

NINTH BIENNIAL REPORT

OF THE

TRUSTEES

OF THE

Iowa Industrial School,

EMBRACING REPORTS FROM THE

SUPERINTENDENT OF THE BOYS' DEPARTMENT AT ELDORA,
THE SUPERINTENDENT OF THE GIRLS' DEPARTMENT AT MITCHELLVILLE, AND ALSO THE
TREASURER OF THE BOARD.

TO THE

GOVERNOR OF THE STATE OF IOWA,

FOR THE

FISCAL TERM ENDING JUNE 30, 1885.

PRINTED BY ORDER OF THE GENERAL ASSEMBLY.

DES MOINES:

GEO. E. ROBERTS, STATE PRINTER.

1885.

REPORT OF TRUSTEES.

To his Excellency, BUREN R. SHERMAN, Governor of Iowa:

HONORABLE SIR—The Board of Trustees of the Iowa Industrial School, hereby submit for your consideration its ninth biennial report, being for the fiscal year ending June 30, 1885.

ORGANIZATION OF THE SCHOOL.

The instituting and organizing an Industrial School—until recently the Reform School—of this State has exerted a progress in reformation and moral elevation amongst the wards of the State greater than could have been anticipated by the most sanguine, at its inception. Its ultimate success is now assured, and the proportion of children in whom complete reformation has been achieved, is greater than that of any other similar institution, in any State in the Union, excepting Pennsylvania.

THE CHILDREN,

who are committed to the care of this Institution are not the offspring of paupers and the lower classes of society alone, but in many cases children of excellent parentage, who are rebellious of home, or school control, truants, vicious, incorrigible, unruly, beggars, vagrants, or of hardened natures, with strong hereditary taints, who set at defiance all home discipline, and if left to follow their inclinations would early develop traits of character that would eventually lead them into habits of sensuality, selfishness, and sin; sin is not only a crime, but is also a misfortune, and, to guard against this misfortune was the inciting cause which led to the establishing of a State Reformatory.

Our Institution is not a penal institution, but a home, in every sense the word implies, for the wards of the State. Here they are cared for physically, mentally, morally, and socially, whilst they are still

young and easily impressed by good influence, and before they have become calous to every finer sentiment. It is a State Institution. Owned, supported and controlled by the State, and its object is the reformation of children—not their punishment—by training them in works of industry, morality, and the principles of hygiene, and by imbuing them with independent ideas of earning their own living, by honest labor, thus making them self-supporting, and relieving the State of the obligation of caring for them in their adult age. By separating them from the influence of evil and corrupt associates, and the improper occupation of their time, make them feel a self-respect that elevates them beyond their early surroundings.

THE PROGRESS

this Institution has made in the past decade has awakened a spirit of inquiry amongst our tax-payers, and has induced them in a large degree, to consider the wants, needs and conditions of this helpless and dependent class of our population. Many of these children are orphans, half-orphans, or abandoned by one or both parents, and are thus thrown upon the charity of the State. The prevailing methods of caring for and educating these children should be one of the greatest works of enlightened legislation. The State, as the "common parent and guardian" of these children should exert every effort to increase the capacity for protection, and proper education, as far as possible, in physical, moral, mental, social and industrial culture, thereby fitting them for the battle of life, and its duties, and making them, with rare exception, men and women, worthy to accept a position in any sphere of life.

"It is to be remembered that the public has a paramount interest in the virtue and knowledge of its members, and that of strict right the business of education belongs to it. That parents are ordinarily entrusted with it because it can seldom be put into better hands; but when they are incompetent or corrupt what is there to prevent the public from withdrawing the facilities held, as they obviously are, at its sufferance?" (Decision Supreme Court of Pennsylvania.)

CHANGE OF NAME.

The friends of this Institution, recognizing the necessity of a high standard of moral and social elevation for its inmates, memorialized the last General Assembly to change the name of the Institution

from the State Reform School to that which it now bears, the Iowa Industrial School. The use of the name Reform School was considered unapplicable, although the school is reformatory in its work and character. Many persons will receive a child into their family, or furnish it permanent employment, from an industrial school, that would hesitate, and in a majority of cases, positively refuse to accept one from a State reformatory. In the judgment of most persons the stigma of being an inmate of a reform school is sufficient ground to ostracise them forever. They little reflect, or appreciate this fact alone should be a strong argument for encouraging those who have been discharged from such an institution, as they are, in a degree, at least, reformed, and with proper encouragement and surroundings, the reformation would be complete.

The demand for the girls by private families as domestics and assistants in general housework, is greater than the supply, whilst the boys experience great difficulty in finding homes and employment. It is doubtful if any other State in the union has so little care of its wards after their discharge from its charitable Institution, as Iowa. All others have in some manner a supervisory care of them until assured they are properly located or have a permanent abiding place. But with us they are entirely a thing of the past the very moment they turn their back upon our Institutions, and the doors, if a State charity, are closed after them. Some plan should be suggested, and the demand seems imperative in view of the largely increasing number of children in this Institution, by which the youthful wards of the State, at least, could be provided for. Many of these children are orphans, many worse than orphaned, homeless, friendless, destitute in every possible particular, without a trade, or any business education, turned loose upon the cold charity of the world, without any ostensible means of earning their own living, and trusting to luck to find some employment. The only home they have ever known was during their retention in the industrial school, and the good they may have there acquired, and the resolutions made whilst enjoying these comfortable surroundings, to make men and women of themselves when permitted to mingle with the outside world again, vanish in the presence of hunger, cold, destitution, and the want of kind encouragement. Being thus isolated from all business contact with their fellow men they are rendered less capable of finding the proper avenues of work, and its consequent, and essential remuneration than if thrown on their own

resources from their earliest years. This knowledge should be an unanswerable argument in favor of devising some suitable means of furnishing employment for these children when they cease to be under the care of the State. They are *compelled* to leave the Institution when they obtain their majority, and if they should develop into fit subjects for the State prisons as an unfortunate few have who have left this Institution, it will be for the reasons stated. If there could possibly be some method put into practical execution by which *every child* who has not a home to which he or she may go when leaving the school could be placed at once in some respectable family, or under the supervision of some responsible person, whether indentured or not, it would be but a brief period before the reduction in number of tramps, vagrants, paupers, fallen women, and victims of intemperance would be perceptible.

THE HEALTH OF THE SCHOOL.

The general health of the school during the fiscal term just ended, has been exceptionally good. There has not been any disease of an epidemic character, and the sickness, when any has prevailed, is just such as any household may expect. Colds, sore throats, and slight illnesses of this nature being the only diseases we have had to combat, with one or two exceptions. There have been six deaths in the school, but in two cases the victims were diseased when they entered the Institution. We have one accidental death to chronicle, that of Chas. Peck, who met his fate whilst assisting in repairing a pump. His death was particularly sad, as he was a most worthy boy, and would have received his discharge in a few days. We feel satisfied the excellent health of the inmates is due in a large measure to the superior sanitary regulations of the Institution, and the close observance of regular habits in diet, exercise, rest and labor. All hygiene rules are strictly enforced, and each inmate is required to obey them. The Superintendent, with commendable zeal, has given this subject his personal attention, and to him and his able corps of assistants the State is indebted for many improvements that have been productive of great good.

EDUCATION.

The success that has been achieved in the educational departments of this Institution in both the boys' and girls' department, is gratifying in the extreme. The children instructed here will compare most

favorably with those of our graded common schools throughout the State in the rudimentary branches of a common English education. The teachers have been unremitting in their labors in the school-room, and the result is a thoroughly systematized plan of instruction, gratifying alike to the Board of Trustees, and the teachers themselves.

MORAL AND RELIGIOUS INSTRUCTION.

The remnant of the Chaplain's fund in the hands of the Treasurer of the Board of Trustees has been used to supply regular religious services each Sunday. These services, supplemented by daily devotions in the families, and Sunday-school work, have had a very salutary effect on all engaged in them, promoting a Christian influence and religious sentiment among the inmates that will benefit them, spiritually, as long as they live. The clergy of Eldora have officiated as chaplains, with an occasional sermon from other divines.

LITERATURE OF THE SCHOOL.

The library is very limited for an institution having within its walls so many readers. The two hundred (\$200.00) dollars appropriated as a library fund by the last General Assembly have been partly invested in books, but the supply is still inadequate, and the want of more reading matter greatly felt. Not any argument is needed to show the necessity for a good library in a school of this kind. There is only a fair collection of books on the shelves now, and as the inmates have access to these it is a desirable feature of their education that a more extensive field of literary work be laid before them. To place young and active minds *en rapport* with those of thinking men and women through the medium of books is a higher education than can be received through any other channel.

Children's minds often absorb that which they cannot comprehend, and in after years digest it with wonderful clearness of comprehension and thought, and the opportunity for intellectual recreation should be afforded them when they desire it, and the necessary books should be at their command. Appreciating this, we earnestly desire an appropriation of five hundred (\$500.00) dollars for the purchasing of reading matter in the shape of books, magazines, periodicals, and newspapers for the next biennial term. Aside from the few standard authors we have in the library, there are taken in the school magazines and newspapers, as shown by Superintendent Miles in his report.

Other papers and periodicals are sent to the school gratuitously, which the Superintendent will acknowledge in his report.

INDUSTRIAL TRAINING.

"The importance of thorough industrial training is recognized by every State in the Union. Such being the case, the method adopted becomes of primary importance." "Practical industrial training should receive attention, for it is a mighty factor in the improvement of the young, beginning in the habit-forming period, it continues with them, to fit them for usefulness, and to fortify them against evil, which begins with idleness."

The more progressive institutions of the country provide suitable industries for their inmates. It is an evidence of continuing progress in this department, that a majority of the boys are desirous and anxious to learn some trade or practical industry, by which they can earn a living when discharged from the School. If some movement could be inaugurated to establish a State school of design, supported and maintained by the State, and open to the children of the public upon such terms as should be prescribed for them, but providing for the support and maintenance of all children graded out of the Industrial School, as reformed, it would be a consummation much desired. In a few years such an institution by judicious management could be made self-supporting and add to the revenue of the State, by furnishing skilled artisans who would be self-sustaining, and by the sale of well-manufactured articles produced in the school. In the absence of such an institution in our State it will not be a difficult or expensive undertaking to introduce some of the lighter mechanical arts into the Industrial School. Among the initiatory should be cane seating chairs, manufacturing brooms—the straw for which should be cultivated on the school farm; chair making, paper box making, seed growing for flower and vegetable culture, manufacturing tin-ware, and various other light industries, such as carpentering, knitting by hand, type-writing, etc., etc., all of which could be profitably and successfully introduced. To be sure there are some trades taught in the School, but the boys do not become expert workmen in the particular avocation they choose because the opportunity is not afforded them. The absence of competent and experienced men as teachers compels the boys to receive such instruction as can be inculcated by an experienced workman, or by one whose duties in the Institution

are so multifarious that he cannot devote his time to any one occupation. There are continually many and necessary repairs to be made upon articles in daily use, consequent upon the general wear and tear, which could just as well be accomplished by the inmates as by some paid workman, thereby saving to the State an unnecessary expenditure of money if the proper appliances were provided them for executing the work, and a competent director placed over them.

NEW BUILDINGS.

In the boys' department there are at this date June 30th, 1885, two hundred and ninety inmates. These are divided into families under the care and control of family managers. Were it not for the excellent sanitary arrangements of these family buildings the detriment to the general health would be incalculable by crowding so many souls into one building. There are congregated in some of these buildings sixty inmates, where the maximum should be not over forty or forty-five, so crowded are we for family building accommodations to satisfy the increasing demands upon us. Should the number of children increase in the next five years in the same ratio they have in the past five it will be essential to erect a family building each biennial term. There are now four family buildings connected with this department. The new building completed in April is now occupied and is constructed on the same uniform plan as the others. For this building the last General Assembly appropriated ten thousand (\$10,000) dollars for construction and furnishing, which was accomplished within the appropriation.

HOSPITAL.

The appropriation of five thousand (\$5,000) dollars for an hospital for this Institution was a most judicious movement in the right direction. During the entire existence of this School, the necessity of using any building *exclusively* as an hospital has never arisen. But the large number of persons in, and around, this Institution has made the necessity of such a building apparent for some time past. Should any epidemic visit the School in its present unprovided hospital condition, it would prove most disastrous. The hospital building is now in process of erection, and will be completed as speedily as practicable. It is so situated, in reference to the other buildings, as to be occupied as a family building should the necessity arise, or for what-

ever purpose may seem best in the judgment of the Superintendent. Yet it is far enough removed from the surrounding buildings, in case any contagious disease should exist, to isolate the infected and prevent all danger of contact by the healthful children.

EAST WING.

The dining room, chapel and detail hall are inadequate, and do not any longer serve the purpose for which they are used. The dining rooms are too small by far, and the crowded conditions of the rooms and tables when the inmates are at their meals, render any service they may require at the table almost impossible.

CHAPEL

is a misnomer for the room used as a sanctuary. It is an uninviting apartment, having formerly been an upper room in a shop building, and is devoid of every appearance of a place of worship. It is doubtful if even the Puritans would have worshipped in it in its present uncomfortable and cheerless condition.

DETAIL HALL.

The apartment used as a detail hall is a long, dark passage-way in the basement of the main building, where the boys form in line to be detailed to their studies and various duties. It is necessary to have lamps burning, unless the day is exceptionally bright, in order to see what is being done. In former years the boys were detailed in the open air—forced to stand in line in the yard until assigned their places. This required time and patience. In inclement weather the children, as well as the officers in charge, were exposed to the elements, and ran the risk of contracting serious illnesses. To obviate this exposure the present arrangement was made, as a *dernier resort*, to have the children under shelter during the detail hour. There is much needed relief required in these three departments; and the plan which suggests itself as the most inexpensive would be to erect these most necessary improvements under one roof, and let them constitute an *east wing* to the main building—two stories and basement; the upper story to be used for a chapel, the lower story to be used for a kitchen and dining room, and basement to be used for detail hall. Size of building, 50x80.

ROOF MAIN BUILDING.

At the last session of the Legislature, \$2,000 was appropriated for the purpose of changing the mansard roof on the main building, it being deemed insecure. Upon further reflection and examination it was found that \$2,000 was not sufficient for that purpose, and it was deemed advisable by the Board of Trustees to take the advice of the Hon. R. S. Finkbine as to changing or strengthening the roof. He examined it and made report, which is as follows:

HON. W. J. MOIR—At the request of your Board I made an examination of the roof of the main building of the Reform School at Eldora. In my judgment you would detract much from the appearance of your building by taking off the mansard story and lowering your roof. It would give the building a squatty look. I presume your object in making the change is to make your building secure. This can be attained by strengthening the roof framing as it now is, at less than one-third of the cost of removing the mansard and putting on a new roof. I would recommend putting in new ceiling joist on the central post and at the corners, of 2x10 joists, well bridged, spiking them to the roof-framing and together on the corridor walls, and filling in brick to the top of the joist. Complete the studding of the rooms next to the sloping part of the roof, bridging and bracing them thoroughly, and board them up from floor to deck post of roof with good, sound ship lapboards. Make the returns to the dormer windows in the same way, anchoring the brick work of the dormers well to this framing; spike pieces of 1x6 from the foot of the mansard rafter to the vertical studding, and at the centre of the rafter to the studding; truss your deck rafters to the ceiling joist in the same way by 1x6 stuff. By doing as above indicated you will make your mansard roof entirely secure. The trouble with it is not that it is a mansard roof, or that the building is high, but that all the work above the upper floor line was done in the poorest and most "shoddy" way possible, not having half enough timber in, and not being completed.

Respectfully yours,

R. S. FINKBINE.

Adopting the advice of Mr. Finkbine, the Board of Trustees have ordered that steps be taken, as soon as practicable, to strengthen the said roof in conformity with the suggestions made in the said report.

SUNDAY SUITS.

An appropriation of twelve hundred (\$1,200) dollars was made for Sunday suits for the boys. The cloth was purchased and the suits made by the inmates who are working in the tailor shop. They are

made of blue cloth, trimmed with brass buttons, and are much the style of the regulation suits of the military cadet.

CONTINGENT AND REPAIR FUND.

A portion of this fund is still in the hands of the Treasurer, but the entire three thousand (\$3,000) dollars appropriated will have been expended for repairs before another appropriation can be reached.

FENCE FUND.

One hundred and fifty (\$150) dollars were appropriated for a fence in front of the school grounds. This amount has been expended as designated, and the result is a handsome fence across the entire front grounds, adding much to the pleasing appearance of the place and enhancing the general effect.

FUND FOR FENCING PASTURE LANDS.

Since our last biennial report there has been two hundred and forty acres of pasture land fenced, making it secure from the incursions of roaming stock. The four hundred (\$400) dollars appropriated for this purpose have been expended.

FUND FOR EFFECTING CHANGE OF LAND.

There is an unexpended balance of twenty dollars and fifty cents (\$20.50) of this fund, which we ask to have transferred to the fence fund.

ENGINE AND STEAM HEATING FUND.

This fund is not all expended at the present time. There is a balance of \$976.76 remaining in the hands of the Treasurer of the Board of Trustees, which will be applied to putting in some much needed heating apparatus. The steam heating of this department is not as successful as that of the Girls' Department. The machinery is not so new, or perfect, and the steam supply is inadequate to properly heat the building in which it is consumed. This difficulty could be overcome, in a large measure, by introducing steam through the entire Institution instead of heating it, as is now done, partially by steam and partially by stoves.

APPROPRIATIONS ASKED FOR (BOY'S DEPARTMENT).

The Trustees knowing the great benefit this Institution is to the State, and the wonderful work it is effecting for good, feel justified in asking for the following appropriations to further the work of reform and moral elevation among its less fortunate children, and the pressing need of enlarged capacities to carry out this work successfully:

For east wing to main building, including chapel, dining hall, kitchen and detail hall ..	\$ 27,000
For steam heating for wing.....	3,500
For contingent and repair fund.....	4,000
For laundry machinery.....	700
For cooking range.....	300
For two steam kettles.....	300
For rotary bake oven.....	650
For furnishing chapel.....	550
For chaplain's fund	500
For library	500
For salaries for officers for two years.....	20,000

For the financial condition of both departments on the 30th day of June, A. D. 1885, we respectfully refer to the report of W. J. Moir, treasurer, with this explanation, that where it appears in some of the funds that the Treasurer has overpaid, that a portion of the appropriation still remains undrawn in the State treasury.

SEVENTH BIENNIAL REPORT OF THE GIRLS' DEPARTMENT.

The object of this Institution has so often been set forth, in former reports to your Excellency, that we will dwell only on such topics as are less familiar and of general public interest. In looking through the reports of various State reformatories, where boys and girls are confined under the same auspices, it is a noticeable fact that the report of the Girls' Department is always circumscribed. This is due, no doubt, to the excess of boys in point of number in the reformatories, as compared with the girls, thus claiming more attention and necessitating larger appropriations for their maintenance. Granting this, the necessities of the Girls' Department demand the same recognition and serious consideration as do those of the boys. It is a fact worthy of attention that the progress made in our country in late years by the girls in all the arts and sciences has so impinged upon that made by the boys that the avenues of labor are no longer closed to them. The females of this epoch have an equal opportunity with the males, and if properly directed in their labors and co-education, make just as skilled artisans and successful teachers. The time is in the near future—is now—when sex will not be taken into consideration when an application is made for a situation. Every avenue of labor is open to each alike; every profession reaches out its treasures to them, and every classical college, with rare exception, has opened its doors to them without distinction. The "open sesame" of life is permitted to girls of this age that a few years since was denied the most educated and enlightened of women.

In the Iowa Industrial School the same discipline and the same method of teaching is observed in each department, and every possible means employed alike, to subserve their best interest and comfort.

NEW MATRON.

By the death of Mrs. Angie Lewelling, the necessity was created for appointing a new Matron, which was done by appointing Miss Mary Marshall to fill the vacancy. Miss Marshall has been connected

with the School for over five years, and the Board of Trustees considered it the part of wisdom to appoint a person to this position who was familiar with the work of the Institution. In the death of Mrs. Lewelling, the school has lost an invaluable officer, the State one of its most faithful and efficient servants, and the children of this Department a friend whose virtues they can emulate, and the Board of Trustees a most worthy co-laborer.

EMPLOYMENT OF INMATES.

There are at this date, June 30, 1885, one hundred inmates in this Department. The older, and in many particulars, most objectionable girls have been graded out of the school, either from having obtained their majority or were considered sufficiently reformed to be again intrusted to their parents or guardians. It is to be regretted some have not proven themselves reformed, but so far as we can ascertain the larger number of discharged girls are leading virtuous and useful lives. By sending out these older girls, those remaining are more evenly graded in age, size, degree of criminality, and intellectual capacity. We do not claim *entire* reformation for all the girls who leave the Institution, but are conscious the good work done will influence them to lead better lives, and that the seed sown amongst them has not "all fallen on barren ground."

Each day the inmates are detailed to work, the house being so divided that every child is in school one half the day, and the older ones are engaged in some domestic employment the other half. The inmates are required to perform the ordinary household duties, and each girl is confined for three months to one occupation, that she may be qualified to discharge her duty satisfactorily in every branch of domestic economy. The routine of housework is sometimes onerous, and in order to relieve the monotony, sewing, fancy work, fancy knitting by hand, and some of the lighter accomplishments are taught. If there could also be introduced into this Department some of the lighter mechanical arts, of which the inmates could acquire sufficient knowledge to earn their living, many of these young girls could render themselves self-supporting by some other employment than housework.

EDUCATION.

The advancement some of these children have made in the school-room is phenomenal. Girls and boys who were entirely unlettered when entering the school are now experts in mental arithmetic, spelling, reading and those branches taught in our graded schools. Many of these children had never been in a school of any kind until committed to this Institution. It was a revelation to them.

The moral atmosphere surrounding them is so different from any thing they have ever known before. They submit with cheerfulness to the rules, regulations, and discipline of the school. "A few months of physical cleanliness; a few months systematic training in habits of industry; a few months absolute subordination of their own wills to the dictates of sound moral sense, in surroundings which have no association with the scenes they have left, and where the language they used, even the thoughts they breathed as a matter of course, in those scenes, are in these, among things forbidden—will work a marvelous change in many instances."

CHAPLAIN FUND.

The last General Assembly failed to make any appropriation for a chaplain fund for this department. The boys department had a small surplus fund with which to defray the expense of their religious services, whilst the girls have had to depend upon gratuitous services given by some minister of the State, or, upon such services as the Superintendent could offer them. It seems an imperative duty to urge upon the Assembly the necessity of an appropriation for this purpose. The youth in this Institution are at that tender age when religious impressions are received and retained, in most cases, through life. Early religious education is essential in every walk of life, but especially is it necessary for those young children who have been, in this respect, entirely neglected at home, whose religious sentiments have never been stimulated by either precept or example, and who have never known the strength of the invitation, "suffer little children to come unto me".

Our State certainly has religious enthusiasm enough to furnish her wards the teachings of the gospel, and the "word without money and without price."

It cannot reasonably be expected that, out of their poverty, the

clergy of the State can give their time and talent to the State wards without any financial remuneration, and it is earnestly hoped the appropriation we ask for this purpose will be granted.

PURCHASE OF LAND.

The necessity for the purchase of another eighty (80) acres of land, has been rendered imperative by the fact that complaint has been made against the overflow of the sewerage of the Institution. By the purchase of the land adjoining, we would be relieved of all further trouble in this direction, as there is a good running stream on the land we wish to purchase that would carry off all the sewerage. Of course it would not be necessary to purchase so large a tract for this purpose only, but the owner of the land declines to sell, unless the entire tract is taken. Besides this fact, the needs of the Institution require more land. We now have one hundred girls in the Institution, and milk and butter should be staple articles of food, but we only have twelve cows, and not sufficient land for their support.

FAMILY BUILDINGS.

One of the greatest needs of this department will be another family building. The \$11,000 appropriated by the last General Assembly for erecting and furnishing a family building, will be consumed before another appropriation can be reached.

This building will be completed and occupied by the early fall. After mature deliberation the cottage plan for this building was accepted. It is the experience of older institutions that the cottage plan subserves the wants of an Institution more perfectly than any that has been adopted. It brings the children more immediately under the home influences of the Institution, and teaches them those household duties that can only be acquired by coming in direct contact with them. Those duties taught *only* by experience and observation—not by *proxy*. "For the attainment of the greatest good, and to enable the reforming, elevating spirit of the officers to influence the children," they should be brought into the closest possible association, which can only be effected by the cottage plan of family management, and never successfully by the congregate. There are too many obstacles to overcome, too many interruptions, both for teacher and pupil, to effect much good when so many are thrown together.

"The delinquent child must be regarded and treated as one morally diseased, needing in a certain sense the same attention that is given by the physician to his sick patient. Its condition must be studied and watched at every stage of its progress, and classification effected from time to time so as to reach the best results."

The appropriation asked for the next building will be in excess of that granted for the present one by about one thousand (\$1,000) dollars. In the plan adopted we have been compelled, in order to build within the appropriation, to dispense with many conveniences, not to say necessary additions. It was the intention to make this a model for all subsequent buildings, but owing to the smallness of the appropriation the basement was dispensed with, which will be needed as a store room, and should contain a play room for the smaller children in inclement weather.

In selecting a plan for this building the Board of Trustees used every means in their power to guard against all danger from fire in its construction, and have introduced an extra stairway as a means of escape from the upper floor should such an emergency arise.

The congregate system of dormitories is now regarded at detrimental alike to health and morals, and in the construction of the new building individual sleeping apartments will be built. All public charities are introducing in their modern building the cell bed rooms as more conducive to health, tidiness of surroundings and general convenience.

LAUNDEY.

The incompleteness of this department in its proper appliances for carrying on its work, is observable to any one who visits it. The family in this department of the Institution has grown to such proportions that "washing by hand" is a task too great for contemplation, much less essaying. The absence of stationary washing tubs necessitates much unnecessary lifting and carrying of water, and also exposes these young girls, who are still growing, and many of them not robust, to the consequent physical ailments generally following such over-exertion. It is particularly essential an appropriation should be made to furnish the laundry with proper machinery for executing all work in this line in the most approved style. Aside from the advantage it will be in a healthful respect to the inmates, that accruing to the State should also be considered. The Industrial School for Girls at Milwaukee has an income of over twelve hundred

dollars per annum from their laundry and sewing-room work. The work is accomplished by the inmates, and is ordered from the city. As the girls' department of the Iowa Industrial School is situated so near the capitol city we doubt not much work could be procured were there better facilities for executing it, and the laundry be made almost if not entirely self-supporting, and we will add here that plain sewing could also be made remunerative.

CONTINGENT AND REPAIR FUND.

We cannot too strongly urge upon you the importance of a generous contingent and repair fund for this department. The main building must certainly receive attention before the Legislature convenes again or suffer serious damage from the elements. Appropriations have been repeatedly asked for this purpose, but we have been granted only the most meagre sums, barely sufficient to meet such exigents as are constantly arising; and this building has been necessarily neglected. It should be thoroughly painted. The interior has already suffered to considerable extent on account of the leaking roof, which should be at once renewed, and the building thoroughly painted inside and out. The necessity of a contingent fund is apparent to all. Many contingents arise in which money is needed, and for which no appropriation has been made. As an example: at the present time, and for a number of months past, one hundred girls bathe once a week in the ordinary wash-tubs used in the laundry. Iron bath-tubs would cost, perhaps, \$25 each, with the necessary plumbing, and yet they cannot be purchased unless we have a fund upon which we can draw to pay for them, as we are strictly prohibited by law from using funds which have been appropriated for other purposes.

LIBRARY FUND.

There is a balance of \$201.50 of this fund yet unexpended, which will be invested in books and periodicals as soon as the Superintendent thinks proper. The room now used as a library is being more comfortably arranged, and when fitted especially for library purposes will be inviting and restful.

FRUIT AND ORNAMENTAL TREES.

The fifty dollars (\$50.00) appropriated for the purchase of trees and small fruits, have been expended, and the result is scarcely perceptible. There should be more attention paid to the growing of trees and fruits. It should not be overlooked that the trees are an adornment to the place, and fruit culture an industry that can be pursued by girls as well as by boys.

COW-STABLE AND OUT-BUILDINGS.

With the one thousand dollars (\$1,000) appropriated as a fund to build cow stable and out-buildings, it was decided to erect wings to the old barn, and place a substantial stone foundation under the whole structure. This was done, and the building now measures forty by seventy-eight feet, accommodating six horses, fourteen cows, and providing carriage house, and an abundance of room for storing hay, grain, etc. This barn, as now arranged, will answer for many years to come all demands of this department for stable and barn accommodations.

WATER SUPPLY.

The most vexatious question of this department is the water supply. At the Boys' Department the supply of pure water is limitless, whilst here the want of it has at times almost produced a water famine. The appropriation of \$1,500 for a water fund has almost been exhausted, and yet the problem how water will be obtained, in sufficient quantities, for the needs of the Institution, is not solved. Boreings in two places have been made for water, in one of which water was reached at a depth of one hundred and forty feet, but not in a sufficient quantity to supply the necessity. After digging fifty feet and boring the remaining ninety feet, most excellent drinking water was obtained, which rises slowly in the well, a depth of ten feet. Finding this supply exhausted at the close of each day, as a final resort the reservoir system was adopted, by draining the surrounding land into a small, natural basin that lies just east of the officers' building. This promises an abundant supply of water for all household purposes, excepting cooking. If this reservoir must be depended on for a continuous supply of water, then the basin must be enlarged and the bottom laid with rip rap, and a wall of shale or stone added, to prevent any washing of the sides. To accomplish this will involve

an outlay of at least two thousand dollars (\$2,000). This cost would probably be less than to bore for an artesian well. It can be demonstrated that the only practical solution of the water problem, in this case, will be the reservoir system. By this an unlimited supply of soft water can be obtained, and experimental well digging and boring abolished.

STEAM SUPPLY.

The steam heating of this department is as near perfection, in its results, as such a system can be made. We are convinced that by this system of heating there is great economy, as from one central boiler house all buildings are heated, and steam is supplied for cooking and laundry purposes, and also furnishing hot water where it is needed.

ORDINARY FUND.

For many years past there has not been an appropriation for replenishing furniture. Whenever a chair, table, clock or carpet is purchased, the purchase price of the articles is taken from the support fund, which means just so much food and clothing taken from the children.

Ten dollars per month is not an exorbitant amount with which to furnish every necessary of life for one individual, and whenever any article is purchased and paid for, from the support fund, this amount must be deducted from the bread and butter supply of the children, which means every comfort these children have.

There should be some provision by which each department could have an independent fund which could be used to pay salaries, purchase furniture, replenish school desks, carpets, chairs, etc.

The Visiting Committee appointed by the last General Assembly recommended the advisability of such a fund, and its necessity can not be too strongly urged.

TO PAY THE TREASURER.

It is also desired that the Treasurer of the Board of Trustees shall receive some compensation for his services. He has been connected with the School for the past thirteen years, and in his position as Treasurer has never received the slightest remuneration. His duties are onerous and responsible, much of his time must be devoted to

the business of the Institution, thus detracting from his individual interests, and it is not asking too much of the State, to recognize the value of his services by paying him at least a nominal salary.

APPROPRIATION ASKED FOR GIRLS' DEPARTMENT.

New family building and heating the same.....	\$ 12,000.00
Furnishing same.....	1,000.00
Contingent fund.....	2,000.00

Bath tubs and plumbing.....	350.00
Purchase of 80 acres of land.....	4,000.00

THE STATE INDUSTRIAL SCHOOL,

under its present management, is in a most encouraging degree successful and effective in all its work. There is not any manifest reason why it should not continue in. And in its present prosperous condition has become one of the foremost charities of the State. The commonwealth of Iowa is to be congratulated that it has such efficient superintendents at the head of this Institution, and did the tax-payers and citizens of the State generally exhibit more zeal in visiting the School and familiarizing themselves with its workings and management, many erroneous impressions would be removed, when they would see the green fields, and open doors, the freedom to come in, and go out, the unrestricted intimacy existing between teacher and pupil, and the home atmosphere that pervades the entire Institution, the idea of its being a prison with barred doors, and harsh discipline, would give place to the truth, that it is a *home* for unfortunate children, where kind encouragement inspires them to exert every energy to become better, and to realize that "everybodys' hand is not against them, or theirs against everybody."

It is an open secret that almost without exception, State Institutions ask for appropriations largely in excess of their needs, feeling

that an economic administration of the finances of the State will not grant the requests, and reduce the amount to a proper minimum. The Industrial School has avoided as much as possible asking excessive appropriations, appreciating the onerous burden imposed on the tax-payers to support so many public charities. The estimates for this Institution are made as closely as possible, and what we ask is only sufficient for our support and maintenance.

Trusting the next General Assembly will appreciate the efforts made in behalf of this Institution by former legislative bodies and grant the appropriations asked, we respectfully submit this report.

NINTH BIENNIAL REPORT
OF THE
SUPERINTENDENT
OF THE
BOYS' DEPARTMENT.

REPORT OF SUPERINTENDENT OF BOY'S DEPARTMENT.

To the Board of Trustees:

I have the honor to present to you the following as the Ninth Biennial Report of the Boy's Department of Iowa Industrial School:

STATISTICS.

TABLE I.

Whole number of boys committed to the School since its opening, September 21, 1883, to June 30, 1885	1,095
Number discharged and otherwise released from the School	805
Number remaining in School June 30, 1885.	290

TABLE II.

Number of boys in School July 1, 1883.	240
Number received from July 1, 1883 to June 30, 1885.	168
Whole number in School for the two years.	408
Number released by Board of Trustees.	97
Number pardoned by Governor.	2
Number escaped.	9
Number died.	6
Number released on writ of habeas corpus.	4
Whole number released, pardoned, died and escaped.	118
Increase for the two years.	50
Whole number in School June 30, 1885.	290
Average age of those received for two years.	13½
Average age of boys in School June 30, 1885.	1

TABLE III.

Showing number of commitments each month.

1,300 bunches radishes, at 2 cents	26.00
200 gallon rhubarb, at 10 cents	20.00
73 buckets spinach, at 10 cents	7.30
140 Hubbard squash, at 3 cents	4.20
50 bushels sweet potatoes, at 50 cents	25.00
250 bushels tomatoes, at 50 cents	125.00
154 bushels turnips, at 25 cents	38.50
300 quarts raspberries, at 5 cents	15.00
200 quarts currants, at 5 cents	10.00

Total \$ 1,787.60

Very respectfully submitted,
WILLIAM CRAWFORD, *Gardener.*

FARMER'S REPORT.

To the Superintendent of Iowa Industrial School:

Herewith I hand you report of products of farm for two years, 1883 and 1884; being simply a statement of the products grown on the farm:

FOR YEAR 1883.

Corn.....	3,100 bushels.
Oats.....	1,052 bushels.
White beans.....	225 bushels.
Potatoes.....	1,300 bushels.
Hay.....	230 tons.
Broom corn.....	1 ton.

FOR YEAR 1884.

Corn.....	4,500 bushels.
Oats.....	1,300 bushels.
Potatoes.....	1,000 bushels.
White beans.....	135 bushels.
Hay.....	250 tons.
Broom corn.....	3 tons.

All of which is respectfully submitted.

J. S. SHAFFER, *Farmer.*

THE FARM ACCOUNT.

The following account is designed to show approximately the financial relation which the farm sustains to the Institution. If there was no revenue derived from it we would still insist that it would be a necessary adjunct to a reformatory institution. No branch of industry is more congenial and healthful to the growing boy than the farm and garden. We have tried to make a fair estimate of the income on account of the farm, and have surely not overrated anything, and some items are rated very low, as for instance, milk at ten cents per gallon. The grain and hay raised on farm are not credited to farm account, for they are consumed by stock, and farm gets credit for stock sold and used and use of teams in hauling. We credit farm account with only such grading and hauling done by farm teams as would have to be hired if done in case we had no farm and farm teams. The broom corn we make into brooms for home use.

MONEY PAID OUT ON ACCOUNT OF FARM.

To salary of farmer for 24 months, at \$30	\$ 720.00
To salary of gardener for 24 months, at \$30	720.00
To one span mules	250.00
To one thoroughbred bull.....	100.00
To one thoroughbred boar	25.00
To four farm wagons, at \$45	180.00
To one pair light bobs.....	65.00
To fencing lumber	175.00
To barb wire	75.00
To fence posts.....	100.00
To harness	100.00
To corn plow... ..	22.00
To stirring plow.....	16.00
To putting up hay scales.....	25.00
To repairs on wagons, farming implements, garden tools, shoeing horses, all kinds of blacksmithing, farm and garden tools, and all incidental expenses of the farm for two years	1,234.00
To balance profit on farm.....	6,271.16

\$ 10,078.06

RECEIVED BY SCHOOL ON ACCOUNT OF FARM.

By stock sold.....	\$ 793.06
By hay sold	11.25
By sand sold.....	2.25
By 38 head hogs butchered, 14,350 pounds, at 4 cents.....	574.00
By 5 head cattle slaughtered, 5,580 pounds, at 3 cents	166.40
By 350 bushels white beans, at \$1.50.....	540.00
By 2,300 bushels potatoes, at 40 cents.....	920.00
By broom corn, 4 tons, at \$50.....	200.00
By hauling 1,350 tons coal from depot, at 50 cents	625.00

The foregoing statistical tables are approximately correct. In some instances it is impossible to get positive information in making the statistics, as the boy himself does not always know his age, nativity, parentage, etc.

The funds coming into my hands have been paid out as per the "financial statement," and no debts are outstanding. But more money could be used to good advantage in the better support of the School.

HEALTH.

The health of the boys has been generally good. Last winter mumps were epidemic for a few weeks among the boys, but with no serious results. There has been during the two years six deaths, one from an accident, one from meningitis, two from pneumonia, and two from consumption. The mortality is small, when we take into consideration that our population is nearly three hundred.

SCHOOLS.

The progress and improvement in our schools has been very marked. Each grade has been supplied with all necessary appliances and presided over by a first class teacher. Any one to appreciate what has been done, in this particular line of work, must be familiar with the class of humanity that we have for pupils, and the degree of their illiteracy, when they are sent to us.

Many of the boys cannot read nor write when they come here. They are immediately put into school and required to attend regularly. This, to them, is at first irksome, but they soon fall in with the ways of the school and become interested, and make very commendable progress in their studies.

These boys, left to themselves and their surroundings at home, would remain illiterate. Some plan, therefore, for their education that is farther reaching than our public school system must be brought to bear on them, or their education is not accomplished. Such a plan we have here, inasmuch as a prompt attendance every day on one of our school grades is positively required.

The moral improvement and work of the two years has been quite satisfactory. The number of escapes has been less in proportion to the population than any preceding biennial period. There has been a cheerful obedience to the rules and regulations of the Institution on the part of most of the boys, and the tasks and duties required of

them quite willingly performed; all of which is good evidence of the moral reform which we hope to bring about in the lives and character of all the boys who are intrusted to our care.

Not all the boys do well while here, and some of them leave the Institution after being here two, three or four years, to do worse than before they came. These belong to the "criminal class," who have an hereditary predisposition to crime. They soon get into the penitentiary, and their career is pointed to as an evidence of the failure of this Institution to do its work. This judgment is wrong, for where there is one boy who goes the "crime class road," there are five who make good law-abiding men. The mistaken judgment comes from the fact that the "five" who move along quietly in the common avocations of life are overlooked by those rendering judgment. We are frequently in receipt of letters from boys who are full of gratitude for what the Institution has done for them. They say they find a much more pleasant way of life in the quiet, honest pursuit of the avocation or trade which they learned while here, than they formerly knew in their ways of idleness and crime.

There has been the past winter a remarkable religious experience among the boys, some seventy-five of them having professed conversion. Revs. Thomas Simmons and E. Adams, of Eldora, have been largely instrumental in this work of grace. They have preached regularly here, with but little pay or reward other than the consciousness of having performed what they have regarded as one of their duties. We hope you will see fit to ask the Legislature to make an appropriation for such services for the coming two years. There are great possibilities in this child-saving business, and we believe that any investment made in this line will not have been done in vain.

THE MANUAL WORK OF THE TWO YEARS.

The manual work of the period has been none the less satisfactory. We have finished grading the front yard; built an ornamental fence in front of the grounds; made 1,160 rods of farm fence; laid 7,000 feet tile drain; built a mile of gravel road; planted out two hundred forest trees, twenty-five ornamental trees, two hundred fruit trees and six acres of willow grove; have hauled the lumber, brick, lime, sand and stone for the two buildings that have been erected, and done our ordinary farm, garden and shop work. The farm and garden work is a great blessing to the boys, for they need and enjoy just

such work; and, while it is pleasant and healthful, it is also quite profitable, as may be seen by reference to the gardener's report and farm account.

NEEDS OF THE SCHOOL.

The first and greatest want is more dining-hall room, and next to that is a commodious chapel room. Then we need a liberal repair and contingent fund, a chaplain fund, a library fund, and an amount sufficient to steam-heat this dining-hall and chapel when they shall have been built. We need, also, a new bake oven, and I would recommend a rotary oven. The first cost is a little more, but they are the cheaper in the end, as they are more economical in the use of fuel. It would cost about \$700. We will need an appropriation to seat the new chapel room, when it is built. A few hundred dollars to get some laundry machinery and about six or seven hundred dollars to purchase a new cooking range and some steam cooking apparatus. These seem to be the imperative wants for the present. But I think the time is not far distant when the entire Institution should be heated by steam from one common center.

The buildings, now seven in number, are very advantageously located for heating them from one common fire. Many advantages would be derived from such a system of heating, among which we might mention an even healthful temperature, cleanliness and convenience. Economy of fuel and a very large decrease of the chances for the destruction of property and life by fire. With these suggestions I leave the matter with you to determine the time when it would be expedient to ask for an appropriation to make such an improvement.

IN CONCLUSION.

I wish to say that the past two years has marked a period of very general prosperity for the Institution. A kind Providence has strengthened our hands and hearts in lifting up the fallen. He has raised up numerous friends whose voices are heard in our behalf. He has added His blessing to our labors in tilling the soil that our fields have yielded bountifully, for all of which our hearts go out to Him in praise and gratitude.

Only one cloud seems to hover in the wake of the closing period. Under its deep shadow, last winter we were called to mourn the loss of our sister, the matron of the Girls' Department. She has gone to

her rest, and we know not why, so young in years. But the good works of her noble life lives after her to do us good and encourage us in our efforts to rescue the perishing.

We are very thankful to the clergy of Eldora for their kindness in rendering gratuitous services, and to many friends throughout the State who have sent us boxes of papers and books for distribution among the boys, and to the publishers of the Des Moines Register, Eldora Herald, Eldora Ledger, Trade News, Iowa Falls Sentinel, Muscatine Journal, Marengo Republican, Mt. Pleasant Journal, Vinton Eagle, Marshall Times-Republican, Marshall Statesman, Marshalltown Electric Light, Mitchell Republican, Mitchell D. T., and the Deaf Mute Hawkeye, for their kindness in sending us their papers. We enjoy and are very grateful for the kindly and favorable mention that has been made of our work by the press of the State.

We are under special obligations to the newspapers and good people of Hardin county for their good will and hearty co-operation.

In closing, I wish to express our appreciation of the faithful services rendered by the Assistant Superintendent, the Assistant Matron, the teachers, and all of our co-workers who are associated with us here in the daily and hourly care of the School, and to you, Mrs. Hall and gentlemen of the Board of Trustees, I am very grateful for your uniform kindness, for your wise and timely counsel, and for your continued confidence in my good wife and myself as your Superintendent and Matron. Trusting that we shall continue to merit your confidence and have your counsel, and with the hope that God shall add His blessings, this report is

Very respectfully submitted.

B. J. MILES,
Superintendent.

SEVENTH BIENNIAL REPORT
OF THE
SUPERINTENDENT
OF THE
GIRLS' DEPARTMENT.

SUPERINTENDENT'S REPORT.

To the Honorable Board of Trustees of the Iowa Industrial School:

MRS. HALL AND GENTLEMEN—The labors of another biennial term of this department have closed. Its years have brought to this household much labor, some joys, and the greatest of earthly sorrow. I do not desire, in this report, to awaken emotions which seem to me too sacred for so formal a paper, but it is, perhaps, fitting that I should pay brief tribute to the exalted character of the late matron, my dearly loved wife. Her soul was so full of tenderness and pity that she yielded up her sweet life in motherly devotion to the best interests of the unfortunate children of the State. She was taken from our midst in the early prime of womanhood, but the fragrance of her sweet life still lives like the perfume of some lovely flower, crushed while in fullest bloom.

More than husband and children could desire, as the best and truest wife and mother, she yet had much to give to the poor in spirit from other households.

Many humble lives have been pervaded by the influence of her exalted character, and the full measure of her great soul-wealth can never be known, until those whom she has won to a better life shall be numbered by the stars in the crown of her rejoicing.

	\$21,187.78

SOURCES OF RECEIPTS.

The receipts for the biennial term are as follows:

Balance on hand	\$ 65.55
State warrants	31,074.20
Stock and produce sold	159.22
Interest on warrants	9.99
	\$ 31,302.56
Total receipts for the biennial term	31,302.56
Total expenditures for biennial term	21,187.78
Cash balance on hands July 1, 1885	\$ 114.78

IMPROVEMENTS.

It is a pleasure to refer to the improvements which we have been able to make with the appropriations provided for this department by the last legislature. All the buildings of the Institution are now heated by steam from a central boiler house, and every nook and corner may be warmed in the coldest weather, with moderate pressure, and at less expense than the same surface was formerly heated by stoves and furnaces.

The boiler house erected during the last term, is a substantial brick building, with an excellent stone foundation ten feet below the surface of the ground, thus enabling us to set the boiler low and secure a good fall for the return of the condensed steam. In the top of this boiler house, we have a tank which holds one hundred barrels of water, and this tank is supplied by the steam pump in the basement of the boiler house. A hot water tank in conjunction with this, enables us to supply hot and cold water on the first floor of all the buildings. We have also provided through underground pipes, to supply two hydrants, one in the pasture and another at the barn, for watering stock. An additional pipe is already laid to the site of the new family building now in process of construction, and a branch from this supplies a home-made but pretty fountain, the overflow from the fountain returning to the reservoir to be pumped up again. This fountain is directly in front of the new family building, and in the center of the lawn or children's play ground, and it is needless to say that they anticipate great pleasure from it in the future.

A large amount of grading has been done this summer with the school teams, and we have planted out a number of elms and other shade trees so that the place is really becoming beautiful, attracting attention, and eliciting remarks of approval from citizens who frequent our drives in the evening, as well as from visitors from abroad; and with proper care the "Girl's Industrial School" may be made the most beautiful Institution in Iowa.

The money appropriated for cow stable and out buildings, has all been used, and we have now stable room for fourteen or fifteen cows, four horses, an elegant room for vehicles, plenty of grain and feed bins, and a most elaborate mow for storing hay and straw. I think that it can be truly said, that the appropriations for this Institution have been wisely expended, and in a manner which must reflect great credit upon your honorable body, as well as upon the State itself.

But notwithstanding what has been done, there is much which yet remains; and even now, it is a pressing necessity that we have another family building, to accommodate the children who are rapidly increasing in number. The original building which was purchased from the State should be made the permanent headquarters of the Institution, affording store room, work rooms, office, library and chapel. At present we really have no store rooms at all, neither have we a place where all the girls can assemble and be comfortably seated. But if all the girls were removed from this building into family buildings or homes, we could then seat the present school-room as a chapel, removing the cumbersome school desks, and we should then have a chapel which would be sufficient for all time to come, and abundant room for the other purposes designated. If this idea is carried out in the future, it will add greatly to the appearance, as well as the convenience of the School. The present fine brick building, would then become the main or administrative building, standing at the entrance to the Institution, and the family homes would be ranged in an oblong square to the south. The school-house would stand at the extreme south of the inclosure, opposite the main building, and the boiler in the center of the square, supplying heat, steam for cooking, and also hot and cold water to every building on the premises.

I have given much thought to this plan, and I would respectfully suggest that you authorize some proper person to prepare a sketch or drawing of the plan I have suggested, and if it should meet your approval, it might be very useful hereafter, in determining the location of buildings, so as to insure the best effect, as well as the greatest convenience and economy in building and administration.

It is perhaps unnecessary for me to dwell upon the needs of this department as they are already well understood by you and will doubtless be set forth in your report to the legislature without any suggestion of mine. But I cannot refrain from emphasizing the importance of repairing the present main building. The meagre appropriations for repairs heretofore have scarcely been enough for current demands, and nothing has ever been appropriated for generally improving this building, though it was in great need of a thorough overhauling when first purchased by the State. It will be necessary to have an entire new roof before the legislature convenes again, and if the wood work is not painted before two or three years more

elapse, a number of the window frames will have to be made new, and other parts of the building will sustain much damage from the elements.

ORDINARY FUND.

It is also very important that the legislature provide a special appropriation to meet the ordinary expenses of the Institution, such as house furnishing and the payment of salaries. At the present time we receive an appropriation of one hundred and twenty dollars per annum for each girl, which amounts to two dollars and thirty cents per week; none too much to pay for subsistence alone, and yet from this sum all food and clothing is purchased, all fuel and lights, beds and bedding, house, kitchen, school room and laundry furniture provided, all salaries of all employes paid, and it is plain to be seen that it is insufficient. Of course the salaries must be paid, fuel and lights must be supplied, some furniture must be purchased, and the girls must then be fed and clothed from what is left.

An annual appropriation with which to pay salaries and purchase furniture would greatly relieve the support fund and enable us to improve the "bill of fare" for the girls, as well as the quality of their clothing; both of which items now depend on the fluctuation of the market and the amount paid from the support fund for other purposes.

CONCLUSION.

In conclusion I must express my gratification at the pleasant relations which have so long existed between your honorable body and myself. I believe we have attained a fair measure of success in this peculiar work, and very much is due to the unanimity with which we have labored together. While endeavoring not to shirk the responsibility which pertains to my office, I have sought earnestly to carry out your views and desires in the affairs of the Institution.

In this I have been ably seconded by Miss Mary Marshall, the present matron, and also by the teachers and employes to whom has been entrusted so much that is important in the details of the School.

If our work for the past biennial term meets your approbation, and it is your pleasure that I continue to administer the affairs of this

office I shall enter upon the work of another term with renewed zeal, in the hope that the fruits of our united efforts, may, by God's grace and helpfulness, be increased in great degree.

Respectfully submitted,

Mitchellville, June 30, 1885.

L. D. LEWELLING,
Superintendent.

APPENDIX

TO THE

REPORT OF THE SUPERINTENDENT

OF THE

GIRLS' DEPARTMENT.

APPENDIX.

IS THE SCHOOL DOING ANY GOOD?

We are sometimes asked this question by persons who seem to be in earnest. But those who are familiar with such institutions it may seem superfluous to adduce evidence to show that, when properly conducted, they are a source of great and lasting good to society and a blessing to the children who come under their control. This is the testimony of all philanthropists of modern times.

It is true there are girls sent to this School who make little, if any, progress toward a better life. They are those who come from vicious parentage, from the most unfortunate conditions; from the mire and the clay. They have been conceived in sin and brought forth in iniquity. Their lives are controlled by one overwhelming propensity for self gratification. They are the victims of inherited tendencies, and they cannot be transformed into good citizens. But if such as these are too bad to be reformed, it is still possible that they may be improved by good food and kind influences. If they do not become good citizens they may at least become better animals.

But the chief good which arises from the commitment of such a class is the protection which is thus secured to more innocent girls, by removing the vicious ones from their midst. But there are those in whom there is no innate tendency to vice, or in whom it is only the result of outward causes.

It is this class that the Industrial School can and does save, and the results are beyond question. To give this statement weight, I would publish in this report the names and circumstances of many girls who have graded out of this School, and who are leading upright and industrious lives. But should this be done, the very fact that they have been children of such an institution would forever

shut out all hope of aid or encouragement from those who affect to doubt their possible reformation.

A few weeks ago I received a letter from a girl who was number ten (that is to say, she was the tenth girl committed to the School). She was granted leave of absence as long ago as the year 1874, since which time we have watched her course and been acquainted with her career. She is still doing well, and writes as follows: "I am more than ever determined to do right. * * * I have such a good chance to make something of myself if I only will, and I am going to try my best."

No. 11—Was one of our most vicious girls. Before she attained eleven years of age she had set on fire, and burned, the barn and grain stacks of the gentleman with whom she lived. She was very wayward, was in the School a number of years, and it must be confessed we had little hope of her; but she now has a home with an excellent family, and we learn from the most reliable source that she is leading an industrious, Christian life.

No. 15—Was a very bad girl. Was committed at the age of sixteen, but we have it from the sheriff of the county to which she returned, that she has long since married and is leading a quiet life.

No. 22—Was an Irish girl, from low parents and surroundings. Granted leave several years ago. An affidavit is on file in this office, from an attorney who was requested to visit this girl, in which he states that she is an industrious domestic in the city of Keokuk, that she is well respected, and at last accounts had lived in one family more than a year.

No. 24—Was well spoken of by those who knew of her for many months. We have not heard from her for a long time.

No. 32—Married an industrious young man and makes him an excellent wife. We have visited them at their own home a number of times. They are happy and prosperous.

No. 37—Was a bright and intelligent girl, committed for incorrigibility. We have received many letters, from her, and also from her aunt, who is an excellent woman. At last accounts she was doing well.

No. 38—After her release, lived a long time next door to a gentleman who was a member of the Eighteenth General Assembly. She visits us often, and the gentleman says she is an excellent girl.

No. 43—Was a New York city waif, who came west from the Home for the Friendless. She was committed for larceny. While

in the School she made some reputation for writing poetry, several poems being published in the Mt. Pleasant Journal. We are in frequent communication with her. She has received a legacy, is happily married, and lives in Brooklyn, N. Y.

No. 44—Was committed from the city of Des Moines, for disorderly conduct. Was released on Christmas day, 1876, after being in the School a little over one year. After her release she learned dress-making. She worked near the School for several years, until her eyes became weak, when she obtained work in a private family as a domestic, and has continued ever since. She is faithful and conscientious in her labors, and is highly respected by all who know her.

No. 50—A colored girl who had a bad record. She is married, is an excellent cook, is popular with her friends, honorable in her conduct, and was a paper folder in the last General Assembly.

No. 52—Is a domestic in the city of Des Moines, and often visits the School.

No. 53—A bright girl; married a printer, and has a delightful family of little girls. We are familiar with her record since she left the School, and she is a good wife and mother.

No. 55—Released five years ago; is still working as a domestic in the village where the School is located, and visits us every Sunday.

No. 59—Married a blacksmith, who conducts business for himself. They have one or two children, and live in Mt. Pleasant.

Nos. 36 and 64—Were sisters, colored girls. They are leading quiet and industrious lives in the city of Des Moines.

No. 70—One of our brightest girls; graduated at a female seminary in Illinois, and now lives with her family, and enjoys in a high degree the confidence and respect of the community.

No. 71—This girl is married, and has visited us a number of times. She has one or two children, and is doing well, as shown by affidavits from a prominent attorney in her town.

No. 74—Committed for disorderly conduct at the age of fourteen, has lived in one family a number of years as a domestic, and is much esteemed by her employers.

No. 75—With her husband, is employed in a responsible position in one of the large public institutions of the State, and gives excellent satisfaction.

No. 91—Lives with her husband, who is a merchant in Boulder

City, Colorado. She visited us this summer, with two bright children.

These statements can all be verified by information received from various sources, and there are very many cases not mentioned here which are equally creditable. A number of these here mentioned have very bad records, and one who has surpassed in her attainments many girls of the best families was for a number of months a professional prostitute.

GENERAL INFORMATION.

The Girls' Department of the Iowa Industrial School is located at Mitchellville, Polk county, about seventeen miles east of the city of Des Moines. The buildings occupy one corner of a forty acre tract, and are situated about half a mile from town. They are approached directly through the corner of the farm which lies nearest town. The carriage-way on leaving the street corner passes between two clumps of shade trees into an open blue-grass lawn, through which it gently curves a few rods away to the main building—an elegant and substantial structure—and thence on to the barn. Here the drive branches: one road leading around the vegetable and fruit garden, and the other circling around a shady park between the house and barn, both deflecting roads again returning to the main carriage-way.

The plan of the Institution is an oblong square, the main building fronting the north end of the square, the graded school building at the south end just opposite, while the family homes are arranged along the sides of the square opposite each other. Inside this open square stands the boiler-house, from which pipes are laid so as to supply hot and cold water and steam for heating and cooking to each of the separate buildings.

At present none of these family homes are built. One is in process of construction and will be completed in the fall, but its capacity being only about forty inmates, it will be necessary to keep a large number of girls in the main building a few years longer, or until the Legislature appropriates money to erect another of the family buildings. It is the design that each of these family homes shall provide cooking, dining and sleeping for forty girls.

Each morning after breakfast all the girls will be assembled, half of the entire number sent to school, and the remaining half will go to their respective places of work under competent instructors. At

noon when the bell rings each family will return to its own home for dinner, and after the noon hour they will again be assembled by the ringing of the bell to be detailed as in the morning, except that those who were in school in the forenoon will change places with those who worked. In this manner each girl will receive four hours schooling and four hours instruction in some kind of work each day.

This plan of detailing, so as to change from work to school, and from school to work, has already been practiced for a number of years.

The family buildings will be very convenient for the purposes for which they are designed. The girls in each are accommodated with a large, well ventilated sitting-room, with two open fire-places, and sliding doors opening into a room at one end, which is ordinarily used for a reception room, but which may be quickly converted into a stage for theatricals, such as tableaux, charades, etc. This dining-room and kitchen are also on the first floor, and the girls' bed-rooms on the second and third floors. Here each girl has her own little room, six by ten, with single bed, cabinet wash-stand (which also serves for a bureau), wash-bowl, pitcher and other conveniences. At the ringing of the bell in the morning, each girl is expected to rise, put her room in order and be ready for breakfast at the proper signal, and after breakfast she enters upon the duties of the day.

THE DISCIPLINE

of the School is simple, but effective, and chiefly consists in a system of credit marks for good conduct. The law provides that all girls committed to the Institution may be released on probation after the lapse of one year, provided they show evidence of improvement sufficient to warrant such release.

The degree of improvement is indicated by certain credit marks for good conduct, together with proficiency in work and study. A "credit" consists of the aggregate of good marks obtained at roll-call each evening for one month. Credit twelve is the last and highest which can be obtained, but every girl must obtain credit twelve, and in every way give evidence of real reformation, before she can be released. One hundred marks may be obtained by a girl in one month, but only sixty marks each are necessary to obtain credit one, two, three, four, five, six, seven and eight. Sixty-five marks are required for credit nine, seventy-five for credit ten, eighty-five for credit eleven, and ninety-five for credit twelve.

Leave of absence is granted girls who obtain credit twelve, and they may then be returned to their parents or friends, or good homes will be found for them in private families. There are at present more than one hundred girls in the School, and among this number there are, of course, those who are too well contented with such a home to be stimulated to good conduct by a desire to grade out. For such as these, more severe measures than the loss of credits must at times be resorted to. One of the most severe, and at the same time one of the most harmless methods of discipline is to send a girl to bed for some days in succession, or until she is willing to do better. The credit method is a sufficient restraining influence for most cases, and it is only the few who experience any other punishment during their stay in the School.

TO PARENTS AND FRIENDS.

Every girl is permitted to write one letter each month at the expense of the School. Parents and friends may write to the girls as frequently as they desire, but they should avoid writing in a way to excite or disturb them. They should always give their full name and address in every letter. Parents may visit girls two or three times a year, to remain one day and night only. No visiting allowed on the Sabbath nor on holidays, such as Christmas, New Years and Fourth of July, unless by special arrangement with the Superintendent. All visits should be of an encouraging nature, and if parents desire their girls to improve under the influence of the School, they should admonish them to be obedient to their teachers, to be diligent and studious, and above all, they should convince them that there is no hope of release from the School except by real reformation, by obedience, and by advancement in their work and studies. All inquiries as to the time of girls coming home should be addressed to the Superintendent.

When girls are entitled to leave of absence, notice will be given, and on receipt of money to pay railroad fare, they will be forwarded to their parents.

Be sure to address all letters and parcels plainly, and in care of Industrial School, Mitchellville, Polk county, Iowa.

HOW CHILDREN ARE COMMITTED.

We often receive letters from parents or friends asking what legal process is required to send girls to this School. In reply, we would say all that is necessary to be done is to make formal complaint to any judge in your district of the child's conduct. This may be done in open court, at the private residence of the judge, or elsewhere, provided he is willing. It then becomes his duty to hear the evidence in the case; and if in his judgment the complaint is sustained by the evidence in the case, he may issue a writ commanding the sheriff of the county to deliver the child to the Superintendent of the Industrial School.

□ Complaint may also be made before a justice of the peace; but he cannot commit the child. He can only hear the evidence in the case, and forward it to the judge, who, if he may think best, will issue the order for commitment upon the written evidence submitted to him by the justice of the peace. For further information on the subject, see chapter five of the Code of 1873.

REPORT OF W. J. MOIR, TREASURER.

REPORT OF W. J. MOIR, TREASURER.

HON. JOHN A. PARVIN, *President of the Board of Directors of the Iowa Industrial School:*

DEAR SIR—I herewith present my report as Treasurer of said School from July 1, 1883, to June 30, 1885, inclusive.

W. J. MOIR, *Treasurer, in account with the Iowa Industrial School:*
