STATE OF IOWA

1916

TENTH BIENNIAL REPORT

OF THE

BOARD OF CONTROL

OF

STATE INSTITUTIONS

FOR THE PERIOD ENDING JUNE 30, 1916

LETTER OF TRANSMITTAL.

*Honorable George W. Clarke, Governor, and the General Assembly
of Iowa:*

Pursuant to the provisions of the law, the Board of Control of
State Institutions hereby presents its tenth biennial report for the
period which ended on the 30th day of June, A. D. 1916.

W. J. DIXON,
A. M. McCOLL,
J. H. McCONLOGUE,

Board of Control of State Institutions.

Des Moines, Iowa, November 14, 1916.

BOARD OF CONTROL OF STATE INSTITUTIONS

State House, Des Moines, Iowa

MEMBERS AND OFFICERS OF THE BOARD.

W. J. DIXON, Chairman.....	Sac City
A. M. McCOLL.....	Woodward
J. H. McCONOLOGUE.....	Mason City

M. N. Voldeng, M. D., Superintendent.	
State Hospital for Inebriates.....	Knoxville
M. C. Mackin, M. D., Superintendent.	
State Penitentiary.....	Fort Madison
J. C. Sanders, Warden.	
The Reformatory.....	Anamosa
C. C. McClaughry, Warden.	
Women's Reformatory.....	Rockwell City
(Superintendent has not been appointed.)	

PART I

CHAPTER I—Report of the State Board of Control of State Institutions.

GENERAL STATEMENT.

There is no change in the personnel of the membership of the Board of Control of State Institutions since the last report. J. H. McConlogue filled the unexpired term of John F. Wade, deceased. This term expired June 30, 1915, and J. H. McConlogue was selected by the governor and the general assembly to succeed himself for the six years ending June 30, 1921. The other members of the board are A. M. McColl, whose term of office will expire June 30, 1919, and W. J. Dixon, whose term of office will expire June 30, 1917.

The number of institutions under the control of the board is now sixteen. This includes the Industrial Reformatory for Females and the State Hospital and Colony for Epileptics. These two new institutions were authorized and established by the acts of the thirty-sixth general assembly and placed under the care of this board.

The superintendent has been elected for the State Hospital and Colony for Epileptics in the person of Dr. M. N. Voldeng, who was former superintendent of the Cherokee State Hospital. The superintendent for the Industrial Reformatory for Females has not been appointed, as that institution will not be open for the reception of inmates before July 1, 1917.

APPOINTMENTS.

The changes in heads of institutions since the last biennial report was filed, are as follows:

B. C. Whitehill was appointed commandant of the Soldiers' Home and began his services as such April 1, 1916, the former commandant, C. C. Horton, having resigned and is since deceased.

On April 1, 1916, F. J. Sessions resigned his position as superintendent of the Soldiers' Orphans' Home, and Fred L. Mahan-

nah was appointed to take his place, and began his services as superintendent April 1, 1916.

George Donohoe was appointed superintendent of the Cherokee State Hospital and began his services March 1, 1915.

M. N. Voldeng was appointed superintendent of the State Hospital and Colony for Epileptics, having resigned his position as superintendent of the Cherokee State Hospital, and began his services in the new position May 1, 1915.

M. C. Mackin was appointed superintendent for the State Hospital for Inebriates and began his services March 1, 1915.

There were no other changes in the executive forces of the institutions during this biennial period.

STATE AGENTS.

Miss Anne M. Sheehan was appointed state agent for the Soldiers' Orphans' Home and began her services May 1, 1915.

All the terms of the executives officers of the different institutions are for four years. The terms of service of the state agents are indefinite.

INSTITUTIONAL EXECUTIVE OFFICERS

Names.	Titles.	Institutions.	Terms Expire
B. C. Whitehill	Commandant	Soldiers' Home	March 31, 1920
Fred L. Mahannah	Superintendent	Soldiers' Orphans' Home	March 31, 1920
Henry W. Rothert	Superintendent	School for the Deaf	August 31, 1918
George Mogridge	Superintendent	Institution for Feeble-minded Children	June 30, 1919
W. L. Kuser	Superintendent	Industrial School for Boys	August 31, 1919
Mrs. Lucy M. Sikkels	Superintendent	Industrial School for Girls	March 31, 1919
H. V. Scarborough	Superintendent	State Sanatorium for the Treatment of Tuberculosis	January 31, 1920
C. F. Applegate	Superintendent	Mount Pleasant State Hospital	June 30, 1917
W. P. Crumbacker	Superintendent	Independence State Hospital	June 30, 1918
Max E. Witte	Superintendent	Clarinda State Hospital	September 30, 1918
George Donohoe	Superintendent	Cherokee State Hospital	February 28, 1919
M. N. Voldeng	Superintendent	State Hospital and Colony for Epileptics	April 30, 1919
M. C. Mackin	Superintendent	State Hospital for Inebriates	September 30, 1918
J. C. Sanders	Warden	State Penitentiary	April 30, 1920
C. C. McCloughry	Warden	The Reformatory	December 31, 1919
The other officers are:			
Solon C. Vial	State Agent	Industrial School for Boys	Term indefinite
Miss Ray M. Hanchett	State Agent	Industrial School for Girls	Term indefinite
Miss Charlotte Goff	State Agent	Soldiers' Orphans' Home	Term indefinite
Miss Anne M. Sheehan	State Agent	Soldiers' Orphans' Home	Term indefinite
H. H. McKee	Inspecting Officer		Term indefinite

POPULATION OF INSTITUTIONS.

The average daily population of the several institutions under the control of the board, since June 30, 1914, is shown by the following table:

Institutions	Male	Female
Soldiers' Home	541	209
Soldiers' Orphans' Home	334	233
School for the Deaf	113	100
Institution for Feeble-minded Children	716	728
State Sanatorium for the Treatment of Tuberculosis	67	81
Industrial School for Boys	436	
Industrial School for Girls		167
Mount Pleasant State Hospital (Insane)	614	525
Independence State Hospital (Insane)	609	516
Clarinda State Hospital (Insane)	687	518
Cherokee State Hospital (Insane)	627	482
Mount Pleasant Hospital for Inebriates		22
State Hospital for Inebriates	186	
State Penitentiary	640	
The Reformatory	683	32

Population of each institution at the end of the fiscal year, June 30, 1916, was as follows:

Institutions	Male	Female
Soldiers' Home	531	218
Soldiers' Orphans' Home	276	187
School for the Deaf		
Institution for Feeble-minded Children	741	753
State Sanatorium for the Treatment of Tuberculosis	82	94
Industrial School for Boys	415	
Industrial School for Girls		167
Mount Pleasant State Hospital (Insane)	614	502
Independence State Hospital (Insane)	640	512
Clarinda State Hospital (Insane)	606	521
Cherokee State Hospital (Insane)	619	480
Mount Pleasant Hospital for Inebriates		13
State Hospital for Inebriates	141	
State Penitentiary	644	
The Reformatory	737	28

SOLDIERS' HOME.

This institution received but one appropriation from the thirty-sixth general assembly, which was \$5,000.00 for contingencies and repairs. This sum has been used in general repairs and erecting new fire escapes on the main building. Some of the buildings have been built twenty-five years and they are in need of quite extensive repairs. They are of frame construction with brick walls; some with slate roofs and some with shingle roofs. The contingent and repair fund should be made at least \$15,000.00. Quite extensive repairs and improvements are needed in nearly all of the buildings, such

as new floors, replacing stairs and stairways, new plumbing, new piping and other extensive repairs.

Two passenger elevators are badly needed in the institution. The average age of the old soldiers in the home is now about seventy-three years. Almost all of them are quite feeble and it is very necessary to have one elevator put in the hospital building and one elevator in the old people's building. The sum of \$5,000.00 is needed for this.

There was a cement bridge and dam built on the grounds where water was stored. This made pleasant recreation grounds and also supplied the institution with ice. The high water of the past season took out the bridge and dam and it should be replaced. The sum of \$3,500.00 is needed for this purpose.

A storm sewer should be built around the hospital and dormitory building, for which the sum of \$1,000.00 is needed.

An entire new slate roof is needed on the building known as the annex, and quite extensive repairs are needed on nearly every building in the institution.

The boilers should be completely overhauled and two new high-powered boilers with stokers, should be installed. Also a vacuum system of heating in the main building. These improvements will cost about \$15,000.00.

SOLDIERS' ORPHANS' HOME.

Appropriations made by the thirty-sixth general assembly have been expended and are under way for the purposes intended. The work of resetting the boilers has been completed. Also the work of fireproofing the industrial building has been finished, which makes it much more safe and removes the fire menace from the other buildings.

Some of the cottages have been erected about forty years. They are built of brick with a slate roof and have been repaired at different times, but these buildings need extensive repairs on the inside, such as new floors and new lathing and plastering. A bath room should be provided in each of the cottages for the matrons, or house mothers, for which the sum of \$5,000.00 is needed.

Some system of ventilation should be installed in the old school building and the sum of \$2,000.00 is needed for this work.

This institution has an average population of over 400 children and a new gymnasium should be provided. It is recognized by all educators that the physical development of the child should go hand

in hand with the mental and moral development. A great many of these children come from homes that have not had the benefit of any physical training. It would be a good investment for the state to erect a gymnasium for the benefit of the children in the future. An appropriation of \$30,000.00 is needed for this work.

The appropriation for repairs of tunnels has been expended for that purpose and the tunnels are now in good condition.

SCHOOL FOR THE DEAF.

The appropriations made by the last general assembly have been expended for the purposes for which the appropriations were granted. A part of the basement of the main building has been plastered and made available for the use of the students and a vacuum system has been installed which enables the different buildings to be heated much better than under the old plan.

The amount appropriated for tunnels, sidewalk and coal house has been used for the purposes intended.

The contingent and repair fund should be increased to \$7,000.00 for the coming biennial period.

Additional sums should be provided for finishing the basement of the main building, as these rooms are quite well lighted and could be used by the students.

A reservoir should be built for the storage of water which could also be used for a pond to secure ice for the institution.

Appropriations should be made for the extension of the coal bins, of probably \$2,000.00.

An extension of the greenhouse is also very desirable.

INSTITUTION FOR FEEBLE-MINDED CHILDREN.

The appropriations granted by the last general assembly have been expended for the purposes for which they were intended.

A contract has been let for an addition to the administration building and the building is completed. This gives the institution a much better dining room and provides needed rooms on the upper stories for teachers.

The sum of \$2,000.00 is being used for needed furniture and fixtures; also the sum of \$3,000.00 for paints and painting is being expended for the purposes intended.

The contingent and repair fund should be increased to \$15,000.00, as when the cottages and buildings get older, more repairs are generally needed.

The extraordinary growth of this institution in the last five years requires more buildings and a larger teaching and attendant force.

A new cattle barn has been erected from the appropriation of \$9,000.00 authorized and a contract has been let for building the kitchen and dining room for boys.

A large cottage for the younger boys of school division is badly needed, which will cost the sum of \$40,000.00 for building, lighting, heating, plumbing and furnishing. Additional appropriations should be made for beds and bedding, furniture and fixtures, and paints and painting.

STATE SANATORIUM FOR THE TREATMENT OF TUBERCULOSIS.

This institution is taking care of the tubercular patients sent to it, having a department for those afflicted with tuberculosis in the incipient stage; also a department for those in the advanced stages of the disease.

The appropriations made by the last general assembly have been expended for the purposes authorized by law. The addition to the hospital for advanced cases has been built and the building will be ready for the reception of patients about January 1, 1917. However, before this building can be properly used, an appropriation should be made for equipment and furnishings: such as the signal system and elevators, and a basement should be finished for employes and nurses. A careful estimate has been made for the cost of these items, and the sum of \$15,500.00 should be appropriated for the purpose.

A new medical and laboratory building is very much needed, which should be a receiving hospital for the institution. This building should also provide offices for the superintendent and his assistant. In the proposed building, the tubercular patients would be received and each separate case studied under the scientific men connected with the institution. Such a medical and laboratory building and equipment should cost not less than \$45,000.00. We earnestly recommend this appropriation.

This institution is situated in the country and there is no town of any importance nearer to it than Iowa City. We are handicapped for living rooms for the employes. In addition to the present building, an employes' building should be erected for which the sum of \$3,750.00 is needed.

A switchboard and cable should be installed, for which the sum of \$1,500.00 should be granted.

The institution has but one reliable well. Another well should be sunk and a new pump house and connections therewith should be installed. The sum of \$5,000.00 is needed for this.

The contingent and repair fund should be made \$5,000.00, the same as heretofore.

INDUSTRIAL SCHOOL FOR BOYS.

Appropriations made by the thirty-sixth general assembly have been expended or are under way for the purposes authorized by law. An excellent new well has been drilled for improving the water supply, and a new pump has been installed.

A dentist is employed to look after the teeth and to attend to the eye and ear troubles of the students.

The work on the sanitary toilet is under way and the sum of \$1,000.00 is being used for paints and painting, some of this work being done by the boys of the school.

The sum of \$8,000.00 appropriated for remodeling and repairing the administration building is being used for the purpose intended. New floors will be put in the basement, the woodwork made new, and general repairs made to the building.

The contingent and repair fund should be raised to \$15,000.00. The boys' cottages are badly in need of extensive repairs and improvements. The basement should be thoroughly overhauled, the wooden floors torn out, and sanitary wash bowls, urinals and closets installed. These improvements are very much needed in the boys' cottages, for which an appropriation of \$5,000.00 is needed.

The appropriation of \$50,000.00 for a new gymnasium has been expended for the purposes intended, and an excellent, modern, fireproof gymnasium has been erected, for which the four hundred boys are very thankful, and the board considers this a good investment for the state.

New equipment is needed for the machine shop; also two new steam boilers are required, and the wagon shed should be built to take care of vehicles and implements. An appropriation of \$10,000.00 is needed for these purposes.

An appropriation of \$2,000.00 should be made for farm machinery and vehicles.

New lavatories are needed in the administration building and boys' cottages, and the usual appropriation should be made for lec-

tures, amusements, athletic fund, reward of merits, chaplain fund, and books and periodicals.

The present cottages for boys are overcrowded and two additional cottages are needed. An appropriation of at least \$15,000.00 is recommended for one of these cottages.

The per capita allowance is not sufficient to purchase food and clothing and coal at the present standard of prices, and it is hard for the institution to make ends meet. The per capita allowance should be raised at least \$1.00 per month and the maximum allowance should be raised to correspond with this increase.

INDUSTRIAL SCHOOL FOR GIRLS.

The appropriations granted by the thirty-sixth general assembly have been expended as authorized by law.

The population at the present time is 183. One agent is employed in finding homes for girls who are eligible to parole and a goodly number of these young women are placed in good homes and turn out well.

The contingent and repair fund should be made \$5,000.00. Extensive repairs and contingencies arise that have to be met.

The appropriation for dentist and oculist should be \$1,000.00.

An appropriation should be made for furniture and furnishings of different cottages; for the purchase of live stock; and for the erection of a machine shop. For these items the sum of \$2,000.00 is needed.

One new boiler should be purchased to replace one of the older ones. \$1,500.00 is needed for this item.

This institution does not have a laundry that is at all adequate for taking care of its needs. An appropriation should be made of \$8,000.00 for a new laundry and equipment.

This institution has no storeroom for food supplies. At the present time, stores are kept in five different places. Some are kept in a basement that is not at all suitable for properly taking care of supplies. The institution is supposed to use the old laundry room for a storeroom; fit same up with shelves and counters, clean and renovate the building, finish the walls, etc. The sum of \$2,000.00 is needed for this.

The usual appropriation should be made for musical instruments and music and for the transportation of girls.

MOUNT PLEASANT STATE HOSPITAL.

This is the oldest hospital for the insane in the state. Indeed it was the first institution for the care of insane, built in the north half of the Mississippi valley west of the Mississippi river. The original buildings were built from limestone with a soft limestone foundation. The foundation is disintegrating in places and the buildings are settling, which causes extensive repairs to be made. We have expended considerable money in the past biennial period, reinforcing the foundation walls of the main buildings. This work will have to be carried on and quite extensive repairs should be made if the institution is going to be maintained and made comfortable for the patients.

The appropriations made by the thirty-sixth general assembly have been expended for the purposes intended. The railway switch has been built and is about completed. This will require the entire amount of the appropriation of \$30,000.00.

A new sewage disposal plant has been erected which will properly take care of the sewage.

A new cattle barn has been erected as authorized by law.

An additional tract of land adjoining the institution has been bought, for which the sum of \$6,059.64 has been paid. Another tract of land adjoining the front part of the institution has been purchased for which the sum of \$4,703.60 has been paid.

The entire amount of the contingent and repair fund has been expended for the purposes intended. The contingent and repair fund should be made \$30,000.00. Many of the beds and much of the bedding are getting quite old and insanitary and should be replaced.

Additional radiation and changes in the heating plant should be installed.

Extensive new kitchen equipment should be purchased.

A new drainage system should be installed to take the water away from the basement of the main building. According to the survey made by the superintendent, this will cost the sum of \$2,500.00 and should be granted.

The present electric switchboard is a wooden one and a new modern switchboard should be installed to make it safe. Water filter and attachment should be installed and some new water mains and fire holes should be purchased. These items will cost about \$7,000.00.

Two additional silos should be erected to take care of the splendid dairy herd now at this institution.

Some of the farm land needs draining badly for which the sum of \$1,500.00 is necessary. These tile could be shipped from the plant at the State Hospital for Inebriates at Knoxville.

The present electric wiring has been in the main building for a great many years and it is unsafe. This should be replaced with a modern system of wiring, for which \$3,000.00 is necessary.

The present boiler room of the institution is inadequate, not being large enough, and the building is old. A new boiler room should be erected, for which the sum of \$35,000.00 is necessary.

A new railway switch track has been built to the institution from the Chicago, Burlington & Quincy Railroad tracks. It is necessary to have a track scale in order to weigh the coal and other supplies that come to the institution in car lots. One new farm scale is also needed. These two items will cost \$4,000.00 and should be granted.

The present deep well has a temporary shed over it, which is not at all suitable for properly housing the pumps and machinery. A pump house and connections should be made, for which the sum of \$1,750.00 is needed.

As stated above, this is the oldest hospital for insane in Iowa, and will require extensive repairs and improvements to keep it up. That is the reason for the rather large askings from this general assembly.

INDEPENDENCE STATE HOSPITAL.

The Independence State Hospital received but one large appropriation from the thirty-sixth general assembly, which was for a new laundry building to cost \$25,000.00. A fireproof, modern laundry building has been erected, but no equipment has been purchased yet on account of the high prices of laundry equipment. The old laundry equipment is being used until such time as equipment can be purchased at a reasonable price.

The contingent and repair fund should be made at least \$20,000.00, as like all other institutions, the older the buildings get the more repairs are needed, and it pays to conserve the property of the state by keeping it in good repair. The appropriations made by the last general assembly for paints, painting and fences have been used for the purposes intended.

This institution has outgrown its present boiler house and an appropriation of \$50,000.00 should be made by this general assembly for the purpose of either building a new power house or enlarging the present plant.

This hospital has no separate building for tubercular patients, and some provision should be made for a building which will take care of the tubercular patients of both sexes. An appropriation of \$50,000.00 is needed for this purpose.

The present amusement hall will seat about 325 patients. Some appropriation should be made for erecting a new amusement hall so that most of the patients could be gotten out at one time. However, the rebuilding and enlarging of the power house is the most urgent improvement needed at this institution.

It is proposed to establish a new draining district which will include some of the state land. If this district is established, the state should pay its proportion of the expense of draining the district, for which the sum of \$5,000.00 is asked.

CLARINDA STATE HOSPITAL.

The appropriations made by the thirty-sixth general assembly for improvements, have been expended for the purposes for which the appropriations were made. A complete new laundry building has been built. It is of modern, fireproof construction, concrete floors and reinforced roof. However, the laundry building has not been used for the reason that the board of control did not think it advisable to pay the high price for laundry equipment which was demanded by the laundry machine companies. The machinery in the old laundry is still being used and will continue to be used until the market for laundry equipment is brought down to a reasonable basis.

The sum of \$1,000.00 appropriated for cement and material for concrete bridges has been expended in building a new concrete bridge across the creek which runs through the institution grounds. This labor has been largely done by the patients, under the direction of one of the patients who is an expert concrete worker.

The contingent and repair fund should be raised to \$20,000.00, as the repairs on the buildings at these large institutions are quite extensive, and it is a good investment for the state to keep the buildings up.

The present dairy barn is located in a low piece of ground on the creek bottom where the rains wash directly down in and around

the building. The board considered the advisability of raising this barn, but the conclusion is that it is much better to build a new barn on the hill immediately south of the institution, and an appropriation is asked for this purpose in the sum of \$12,000.00.

There is no separate building for tubercular patients and an appropriation for this purpose is asked of \$50,000.00.

CHEROKEE STATE HOSPITAL.

Appropriations have been expended for the purposes authorized by the thirty-sixth general assembly. A contract has been let for the stokers, for which an appropriation of \$7,000.00 was made and they are being installed in the boiler house.

New floors are being put in, for which the sum of \$1,000.00 was appropriated. An excellent cold storage plant has been reconstructed from the appropriation made for that purpose and the sum of \$1,000.00 for improvements of the water supply has been used to deepen one of the wells already at the institution.

The appropriation of \$25,000.00 for railway switch and right of way has been expended for the purposes intended in the appropriation act. However, it will take an additional sum of \$15,000.00 to complete this work, and build an addition to the coal house, which should be made when the switch is completed. For reasons which are explained in detail under the heading, "Institutions and Their Work," it was found impossible to complete the railway switch for the money appropriated.

The contingent and repair fund has been and is being used for the purposes intended. However, more extensive repairs are needed in nearly all of the buildings. While this is the newest of the hospitals for the insane, yet the buildings have been built about seventeen years and very little repairs have been made on them. The contingent and repair fund should be made at least \$25,000.00, as there are quite extensive repairs that should be attended to by the next biennial period. The water supply is not in a good condition. The water from the deep wells is contaminated with mineral sediment which is very injurious to the boiler tubes, piping and plumbing fixtures, causing extensive bills for repair. Some provision should be made for a new water supply, for which an appropriation of approximately \$10,000.00 will be needed.

STATE HOSPITAL AND COLONY FOR EPILEPTICS.

The thirty-fifth general assembly made provision for the establishment of the State Hospital and Colony for Epileptics, and the

thirty-sixth general assembly provided appropriations for starting the buildings and also provided rules and regulations for the admission of patients afflicted with epilepsy.

The institution is located in Boone county adjoining the town of Woodward in Dallas county, about twenty-nine miles north of the city of Des Moines and near the geographical center of the state.

A railway switch is built to the building site, and the institution is located on 1,144.4 acres of rich fertile land.

A contract has been let for what is known as the "Hospital Group" of buildings. A superintendent's residence has been erected; also a service building, a laundry building and a power house. Tunnels have been constructed to the different buildings, and a deep well sunk that will provide a sufficient amount of water. It is the aim of the board to have the institution open for the reception of patients about March 1, 1917. There have been several delays on account of scarcity of material; rush of business in factories who have contracts for steel and iron work in the buildings, and other causes beyond the control of the board.

The institution is designed eventually to take care of the epileptic population of the state. At this time, four new cottages are needed—two for each sex—which according to the estimate of the architect will cost the sum of \$85,000.00. These buildings would be of fire-proof construction and slate or tile roofing according to the general plan and outline for this hospital and colony.

Two central dining halls and kitchens will be needed for both groups, for which the sum of \$75,000.00 is asked.

Two cottages for tubercular patients should be erected; \$20,000.00 is the estimated cost.

Provision should be made for taking care of nurses and employes. It is proposed to build a separate building which will cost the sum of \$30,000.00.

A greenhouse should be built and it is proposed to build a garage and greenhouse combined. This will cost \$3,500.00.

It is the intention of the board to build up a good dairy herd here, and the sum of \$10,500.00 is needed for a dairy barn and two silos.

One thousand dollars is needed for a hog house and \$500.00 for a poultry house.

A telephone system should be installed and \$1,500.00 is the estimated cost. An appropriation should be made for improvement

of grounds including the building of cement walks, some grading and planting of trees. \$2,000.00 is needed for this item.

Fencing should be provided for, for which the sum of \$1,500.00 is needed, and a small appropriation of \$300.00 should be provided for the purchase of books, pictures, periodicals and newspapers for the patients.

Some provision should be made for the erection of a modern cold storage and machinery plant, for which the architect estimates the cost at \$7,500.00.

Tunnels are needed to connect the proposed new buildings. \$1,500.00 is needed for this.

A contingent fund should be provided to take care of matters that will naturally come up in starting an institution, and the sum of \$5,000.00 should be provided for this.

STATE HOSPITAL FOR INEBRIATES.

The last general assembly made an appropriation of \$5,000.00 for a new sewage disposal plant. The board, upon a thorough investigation, found it more advisable to repair the old disposal plant and this appropriation of \$5,000.00 has not been expended. At the present time the old plant is working reasonably satisfactory.

The appropriation for a new dynamo room and generating unit will be expended for the purpose for which it was intended; also the appropriation for a new boiler.

The contingent and repair fund should be made \$5,000.00. The sum of \$1,484.12 has been expended from the special state tax granted by the thirty-fifth general assembly for developing industries, in improvements of the brick and tile plant. The state now owns, at the State Hospital for Inebriates, a modern brick and tile plant which is furnishing large quantities of products to other state institutions and is selling the surplus on the market at the market price.

The appropriations asked for are quite moderate. A new fire station and new hose for the fire department is needed, for which an appropriation of \$2,000.00 is asked.

An appropriation should be made for books and periodicals, laboratory equipment, and renovating and replacing old furniture; also a small ice house is needed.

STATE PENITENTIARY.

The thirty-sixth general assembly provided for the abolishment of the contract system of employment of prisoners and authorized the Board of Control of State Institutions to establish industries. The last contract will expire November 30, 1917, and that will be the end of the contract system in Iowa.

The board has established a chair and furniture industry in the State Penitentiary, which is employing 150 of the inmates. The finished chairs are disposed of through a selling agency. It is believed that this system will work out well, as it is quite expensive to put the manufactured product on the market, especially as there is some prejudice against prison made goods which is hard to overcome. As soon as the industry gets established, the men employed in this work will be paid a stated sum, depending on what the earnings of the enterprise will be. From 100 to 200 men have been employed on public works during the open season of 1914 and 1915, one camp being established at the Institution for Feeble-minded Children at Glenwood, one camp at Columbus Junction, and one camp at the State Hospital and Colony for Epileptics. The Board intends to extend this work, as it is believed that work in the open air will be quite beneficial to a certain class of prisoners. Naturally these have to be selected with great care by the warden.

The appropriations made by the last general assembly have been expended for the purposes for which they were made. An excellent deep well has been sunk on the farm and the contingent and repair fund has been used for contingencies and repairs on the different buildings on the farm and in and around the institution. The contingent and repair fund should be made \$15,000.00.

An appropriation should be made for remodeling and furnishing the old residence of the warden for offices, and certain improvements are needed in the old cell house, such as installing toilets and water supply to each cell.

The other appropriations made by the general assembly have been expended or are under way. The sum of \$15,000.00 has been expended for the appropriation given by the last general assembly, for lands at each institution.

The building of the warden's residence is under way, it being the intention to build largely with prison labor.

The state has expended the sum of \$53,842.70 from the industrial building and equipment appropriation, and has expended the sum

of \$56,040.84 from the establishing and maintaining industry appropriation; also the sum of \$11,844.51 from the special millage tax granted by the thirty-fifth general assembly for industries. The present contract with the Iowa Farming Tool Company expires November, 1917. As this is the last of the contract system in Iowa and these prisoners should be employed, an appropriation of \$100,000.00 should be made to be used in maintaining and extending industries.

THE REFORMATORY.

The appropriations made by the last general assembly have not all been expended at the end of the biennial period. However, the work is under way.

A new ice house has been built and completed since the end of the biennial period, and a stone horse barn has been completed.

Appropriation for improvement of the water supply—this work is still under way. A new tower has been erected and the work carried out, and contracts awarded as per plans made by the engineering department of the State University.

The sum of \$23,758.35 has been expended for the purchase of land adjacent to the institution. This sum was taken from the general appropriation given the board of control to purchase land, and to be used for other purposes. The sum of \$61,079.39 has been expended from the special appropriation for establishing and maintaining industries. The board has purchased 141.25 acres of land in Lyon county, for the purpose of opening up a stone quarry in connection with The Reformatory. This land is underlaid with a rich vein of granite. The intention is to open up a quarry and connect same by switch track with the Chicago, Rock Island & Pacific Railway, and establish a camp of prisoners from The Reformatory on this quarry site. An appropriation of \$100,000.00 is needed to put in a modern crushing plant at this quarry, and about \$35,000.00 will be needed to build a spur track to the quarry from the Chicago, Rock Island & Pacific Railway tracks.

IOWA INDUSTRIAL REFORMATORY FOR FEMALES.

The thirty-sixth general assembly provided an appropriation for the purchase of land and provided appropriations for certain buildings. The board has purchased 218.8 acres of land one mile east of Rockwell City in Calhoun county. The land is located on the

interurban railway and the railway company has provided a side-track to the institution buildings. A contract was awarded to the Bailey-Marsh Company for the erection of a power house, a cottage for inmates, a pathological building that will be used temporarily for inmates, and an administration building.

Contracts have also been let for heating and tunnel system, and a shallow well has been drilled to furnish water for building purposes. The contract provides for the completion of these buildings not later than July 1, 1917.

In order to properly equip this institution for taking care of the delinquent women of the state as contemplated by the law enacted by the thirty-sixth general assembly, the following buildings are urgently needed to equip the institution and enable it to receive patients in the autumn of 1917:

Two cottages for inmates, and furniture, furnishings and equipment for same.....	\$70,000.00
Water tower and tank.....	5,000.00
Water supply, pumps and equipment.....	8,000.00
Sewage disposal plant and sewer.....	6,000.00
Electric wiring, fixtures and equipment.....	1,000.00
Storeroom.....	1,500.00
Laundry and equipment.....	12,000.00
Furniture and furnishings for all buildings.....	5,000.00
For finishing a pathological building to be used for inmates, and part of the building for a hospital.....	5,000.00
Drainage, fencing and gates.....	1,500.00
New walks, drives and planting trees.....	1,000.00
Industrial building and schoolhouse, combined.....	20,000.00

Provision should also be made for a contingent fund for \$2,500.00 to take care of emergency matters that come up in starting and running an institution of this kind.

The board has adopted a plan of fireproof cottages, laid out around a central campus, designed by Proudfoot, Bird & Rawson, architects. Each cottage will hold twenty-nine inmates, and each cottage will be entirely separate from the others. There will be no walls or guards around the institution. The inmates of each cottage will have their own dining hall and kitchen, and will live their own lives in their own way. It is the intention of the board to segregate the different classes of prisoners and comply with the requirements of the statute. This institution is designed as a women's reformatory to take care of the women delinquents of

the state. The name should be changed to the "Women's Reformatory."

A station on the ground has been named "Lanedale," in honor of the distinguished Iowa woman, Carrie Lane Chapman Catt.

A camp of prisoners from The Reformatory has been helping the contractor erect the buildings, and it is the intention of the board to use these prisoners to make roads and build walks, and do other necessary work in and around the institution.

GENERAL MATTERS.

The thirty-third general assembly enacted legislation placing roads within and adjacent to state farms under control of the board. Acting under the opinion of the attorney general as to the duties of the board under this act, the board has taken charge of the highways within and adjacent to state lands, and has employed Thomas H. MacDonald who is the engineer of the State Highway Commission, to take general charge of those highways located in different parts of the state. Some of these roads have been neglected for a great many years, as it was uncertain who had control of them. However, the board has made them all passable and safe for traveling, including draining and grading, and some graveling, but have not attempted under the authority given, to build permanent paved roads.

The thirty-sixth general assembly appropriated the sum of \$5,000.00 to be expended under the direction of the Board of Control of State Institutions, for paying the expenses and for medical attention and treatment of friendless girls in maternity cases, in certain homes for friendless women in Iowa. Acting under this provision of law, the board investigated certain homes that are taking care of friendless and unfortunate girls in maternity cases, and have aided girls confined in the Salvation Army Rescue Home in Des Moines; the Florence Crittenton Home in Sioux City; and the Benedict Home in Des Moines. The board has made investigation and these are the only homes found in the state that are taking care of these friendless girls in maternity cases that would in the opinion of the board be eligible to aid under this act.

FARMS, DAIRIES AND GARDENS.

The yield of farm crops grown upon the state farms since the last biennial report, has been quite satisfactory. The farms in some sections of the state have suffered from too much moisture and in other parts of the state from extreme drouth, but taken as a whole the yield has been satisfactory. The failure of the potato and bean crop this year is a serious handicap and will materially affect the support funds. On the other hand, the corn crop averages well and the hay crop excellent, the small grain crop running from fair to large.

Most of the institutions have escaped from the ravages of hog cholera and have large herds of healthy hogs in their yards. The practice is followed of vaccinating the hogs promptly, and the board is convinced that the results justify the expenditure.

More attention has been paid to raising winter wheat than in years past, the result being satisfactory.

The board is proud of its dairy herds. They are of Holstein breed and by much care and breeding, sorting out from season to season the unprofitable ones, and keeping only the best cows, the standard of the herds has been raised until at nearly all of the institutions they have become quite profitable, furnishing a good and wholesome diet for the wards of the state. The blood of some of the state's greatest milk producers has been infused into our herds and on a seven-day test at Mount Pleasant State Hospital the report is that in at least three instances the state's record of this year has been beaten.

Rhoda Jewell Aberkerk Third Gerben made 582.01 pounds of milk and 32.126 pounds of butter in seven days.

Rhoda Korndyke made 537 pounds of milk and 33.335 pounds of butter.

A junior two-year-old made a little better than 23 pounds of butter in seven days.

This shows what careful breeding, care and feeding will accomplish. The annual production of one dairy has been improved and the individual returns from the cows much increased.

Total amount of products produced on farms, orchards and gardens since last report is as follows:

GENERAL STATEMENT

Farm products	\$416,989.92
Poultry yards	9,328.07
Live stock sold	28,161.25
Dressed meat	80,995.35
Garden products	151,841.74
Orchard products	35,488.19
Miscellaneous	1,928.77
	<hr/>
	\$724,782.79

The total increase over last report is \$154,209.96.

Live stock on farms, June 30, 1916, as follows:

Horses	256
Mules	103
Bulls	32
Cows	781
Steers	196
Heifers	333
Calves	367
Sheep	426
Hogs	3,732
Chickens, ducks, geese and turkeys.....	13,440

The total value is \$200,667.75.

Increase over former period is \$44,132.45.

LAND.

Since the last report, land has been purchased for the institutions as follows:

Name of Institution.	Acres.	Value.
Clive	781.82	\$157,651.88
Fort Madison, city lots and buildings estimated at..	3.5	15,000.00
Mount Pleasant	78	10,763.24
Anamosa, 19 city lots, estimated at.....	7	1,460.00
Farm land	44	7,920.00
Quarry in Lyon county.....	141.25	14,125.00
Rockwell City	218.8	50,327.80
Woodward	439.7	95,125.50
	<hr/>	
Total		\$352,373.42

The state now owns 10,413.48 acres of land for the sixteen state institutions under the Board of Control of State Institutions, as follows:

	Acres.
Soldiers Home, Marshalltown.....	156
Soldiers' Orphans' Home, Davenport.....	294.47
School for the Deaf, Council Bluffs.....	212
Institution for Feeble-minded Children, Glenwood.....	1,015.18
State Sanatorium for Treatment of Tuberculosis, Oakdale.....	274.70
Industrial School for Boys, Eldora.....	840
Industrial School for Girls, Mitchellville.....	175
Mount Pleasant State Hospital.....	1,065
Independence State Hospital.....	1,348.93
Clarinda State Hospital.....	859.82
Cherokee State Hospital.....	997.27
State Hospital and Colony for Epileptics, Woodward.....	1,144.4
State Hospital for Inebriates, Knoxville.....	345.79
State Penitentiary, Fort Madison.....	1,023.82
The Reformatory, Anamosa (19 city lots not included).....	442.25
Industrial Reformatory for Females, Rockwell City.....	218.8
Total	10,413.48

COAL.

Coal for state use is being bought on the B. T. U. basis, having analysis of each car made at the Iowa State College at Ames. This is found to be more economical than purchasing without analysis. Last year coal was purchased largely from Iowa mines. The last contract, however, has been mostly awarded to eastern companies, they being lower bidders than the Iowa concerns.

This action has called forth much criticism from Iowa operators. The board would much prefer to buy coal supplies from Iowa firms but the bids have been such that in order to comply with the law and to protect the state institutions, it is necessary to place orders outside the state. But in all cases, Iowa dealers have been given the preference whenever bids were equal.

The following is the amount of coal used at the several institutions for the two years ending June 30, 1916:

Iowa coal	107,154 tons.....	cost \$285,854.44
Illinois coal	89,182 tons.....	cost 249,345.38

Total number of tons consumed

in two years.....196,336 tons.....cost \$535,199.82

It is estimated that owing to the increased consumption and

advance in the price of coal, the expenditure for coal for the coming biennial period will exceed that of the previous biennial period more than \$30,000.00.

WATER SUPPLY.

The following is the report covering the water situation at the institutions below enumerated:

The artificial pond previously built at the School for the Deaf, convenient to the buildings should be so improved by building cement bottom and sides as to make it an excellent reservoir to hold an abundance of water. The estimated cost for such improvement is \$2,500.00.

At the State Sanatorium, there is but one fairly good well, the second deep well having entirely failed. Should an accident occur to the present water supply, the institution would be destitute of water. Another well and equipment should be provided.

During the last biennial period, a deep well has been sunk on the grounds at the Industrial School for Boys, which furnishes an abundant supply of good, pure water. The cost of this improvement was \$1,551.37.

The water supply at the Industrial School for Girls has been very much improved since the last report, by the sinking of a well at a cost of \$2,642.50, which furnishes an abundance of water.

Since the last report, one of the wells at the Mount Pleasant State Hospital has been deepened at a cost of \$5,302.42. This improvement furnishes the institution with an abundance of water.

At the Independence State Hospital, under the contract which exists between the state and the city of Independence, a portion of the water supply is furnished by said city but a major portion of the water is being furnished from wells on the institution grounds. A well was recently sunk on the farm at a point about one mile southwest of the hospital. It is six inches in diameter, steel-lined, two hundred and thirteen feet deep. The cost of this well was \$319.50. It is so located that water for live stock may be pumped into cement tanks and will accommodate three or four fields, that corner near the well. Sixteen sanitary drinking fountains of approved pattern have been placed upon the wards for the benefit of the patients which they very much appreciate.

An abundant supply of good water has been secured, since the sinking of the twelve shallow wells on the Willowdale Farm of the Clarinda State Hospital, which is situated on the Nodaway river

bottoms. These were connected with a permanent and efficient pump house, supplied with necessary machinery, and an eight-inch main was laid and connected with reservoirs at the institution nine thousand feet away. This supply together with the wells formerly sunk at the institution grounds, supplies an abundant amount of water for all the wants of the institution.

The last report shows an abundant water supply for all institution purposes at the Cherokee State Hospital. Since that time, however, many of the water pipes and well casings have become corroded and eaten through in places and much impure water is discharged from the deep wells, giving the institution very poor and impure water for its use. An appropriation for a sufficient amount should be made to correct this defect.

Under a contract entered into with Charles D. Nolan of Cedar Rapids, a deep well was sunk on the farm at the State Hospital and Colony for Epileptics, at a cost of \$6,000.00. At a depth of 1,810 feet, an abundant supply of good water was struck. A test of twenty-four hours was made and the well furnished more than 210,000 gallons of water in that time. We believe there is an abundant supply of water in this well for all institution purposes. However, it may be necessary to sink a shallow well in order to provide for a water supply in case of accident to the larger well.

At a cost of \$1,854.44, a deep well was sunk on the farm at the State Penitentiary, which furnishes the farm with plenty of water.

At The Reformatory, the sum of \$5,950.84 has been expended for increasing the water supply, which furnishes an abundance of good pure water.

FIRE PROTECTION AND LOSSES BY FIRE AND STORM.

The losses by fire and storm, during the biennial period ending June 30, 1916, were as follows:

Independence.....Cottage	Fire.....Loss..	\$ 411.08	
Cherokee.....Chicken house	Fire.....Loss..	5.00	
Oakdale.....Hospital kitchen	Fire.....Loss..	45.00	
	Hospital kitchen	Storm.....Loss..	50.00
Eldora.....Main building	Fire.....Loss..	411.60	
Anamosa.....Cooperage building and supplies stored therein	Fire.....Loss..	213.85	
Davenport.....Cottage	Fire.....Loss..	75.00	
Knoxville.....Clay Industry—Roof of dry room and damage to gaso- line engines	Fire.....Loss..	46.13	

Council Bluffs....Main building	Storm.....Loss..	\$29.85
	Roof	\$106.00
	Industrial building roof ...	7.94
	Greenhouse, glass	156.11
	Gymnasium roof	61.30
	Industrial schoolhouse roof	37.52
	Roofs on main building...	460.98

Total amount of losses by fire and storm.....\$2,087.51

There has been expended for fire protection during the same period, as follows:

Davenport.....Fireproofing industrial building	\$2,400.00
Eldora.....Fire station	2,500.00
Glenwood.....Equipment for fire department.....	214.00
Knoxville.....Fire equipment	446.13
Cherokee.....Circular fire escape on administration building..	1,055.00
Clarinda.....Fire escapes	450.00
Mount Pleasant...Fire escapes	450.00

Total

Appropriation not expended:

Anamosa.....Fireproofing floors, ceilings and roofs.....	\$5,000.00
--	------------

CHAPTER II—Institutions and their Work.

SOLDIERS' HOME.

Since making the last biennial report, this institution has sustained the loss of its commandant, C. C. Horton, who departed this life April 21, 1916. Colonel Horton was a well-trained soldier, giving to this institution and its inmates his very best services, always looking to the welfare of the soldiers and their wives who found in this institution their home. He was always loyal, true and faithful in the discharge of all his duties to the state. His loss will be long felt at this institution.

On April 1, 1916, the board appointed B. C. Whitehill of Marshall county, a Spanish-American war veteran, to supply the place made vacant by Colonel Horton's retirement. In appointing a young man as commandant over the veterans of the Civil War, the board was fearful lest the infusing of young blood into this institution so long presided over by a man who fought by their sides, might be resented by them, but we are happy to report that the soldiers and their wives gave to Mr. Whitehill a most hearty welcome and at this writing, the affairs of the institution are running along in a most satisfactory manner. There is no institution under the state's control where the inmates are entitled to better care and consideration than at Marshalltown. It should not be forgotten that we owe the very existence of this republic of ours to their patriotism, unselfish sacrifices and the heroic defenses rendered by these, "Our Boys in Blue."

The average population covering the biennial period was about 750, a little over one-fourth being females. At this writing the population is 899, the largest in the history of the institution. Every available space for widows, even the parlors, are being used for their accommodation. The soldiers are growing old and old age brings its infirmities. Consequently, the hospital is taxed to its capacity to accommodate those needing hospital care.

The finances of the institution are in very good shape but the increased cost of living is going to make it problematical whether or

not the institution can be run upon the per capita now allowed. However, when spring comes, it is hoped a sufficient sum will remain in the treasury to relieve all anxieties.

SOLDIERS' ORPHANS' HOME.

No appropriations for specific improvements at this institution having been asked of the last legislature, there is little to report involving the expenditure of funds. During the biennial period special attention has been given domestic science, agriculture and manual training. The school equipment has been improved by the purchase of maps, charts, globes, reference books, dictionaries, etc. Not forgetting the old adage about "all work and no play," playground equipment has been installed and a physical director employed. Each child is given a thorough physical examination to the end that his play or athletic training may be intelligently supervised.

It is the policy of the board to place children in private homes wherever possible rather than to increase the capacity of the institution, believing that the average Iowa home is a better place in which to rear a child than any institution. To this end the two state agents having charge of this branch of the work have, during the year, returned 332 children to parents or guardians and have placed in other homes, 69. To re-establish the home from which the child came is the result sought and this is done where conditions will permit. We refer to the reports of Superintendent Mahannah and of the state agents, Miss Charlotta Goff and Miss Anne Sheehan, for details.

This institution deals with the same problems as do the public schools, with the added feature that it must provide for the physical needs of the entire population for twelve months in every year.

Appropriations for the comfort, health and education of these boys and girls should be carefully considered.

SCHOOL FOR THE DEAF.

The thousand dollars appropriated by the thirty-sixth general assembly for the purchase of tools and machinery for manual training, books and periodicals, have been judiciously expended. The appropriations now recommended are for improvements which cannot safely be postponed. The improved roads, as constructed by the highway commission, connecting with the paved streets of the city of Council Bluffs, add greatly to the comfort and convenience of the school.

INSTITUTION FOR FEEBLE-MINDED CHILDREN.

The Institution for Feeble-minded Children is located at Glenwood in Mills county, Iowa. It was opened for inmates in 1876. On the 30th day of June, 1916, there were 741 male and 753 female inmates, making a total of 1494, being an increase of 124 since the end of the last biennial period. This is one of the largest institutions in the state.

The state owns 1015 acres of land and agriculture is carried on quite extensively here as well as gardening, hog raising, dairying and other incidental adjunctions to the general agricultural plan.

As is generally known, the feeble-minded are divided into three classes: the idiot, the imbecile, and the moron. Without attempting to be exact there are perhaps 300 of these children who are unable to care for themselves and must be carefully looked after—even dressed, washed, or overseen while washing, as well as in many instances fed by those in attendance.

The water supply at this institution has been a source of a great deal of concern in the past, and the state has expended a great deal of money in developing a water system that would meet the needs of the institution. The previous board found it necessary to go some distance from the institution to get a sufficient supply of good water. While the quality of the water obtained in the wells located nearly three miles from the institution is first-class, the dry season has demonstrated that the quantity is hardly up to that which was anticipated. The pumping station was put in on the quarter section of land belonging to the state and water was obtained at a depth of from twenty to twenty-five feet. It may be necessary in order to insure a sufficient quantity of water for the future to make some additional improvement by putting down more wells and making them deeper than those that are now there.

While it is the general belief that the inmates at this institution can receive but little mental improvement, yet a system of school work to the extent of the mental capacity of the inmates, is carried on. There are few inmates, if any, whose mental capacity would carry them much beyond the sixth grade, and few who can get through life without personal assistance. Yet it is the opinion of the board that many of the boys and girls who are classed as morons might be paroled and hired out to farmers and those who need domestic help. This would relieve the state of the danger that confronts it of being obliged to make extensive enlargements at the in-

stitution, if not ultimately to establish and build a new institution.

The farm work, garden work, orchard work, and the care of stock and poultry is carried on by the children at this institution under the guidance of employes who handle and direct the work of from five to ten children at a time. This institution has been satisfactorily managed both in a financial way and in the care and management of the inmates, by the present superintendent. The institution is well equipped with horses and mules to do the farm work and other work of like character that is carried on in the premises, and it has a fine herd of Holstein graded cows, as well as a fine lot of hogs.

Some additions should be made to the cottages, as recommended by the board in other parts of this biennial report.

STATE SANATORIUM.

This institution was established at Oakdale, Johnson county, near Iowa City, Iowa, in the year 1908. On the 30th day of June, 1916, there were 82 male and 94 female patients in the institution, this being an increase over the previous biennial report. There were received during the biennial period 678 patients and treated during the same period 786, which included those at the institution on the 30th day of June, 1914. The number discharged from the institution during the biennial period ending June 30, 1916, was 610. The superintendent reports that the disease known as tuberculosis was arrested in two patients during the said period and those were males; that the disease was apparently arrested in 46 male and 67 female patients; that the disease was quiescent in 53 male and 75 female patients, a total of 128; that the number of improved was 65 male and 97 female patients, a total of 162. The number unimproved was 48 male and 56 female patients, a total of 104. During the said period 46 male and 35 female patients died, a total of 81. Those who were at the institution less than a month prior to June 30, 1916, which cannot be reported as cured or not cured, or improved or unimproved, numbered 34 male and 32 female patients, a total of 66.

The condition of patients discharged during the biennial period ending June 30, 1916, was incipient: in two the disease was arrested; in 36 apparently arrested; in 40 quiescent; 28 improved and 6 unimproved, and 12 less than a month in the institution prior to June 30, 1916. Those moderately advanced: in 29 the disease ap-

parently arrested; in 66 quiescent; in 82 improved; 30 unimproved, 68 unimproved; 76 died and 29 in the institution less than one month prior to June 30, 1916.

From this analysis of the condition of patients discharged, it will be seen that in only two was the disease arrested, so that they might be considered cured; in 167 apparently arrested; in 128 quiescent, or laying dormant; 162 improved; 104 unimproved; 81 died, and 66 in the institution less than one month prior to the end of the biennial period, making a total of 610.

This is one of the most important institutions in the state. Every facility to aid in stamping out this dread disease should be given the institution by the legislature. It is understood by the best medical authorities that the disease, or rather the germ that causes the disease, gets in its work on the young and those who have not reached the period of physical development; that then it may lay dormant for years, but all the time is insidiously at work undermining the health of the victim.

The writer is not satisfied that the institution should attempt to handle the advanced cases where there is no hope for improving the condition of the patient or arresting the disease. While the state has expended during the first year of the biennial period now considered, \$50,000.00 in erecting a hospital for the advanced cases and has now under construction and nearing completion, an addition to said hospital, costing upwards of \$40,000.00, yet the writer cannot see that it is a wise thing to bring from all parts of the state to the hospital those who are about ready to pass away, where there are hopeful cases and cases in the incipency of its ravages.

Some counties have established hospitals and are caring for the patients of their locality, which relieves the state and the sanatorium of an extra burden.

Some years ago, the Board of Control of State Institutions recommended to the legislature a law authorizing counties to unite and build suitable hospitals for the care and treatment of tubercular patients within these respective counties. We think that was a wise recommendation and the district should be large enough to accommodate a sufficient number so that the best of treatment and medical care could be furnished and this would enable us to see if the disease could not be stamped out.

The old wooden buildings which are used for outdoor or sleeping porches where the patients are cared for will soon become of such a nature that it would be wise to have them burned and new ones installed.

The state owns at this institution 275 acres of land, which is far from being the best land that Iowa can afford. Farming and raising sheep, hogs and cattle, with a nice dairy herd, is carried on at the institution, but as the patients are unable to do any work or assist materially in this matter, the expense of carrying this work on is more than at the other institutions where some relief can be had by giving employment to the inmates or patients.

EDUCATIONAL WORK

Mr. A. E. Kepford was reappointed by the board after an absence of upwards of a year, and is again at work on the educational part of the institution. To disseminate knowledge and information as to this dreadful scourge is an important feature and Mr. Kepford's work is to meet school gatherings, farmers' societies and all kinds of public gatherings and give public lectures telling what is necessary to be done as a preventative for the spread of the disease, and what is necessary to check its progress and finally wipe out from the human family this most dreadful scourge. The physicians of the state likewise are interesting themselves in the treatment of the disease and willingly give of their time and services to the spread among the people of a better knowledge of how to live and how to combat the scourge. A number of physicians are called to work in conjunction with Mr. Kepford and good work has been done.

For the newspapers of the state it might be said that they are most generous in spreading among their readers everything that they can obtain pertaining to lectures and what is new about the disease and thus help to fight this worst of all human scourges.

The board takes pride in expressing appreciation for the splendid work from all these agencies in this, one of the most trying parts of the work that comes to the board. At the State Fair during the last season, exhibits were made regarding the disease and its remedies, and the people in attendance at the State Fair seemed to be very much interested and gladly attended the department where the exhibit was had and where instructions were given out by Mr. Kepford and his assistant.

A plan was adopted some years ago when the last Sunday in April was a day set aside in the various churches of the state, for discussions as to the causes and method of preventing this disease, and the work accomplished by this means was very satisfactory. It should be kept up and have the ministers of the various churches treat the subject for the benefit of the people. No class of individuals is more

earnest or more anxious to assist in spreading the knowledge of how to treat and prevent the disease than the ministers of the various religious denominations of the state. It may candidly be said that the people are showing a knowledge gained from these various agencies as to the treatment and prevention of the disease. People are building sleeping porches and new homes are being provided with such quarters where fresh air and sunlight now have free access, and where in the years gone by both were excluded.

The legislature should devise a plan whereby a more courageous and enthusiastic movement could be inaugurated throughout the state through the various local boards of health and thus arouse the idea of the necessity of spreading information and getting it to the people, especially those who have little apprehension of the awful and destructive work of this dread disease. Our predecessors have from time to time recommended that the children attending the schools and colleges of the state, be examined at least every six months so that it can be ascertained when the disease is becoming a menace or developing in an individual.

We believe that the state could expend its money no more beneficially or satisfactorily than by having such a law, with all the machinery necessary to make it operative and not a dead letter. We believe that the people of the state would approve most heartily of such a law, for it would tend ultimately to wipe out from our midst the ravages of tuberculosis, known as the "white plague."

INDUSTRIAL SCHOOL FOR BOYS.

At Eldora, Hardin county, Iowa, is located the Industrial School for Boys. The legislature established the school at this place in 1868. The main building was opened for the reception of boys in 1873. On the 30th day of June, 1916, there were 415 boys in this school. Boys are received here from ten to eighteen years of age. Besides the administration and main building there are eight cottages which accommodate from thirty to forty boys each and are under the charge of a matron.

The boys are taught to be industrious and different occupations are provided for them; some work on the farm; some work in the dairy department; some do general work around the institution; some are in the industrial department, such as the tailoring, printing and wood-working department. Work is found in the laundry for a number and others are employed in the engine and coal house, so that all the boys are more or less occupied.

The school feature is made a prominent factor in the development of the boys. They are taught all branches up to the eighth grade. A very efficient corps of teachers at the well-built and splendidly-arranged school building take pride in having the boys learn those things which come nearer to their home life and that will be of benefit to them in after years.

There are 840 acres of land connected with this institution and while it is not the best land that could have been procured for the institution, yet it is well cropped and as a general thing produces sufficient grain to care for the stock that is at the institution.

There are a few things which the board would urge upon the legislature to provide for this school, which would very materially augment its efficiency.

We believe that there ought to be established at this institution a garage or automobile shop. We learn from the superintendent that every boy who comes to the institution is more or less familiar with the automobile and its mechanism. It seems to be a source of great pleasure to the boy to work on automobiles and to become familiar with its operation and all of its parts. We believe that by the establishment of this garage near the highway where public service could be rendered, an occupation could be furnished many of the boys who have a mechanical turn of mind and in this way make them the possessors of an occupation and trade that would be beneficial to them when they again take their place in society.

We believe that another cottage should be provided so that boys will not be required to sleep two in a bed, as is necessary at the present time. Improvements should be made in the toilet facilities in the present cottages and also the bathing and washing rooms of each cottage should be remodeled. We would also urge upon the legislature the increasing of the help of this institution so that one or two watchmen might be there, whose duty would be to visit the dormitories of the boys several times during the night. It is unnecessary to tell any intelligent person why this precaution should prevail when the habits and evil propensities of boys of this age are so prevalent.

We take pride in saying that at an expense of about \$60,000.00 a splendid gymnasium has been pushed along until it is about ready for occupancy. Splendid bathing facilities are provided for in this building and a large swimming pool which will make the place more attractive to the boys, as well as a source of healthfulness and physical development, which is so essential to the well-being of the boy.

The water supply at this institution has been much improved within the last two years by obtaining a fine well of water with a magnificent flow. This will insure the institution for years with a splendid quality of water, as well as a sufficient amount.

We also believe that the allowance which is now provided for the care of the boys should be increased, as the needs of the institution have increased and the cost of furnishing these boys what is necessary has correspondingly increased, so that the present allowance puts the institution in an embarrassing financial situation to make ends meet.

The main building, which we call the administration building, should be remodeled and a sufficient amount of money appropriated to repair it so that it would be in a more sanitary and a safer condition than it is now in. It was erected prior to 1873, and many parts of it are deteriorating, and as it is not a fireproof building, it is a more or less dangerous place. It could be remodeled, retaining the outer walls, perhaps, so that it would be safe from a material viewpoint and also made more resistable to fire damage.

The board is happy to report that the work of those in charge of the institution has been very satisfactory and the efforts of the superintendent and all those who work with him, are to do that which is best for the boy.

In this connection we desire to say that the athletic spirit is prevalent in this school, and the baseball, basketball and football teams are receiving very courteous treatment at the hands of the high schools and small colleges of the state. This is encouraging, because the boy, when he goes to this school, should feel that there is not much difference between this institution and the ordinary college, and that it is a place of education and training which is very essential to the well-being of the boy and will enable him when he becomes a man to take his place in the citizenship of the country.

INDUSTRIAL SCHOOL FOR GIRLS.

The Industrial School for Girls was established in 1880, at Mitchellville, Polk County, Iowa. On June 30, 1916, there were 167 girls in attendance. The population increases and decreases from time to time throughout the year. In this school there are eighteen colored girls who are separated from the white girls. This became necessary some years ago because of practices that were demoralizing to both the white and the colored girls of the school.

There are 175 acres of land in connection with this school. The girls do some work in the garden and orchard and do all the work in putting up preserves and the like. Schools are maintained, where the ordinary branches such as are taught in the public schools, up to the eighth grade are taught.

The administration of this school is admirably conducted by the present superintendent and the efficient force under her, and domestic science is made the controlling feature of the girls' training. Girls who show a disposition by their conduct after entering the school that they are worthy of promotion, are admitted into the domestic science class and are graduated from that class not only because well qualified to do the necessary cooking of the household, but also having proven by her conduct that she is a girl of good moral character. The girls are encouraged in this line of work and are shown that their efforts in this direction may prepare them for the holy position of wifehood and motherhood.

They are very carefully taught fancy work and needlework, so that when they leave the school they may be able to use their hands not only for personal adornment, but also enables them to make a livelihood more easily for themselves.

The musical disposition of the girl is encouraged by a musical training, and many of the girls show splendid talent in this direction.

This institution is well provided for in buildings and equipments, excepting perhaps that a modern cottage should be built for the colored girls. The one now being occupied by them could be used to accommodate other girls from time to time.

STATE AGENTS.

The state agents, one at the Industrial School for Boys, and one at the Industrial School for Girls, have been doing splendid work in finding homes for the students and in looking after their welfare and keeping in touch with them until such time as they are settled down for themselves. The plan of having state agents do this work was a wise one and the board is convinced that it is one of the best means ever devised for the welfare of boys and girls, who by reason of unfortunate environments fall into error and come within the class described in the law as being eligible to these institutions.

HOSPITALS FOR THE INSANE.

On the 30th day of June, A. D. 1916, there were in the custody of the state at the four state hospitals for the insane, 2,569 male patients and 2,015 female patients, being an increase of twenty-eight over the number at the said hospitals on the 30th day of June, 1914. The male population of Iowa, according to the 1915 enumeration, was 1,212,988 and the female population was 1,145,078. It will be seen that there are in the state hospitals for the insane, 554 more male patients than female.

In the county homes of the various counties in the state, there are 558 male patients and 557 female.

The number of insane patients in private institutions of the state on the 30th day of June, 1916, was 227 male and 344 female, making a total of 571. In these private institutions, there were twenty-nine male and sixty-one female patients held, who were considered insane but who had not been legally declared insane. This makes the total number of insane in the private institutions in the state, 256 male and 405 female patients, a total of 661.

There are also confined in the department for the criminal insane at The Reformatory, Anamosa, Jones County, Iowa, ninety-four patients.

We therefore have in the state institutions, 4,678 insane patients and in the county homes of the state, which are under the supervision of the Board of Control of State Institutions, 1,115; and in the private institutions also under the supervision of the board, 661, together with the criminal insane. This makes a grand total of insane persons in custody in the state 6,454.

MOUNT PLEASANT STATE HOSPITAL.

The oldest hospital for the insane in the state is located at Mount Pleasant, the county seat of Henry County. The appropriation for the establishment of that institution was made by the general assembly in 1855. It took seven years before the institution was open to receive patients. On March 6, 1861, it was finally opened for receiving the insane patients of the whole state. The main part of this hospital is a massive stone structure, built on the congregate plan in quadrangle form. It is, in many respects, deteriorating and will need constant repairing. Owing to the sandy soil upon which it rests, it seems that from some cause it is settling and causing large cracks in the walls of the wards from the basement to the top ward. The legislature should investigate the needs of this institu-

tion. If sufficient funds are placed at the disposal of the board, it can be conserved to answer its purpose for many years. Neglect on the part of the legislature to look into this matter may cause a loss to the state, which would have to be made up at enormous expense in the near future.

INDEPENDENCE STATE HOSPITAL.

The state hospital for the insane, located at Independence, Buchanan County, Iowa, was opened for the reception of patients in 1873. This hospital is located on an elevation which gives it a good drainage and offers a very pleasant view of the surrounding country. It was also built on the congregate plan, but somewhat modern to that of Mount Pleasant. This institution is in fair condition to take care of its patients by reason of the additions which have been built by the state since the establishment of the main institution.

CLARINDA STATE HOSPITAL.

The next hospital for the insane which the state generously provided, is located at Clarinda, the county seat of Page County, Iowa. This is also somewhat on the congregate plan, but has an element of the compact and detached cottage plan. It is a step forward from the old complete congregate method, which was adopted in the later fifties at Mount Pleasant. This institution was opened for receiving patients on the 15th day of December, 1888.

CHEROKEE STATE HOSPITAL.

The fourth state institution for the care of the insane was established at Cherokee, Cherokee County, Iowa, and opened for the care of patients on the 15th day of August, 1902. This institution was built on the compact plan, the retention of the congregate idea being the main feature of the institution with detached cottages which very materially assist in the care and management of those of our citizens who are afflicted with mental diseases.

GENERAL.

We can say that the heads of the four hospitals for the care of the insane take exceptional pride in keeping the wards scrupulously neat and clean and exert every effort to see that the patients are furnished with every comfort possible, and especially that they are relieved of physical annoyances by regular attendants and by

members of the medical staff of each institution. It is not boastful to say that Iowa, in the way of furnishing comfort for its insane and for the quality of the food that it furnishes them, stands at the head of its sister states in this particular.

The present members of the Board of Control of State Institutions, and, as the record discloses, the past members of the board, since its inauguration, are and have been of the opinion that the medical staff of the state hospitals for the insane should be furnished with modern facilities and modern apparatus and every known modern convenience which may enable the staffs to do the best for the insane that skill, thorough scientific research and knowledge can afford.

A very important matter, as the board views it, is the segregation of the insane who may be afflicted with tubercular trouble. At the hospital at Mount Pleasant and also the one at Cherokee, tuberculosis hospitals have been provided, and we learn that very beneficial results have come from the maintenance of these two adjuncts to the hospitals for the insane. We think there should be similar additions to the hospitals at Independence and Clarinda.

COUNTY HOMES AND PRIVATE INSTITUTIONS.

The state inspector of county homes and also of private institutions, has reported to the board regularly the conditions of the various places where the insane are cared for, and gives flattering reports of the care of the insane at private institutions and at most of the county homes. There are a few counties which have been somewhat dilatory in providing the best way of taking care of the insane, but these instances are few, and the board of supervisors of the various counties seem to desire to work in harmony with the prevailing notion of the people and of the firmly established notion of the Board of Control of State Institutions, that those of our citizens afflicted with mental diseases should receive the best and tenderest care.

CRIMINAL INSANE.

With reference to the department for the criminal insane at The Reformatory, we wish to enter our firm resolve that, of all the efforts made by the state to care for the afflicted and relieve the sufferings of those who come to its charge, the condition for the unfortunate criminal insane is deplorable. The facilities afforded in this department at The Reformatory are anything but modern

and not in harmony with the progressive and charitable citizens of our state. We earnestly urge the legislature to authorize the board, and to furnish it with the necessary appropriation to erect at one of the institutions for the insane a department for the criminal insane. By so doing, the unfortunate inmates would receive the benefit of experienced physicians who are familiar with the different mental diseases and who would do much to relieve the individual, as well as showing a humane disposition on the part of the state. As it now is, these unfortunate people are placed in cold, dismal cells without the benefit of sunshine and air that an isolated building would afford if placed at one of the institutions for the insane, as above mentioned.

INEBRIATE WOMEN.

At the state hospital for the insane at Mount Pleasant, a department is maintained for inebriate women. It is not fair nor right, as we look at it, for the state to take unfortunate inebriate women and place them in an institution for the insane, forcing them to be companions of the insane, by reason of the congested conditions of the institution and a maintenance of an inebriate ward with insane wards all around it. The men who are victims of excessive use of intoxicants and narcotics are provided with a home where they can be treated for their habits and yet women, here in Iowa, who are no more unfortunate than men, are forced to be sent to a hospital for the insane.

We earnestly urge the legislature in its wisdom to provide for means of erecting and establishing at one of the other institutions a place for the treatment and care of female inebriates.

STERILIZATION OF INMATES.

The law of the thirty-fifth general assembly empowering the Board of Parole to sterilize certain described inmates in the hospitals for the insane, as well as those at The Reformatory and State Penitentiary, was, by the thirty-sixth general assembly, repealed and in its stead a law was passed authorizing the superintendent and his medical staff, by a majority vote, by and with the approval of the Board of Control of State Institutions, to sterilize such of the inmates of the insane as they might direct after the husband or wife, parent, or nearest of kin had given their consent. Very few cases have been acted upon since the adoption of the law of the thirty-sixth general assembly from the hospitals and the

board is not in shape to offer any suggestions as to the operation of the new method. The few operations that have been performed, we learn from the superintendents, have been followed by beneficial results.

STATE HOSPITAL AND COLONY FOR EPILEPTICS.

Since our last report contracts have been let for the erection upon this farm, the following improvements:

Medical group of buildings.....	\$140,932.00
Extras	635.75
Power house	32,815.00
Service building	46,470.00
Extras	81.75
Laundry building	10,302.00
Tunnel	23,086.00
Superintendent's residence	10,000.00
Wells	6,000.00
Steam heating	46,195.00
Brick smokestack	5,300.00
Extras	183.75
Sewage treatment plant	16,000.00
Heating, plumbing and sewer	18,762.00
Generation electrical apparatus	7,450.00
Ash ejectors	1,177.00
Water pipes and reservoirs	12,450.00
Boilers	16,475.00
Engine	5,000.00
Sanitary and storm sewer	4,925.00
Stokers	4,525.00
Brick pump house	1,213.00
Boiler foundations	1,531.00
Total	\$553,076.25

Some of these contracts have been completed and accepted, others have not yet been completed but will be in a very short time. All contracts were awarded on competitive bids, the bids being numerous and competition close. We believe the contracts have all been let advantageously.

The institution will be ready to receive patients some time in February or March of the coming year. Commitments will be made the same as are now made to institutions for the insane except that voluntary commitments are permitted.

Doctor Voldeng and his family are now at the institution, the doctor having general supervision of all construction work, as-

sisted by George Stombach, superintendent of construction. Up to date the work done upon the buildings has been of a most satisfactory character. Considerable of the rough work in tunnels and disposal plant has been done by inmates from the State Penitentiary.

The roads about said institution have been much improved by grading and graveling under the direction of Professor MacDonald of the Iowa State College at Ames.

The farm has been well managed and the crops have been good. This year's crop of oats yielded about 10,000 bushels and the corn promises a yield of from 20,000 to 25,000 bushels of excellent quality.

The farm is sufficiently supplied with live stock, implements and equipment to run same in proper and up-to-date manner. Cows are being milked upon the farm, the milk being sold to the local creamery. At this time there are being fed on said farm 115 head of steers and in the neighborhood of 200 head of hogs.

Some tiling has been done on the farm, also by inmates from the State Penitentiary with the assistance of one free, expert tiler.

About 7,000 cement posts, well reinforced, have been constructed by convict labor, it being the intention to fence the farm with cement posts and woven wire.

A deep well at the institution was sunk to a depth of 1,810 feet, which produces more than 210,000 gallons of water per day.

Arrangements were made with the Chicago, Milwaukee & St. Paul Railway Company whereby they have built a switch from the main line of the Chicago, Milwaukee & St. Paul Railway Company to the service building and the power plant of the institution.

All farm labor upon the farm and much of the road work has been done by inmates from the State Penitentiary.

The total amount of expenditures provided for by existing contracts and purchases of land to date, are \$783,327.25.

STATE HOSPITAL FOR INEBRIATES.

The State Hospital for Inebriates, located at Knoxville, Marion County, Iowa, about thirty miles from Des Moines, was established at that place in 1906. On June 30, 1916, there were 141 men and boys as inmates at this institution. This is a decrease of 56 from the previous biennial report. This decrease is undoubtedly due to the operation of the Harrison law regulating the sale of narcotics under the federal statutes. It seems that by reason of pro-

hibition against the sale and the giving away of intoxicating liquors prevailing in the state and the operation of the Harrison law making it difficult to obtain intoxicating liquor and drugs, the two agencies, which increased the population at this institution, should cause a continual decrease until the institution might be used for other purposes. We believe that a more vigorous enforcement of the law by the state and the federal authorities would do much towards relieving the state of the expense of caring for the victims of the liquor and drug habit. This institution is well provided with every facility for caring for those who are so unfortunate as to be possessed of the vicious habit of using to excess intoxicating liquors and narcotics.

The state has a brick and tile plant at this institution which has been doing remarkably well and where many of the inmates may be employed at \$1.00 per day after they have been in the institution a period of ninety days. This is saving to the individual and his family the time that would be lost if it were not for the industry. While it is true that many come to the institution whose occupation in the past has been such that they are not physically capable of doing the manual work that is required at a brick and tile plant, yet many who have been engaged on outside and laborious work find it a congenial occupation.

The men are well provided with necessities and the \$1.00 a day that they earn is about all saved because they do not have an opportunity to spend any portion of it foolishly and their board and all the expenses of living are provided for.

There was built at this institution a few years ago a fine building which was intended at the time to be a custodial building, where those who were repeaters or who could not be relieved of their fondness for intoxicating liquors and narcotics might be placed to remain, as provided by law, a period of three years, and who could not be paroled or let out from that department before two years. It seems now from the present indication that the necessity for this building does not exist and some other use will have to be made of it.

The state owns nearly 346 acres of land at this institution and it is all very valuable farm land. A very fine clay deposit is also upon these premises and under an inspection, the board has been informed that a stratum of coal from three to three and one-half feet is upon this land, but it is not of sufficient depth to warrant the board in attempting to develop it.

This institution has about all that is required to properly care for the population that comes to it and the board can say that the management has been very satisfactory and no particular recommendations are necessary.

PENAL INSTITUTIONS.

Both the State Penitentiary at Fort Madison and The Reformatory at Anamosa have been scenes of unusual activity during the past two years because of the establishment of industries to replace the contracts for which provision was made by a former legislature. All contracts for prison labor except that of the tool company at Fort Madison have expired and this terminates November, 1917. At first thought the establishing of industries might appear to be a simple business proposition, but it involves many perplexing problems.

The first consideration must look to the welfare and reformation of the prisoner. Any prison industry which does not furnish healthful, profitable and instructive employment to the men, fails in its purpose.

The state should receive reasonable returns upon its investment.

The industries should compete with free labor as little as possible.

The board and the wardens have striven to maintain these conditions, having uppermost in mind the thought that there is nothing so helpful to the man in prison as to show him how, by his own efforts, he may become self-supporting and able to maintain himself when he leaves the institution.

THE REFORMATORY.

At this institution the butter tub factory, operated by the American Cooperage Company under the contract system, was taken over at a cost of \$5,000.00, and has been conducted as a prison industry since January 1, 1915.

The printing office and bindery have been improved and enlarged to care for the needs of the state institutions and Board of Control. It does no commercial business but furnishes instructive employment and fits many young men to accept and retain good positions upon release.

The tailor shop, tin shop, shoe and stone cutting departments provide useful and healthful employment to a large number of prisoners. The products of these industries are used at other state institutions.

The purchase of seventy-seven acres of quarry land in Lyon County, with its deposit of granite, will require the services of a hundred men at least, and supply a long felt demand for crushed rock, especially adapted to road building.

STATE PENITENTIARY.

To employ the men heretofore engaged on the contracts at this institution a chair and furniture factory has been established and equipped, at a cost of \$53,420.96, and a large investment has been required to provide a stock of material aggregating \$58,009.52.

A contract has been entered into for the output of this factory, relieving the state of all expense and responsibility of the selling end of the business. The selling price is based upon the actual cost of material; salaries of foremen, superintendent and necessary employes; the cost of insurance; six per cent on the investment; ten per cent per annum for depreciation, and compensation to the prisoners, and on the total cost thus obtained the state receives ten per cent. This contract was entered into July 13, 1915, and runs for a period of ten years. One hundred and fifty men are employed by this industry.

The manufacture of rugs, brooms, harnesses, sweeping compound and other commodities gives useful employment to a large number of prisoners. Much of the output of these industries is sold to the state institutions, the surplus being disposed of on regular terms to the trade.

STATE FARM AT CLIVE.

As directed by the thirty-fifth general assembly the board purchased 781 acres of land near Clive, ten miles west of Des Moines, being a portion of the Martin Flynn farm. The price paid was \$200.00 per acre. No provision being made for the establishment of a custodial farm which was under consideration when this purchase was authorized, the board found itself with a large farm on its hands with no funds or direct authority to operate it. The only reasonable solution of the problem was to make it a prison industry, which was done. Prisoners were transferred from the Fort Madison institution and the farm has been successfully operated by them. The board has provided an abundance of stock and hogs and

the farm is now in first-class condition. Charles H. Sullivan, former deputy warden of the penitentiary, is in charge of this industry.

No expenditure for new buildings or permanent improvements has been required, except the installation of heating apparatus in the large farm residence occupied by the superintendent and his family and a part of the men.

A large number of men have been employed, both from The Reformatory and the State Penitentiary, in connection with the work of the highway commission, on roads adjacent to state lands; also on building operations at the various state institutions.

In all cases the state has received wages for these men on the same basis as free labor in same locality.

CHAPTER III—Legislation Recommended.

GENERAL EMERGENCY APPROPRIATION.

The board would recommend that an emergency appropriation should be granted similar to the one that was allowed by the thirty-sixth general assembly, to be placed in the hands of the Board of Control of State Institutions, for the purchase of land and to meet contingencies which are liable to arise at any of the sixteen institutions under its control. It has been found to be the better plan to get a lump sum appropriated especially for the purchase of land, as when there is a direct appropriation made to purchase land for a particular institution, it is hard to buy the land at a reasonable price. If, however, the board has some discretion in the matter, purchases can be made to much better advantage for the state.

To that end the board recommends that an emergency appropriation of \$50,000.00 be granted to the Board of Control of State Institutions for any of the following purposes: For the purchase of land, food, supplies and clothing; for the erection, repair and improvement of buildings; for appurtenances and connections thereto; for furniture, fixtures and furnishings; for the purchase of live stock, farm machinery and equipment; for establishing and maintaining industries; and for improvements, equipment and appliances needed at any or all of the institutions hereinafter named, to-wit:

Iowa Soldiers' Home,
Iowa Soldiers' Orphans' Home,
School for the Deaf,
Institution for Feeble-minded Children,
State Sanatorium for the Treatment of Tuberculosis,
State Industrial Schools,
State Hospitals,
The Reformatory,
State Penitentiary,
Iowa Industrial Reformatory for Females, and
State Hospital and Colony for Epileptics,

Comparison of appropriations asked for from the thirty-seventh general assembly, with those granted by the thirty-sixth general assembly:

The appropriations granted by the thirty-sixth general assembly were as follows:

Senate File 273.....	\$ 350,170.00
Senate File 555.....	675,000.00
Millage Tax	678,665.43
Total	\$1,703,835.43
The amount asked of this general assembly, being	\$1,458,830.00
is	\$ 245,005.43

less than the appropriations granted by the thirty-sixth general assembly.

The board is familiar with the needs of every item asked for for each institution, and earnestly request the members of this general assembly, before cutting out a single item, to make a thorough investigation of the matter, as we are convinced that every dollar of the appropriations asked for is needed to properly take care of the wards of the state during the coming biennial period.

APPROPRIATIONS ASKED FOR.

The following appropriations are asked from the Thirty-seventh General Assembly:

SOLDIERS' HOME.

For contingent and repair.....	\$ 10,000.00
For new boilers, automatic stokers, overhauling, plumbing and heating system and installing vacuum system of heating in main building, annex and dormitory	15,000.00
For two passenger elevators.....	5,000.00
For concrete bridge and dam to replace one washed out.....	3,500.00
For storm sewer from hospital and dormitory.....	1,000.00
For extensive repairs and improvements on main building.....	1,500.00
For building for stores	5,000.00
	\$ 41,000.00

SOLDIERS' ORPHANS' HOME.

For contingent and repair	\$ 10,000.00
For gymnasium	30,000.00
For cottage bath rooms.....	5,100.00
For dental, oculist and aurist, nose and throat.....	1,800.00
	\$ 46,900.00

SCHOOL FOR THE DEAF.

For contingent and repairs.....	\$ 8,000.00
For reservoir for storage of water.....	2,500.00
For physical equipment and playground apparatus.....	500.00
For extension of coal bins.....	2,000.00
For library and bookbinding fund.....	500.00
	<hr/>
	\$ 13,500.00

INSTITUTION FOR FEEBLE-MINDED CHILDREN.

For contingent and repair.....	\$ 17,000.00
For cottage for boys of the school division including light, heat, plumbing and furnishings.....	40,000.00
For building for bakery.....	6,000.00
For beds and bedding.....	2,500.00
For furniture and fixtures.....	2,500.00
	<hr/>
	\$ 68,000.00

STATE SANATORIUM FOR THE TREATMENT OF TUBERCULOSIS.

For contingent and repair.....	\$ 7,500.00
For medical and laboratory building and equipment.....	45,000.00
For elevator, furnishings and equipment for advanced case hospital.....	15,350.00
For addition to employes' building.....	3,000.00
For switchboard and cable.....	1,500.00
For well, pump house and connections.....	4,000.00
	<hr/>
	\$ 76,350.00

INDUSTRIAL SCHOOL FOR BOYS.

For contingent and repair.....	\$ 15,000.00
For boys' cottage and furnishings.....	20,000.00
For boys' cottage repairs, including lavatories.....	5,000.00
For equipment for machine shop.....	1,000.00
For steam boilers and equipment.....	8,000.00
For band instruments and supplies.....	300.00
For wagon shed.....	500.00
For tunnels, pipe and pipe covering and equipment.....	2,500.00
For extending water system.....	1,000.00
For dental, oculist and aurist work.....	2,500.00
For school supplies and apparatus.....	500.00
For carpets, rugs and furniture.....	2,000.00
For transportation of boys.....	800.00
For lectures and amusements.....	500.00
For athletic fund and reward of merit.....	300.00
For chaplain's fund.....	300.00
For library, books and periodicals.....	500.00
For agricultural implements.....	500.00
	<hr/>
	\$ 61,200.00

INDUSTRIAL SCHOOL FOR GIRLS.

For contingent and repairs.....	\$ 6,000.00
For books, periodicals and binding.....	500.00
For chaplain's fund.....	300.00
For dental, oculist and aurist work.....	1,000.00
For furniture and furnishings.....	1,000.00
For live stock.....	500.00

For machine shop at power house.....	300.00
For new boiler.....	1,500.00
For musical instruments and supplies.....	300.00
For new laundry and equipment.....	8,000.00
For remodeling old laundry for stores.....	2,000.00
For transportation of girls.....	300.00
For gymnasium equipment.....	500.00
	<hr/>
	\$ 22,200.00

MOUNT PLEASANT STATE HOSPITAL.

For contingent and repair.....	\$ 30,000.00
For new laundry building and equipment.....	30,000.00
For sewer for draining basement of main building.....	2,500.00
For electric switchboard and connections.....	2,000.00
For two silos.....	1,400.00
For drain tile.....	1,500.00
For books, periodicals and binding for patients' library.....	500.00
For electric wiring and fixtures in main building.....	3,000.00
For new boiler room.....	35,000.00
For railway track scale and farm scales.....	4,000.00
For pump house, deep well and connections.....	1,750.00
For beds and bedding and wall finishing.....	2,500.00
For hose and fire equipment.....	2,500.00
	<hr/>
	\$ 116,650.00

INDEPENDENCE STATE HOSPITAL.

For contingent and repair fund.....	\$ 20,000.00
For horse barn.....	6,000.00
For building power house and equipment.....	50,000.00
For hospital for tubercular patients.....	40,000.00
For state's portion of the organization of the drainage district.....	5,000.00
	<hr/>
	\$ 121,000.00

CLARINDA STATE HOSPITAL.

For repair and contingent.....	\$ 20,000.00
For tuberculosis hospital.....	40,000.00
For dairy barn.....	12,000.00
	<hr/>
	\$ 72,000.00

CHEROKEE STATE HOSPITAL.

For contingent and repair.....	\$ 25,000.00
For completing railroad switch and making alterations in coal house.....	15,000.00
For increasing and improving water supply.....	50,000.00
For books, periodicals, newspapers and pictures for wards.....	500.00
	<hr/>
	\$ 90,500.00

STATE HOSPITAL AND COLONY FOR EPILEPTICS.

For contingent and repair.....	\$ 10,000.00
For cottages for patients and equipment.....	105,000.00
For two central dining halls and kitchens.....	75,000.00
For two cottages for tubercular patients.....	20,000.00
For greenhouse and garage combined.....	3,500.00
For dairy barn and two silos.....	10,500.00
For horse barn.....	6,000.00

For hog house	1,000.00
For poultry house	500.00
For telephone system	1,500.00
For pictures, library books, newspapers and periodicals for patients	300.00
For improvement of grounds including roads, walks, grading and planting	2,000.00
For fencing	1,500.00
For cold storage plant, machinery and equipment.....	7,500.00
For new tunnels	1,500.00
	<u>\$ 245,800.00</u>

STATE HOSPITAL FOR INEBRIATES.

For contingent and repairs.....	\$ 3,000.00
For books and periodicals	300.00
For fire station and new hose.....	1,200.00
For ice house	700.00
For laboratory equipment	300.00
For renovating and replacing old furniture.....	500.00
	<u>\$ 6,000.00</u>

STATE PENITENTIARY.

For contingent and repair.....	\$ 15,000.00
For transportation of prisoners.....	3,000.00
For furniture and furnishings for warden's residence.....	1,000.00
For establishing and maintaining industries.....	100,000.00
	<u>\$ 119,000.00</u>

THE REFORMATORY.

For contingent and repair.....	\$ 13,000.00
For dental, aurist and oculist work.....	1,500.00
For establishing and maintaining stone quarry and rock crushing plant in Lyon county.....	100,000.00
For building railroad switch to quarry.....	35,000.00
For heating equipment for new industrial building.....	1,000.00
For lavatories and closets.....	500.00
For line shafting, hangers and pulleys for new industrial building	450.00
For motors and wiring for new industrial building.....	980.00
For tools and materials for manual training and trade instructions	3,000.00
For transportation of prisoners.....	2,500.00
	<u>\$ 157,930.00</u>

INDUSTRIAL REFORMATORY FOR FEMALES.

For contingent and repair.....	\$ 2,500.00
For two cottages including heat, light and furnishings.....	70,000.00
For water tower, tank and connections.....	5,000.00
For water supply, pumps and equipment.....	8,000.00
For sewage disposal plant and sewer.....	6,000.00
For electric wiring, fixtures and equipment.....	1,000.00
For equipping part of power house for storeroom.....	1,500.00
For finishing pathological building.....	5,000.00
For fencing and drainage.....	1,500.00
For building walks, grading drives and planting.....	1,000.00
For industrial building and school house.....	30,000.00
For furniture and furnishings for all buildings.....	6,000.00
For laundry equipment	2,000.00
For cow barn and silo.....	6,000.00
For poultry house	500.00
For hog house	800.00
For cold storage and equipment.....	4,000.00
	<u>\$ 150,800.00</u>

RECAPITULATION.

For Soldiers' Home	\$ 41,000.00
For Soldiers' Orphans' Home.....	46,900.00
For School for the Deaf.....	13,500.00
For Institution for Feeble-minded Children.....	68,000.00
For State Sanitorium for the Treatment of Tuberculosis.....	76,350.00
For Industrial School for Boys.....	61,200.00
For Industrial School for Girls.....	22,200.00
For Mount Pleasant State Hospital.....	116,650.00
For Independence State Hospital.....	121,000.00
For Clarinda State Hospital.....	72,000.00
For Cherokee State Hospital	90,500.00
For State Hospital and Colony for Epileptics.....	245,800.00
For State Hospital for Inebriates.....	6,000.00
For State Penitentiary	119,000.00
For The Reformatory	157,930.00
For Industrial Reformatory for Females	150,800.00

In addition to the foregoing extraordinary appropriations, there should be appropriated by the thirty-seventh general assembly, an emergency appropriation similar to the one made by the thirty-sixth general assembly, placing \$50,000.00 in the hands of the Board of Control of State Institutions for the purchase of land and other emergency and providential contingencies which are liable to arise in connection with operating the sixteen institutions under its control

Grand total\$ 1,458,830.00

CHAPTER IV

VISITATION OF INSTITUTIONS.

The following statement shows the visits made to different institutions during the biennial period ending June 30, 1916, and the persons by whom made:

SOLDIERS' HOME, MARSHALLTOWN.

Year	When Made	By Whom Made
1914	December 7	McConlogue, Dixon, McColl
1915	February 5	Dixon
	March 3-4	McColl
	May 24	McConlogue, Dixon, McColl
	September 3	McColl
	November 4	McConlogue, Dixon, McColl
1916	April 17	McConlogue, Dixon, McColl
	June 20	McConlogue, McColl

SOLDIERS' ORPHANS' HOME, DAVENPORT.

Year	When Made	By Whom Made
1914	October 22-23	McConlogue, Dixon, McColl
1915	May 4	McConlogue, Dixon, McColl
	September 2	Dixon
	October 14-15	Dixon, McColl
	November 30	McConlogue
	December 16-17	McConlogue, Dixon, McColl
1916	April 13	McConlogue, Dixon, McColl

SCHOOL FOR THE DEAF, COUNCIL BLUFFS.

Year	When Made	By Whom Made
1914	October 26	McConlogue, Dixon, McColl
1915	March 31	McColl
	May 11	McConlogue, McColl
	June 14	McConlogue
	August 25	McConlogue
	November 10-11	McConlogue, Dixon, McColl
1916	March 28	McColl
	April 6	McConlogue, Dixon, McColl
	June 8	Treat

INSTITUTION FOR FEEBLE-MINDED CHILDREN, GLENWOOD.

Year	When Made	By Whom Made
1914	October 27	McConlogue, Dixon, McColl
1915	March 30	McColl
	May 12	McConlogue, McColl
	August 26	McConlogue
	November 11-12	McConlogue, Dixon, McColl
1916	April 4-5	McConlogue, Dixon, McColl
	May 11	Dixon
	June 27	McColl

STATE SANATORIUM, OAKDALE.

Year	When Made	By Whom Made
1914	July 10	McConlogue
	October 21	McConlogue, Dixon, McColl
1915	January 18	McConlogue, McColl
	May 6	Dixon, McColl
	October 16	Dixon, McColl
1916	April 12	McConlogue, Dixon, McColl

INDUSTRIAL SCHOOL FOR BOYS, ELDORA.

Year	When Made	By Whom Made
1914	December 8-9	McConlogue, Dixon, McColl
1915	May 25-26	McConlogue, Dixon, McColl
	September 3	McColl
	November 2	McConlogue, McColl
1916	April 17-18	McConlogue, Dixon, McColl
	May 24	Dixon

INDUSTRIAL SCHOOL FOR GIRLS, MITCHELLVILLE.

Year	When Made	By Whom Made
1914	July 12	McConlogue
	August 14	McColl
	August 24	McColl
	November 7	Dixon, McColl
	September 12	McColl
	September 28	McColl
	November 17	McColl
	November 30	McConlogue
1915	February 15	McConlogue
	February 19	McColl
	March 10	McConlogue
	March 27	McColl
	April 6	McColl

a The twenty-second general assembly, chapter 121, amended by the twenty-third general assembly, chapter 58, in addition to per capita, granted the sum of \$1,050.00 per month for salaries and wages. Prior to May 10, 1890, the sum of \$6,000.00 per annum was allowed for this item.

b The twenty-sixth general assembly, code section 2608, granted \$13,000.00 per annum for salaries and wages of officers and employes, to take effect October 1, 1897. This was amended by the twenty-seventh general assembly, chapter 72, fixing the per capita allowance at \$14.00 per month, to take effect July 1, 1898. This allowance now includes salaries and wages, the \$13,000.00 per annum appropriation mentioned above having been repealed.

c The twenty-ninth general assembly, chapter 113, granted \$10.00 additional for "each officer and employe not a member of the home."

*One year only.

d In case average population falls below 850 for any month a minimum of \$12,750.00 is allowed, chapter 221, thirty-fifth general assembly.

*The nineteenth general assembly, chapter 105, section 1, in addition to per capita allowance, granted \$21,000 to pay salaries of officers and teachers. See laws of twentieth general assembly, chapter 105, requisition for vacation quarter based on average number of pupils in attendance the last previous quarter.

†The laws of the twenty-seventh general assembly, chapter 83, section 1, include salaries and wages, appropriations in note "a" having been reduced to \$18,000; per capita allowance granted only for the nine months of the school year.

‡Includes salary paid treasurer of board of trustees.

§The twenty-ninth general assembly, chapter 122, changed the allowance per capita from a quarterly to a monthly sum limited to nine months of each year.

**One year only.

***In case the average population falls below 275 for any month a minimum of \$6,050.00 is allowed. Chapter 177, acts of the thirty-third general assembly.

*The nineteenth general assembly, chapter 40, section 9, prior to April 18, 1890, in addition to the per capita allowance, granted the sum of \$11,000.00 "for the ordinary expenses of the institution, including furniture, books, school apparatus, and compensation of officers and teachers." At this date the per annum allowance was raised to \$22,000.00 per annum (see laws twentieth general assembly, chapter 50), and it was directed that "other employees" should also be paid out of this fund.

†The twenty-seventh general assembly, chapter 79, made a change April 13, 1898. This allowance includes items mentioned in Note "**", the appropriation of \$22,000.00 having been repealed.

‡Includes salary paid treasurer of board of trustees.

**One year only.

a One year only.

b By provisions of chapter 141, acts of the thirty-fourth general assembly, the control and management of the College for the Blind were transferred on July 4, 1911, to the Board of Education. All returns in this and other tables, however, are for the year ending June 30, 1911.

d The sums given for the hospitals for inebriates represents only a portion of the true cost of the inebriate population as the main portion of the expense of supervision is paid out of the funds allowed the officers of the state hospitals.

e Covers but a portion of the period.

f The institution at Anamosa by the provisions of chapter 192, acts of the thirty-second general assembly (Supplement 1907, section 5718-a4) ceased to be a penitentiary and became a reformatory.
