could efficiently care for 3,000 students in regular attendance, it is evident that the State must have a hand in the business of lodging such persons if the entire capacity is to be continually used. About 1,400 students can now be comfortably entertained in the lodging houses near the Teachers College, and the prospects for additional houses to be built in sufficient numbers to keep up with the demanded expansion can not be relied upon as a solution. The Teachers College is now handicapped in its work by the inability of would-be patrons to secure comfortable and desirable lodgings. Dormitories under the management of educational institutions are profitable investments and serve as endowments for their support. The older educational institutions of the country have found it absolutely necessary to assume charge of the solution of this problem before they were able to reach a status of efficiency or success that the plans and policies ought to secure. In no way could the State do more for its students desiring to prepare to be teachers than to erect dormitories for their comfort and protection at Cedar Falls. Arguments should not be necessary to convince the authorities charged with the responsibility of developing and improving the educational institutions that this step is an essential one; and those who have children to send to school and who must send them away from home are unanimously agreed that a dormitory system is essential to good management, good training and a well conducted development of character of students.

#### SALARIES OF PROFESSORS AND TEACHERS.

The continual advance in the cost of living, and the increased enlargement of demands for better talent, better preparation and better capability have made the salary problem at a State educational institution an actual emergency. These schools depend for their value upon the personal merit and efficiency of their teaching

staffs. The greater these institutions become, the more nearly they comply with public demand, the more fully they contribute their part to progress in civilization, the greater becomes the demand for sufficient means to pay the salaries that such expert service can command. Educational undertakings are great when they are in the hands of great teachers, and the young people in a college depend for inspiration and impression upon the qualities and the capabilities of those who instruct them in the arts and sciences of civilization. While there has been a reasonable recognition of these facts in the past as shown by the money granted, yet the present situation is a more than ordinarily serious one as it has developed an immediate emergency which must be met with sincerity and with fidelity, if the greatness of standard of the colleges is to be maintained. Iowa may be as liberal as other states and may be willing to do more than some states, but Iowa leadership in all respects depends upon the granting of the means whereby great teachers of great conceptions of life may be secured and kept in the faculties of instruction. To that end Iowa must continue a policy of liberality and of confidence in the best that can be obtained, and these problems should be studied with earnestness and with thoroughness.

#### PUBLICITY AND PROMOTION.

Educational service demands larger publicity and more promotion. It is surprising how very little the average citizen knows about the opportunities offered by the State for the education of his children. This is not a surprise when it is remembered that families are personally interested in this question for a very limited time and that they do not seek information before they need it. As a consequence, the demand for publicity and promotion is a permanent part of administration and can never be abandoned on account of the fact that the patronage is continually new. Even if the interests of the people of the State are alone considered and the interests of the institution are not regarded important, the work of publicity and promotion should be a constant service for the public good.

#### IN CONCLUSION.

Education is like other enterprises that depend upon popular approval and acceptability. It must be known to be appreciated and recognized. Since the work being done is maintained for the benefit of all the people, and since the object is the improvement of the

success and the power of the Nation and the State, there is every reason why an aggressive policy of development and of progress should be adopted and continued. Without such a method of enterprise and enlargement, without such a development of interest and confidence, without the right spirit of superiority and of aim the undertaking involved in the problems of public education will fail to accomplish the mission for which it was established.

HOMER H. SEERLEY,

President.

Cedar Falls, Iowa, September, 19, 1914.

# ANNUAL REPORT

OF THE SECRETARY OF THE IOWA STATE TEACHERS' COL-  
LEGE TO THE IOWA STATE BOARD OF EDUCATION  
FOR THE YEAR 1912-1913—JULY 1, 1913

## SUPPORT OF SCHOOL FOR YEAR 1912-13.

Amounts on hand in the different funds, July 1, 1912:

Teachers' Fund.....	\$	973.96	
Contingent Fund.....		7,845.87	
Library Fund .....		4,709.12	
Librarians' Salary Fund.....		5,361.72	
Hospital Fund.....		20.10	
Millage Fund.....		8,260.76	
Paving, Walks and Improvement Fund...		254.92	
Students' Contingent Fund.....		553.97	
Summer Contingent Fund.....		7,393.36	
Commencement Contingent Fund .....		1,272.23	\$ 36,646.01

Received from State Appropriations, for one year, 1912-13:

Teachers' Fund, permanent.....	\$109,500.00	
Contingent Fund, permanent.....	48,000.00	
Summer Term Fund, permanent.....	11,000.00	
Library Fund, permanent.....	5,000.00	
Librarians' Salary Fund, permanent.....	7,000.00	
Hospital Fund, permanent.....	1,250.00	
Millage Fund, one-tenth mill tax.....	75,000.00	
Pipe Organ Fund.....	5,000.00	\$261,750.00

Received from other sources for one year, 1912-13:

Contingent Fund, material sold.....	\$	1,489.91	
Contingent Fund, interest on general daily balance .....		780.22	
Contingent Fund, Independent School Dis- trict, Cedar Falls, tuition.....		4,961.53	
Library Fund, fines and lost books.....		60.93	
Hospital Fund, insurance fees.....		258.00	
Hospital Fund, received from patients....		446.85

Pipe Organ Fund, Alumni and Glee Club..		324.40	
Pipe Organ Fund, M. P. Moller for in- cidentals .....		45.41	
Students' Contingent Fund fees collected..		19,738.55	
Summer Contingent Fund, fees collected..		4,286.50	
Commencement Contingent Fund, fees col- lected .....		696.00	\$ 38,134.15

Transfers between funds—no additional income:

Teachers Fund from Students' Contingent Fund ..	\$ 10,126.04
Contingent Fund from Summer Contingent Fund ..	1,475.02

## Summer Term Fund from Summer Contingent

Fund .....	5,821.64	
Pipe Organ Fund from Students' Contingent Fund	1,250.00	
Students' Contingent Fund from Pipe Organ Fund	1,250.00	\$ 19,922.70

## RESUME:

Amount on hand July 1, 1912 .....	\$ 36,646.01	
State Appropriations .....	261,750.00	
Other Sources .....	38,134.15	
Transfers between funds .....	19,922.70	\$356,452.86

SALARIES OF TEACHERS FOR THE REGULAR SCHOOL YEAR OF THREE  
TERMS, 1912-13.

Homer H. Seerley, President, 12 mos. ....	\$ 5,000.00
Geo. S. Dick, Registrar, 12 mos. ....	2,475.00
Mrs. Marion McFarland Walker, Dean of Women, 10 mos. ....	1,200.00
Education—	
Chauncey P. Colgrove, professor .....	2,400.00
Anna E. McGovern, professor .....	1,400.00
Geo. W. Samson, professor .....	2,000.00
G. W. Walters, professor .....	2,000.00
Edith C. Buck, professor .....	1,300.00
Geo. H. Mount, professor .....	1,600.00
Teaching—	
Wilbur H. Bender, professor .....	2,400.00
Bruce Francis, assistant director .....	
Florence E. Ward, supervisor kindergarten .....	1,400.00
Mattie Louise Hatcher, supervisor primary .....	1,400.00
Elizabeth Hughes, professor .....	1,300.00
Ida Fesenbeck, professor .....	1,300.00
Eva M. Luse, professor .....	1,200.00
Mae Cresswell, assistant professor .....	1,100.00
Gertrude Dandliker, assistant professor .....	1,100.00
Floie E. Correll, assistant professor .....	1,000.00
Lulu M. Stevens, assistant professor .....	1,000.00
Etta M. Cramton, assistant professor .....	900.00
Grace Aitchison, critic teacher in training .....	450.00
Harriet Bye, critic teacher in training .....	450.00
Marguerite Cadwallader, critic teacher in training .....	450.00
Grace Rait, critic teacher in training .....	450.00
Edith Riland, critic teacher in training .....	450.00
Sudah Cohoon, critic teacher in training .....	450.00
Alice Dixon, critic teacher in training .....	450.00
Stella Fisher, critic teacher in training .....	450.00
Eleanor Gray, critic teacher in training .....	450.00
Marguerite Uttley, critic teacher in training .....	450.00
Ethel Whitten, critic teacher in training .....	450.00
English—	
S. A. Lynch, professor .....	2,300.00
W. W. Gist, professor .....	2,000.00
Bertha Martin, professor .....	1,700.00
John Barnes, professor .....	1,700.00
Jennette Carpenter, professor .....	1,500.00
Lillian V. Lambert, professor .....	1,500.00
Eva L. Gregg, assistant professor .....	1,200.00
Laura Falkler, assistant professor .....	1,100.00
Mary F. Hearst, assistant professor .....	1,200.00
Margaret E. Oliver, assistant professor .....	1,100.00
Mabel J. Lodge, instructor .....	1,000.00
Bird Bundy, assistant .....	70.00
Elsie Fabrick, assistant .....	60.00

## IOWA STATE BOARD OF EDUCATION

439

## Latin and Greek—

Frank Ivan Merchant, professor .....	2,300.00
Myra E. Call, professor .....	1,400.00

## German and French—

J. B. Knoepfler, professor .....	2,300.00
Charlotte M. Lorenz, instructor .....	1,000.00
Clara Nolte, instructor .....	720.00
Anna Doffing, assistant .....	65.00
Vie Ufford, assistant .....	35.00

## Mathematics—

Ira S. Condit, professor .....	2,300.00
D. Sands Wright, professor .....	2,000.00
C. S. Cory, professor .....	1,900.00
Emma F. Lambert, assistant professor .....	1,200.00
Edna Allen, instructor .....	1,000.00

## Physics and Chemistry—

L. Begeman, professor .....	2,300.00
S. Freeman Hersey, professor .....	1,600.00
Perry A. Bond, assistant professor .....	1,400.00
Robert W. Getchell, assistant professor .....	1,400.00
E. O. Dieterich, instructor .....	1,000.00

Trevor Haight, assistant in library	6.95
Jessie Wiley, assistant in library	10.19
Florice Minkler, assistant in library	50.10
Ruby Reese, assistant in library	11.62
Claribel Walker, assistant in library	7.35
Nell Lucas, assistant in library	3.15
Florence Elser, assistant in library	17.84
Winifred Wherry, assistant in library	12.37
Letty Walsh, assistant in library	10.20
Anna Martin, assistant in library	.97
O. A. Bozarth, janitor	720.00
\$ 6,631.04	

## SALARIES PAID EMPLOYES, 1912-13.

Lillian G. Goodwin, secretary of the college	\$ 1,500.00
Anna R. Wild, executive secretary	1,500.00
Beatrice Willbur, asst. secretary in college office and asst. to registrar	900.00
Hazel E. Brown, stenographer in president's office	720.00
Genevieve Burling, stenographer in college office	634.00
Evelyn Morton, stenographer in college office	720.00
Pearle C. Graham, stenographer in college office	580.00
Emma Deines, clerk in college office	480.00
Mae Bahrenfuss, stenographer in college office	116.00
J. E. Robinson, superintendent	2,200.00
John F. Swope, electrician	1,100.00
Hans Rasmussen, engineer	900.00
A. P. Christensen, carpenter	900.00

## THIRD BIENNIAL REPORT

## SALARIES PAID EMPLOYEES, 1912-1913—Continued.

Hans C. Hansen, carpenter	900.00
Henry M. Barnes, fireman	820.00
Ward Pierce, fireman	720.00
Wm. Orvis, fireman	283.00
G. W. Behrens, fireman	420.00
Wm. Wallace, fireman	608.00
A. M. Cleveland, night watchman	720.00
Robert Billings, yardman	720.00
T. N. Justice, janitor	720.00
Peter Christensen, janitor	80.00
H. L. Stech, janitor	720.00
S. R. Dryden, janitor	720.00
W. J. Johnson, janitor	480.00
John McLain, janitor	720.00
W. B. Hoats, janitor	720.00
Philip Seltenrich, janitor	720.00
H. C. Harmon, janitor	720.00
J. W. Bangs, janitor	720.00
Wm. Stevenson, janitor	720.00
Elmer Maxson, janitor	640.00
W. J. Waters, janitor	225.00
Mrs. T. N. Justice, matron gymnasium	330.00
Contingent fund	\$ 25,676.00
Millage Fund—	
M. T. Coleman, plumber	\$ 1,020.00
G. E. Palmer, steam fitter	1,020.00
	\$ 2,040.00
Hospital Fund—	
Mrs. A. M. Potter, matron	\$ 600.00

## ITEMIZED EXPENDITURES, 1912-13.

Millage Fund—	
Training school	\$ 64,390.35
Repairs	6,029.50
Library	472.90
Emergency hospital	4,754.04
Tunnel extensions	255.77
Teachers' Fund—	
Salaries of teachers	120,600.00
Librarians' Salary Fund—	
Salaries of library employes	6,631.04
Library Fund—	
Books and supplies	4,049.52

Transfers—	
Millage Fund from Furniture Fund .....	\$ 228.60

## RESUME

State appropriations .....	\$290,341.18
Other sources .....	31,518.01
Transfers from other funds .....	228.60—\$322,087.79

SALARIES OF TEACHERS FOR THE REGULAR SCHOOL YEAR OF THREE  
TERMS, 1913-14.

	Twelve months
Homer H. Seerley, President .....	\$ 5,000.00
Geo. S. Dick, Registrar .....	225.00
O. S. Cory, Registrar .....	1,894.83
Mrs. Marion McFarland Walker, Dean of Women .....	1,250.00

	Nine months
Education—	
Chauncey P. Colegrove, professor .....	\$ 2,400.00
Anna E. McGovern, professor .....	1,400.00
Geo. W. Samson, professor .....	2,000.00
G. W. Walters, professor .....	2,000.00
Edith O. Buck, professor .....	1,300.00
Geo. H. Mount, professor .....	1,800.00
Macy Campbell, professor (10 months) .....	1,950.00
I. H. Hart, professor .....	700.00

Teaching—	
Geo. S. Dick, professor .....	2,400.00
Bruce Francis, assistant director .....	
Florence E. Ward, supervisor of kindergarten .....	1,400.00
Mattie L. Hatcher, supervisor of primary .....	1,400.00
Elizabeth Hughes, professor .....	1,300.00
Ida Fesenbeck, professor .....	1,300.00
Eva Luse, professor .....	1,200.00
Mae Cresswell, assistant professor .....	733.34
Gertrude Dandliker, assistant professor .....	1,100.00
Floe E. Correll, assistant professor .....	1,000.00
Lulu M. Stevens, assistant professor .....	1,000.00
Etta M. Cramton, assistant professor .....	1,000.00
Sudah Cohoon, critic teacher in training .....	450.00
Harriet Bye, critic teacher in training .....	450.00
Lola Wells Hughes, critic teacher in training .....	450.00
Edith Riland, critic teacher in training .....	450.00
Lou Shepherd, critic teacher in training .....	450.00
Alice Dixon, critic teacher in training .....	375.00
Eleanor Gray, critic teacher in training .....	450.00
Lucy Harris, critic teacher in training .....	450.00
Emma Rait, critic teacher in training .....	450.00
Frances Shambaugh, critic teacher in training .....	450.00
Marguerite Uttley, critic teacher in training .....	450.00
Elsie Williams, critic teacher in training .....	298.67
Margaret Dick, critic teacher in training .....	27.00
Hjalmar Ostergaard, critic teacher in training .....	50.00
Anna Millard, rural demonstration school .....	135.00

## English—

S. A. Lynch, professor	2,300.00
W. W. Gist, professor	2,000.00
Bertha Martin, professor	1,700.00
John Barnes, professor	1,700.00
Jennette Carpenter, professor	1,500.00
Lillian V. Lambert, professor	1,500.00
Eva L. Gregg, assistant professor	1,200.00
Laura Falkler, assistant professor	1,100.00
Mary F. Hearst, assistant professor	1,200.00
Margaret E. Oliver, assistant professor	1,100.00
Lenore Shanewise, assistant professor	1,200.00
Chloe Siner, instructor	1,000.00

## Latin and Greek—

Frank Ivan Merchant, professor	2,300.00
Myra E. Call, professor	1,400.00

## German and French—

J. B. Knoepfler, professor	2,300.00
Charlotte Lorenz, instructor	1,017.00
Clara Nolte, instructor	800.00
Frances Bartels, assistant	21.00
Vie Ufford, assistant	42.00
Mina Schnepf, assistant	20.00

## Mathematics—

Ira S. Condit, professor	2,300.00
D. S. Wright, professor	2,000.00
Emma F. Lambert, assistant professor	1,200.00
Edna Allen, instructor	1,000.00
R. D. Daugherty, instructor	1,000.00

## Physics and Chemistry—

L. Begeman, professor	2,300.00
S. Freeman Hersey, professor	1,700.00
Perry A. Bond, professor	1,500.00
J. O. Perrine, professor	1,600.00
O. B. Read, instructor	1,200.00
Alvin Tostlebe, assistant	105.00
David Schmitt, assistant	105.00
Carl Hauser, assistant	25.00
F. E. Sharp, assistant	25.00

## Natural Science—

M. F. Arey, professor	2,100.00
G. W. Newton, professor	2,000.00
E. J. Cable, professor	1,900.00
Alison E. Aitchison, assistant professor	1,200.00
W. H. Davis, professor	1,700.00
E. Laurence Palmer, instructor	933.33
Roy Abbott, assistant	100.00

## History—

Sara M. Riggs, professor	1,500.00
Sara F. Rice, professor	1,400.00
Vina Younker, assistant	10.00

## Government—

Chas. H. Meyerholz, professor	2,100.00
William Thomas Morgan, instructor	1,200.00

## Home Economics—

Olive M. Young, professor	1,500.00
Allee M. Heinz, instructor	1,000.00
Florence H. Freer, instructor	800.00

## Home Economics—Continued

Bertha Goff, instructor	850.00
Lulu Stallman, instructor	900.00
Julia Hurd, instructor	480.00
Ida O. Rohlf, assistant	20.00

## Economics—

Reuben McKittrick, professor	1,700.00
------------------------------	----------

## Music—

O. A. Fullerton, professor	2,300.00
Hulda Stenwall, assistant professor	1,200.00
Anna Gertrude Childs, professor	400.00
Grace Gail Giberson, instructor	1,100.00
John Ross Frampton, professor	800.00
Harriet Case, instructor, fees only	
John Leonard Conrad, instructor, fees only	
Bertha Hart, instructor, fees only	

## Orchestral Music—

B. W. Merrill, professor	1,300.00
F. L. McCreary, instructor	120.00
Alma Cutler, instructor, fees only	

## Art—

Henrietta Thornton, professor	1,500.00
Bertha L. Patt, professor	933.33
Anna Iverson, instructor	900.00
Mildred Packard, assistant	40.00

## Commercial Education—

H. C. Cummins, professor	1,400.00
R. V. Coffey, assistant professor	1,300.00
Marguerite Martin, assistant	10.00
Seblna McGrath, assistant	90.00
Mabel Anderson, assistant	20.00

## Manual Arts—

Chas. H. Bailey, professor	2,300.00
C. H. Brown, instructor	1,200.00
Mrs. Alma L. McMahon, instructor	1,000.00

## Physical Education—

R. F. Seymour, professor	1,800.00
Marguerite M. Hussey, assistant professor	1,400.00
Allen P. Berkstresser, instructor	1,200.00
Monica R. Wild, instructor	800.00
Margaret Nisbet, instructor	400.00

\$129,500.00

## SALARIES PAID SUMMER TERM, 1913.

## Summer Term Fund

M. F. Arey	Natural Science	\$ 350.00
Alison Aitchison	Natural Science	210.00
Roy Abbott	Natural Science	120.00
Grace Aitchison	Teaching	75.00
Mrs. Miriam Woolson Brooks	Mathematics	160.00
J. H. Beveridge	Education	350.00

Thirty-Second Biennial Report  
OF THE  
College for the Blind  
VINTON, IOWA

---

REPORT

FOR THE PERIOD BEGINNING JULY 1, 1912 AND ENDING  
JUNE 30, 1914

---

- I. Report of the Superintendent
- II. Report of the Treasurer

## LETTER OF TRANSMITTAL.

---

To the Iowa State Board of Education,  
Des Moines, Iowa.

Gentlemen:

I have the honor of submitting for your consideration the  
thirty-second biennial report of the Iowa College for the Blind.

GEO. D. EATON,  
Superintendent.

Vinton, Iowa, September 30, 1914.

# REPORT OF SUPERINTENDENT EATON

### DEPARTMENT OF HEALTH.

C. C. Griffin, M. D., Physician.	L. W. Dean, M. D., Visiting Ophthalmic Surgeon.
Miss Ella Lehmann, Nurse.	

### SUPERINTENDENT'S REPORT.

In our last biennial report, it was recommended that a larger support fund be granted for the maintenance of the institution, and that the main building, which was in a very unsanitary condition, be remodeled, made more modern, and as fireproof as possible. These recommendations were placed before the General Assembly, which body granted the full amount asked.

It is impossible for us to express in words our appreciation for the interest the State Board of Education has shown toward our advancement and welfare. We hope to prove worthy of the kind consideration we have

received. The Finance Committee of the State Board has always been willing and ready to help us in every possible way, and we feel greatly indebted to them.

We will not undertake to describe in this short report the amount of remodeling that was done the past year. No one can fully appreciate the change that was made unless he had seen the old building as it was before the remodeling took place.

Besides the remodeling of the main building, we have installed our own water system at a cost of \$2,469.00. The Thirty-fourth General Assembly appropriated \$1,000 for a well and equipment, but upon investigation it was decided that the amount was not sufficient. In our last report we asked that \$3,000 more be added to this fund. This was granted. The balance of the well and equipment fund, \$1,531.00 plus \$250.86 taken from the contingent and repair fund, was used for the purpose of installing a refrigerating plant. The water system and refrigerating plant are proving to be very satisfactory, and also a saving to the institution of at least \$800 a year.

We must not lose sight of the fact that the main building was remodeled with the thought in view of having, some time in the near future, a kindergarten building. When the Board of Education took charge of this institution it appointed a committee to investigate and make a study of other institutions similar to our own. Nothing better, at that time, could have been done, for this committee after studying other institutions saw more clearly our needs. It reported the following plan: To enlarge our main building in such a way as to accommodate one hundred pupils and the greater number of teachers and officers, and to include rooms for school purposes, auditorium, piano practice rooms, tuning rooms, kitchen, dining rooms, superintendent's apartments, etc. This remodeling has been done.

We have enrolled in our school at the present time 126 pupils and the prospects are that before many weeks we shall have 135 or 140. As mentioned in our last report, the younger pupils should be separated from the older. We need a special building for the little blind boys and girls. Nineteen children—most of them of kindergarten age—entered the school for the first time this fall.

#### FURTHER NEEDS OF THE INSTITUTION.

Oculist fund .....	\$ 200.00
Electric light plant .....	3,000.00
(We are now paying over \$1,000.00 a year for electric current.)	
Pianos and furniture .....	5,000.00
(Most of our pianos are old and worn out. We need several new ones.)	
Barns and silo .....	4,500.00
(It is evident from the produce report that it is profitable for the institution to feed from 75 to 100 hogs each year and to keep at least 10 cows. Our barns are very old and need rebuilding badly.)	

Paving, sidewalks and improvement of grounds.....	2,500.00
(Our driveways are not paved. We would appreciate it very much if the main driveway leading into the institution grounds to the front of the main building, were paved.)	
Printing plant .....	2,000.00
(Printing matter for the blind is very expensive. A printing plant for printing books and music for the blind would be of inestimable value to the students and teachers.)	

### HEALTH OF THE INSTITUTION.

The health of the school during the past two years has been exceptionally good. Aside from a few cases of measles and mumps and two cases of pneumonia, we have had no sickness. Dr. Dean of Iowa City performed several operations, all of which were successful. Whenever the operation and treatment required special attention the case was sent to the University Hospital at Iowa City.

### REPORT OF OPHTHALMIC SURGEON.

STATE UNIVERSITY OF IOWA,  
Iowa City, Iowa, Oct. 13, 1914.

Mr. George Eaton,  
Superintendent, Iowa College for the Blind,  
Vinton, Iowa.

My Dear Sir:

I have the honor to report that during the school year of 1912-13 five visits were made to the College.

At the first visit, on September 16, 1912, each pupil was examined, the cause of blindness determined, and when indicated, treatment or operation was recommended. As other pupils arrived during the year they also were examined. When it seemed possible to improve the vision by glasses, the glasses were ordered. Artificial eyes were also fitted when they were needed. In addition to the care of the eyes, aural and nasal troubles were taken care of.

The following operations were performed:

Cataract operations .....	6
Tenotomy .....	1
Advancement .....	1
Enucleation .....	1
Iridectomy .....	1
Submucous operation on nasal septum .....	1
Operation for atresia .....	1
Removal of tonsils and adenoids .....	2
Total .....	14
Refractive cases .....	7
Glasses fitted .....	5

Four especially serious cases were operated at the University Hospital at Iowa City. One refraction case was refracted at my office at Iowa City. For work done at Iowa City no charge was made.

Respectfully submitted,

L. W. DEAN.

STATE UNIVERSITY OF IOWA.  
Iowa City, Iowa, Oct. 13, 1914.

Mr. George Eaton,  
Superintendent, Iowa College for the Blind,  
Vinton, Iowa.

My Dear Sir:

I have the honor to report that during the school year of 1913-14 only three visits were made owing to the College being closed in the fall of 1913.

At my first visit, on January 24, 1914, each pupil in the institution was examined, and the cause of blindness determined, and when indicated, treatment or operation was recommended. As other pupils arrived during the remainder of the year they were examined. When it seemed possible to improve the vision by glasses they were ordered. In addition to the care of the eyes, aural and nasal troubles were taken care of.

The following operations were performed:

Cataract .....	1
Iridectomy .....	1
Tonsils and adenoids .....	2
Tonsils .....	1
	—
Total .....	5

Two cases were refracted and three treated at the University Hospital at Iowa City. For work done at Iowa City no charge was made.

Respectfully submitted,

L. W. DEAN.

#### COURSES OF STUDY.

##### THE KINDERGARTEN, FIRST AND SECOND GRADES.

This course requires from two to three years and covers the work usually done in the first two years in public schools. Many games and exercises are given to develop the powers of the child, normally.

Reading.—New York Point. Combine the methods used in teaching the sighted child. Teach alphabet by groups of letters similar in form. Select words from primer which have similar form and sound.

Text Book.—Progressive Readers, Parts 1 and 2 of Book 1 and Parts 1 and 2 of Book 2. Supplemental work.

Spelling.—Select words from reading lesson. Oral and written spelling of words that are found in the children's vocabulary.

Writing.—Small letters, capitals, short sentences. Writing numbers in point to one hundred.

Language.—Reproduction stories. Write simple sentences about familiar objects. Memorizing short choice selections. Teach use of period, apostrophe, capitals. Teach correct form of words in common use; also the memorizing of short poems and quotations.

Numbers.—Counting by 1's to 100, 2's to 100, 3's to 99, 4's to 100, 5's to 100. Fractions of  $\frac{1}{2}$ ,  $\frac{1}{3}$  and  $\frac{1}{4}$  are to be introduced. Drill on combinations in addition and subtraction.

Geography.—Nature study lessons presented by the teacher in the form of stories. "Primary Methods in Teaching." Bring nature to pupils

as much as possible. Teach days of week, names of month, seasons and directions. Give simple lessons on home geography.

Hand Work.—Bead work, cardboard work, paper folding, weaving, tying knots, clay and sand modeling.

#### THIRD GRADE.

Reading.—Text Book: Progressive Readers, Book 2, Part 3. Book 3, Parts 1 and 2.

Spelling.—Oral and written, spelling words from reading lesson. Attention given to syllabication. Definitions.

Writing.—Dictation exercises. Copy memory gems.

Language.—Much talk about selections from readers. Pupils should be taught to employ all new words. Letter writing. Memorizing of choice selections.

Numbers.—Multiplication tables to 12x12. Denominate numbers, foot, yard, etc. Elementary fractions. At least one-half of the problems should be written problems. Drill on combination of numbers. Have pupils make problems. Rapid addition, etc. Begin use of type slate.

Text Book.—Walsh's New Primary Arithmetic, chapters 1-3.  $\frac{1}{4}$

Geography.—Continue the work on home geography. Present the child life of various countries.

#### FOURTH GRADE.

Reading.—Text Book: Progressive Readers, Book 3 complete, with supplementary work as outlined by Superintendent.

Spelling.—Same as in third year.

Writing.—Same as in third year.

Language.—Continue oral and written work. In all written work special attention should be given to spelling, use of capital letters and punctuation marks. Analysis of simple sentences. Continue the memorizing of short choice selections.

Text Book.—Hyde's English, Book 1 to lesson 86.

Numbers.—Text Book: Walsh's New Primary Arithmetic, chapters 4-5.

Geography.—Text Book: Tarr & McMurray's, Part 1, finish.

#### FIFTH GRADE.

Reading.—Text Book: Progressive Readers, Book 4, Part 1, volumes 1 and 2.

Spelling.—Oral and written, spelling all new words in readers. Definitions. Teach use of dictionary.

Writing.—Teach in connection with spelling and language.

Language.—Much composition work, reading and reproduction of stories.

Text Book.—Hyde's English, Book 1 complete.

Numbers.—Text Book: Walsh's New Grammar School Arithmetic, chapters 1 and 2.

Geography.—Text Book: Tarr & McMurray's Geography, Part 2. Supplement with Carpenter's Geographical Readers. Map work.

History.—Text Book: Barnes' Primary History to Civil War.

## SIXTH GRADE.

Reading.—Text Book: Progressive Readers, Book 4, Part 2, volumes 1 and 2.

Spelling.—Same as in fifth year.

Writing.—Same as in fifth year.

Language.—Text Book: Hyde's English, Book 2, to page 180.

Numbers.—Text Book: Walsh's New Grammar School Arithmetic, chapters 3 and 4.

Geography.—Text Book: Tarr & McMurry's Geography, Part 3, complete.

History.—Text Book: Barnes' Primary History, complete. Barnes' Brief History, begin volume 1.

## SEVENTH GRADE.

Arithmetic.—Text Book: Walsh's New Grammar School Arithmetic, chapter 5.

Grammar.—Text Book: Hyde's English, Book 2, complete.

Spelling.—Text Book: Swinton's New Word Analysis.

Geography.—Text Book: Tarr & McMurray's Geography, Part 4. Read to class from other authors.

History.—Text Book: Barnes' Brief History, finish.

Reading.—Text Book: Progressive Readers, Book 5, Parts 1 and 2.

## EIGHTH GRADE.

Arithmetic.—Text Book: Walsh's New Grammar School Arithmetic, chapter 6.

Grammar.—Text Book: Reed & Kellogg's Higher English, complete.

History.—Text Book: McMasters' History of the U. S., complete.

Physiology.—Text Book: Overton's Applied Physiology, complete.

Spelling.—Text Book: Swinton's New Word Analysis.

Literature.—Classics: "Evangeline," "Enoch Arden," "Snow Bound," "Vision of Sir Launfal."

Typewriting is to be started in this grade and finished in the First Year High School.

## ENGLISH COURSE IN THE GRADES.

Third Grade.—Text Books: Progressive Readers, Book 2, Part 3; Book 3, Parts 1 and 2.

Supplemental: Nature Readers, Book 2, first half.

Heart of Oak Series, Book 1, Vol. 3.

Fourth Grade.—Text Book: Progressive Readers, Book 3, Parts 3 and 4.

Supplemental: Nature Readers, Book 2, second half.

Fifth Grade.—Text Book: Progressive Readers, Book 4, first half.

Supplemental: Nature Readers, Book 3. Old Greek Stories.

Sixth Grade.—Text Book: Progressive Readers, Book 4, last half.

Supplemental: Nature Readers, Book 4, first half.

Yonge's "Young Folks' History of Greece and Rome."

Seventh Grade.—Text Book: Progressive Readers, Book 5, Parts 1 and 2.

Supplemental: Nature Readers, Book 4, last half.

Eighth Grade.—Classics: "Evangeline", "Enoch Arden", "Snowbound", "Vision of Sir Launfal." Special emphasis should be placed upon the memorizing of choice passages from each of these classics.

## HIGH SCHOOL COURSE.

## FIRST YEAR.

First Semester.  
Algebra  
Rhetoric  
Ancient History  
Typewriting

Second Semester.  
Algebra  
Rhetoric  
Ancient History  
Typewriting

## SECOND YEAR.

Algebra  
Rhetoric  
Medieval History  
Civics

Algebra  
Elocution  
Modern History  
Physical Geography

## THIRD YEAR.

Plane Geometry  
American Literature  
Beginning Latin  
Physiology

Plane Geometry  
American Literature  
Beginning Latin  
Physiology

## FOURTH YEAR.

Plane Geometry  
English Literature  
Beginning Latin  
Physics

Solid Geometry  
English Literature  
Caesar Book 1  
Physics

## FIFTH YEAR.

Physics  
English Literature  
English History  
Caesar

Review Arithmetic  
Review Grammar  
American History.  
Caesar

## HIGH SCHOOL.

## Course in English.

First Year.—Text Book: Waddy's Elements of Composition and Rhetoric, through Figures of Speech.

Classics: Julius Caesar.  
Prisoner of Chillon.  
Story of the Other Wise Man.

Second Year.—Text Book: Waddy's Elements of Composition and Rhetoric (omitting chapter 14), finish during first semester.

Classics: Thanatopsis.  
Soharb and Rustum.  
Ancient Mariner.  
Perfect Tribute.  
Merchant of Venice.

Class Elocution is given during the second semester, based upon the above classics, which are to be read, studied, discussed in the class room, and choice passages memorized. The poem Thanatopsis as a whole is to be committed to memory.

Third Year.—Text Book: Painter's American Literature with selections.

Classics: As You Like It.  
American Scholar.  
Man Without a Country.  
Bunker' Hill Oration.

Fourth Year.—Text Book: Kellogg's English Literature. Complete the first four periods to Elizabeth's Death.

Classics: Bacon's Essays.  
Paradise Lost, Bks. 1 and 2.  
De Coverly Papers.  
Webster's "Adams and Jefferson".

Fifth Year.—Text Book: Kellogg's English Literature. Begin with Period 5, and finish, during first semester.

Classics: Macbeth.

Lady of the Lake.

Macauley's "Essay on Milton".

Tennyson's "The Princess".

Second Semester. A review of English Grammar; any standard up-to-date text.

All classics should be studied and read by the class and choice passages from each memorized as part of the required work in English.

#### History and Civics.

First Year.—Text Book: Barnes' General History, through Ancient History.

Other Texts: West's Ancient History.  
Myer's History of Greece.  
Myer's History of Rome.  
Morey's Ancient History.

Second Year.—Text Book: Barnes' General History.  
Medieval History; first semester.  
Modern History, second semester.

Other Texts: Myers' Medieval and Modern History.  
Harding's Medieval and Modern History.  
West's Modern History.

Text Book: Fisk's Civil Government.  
Complete during first semester.

Other Texts: Meyerholz's Government of Iowa and United States.

Fifth Year.—Text Book: Montgomery's English History. Complete during first semester.

Text Book: Montgomery's American History. Complete during second semester; study carefully the steps in the formation of the American Government.

Other Texts: Hart's Essentials in American History.  
Channing's History of the United States.

#### Mathematics.

First Year.—Text Book: Well's Algebra; through simultaneous equations of the first degree.

Second Year.—Text Book: Well's Algebra; complete; Involution, Evolution, Quadratics, Proportion and Progression.

Third Year.—Text Book: Well's Plane Geometry; first three books.

Fourth Year.—Text Book: Well's Plane Geometry; complete during first semester.

Text Book: Well's Solid Geometry; begin the second semester.

Fifth Year.—Text Book: Any standard work in Arithmetic for review class work, for second semester.

## Science.

Second Year.—Text Book: Maury's Physical Geography, complete during second semester.

Other texts: Tarr's Physical Geography.

Third Year.—Text Book: Huxley's Physiology. Complete in two semesters.

Fourth Year.—Text Book: Carhart & Chute's Physics, first semester to Sound.

Second semester to Magnetism and Electricity.

Fifth Year.—Text Book: Carhart & Chute's Physics; finish during first semester.

## Latin.

Third Year.—Text Book: Collar & Daniell's Latin Book, to "Compounds of Sum", chapter 44.

Fourth Year.—Text Book: Collar & Daniell's Latin Book; finish during first semester.

Text Book: Gunnison & Harley's Caesar, Book 1, second semester.

Fifth Year.—Text Book: Gunnison & Harley's Caesar. Books 2, 3 and

## MUSIC DEPARTMENT.

A thorough course in music is offered to all students who have musical talent and are willing to work to develop it. Even those without such talent are given the opportunity to learn to play for their own pleasure.

To graduate from the Music Department, a student must complete the Literary Course, and the Courses in Harmony, Musical Form, and Musical History; he must major in any one of the following: Piano, Organ, Violin, or Voice, and complete creditably the course offered in same; and he must also have a working knowledge of one other of these four.

Pupils in the First and Second Literary Grades are assigned no work in music except the Public School Music of those grades. In the Third and Fourth Literary Grades, the pupils learn to read and write New York Point Music.

Each student who takes Private Voice or any instrument must take part in the private and public recitals, at the discretion of his teacher. Each candidate for graduation must give a public Graduating Recital.

## PIANO.

## Ear Training.

Table Exercises using Piano Technic for Children, by Julia Lois Caruthers. Use of Meter Fractions belonging to the Katherine Burrowes Course of Music Study. In this way the children are taught the comparative time-value of notes.

After this preparatory work the technical work is carried on using finger exercises, scales, arpeggios and octaves.

Selections are used from the following works:

Touch and Technic, Wm. Mason.

Studies, Wieck.

Graded Studies, Mrs. Crosby Adams.

Graded Studies, Thos. Tapper.

Czerny—Liebling.

W. G. Smith, Op. 55, Op. 63.

The New Gradus ad Parnassum, I. Philipp.  
Studies, Cramer.

Gradus ad Parnassum, Clementi.

Octave Studies:

Horvath, Op. 43.

A. D. Turner, Op. 20.

Jean Vogt, Op. 145.

Kullak.

Along with the technical development are studied selections from the following:

Music Education Material, Calvin B. Cady.

Miniature Melodies, Jessie Gaynor.

Echoes from Music Land, Mary L. Powers.

Standard Graded Course, Mathews.

Pianist's First and Second Year, Oesterle.

Melody Pictures for Little Players, Margaret Martin.

Bird Echoes, Elsa Swartz.

Gurlitt, Op. 130, Op. 74.

Burgmuller, Op. 100.

Graded Course of Pieces, Thos. Tapper.

Heller, Op. 138, Op. 45, 46, 47.

Mendelssohn, Songs Without Words.

Clementi, Sonatinas.

Kuhlan, Sonatinas.

Mozart, Sonatas.

Beethoven, Sonatas.

Bach, Little Preludes.

Bach, Two Part Inventions.

Bach, Three Part Inventions.

Supplementary pieces by other composers, such as Schumann, Chopin, Schubert, Grieg, etc.

#### COURSE OF STUDY FOR ORGAN.

Studies. Stainer. The Organ. (In Point.)

Clemen's Modern Pedal Technic Books 1 and 2. (Not in Point.)

Modern School for the Organ, C. E. Clemens. (Not in Point.)

Twenty-four Progressive Studies, George E. Whiting. (Not in Point.)

Roger's Graded Materials. (Not in Point.)

The acquirement of a clean and fluent legato touch on manuals and pedal keyboards, the independence of feet and hands, and the elementary principles of registration.

Drill in playing four-part harmony, using Bach Chorals.

Selections from "Church and Concert Organist," Vol. 1. (In Point.)

Bach's Eight Easy Preludes and Fugues. (In Point.)

## THIRD BIENNIAL REPORT

Organ pieces from following composers: Guilmant, Mendelssohn, Saint Saens, Volckmar, George Whiting and Merkel. Also pieces by other French, English and American Writers.

## HARMONY—TWO YEARS.

## FIRST YEAR.

First thirty chapters of *The Theory and Practice of Tone-Relations*, Percy Goetschius.

Analysis of such music as the easier numbers from Schumann's Op. 68 and other compositions regular in construction.

## SECOND YEAR.

Complete *The Theory and Practice of Tone-Relations*, Percy Goetschius.

Analysis of Mendelssohn's *Songs Without Words*.

Analysis of harder numbers from Schumann's Op. 68.

## MUSICAL FORM.

## THIRD YEAR HIGH SCHOOL.

Text Books: *Musical Form*, Bussler-Cornell, Part 1. *Musical Form*, Ebenezer Prout. *Applied Forms*, Ebenezer Prout.

Analysis of Beethoven Sonatas.

## MUSICAL HISTORY.

## FOURTH YEAR HIGH SCHOOL.

The text used in this work is "*Lessons in Musical History*," by Fillmore. This is supplemented by "*Outlines of Musical History*," by Clarence G. Hamilton, Mathews' "*Popular History of the Art of Music*," Elson's "*Modern Composers of Music*," and other supplementary work.

## VOCAL MUSIC.

In the Kindergarten and in the First and Second Literary Grades, songs suitable to the age of the children are learned.

There are two Choruses for the students above the Second Grade.

In the Junior Chorus a general knowledge of Music is acquired. Ear Training is emphasized and the students are taught the formation of the Major and Minor Scales, of Intervals and of Chords. Songs are learned and are sung in the Chapel Exercises.

In the Senior Chorus the students learn more difficult songs, which they also sing in the Chapel Exercises.

The Choir consists of the best singers. They learn Anthems and Secular Choruses of high grade. They sing at the Easter and Baccalaureate Services and at the public Music Recitals.

As many of the older students as possible receive Private Voice lessons. This school year of 1914-1915, there are twenty-seven students receiving such instruction.

## GRADED COURSE ON VIOLIN.

## PREPARATORY.

Ear training. Tone production. Finger exercises and easy scales. Melodies in rhyme transposed into the simpler keys.

Wichtl Op. 10, Book 1.

Melodies from Songland, by McIntyre, Op. 12.

Zephyrs from Melodyland, Krogmann, Op. 15.

## INTERMEDIATE.

De Beriot Method, introducing five positions.

Exercises from "Berger's Fundamental Studies" progressing through all major and minor keys.

Scales, arpeggio and further exercises progressing through all the keys and in all positions.

Sitt Op. 32, Book 1.

Kayser Op. 20, Book 1.

Dancla Op. 74, Op. 68.

Sevcik Op. 7, Preparatory Trill Studies, Op. 2, School of Bowing Technic.

Solos from the works of Dancla, Raff, Bohm, and the easier compositions of De Beriot and Wieniowski.

## ADVANCED.

Scales and arpeggio continued.

Sevcik Op. 7, Trill Studies.

Op. 8, Changes of Position.

Op. 9, Double Stops.

Op. 2, School of Bowing Technic.

Kreutzer, Schradieck, Rode.

Solos by Ries, Wieniowski, De Beriot, Vieuxtemps, Sarasate, also concerti sonati and other arrangements of both classic and modern compositions.

## INDUSTRIAL DEPARTMENT.

In this department, piano tuning, broom-making, netting, chair caning, sloyd, weaving, reed work, sewing, crocheting, knitting, ornamental bead work and domestic science (cooking, etc.) are taught.

The following articles were manufactured during the bienial period closing June 30, 1914.

Brooms .....	2707 only
Whisks and Toy Brooms.....	263 only
Carpet .....	106 yds.
Rugs .....	45 only
Laundry Bags .....	4 only
Woven Pillow Covers.....	34 only
Fly Nets .....	141 only
Hammocks .....	18 only
Doll Hammocks .....	67 only
Bead Work .....	50 pcs.

Fancy Work .....	477 pcs.
Reed and Raffia Baskets .....	220 only
Sheets .....	332 only
Pillow Cases .....	307 only
Table Cloths .....	72 only
Napkins .....	116 only
Towels .....	401 only
Tea Towels .....	430 only
Dresses .....	10 only
Aprons .....	64 only
Skirts .....	9 only
Waists .....	5 only
Drawers .....	3 prs.
Corset Covers .....	3 only

### READING MATTER FOR THE BLIND.

Under the provisions of the postal laws we are constantly sending out embossed books to the blind readers of Iowa. This law provides for the transmission of point books for the blind free of postage through the mails. In sending point books through the mail they should be addressed as follows: In the upper left hand corner of the wrapper the name and address of the sender must appear and in the upper right hand corner the words, "Free Reading Matter for the Blind." We would urge all those into whose hands this report may come to make known to any of their friends with defective sight the provisions of the above mentioned law.

### ENROLLMENT—BOYS.

BIENNIAL PERIOD ENDING JUNE 30, 1914.

No.	Name	Address
1	Ackerly, Guy	Swaledale
2	Albaugh, Don	Alden

## GENERAL INFORMATION.

The aim and purpose of this institution is purely educational. It is a State school for the young blind, or those of sight so defective as to prevent them from attending the regular public school. All the common school branches are taught. The musical department is emphasized and those who have talent in that direction are given an opportunity to enter the course. Several industrial trades are taught.

The school year begins the first Wednesday in September and closes the last week in May. All applicants over five and under twenty-one years of age are admitted to the institution by the superintendent. All applicants over twenty-one years of age must furnish to the superintendent recommendations—not less than three—concerning the character of the appli-

cant. The superintendent sends these, with his recommendations, to the State Board of Education to be acted upon by the board.

This institution is, in no sense of the word, an asylum or home for the blind. No person of imbecile or unsound mind or of confirmed immoral character will be knowingly received in the institution. If such are received they will be discharged. The parents or friends must supply their children with comfortable clothing. If this is not done the superintendent may purchase the clothing and send the bill to the county in which the child resides.

To secure the best work in any school, pupils should enter at the beginning of the year and remain throughout the entire term. It is the faithful and steady work that counts, and it is our desire to impress this upon the minds of the patrons.

#### STATEMENT OF THE NEEDS OF THE PUPILS WHO ARE COMING TO OUR SCHOOL.

The following statement of the needs of pupils who are coming to our school has been prepared by the matrons. It will answer many questions and save unnecessary correspondence:

Girls.	Older Boys.	Younger boys.
1 Coat	1 Sunday suit	1 Sunday suit
1 Play coat	1 Week-day suit	1 Week-day suit
1 Hood	2 Pairs extra trousers	3 Pairs extra trousers
1 Hat	1 Overcoat	4 Colored blouses
1 Sunday dress	2 Suits underwear	2 White blouses
1 Week-day dress	4 Shirts	1 Sunday overcoat
2 Petticoats	6 Collars	1 Play overcoat
2 Suits underwear	3 Night shirts	2 suits underwear
2 Night dresses	2 Pairs suspenders	2 night shirts
2 Corset waists	2 Pairs shoes	2 Pairs suspenders
4 Pairs stockings	1 Pair rubbers	2 Pairs elastic garters
2 Pairs shoes	4 Pairs socks	2 Pairs shoes
1 Pair rubbers	3 Neckties	1 Pair rubbers
3 Aprons	1 Muffler	6 Pairs stockings
1 Pair mittens	1 Summer hat or cap	3 Windsor ties
1 Pair side elastics	1 Winter hat or cap	1 Summer Sunday cap
6 Handkerchiefs	1 Pair mittens	1 Summer play cap
Brush and comb	Umbrella	1 Winter Sunday cap
Tooth brush	Comb and brush	1 Winter play cap
Umbrella	Tooth brush	1 Pair mittens
1 Gymnasium suit	8 Handkerchiefs	Comb and brush
1 Pair gymnasium shoes	1 Gymnasium suit	Tooth brush
	1 Pair gymnasium shoes	8 handkerchiefs
		1 Gymnasium suit
		1 Pair gymnasium shoes

All clothing should be plainly marked.

It would be well for each girl to have two school dresses, and an umbrella, if possible.
