

SIXTH BIENNIAL REPORT

OF THE

Trustees, Superintendent and Treasurer

OF THE

Iowa Institution for Feeble-Minded Children

AT GLENWOOD.

PRINTED BY ORDER OF THE GENERAL ASSEMBLY.

DES MOINES:
GEO. E. ROBERTS, STATE PRINTER.
1887.

IOWA INSTITUTION
FOR FEEBLE-MINDED CHILDREN,
GLENWOOD, IOWA, August 15, 1885. }

To his Excellency, WILLIAM LARRABEE, Governor of Iowa:

SIR—With pleasure I herewith transmit a copy of the Sixth Biennial Report of this Institution for the use of yourself, and the General Assembly.

I have the honor to be,

Very respectfully,

F. M. POWELL,

Sec'y Board of Trustees.

OFFICERS OF THE INSTITUTION.

TRUSTEES:

HON. W. H. HALL, PRESIDENT, OSCEOLA.
E. R. S. WOODROW, TREASURER, GLENWOOD.
HON. A. H. LAWRENCE, LEMARS.

SECRETARY:
F. M. POWELL.

RESIDENT OFFICERS:

F. M. POWELL, M. D., SUPERINTENDENT.
A. S. BURTT, M. D., ASSIST. PHYSICIAN.

TEACHERS:

MISS ELLA FRAZEE.
MISS NELLIE HUNTOON.
MISS MATTIE MCLEAN.
MRS. HATTIE FULLER.
MISS MATTIE E. CLIFT.
MISS A. L. McGREW.
A. B. WORRALL.

MATRON:
MRS. L. M. POWELL.

ASSISTANT MATRON:
MISS EMMA BROWN.

CLERK:
T. Q. RECORDS.

DEPARTMENT MANAGERS:

Boys' Department.....	P. G. IBACH.
Girls' Department.....	MISS L. ROBINSON.
Hospital Department.....	MISS MARY SLACK.
Kitchen Department	MISS SUE ANDERSON.
Farm and Garden Department.....	JAMES MILLER.
Engineers' Department.....	D. K. DONELLY.

TRUSTEES' REPORT.

To his Excellency, GOVERNOR LARRABEE, and the General Assembly:

In communicating the Sixth Biennial Report, the Trustees note with pleasure the prosperous condition of the Institution, with requests for your consideration of the detailed statements in the Superintendent's and Treasurer's reports herewith appended.

We have observed that, while the population of the Institution has increased twenty-eight per centum since the beginning of the period, the percentage of sickness and mortality has been less than for preceding periods. We also have reasons to know that of the number discharged and those remaining in the educational division, the greater number of them have improved and others have been favorably influenced by the care and training received, while the asylum charges have received such care and attention as their condition and circumstances would permit.

The more prominent facilities added during the period have been: The partial completion of the central building, with its conveniences mentioned by the Superintendent; the extension of the water pipes to the creek, and locating horizontal pump in the well from which water is used for culinary and drinking purposes; grading and improvement of grounds; the changes made in the old building, and erection of a new barn.

Following the increased capacity and growth in numbers, we have observed with interest the effect upon the workings of the Institution. In locating the girls' wards in the old and new buildings, the division of the male and female departments is much more definitely defined, thereby the mingling of the sexes more readily controlled.

Additional school rooms and teachers necessarily followed the increased roll call. We heartily commend the interest and zeal manifested on the part of the Superintendent and teachers in the contin-

ued development of this beneficent work in caring for these dependent wards of the State.

The organization of the special classes for the benefit of the children possessing more than ordinary mental peculiarities, together with the results of the band class and work in hammered brass and copper, merits our approval and encouragement.

For the more complete development of industrial pursuits, there should be an appropriation of two thousand dollars.

For making improvements on the farm, we recommend an appropriation of two thousand dollars.

Storage for provender and shelter for cattle and hogs are very much needed.

Six hundred dollars could be advantageously used for horticultural purposes, with returns to the State in a few years far in excess of the outlay.

The Superintendent's views relative to the need of better facilities for the care of the sick, meet our endorsement. The law governing the Institution justly provides that all types of imbecile children shall be cared for, which brings together a household requiring a greater range of facilities than the present accommodations afford.

The Institution has never been provided with suitable rooms for hospital care. In view of this, and the fact that continuous demands are likely to be made upon the Institution for admissions, we recommend an appropriation of twenty-two thousand dollars to be used in constructing a building as indicated by plans secured by the Superintendent.

For completing and furnishing the central building, including engine and boiler house, smoke-stack and two new boilers, changes in steam heating and laundry supplies, thirty-nine thousand, five hundred and ten dollars will be required.

The dangers connected with the use of lamps suggests a change in the method of lighting the buildings. We recommend an appropriation of five thousand dollars for this purpose.

The further needs of the Institution referred to by the Superintendent are indicated, and in our judgment should be provided.

As referred to in the appended report, we believe the expenditure of the funds has been made in accordance with the act creating them, with a good showing for the several amounts paid out.

Since the initial step was taken by Iowa in the interest of her feeble-minded, the resources for their care and training have encour-

agingly developed. We believe, however, that as the nature and number of this class becomes better known and understood by the people, the policy of the State will be to increase the rate of expenditure for their protection, and permanent detention. The census returns makes the number of feeble-minded in the United States but little below the number of insane. In Iowa one hundred and twenty-seven more insane are reported than feeble-minded. To those who have not given this subject special thought and inquiry, these statements may seem large.

We quote from a paper read by Dr. I. N. Kerlin at the National Conference of Charities and Correction at St. Louis in 1884:

"With increased care in the taking of the census, and clearer apprehension on the part of the public of what are diseased, and defective conditions, the tables will more nearly approach accuracy. Those of 1880 are an immeasurable gain on the tables of 1870, but are still, in the records of idiocy, insufficient by twenty or thirty percentum. The term 'idiot' is so repugnant that it is only the most avowed subjects that will be returned by its family. Of two hundred and ninety-five applications for admission in our Institution received during 1880, one hundred and seventy-eight appeared in the census; an omission of sixty per cent. Hence it is idle to attempt any conclusion as to the actual increase in the ratio of new cases of this class. No one can read the sources of error as presented by Mr. Wine's without being fully convinced of the great labor performed by his bureau, its conscientiousness and thoroughness."

After a careful analysis of the condition and distribution of this great army of defectives, together with studied conclusions relative to the parental ability to bear the misfortune of a blighted life in the home circle, the estimated percentages arrived at were, "twenty and one-half per cent need never become a burden to the State; seventeen per cent might be classed in the same favorable category; while forty-six and one-half per cent are being maintained at the most expensive rates in the homes of their suffering families—families deserving of a prudent, State philanthropy, which, meeting the mechanic and the laborer half way, and without absolutely pauperizing as the almshouse does, which he painfully refuses, would take the heavy end of the burden, lifting to a higher and better grade the imbecile himself, emancipating groups of brighter children from a tyranny of rule prescribed in almost any home where a blighted one dwells, and releas-

ing exhausted mothers from the untrammelled care of their households."

Who can estimate the waste of energy, money, and heart in this extravagant home care of the feeble-minded and idiotic children? When told, no history in the "annals of the poor" is more searching and pathetic, and no defense of the doctrine of State aid to relieve the calamities of her citizens more impassioned and irresistible.

Bearing upon this subject of comparative provision for the feeble-minded, we find the following paragraph in the latest report of the board of State Commissioners of Public Charities of the State of Illinois:

"Our attention has been drawn to the fact that not only in Illinois, but elsewhere, much more has been done for the insane as a class, in proportion to their entire number, than for idiots.

"In the census of 1880 there were enumerated in this State 5,134 insane and 4,170 idiots, but the State has accommodation for the care of about 3,700 insane and only 350 idiots. In Great Britain they are not distinguished from each other in the census, but are enumerated together. They do, in fact, constitute, in a certain sense, a single class of defectives, since the imbecility, which is congenital, or due to disease or accident in infancy, does not differ essentially from the imbecility which is the sequel to an attack of acute mania or melancholia. The necessity for custodial care of imbeciles of the one class is perhaps as great as that which exists for the care and custody of the other. In view of the limited provision made for the idiots, the constantly increasing demands for admission to the asylum of the feeble-minded at Lincoln, and the impossibility, or inhumanity of turning adrift some more helpless cases which have there grown to manhood and womanhood, we favor the application preferred by the Trustees for the small sum required to erect a building (\$34,000) upon the land now owned by the Institution for the accommodation of 100 custodial cases. There are some idiots who are perfectly capable of self support under competent direction, who are utterly incapable without it, and the labor of some of this class might be utilized to advantage in the Institution for the benefit of those of younger years who are receiving such physical and mental training as it is possible to give them."

We have observed that already a considerable number of adults are accumulating in the wards of the Iowa Institution and that more than a hundred names are on the application register to be consid-

ered; this, together with a knowledge of the number in the State, many of whom will hereafter ask admission, suggests the inquiry: To what extent shall the State extend its privileges in providing permanent homes for them?

Continued observation only confirms opinions previously formed, that public facilities should be enlarged until all reasonable claims of this class are adjusted.

While we recognize the conservative tendency with which all subjects demanding public support, and the necessity of controlling hasty and extravagant expenditures of public funds, the Trustees believe they are only acting on the broad basis that has ever actuated the entire people of the State, when they recommend making the appropriations herein specified. This has always been a progressive State. When the census report is examined, the small per cent of illiteracy found within our borders indicates clearly the liberality of our people in providing so efficient a school system.

The fact that we have three institutions for the care of the insane, and proportionate accommodations for nearly all other charges, shows how extended have been provision for the benefit and treatment of defectives, where the State has from an early date in its history exercised continued and fostering care.

As the number of insane reported in Iowa are only slightly in excess of the feeble-minded, are we, as a people, extending that aid to this class that so strongly appeal to our sympathy, as the wealth of the State and the requirements of their care demand? Regarding these imperfect children in the light of being half as worthy of our care, have we then as a State, done our duty toward them? As many become hopelessly insane by neglecting prompt treatment, in like manner many feeble-minded children are year by year passing the point where improvement is possible, while if taken in time they can be redeemed from absolute helplessness to better and brighter beings, capable of partial or entire self support.

The remainder can be greatly benefited, and if not rendered capable of self support, the public should care for them the same as it cares for the hopelessly insane.

Very eminent authority has long since demonstrated the grave mistake of failing to furnish a home for these children. Discipline and care in the Institution as a rule, surpasses that of parental control. Not alone should the State furnish a home for these children for personal improvement and comfort, but the benefit of the public at

large. As "like begets like," how vastly more important is it that as rapidly as possible these blighted minds should be placed under public control, that the chances of reproduction may be restricted to the minimum.

We believe then, that the State in carrying out its policy so beneficially begun in the interest of her defective classes, reflects the magnanimity of her citizens, and that in extending her mantle of charity to the youngest of her wards, she is not only benefiting a deserving class of humanity, but mitigating an exhausting burden to community, and diminishing a tendency to the transmission of pernicious influences in the form of crime, pauperism, and insanity.

Respectfully submitted,

W. H. HALL.
E. R. S. WOODROW.
A. H. LAWRENCE.

SUPERINTENDENT'S REPORT.

To the Honorable Board of Trustees:

GENTLEMEN—The report herewith presented covers the tenth and eleventh years in the history of this Institution, a part of which necessarily refers to some features of our work presented in previous reports.

No radical changes have been attempted in the management of the affairs of the Institution during the period, as you are aware, but a continued effort has been made in the direction of perfecting the already organized departments, as speedily as additional facilities would permit.

In accordance with the law governing the Institution and your direction we have continued to extend its privileges to all classes of the feeble-minded, from the profound idiot with entire absence of mind, up to individuals possessing mental attributes but little below the normal standard of human intelligence, thereby bringing together a family with infinite shades of mental, moral and physical debility, requiring special facilities to properly group or classify them for care, treatment and training.

I do not find any universal adoption of terms in use, to express the different degrees of idiocy. The lack of reliable data in determining causation, has prevented specialists from submitting a scientific classification wholly reliable.

It will answer our purpose therefore, to allude to our household as being divided into only two general divisions; the improvable or educable, and the asylum or unimprovable, reference being made to special types included in these divisions, subsequently. It was not until last October that the central building was ready for occupancy. This left the repairing of the old building to be done after that date, which delayed admissions until the most expensive portion of the period had passed, before the wards were fully occupied.

During this time it was necessary to keep up an increased amount of steam for heating the recently acquired room space, making at least one-third more fuel cost. This, together with an greater number of employes added before a corresponding ratio of children could be admitted, necessitated rigid economy to keep within the per capita allowance for support. With the approach of the spring months embarrassment in this respect subsided.

During the coldest weather in January the tubing in one of the old boilers gave way, depriving us of its use for two days; with this exception there was no serious interruption in the efficiency of this department.

The system of steam heating and plumbing in the new building has especially given satisfaction.

We have been fortunate in not having an epidemic to contend with, except six cases of erysipelas which occurred in the months of February and March, 1887, from which cause one death occurred. For the period we have eighteen deaths to report; eleven of these occurred in the asylum division, the remaining seven in the better grades. Considering the low state of vitality possessed by this class, especially among the lower grades, we feel that the per cent of mortality compares favorably with the experience of other institutions caring for asylum charges.

We submit for further consideration the following facts bearing upon the history of the Institution for the period, with remarks following relative to the interests of those whose condition we seek to mitigate. At the date of my last report the number enrolled in the Institution was 259—164 males and 95 females. The following changes are recorded for the period:

Admissions—males, 93; females, 75. Total.....	168
Discharged.....	86
Leaving now enrolled, 206 males and 125 females. Total.....	331
Total number cared for during the two years	417
Average daily attendance for the year 1885-6.....	250.9
Average daily attendance for the year 1886-7.....	292.7
Average for the period.....	271.8

Of the number enrolled, 236 have been classed in the school and and industrial department and 95 in the asylum division.

Applications for admission first year of the period	66
Applications for admission second year of the period.....	86
Total for the period.....	152
Number of applications since organization of the Institution.....	774
Number of admissions since organization of the Institution.....	599
Number of applications now on file	117

The present capacity will not properly accommodate more than 330. This leaves pressing demands for the care and training of applicants who cannot be accommodated until further provision can be added. Applications will probably continue as numerous as recorded for the period just past.

It has been the history of this and similar Institutions that public facilities for the care of this class of defectives does not keep pace with the demands made upon it.

Of the 86 discharged, 24 were greatly improved; 14 were moderately improved; 18 in a less degree improved; 12 were not improved. The remaining 18 died from the following causes:

Phthisis pulmonalis.....	5
Epilepsy	5
Pneumonia.....	4
Chronic meningitis.....	1
Concussion of the brain.....	1
Cerebral apoplexy.....	1
Abscess of hip joint.....	1

The following is an analysis of eighty-four inmates mingling in the several wards, that should have care and treatment in a hospital building arranged for that purpose:

Epileptics	49
Paralytic	16
Epileptic and paralytic	5
Dement	5
Of a tubercular or scrofulous diathesis, now requiring special attention	9
Total.....	84

As indicated by exhibits, the period just past has been one of considerable activity to the Institution. The number of admissions has been greater than for any period during the history of the home, with continued claims for recognition.

The growth of the Institution develops increased necessity for perfecting special departments; for the care of the sick, including epileptics, paralytics, and others suffering from chronic ailments, always present where asylum charges are cared for.

The claims of the asylum division, presented two years ago, have grown more urgent. Their feeble physique, often with inherited disease, makes them wholly dependent upon others to anticipate and supply their most simple wants.

Referring to the adult portion of our family, who have passed the school period and either have no homes to go to or are marked with mental and physical infirmities that must ever debar them from society and the home circle, I will say briefly, that the plan of providing custodial buildings, and developing avenues for productive labor for them, is being demonstrated as the most rational and satisfactory method to pursue. Not only for their interests but for that of the State.

There is another type of unfortunate subjects that find their way into our wards for care and discipline. They are generally termed "moral imbeciles," by the profession, but by the mass of mankind are looked upon as being vicious or wicked. There is a lack of proper moral impulse, or a perversion of the sense of right and wrong. Dr. I. N. Kerlin, Superintendent of the Pennsylvania training school for imbeciles, says of them: "The recognition in the kindergarten and in the primary schools of congenital moral imbeciles is believed to be possible. Such children, although often precocious in the power to acquire school learning, should be withdrawn from the community before they reach crime age, and are best cared for under the discipline of institutions for the idiotic and feeble-minded."

"It is a noteworthy fact that in most, if not all, of the cases which we have determined to be moral imbeciles, there is a neurotic history in the family antecedents: epilepsy, monomanias, inebriety and crime, are frequently the correlative exhibitions in families from which proceed these children of keen intellectual precocities, but inveterate tendencies to vagrancy, prostitution and lawlessness."

It will be remembered that many of our household are not only mentally deficient but physically impaired, requiring advantages of hospital care daily. By referring to the exhibit indicating the character of disability more frequently encountered you will observe there are at present, 84 that need surroundings adapted to their condition; 54 of this number belong to the epileptic family, the greater

per cent requiring special care and treatment. In my report for 1884-85 your attention was called to the necessity of providing wards adapted for the care of this class. Continued observation and care of them verifies my conclusion at that time, viz: That a hospital building should be constructed with wards so arranged as to properly classify epileptic patients. This can be done in the same building with patients affected with other ailments. If planned with this object in view, it would leave them constantly in charge of the hospital matron, to carry out the directions of the medical officer.

In the interest of the epileptic, I quote the summarized conclusions of a paper written by Dr. G. H. Knight, Superintendent of the Institution for imbeciles at Lakeville, Connecticut, and read at the National Conference of Charities and Corrections, at St. Paul, 1886.

"First. That more than sixty per cent of the histories of children received into our institution for feeble minded show epilepsy as a cause or as a complication.

"Second. That the marriage of epileptics is one of the great sources of increase of imbecility.

"Third. That a large per cent of epileptics are susceptible to improvement, and a certain per cent are cured; and there is good reason to believe that, under the proper conditions, a much larger per cent could be cured.

"Fourth. That the work cannot be carried on satisfactorily in connection with ordinary work for feeble minded upon its present basis.

"Fifth. That the best results cannot be reached by isolation.

"Sixth. That a home of the kind suggested would tend directly to prevent the marriage of epileptics, and thus the increase of imbecility, insanity and crime would be lessened."

He further says: "I will not enlarge upon the utilitarian side of the question. A moment's thought, however, will convince one that, when we take any steps which will prevent the increase of epilepsy or imbecility, we diminish the number of those who must necessarily depend upon the State for care, whether in the educational institution, hospital for insane, or prison."

I have briefly called your attention to the most prominent types or grades in our wards that require more than ordinary attention in making up a desirable classification, that the present and future requirements for their care may be fully considered and facilities increased in compliance therewith.

Appropriate accommodations for either division would greatly relieve the wards for a time, and permit a more satisfactory classification, as well as leave room for additional numbers of children now waiting to be admitted.

Preceding reports have prominently called attention to the necessity of increased hospital facilities. As the number of inmates increase, demands for space arranged for the proper care of the sick grow more urgent.

I have secured plans for a building, with separate wards for the care of acute and chronic cases, with suitable rooms for isolating excitable patients whenever occasion may require it. Other conveniences, necessary for the care and comfort of hospital subjects, are connected with the building, as indicated in our plans. The present accommodations are inadequate, and cannot be enlarged in the present building.

If it shall be the policy of the State to increase its beneficent care and protection to these blighted lives, it cannot afford to withhold, longer, the needed comforts in this direction.

We submit in brief, a summary of reasons for providing a building arranged for purposes mentioned:

1. It provides accommodations for the care of acute diseases.
2. It supplies needed facilities for the care or epileptics and paralytics.
3. It affords detached wards for isolated care of infectious and contagious diseases.
4. It will relieve the present crowded condition of wards, thereby permitting a better classification of children.
5. A building thus arranged would serve, for the present, the combined purposes of hospital, custodial and nursery department.

SCHOOL DEPARTMENT.

Owing to the frequent admission of children during the past winter, the harmony of the schools has been interrupted; notwithstanding this, I feel warranted in stating that it has been a valuable year to this department, not only in the advancement made by the pupils, but in developing and systematizing more thoroughly this branch of work.

I will not attempt, in a report of this character, to enter into the details of the methods required to reach the varied degrees of men-

tality encountered in a school of this kind, more than has already been explained in previous reports.

One of the greatest difficulties to overcome is the absence or lack of the power of attention of imbecile children. As aids in overcoming this deficiency, numerous devices in the way of kindergarten and object lessons are utilized, to stimulate the birth and growth of this faculty. The calisthenic drills in use are valuable, not alone for the physical benefit derived, but as a means of education in the way of attention lessons. All through the school training, mechanical means are required for developing the special senses.

The simplest kinds of labor with many of our boys and girls are valuable lessons in fixing the attention and inculcating will power over the defective nervous organizations so uniformly present in these children. This may be considered one of the special reasons for labor training in connection with school room work.

The school is now divided into seven classes; five are graded on the basis of intellectual capacity, and are taught in class drills as far as practical; the remaining two are made up of pupils possessing more than ordinary mental peculiarities, and therefore require, almost exclusively, individual methods of instruction.

I was fortunate in securing experienced teachers to take charge of these special classes without having to interfere with our corps already in charge of the graded division.

Excluding those who have passed the period of school-room training, the asylum classes and the number in the hospital wards, our roll call for this department numbers 128 males and 67 females; total, 195. Of this number 55 have made active progress in learning, 87 have made medium advancement, while 42 have improved very slowly, and the remaining 11 appeared to have remained stationary or retrograded, physically and mentally, and will be transferred to the asylum wards. Structural changes of the organs of the body, more especially the nerve-centers, have left irreparable lesions.

An analysis of the asylum division has not been considered, for the reason that available resources have not been sufficient to permit the amount of training their condition merits.

It is our purpose to give them such school and labor training as their capacity indicates, as soon as rooms for that purpose can be provided.

The evening school for the adult portion of our family has been kept up with satisfactory results.

I assume your familiarity with this branch of our work has impressed you with the patience and perseverance it requires on the part of the teachers to succeed in this specialty. To them is principally due the credit for whatever has been accomplished in this part of our work.

During the past year manual training has been developed to a gratifying extent. It has been our aim to keep every child occupied either in school or at some kind of work during the proper working hours. The lack of facilities only, has prevented the beneficial effects of this important factor from being extended to all who are capable of participating in the most simple kinds of labor. Through this avenue gradually the pupils acquire habits that must influence their whole lives, namely, precision and method—stimulating self-reliance and will power.

The methods of work training must be greatly varied to meet the requirements of individual peculiarities so prominent with our children. To meet this we need encouragement in the way of an appropriation for increasing and developing a greater variety of work channels. I know of no way that the State could more advantageously expend money than in this direction.

Our sources for carrying on labor training, now consists in the farm and garden, broom-shop, carpenter-shop, shoe shop, sewing-classes, art-work, and the various apartments of the Institution, more especially the kitchen and laundry rooms.

The farm and garden work continues to demonstrate the advisability of enlarging facilities for employing a greater number of boys in this branch of industry.

I earnestly request your honorable body to recommend an appropriation for more land.

The following summarized account of the farm and garden for the period is submitted as evidence of the practical results of this department: Credit in favor of the farm and garden for the period, \$2,835.77.

The broom shop has furnished employment for six boys with but brief interruption since its organization. They are now capable of carrying on this work unaided by a foreman. This class may well be congratulated with the results of their training.

During the last three years they have manufactured 1,719 $\frac{1}{2}$ dozen brooms. Owing to the high price of brush the margins on sales have been light, but enough to balance the debtor column.

The limited advantages for training boys in carpentry permits only one or two boys at a time to work. Conveniences for a larger detail is desirable.

The manufacture of boots and shoes has become one of the established industries of the Institution, having been in operation for four years.

All the shoes needed by the inmates are made in the shop, as well as all necessary repairing done. Five boys have become fair workmen and can show specimens of their work that will compare favorably with that done by more fortunate individuals. During the period they have made 483 pairs of boots and shoes, and 1,108 repairs.

Within the past year the sewing classes have been reorganized and are now on a better working basis than at any time previous.

Class No. 1 is composed of older and more competent girls. They are becoming daily more proficient in both hand and machine work. Class No. 2, grade lower in capacity and therefore require more patience and time on the part of the teacher to instruct them. These classes now assist largely in making garments for inmates and articles needed for the Institution. One thousand three hundred and ninety six pieces have been made by them since December, 1886.

In March of this year, three boys were detailed to work at sewing an hour daily, under the supervision of one of the lady teachers. The work accomplished and the skill manifested by this class surpassed our anticipations. In June the class was increased to ten boys, who now do both hand and machine work. The results of their labor show sixty-five pairs of pants made, and other work not enumerated.

As many of the inmates as can be utilized are regularly detailed to work in the several departments of our household, some before and after school hours, others for one-half day at a time, or at such times as not to interfere with their lessons in school. The detail work list for the month of June indicates that 151 of our number were called upon to assist in the general work.

This detail is changed every month, that all may have the benefit of learning to perform different kinds of work, and to relieve monotony.

A cornet band was organized at the beginning of last winter, composed of eighteen boys, inmates of the Institution. The proficiency already attained by this class verifies the statements made in the pre-

ceeding report. Nothing has been introduced that so prominently interests the children at our weekly entertainments and on special occasions. I may safely say that some of our boys possess talent for music that may be used as means for their support in the future.

In the way of diversion, our Tuesday and Friday evening entertainments are continued regularly during the school session.

Whenever the clemency of the weather will permit, daily excursions through the groves are enjoyed by the children.

Special entertainments are also provided at intervals during the year.

Sunday exercises are continued as previously reported with praise meeting from three to four o'clock in the afternoon.

The following are the appropriations made by the last General Assembly for the Institution:

1—For purchasing beds and bedding.....	\$ 1,000.00
2—For improving new building, finishing and furnishing two stories of the same.....	25,000.00
3—For repairs and contingent fund annually	2,000.00
4—For new piano.....	400 00
5—For steam pump and changing old one.....	600.00
6—For library and surgical instruments.....	200.00

Of the first, \$752.50 has been expended for the purpose designated in the act, the remaining \$247.50 will be drawn upon for similar use this fall.

You are familiar with the expenditure of the funds for the new building. In the completion of the first and second floors of this building, advantages have been realized difficult to estimate; day rooms and dormitories for fifty girls are located in this building, and two additional school rooms relieve pressure for space in the school work.

The culinary department is well adapted for its purpose, amply supplying the needed conveniences in this direction.

The administrative department is now located, as designed, in the north wing of this building. The facilities added are appreciated, as aids in the management of official duties.

With the completion of the remaining floors of the building, rooms will be added that will permit better division of the classes in school and provide space for an additional number of children. Your familiarity with the progress of this building and the necessity of its early

completion, will, I trust, secure your attention and special consideration.

In connection with the completion of this building, your attention is again directed to the absolute necessity of a new smoke stack, boiler and engine room, with more space for laundry purposes.

The principal portion of the contingent and repair fund was expended in re-arranging and repairing the old building preparatory to transferring the girls from their cottage to this building; this left only a small margin to meet the expenses for incidental repairs for the remainder of the period.

For repair and contingent fund \$2,500.00 annually is little enough.

A new Knabe piano was purchased with \$400.00. The instrument is a good one and has been of special value to the school department.

The \$600 00 appropriated for purchasing a new pump, was used for that purpose. This supplied an absolute necessity.

The appropriation for surgical instruments and library, has been principally expended as indicated.

For increasing library and purchasing school supplies, \$500.00 will be needed.

For fire escapes and hydrants, \$1,500.00 is needed.

For beds and bedding \$1,200 00 will be needed.

For improvement of grounds \$1,000.00 could be profitably expended.

For the benefit of the older girls, an organ should be purchased. For this purpose \$100.00 will be sufficient.

A cow barn, piggery, ice house and cisterns, are all very much needed.

The advantages of electric light over that produced by oil requires no statement from me.

For enlarging our orchard and putting out small fruit assistance is required.

For improving ventilation in boys' cottages, \$600 can be profitably used.

The per capita cost per year for maintenance for the period is \$163.14; including clothing it is \$175.79.

During the winter we had the misfortune to lose our barn by fire. This occurred, as you are aware, in January, at the time of the regular meeting of the Board. The loft was filled with dry hay, where the fire originated, and rapidly consumed the structure and contents, except the horses and the mule team, that were with difficulty removed in time to save them. Careful inquiry elicited no cause for

the origin of the fire. In response to the request of the Board, the Executive Council promptly appropriated \$1,000 of the providential fund for the erection of a new barn. This has been done, as I believe a good showing for the money expended.

But few changes have occurred in our staff of officers. In the resignation of Miss Anna Townsend the Institution has lost a faithful and efficient teacher.

Miss M. Wood, supervisor of the kitchen department, accepted a position as Matron in another institution. She was a competent and worthy officer, filling her position with credit.

In the death of Dr. J. M. Donelan, which occurred in May of this year, the Institution has lost one of its first and continued ardent supporters. The Doctor had been consulting physician to the Institution since its organization, always giving his aid and counsel cheerfully for the benefit of deserving humanity.

The Institution has lost another of its devotees in the death of Dr. W. S. Robertson, of Muscatine. He was one of the first in Iowa to work in the interest of the feeble-minded. He was largely instrumental in securing legislation for establishing the present school for them, and was a member of the first Board of Trustees.

Public recognition of the services of Mr. T. Q. Records, who for a number of years has been the efficient clerk of the Institution, is justly due him.

Dr. A. S. Burtt continues in the conscientious and faithful performance of his duties as assistant physician.

The assistant and hospital Matron, and department managers, have been uniformly attentive in the discharge of their duties.

Attendants and other employes, who have been faithful in their several positions, have our sincere thanks.

I desire to express a grateful appreciation to the friends of the Institution for their encouragement and sympathy for our dependent family.

To all who have assisted in the way of donations for holiday entertainments our thanks are due.

In conclusion, I desire to renew my sense of appreciation for the uniform courtesy, manifested confidence and support of the Board in the management of the affairs of the Institution.

Respectfully submitted.

F. M. POWELL,
Superintendent.

During the period ending June 30, 1887, there has been received \$4,074.27 in cash from various sources, as shown below, viz.:

CASH.

Respectfully submitted,

E. R. S. WOROW, Treasurer.

[1887.]

CIRCULAR.

This Institution was established by the Sixteenth General Assembly of the State of Iowa, in the year 1876, and located at Glenwood, in the building formerly occupied by soldiers' orphans.

The object of this Institution is to provide special means of improvement to that class of children so deficient in mind or afflicted with such marked peculiarities of intellect as to deprive them of the benefits and privileges of other educational institutions and ordinary methods of instruction.

The education imparted to this class includes not only the simple elements of instruction of our common schools, where that is practicable, but embraces a course of training in the more practical matters of every-day life, the cultivation of habits of cleanliness, propriety and self-reliance, and to develop and enlarge their capacity for useful occupations.

To promote these objects, children will receive such education, and such moral and hygenic treatment, as their peculiar and varied conditions demand.

Mental imbecility depends upon some abnormal or imperfectly developed condition of the physical system, a condition in which the nervous organization is especially defective, preventing the harmonious and natural development of the mental and moral powers.

Idiots and imbeciles, as a rule, are feeble in body as well as in mind. Their gait and voluntary movements are generally awkward and slow, and their special senses inactive and undeveloped, and are wanting in nervous and muscular power. Physical training and development, therefore, are essential, in order that their mental improvement may become permanent, hence the importance and necessity of gymnastic and calisthenic exercises in their treatment.

The very feeble power of attention must be cultivated and increased by the most attractive means. The special senses must be trained and educated, vicious habits are to be corrected, and the idea of obedience and moral obligation must be planted and nourished.

Some, who are only backward, and are undeveloped from being misunderstood, or abused, can be brought out and reclaimed by special means. Many others can be arrested in their downward course, made orderly and obedient, docile and industrious; and all can be improved in their general condition and habits.

In order to secure these blessings to this afflicted class, they must have that special care, treatment and instruction, which cannot be obtained in the family at home, or in private medical practice, or by any of the ordinary methods of education; and it is only in some institution, well arranged and directed for the accomplishment of these special objects, that they can receive such benefits. Each individual case must be studied, and treated as its peculiarities demand.

Every child and youth residing in the State, between the ages of five and eighteen, who by reason of deficient intellect is rendered unable to acquire an education in the common schools, shall be entitled to receive the physical and mental training and care of this Institution at the expense of the State.

The special system of instruction, training and management adhered to in this Institution, renders it a desirable residence for all children of this class.

Applications for admission shall be made "First, By the father and mother, or either of these if the other be adjudged insane. Second, By the guardian duly appointed. Third, In all other cases by the board of supervisors of the county in which the child resides. It shall be the duty of such board of supervisors to make such application for any such child that has no living sane parent or guardian in the State, unless such child is comfortably provided for already."

"The form of application for admission into the Institution shall be such as the trustees prescribe, and each application shall be accompanied by answers to such interrogatories as the trustees shall require propounded."

The Institution is under the management of medical officers, and the inmates receive all ordinary medical and hospital treatment free of charge.

The progress and improvement of our children have been very encouraging, and parents and friends almost invariably express satisfaction with the results in the comparatively short time their children have been under training.

Our Institution is open daily, except Sundays and Saturdays, to visitors and the public, at all reasonable hours, and all are not only

cordially invited to visit our school, but earnestly requested to do so.

Each child admitted shall be provided with at least two changes of clothing, which will be registered when the child is admitted. Such clothing as may be needed subsequently will be furnished by the Superintendent, registered, and a bill of the same rendered.

As a matter of convenience these bills will be sent to the auditor of the county in which the parents reside, so that they can be settled by said parents near home.

The board of supervisors of said county shall determine as to the ability of said parents to pay their bills so rendered, and in case of inability, they shall be paid by the county.

Any other information desired will be cheerfully given by the Superintendent.

F. M. POWELL, M. D., *Superintendent.*
