REPORT OF STATE TREASURER

This report covers the period of the incumbency of my predecessor, the late Hon. William C. Brown, from July 1st, 1916, to May 16th, 1917, at which time, upon the death of Mr. Brown, I assumed the duties of that office by appointment from you.

GENERAL REVENUE.

The general revenue of the state has been running very low since 1912, the low period in each year since that time showing a balance of less than \$100,000.00. Until 1916, my predecessors were able to get along without stamping warrants "Not paid for want of funds." The increased cost of all commodities, since the beginning of the European war, especially the cost of food and material to insure the comfort of the inmates of our state institutions has so increased the expenditures of the state, that in 1916 it was found necessary to stamp warrants, "Not paid for want of funds" to the amount of \$344,260.48, all of which drew 5 per cent interest until paid.

Our own entrance into the war in April, 1917, and the legislative appropriations necessitated thereby, made the shortage in the general revenue account still more acute, so that in the fall of 1917 the state was paying interest on \$1,068,637.77 on warrants outstanding, presented and "Not paid for want of funds."

In April, 1918, we were paying interest on \$1,113,000.00 in warrants. In the latter part of that month, when the taxes from the seven mill levy authorized by the Thirty-seventh General Assembly began to be paid we were able to redeem all outstanding warrants drawing interest, and have a balance left in the general revenue fund. It is my judgment that the state should always have a reasonable working balance and should never be placed in the position of being obliged to stamp its warrants "Not paid for want of funds," nor be obliged to depend upon the generosity of banks in caring for such warrants. \$21,833.35 in interest has been paid during the past year on stamped warrants.

While it has not been hard heretofore to induce banks to carry these stamped warrants, their refusal to let their money out at 5 per cent for an indefinite period in times of panic or extreme money stringency would cause the treasurer no end of grief and the state no little embarrassment.

ESTIMATES.

It is impossible to furnish exact information as to what the financial condition of the state will be at the end of the biennial period for which appropriations have been made to cover and ending June 30th, 1919, but I have prepared a statement showing the estimated receipts and the estimated expenditures for general expenses and amounts that may be drawn on all appropriations from July 1st, 1918, to June 30th, 1919.

| State Departments | 450,500.00 |
| Miscellaneous | 132,000.00 |
| Total | \$13,837,669.72 |
| Estimated amount short of paying all amounts that may be drawn | \$1,042,270.41 |

In arriving at the true financial situation of the state and conditions following a session of the legislature a number of matters must be considered.

The accurate condition cannot be shown in a statement such as the foregoing for the reason that provisions are made in various sections of the Code and by numerous appropriation acts for expenses and expenditures in which no definite amount is named. It is also probable that the coming legislature will make appropriations that will become effective upon publication or before July 4th, 1919. That amount is impossible to estimate. But whatever the amount, and at the best it will not be small, it must be paid from the funds intended and levied for the period ending June 30th, 1919, and the tax levy to cover these expenditures will not be available until April, 1920, some nine months later. Before the last half of the state tax is received from the counties in October, 1919, we will be meeting the appropriations and general expenses for the biennial period commencing July 1st, 1919, so that any balance that may be shown in the treasury at that time must carry the state until the following October. As I have stated above, the levy provided by the legislature will not furnish funds for meeting its appropriation until April, 1920.

The "charging off" of a large portion of the Military Organization fund, that available for Militia, Providential Contingent and Vicksburg Celebrations appropriations, and possibly some others, will relieve this situation somewhat, and were it not for emergency appropriations to be made by the Thirty-eighth General Assembly,

would probably leave a sufficient balance for ordinary expenditures. In my judgment what the state needs is an extra levy sufficient to produce a working balance to care for the appropriations made available before the April following the session.

The balance on hand at the end of every biennial period includes in its General Revenue Fund the Automobile License Fund, amounting to about \$1,000,000.00. This amount must be distributed to the counties August 1st, and its inclusion in the General Revenue Fund on June 30th, gives a false impression as to the funds available for general purposes.

COLLATERAL INHERITANCE TAX.

The collection of the collateral inheritance tax forms a prominent part of the work of this office and its importance can readily be seen when it is shown that the receipts from this tax for the biennial period just closed amounts to \$873,394.28, showing an increase over the preceding biennial period of \$176,025.80. The state revenue derived from this tax is only exceeded by that derived from the general property tax and the tax from the insurance companies.

Within a short time after I assumed the duties of this office a number of cases came to my attention in which perfectly innocent purchasers of Iowa real estate had found a lien on their properties because of some old and unpaid collateral inheritance tax upon which interest had been accumulating at the rate of 8 per cent yearly. In many cases the accumulated interest was more than the original tax.

Knowing that there must be hundreds of just such cases, I sent to every lawyer and abstracter in the state a letter calling their attention to the fact that the collateral inheritance tax is a perpetual lien upon real estate until paid and that they would be rendering an important service, not only to their client but to the state, by giving special attention to this subject in all abstracts of title examined or made by them. This letter brought responses from many quarters with the result that a number of estates, subject to the lien of this tax, were reported and many titles corrected and the treasury considerably enriched.

All this has made me believe that the service of a man in the field, one who would visit the various counties, examine the records, ascertain the estates that had been overlooked and in which tax should have been paid, would greatly assist this office in performing a val-

table service to property owners by giving them a chance to pay the tax and remove the lien before the interest became too burdensome and while there might be still a chance to recover the tax from those who should rightfully pay it.

I presented the matter of need for a man to make investigations to the retrenchment and reform committee of the legislature, and was provided with funds with which to make the experiment for a limited time. It is too early at this time to give a comprehensive statement of this service, but I will submit to you a supplemental report soon after January 1st, next, for your consideration, giving in detail the result of these investigations and, if the showing warrants, outline a plan for a more efficient method of conducting this department.
