LETTER OF TRANSMITTAL

Honorable W. L. Harding, Governor, and President of the Board of Trustees of the Iowa State Library.

Sir: I have the honor to transmit herewith the thirty-eighth biennial report for the biennial period beginning on the first day of July, 1918, and ending on the thirtieth day of June, 1920.

JOHNSON BRIGHAM,
State Librarian.

Des Moines, Iowa, October 1, 1920.

011004

BOARD OF TRUSTEES

Hon. W. L. Harding.....	Governor of Iowa and Ex-officio Prtsident
Hon. Walter C. Ramsay.....	Secretary of State
Hon. P. E. McClenehan.....	Superintendent of Public Instruction
Hon. Scott M. Ladd	}Judges of the Supreme Court
Hon. Benjamin I. Salinger	
Hon. Silas M. Weaver	
Hon. William D. Evans	
Hon. Truman L. Stevens	
Hon. Frank R. Gaynor	
Hon. Byron W. Preston	

STATE LIBRARIAN'S STAFF

Johnson Brigham.....	State Librarian
A. J. Small.....	Law and Legislative Reference Librarian
Miss Helen M. Lee, General Library.....	Assistant
Miss Florence E. Price, General Library.....	Assistant
Miss Mary M. Rosemond.....	Legislative Reference Assistant
Nelse C. Hansen.....	Law Department Research Assistant
Miss Bertha L. Hess, Law Library.....	Assistant
Miss Lavinia Steele.....	Library Cataloger
Miss Minnie E. Hess.....	Library Bookkeeper
Miss Minnie E. Ames.....	Law Department Assistant

Librarian's Report

TO THE HONORABLE WILLIAM L. HARDING,
Governor of Iowa and President of the Board of Trustees
of the Iowa State Library.

SIR: I have the honor to make report for the Iowa State Library, covering the biennial period beginning the first day of July, 1918, and ending the thirtieth day of June, 1920.

BOOKS IN THE LIBRARY

Following is a summary of books in the State Library (exclusive of those in the Historical Department—which are to be reported in a separate report, as prescribed by the law of 1900 “consolidating the miscellaneous portion of the State Library with the Historical Department.”):

Total number of books of record in the Law and General Departments of the State Library, June 30, 1918.....	153,073
Additions to this total during the last biennial period.....	9,885

Making a grand total, June 30, 1920.....162,958

The 9,885 accessions during the last biennial period are distributed as follows:

In the General Library.....	5,167
In the Law Library	2,389
In the Legislative Reference Bureau.....	2,329

During the last year 3,040 volumes have been cataloged in the new Medical Department, the number made up from transfers from the General Library and donations from the Drake Medical Library and from the private libraries of Drs. Hill, Fairchild, Anderson, and others.

DISCONTINUANCE OF PRINTED BOOK-LISTS

In my last report I related at some length, a history of the uses originally made, (chiefly by librarians of the state,) of the several lists of books acquired by the several departments of the State Library during each biennial period, and of the recent changes in library conditions, rendering the continued publication of these lists a seemingly unnecessary expense.

I followed this statement with the recommendation that the publication of the lists be dispensed with in the report of 1918, adding that "if after two years it should seem undesirable to resume the publication of the book-lists in the biennial reports, the librarian would then ask that the omission of same be continued indefinitely."

The recommendation was favorably acted upon by the State Library Board, and the action of the Board was approved by Document Editor Williams.

Two years' experience has confirmed my judgment that a considerable saving of labor and expense can well be made by omitting the book-lists from this report and from future reports.

As our Library Board will not convene again until the middle of January, I have presented the matter to individual members of the Board and they are of one mind with the Document Editor, in that the lists may be omitted from this time on, unless some condition should arise suggesting their publication. I have therefore omitted same from this report.

SOME NOTABLE ACCESSIONS TO THE LIBRARY

Since my last report the General Library, or Miscellaneous Department, has been strengthened by more than five thousand volumes, not a few of which are rare first editions and rare out-of-print works sure to advance in price as their scarcity becomes more apparent. Among the more notable recent additions are the following:

- Severance, F. H.—An Old Frontier of France, 2 volumes.
- Wilcox, Marion, ed.—Encyclopedia of Latin America.
- Nolan—History of the War Against Russia, 8 volumes.
- Smith, G. A.—Atlas of the Holy Land.
- Muir, John, Naturalist—Works, 6 volumes.
- Dunlap, William—Rise and Progress of the Arts of Design, 3 volumes.
- Biographia Britannica, 7 volumes.
- Markham, Edwin—Real America in Romance, 13 volumes.
- Southey, Robert—History of the Peninsular War, 6 volumes.
- Nichols, F. M.—Epistles of Erasmus, 2 volumes.
- Camden Society Publications, London, numerous volumes.
- Simonds, F. H.—History of the World War, 5 volumes.
- Brown, A. J.—Mastery of the Far East.
- Egan, Maurice F.—Ten Years Near the German Frontier.
- Galloway, L.—Office Management, Its Principles and Practice.
- Gibbs, Philip—The Way to Victory, 2 volumes.
- Watterson, Henry—History of the Spanish American War.
- Hutchinson, Woods—The Doctor in the War.

- Hurd, A.—A British Fleet in the Great War.
- Jellicoe, V.—The Grand Fleet.
- Miller, L. E.—In the Wilds of South America.
- Johnson, Allen, ed.—Chronicles of America, 50 volumes.
- Sokolow, Nahum—History of Zionism.
- Gourko, Basil—War and Revolution in Russia.
- Stone, E. M.—Our French Allies.
- Scott, J. B.—Diplomatic Correspondence Between the United States and Germany.
- Southerne, Thomas—Works of.
- Otway, Thomas—Works of.
- Burleigh, Lady—Life of James, Duke of Osmonde.
- Seton, W. R.—Rise of Nationality in the Balkans.
- Treitschke—History of Germany in the Nineteenth Century.
- Gardiner, S. R.—Impeachment of the Duke of Buckingham.
- Robertson, J. M.—History of Freethought.
- Hunter, G. L.—Decorative Textiles.
- Carpenter & Diedrech—Experimental Engineering.
- Gallatin, A. E.—Portraits of Whistler.
- Cross, W. L.—History of Henry Fielding.
- Chapman, C. E.—History of Spain.
- Hobson, J. A.—Richard Cobden.
- MacMillan—Four Years in the White North.
- O'Brien, M. J.—Hidden Phase of American History.
- Dowden, John—Medieval Church in Scotland.
- Stebbing, E. P.—From Czar to Bolshevik.
- Ward, James—Psychological Principles.
- Lenygon, Francis—Decoration of English Mansions.
- Bourgeois, E.—History of Modern France.
- New York City—Public School Methods.
- Baxter, Sylvester—Spanish-Colonial Architecture in Mexico, 10 volumes.
- Ramsay, S. C.—Small Houses of the Late Georgian Period.
- L'Arte, Paris, 7 volumes.
- Neale, J. P.—Views of the Seats of Noblemen of England, Wales, Etc., 8 volumes.
- University Library of Autobiography, 15 volumes.
- Maresio, Samuele—Galerie des modes et costumes, Français, 4 volumes.
- American Biblioplist, 3 volumes.
- American Academy of Arts and Sciences, 6 volumes.
- Carnegie Institution of Washington, Publications.
- Kirby, H. P.—Architectural Compositions.
- Koebel, W. H.—South America.
- Abraham, H.—Asphalts and Allied Substances.
- Whitlock, Brand—Belgium.
- Bone, W. A.—Coal and Its Scientific Uses.
- Sabin, Joseph—Bibliography of Bibliography.
- Southey, Robert—Chronicle of the Cid.
- Olrik, Axel—Heroic Legends of Denmark.
- Selden, John—Titles of Honor.

- Morris, William—Sir Galahad and Pygmalion.
 Odom, W. M.—History of Italian Furniture.
 Brangwyn, F.—Prints and Drawings.
 Moulton, J. H.—Grammar of New Testament Greek, 2 volumes.
 Lodge, H. C.—Theodore Roosevelt.
 Dana, E. and others—Century of Science in America.
 Howitt, William—Rural Life in England, 2 volumes.
 Walpole, Horace—Memoirs, 2 volumes.
 The British Critic, 14 volumes.
 Burton, Richard F.—Pilgrimage to El Medinah, 3 volumes.
 Fuller, Thomas—History of the Holy Warre (1647).
 Vizetelly, E. A.—Paris and Her People.
 Watterson, Henry—Marse Henry, 2 volumes.
 Pennell, Joseph—Etchers and Etching.
 Lippincott, H. M.—Early Philadelphia.
 Hopkins, J. C.—Canada at War 1914-18.
 Fiske, B. A.—From Midshipman to Rear Admiral.
 Walpole, Horace—Anecdotes of Painting in England, 5 volumes.
 Hillis, N. D.—Rebuilding Europe.
 Cousins and Riley—Colonial Architecture.
 Hornblow, Arthur—History of the Theatre in America.
 Navinson, H. W.—The Dardanelles Campaign.
 Ludendorff, E. von—Ludendorff's Own Story, 2 volumes.
 Kingford, William—History of Canada, 4 volumes.
 Trevelyan, G. M.—Scenes from Italy's War.
 Booth, Mary L.—History of the City of New York, 2 volumes.
 Moore, Thomas—Odes of Anacreon (1800).
 Stannard, M. N.—Colonial Virginia.
 Von Tirpitz, G. A.—My Memoirs, 2 volumes.
 Maxwell—Theodore Hook, 3 volumes.
 American Expeditionary Forces in Action.
 St. Clair, L.—Story of the Liberty Loans.
 Atlas of Latin America.
 Smith, J. A.—In France with the A. E. F.
 Hastings, J.—Dictionary of Christ and the Gospels, 2 volumes.
 American Book Prices Current.
 Edwards, George Wharton—Holland of Today.
 National Educational Association, Addresses, Etc.

INTER-LIBRARY LOANS

The Miscellaneous, or General, Department of the State Library, is primarily a reference library, a central source of supply for students, scholars, clubs and club members. Presumably the many thousands of books in this department are on its shelves awaiting readers. Practically only a small percentage of the works are in use at any one time; and, practically only a few who reside outside the Capital City find it convenient to visit the library and remain

for a sufficient length of time to conduct an investigation requiring thorough research.

It is the aim of the librarian to make the General Library useful to the citizens of Iowa regardless of distance from the library center. To this end he is glad to avail himself of the excellent distributing system of the Iowa Library Commission, of which by virtue of his office he is a member, and, by election, its chairman.

Should an individual, or club, or school, especially desire any work, or works, not in the nearest local library, and not in the circulating library of the Iowa Library Commission, the nearest local librarian has only to apply to the Library Commission for same. The Secretary of the Commission is permitted to borrow from the General Library and make the loans through the Commission's regular channels. As the General Library and the Library Commission are in the same building, the transfer is made easily and without delay. In full co-ordination and co-operation with the Commission, the General Library is thus able to serve the entire state.

Where loans cannot be conveniently made through a local library, requests from responsible individuals, made through the Commission's secretary or directly through the state librarian, are promptly honored, the only exception being in case of extra-valuable works and books in such constant use as to be so many working tools of the library. The books so loaned are subject to recall in case there should be urgent call for them at the central library. The sole expense of such loans is the parcel-post, or express, charges both ways.

THE SALARY QUESTION A VITAL ONE

With an increase in prices since 1914 estimated by statisticians at 165 per cent. and the recent drop in prices estimated at only 25 per cent, and with the experts practically agreed in that the temporary panic of manufacturers and middlemen practically overcome by diminished production as the result of strikes and layoffs, and with rentals of rooms still out of all proportion to salaries paid, school boards, library boards, corporations, merchants and professional men have materially raised the salaries of men and women in their employ, and are considering the necessity of raising them still higher.

The state, through its legislative committee on Retrenchment and Reform, has measurably increased the salaries of employes of the

state—for which increase all are duly appreciative. Without such increase, the employes of the state could not possibly have made their ends meet. But, the fact remains that living expenses are still so high that the old problem of living within one's income is still ever-present, weakening the *morale* of many and inducing not a few to seek more lucrative employment elsewhere.

One feature of the salary question has not been given due consideration. Librarians are, from the nature of their work, experts, most of them with library school training, and that preceded by high school, college and university training, supplemented by years of experience in the intricacies of practical librarianship. And yet the average salaries paid them by the state are scarcely, if any, more than the wages janitors and other untrained workmen are now receiving. I would not see the wages of this worthy class of employes reduced; but I would have the salary list of librarians who have spent years in training, and thousands of dollars in preparation for library service, fixed at rates commensurate with that of trained teachers in the public schools of our cities.

Let me give a concrete instance: A cataloger who has been sixteen years in the service of the state, with a background of university training and an additional two years in a library school, recently "turned down" an eighteen hundred dollar position with a promise of a considerable "raise." Why? Chiefly because of her loyalty to the state and her interest in the further building up of our great State Library. She is now receiving \$1,400 a year, a recent advance from \$1,100. Can the state rely on her continued loyalty, when, month after month, she finds her expenses eating into her income deeper, if possible, than a few years ago when the purchasing power of her \$1,100 was far in excess of that of her present salary, \$1,400?

This is only one instance of a condition confronting the State's librarian at the present time, a condition which calls loudly for remedy at the hands of the next General Assembly. If the *morale* of the State Library is ever to remain where it is, the rich state of Iowa should see to it that highly trained and thoroughly experienced librarians are paid considerably more than a generous dealer recently stated in the public press that he was paying the scrub-women in his employ. The quality of service should surely be more substantially recognized in all lines of service to the state. In no other way can service be made a badge of distinction to the public servant and an honor and source of profit to the state. Hand-

to-mouth service never pays, and a great state should be first to point the moral.

LAW AND LEGISLATIVE REFERENCE

The law and legislative reference department has been keeping pace with the increased demands made upon it. Many new works on sociology, economics and political economy have been added. References and cross references to these and other material make the legislative reference section of the library exceedingly popular not only with the public but also with the many debating teams that visit the library for reference materials. During and prior to the session of the General Assembly both the law department and the legislative reference bureau are in constant demand.

The document division has been greatly strengthened. Collected and separate departmental reports have been received and pamphlet editions grouped chronologically and bound, thereby making one of the best collections to be found in the country, thus enabling this division to serve research workers and legislators with efficiency and speed.

During the past biennial, the law library has greatly advanced toward completeness and the highest attainable efficiency. Many early editions have been purchased toward completing the library's already fine collections. Anticipating the future needs of a constitutional convention, the law librarian has added quite a number of constitutional convention journals and debates from other states and other appropriate material.

The library's collection of international law has been greatly strengthened, also its collection of foreign laws and decisions. With our expanding foreign trade and commerce, the librarian has anticipated greater demands. Among the recent accessions are the statute laws of Argentina, Belgium laws, French, Japanese and Spanish statutes. The library recently received Norway laws, 1660-1911 inclusive. Besides these, Canadian laws and laws from our island possessions. The library's collection of the laws of the Indian Nations is quite complete as is that of the impeachment trials of the world; also a collection of the laws and decisions of industrial arbitration and workmen's compensation.

The law library is well equipped and prepared to meet the needs of the legislature at its forthcoming arduous session, when a complete code revision will be up for consideration, and this to be followed by a revision of the constitution.

THE NEW MEDICAL DEPARTMENT OF THE LIBRARY

A paper in a recent number of the *Scientific Monthly*, by Dr. D. Fraser Harris, entitled "The Medical and Allied Professions as a State Service" brings to my attention the interesting fact that Iowa is in the front line of progress, with its ably managed State Board of Health, its Hygienic Laboratory, its State Board of Medical Examiners, its Department of Vital Statistics and its policy of Hotel Inspection.

The last General Assembly went one step farther toward the goal of Public Safety by the creation of a Medical Department of the Iowa State Library, the object of which is, briefly stated, the creation and building up of a department of public service which shall render valuable aid to the citizens of Iowa, through the medical profession, in some measure commensurate to the service rendered the public by the law department through the state courts and the bar of Iowa.

The plan of service contemplated by the projectors of the new Medical Department is in one respect unique in the history of medical libraries. The lawyer retained in an important case can take time to "camp down" in the State Law Library and work up his case, either under pressure or at his leisure; but the physician, or surgeon, cannot well leave his practice for even a day to consult the reports and authorities in a single case. Even if he could take the time, the case in hand might be too serious to admit of delay.

From long association with the State's Traveling Library—with its loaning system extending to every county in Iowa—I conceived the idea of utilizing the system in the proposed Medical Department. Presenting my scheme of utilization to my fellow State Librarians at a conference at Washington, D. C., a few years ago, I found it met with their enthusiastic approval, and was urged to try it out in Iowa and, later, report the measure of success it should attain. I found that nearly every state library and large reference library in the country had its problem in the shape of collections of medical works which remained on the shelves practically unused, with the certainty that new purchases would share the same fate. The traveling library plan proposed would measurably solve the problem.

In the conference referred to, a valid objection was raised, namely, that it would be unsafe to loan, through the mails or other-

wise, the library's serial volumes, as the loss of a single volume would break the set.

Another valid objection was raised, namely, that, even if safety were reasonably guaranteed—by insurance or registration—the expense of mailing, or expressing, a number of medical works, or even a single thick quarto volume, would in many cases be prohibitive. The information desired would probably be contained in only a few pages of the volume, or volumes, desired.

My experience in borrowing for local physicians and surgeons—notably Drs. Fay and Steindler—enabled me to meet both these objections. I had found on application, for temporary loans, to Dr. Andrews of the John Crerar Library, Chicago, that the Doctor had harnessed photography to the service of his library. In response to my requests for loans, I would receive a courteous letter informing me that it was not deemed wise to loan books which might be called for at any time, or volumes which if lost could not be replaced, and so, to avoid risk of loss and, too, the expense of transmission, if I would indicate the article, or articles, desired, the pages containing them would be photographed upon thin cardboard and mailed to me, the only expense attending the process being the time consumed in making the impressions—a small expense at most—the sheet of cardboard to become the property of the party to whom they are sent. I found that Dr. Fay's secretary, Mrs. Luginbuhl, had a thorough filing system in which these sheets were included for possible future reference.

Acting on this suggestion several years ago, I asked the Executive Council to purchase a photostat, then anticipating the creation of a Medical Department. This machine conveniently arranged for photographing book pages, is now at my disposal, thus disposing of the objections raised by my library associates.

But there remained the one thing needful in every library: the librarian—not a mere book-handler and cataloger, but one who knows where to find what is wanted, and, given a subject, can supply the desired information. I am happy to be able to state that after several months devoted to the scientific cataloging of several thousand books and periodicals, we are now ready to supply the wants of the profession. On the first of October, 1920, Miss Margaret Brinton, Medical Librarian of Yale University Library, will enter upon her duties as librarian of the Medical Department of the Iowa State Library. Miss Brinton comes with the strongest recommendations from Yale and from the Leland Stanford Uni-

versity of California, and I take pleasure in informing those interested that, with Miss Brinton's trained assistance, we will soon be able to do much to justify the hopes of the State Medical Society and the action of the last General Assembly, by responding to calls for assistance in the way of information from members and students of the medical profession. Of course, it will take time to make the new service wholly satisfactory; all we dare hope is that with every recurring year, it may more nearly approach completeness.

LIST OF MEDICAL PERIODICALS IN THE LIBRARY

The 3,040 volumes added to the Medical Department during the first year of its existence, including those turned over from the General Library and those donated by Drake University Medical Library, the Medical Library Club, the Iowa Medical Journal, the State Board of Health, the Des Moines Women's Clinic, Drs. Hill, Fairchild, Anderson, Criley, Lowery, Schooler, Dorr, and many other individuals, form a strong nucleus for the future great medical library of the state, now in the making. Included in the new accessions to this department is a long list of standard periodicals recommended by the standing advisory committee of the State Medical Society, Drs. Hill, Fairchild, Bierring, Fay and Royal. With the aid of the department's card catalogue, supplemented by the Index Medicus published by the Carnegie Institute of Washington, and the Quarterly Cumulative Index to Current Medical Literature published by the American Medical Association, Chicago, it will be possible for the medical librarian to supply the physicians and surgeons of the state, on inquiry, with valuable current contributions to knowledge as made from month to month in these standard periodicals.

A list of the better known medical periodicals represented in this department follows:

American institute of homeopathy. Journal. Chicago.

5, 7 to date, 1912 to date.

American institute of homeopathy. Transactions. Philadelphia.

40-47, 51-61; 1887-1905.

American journal of anatomy. Philadelphia.

1-18, 27 to date, 1901-15, 1920 to date.

American journal of diseases of children. Chicago.

1-3, 5-12, 14-16; 1911-18.

American journal of insanity. Baltimore.

1-6, 10, 15-21, 38-55, 57-63, 69, 72, 76 to date, 1844 to date.

- American journal of obstetrics. New York. Discontinued with volume 80.
9-12, 14-15, 17-42, 56-57, 59-61, 63-80; 1876-1919.
- American journal of ophthalmology. Chicago.
3d series, 1 to date, 1918 to date.
- American journal of orthopedic surgery. Philadelphia. Discontinued
with volume 16.
5-12, 14-16; 1907-1918.
- American journal of pharmacy. Philadelphia.
8 to date, 1836 to date.
- American journal of physiology. Baltimore.
28-30, 34, 36 to date, 1911 to date.
- American journal of public health. Boston.
2 to date, 1912 to date.
- American journal of roentgenology. New York.
3 to date, 1916 to date.
- American journal of syphilis. St. Louis.
1-2, 4 to date, 1917 to date.
- American journal of the medical sciences. Philadelphia.
1 to date, 1827 to date.
- American medical association. Journal. Chicago.
1 to date, 1883 to date.
- American medical association. Transactions. Discontinued with volume
33.
8, 24, 29-30, 32-33; 1855-82.
- American medicine. Burlington, Vt.
1-10, 16, 18-20; 1901-14.
- American pharmaceutical association. Proceedings. Discontinued with
volume 59.
1-2, 4, 6-58; 1852-1910.
- American urological association. Transactions.
2-6, 8-10; 1908-16.
- Anatomical record. Philadelphia.
1-6; 1906-12.
- Annals of hygiene. Philadelphia.
1-11; 1884-96.
- Annals of otology, rhinology and laryngology. St. Louis.
23, 29 to date, 1914, 1920 to date.
- Annals of surgery. Philadelphia.
20-66, 71 to date, 1894 to date.
- Archives des maladies de l'appareil digestif. Paris.
10 to date, 1919 to date.
- Archives of diagnosis. New York.
1 to date, 1908 to date.
- Archives of internal medicine. Chicago.
3 to date, 1909 to date.
- Archives of neurology and psychiatry. Chicago.
1 to date, 1919 to date.
- Archives of pediatrics. New York.
7-12, 25 to date, 1890 to date.

- Asclepiad. London. Discontinued with volume 11.
1-11; 1884-95.
- Boston medical and surgical journal. Boston.
33-34, 36-51, 54-113, 177 to date, 1845 to date.
- British medical journal. London.
1907-15, 1920 to date.
- Dementia praecox studies. Chicago.
1 to date, 1918 to date.
- Deutsche medicinische Wochenschrift. Leipzig.
24-27, 34-40; 1898-1914.
- Index medicus. Washington. None published between April, 1899, and
January, 1903. During this interval Bibliographia medica was
issued by the Institut de bibliographie of Paris.
1-21; 2d series, 1 to date, 1879 to date.
- International clinics. Philadelphia.
1-8, 10-25; 1891-1915.
- Iowa homeopathic journal. Des Moines.
6-7, 9-12, 15 to date, 1912 to date.
- Iowa medical journal. Des Moines. Discontinued with volume 20.
1-3, 5, 7-20; 1895-1914.
- Iowa state medical reporter. Des Moines. Discontinued with volume 4.
1-4; 1883-88.
- Iowa state medical society. Journal. Des Moines.
1 to date, 1911 to date.
- Iowa state medical society. Transactions.
1, 3-23, 1871-1905.
- Johns Hopkins hospital bulletin. Baltimore.
1 to date, 1890 to date.
- Journal of bacteriology. Baltimore.
1 to date, 1916 to date.
- Journal of biological chemistry. New York.
2-10, 24 to date, 1906-11, 1916 to date.
- Journal of cancer research. Baltimore.
1 to date, 1916 to date.
- Journal of comparative neurology and psychology. Philadelphia.
1-29; 1891-1918.
- Journal of cutaneous and genito-urinary diseases. Chicago.
1-13; 1882-95.
- Journal of experimental medicine. Baltimore.
