

HAMLINE HURLBUT FREER

STATE OF IOWA
1920

RERORT OF THE

Department of Public Instruction

For the Biennial Period Ending June 30, 1920

P. E. McCLENAHAN
Superintendent of Public Instruction

Published By
THE STATE OF IOWA
Des Moines

LETTER OF TRANSMITTAL.

HON. W. L. HARDING, *Governor.*

SIR: I have the honor to submit herewith, as required by law, the fortieth biennial report of the Department of Public Instruction for the period beginning July 1, 1918, and ending June 30, 1920.

P. E. MCCLENAHAN
Superintendent Public Instruction.

July 1, 1920.

DEPARTMENT OF PUBLIC INSTRUCTION.

P. E. McClenahan	Superintendent of Public Instruction
A. L. Heminger	Deputy Superintendent
H. C. Hollingsworth	Chief Clerk
Melvin R. Fayram	Inspector of Normal Training High Schools
Geo. A. Dick	Inspector Consolidated Schools
Mae E. Francis F. A. Welch	Inspectors of State Graded and High Schools
Mabel A. Newlen Corinne Johnson Thelma Nelson	Stenographers

TEACHERS PLACEMENT BUREAU.

O. H. Longwell	Director
Georgia Rawson	Stenographer

STATE BOARD OF EDUCATIONAL EXAMINERS.

P. E. McClenahan, *ex officio,* President	Des Moines
Walter A. Jessup, *ex officio*	Iowa City
Homer H. Seerley, *ex officio*	Cedar Falls
Haymond A. Pearson, *ex officio*	Ames
*H. E. Blackmar	Ottumwa
†Mary E. De Boos	Sibley
Viola H. Schell, Secretary	Des Moines
Florence Erickson	Stenographer
Anna Lindstam	Stenographer
Elizabeth Peairs	Stenographer
Theodora Wilcox	Clerk

*Term expires January 5, 1923.
†Term expires April 1, 1921.

SUPERINTENDENTS OF PUBLIC INSTRUCTION.

TERRITORY AND STATE OF IOWA.

Name	County	Time	Postoffice
William Reynolds	Des Moines	1841-1842	Deceased
James Harlan	Henry	1847 ——	Deceased
Thos. H. Benton	Dubuque	1848-1854	Deceased
James D. Eads	Lee	1854-1857	Deceased
Joseph C. Stone	Johnson	1857 ——	Deceased
M. L. Fisher	Clayton	1857-1858	Deceased
Oran Faville	Mitchell	1864-1867	Deceased
D. Franklin Wells	Johnson	1867-1868	Deceased
A. S. Kissell	Scott	1869-1872	Deceased
Alonzo Abernethy	Crawford	1872-1876	Deceased
C. W. von Coelln	Black Hawk	1876-1881	Deceased
J. W. Akers	Linn	1882-1888	Joliet, Ill.
Henry Sabin	Clinton	1888-1892	Deceased
J. B. Knoepfler	Allamakee	1892-1894	Cedar Falls
Henry Sabin	Clinton	1894-1898	Deceased
Richard C. Barrett	Mitchell	1898-1904	Deceased
John F. Riggs	Keokuk	1904-1911	Des Moines
Albert M. Deyoe	Hancock	1911-1919	Des Moines
P. E. McClenahan	Johnson	1919 ——	Des Moines

The office of Superintendent was abolished in 1842. Again in 1858 it was abolished and the duties were performed by the State Board of Education, of which Thos. H. Benton acted as secretary for five years.

STATE BOARD FOR VOCATIONAL EDUCATION.

P. E. McClenahan, Supt. Public Instruction, Chairman....Des Moines
D. D. Murphy, Pres. State Board of Education.....Elkader
A. L. Urick, Commissioner of Labor.....Des Moines

ADVISORY COMMITTEE.

Fred J. Oxley, Farmer.....Corwith
E. J. Curtis, Employer.....Clinton
Fred A. Canfield, Labor Representative.....Cedar Rapids
Mrs. Max Mayer, Woman's Work.....Iowa City
Sidney Mandelbaum, Business and Commerce.....Des Moines
F. J. Sessions, Social Worker.....Davenport
M. G. Clark, City Superintendent.....Sioux City
George E. Masters, County Superintendent.....Glenwood
J. J. McConnell, City Superintendent.....Cedar Rapids

Wilbur H. Bender.....Director and Supervisor of Agriculture
J. V. Lynn.....Supervisor of Trades and Industries
E. T. Cramer.....Assistant in Agriculture
Lucy I. Cockburn.....Supervisor of Home Making

BLANCHARD MEMORIAL PUBLIC SCHOOL BUILDING

This combined grade and high school building was completed last year and dedicated to the 99 boys of the community who served in the World War. The four high school rooms are each respectively dedicated to a gold star boy. The building was erected largely through public subscription, many subscribing patrons being residents of Missouri.

REPORT OF SUPERINTENDENT OF PUBLIC INSTRUCTION

INTRODUCTION.

These introductory remarks are written while our country is in a period of reconstruction at the close of a world war so great in its magnitude that it staggers the human mind to contemplate it, so sanguine in its struggle that the ancient wars pale in comparison, so great in the men involved that production was lessened and the world was threatened with starvation. Ideals were upset, standards changed, teachers left their schools to help win the war, pupils sacrificed educational opportunities for war activities, and institutions lost many of their best students and faculty members. Our currency has been inflated, prices have been fluctuating, and the whole country is in a state of unrest.

The ghost of hunger is still staring the people of many European countries in the face. Frequently we have been called upon to aid these starving orphans, and the school children and teachers of Iowa have denied themselves necessities of life in order that they might send help to the children of Belgium, France, Armenia, and other countries. Today they are still responding to the call of Herbert Hoover to help feed three and one-half millions of children who must be fed at the soup bowl, and can eat only twice per day. They have not only made personal sacrifices, but they have learned the great lessons of human sympathy that help to eradicate selfishness.

The teacher shortage, on account of the war, has caused serious and grave concern to those who are interested and think about the future of America as a Republic. The Secretary of the Interior has reported that 143,000 out of approximately 650,000 teachers in the United States resigned last year on account of inadequate wages; and the United States Commissioner of Education recently announced that 20,000 schools involving 500,000 pupils are closed for lack of teachers, and 40,000 schools are supplied with teachers below the minimum standard of proficiency. Iowa has not suffered as much as some other states, but it has had a serious problem to supply all the schools.

The cost of education is a fundamental and ever-present problem. The parent, the teacher, the school board, all have to consider the cost. The parent has to pay his ever increasing school tax and find extra ready money to provide for books, and school supplies. The teacher has to depend upon the economic resources of the district for her income. The board of education has to plan for the entire year, to figure cost, to anticipate changes in population, and to provide for any contingencies which may cost extra money. At present, boards of education are confronting a serious situation. In many places the total possible legal revenue will not provide for the schools. Bonds cannot legally be sold under the present restrictive rates. Cost, like the ghost of Hamlet, is keeping the most thoughtful people thinking day and night. From every direction we hear a Macedonian cry for help and many think they are on the road to Jericho.

Education is a function of the state, and popular education is the only means of attending social, political, and individual freedom. It is by this means that the government can insure its perpetuation, and it is thus interested in perpetuating the public schools, but the public schools must function problems which the state has to solve. Too long we have looked to foreign countries for leaders, too long we have had courses of study about foreign countries, too long we have taught problems in the abstract, now we need to consider America's problems and center our interest on American methods and develop American ideals, as a basis for American citizenship.

The air is full of "isms" at the present, and we need to stick to the fundamentals in education and eliminate the fads, and create American ideals. We need an American school built on an American philosophy of education and taught by American trained teachers and grounded in American ideals.

GENERAL VIEW

In order to give the proper consideration to education in Iowa, it is very desirable that one should understand the parts which compose our educational system, and that any constructive, fundamental educational program school be based upon a broad view of the entire educational system, rather than upon the minute details of the system. A bird's-eye view of the parts gives a comprehensive perspective that is invaluable to one who has to consider an educational policy for Iowa.

In a general way, education in Iowa falls under the following heads:

I. **Higher Institutions of Learning.**
   - a. State Institutions
   - b. Denominational and Parochial Institutions
   - c. Charitable Institutions

II. **High Schools**
   - a. Public
     1. Approved
     2. Consolidated
     3. Normal Training
   - b. Parochial
   - c. Private

III. **Graded Schools**
   - a. Public
   - b. Private
   - c. Parochial

IV. **Rural Schools**
   - a. Standard
   - b. Non-standard

SUPERVISION AND CONTROL.

The supervision and control of these schools and institutions are placed legally under the Department of Public Instruction, the State Board of Education, and the Board of Control of State Institutions. The private, denominational, and parochial have no state supervision and control. Sec. 2627-c of the school laws of Iowa reads as follows:

"The Superintendent of Public Instruction shall have general supervision and control over the rural, graded, and high schools of the state, and over such other state and public schools as are not under the control of the State Board of Education, or Board of Control of State Institutions."

GROWTH, DEVELOPMENT, POPULATION, TEACHERS, SALARIES.

Something of the growth, change, and progress of the public schools of Iowa may be gathered from a few comparative statistics.

In 1850, Iowa had 164,336 persons between the ages of 5 and 21 years, and 24,804 of these were enrolled in the public schools. We then employed 549 male teachers, and 250 female teachers. The males received an average of $14.76 per month compensation, and the females received $8.78.

In a decade the total number of persons between the ages of 5 and 21 years had increased to 244,938, with 167,869 enrolled in the

public schools. But the average attendance at this time was only 77,113, while the number of teachers had increased to 3,219 males, and 3,155 females.

By the close of 1870 we have 431,134 persons of school age, 320,083 enrolled in the public schools, with an average attendance of 202,246.

By 1880 we had 586,556 persons between the ages of 5 and 21, 426,057 pupils enrolled in the public schools, and an average attendance of 259,836. There were 7,254 male teachers, and 14,344 female teachers. The average monthly salary for male teachers was $31.16, and for female teachers, $26.28.

By 1900 we had a total enumeration of 731,154, with an enrollment of 566,223. We had 4,948 male teachers, and 23,841 female teachers. The average compensation per month for the males was $40.20, and for the females, $30.24.

At the present time we have 683,188 persons between the ages of 5 and 21 years. There are 2,265 male teachers and 25,395 female teachers, making a total of 27,660 teachers.

SCHOOL BUILDINGS

In 1852 Iowa had but 1,470 school houses; 740 of these were brick, 245 frame buildings, 14 stone and 471 were log. In 1861 the

BOONE HIGH SCHOOL.
The Normal Training High School Department is given an important place in the City High School.

number had increased to 3,480, more than twice the number nine years before; 2,199 of these were frame buildings, 301 brick, 86 stone, and the number of log houses had increased to 893, the highest number that has ever been recorded in the state. In 1880 the total number was 11,037; 10,043 of these were frame buildings and only 67 were built of logs. In 1861 32 per cent of the buildings were built of logs, and no doubt were in keeping with the pioneer buildings of that date. In nine years the total log buildings had increased to 893, but the per cent of the total was about 10 per cent less. Those who feel that we have made no advancement in buildings ought to look back upon some of these pioneer buildings with their crude construction and meager equipment and compare them with present day buildings valued at $63,329,584.00.

SCHOOL HOUSES, LIBRARIES, AND APPARATUS.

In 1880 Iowa had school houses valued at $9,243,243.00. These school houses had 22,609 volumes in their libraries and apparatus worth $189,116. In twenty years the value of the buildings had increased nearly 100 per cent and they were estimated to be worth $17,655,992.00, while the libraries were nearly 15 times as great.

During the same period the apparatus had increased more than 400 per cent. However, the last twenty years has seen the greatest changes. The total number of school houses has changed but slightly in forty years but the value has increased more than 500 per cent and we now have buildings valued at the enormous sum of $52,084,072.00, with 1,548,325 volumes in the libraries and apparatus valued at $3,231,096.00.

It is well to note these increases in buildings and equipment when we hear criticisms of our state's system of education.

THE RURAL SCHOOL.

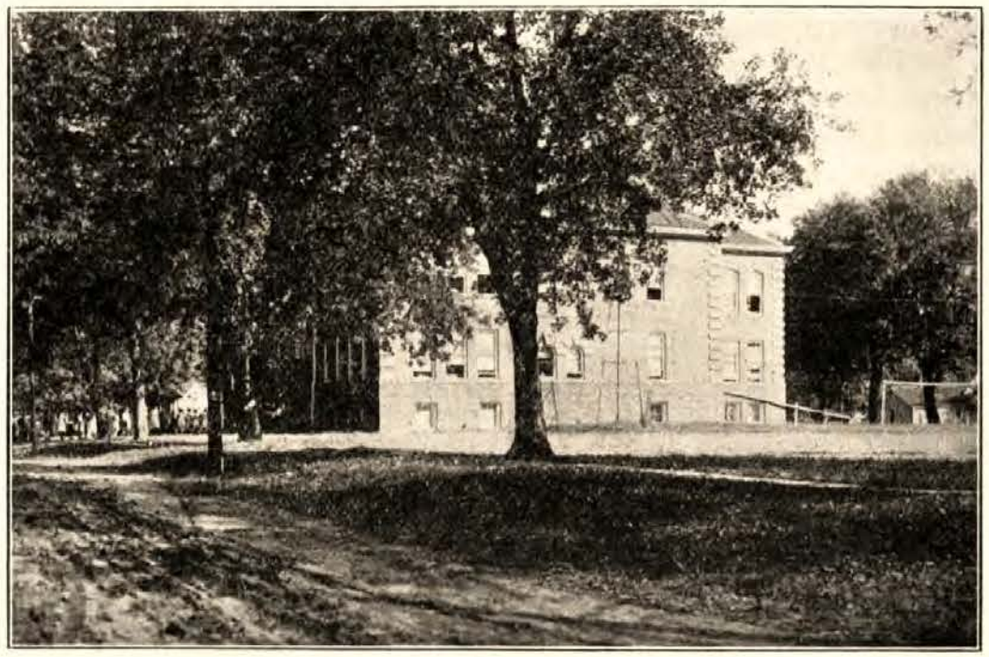

In a general way, the rural school means a single school with a single teacher, situated in a farm community, where the teacher handles all the work for eight grades, is the janitor, the instructor, the supervisor, and the administrator. This type of school was the result of a pioneer period in our state and national development. The rural school was a part of the rural life and was frequently near a country store and a country church. It was here the farmer bought his groceries, swapped stories, got the market reports, and

learned the news of the neighborhood. The store was a social center, where the boys congregated to work off their surplus energy in various amusements.

The church was the social center on Sunday, where all united in worship and where the influence lasted through the week.

The school has as many hallowed memories and sanctified spots as the church. It was here that all country children, and that was all children at one time, received the rudiments of an education. The curriculum was represented by the three R's, and the attitude, supervision, and administrative ability of the teacher was typified by the motto, "No lickin', no learning."

Not long ago in the history of states, Iowa had this kind of a community store, church, and school, but social and industrial

Combination School Building, Grades and High School, Allerton, Iowa, illustrating well-shaded campus and pupils engaged in regular monthly fire drill.

changes have come. New means of transportation and communication have had their influence on church, and store, and school. The railroad, automobile, airplane, have influenced time and space. The telephone has helped to bring larger areas together and make communication easier. These and many other inventions have made a different rural life, and a changed school must minister to the needs of the community.

CONDITIONS.

Some of these schools are located in districts where land is poor, the taxable valuation small, and the buildings are old, the equipment is meager, and the teachers have little training. Others are in districts that have a large taxable valuation and have excellent buildings, all the equipment that can be used and teachers well trained for the work. By taking a few extreme cases almost anything may be proved about the system as a whole, and speakers and writers are apt to take extreme cases to prove what they want, but the real truth lies in the median cases which are between the extremes.

A great deal has been written about these one-room rural schools, and the great majority of the comments have been unfavorable. Yet the school still exists, and today furnishes the greatest educational problem in the State of Iowa.

In the past it has been customary for many people to condemn these schools, point out their weaknesses, and then turn away and leave them to continue their existence as before. Many comparisons have been made to show the faults of the rural schools, but frequently a rural school has been compared with a high school and not with a graded school. Now it is the policy of this office to take these schools as they are and try to improve them.

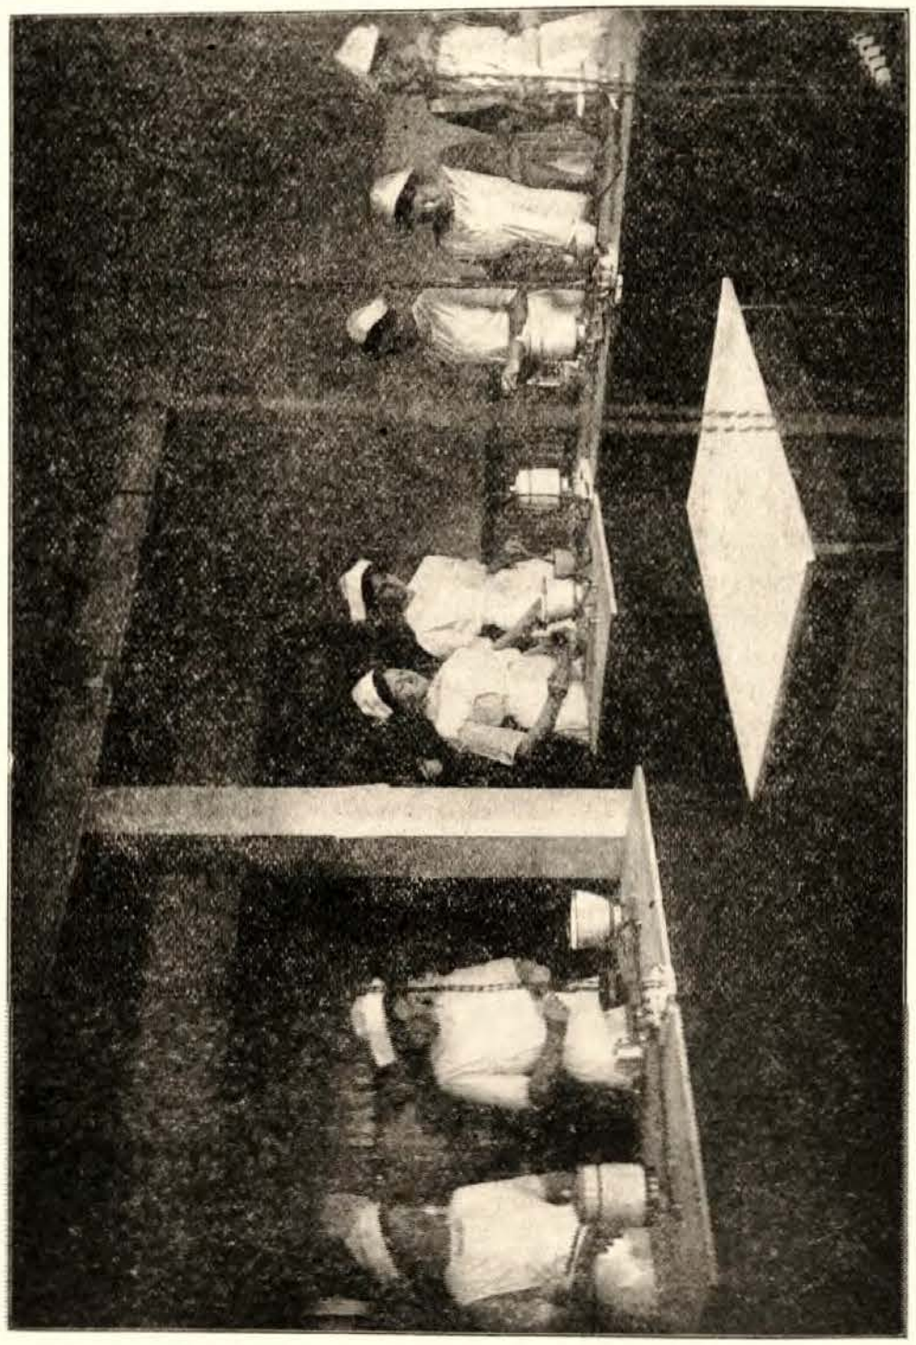

RURAL PROBLEMS.

The real rural school difficulty centers about several problems. Among the most important are the following: school boards, teachers, funds, supervision, and courses of study. There is no attempt to suggest these in the order of their importance.

School Board. The school board ought to be given the first consideration, as it is the direct representative of the people, elected by them for carrying out their wishes in regard to educational matters. It has to assume the responsibility for furnishing funds, for hiring teachers and janitors, for establishing courses of study, for transporting pupils, and for determining the general policy of the school.

As a general rule, these boards are not in touch with the work of other districts, and there is no state-wide, constructive plan for the conducting of these schools.

Support. The school board has to determine the amount of taxes which should be levied and certify the same to the county auditor.

Home Economics in the Normal Training High School.

It has to figure the legitimate expenses of the district, and then provide for contingencies which may arise during the year, and raise sufficient revenue for the conducting of the schools. Without this economic attention, the schools could not be kept in operation. There is no constructive, state-wide policy with reference to the taxation. In many places the taxes are already too high, and some uniform method should be established for equalizing the taxes and the educational opportunities of the children.

The Teacher. A little examination of the facts reveals that the teachers in the country schools are hired for a short period, frequently as short a time as three months, that they have a small amount of training, and that there is little if any supervision. In order to meet the difficulty in securing qualified teachers for the rural schools, the Normal Training High Schools in the State of Iowa have been organized. At the present time there are 191 of these schools, turning out about 2,500 graduates per year. The work of these graduates in the rural schools has had a very wholesome effect.

Supervision. That the rural schools are not adequately supervised, is self-evident. The county superintendents of the state are doing some very excellent work in connection with these schools, but they are limited in time and opportunity. Their work instead of being supervisory, must be more in the nature of inspection and visitation.

Course of Study. The course of study in the early school consisted of short exercises in reading, writing, arithmetic, and spelling. A little care in comparing the course in the pioneer school with the one in the school today, shows that the course of study has been improved by the addition of new practical subjects that pertain to the rural life, and that are valuable to the health and citizenship in the community.

Summary. A little care in comparing a pioneer rural school with one of today shows that many changes to include practical, vocational, and home making subjects have taken place. Teachers are better trained. Many of them are graduates of good high schools with special training for rural teaching. The buildings are better. The old log school house with its crude equipment is only a memory in the minds of pioneers. The course of study has been expanded. An examination of the records shows that last year more than 10,000 boys and girls finished the course of study in these schools, took

the final examinations, and now have passports into the high schools of the state. Every student who has completed his course in one of these rural schools is entitled to training in some high school that will accept him, and his district must pay his tuition.

METHODS OF IMPROVEMENT.

While the rural school has had many changes and improvements, it has probably been changed the least of any part of our educational system, and now demands the most attention.

Two methods of improvement in these schools are now in use: one consists in making a consolidated school with districts united and pupils transported to a certain school; the other of standardizing the one-room school where it now stands. Each has its advantages and difficulties.

THE STANDARD SCHOOL.

The Thirty-eighth General Assembly established The Standard School as a means of taking care of the children and teachers in the rural schools. The need for such a law was fully realized when it became known that Iowa had 10,776 one-room schools and that 214,698 children were then enrolled in these schools and must get their elementary education in a one-room school with one teacher.

This law, known as the Evans-Smith bill, made an appropriation of $100,000 annually for the purpose of helping the one-room school. The bill provides state aid of $6 per pupil for each student who is in attendance for at least six months of the school year. One-half of the amount goes to the teacher as an addition to her salary and the other half to the district and must be used for the purchasing of more equipment. The law provides for a teacher with a first grade certificate. Grounds, building, and equipment must meet the standard set by the Department of Public Instruction.

Standards had to be written and published, county superintendents had to be given the facts, teachers and boards of education had to become familiar with the new plans and at first the work had to move slowly, but since the work has started it has gone at a marvelout rate and during the first year 615 schools met the standards, $61,732 was distributed to teachers and districts. Since that time 279 schools have met the standards and there are now 894 with an enrollment of 10,288 pupils.

An official rating card for Iowa Standard Schools has been prepared and issued by the Department of Public Instruction. It is found in the Bulletin on Standard Schools and covers the following points:

I. Grounds and outbuildings.
II. The schoolhouse.
III. Equipment and care of the schoolroom.
IV. Library and supplementary readers.
V. The teacher and the school.
VI. Community activities.

The law did not provide for any means of administration and provided for no inspector, but an inspector was taken from another department at a very great sacrifice to the work.

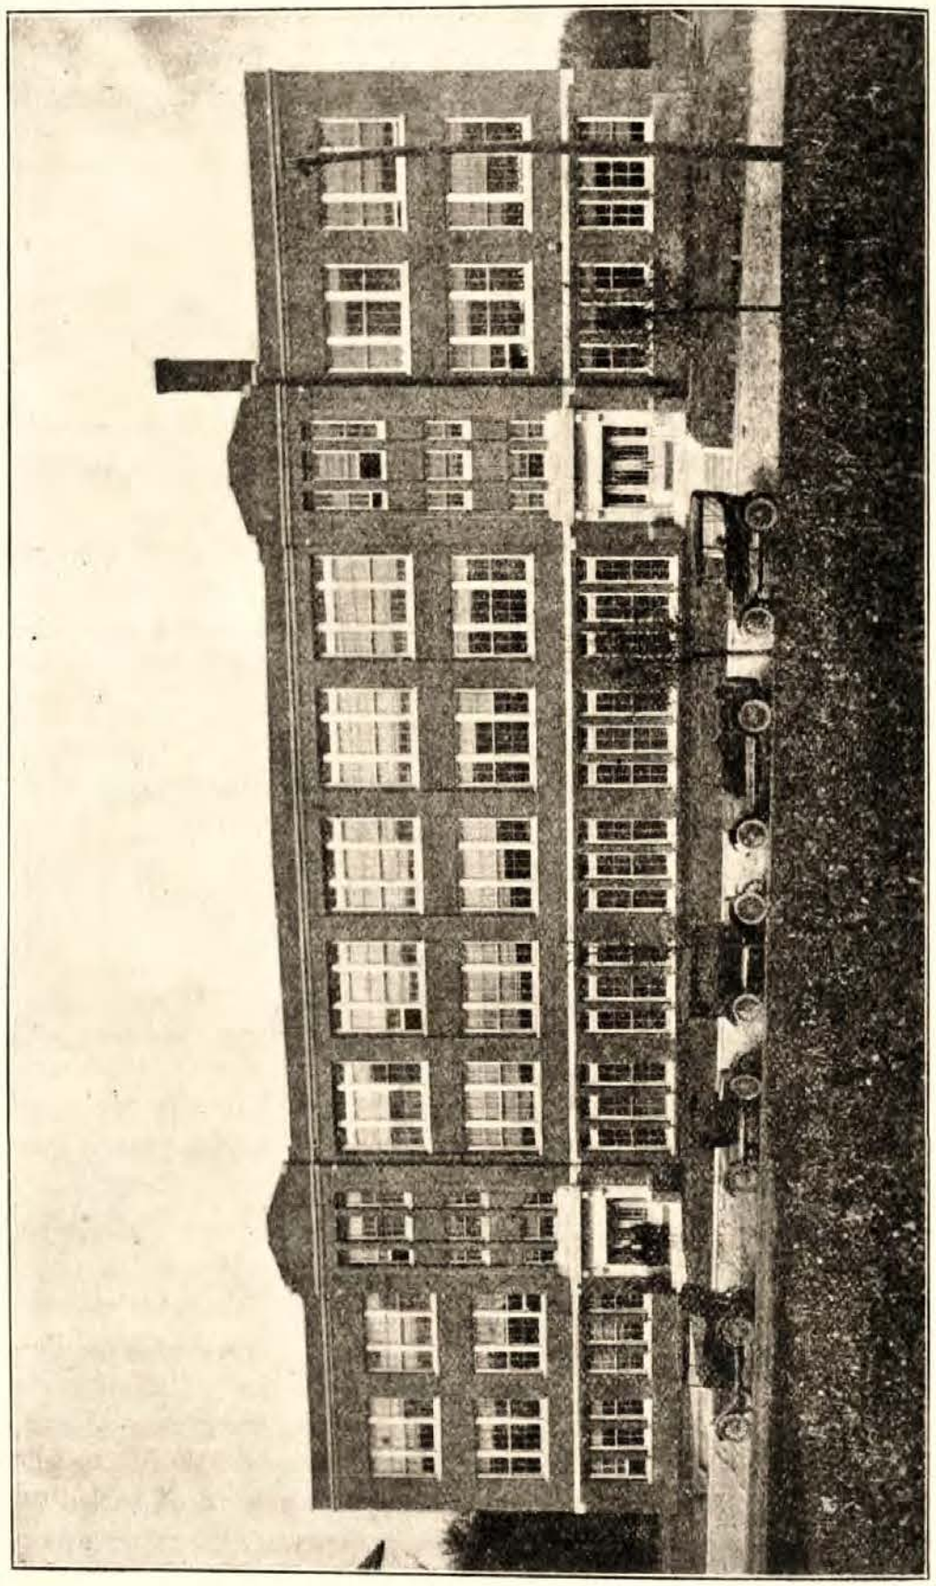

The law has had a very wholesome effect upon the rural schools. First, it has secured a better trained teacher; second, it has increased the attendance; third, it has secured a greater degree of cooperation, as teachers and district each lose if a pupil drops out of school.

No educational movement in recent years has come under more adverse circumstances but in spite of all the conditions this work has developed at an enormous rate. The funds are now practically all used and the movement must stop and 9,000 schools, nearly all of which are in farm communities, be left with no help unless some more relief is given by the legislature.

THE CONSOLIDATED SCHOOL.

The consolidated school in Iowa has been in operation for about fifteen years, but its growth has been slow, and it was not until recently that its rapid growth came. During the past year it has practically doubled in numbers.

Any adequate history of the consolidated movement must be closely linked with former state superintendents. Honorable J. F. Riggs helped start the movement, but it was Honorable A. M. Deyoe who gave it the most attention, secured favorable laws, developed the course of study, and went through the period of construction and organization when it was in a very experimental and critical stage. Much of the success of this movement is due to his personal efforts, and his name must always be associated with this movement when any adequate account is given.

EARLHAM CONSOLIDATED SCHOOL
The progress of the consolidated school movement is best told by the large number of splendid buildings such as the one above. Eighty-three new consolidated school buildings have been erected since January 1, 1920, at a cost of about $10,000,000.

The consolidated school has its advantages and disadvantages, the same as any other school, and the wise person considers both sides of the case.

The consolidated school is formed by the union of several districts which build a certral school and transport pupils. The kind of building, the equipment, and grounds, depend somewhat upon the size of the district and the value of the taxable property. Sixteen sections is the smallest territory that can be consolidated, and at least one district has been formed with more than 70 sections.

Some of these districts are located in the open country, but the great majority are in the small towns. Each location has some advantages and disadvantages. The purely rural location brings the question of a teacherage to the front at once, and in some places fine homes for the superintendent and teachers are built in connection with these consolidated districts.

The following are a few of the advantages of the consolidated school. It gives a larger taxing area, usually gives the pupils the advantage of a high school, better buildings, larger grounds, an experimental plot for agriculture, and better supervision.

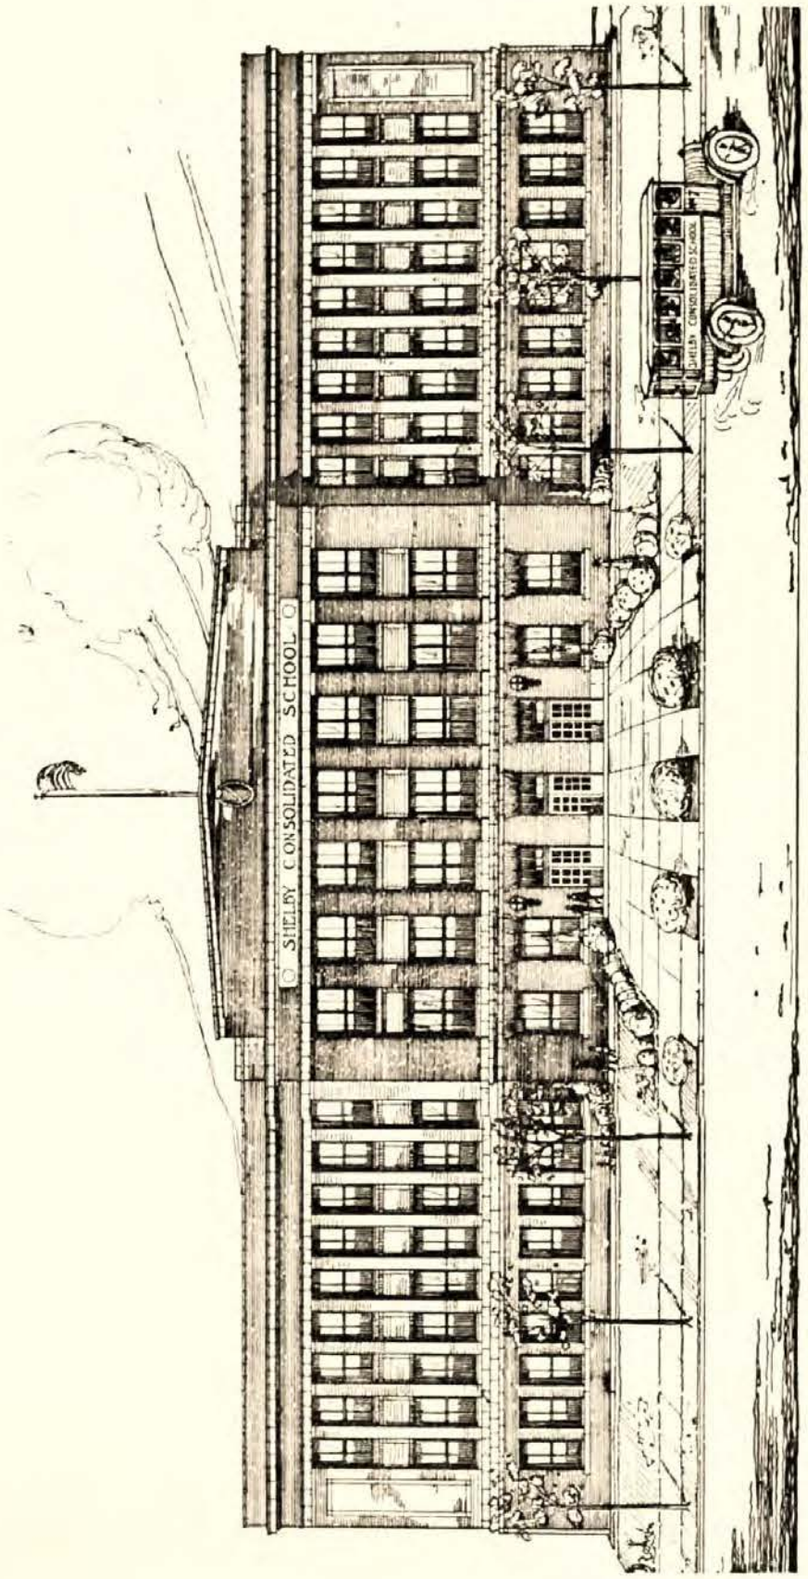

Development. Last year 224 consolidated schools were in operation, on an approved basis, and received state aid; 86 more were approved for tuition purposes only; and 111 were newly organized and non-approved. The growth during the past year was practically double what it had been in the past 14 years. The rapid increase in the number of consolidated schools last year has made an unusual number of problems.

Legal. The elections, closing of so many one-room schools, and the organization of new consolidated districts, disposing of the rural district property, etc., has caused an enormous amount of legal work, and had it not been for a legal authority in the office, the work in the districts would have been much slower.

THE HIGH SCHOOL.

The high school in Iowa has had a phenomenal growth in the last few years. It seems to fill a very desirable place in our educational system.

In 1919-20, 63,217 students were enrolled. Of this number 7,055 boys and 10,766 girls were non-residents of the district where they attended. Out of this number only 431 boys and 530 girls paid their

own tuition, but in some cases the students paid a part of their tuition, as the cost was above the maximum rate of $8.00, which is paid by the district in which they reside. Of all those in attendance, 28 per cent were non-residents. Last year 9,721 pupils graduated from four-year courses, or 15 per cent of the entire enrollment.

This part of our educational system presents many problems, most of which can only be mentioned in a brief report at this time.

The course of study, properly trained teachers and supervisors, sufficient funds, proper libraries, adequate equipment, grounds, buildings, transportation, all are demanding attention and at once make problems of great magnitude for the State of Iowa. A table of statistics later in this report gives many illuminating facts.

The public high schools of the state are divided into approved, consolidated, and normal training. An approved school is one that has been inspected and standardized by the Department of Public Instruction. All high schools must be approved if they desire to receive tuition for non-resident pupils. The consolidated school is organized under a special statute, receives state aid for equipment and maintenance, and must give special emphasis to vocational subjects, with greatest stress upon manual training, domestic science, and agriculture. The normal training high school is in reality only a department in a high school with special emphasis upon the methods of teaching. The course aims to prepare teachers for work in the rural schools.

Inspectors are annually visiting these various types of schools as frequently as possible and detailed reports are later presented.

THE NORMAL TRAINING HIGH SCHOOL.

A Normal Training course in the high schools was established as an experiment but it has become so popular and the teachers who have graduated from this course have been so uniformly successful in the rural schools, that the number of Normal Training schools have rapidly increased and the demand for graduates as teachers is always in excess of the supply. This work is no longer on an experimental basis but is now filling a permanent need in training rural teachers.

At the present time 191 high schools have this course and there is a constant demand for more schools. These schools are located in 98 different counties. Twenty-eight counties have 1 school, 48

counties have 2 schools, 17 counties have 3, and 4 counties have 4 schools. The average school enrolls 23 students, 4,200 are enrolled in the state, and during the biennial period 4,557 young people have received certificates.

The course of study for these schools has been carefully worked out and is the best that experts are able to make. The inspector is constantly in close touch with the work, he visits the schools as frequently as time will permit and is alert and active in sensing the changes in ideals or needs. The students are not only given practice in observation work but they are actually sent to the rural schools for practice teaching.

These Normal Training High Schools are the main source of supply for the trained rural teachers and as such they should be given adequate support and encouragement.

THE MINING CAMP SCHOOLS.

During the 38th General Assembly a bill was introduced requiring a tonnage tax on all coal mined in Iowa for the benefit of the schools in the coal camps. Later a special appropriation was substituted for the tonnage bill, and $25,000 was given annually for the benefit of the schools in the camps.

When the Department of Public Instruction began to investigate the problem there was no definite information, only a confused mass of contradictory statements. A personal inspection was begun as early as possible. The Superintendent of Public Instruction, the Inspector of Consolidated Schools, George S. Dick, Mr. Joseph Morris, vice president of the Miners' Union, George Heaps, secretary of the Operators' Association, secured a car and drove for many days and visited nearly every camp in the state. The school buildings and grounds were inspected, conferences were had with the school boards, and as much information as possible concerning these camps was secured from the county superintendents. After this visit a detailed report from each district was sent to the Department of Public Instruction.

The inspection revealed many things. In some places the tax rate was very low, as low as 11 mills in Buxton, and the schools were poor. In other places the taxes were high, 162 mills in *Wayne No. 8*. The size of the tax levy does not necessarily indicate the kind of a school there is in a district, or give much idea of the burden to those in the camp. In some places the homes are owned by the miners and

in others by the company. The valuation is small and a high rate does not always mean a burden on the parents of the children. An attempt was made to find how many persons in each camp paid $25.00 or more in school tax, how many $20.00, $15.00, $10.00, $5.00, etc. The data which we were able to secure was so limited that positive conclusions could hardly be drawn.

Some positive deductions are easily drawn from a hasty general survey of the situation. The buildings are frequently poor, the grounds rough and inadequate, the outbuildings unsanitary. The library and equipment are meager, but, perhaps, the greatest difficulty is the low salary paid teachers and the difficulty the teacher has in securing housing accommodations. The low salary attracts only those who are poorly prepared, and the housing conditions frequently make it necessary to have a local teacher who can come from home.

In dealing with these camps, we had to make a special case of each camp, decide upon the things necessary, select the ones that could be done and then do what could be accomplished, always keeping in mind the good of the children of the community.

In some places supplementary books have been provided; in others maps, charts, and globes have been supplied; in some schools additions have been made to the salary that the district would pay in order to get better teachers.

In Consol and Ora Labor, additions were made to the buildings. Two buildings were moved in the Consol district so they would be upon the road and located in sanitary and sightly surroundings. At Zookspur, the building was moved to higher grounds and made sanitary and pleasant.

In this work we have had the hearty cooperation of representatives of both the Operators and Unions. Mr. George Heaps, secretary of the Operators, has given much of his time and offered valuable suggestions. Mr. Joseph Morris, secretary of the Miners' Union, has helped us to keep in close touch with the different problems, and has kept the organization informed of the efforts being made.

The county superintendent in each county where a mine is located has give much time and valuable assistance in trying to solve this vexatious problem. Senator J. R. Price, of Albia, has spent time and energy in visiting some of these camps and helping us to get

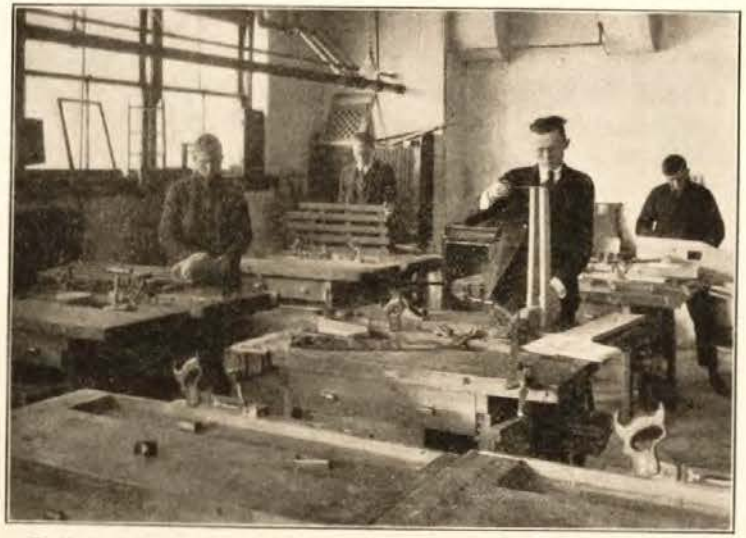

the proper equipment for the schools. We have had the co-operation and sympathetic help of all concerned in this work.

These schools are a special problem, and as such should be given financial help that will enable each camp to have a school commensurate with its needs.

VOCATIONAL EDUCATION.

The need for vocational education is too generally acknowledged and too self-evident to need any arguments in its favor. It helps to adjust the general educational system to the needs of those who are in remunerative occupations; it increases the general efficiency of laborers as public servants; it improves the social service and is a distinctive advantage to everyone.

Last year agriculture centers were held in twenty-four different places and twenty-nine men devoted their time the entire year to

Section of a short-term class at work on farm appliances in the wood-working shop at Hudson Consolidated School.

this work. Besides this, twenty short term courses were offered of ten weeks each and fifteen special teachers were employed for this purpose.

One of the distinctive advantages of this agriculture work is the laboratories with which the student is surrounded. A conservative

estimate places this equipment in farms, machinery, animals, etc., at one and one-half million dollars.

Last year special short courses were held in four different centers, schools were held for painters and the demand has been very great for an increase in this work during the present year.

The amount of money available for this work last year was $69,000.00, the present year it is increased to $89,000.00, and for the next biennial period it will be $202,000.00. If the state of Iowa profits by this amount of money it must duplicate the amount.

REHABILITATION WORK.

The government has provided for the rehabilitation of those injured in industry. A number of states have already taken advantage of this opportunity and are doing very excellent work with those who have been unfortunate. The Governor of the state of Iowa has already accepted the government's offer, subject to the action of the next Legislature and $44,000.00 has been set aside for the state of Iowa for this service.

This vocational department should receive very special consideration at the hands of the Legislature.

INSPECTION OF SCHOOLS.

Inspection has enabled the Department of Public Instruction to keep in close touch with the schools of the state, to establish uniform standards for high school, to help build libraries, to secure equipment adequate for the needs of the community, and to keep teachers and boards of education informed upon the latest standards and requirements for the public schools. The fact that we have constant calls for visitation in such number that we can answer only a few of them is the best evidence of the appreciation with which this work is received.

Inspection of the public schools in Iowa grew because of the demand for this work, even before there was a legal status for the inspector. The beginning of this work was carried on by the state institutions, and a system of inspection gradually grew up and developed under their regulation and control. Later the work of inspection was legally placed in the Department of Public Instruction, and two systems of inspection grew up. The inspection for the institutions of higher learning started at the top of the list and worked down, and thus grew up the list of accredited schools;

while the inspection of the approved schools by the Department of Public Instruction began at the bottom of the list and rather worked upward. These two systems worked well until there came an overlapping of the schools.

In these two systems of work there has never been any duplication of the work, but rather a double standard made. Last year the joint committee and the faculties of the institutions passed a resolution relative to the work and the state institutions dropped their list of accredited schools, but they still deal with the parochial schools.

One system of inspection is enough, as there never has been any legal plan for but one system, and that system should be complete and final.

STATE TEACHERS' PLACEMENT BUREAU.

The 38th General Assembly established a Teachers' Placement Bureau in the office of the Superintendent of Public Instruction. This department was organized July 1, 1919. At the time we had the difficult task of hiring a director and enough stenographic help to carry out the work with the modest sum of $2,500.00. Fortunately, we were able to secure the services of Dr. O. H. Longwell for part-time work, and as he is an expert in this line of service, he has accomplished what has been nothing short of wonderful in the organization and operation of the Bureau. During the past year the Bureau has had 1,258 people enrolled, and has located a large number of those enrolled. Boards of education and school teachers have both found that this is a very helpful service.

"No person connected with the office of the Superintendent of Public Instruction shall be held responsible or be understood to vouch for the fitness or success of any teacher who may secure a position through the agencies herein provided."

This law makes it very specific that the office is in no way responsible for locating or recommending the teacher who enrolls, but that it is simply a clearing house where school officers may find the supply of teachers, and teachers may have access to the vacancies which are known in the state. Enrollment in this Bureau is free to all the teachers who hold certificates in the state.

CITIZENSHIP

The thirty-eighth General Assembly passed a law pertaining to the teaching of citizenship in Iowa which reads as follows:

"Section 1. All public and private schools located within the state of Iowa shall be required to teach the subject of American Citizenship.

"Section 2. The superintendent of public instruction shall prepare and distribute to all elementary schools an outline of American citizenship for all grades from one to eight inclusive.

"Section 3. Public and private high schools, academies, and other institutions ranking as secondary schools which maintain three year courses of instruction shall offer a minimum of instruction in American history and civics of the state and nation to the extent of two semesters, and schools of this class which have four year courses shall offer in addition one semester in social problems and economics.

"Section 4. The superintendent of public instruction shall distribute to all high schools, academies, and institutions ranking as secondary schools, an outline of a course of study in American history, civics of the state and nation, social problems and economics prepared under his direction." (38 G. A., ch. 406)

Just what is meant by a course in citizenship and how it should be introduced into the schools so as to become a part of the regular work and function properly is not clear.

However, in conformity to this act a brief outline was written and incorporated in the course of study for rural and graded schools and sent out at once.

Then a large committee, representing the entire state, was selected and the following assembled and spent a day in planning the work, how it should be completed, and what field it should cover.

A. E. Harrison, Storm Lake, County Superintendent.
May E. Francis, Des Moines, Inspector.
F. C. Ensign, Iowa City, Education.
Emory A. Rolfe Dayton, Editor.
Elmer E. Lymer, Sioux City, Professor.
H. G. Plum, Iowa City, Professor of History.
Willard W. Bartlett, Des Moines College, Education.
A. L. Heminger, Des Moines, Deputy State Superintendent.
F. A. Welch, Des Moines, State Inspector Graded and High Schools.
O. H. Longwell, Des Moines, Director State Teachers Placement Bureau.
W. O. Payne, Des Moines, Editor Iowa Forum.
F. E. Horack, Iowa City, Education.
L. B. Schmidt, Ames, History.
H. Ingham, Des Moines, Editor.
Chas. H. Meyerholz, Cedar Falls, Iowa State Teachers' College.
J. W. Gannaway, Grinnell, Political Science.
R. E. Kepford, Des Moines, State Lecturer.
C. J. Johnson, Des Moines, Ex-Superintendent.
H. F. Robinson, Oskaloosa, Ex-Superintendent.
Geo. S. Dick, Des Moines, Inspector.
Lafayette Young, Des Moines, Editor.
Edwin H. Sands, Des Moines, Housing Commission.
W. H. Powell, Ottumwa, Editor.

F. Q. Stuart, Des Moines, Iowa Homestead.
Mrs. Hoffman, Des Moines, County Superintendent.
V. L. Conkling, Des Moines, Officer State Board of Health.
W. F. Barr, Des Moines, Drake University.
Alson Secor, Des Moines, Successful Farming.
N. H. Weeks, Des Moines, Public Schools.
P. E. McClenahan, Des Moines, Supt. Dept. of Public Instruction.
H. M. Havner, Marengo, Attorney General.

From this large committee was selected the following smaller one to do the actual work of making a course of study:

COMMITTEE ON CITIZENSHIP.

Professor H. G. Plum, State University, Iowa City, Chairman.
Professor J. W. Gannaway, Political Science, Grinnell.
Professor Charles H. Meyerholz, I. S. T. C., Cedar Falls.
Professor L. B. Schmidt, History, State College, Ames.
George S. Dick, Inspector of Consolidated Schools, Des Moines.
Mr. W. H. Powell, Editor Ottumwa Courier, Ottumwa.
Mrs. A. H. Hoffman, County Superintendent, Des Moines.
Professor Elmer E. Lymer, Morningside College, Sioux City.
Superintendent J. J. McConnell, Cedar Rapids.
Superintendent Ray Latham, Ida Grove.
Mr. E. H. Sands, Housing Commission, Des Moines.
Mr. Tracy Garrett, Editor Burlington Hawkeye, Burlington.

The work of writing a complete course of study for the grades was given to the following group:

Professor Charles H. Meyerholz, I. S. T. C., Cedar Falls.
George S. Dick, Inspector of Consolidated Schools, Des Moines.
Mr. W. H. Powell, Editor Ottumwa Courier, Ottumwa.
Mrs. A. H. Hoffman, County Superintendent, Des Moines.
Superintendent J. J. McConnell, Cedar Rapids.

The work of this committee was divided into three sections. The first section covered the first, second, and third grades, the second section the fourth, fifth, and sixth grades, and the third section the seventh and eighth grades.

This committee did a splendid piece of work and completed a course of study which is a most excellent one.

The committee which had charge of the History of Civics, Social Problems, and Economics, headed by Professor H. G. Plum of Iowa State University, has been working for the entire past year upon the course.

This committee is making a very complete report and it will no doubt have a very far reaching and wholesome effect upon the history and educational work in the public schools of the state.

The committee has worked under many difficulties but has done a very constructive piece of work, and it is hoped that the schools of the state will profit by it.

SCHOOL VISITATION.

The present State Superintendent has a well defined theory that the best place to find out about the schools is where the schools are located and that more service can be done for the public schools if he comes in direct contact with them. Working upon this theory, plans were made very early last year to visit rural schools in the state. While the Superintendent has visited many of the rural schools in the different parts of the state, one visit was especially notable.

A trip was planned for an entire week. A group of men were selected, the State Superintendent of Public Instruction, the Rural School Inspector, the Director of Vocational Education, the Normal Training Inspector and the Director of Public School Music for the I. S. T. C., and Hon. W. L. Harding, Governor of Iowa, was invited and went for the entire week This group of educators went to Washington County, Iowa, where they were joined by the County Superintendent and at eight o'clock in the morning they started to visit schools. They traveled in an automobile from one school to another. When they came to a school they met the teachers and pupils, made rather a hasty survey of the grounds, building and equipment, saw the condition of the library and also the sanitary conditions, and usually ended by speaking to the teachers and pupils and encouraged them in the work they were trying to do, and asked them to keep up the good work which was being done.

During the first day we drove ninety-nine miles, visited sixteen schools and gave thirty-six different addresses, and closed the day with a great mass meeting in Washington, Iowa.

The same process was repeated for an entire week. Each one who went upon this trip of inspection felt that he had received much inspiration and had a definite, concrete knowledge on which to base a future school program.

SCHOLARSHIP.

The Superintendent of Public Instruction believes that the first essential and the greatest reason for the existence of a school is scholarship,—actual knowledge of the branches taught. With the idea in mind of encouraging thoroughness, a scholarship contest was inaugurated last year in the rural schools.

At the close of the year a special diploma was given to one boy and one girl who led the county in his studies. These pupils all have

to pass the same examination to enter high school, hence they are on a uniform basis. After the county scholars are awarded, the papers are selected and the 15 boys and 15 girls who lead the state are selected and a special diploma is given to them. The Commissioner of Education of the United States also signs the latter diplomas.

Last year 67 counties took part in the contest, and it is hoped that in a short time every county in the state will take this means to encourage educational efficiency. This contest may be carried on by the grades in city schools if they desire to do so.

A THRIFT PROGRAM.

At the present time no sane person needs an argument to convince him that some general thrift program is necessary.

If we are going to make it modern and universal it must be a part of the instruction in the public schools of the state.

Ability to succeed financially is essential to every well-rounded life and instruction in simple economic principles and project practice in Thrift are vitally needed in the schools because the prevalent extravagance and waste in American life threatens to undermine the economic independence and civic virtue of American citizenship. The present social and economic unrest is evidence of this need.

In recognition of these things the National Educational Association appointed a committee which met early this fall in Washington, D. C., with a representative of the Treasury Department and the American Bankers Association and made a tentative outline of work which should be done.

The committee suggested the following summary of recommendations:

Course of study in Thrift.
Material to be used.
Systematic saving, wise spending and careful investment of money.
Judicious use of time and materials.
A broader understanding of financial institutions and financial practice.

It is most highly recommended that Iowa follow the suggestions and plans of the committee and make this a part of the public school course of study.

SCHOOL AGRICULTURE AND GARDENING.

Agriculture has been emphasized as a part of the course of study in the rural and consolidated schools. All teachers are obliged to take examinations in agriculture and domestic science. Consolidated schools must teach agriculture, and must have a teacher who is especially trained for this work. Yet with all this emphasis, the work in agriculture is not having the results which its advocates hoped it might produce. No doubt, the difficulty in this line comes from the fact that nothing has yet been done upon an economic basis.

All consolidated schools are now required to have at least five acres of ground, and much of this ought to be used for definite, positive experimental work in agriculture. Some provision ought to be made so that the agricultural work will be carried on for the entire season under the direction of an expert in this line, and positive, economical results ought to be produced.

This work should be emphasized, and it should be done on a good foundation, and not in a spasmodic way. It is easy to emphasize the theoretical side, but this will have little effect, unless it is carried over into an actual, economic reality.

THE COUNTY SUPERINTENDENT.

The law now makes the following educational qualifications for the county superintendent:

"The county superintendent, who may be of either sex, shall be the holder of a regular five-year state certificate or life diploma, and shall have had at least five years' experience in teaching or superintending." Sec. 2734-b.

The work of that officer has been emphasized and expanded. He is at once an administrator and supervisor, with executive and judicial duties and powers. He is an assistant to the Department of Public Instruction, and as such has special duties and responsibilities.

During the past year the salaries of county superintendents have been woefully inadequate. One superintendent in the state was paid $1600; 45 superintendents have received between $1700 ad $1800; 28 have received between $1800 and $1900; 9 have received between $2500 and $2600; and but one single superintendent in the state receives $3000.00. The following table shows that 73 county superintendents are receiving from $1700 to $1899. A comparison of the salaries of county superintendents with the salaries of superintendents in towns of from 1000 to 1500 is interesting. The average

city superintendent received an increase of $625, and the county superintendent nothing. The city superintendent's salary was increased on an average of 36.08 per cent, and the county superintendent's none. The city superintendents in these towns get from $1700 to $3000 for nine months, while the county superintendent works for 12 months.

SALARIES OF COUNTY SUPERINTENDENTS.

Amount Received	Total No. Receiving
$1600-1699	1
1700-1799	45
1800-1899	28
1900-1999	3
2000-2099	7
2100-2199	2
2200-2299	
2300-2399	
2400-2499	1
2500-2599	9
2600-2699	
2700-2799	
2800-2899	
2900-3000	1

A number of states have allowed an adequate salary for the county superintendent, and almost immediately they have secured better qualified persons, and received more professional benefits. A minimum salary of three or four thousand dollars ought to be established so that a superintendent could be elected, paid adequate compensation, and be made more permanent.

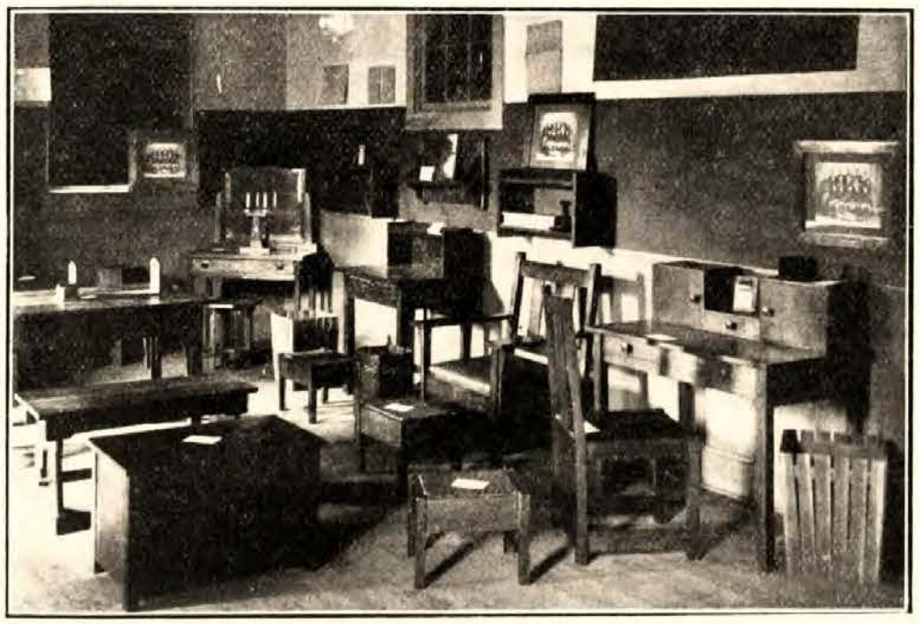

The duties of a county superintendent are those of an administrator rather than those of a supervisor. While he must necessarily have supervisory work, the details of the office take a great deal of his time and administration. The schools are located in different parts of the county, certain portions of the year the roads are almost impassable, and the districts hold only 8 or 9 months of school of from 160 to 180 days during the year. If he gave one-half of his entire time to supervision, it would enable him to be in each school but a very short time, and he would have little chance to give personal help to the teacher. As a result, he has to make plans, suggestive outlines, and give directions to the teachers on their reports and suggestions, rather than give personal supervision. These duties require a strong executive and carry much personal responsibility, and adequate care should be taken to get the best.

It is not necessary for the county superintendent to be a resident of the county in which he is elected. The board which elects the

county superintendent has a right to look over the state and select the best qualified individual it can find for the place. The board ought also to have the power to fix an adequate salary for the superintendent it has elected. If it had the power, as does the city board, to elect the one who is best qualified, and pay a salary based on the qualifications of the superintendent, the county superintendency would soon be on a professional basis and on a par with the city superintendencies.

STATE FAIR.

For many years it has been customary to have an educational exhibit at the Iowa State Fair and Exposition. In the past these exhibits have been held with a great deal of difficulty. The booths where the exhibits have been held are in the old Exposition Building, with very poor equipment. There has been a lack of adequate room, and the premiums have been small. It has been impossible to attempt to stimulate more interest in the exhibits because there was no place to put the material that had been sent to the exposition. We need a new Educational building with adequate room and equipment, with a permanent location for school material where it can be

Products of the Manual Training Shop.

cared for at all times, as well as during the State Fair. If such a building were provided, no doubt the schools of this state would make a greater display of the work which they have been doing, and

the people would have a chance to get a very comprehensive idea of what is really being accomplished in an educational way.

IOWA STATE TEACHERS READING CIRCLE.

The Iowa certificate law recognizes the vital necessity for growth in teachers, and requires each teacher to read thoroughly one professional book a year and submit proof of this reading to the county superintendent in order to renew his certificate.

The Iowa State Teachers' Reading Circle was organized for the purpose of selecting uniform professional reading texts and getting the work in a systematic way to the teachers of the state.

A member of the Iowa Teachers' Reading Circle is expected to read two books a year, and to own at least one of them. When he has done this, he is entitled to an annual certificate of credit signed by the county superintendent. Any member securing four such certificates is entitled to a lithographed Reading Circle Diploma upon presenting these certificates to the Secretary and manager of the Iowa Teachers' Reading Circle Board.

The Reading Circle Board meets once each year in the office of the State Superintendent of Public Instruction, for the purpose of selecting three or four recent books which best represent the trend of educational thought. Representatives of the different book companies are given the opportunity to present their books at this time, and the books for the year are selected.

The officers and directors of the Iowa Teachers' Reading Circle Board for 1920-21 are as follows:

P. E. McClenahan, president ex-officio; George Galloway, secretary and manager; Carolyn Campbell Pendray, treasurer; H. C. Moeller, Maude Wakefield, A. E. Harrison, Carrie Ludlow.

STATE TEACHERS' ASSOCIATION.

Now, as for many years past, the Iowa State Teachers' Association has been a very great factor in advancing the interests of the teachers in Iowa. The work of this organization is very closely connected with that of the Department of Public Instruction. The Department prints the proceedings of the Association. The Superintendent of Public Instruction is ex-officio chairman of the Educational Council, helps to plan the program for the work of the Educational Council, and is continually in close touch with the work.

The Association has recently been reorganized upon a delegate basis, and hopes to do very much more effective work in the future. The organization itself stands for the very latest improvements in education, and it has been responsible for some of the latest school laws, has helped the teachers in many of their campaigns for better living conditions, more adequate salaries, and better schools in general. This organization needs the counsel, the encouragement, and the financial support of every teacher in the State.

NATIONAL EDUCATION ASSOCIATION.

The National Education Association will meet in Des Moines next July. This is primarily a national organization of teachers, but it also has affiliated with it all those who are interested in education. It is expected that the meeting next summer will bring to Iowa representative teachers from every state in the union, all state superintendents, and all commissioners of education in the United States. It is confidently expected that many foreign countries will be represented, and there will be representatives from these countries who will come to Iowa to study our educational system.

This is the first time in the history of the organization that it has come to Iowa. This will give an unusual opportunity for the state to entertain distinguished American visitors, and even those from abroad. Plans and preparation are already being made by the representatives of the Iowa State Teachers' Association and those who represent the educational interest in the State to make this one of the greatest meetings in the history of the Association. Special trains will be run, and the opportunity will be given for visiting delegates to see our best rural and consolidated schools, our institutions of higher learning, to visit the mines, and to see the historic and interesting places in the State of Iowa.

This is an unusual opportunity for the State of Iowa to display its wealth, products, and resources. An appropriation should be made which will help to show the outside world what a wonderfully interesting and valuable state we have.

CERTIFICATION OF TEACHERS.

BOARD OF EDUCATIONAL EXAMINERS.

P. E. McClenahan, ex-officio President; Walter A. Jessup, ex-officio; Homer H. Seerley, ex-officio; Raymond A. Pearson, ex-officio; Mary E. DeBoos, H. E. Blackmar, Viola H. Schell, Secretary.

All certificates for teaching in the public schools of the state are issued by the State Board of Educational Examiners. Three series of certificates are issued, viz., state certificates, uniform county certificates, and high school normal training certificates. Provisional certificates are also issued when, in the opinion of county superintendents, emergencies requiring such certificates exist in their respective counties.

STATE CERTIFICATES.

State certificates are issued upon.

(1) examination

(2) graduation from the State University of Iowa, the Iowa State Teachers' College, the Iowa State College of Agriculture and Mechanic Arts, and Iowa colleges accredited by the Board of Educational Examiners.

(3) graduation from colleges and normal schools of other states which meet the Iowa standards; provided the applicants file proofs of two years' successful teaching experience.

(4) state certificates of other states which meet the Iowa standards.

(5) fifteen years' teaching experience and one year's training above high school grade.

Examinations for state certificates are held in counties calling for such examinations on the uniform county certificate examination dates and the Saturdays following in January, June, July, August, and October.

In addition to the three state schools accredited by the statute, the colleges named below are accredited by the Board of Educational Examiners for state teachers' certificates:

Buena Vista College	Storm Lake
Central College	Pella
Coe College	Cedar Rapids
Columbia College	Dubuque
Cornell College	Mount Vernon
Des Moines University	Des Moines
Drake University	Des Moines
University of Dubuque	Dubuque
Ellsworth College	Iowa Falls
Grinnell College	Grinnell
Iowa Wesleyan College	Mt. Pleasant
Lenox College	Hopkinton
Luther College	Decorah
Morningside College	Sioux City
Mount St. Joseph College	Dubuque
Parsons College	Fairfield
Penn College	Oskaloosa
Simpson College	Indianola
Upper Iowa University	Fayette

During the biennial period, state certificates have been issued as follows:

Examination—		
Original	50	
Renewal	124	
Life Validation	97	271
Graduation from Iowa Schools—		
Original	2,528	
Renewal	555	
Life Validation	555	3,638
Graduation from schools of other states—		
Original	179	
Renewal	9	
Life Validation	13	201
Certificates of other states—		
Original	486	
Renewal	21	
Life Validation	36	543
Fifteen years' teaching and one year's training	9	9
Total	4,662	4,662

UNIFORM COUNTY CERTIFICATES.

For uniform county certificates, five examinations are held annually at the offices of County Superintendents. The last Friday and the Wednesday and Thursday preceding of January, June, July, August, and October are the examination dates.

During the biennial period, uniform county certificates have been issued as follows:

First Grade—		
Original	1,703	
Renewal	2,147	
Life Validation	150	4,000
Second Grade—		
Original	7,902	
Renewal	4,107	
Life Validation	21	12,030
Third Grade—		
Original	3,565	
Renewal	216	3,781
Special—		
Original	548	
Renewal	298	
Life Validation	6	852
Total	20,663	20,663

HIGH SCHOOL NORMAL TRAINING CERTIFICATES

High school normal training certificates are issued to graduates of normal training high schools who pass the required examinations.

During the biennial period, high school normal training certificates have been issued as follows:

Original	2,927	
Renewal	1,630	4,557

Six thousand five hundred forty-seven provisional certificates have been issued during the biennial period.

The total number of teachers' certificates issued during the biennial period is 36,429.

RECOMMENDATIONS AND SUGGESTIONS.

I. *Revision and Codification of the Laws.* A code commission has been codifying the laws of the State of Iowa, and this commission has had a special committee to deal with the school laws. Honorable J. H. Trewin, of Cedar Rapids, has had charge of this work during the past year. He held conferences at various times with the leading educators of the state, and as a result has re-written many of the school laws. He has cleared up ambiguous clauses, removed contradictory statements, and has classified them in a very excellent way. The commission has done a splendid piece of work in codifying these laws, and the results should have the earnest, careful consideration of each member of the Legislature. The committee is preparing a number of educational bills, and will present them at the meeting of the Legislature.

II. *Rural Schools.* Iowa has 10,776 rural schools, and 214,698 children enrolled in these schools. This is approximately one-half of the total number of children in the State of Iowa below the 9th grade. Country children are entitled to as good teaching, as long a term, and as pleasant surroundings as the children in the cities. The work of improving these schools is the most important educational work in the State of Iowa, and it will have the most far-reaching effect. Special help should be given to both the consolidated and the standard school, as these two methods are both helping to solve the rural school problem.

III. *Standardized Schools.* The standardizing of the one-room rural school has made a wonderful growth. Last year 615 schools were standardized, and 615 teachers and districts, and 10,288 pupils

in 67 different counties, received the benefits of the standard school. No one educational movement in recent years has had such a broad, wholesome influence on every section of the state. It is very desirable that this work should be expanded, and that there should be one supervisor for each quarter of the state.

IV. *School Boards.* At the present time, Iowa has more than 20,000 members of boards of education, and these persons have no means of getting together and making plans for carrying out a constructive, educational policy for the State. These members of the boards of education are obliged to take the responsibility for the public schools. They must hire teachers and janitors, determine the amount of money to raise, see that the money is spent wisely, and assume the general responsibility for all problems in connection with the schools.

A provision should be made so these members of boards of education could be called together by the Superintendent of Public Instruction, for the purpose of making plans for the entire year for a constructive, uniform, educational policy. Provision should be made for the district to pay the expenses of board members while they are actually in attendance at these meetings.

V. *Educational Commission.* A very large number of school districts in the State of Iowa at the present time are having financial troubles, and are unable to raise sufficient funds to carry on the actual work of the school. Bonds have been voted, but cannot be sold on account of the low interest rates legally provided for. Boards are issuing warrants for salaries and marking them unpaid for the want of funds. The teachers are obliged to discount these warrants in order to have them cashed. Taxes are unusually high, and are by no means equal in the various parts of the state. The General Assembly should appoint some of its own members as a standing educational commission to study the educational problems for the entire State of Iowa. Such a commission could save millions of dollars and help to equalize the burdens and opportunities of educating the children of the state.

VI. *Mining Camp Schools.* The schools in the Iowa mining camps form a special problem and should be given special attention. These schools are the result of congested conditions caused by the construction of small homes located near the mines. In most places the land in the district has a low valuation, and the tax rate is high.

The school buildings are poor, and the equipment is meager. Special work has been done in these schools during the past year, and many improvements have been made, but there is still a great work to do in this field. These schools should be given an especial appropriation and special attention.

VII. *State Architect.* During the past year a large number of districts have voted to build new graded and high schools in the state. In many places the bonds have been sold and the buildings have been constructed; in others they are still in the process of construction; and in still others it has been impossible to sell the bonds.

In many places boards of education have succeeded in securing good plans and as a result, excellent buildings, but too frequently buildings have not been well constructed and plans have not been entirely satisfactory. A state architect who could provide plans and help in the construction of new buildings would save the State of Iowa thousands of dollars per year.

VIII. *The Teachers' Placement Bureau.* The Teachers' Placement Bureau fills an apparent want at the present time, as a large number of boards of education and teachers have taken advantage of the fact that a clearing house was available. An appropriation of at least five thousand dollars should be made for this Bureau so that boards of education and teachers of the state may be better served.

IX. *School Nurse.* It has been proved that the health of the child is one of the first prerequisites of a good school. We plan buildings with better light, heat, and ventilation than those of previous years, but only recently have we really discovered the great number of defects among those who are supposed to be healthy in our schools. School nurses ought to be provided for every county. They ought to be under the immediate direction of some one who is authorized to lay out the work and make the plans for the year. The local nurse should be under the direction of the County Superintendent and under his control. A nurse for the State of Iowa who could outline the work for the year would be a valuable addition to the field force of the Department of Public Instruction of the State.

X. *Educational Building at State Fair.* This department recommends a special educational building at the Iowa State Fair grounds where the best work of the schools of the state can be constantly on exhibition.

XI. *Scholastic Qualifications.* Any child who finishes one part of our educational system should have easy access to the next higher department of the system. Any student who finishes the required course in the eighth grade should be qualified to enter high school, and any student who graduates from a four-year approved high school should have unconditional freshman standing in a Liberal Arts course in the institutions of higher learning.

XII. *Statistician.* A statistician who can collect accurate statistics and get them in shape as the basis for school administration ought to be employed.

XIII. *Monthly Bulletin.* It is most necessary that the teachers of the state should be very familiar with the details of the work in the office of the Department of Public Instruction. For that reason a monthly bulletin ought to be prepared and sent out to the teachers. Bulletins are now published by nearly all the states in the Union. They are published by the institutions of higher learning, and each one has a special department to prepare the work and get it before the public. This kind of publicity should be given to the Department.

XIV. *Minimum Wage Law.* The minimum wage law has been a very excellent factor during the past years in securing a uniformity of salaries, and helping boards of education to understand what is a reasonable amount to be paid in a certain type of school. The present law based upon the certification of the teacher has had some excellent results in inducing teachers to raise their grade of scholarship. The present law should be revised in accordance with present-day prices and practices.

XV. *Limits of Taxation.* Many districts are now having a serious time in raising sufficient funds to pay the necessary running expenses of the schools and an adjustment of the tax limits should be made as soon as possible, as some schools will be obliged to close unless relief is given.

LEGAL DEPARTMENT.

A. L. Heminger, Deputy Superintendent of Public Instruction.

Section 2627-c, of the Code, subdivision 7, provides that in addition to hearing appeals the Superintendent of Public Instruction shall also render written opinion upon questions submitted by school officers pertaining to their duties. It has been the custom of the Department of Public Instruction, as set forth in Note One under the section above cited, to answer all proper inquiries from whatever source touching the construction and application of school laws. This practice has entailed a burden upon the department that should never have been assumed for the reason that the growth of the several departments has increased so rapidly in the last few years that it has made it next to impossible for the Department to do the amount of work that this requires with the available help.

The correspondence concerning legal matters for the year beginning July 1, 1919, and ending July 1, 1920, is practically double that of the year preceding and while that for the year 1918-1919 is nearly 50 per cent greater than the preceding year as shown by our records. The increase of work along this line is due to several causes. First, the natural growth of the work in the different departments has increased the work of the legal department. Second, the increased interest of the people themselves in school work has tended to increase the number who come to the office for advice and assistance. Third, the change in economic conditions following the war. Fourth, new laws that have been enacted by the Legislature for the purpose of carrying out new policies in education and also to meet the change in economic conditions.

The Thirty-eighth General Assembly enacted into law more than thirty bills some of which are amendments to old statutes and others, such as the establishment of the Teachers' Placement Bureau, the standard school, dental clinic, aid for mining camps, visiting or public health nurses, and the closing of the small school where the attendance is less than five, are wholly new. With the exception of the law providing for the closing of the small school, the laws referred to above have demanded little attention from the Department as far as their interpretation is concerned. Out of 1,489 inquiries on law points, covering a volume of 1,750 pages, 9 were in regard to the standard school law, 63 in regard to the closing of the small school by operation of law, 7 in regard to school nurses, their qualifications and duties. In addition to the laws above cited, the Thirty-eighth General Assembly raised the limit of taxation to sixty and sixty-five dollars in all school corporations except consolidated districts maintaining an approved high school where it is fixed at eighty dollars per pupil of school age for these districts. The amount of tuition which a school corporation maintaining a high school may collect from another school corporation was raised to eight dollars per month; the minimum wage for teachers was raised; districts are permitted to issue bonds for the building of teachers' homes, gymnasiums and to secure additional land; and the amount that may be expended for dictionaries, library books, maps, charts and apparatus was changed from twenty-five dollars per room to two hundred dollars per building.

Many questions of law in regard to the above were referred to the Department for interpretation or an opinion, there being 62 on the tax levy, 83 on bonds and buildings, 141 on the minimum wage law, and 159 in regard to high school tuition.

The law passed by the Thirty-eighth General Assembly which prohibits a teacher from entering into a second contract until she has been released from any former contract covering the same period of time has raised many legal questions and this Department has furnished 104 interpretations or opinions in regard to the matter of teachers' contracts. It has long been the law that the teaching of the common branches in the public schools shall be in English. The last Legislature extended this law to cover the private school and to prohibit the teaching of any secular subject in a foreign language below the eighth grade and provides a penalty for violation.

There was defect in Section 2794-a, subdivision (a) as amended by the Thirty-seventh General Assembly, and for two years it was difficult to organize a consolidated district under this section if any objection was raised by an interested party. The Thirty-eighth General Assembly having amended this law to cure the defect, there was great activity in many different parts of the state in organizing consolidated districts, this being, in part due to the fact that for two years it had been practically impossible to organize a consolidated district and partly to the fact that there was increased interest in educational matters among all classes. This law as amended being practically a new mode of procedure demanded more of our time on this account and also for the reason that nearly as many consolidated school corporations were organized during this year as had been organized in the state up to July 1, 1919. Two hundred and fourteen written opinions and interpretations were furnished in regard to consolidation, 29 in regard to changing the boundary lines, in addition to the personal consultation at the office with various school officials and other parties interested.

The law in regard to the reversion of school house sites which was amended by the Thirty-eighth General Assembly also comes up for interpretation in connection with consolidation since many school sites are abandoned when a consolidated district is organized. This law should be amended to make clear the manner of arbitration that should be followed in fixing the market value in case of reversion under Section 2816.

The last Legislature created a new County Board of Education to which is referred the fixing of the boundary lines of a proposed consolidated district when an objector appeals from the finding of the county superintendent. The matter of whether a member of the County Board of Education who is interested in the question before the board may sit as a member of the board in a hearing of this kind and be allowed to vote has several times been referred to this department and answered in the affirmative.

If it is desirable to prevent a member of the board from voting upon a question before the board in which he is personally interested, the law should be amended accordingly. This law should also state what notice is necessary to be given by the president of the board in order to hold a legal meeting.

It is impossible for us to even refer to all the matters that have come before the department for interpretation or set forth here any of the interpretations by this department on account of the volume but these opinions and interpretations have been indexed under more than fifty headings and we are attaching hereto a summary of the number of the various written interpretations and opinions as shown by the index from July 1, 1919, to July 1, 1920, it being impossible for us to give a detailed statement for the preceding year under the same headings for the reason that the same are not indexed.

CONSOLIDATED SCHOOLS.

George S. Dick, Inspector.

I. *Establishment.* The law permitting the establishment of this form of centralized school is clearly understood by reading Section 2994-A in all its parts, beginning on page 48 of the Iowa School Law, 1919. It expresses fully what was in the hearts of Iowa legislators when they so definitely endeavored to serve the real interests of the boys and girls of their state, especially those who live in great rural Iowa. For many years there has been within reach of all urban young people of this state a full four-year high school course of study free, without leaving the parental home to acquire it. By the consolidated school law this privilege is extended to every child of school age. Our law makers have fully endorsed the slogan "A complete twelve year school course of study free to every young person of this state, while he remains under the best of all protections, the home roof, and under the care, guidance and inspiration of his safest, truest, best of all friends, the members of his own family."

II. *The Appreciation by the People shown by their Response.* This new type of school has not been forced upon the people, but in every case the new organization comes in response to a voted request of the electors of the territory interested. The people have shown great appreciation for this valuable and generous gift, this opportunity for the children by organizing 430 of these consolidated schools, covering one-fifth of Iowa territory, at least three counties, each has three-fourths of its area so organized. Consolidated schools serve in place of 3000 one-room schools.

During the year ending June 30, 1920, for every nine school days there were ten new consolidated districts formed. The first 29 days in March, 1920, there were 33 and for two months there was an average of one a day.

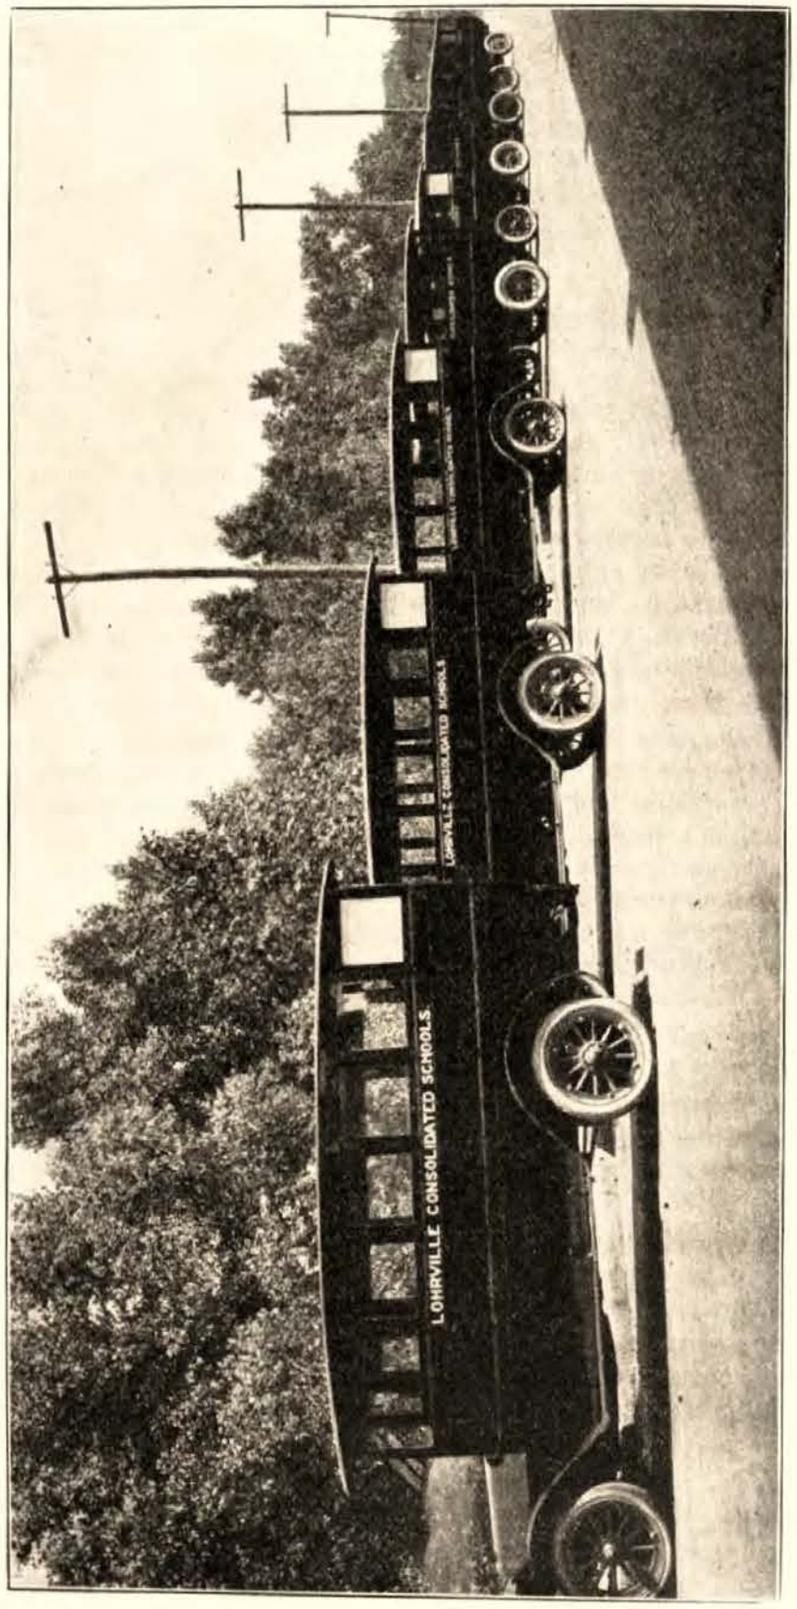

This new movement is generally recognized as the solution of the problems found in the inefficiency of the weak one-room out-of-date school, and in the impossibility of securing teachers able to make conditions any better.

There is a decided tendency to organize larger districts, meeting better the financial needs and also securing a sufficient number of pupils to classify into a complete twelve year school.

There is also a movement from the horse drawn vehicles of transportation to the auto drawn trucks, thus meeting most of the real objections to transportation by reducing to a minimum the time spent on the road.

III. *The Present Need and the Future Demand.* Legislation is liberal, plan of organization is good, appreciation and cooperation of the people are excellent.

The need now is a higher grade of service on the part of superintendent and teachers in school, on the playground and throughout the community.

LOHRVILLE BUSSES

The school at Lohrville has an up-to-date transportation system for its children. The success of a consolidated school system depends upon the comfortable, safe and quick transportation of the children to the school.

Teachers must have a definite, special training, must understand rural life and its content, and must have a positive right attitude toward this opportunity for real vital service. There is a great lack in the number of persons prepared to assume the leadership of this new type of school, in which the needs of the parents, as well as the needs of the children, must be met by properly selected libraries and other equipment, lecture courses and entertainments, debates, short courses stressing work of special use to that particular group of people determined by the lines of industries carried on by them.

In the future the consolidated school must do this work and must be in the fullest sense of that term a real social and educational center, to which all the people must come in cooperation to advance the best interests of the community. This is the place for people to meet to consider questions of a common interest,—home of such organizations as Parent Teachers Associations and others.

This aim can be accomplished only through the masterful leadership in the head of the school supported by a corps of teachers with the very best training.

The complete cooperation of the people, fine salaries, and all other necessary things are anxiously waiting for the superintendent and teachers who are prepared by education, training, spirit and who "have a mind to work," and who can succeed in rendering a superior service commensurate with the opportunity and importance of this high calling of a teacher in a real consolidated school.

Geo. A. Brown has completed the discussion of the Consolidated School as follows:

The last Biennial report of the Superintendent of Public Instruction gave the number of Consolidated Schools as 238, to date 430 school districts have voted to organize under the provisions of section 2794-a, School Laws of Iowa 1919. Three-hundred-fifty schools have reported as maintaining a centralized school and transporting pupils with an enrollment of 61,317 pupils. The organization of many schools is at a standstill because of failure to dispose of bonds under the present law, and having no building, many boards of education are still conducting the one-room schools. Accurate data as to the number cannot be obtained. Approximately there are about fifty such schools in these circumstances at the time of this report.

In many instances the board of education in these districts needs encouragement and advice and much of the time of the inspector is being used in visiting these places. The demand on his time is so great that he will be unable to reach all, with the result that a good many school districts will remain in an unorganized state as far as a centralized school is concerned for some time to come.

There has been unusual activity in the building program as is evidenced by the number of buildings finished during the biennial period just ended. Forty-four districts have reported the finishing of new buildings at a total cost of $3,500,000 The following table shows the variation in cost:

Number of Schools Reporting	$200,000 or more	$150,000 to $200,000	$100,000 to $150,000	$ 75,000 to $100,000	$ 50,000 to $ 75,000	$ 50,000 or less
44	2	3	5	8	12	12

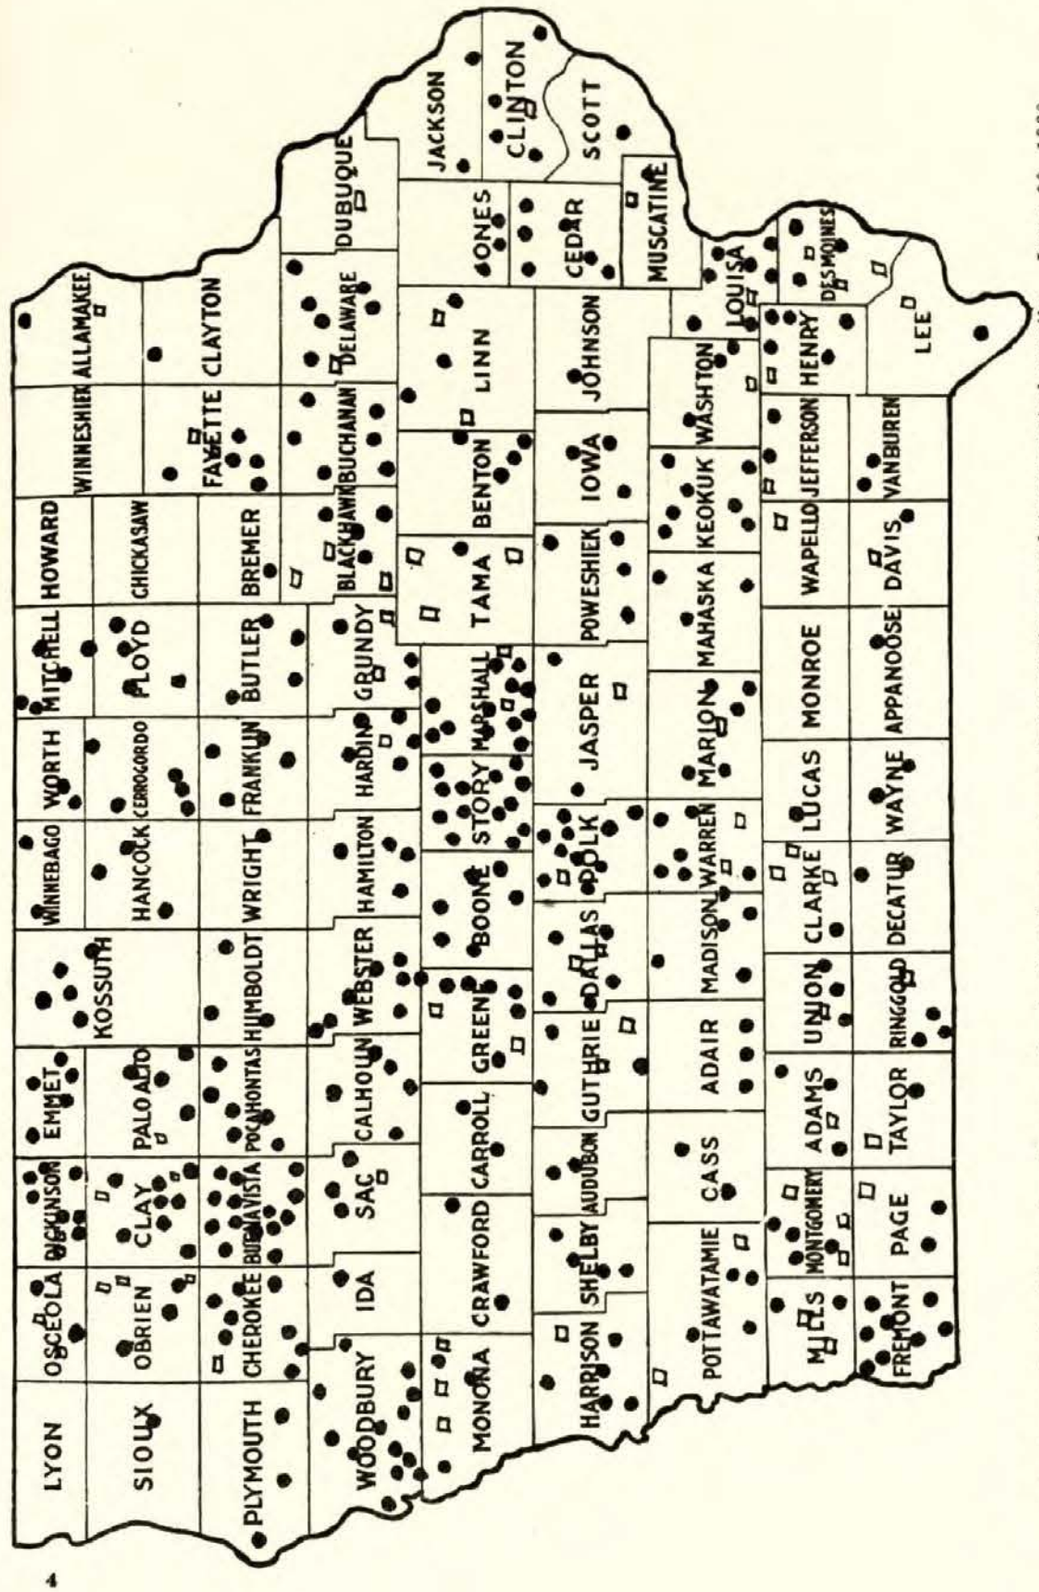

Schools reporting buildings as finished:

School	Cost	School	Cost
Ankeny	$135,000	Huron	$ 42,000
Archer	55,000	Johnston	45,000
Argyle	30,000	Kelley	40,000
New Aurelia	265,000	Letts	80,000
Bayard	180,000	Mapleton	107,000
Bondurant	105,000	Maxburg	95,000
Calamus	----------	Mingo	80,000
Coburg	----------	Mt. Union	45,000
Colesburg	46,000	Napier	65,000
Conway	40,000	Oran	15,000
Corwith	100,000	Patterson	52,000
Cushing	150,000	Peterson	55,000
Dallas	54,000	Pleasant Plain	40,000
Des Moines Township	47,000	Plover	20,000
Dike	80,000	Rembrandt	63,000
Earlham	160,000	Sergeant Bluffs	90,000
Dayton	100,000	Sperry	----------
Elkhart	65,000	Strahan	57,000
Elvira	63,000	Menlo	80,000
Franklin Township	75,000	Ventura	60,000
Gaza	60,000	West Branch	200,000
Gilbert	60,000	Hedrick	----------
Grandview	98,000	Liscomb	55,000
Hilton	40,000	Hanlontown	78,000

The number of buildings under construction at the present time has been greatly diminished by failure to sell bonds. In spite of this fact however, 28 report building operations as going on in the following places:

School	Cost	School	Cost
Bartlett	$ 60,000	Morning Sun	200,000
Beaver	45,000	New London	----------
Coin	134,000	Pilot Mound	68,000
Collins	125,000	Randal	115,000
Dinsdale	101,000	Rhodes	12,000
Gaza	----------	Sewal	82,000
Geneseo	----------	Stennett	73,000
Grand Meadow	65,000	Washta	100,000
Henderson	50,000	Whiting	----------
Huxley	110,000	St. Marys	----------
Martensdale	53,000	Union Township	----------
Maynard	----------	Wiota	----------
Mediapolis	185,000	Thurman	----------
Melvin	----------	Lincoln Township (Zearing)	130,000
Morley	68,000		

There is a very marked progress in the matter of transportation. A large majority of Consolidated districts commencing transportation for the first time, in September 1920, purchased automobile trucks and report successful motor transportation. The Consolidated Schools established

Schools marked with rectangle are schools that have not erected buildings and transported pupils. June 30, 1920.
Schools marked with the circle indicate those that will maintain centralized schools and transport pupils during the year 1920-1921, 367 in number.

some years ago are replacing horse transportation with motor transportation as their wagons wear out. This will overcome one of the strongest objections urged against the Consolidated School namely, that the time spent on the road by school children is too long, and does not get them home in time to help with the chores in the evening. Reports indicate that motor transportation reduces time spent on the road not less than 100 per cent.

The following figures are representative of the situation in the transportation of pupils although not one-half of the schools have reported on this phase of the work to date.

Number of schools reporting	192
Number of auto busses used	262
Number of horse hacks used	968
Number transported by auto	5,061
Number transported by horse	13,806
Total number transported	18,867

APPROVED GRADED AND HIGH SCHOOLS.

F. A. Welch, Inspector.

Value of High School. The high school today is considered a necessity, if boys and girls are to obtain their greatest business and social efficiency. Standards are being raised, and an increasing number of business organizations refuse to employ young people who have not completed a four-year high school course. The State of Iowa, therefore, recognizes the right of every one of its boys and girls to secure high school training.

In recognition of the right just mentioned the Thirty-fourth General Assembly, in 1913, passed a measure requiring that every school district which does not provide a high school shall pay tuition of its pupils who are prepared for high school work, if they choose to attend a high school in some other district in the State where an approved high school is provided. The present limit of tuition charge under this law is eight dollars per pupil for each school month. This law brought about the very desirable standardization and supervision of the school, in both the grades and in the high school. The supervision is by direction of the Department of Public Instruction.

Classification. The term, Graded and High Schools, of course, includes all public schools of the State with graded elementary work and with one or more years of high school work. This includes such schools as are approved and those not yet standardized and approved by the state. It does not include rural schools, except those that are consolidated and others that employ more than one teacher and have the work graded.

Schools may be approved for one year, two years, three years or four years of high school work. Standards, of course, vary according to number of years' approval. Approval of a school does four definite things for the school.

1. It permits the school legally to collect tuition from other districts sending pupils to its high school.

2. It prevents other districts collecting from this district tuition for pupils resident in this district, for the year's high school work approved.

3. It standardizes the school, and thus is a distinct benefit to the pupils of the district moving to another district to complete their high school, and to high school pupils moving from another district to the district to complete their high school work.

4. It brings the school into direct contact with the department of Public Instruction and under direct supervision and aid of the inspectors of the Department.

It has been found that most graded schools offering some high school work are anxious to be placed on the approval list, and every year a

number of schools attain the standard for approval and receive a certificate of approval from the State Department.

PRESENT STATUS OF SCHOOLS

Correct to June 30, 1920.

School corporation having nine or more grades,	
Approved for 9 grades, or one year of high school	14
Approved for 10 grades or two years of high school	67
Approved for 11 grades or three years of high school	80
Approved for 12 grades or four years of high school	639
Total number of approved schools	800
Total number of standard approved schools last biennial report.	742
Increase in number of standard approved schools during biennial period	58
Number of four-year standard approved high schools last biennial period	569
Increase in number of four-year standard approved schools during biennial period	70
Number of graded and high schools not yet approved (Approx.)	225
Visited (By inspector of this Department):	
Number of counties in which one or more schools were visited	80
Number of different communities visited	215
Number of communities visited the second time	20
Teachers' Conventions and other Conferences attended	11
Educational Addresses to patrons	35
Miles traveled by rail on official trips	20,438

Duties of an Inspector.

For inspection of the above schools, three inspectors are provided. The schools are classified as follows:

Normal Training High Schools, at present 191 in number.
Consolidated Schools, at present 306 in number.
Other Approved Schools, at present 327 in number.

Of these schools, 24 are both consolidated and Normal Training, leaving a total of 800 approved schools of all classes. One inspector is assigned to each class of schools.

One of the chief duties of an inspector is to visit the school, check up equipment, examine course of study and records, visit classroom work of the teachers, confer with the superintendent and teachers and often to meet in conference the board of education. It is sometimes found that a school has more teachers than it really needs for the work of the school, and a reorganization is advised, to assist the school financially. It is not the purpose of the inspector either to encourage the district in attempting to maintain a school beyond its means or to penalize it for its limitations. His purpose rather is to assist the district in maintaining the best type of school justified by local conditions. Some districts, because of the small number of students eligible for high school, are advised not to maintain a four-year high school, but to maintain a two-year high school, and then, as a district, to send the students to another high school to complete their work. An itemized written report with recommendations for the school is then sent the superintendent, the board of education and the county super-

Many schools in the state now provide equipment for the playground, believing that there are combined pleasure, health and citizenship training in sports and games. Kossuth county has several schools thus provided. This picture shows children at play on the Fenton school grounds.

Lone Rock, Kossuth county, believes in recreation for the children of the grades. This equipment is provided by the school district.

intendent. At the beginning of each school year, blank cards are sent to each school for a complete annual report on all items. These reports are later carefully examined by the inspector and a check sheet with recommendations sent each school.

Besides these duties the inspector must provide standards, prepare courses of study, issue bulletins and manuals, answer correspondence and have individual conferences with superintendents, county superintendents and members of boards of education. He is often called upon to attend community meetings and address meetings in the State, and occasionally attends national meetings outside the State. He sometimes, by invitation of the county superintendent, addresses bodies of teachers assembled for county institute, etc.

What Supervision Does for the Schools.

Supervision of schools by the inspector is of value in various ways. First of all it creates a standard of efficiency for all schools. It also standardizes the schools of the state and qualifies the graduating students for entering higher institutions of learning, thus encouraging completion of high school work and also encouraging higher education. It induces more schools to reach a good standard, and results in many districts without high schools being able to establish such. Many new modern buildings are erected as a consequence of this oversight, and other buildings are improved or remodeled. Better equipment is provided.

One or two concrete illustrations may more clearly show the value of school inspection. The inspector of this Department, two years ago, was asked by a county superintendent to visit a certain school in his county. It was in the spring, near the close of the school year. The inspector found the school attempting to do twelve years of school work, but without equipment and without sufficient teaching force. The buildings sadly needed repairs. Some of the teachers lacked proper qualifications for their work. After a half day's visit in the school, the inspector sought out the president of the Board of Education, and requested a meeting of the Board that evening. At the meeting the Board Members themselves were surprised at some of the findings reported. The Board promised to do anything to improve the condition, if definite recommendations were given. The inspector promised to send a complete written report by mail, and to again visit the school early in the fall to assist in organizing the school for work the next year. The first week in September he made his second visit to the school with the county superintendent, and together they assisted the new superintendent to organize the work. Although the school has previously attempted to have a four-year high school, a checking of the students' grades showed that actual credit could be given for but two years of high school work. The school was therefore organized on a two-year basis and conducted thus that year and was approved for two years of high school work. The next year a third year of high school work was added and the work approved on this basis, and this year the school promises to be standardized as a full four-year high school.

Another school visited last year disclosed the fact that the school had three teachers in the grades, enrolling four-fifths of the pupils in the

school, and three teachers in the high school taking care of but one-fifth of the student body. The consequence was that some grade rooms were congested and the high school teachers were not kept busy. The superintendent had more time than necessary for supervision, and was teaching but four periods in an eight period day. A readjustment was made so that one of the high school teachers took over the eighth grade, and the superintendent and the other high school teachers taught more classes in the high school.

Another school was visited in which it was discovered that a specially prepared Primary teacher was doing mediocre work in the Intermediate Department, while an experienced Intermediate teacher was acting as Primary teacher. This had not been discovered, either by the Board Members or by the young superintendent. An immediate exchange was recommended.

At all times the superintendent, teachers and school officers seem to be glad of a visit by the inspector, responsive to his suggestions and anxious to provide anything necessary for the school, except that occasionally the financial limitations of the district prevent it.

In a previous paragraph it has been noted that the three inspectors are responsible for supervision of eight hundred approved schools, the Normal Training Department having one hundred and ninety-one approved schools, the Consolidated Department three hundred and six approved schools, and the Department of "Other Approved Schools" three hundred and twenty-seven approved schools. This is in addition to more than two hundred graded schools not yet approved, which require care. When visiting schools for inspection purposes, an inspector cannot see more than two schools a day, and often not more than one per day. On the average not more than six schools per week can be visited, or two hundred sixteen schools per year if the inspector could devote all the thirty-six school weeks to inspection. As approximately half an inspector's time must be devoted to checking reports, preparing literature, answering correspondence and in doing other forms of office work, it will be seen that on the average schools cannot be visited more than once in two and one-half or three years. This does not render the close supervision that is needed, and the inspectors cannot keep in as close touch with the work as they desire. The county superintendents co-operate well, but the various duties of their office render them too busy to assist to any extent in the inspectors' work.

ESTABLISHMENT OF NORMAL TRAINING HIGH SCHOOLS.

M. R. Fayram, Inspector of Normal Training High Schools.

The Thirty-fourth General Assembly of this state enacted a law which established the Normal Training High School Department as a local institution for the purpose of training teachers for the rural schools and also awakening a more positive interest in rural life. A Department may be established in any High School in the state if there seems to be a local demand for it and the number of pupils enrolled in the high school justifies the expense of maintaining it.

A High School in which a Normal Training Department may be established must maintain an approved High School Course of Study so that the Normal Course will be given in the eleventh and twelfth grades and Manual Training, Home Economics, and Agriculture be offered in the High School, an enrollment of at least ten pupils in the department, proper physical conditions, teachers who have four years of collegiate preparation with some experience and special preparation in the subjects which they teach, a recitation period of not less than forty minutes, no class over thirty pupils and not over six classes daily per teacher.

The grade school must also have proper physical conditions and the grade teachers should have at least two years of special preparation above a four-year High School. Experience should also receive consideration.

How Designated. When the general professional spirit of the school is such that efficient school work is accomplished and the High School and Grade School meets the specific requirements as set forth in Circular No. One, "Course of Study and Regulations for Iowa Normal Training High Schools," the Superintendent of Public Instruction may designate such a High School to maintain a Normal Training High School Department. Section 2634-b8, Code of Iowa.

High Schools Designated. The total number of schools maintaining the Normal Training High School Course at the close of the school year, June 30, 1920, was as follows:

City or Town Schools	178
Consolidated Schools	13
Total	191

High School Credits. All Normal Training High School credits must be completed in a regularly designated Normal Training High School or in an approved High School.

Students of Other Approved High Schools. The regulations of the Normal Training High School Department provide that a student who has graduated from a regular approved four-year High School Course may enter a Normal Training High School and finish the Normal Course in one year. A person who has graduated from a two or three-year approved High School may enroll in a Normal Training High School and finish the Course in two years.

Professional Requirements of the Course. Each student who graduated from the Normal Training High School Course is required to complete one semester in each of the following subjects: Rural Education, Psychology, School Management and Methods in Teaching. Each school must have a plan by which the students will be able to do some observation and practice teaching in the local grade school as well as in an adjacent rural school.

Teachers' Certificates to Graduates. All graduates of the Normal Training High School Course who pass the state examination in the subjects required by the regulations are granted a Normal Training High School Certificate for a period of two years which may be renewed regularly every three years. This certificate entitles a person to teach in any school in this state.

Normal Training High School graduates are trained to teach Agriculture in the rural schools.

Growth in Normal Training High School Departments. The Normal Training High School Course has met with favor with students who have manifested an interest in the profession of teaching. However, the economic conditions have distubred the interest in teaching during the past two years since the industrial world has offered a greater financial reward for the High School graduates than has teaching. During the past two

years the number of Normal Training High School Departments have increased from 172 to 191, the enrollment in these schools from 3600 to 4200 pupils, the average of each school from 22 to 23 pupils and the number of teachers' certificates granted from 2097 to 2460.

Distribution. The Normal Training High School Departments are distributed among the counties as follows:

Counties having no Normal Training High Schools (Polk and Black Hawk)	2
Counties having one Normal Training High School	28
Counties having two Normal Training High Schools	48
Counties having three Normal Training High Schools	17
Counties having four Normal Training High Schools	4
Total	99

CERTIFICATES ISSUED.

School Year	Original N. T. H. S. Certificates	Certificates Renewed	Total Certificates
1918-1919	1,311	786	2,097
1919-1920	1,616	844	2,460
Total for biennial period	2,927	1,630	4,557

This shows that during the biennial period closing June 30, 1920, that 2927 original Normal Training High School Certificates have been issued and 1630 Normal Training High School Certificates have been renewed. The total number of certificates then issued by the Normal Training High School Department for the biennial period is 4557.

State Aid. State Aid of $750.00 is granted to each city or town school which maintains the Normal Training High School Course. Each Consolidated School which maintains the Normal Training High School Course receives its portion of the funds available for "Consolidated Schools." Private schools may have the Course if they comply with the rules and regulations for a Normal Training High School Department but they are not entitled to State Aid. The State Aid of $750.00 per year is not intended to pay the complete expense of maintaining the Course but to encourage the local High School to offer a course which will prepare better rural teachers. The Course is such that many High School students who could not attend college have been able to enter the profession of teaching.

Disbursement of Aid. The $125,000.00 annually available for aid to the Normal Training High Schools, according to Section 2734-b8, was available for distribution for the school year 1918-19. The Thirty-eighth General Assembly increased the appropriation from $125,000.00 to $150,000.00 for the school year 1919-20 and annually thereafter. The complete appropriation will be used as soon as other high schools can bring their schools up to the standard required for Normal Training High School Departments.

During the biennial period disbursement has taken place as follows:

School year, 1918-19, first semester,		
156 schools at $375.00, State Aid		$ 58,500.00
7 schools did not qualify for State Aid.		
9 schools received Consolidated State Aid.		
School year, 1918-19, second semester,		
161 schools at $375.00, State Aid		60,375.00
2 schools did not qualify for State Aid.		
9 schools received Consolidated State Aid.		
Total State Aid		$118,875.00

*The Thirty-eighth General Assembly increased the salary of the Inspector from $2,000 to $2,400 per year.

A Normal Training High School Graduate as a Rural Community Leader.

STANDARDIZED RURAL SCHOOLS.

May E. Francis, Inspector.

The Thirty-eighth General Assembly was thoroughly conscious of the great importance of the movement to organize rural life along all lines. It realized that a school system commensurate in efficiency with the importance of rural life and its industries was necessary and fundamental to the progress of such a movement. It realized that a large percentage of the country boys and country girls were not getting a "square deal" because the so-called system of rural school work then in use was making no adequate provision to bring the 10,776 one-room rural schools up to a higher degree of efficiency, that they might more nearly meet the needs, purposes and interests of 214,698 pupils enrolled in the purely rural district schools throughout the state, and reveal to them something of the great possibilities of rural life and rural activities. It realized that the influence on the coming citizens of this great state, of a school system which was neglecting the interests of nearly a quarter of a million of her boys and girls annually, was reactionary and would tend to tear down our highest ideals of civilization in home and state life; therefore, it enacted into law the Evans-Smith bill, which provides for state supervision and standardization of the purely rural schools.

The minimum requirements established by the Department of Public Instruction for Standardizing Rural Schools come under the following heads:

Grounds and Outbuildings. The school grounds should be well graded and sodded. There should be an acre of land and ample shade should be provided for the children. The outbuildings should be in a clean, sanitary condition, free from marks and should be well ventilated and provided with latticed or board blinds around the entrances. The two toilets should be as widely separated as possible. In the new buildings many are equipped with sanitary, indoor toilets. These are especially recommended.

The School House. The school house should be in a state of good repair and should be kept well painted. There should be good doors, good approaches, separate cloak-rooms for the girls and boys and correct lighting, heating and ventilating of the schoolroom.

The Equipment and Care of the Schoolroom. Every standardized schoolroom should have single, adjustable seats. There should be a good desk and chair for the teacher, with an additional chair. There should be twenty-four feet of floor space for each pupil. The window surface should be one-sixth of the floor space, and the windows should be located at the rear or rear and left of the pupils. Cross lights should be avoided. The interior of the room should be decorated in some light shade, as a light

chocolate color for the wainscoting, a silver shade for the side walls, and a white or cream ceiling. There should be at least three good well framed pictures chosen from the reproduction of our world famous artists. The children should, through these pictures, come to know the artists and some of their productions. The history of these pictures should be taught. There should be ample primary equipment, good maps, globe and dictionaries. Every Standardized School should have some musical instrument. Talking machines with well chosen records are recommended.

The Library. There should be a good bookcase supplied with a list of of one hundred well chosen books, new and up-to-date in material, also a set of good encyclopedia or reference books, and at least one complete set of supplementary readers.

The Teacher and the School. The teacher is the most important factor in the efficiency of the school, therefore she must be ranked by the County Superintendent as a strong and superior teacher to be eligible to teach in a Standardized School. The schoolroom should be neat, clean and attractive at all times. The teacher and pupils should also be in harmony with each other and with the school. The work should be carefully planned by the teacher and prepared by the pupils. There must be a daily register carefully kept. The teacher must hold a First Grade County Certificate, a Normal Training Certificate, or a State Certificate. She should visit the home of each pupil and solicit the co-operation of the parents in her school work.

Community Activities. Too much stress cannot be placed upon the importance of community meetings. It is here in these meetings that the teacher comes in contact with the people of the community, common needs of the school and neighborhood are brought up and discussed, and improvement brought about. If it is possible to give the people a viewpoint of constructive improvement, they will think together; and when they "catch up" mentally they will do the same physically, and will go forward rapidly toward developing a higher and better social atmosphere, which will be reflected in the school and in our future citizenship.

The Rural Problem. There are in Iowa, 10,766 one-room rural schools. They are situated in ninety-nine counties, and have a total enrollment of 214,698 pupils for the past school year. Prior to the enactment into law of the Evan-Smith bill, there had never been any plan whereby the State Department of Public Instruction could come into personal contact with the purely rural districts, supervise the buildings, equipment, and teaching done in these districts, and suggest plans whereby conditions could be improved.

The work of the Department of Public Instruction in the standardization of the rural schools began on July 1, 1919. There were but one hundred and eighty school days in the year. That meant less than two days to each county, if all of the time of the Inspector was spent in the field.

Organization of the Work. It was necessary to prepare and distribute bulletins throughout the state, setting forth the policy of the Department

regarding the work. This required much time. Then, the rural teachers were not familiar with the law and its benefits for rural schools.

Questionnaires were sent to each of the 10,776 teachers, soliciting data to be used in organizing the work. The school boards were not familiar with the benefits to be derived from the law for the boys and girls in their districts. Letters were sent to the president of each school board soliciting his co-operation in improving school conditions in his district. The Department received splendid co-operation from county superintendents, school boards, and teachers, which made it possible to organize the work and establish six hundred and fifteen schools throughout the state last year.

The Work of the Inspector. The Inspector worked in seventy-one counties last year, and but four of these counties did not have schools entered upon the Standardization list. Because of the limited time and the largeness of the field, the counties in which th county superintendent did not request assistance in this line of work last year, were not visited by the Inspector. There were twenty-eight such counties. The detailed report by counties indicates that there was nothing done toward standardization in those counties last year. In many cases this was not due to a lack of interest, as much as to the fact that because the work was new, it was not included in the year's plans for the various counties at the beginning of the year, and no future time presented itself when the work could be taken up.

Schools Visited. One thousand and forty-seven schools were visited last year. In many cases the work was carried on under great disadvantages. The roads in northeastern Iowa were impassable part of the time, and not good at any time during the winter months. It was necessary to use a team and sleigh in visiting Howard, Winneshiek and Fayette Counties.

Effects of Standardization. Nearly every county requests now that the rural schools be inspected and standardized for the coming year. There are more applications than the funds will care for. From nearly every one of the sixty-seven counties where standardized schools were established last year, the county superintendents report that there has never been a law or movement which has improved the rural schools and afforded such a stimulus to better teaching and better housing conditions as much as the Standardization Law. By and through this law the State Department of Public Instruction, the county superintendent, the rural teacher and the rural school board meet, and all, co-operating, produce better schools.

In May the Inspector met with the County Superintendent and the School Board of Center Township, Clinton County Schools. We visited two of the schools and found the buildings to be the typical one-room type, with cross lights, no cloak rooms, and unjacketed stove.

At the request of the Board certain recommendations for remodeling the building were given. When these schools were inspected again in September the recommendations had been carried out; the windows had been closed upon one side of the room and others placed in the rear and on the opposite side so as to eliminate the cross lights. The old stove had

been taken out and a new room furnace, with the fresh air in-take, had been installed. The front end of the room was partitioned off for cloak rooms; new single, adjustable seats for the pupils had been put in; a new desk and swivel chair for the teacher occupied the place formerly held by the old table. The walls had been freshly plastered and tinted. Slate blackboards were on the walls. Deep wells had been put down on each school ground. Superintendent Cozzens estimated the cost at over twelve hundred dollars on each school. The housing and sanitary conditions in these schools are now what the health of the children demand that they should be.

In one district twenty-nine pupils were enrolled; in the other thirty-three.

In District Number Five, Lime Creek Township, Cerro Gordo County, is a splendid type of a three-room one teacher school.

This school has a full basement, half of which is used for furnace and fuel, the other half constituting a large community dining room. On the main floor is the entry, with separate cloak rooms and sanitary toilets. The large study room is equipped with single, adjustable seats, slate blackboard, maps, charts, suspended globe, adjustable canvas shades, sash curtains, and the walls are tinted a light tan with a cream ceiling. Opening off of the main room on the east is a small library room and a fairly large domestic science room, fully equipped. This room is closed off from the study room by large double doors.

The length of the school year in sixty-seven counties having Standardized Schools was eight and one half months. Every Standardized School has and displays a flag.

County Superintendent. The county superintendents have made it possible for an inspector to visit the schools in their counties where there was a chance of stimulating interest and improving conditions. The county superintendents held 432 meetings with school boards for school improvement, and 467 similar meetings with teachers last year.

State Aid—Teachers' Salaries. Applications were received from over seven hundred rural schools and six hundred and fifteen of them were passed upon favorably. There was paid to these schools from the state funds $61,732.00, one-half of which went to the school districts, and one-half to the teachers.

The average salary paid the standardized school teachers for the entire state was $84.40. Poweshiek County paid the highest average to its teachers, $100.00.

To successfully carry on this work, provision should be made for every one-fourth of the state, and an increase should be granted in the annual appropriation of $100,000.00.

A tabulated report covering the entire state is herewith submitted:

VOCATIONAL EDUCATION

Wilbur H. Bender, Director of Vocational Education and Supervisor of Vocational Agricultural Education.

State Board of Vocational Education: P. E. McClenahan, Superintendent of Public Instruction, Chairman; D. D. Murphy, President State Board of Education; A. L. Urick, State Labor Commissioner.

There are three distinct lines in which vocational education is provided by the co-operation of the federal government and the State of Iowa. These vocations relate to agriculture, trade and industry, and homemaking in all their various phases.

In each of the above lines provision is made for pupils in the public schools fourteen years of age or older to have part of their education in any one of these subjects that may be adapted to the individual, thus fitting him or her for effective service to society and satisfactory living conditions for the person so educated.

Part-time instruction is possible for persons not able to attend school excepting for a limited portion of the year and this is adjusted to the needs of the individual of any age above fourteen. For workers of either sex between fourteen and sixteen and at work under provisions of the child labor law there is now a legal requirement in this state of eight hours per week attendance on a continuation or part-time school required to be established in districts having fifteen or more of such persons.

Evening classes that afford means of improving individuals in the occupation in which they are engaged are a part of the vocational education work.

In short, there are three distinct occupations with all their subdivisions in which pupils in school all year, persons who can go but a short time each year, and those so closely engaged that they can give only evenings to continuction of their education may each have instruction.

Teacher training for all these kinds of teaching is required by the federal law if money from that source is to be used for payment of the teachers employed.

The federal money available in Iowa for the coming biennium for payment of vocational teachers' salaries and for training of such teachers is of following amounts:

1921-1922	$ 95,348.68
1922-1923	107,195.13

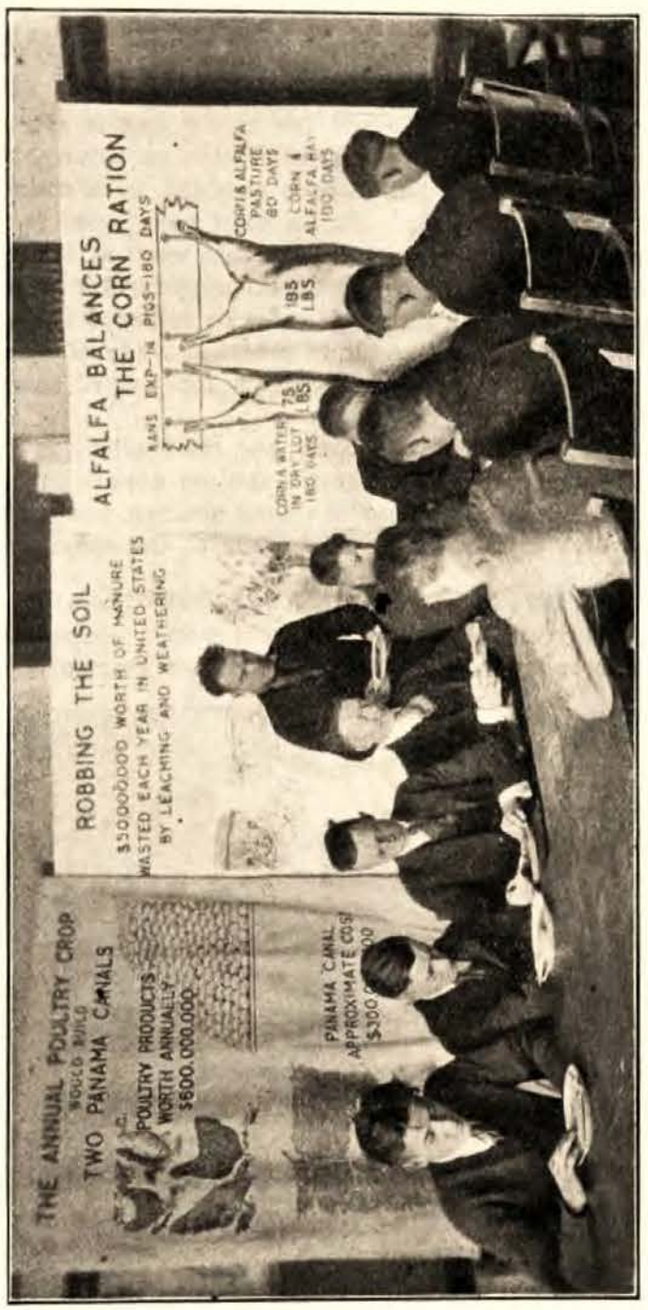

This sum may be used if met by an equal amount within the state, making a total for the two years named of $405,089.62 for vocational teachers' salaries and the training of vocational teachers.

An additional movement of a distinctly vocational educational nature is the passage of the recent federal law of June 2, 1920, known as an Act

for the Rehabilitation of Persons Injured in Industry. If proper appropriation is made within the state there will be the following amount of federal money available for the retraining of these persons:

1921-1922	$18,207.23
1922-1923	24,000.00

When these sums are met by money within the state the total fund for administration of the act and retraining the persons in question will be $84,414.46.

AGRICULTURAL VOCATIONAL EDUCATION.

Wilbur H. Bender, Supervisor Vocational Agricultural Education.
Louis Wermelskirchen, Assistant Supervisor of Vocational Agricultural Education.

ALL YEAR ROUND CLASSES

Under the State Board for Vocational Education thirty-two public high schools are giving courses in vocational agriculture all the year round that is really vocational. One-half the school day is given over to the study of agriculture and related sciences such as botany, biology, chemistry, and farm shop work, but in each case the work counts on the students' course in high schools. Six hundred boys from farms averaging over one hundred sixty acres are taking this work at this writing. The instructor is a graduate of a standard agricultural college and is employed for the full year as the work must be followed through to careful application on the farm and result in practical study of management and records of farm operations as a condition for use of federal and state money.

The farms as equipment for teaching and for application as represented in a single class aggregate over half a million dollars in value and this practical equipment costs the public school nothing, but makes the education effective and aids in better production at the same time.

FORTY WINTER SHORT-TERM AGRICULTURAL CLASSES.

There are forty winter agricultural short-term classes now at work. These are for persons from the farms of fourteen years of age and upward

A vocational agricultural class from Indianola High School studying a purelbred Hereford sire on the farm.

with no upper age limit and no set scholastic attainment as entrance requirement. The classes are conducted for persons who cannot attend school at other times in the year. Also the locations sought are chiefly those where advantages of this nature cannot otherwise be attained in the public schools. The instructor's work is on the year-round basis here also and the farms become far the larger part of the actual equipment for teaching and for application of instruction and practical farm study of management and accounting. From five to six hundred will be reached in these schools, which run five days per week for ten weeks from December 27th to March 4th.

Evening classes are established in connection with the winter short-term classes or in schools where all-year-round classes exist as interests of the community demand and proper class membership can be secured.

TRADE AND INDUSTRIAL VOCATIONAL EDUCATION

Harvey L. Freeland, Supervisor Trade and Industrial and Continuation Education.

UNIT TRADE DAY CLASSES.

Unit trade classes in which the student spends one-half of his time in learning the technique of shop practice and the remainder of his time in studying the science, mathematics, drawing and hygiene and English of his trade are being conducted in the following cities: Burlington, Ames; non-collegiate classes in the trade and industrial department, Cedar Rapids, Des Moines, Newton, and Sioux City. In these classes pupils are given instruction in the following trades: Auto-machanics, drafting, machinists trade, printing, wood pattern-making, metal pattern-making, cabinet making and mill work.

PART TIME CLASSES FOR ADULTS.

Trade extension short-term classes for painters, paperhangers, and decorators are now being conducted in Sioux City, Ft. Dodge, Marshalltown and Des Moines. Trade extension classes for the apprentice machinist and car repair men for the Northwestern railroad are meeting for eight hours per week and doing notable work at the division headquarters, Missouri Valley, Boone and Clinton.

PART-TIME TRADE EXTENSION, TRADE PREPARATORY AND CONTINUATION SCHOOLS FOR EMPLOYED MINORS BETWEEN FOURTEEN AND SIXTEEN.

Seventeen cities named below have part-time schools as required by law providing eight hours per week for the entire school year for employed minors between the ages of fourteen and sixteen. Federal and state funds are used in reimbursement for this work. In the sixteen cities conducting such schools last year there were a total of over 2,000 pupils enrolled.

Burlington	Dubuque	Keokuk
Cedar Rapids	Waterloo—East	Mason City
Clinton	Waterloo—West	Marshalltown
Council Bluffs	Fort Dodge	Muscatine
Davenport	Fort Madison	Ottumwa
Des Moines	Sioux City	

SOME EFFECTS OF THE PART-TIME SCHOOL REPORTED FROM DISTRICTS AFTER A YEAR'S EXPERIENCE.

1. In general the report is made that the part-time school has stimulated interest in school work and many pupils dropped work and returned to the regular full time school this year. Because of this influence many pupils, who otherwise would have dropped out of school and have gone to work, have remained in school.

2. Many schools report that pupils who have been in the part-time school for one year show a better attitude toward their job and toward society. Managers of factories in one town state that pupils who are paid upon a piece-rate basis are now doing as much work in 40 hours as they did before in 48 hours.

3. The part-time school seems to be awakening a public interest in the need for a higher compulsory school age and higher minimum requirements.

4. Several part-time schools are giving pupils valuable work in prevocational lines which will aid in helping prevent industrial misfits.

5. The part-time school is taking the boy and the girl, who for some reason have dropped out of school and is giving them eight hours a week of schooling. It is taking the waste product of our educational system and is attempting to convert it into a worthy part of our society.

6. The law has discouraged many employers from hiring pupils between the ages of 14 and 16 and consequently these pupils remain in school.

7. Many pupils in the part-time school are becoming interested in education and are asking permission to continue in the classes after they reach 16 years of age.

EVENING CLASSES.

Evening classes for workmen desiring to improve in their respective trades are conducted in a number of cities. Among these are classes in shop science for plumbers, electricians, auto mechanics, painters and decorators, drawing for sheet metal workers, machinists, mill workers, carpenters, stair builders, and advertisers; shop work for machinists, auto repair men, and mill workers; estimating for masons; building laws, and inspection for plumbers, and foreman training.

VOCATIONAL HOMEMAKING

Lucy I. Cockburn, Supervisor Vocational Homemaking Education.

There are three types of classes in which homemaking is taught in the public schools.

In the day school all-year-round class the work is a regular part of the school course. One-half of the school day is given to instruction on homemaking and science and art related to the special homemaking subjects.

In order that best results may be reached the law required class members to be at least fourteen years of age, that the work shall be carried for the nine months of the school year for one or more years as may suit the desires of pupil and parents, and that girls belonging to the class shall be taught in a segregated group so that interest shall be deepened and instruction made effective by having unified purpose in the work.

In order to teach the vocation of homemaking a study and application of all activities carried on in the home must be made. By use of half the day an intensive study and application can be made in problems related to the complete homemaking program. Cooking is not a separate piece of work in any home. It is only a unit in the larger field of feeding a family. Consequently when teaching the subject with the vocational aspect in mind one must teach not only cooking but the planning of meals, selection and purchasing of foods, the preservation of foods in the home, as well as the management phases of this one activity.

The clothing of a family, the housing of a family, home nursing, family recreations and other home activities all have definite essential programs for study and application much larger than mere manipulations and mastery of skills in certain very limited divisions in feeding and clothing the family.

School equipments are usually good for their purposes and provide the most economical means of teaching in class many things that would consume an undue amount of time if given to individuals. On the other hand the school and its equipment cannot, unaided by the home, do a complete piece of work in homemaking education. The value of the home equipment in most of the individual homes is several times that of the school equipment and it is available at no public expense. Most of the mothers of girls are ready at all times to co-operate most heartily in planning with the teacher and girl a program of intensive but varied home work in connection with the practical daily home duties that can be made to supplement and enlarge the school room instruction to an unlimited degree. Consciousness of the homemaking processes with the mother as a trained home demonstrator is a very essential element in the homemaking education of any girl. Occasionally each girl of the class

should remain at home for the entire half-day engaged upon some very definite homemaking occupation not possible to be done at school. Not all the girls need to be doing exactly the same thing at the same time but all should be engaged on definite duties that unite the instruction of the school and the application in the home. On such half day it should be the duty of the teacher to visit the homes of class members and by conference with the mothers and girls assist in improving home conditions or in aiding the class members in more definite understanding of home duties. It is not a legal requirement that the homemaking teacher must be employed for the calendar year but some districts are doing this and are getting excellent results from the work in school vacation.

In seventeen cities where part-time classes are provided by law from two to eight hours per week are devoted to homemaking education for employed girls from fourteen to sixteen years of age. This is given in short unit courses to adapt it to the short-time and changing classes and to give it especial value in the way of personal appeal to individual girls. One city is offering one hundred forty-four hours per year to foreign women to assist them in marketing, cooking and managing, and in providing clothing and proper home surroundings for the family.

Evening class work is provided at such hours in the day as busy housewives find it most convenient to be away from home to study things that will aid them in feeding, clothing or housing the family. The title of "evening class" is given to the group that meets at the time in the day most convenient for a group of busy housewives. It may be in the forenoon, afternoon, or evening.

Schools are now on the waiting list for approval for the introduction of homemaking work for reimbursement for next year. The fund is small and the demand is greater than means at command can reach.

EDUCATIONAL PROGRESS IN IOWA DURING THE LAST FORTY YEARS

By O. H. Longwell.

It has been my good fortune to be connected with educational work in Iowa just forty years.

To the careless or casual observer it might seem that not much progress has been made in educational affairs in that time. But he who has kept in close touch with education in the state must see that very satisfactory progress has been made in all lines of educational work.

THE RURAL SCHOOLS FORTY YEARS AGO.

Forty years ago the rural schools of Iowa were just as elementary and chaotic as any of the pioneer rural schools in the Middle West. Of course it was understood that the common branches would be taught but there was no course of study outlined for the schools. Each teacher outlined his own work and taught as many classes as the length of the day would permit.

Any one might be elected county superintendent. There were no special educational qualifications for Superintendent other than that the Superintendent should hold a certificate.

The county superintendent examined all the teachers and graded their papers and issued all the certificates.

There was no thought of such a thing as graduating from the rural schools.

The length of the term of school each year varied with the different school districts. The educational preparation of the teacher was given little consideration and the teacher that would teach the school for the least money was the one usually hired by the School Board.

Standardized or consolidated rural schools had not even been thought of.

Very little attention was given to training teachers for the rural schools. There were no educational qualifications other than the teacher have a certificate.

The state had just established a State Normal School at Cedar Falls for the training of teachers but for several years the school was small and very little attention was given to the training of teachers for the rural schools and never at any time as much as should have been given.

The colleges at that time paid *very* little attention if any to training teachers for any grade of school work.

There were a few private normal schools that did very efficient work in preparing teachers for the rural schools. In fact from 1880 to 1890 more rural teachers were prepared in the private normal schools than anywhere else.

The County Teachers' Institute at that time was considered the main training school for rural teachers. This institute was held for one, two, or three weeks each year, and provided all the academic training that the most of the teachers in the country ever secured.

THE RURAL SCHOOLS TODAY.

Today there is a course of study outlined for the rural schools not only in the common branches but also in the elements of Physics, Algebra, Civics, and Economics. Also in Vocal Music, Agriculture, Manual Training, and Domestic Economy, and the teacher must be prepared to give instruction on the effects of narcotics and alcohol upon the human system.

Today before the teacher is permitted to take the examination for a certificate she must be able to show that she has taken at least twelve weeks' training in an accredited normal school and pass a prescribed examination in all the subjects named above for a first class uniform county certificate.

The examination papers are graded today at the State Department of Public Instruction by trained educators and all certificates are issued by the State Department of Public Instruction. This of itself insures a certain standard of education on the part of the teachers.

Today there is a thoroughly equipped State Teachers' College at Cedar Falls in which there is a department for training teachers for the rural schools. Besides this, the State Teachers' College holds extension summer schools in different locations in the state each year mainly for the training of teachers for the rural schools and practically all the colleges in the state not only have normal departments for the training of teachers, but most of them hold summer training schools for teachers in which the training of teachers for the rural schools receives due consideration.

And not only this but the state has recently commissioned 192 normal training high schools over the state for the training of teachers for the rural schools.

The minimum wage law passed by a recent legislature has made it impossible for school boards to reduce salaries below a certain minimum wage and it has put a premium on educational preparation on the part of the teachers, thus encouraging better preparation for teachers.

In addition to all this for several years the work of consolidating large numbers of rural schools into one central graded school with all the advantages of the city graded schools has been going on at a rapid rate until now there are over 425 of these splendid schools scattered over the state. Where consolidation is not feasible or where public sentiment has not been sufficiently cultivated to realize the advantages of the consolidated schools the law provides for standardizing the rural schools. During the past year or two 850 rural schools throughout the state have been standardized.

These schools are presided over by a state inspector and definite standards as to building, course of study, equipment, sanitation, location, is required and they must employ teachers that have at least a first class uniform county certificate.

The county superintendents today arrange for the pupils who finish the courses in the rural schools to take final examination for graduation. These papers are carefully examined and those passing above a certain per cent are given certificates that admit them into higher work in the public schools. This puts a premium on thoroughness and scholarship and creates a necessity for following a prescribed course of study in the rural schools.

In view of all tihs it will be readily seen that much has been done during the past forty years to better the rural schools, that shows real progress in education.

PROGRESS IN THE GRADED SCHOOLS.

Forty years ago the courses of study offered in the graded schools of Iowa were very meagre compared with the splendid courses of study offered by these same schools today.

The courses of study offered in most of these schools did not extend much, if any, beyond what may be found now in the ninth and tenth grades, and indeed there is much work offered in these grades now that was not offered then.

The kindergarten had not at that time found a place in the schools, neither was there any thought of introducing Manual Training, Agriculture, Domestic Science, and Commercial Work, or special teachers of Music and Drawing, to say nothing of the Normal Training course recently established.

The equipment in all the graded schools was very meagre indeed. The buildings in many cases were very poorly constructed. It was indeed the pioneer days of schools and buildings.

What has been said above about the educational qualifications, certificates, and salaries of teachers in the rural schools was largely true in the graded schools. If a teacher could get a certificate and could show that he had studied the subject he was expected to teach either in the grades or in the high school, he was considered eligible for a position in the school if his personality and ability to govern were considered satisfactory. This was largely true also of the superintendents chosen. Since there was no special educational standard for teachers or superintendents and the courses of study really lead nowhere, there could be no standard for the graduates of the schools.

When a graduate of a high school wished to enter college it was necessary for the college to give him an entrance examination and if it allowed the student any credit for work done in the high school it was necessary for the college to investigate the school from which he graduated in order to determine the amount and kind of work done there.

THE GRADED SCHOOLS TODAY.

The High School. After forty years of continuous growth the Iowa graded school can easily show the progress that has been made in that time.

The courses of study in the approved four year Iowa high school today are almost, if not quite, equal to the courses offered in the colleges forty years ago. One thing is certain, they are more practical and helpful.

These courses of study have been extended and enriched by addition and elimination until a student in a four year approved Iowa high school can receive an elementary education today that easily fits him for the demands of the present generation. To this course have been added Manual Training, Domestic Science, Agriculture, and much practical work in Chemistry and Physics. The Commercial course has likewise been given a prominent place in the course of study, and a Normal Training High School course has recently been added for those who wish to become teachers.

In addition to this the State Board of Vocational Education has established full courses all the year around in vocational agriculture and industrial subjects in many public schools in the state and also winter short-term Agricultural classes in many counties under the direction of competent teachers.

The graduates from these standard four year high school courses are admitted to freshman standing in college without examination.

The equipment in these high schools is usually sufficient to meet all practical needs of demonstration and in many high schools this equipment is almost as complete as may be found in many colleges.

The buildings in most cases are adequate and in many cases they are models of construction and completeness.

Many of the consolidated rural schools meet all these high standards of education, equipment, and buildings.

In all approved four year high schools the superintendent must be a college graduate and all the teachers in the high school must be college graduates. Indeed there is a constant demand for college graduates in all high schools whether approved for four year courses or not.

The Grades. The work of the first eight grades of the graded schools has in no sense been neglected.

The kindergarten has become an integral part in the course of study. The classification of pupils and methods of instruction have received the most careful thought and practical application by the most skillful educators of the country.

The superintendent and school boards are seeking teachers for these grades that are not only high school graduates but who have taken courses in Normal Training in our best normal schools. In most of the four year approved public schools no teacher is engaged who does not have at least two years of educational preparation in normal work beyond high school graduation.

Of course a satisfactory certificate is required but the required educational preparation for teaching is also a necessity.

If the school boards and superintendents should neglect any of these matters the state inspectors of public schools see to it that these educational requirements are carried out.

Over all these public schools are the state inspectors. There is an inspector over the normal training high schools whose duty is to see that the courses of study, the superintendent, the teachers in the grades and high schools, and the equipment, library and buildings meet the educational requirements laid down by the law and the State Department of Public Instruction.

There are 192 of these normal training high schools in the state and if they fail to meet these educational requirements they lose their special appropriations.

It is the duty of the inspector of consolidated schools to see that all consolidated schools meet the requirements of the law and the State Department of Public Instruction. There are 425 consolidated schools now under his jurisdiction and others are being formed all the time. These schools likewise must meet the requirements of the law and of Department of Public Instruction or they will be deprived of their special state appropriations.

It is the duty of the inspector of graded and high schools to inspect all graded and high schools not included in the normal training high schools or the consolidated high schools and to help them arrange standard courses of study, provide the necessary equipment and buildings and to secure superintendents and teachers of such educational preparation as to be capable of carrying out the work and keeping the school up to a high educational standard in both the grades and high school.

In addition to these inspectors there is a director of vocational educaiton and a director of trades and industries to carry out the provisions of the Smith-Hughes vocational act in this state.

THE STATE TEACHERS' PLACEMENT BUREAU.

As the standard of educational requirements for teachers has been advanced it has been found difficult to obtain teachers to meet these requirements.

The Thirty-eighth General Assembly therefore created a State Teachers' Placement Bureau to serve as a clearing house for teachers.

This bureau is a department in the office of the State Superintendent of Public Instruction and is under the general supervision of the state superintendent. It is for the free use of teachers and school boards. This bureau was organized July 1, 1919, and it has proved to be a necessary adjunct to the office in distributing properly qualified teachers over the state.

Over two thousand qualified teachers have been distributed during the past year to schools needing their services.

Over all this is the State Superintendent of Public Instruction whose duty is to initiate and direct the educational policy of the state and to see that all the educational needs of the state are met.

Never before in the history of the world has so much progress in educational work been made in the same length of time, not necessarily just in Iowa, but in other states. I can think of nothing more gratifying to an educator than the contemplation of this wonderful progress and the personal knowledge of how it was accomplished.

PROGRESS OF THE COLLEGES.

Forty years ago practically all the colleges of the state were in their infancy, including even the state institutions. Indeed some of the good colleges of the state now were not in existence at that time.

The attendance in all the colleges was small and the buildings and equipment were not nearly so good as may be found at many a high school today.

The courses of study offered consisted of a three or four year Preparatory course and a four year course in Liberal Arts.

The Liberal Arts courses were the old fashioned courses that made a specialty of Latin and Greek and mental science with a small amount of natural science. The Preparatory course or Academy was made up of the subjects that would fit a student to enter upon the work of the Liberal Arts course with no reference whatever to any thing that might be helpful to the student who did not go on and take the Liberal Arts course.

In most of these colleges the work in the sciences amounted to very little. The writer remembers of visiting several laboratories in those colleges and it would be a very poor high school today that would not have better laboratories and equipment than he found there.

Very few if any maintained Normal departments or ever offered any work in Pedagogy, Methods of Teaching, History of Education, or indeed in any educational subjects. They belonged exclusively to the old line, pioneer classical colleges, and gloried in the fact. They bitterly resented any changes in the courses of study to meet modern educational needs, and sought to make the high schools preparatory departments of college entrance, with the emphasis always on the old Preparatory or Academic course.

Today nearly all the colleges of the state offer Normal courses and hold summer sessions for the training of teachers. Even the graduates of the colleges of Liberal Arts are required to take certain courses in education in order to secure state certificates from the state upon graduation.

The Liberal Arts courses have been revised so as to allow a liberal number of elective courses. The scientific course is as popular as the classical course.

In addition to this many of the colleges offer courses in Manual Training, Agriculture, and Domestic Science. Some of them offer full courses in Commerce, and one or two offer courses in Law, Pharmacy, and in Engineering, including the short Industrial Engineering courses such as Machinist, Automobile, and Traction courses.

The state institutions have kept fully abreast of the times and today offer courses in all these subjects, including other professional courses.

All the colleges are fairly well endowed and some of them have secured quite large endowments. They all have splendid buildings and grounds and practically all of them are abundantly equipped with apparatus, laboratories, and libraries for modern scientific work. Their faculties are well chosen and ample and the teaching of excellent quality.

Few states can show so many well established colleges as may be found in Iowa.

The independent colleges, however, have always been very conservative and have almost unitedly fought against the introduction of any courses that would detract in the least from their established classical courses. They have been loth to give up their Greek and Latin for more modern subjects. They have made wonderful progress in every way but at no time can it be said that they have been the leaders in modernizing education. They have modified their courses and added others to them when the demands of the modern education made it necessary for them to do so. Even yet, I fear, some of them think that the educated man is one who somewhere along his course of study must have spent many years in the study of Greek and Latin and kindred subjects.

The state institutions rank well with similar institutions of other states; while the State College of Agriculture and Manual Arts has risen to national fame in agriculture. They have faithfully sought to meet the educational needs of the state and if they have sometimes failed to assume a leadership over other colleges of the state in some of the courses offered, the failure has been more on account of a lack of continuous leadership than for any other reason.

The State Teachers' College has had a phenomenal growth made possible by its great president, Dr. Homer H. Seerley, and because of the fact that there was only one normal school under state control when there should have been four—one for each quarter of the state.

There is every reason why the people of Iowa should be proud of the progress that has been made in education in Iowa during the last forty years.

This does not mean, however, that all has been done that should have been done or that there is not a great work now before the people of the state. In fact anyone who has been connected with school work in Iowa for forty years can see more big educational problems before the state now than ever before.

The writer has no thought of undertaking to state these problems here as they appear to him, but he feels sure that the State Superintendent of Public Instruction and those in authority in educational affairs in the state realize what these problems are and that in due time they will bring them before the people for solution.

A RETROSPECT

J. J. McConnell, Superintendent, Cedar Rapids, Iowa.

This is a brief statement of the writer's impressions concerning educationa progress in Iowa as observed during some forty years of experience. It is in no sense one of these serious things called "a study" but is simply a statement of a somewhat reminiscent character in which are pointed out a few things that come into view as the mind of the writer reverts to the experiences of the period in question.

Several topics suggest themselves: first, the enlarged scope of public school work during this period; second, the development in the minds of the people of the importance of the high school as a part of the public school system; third, the introduction of work in the industrial or manual arts; fourth, the development, within the last six or eight years, of the junior high school or intermediate school; fifth, some changes that have taken place in the field of higher education such as the change of attitude on the part of college people toward the preparatory schools and a pronounced change in the popular mind in the matter of higher institutions supported by the public.

In a hasty retrospect these are the things which catch the eye. It must be understood that in an article of this sort, it will be impossible to speak in terms of definite statistics.

The public school at the beginning of the time under review was a school devoted to the teaching of the common branches in the elementary grades and the teaching of the elementary stages of what are known as the higher branches in the high school. Music, drawing, and physical culture received little or no attention. The high school courses were pretty largely determined by the college requirements for entrance. This was true particularly in the languages and in mathematics. The subject of mathematics was more emphasized in the early years of this period than it is at present. There has been a definite trend in the curriculum in recent years away from the former staple subjects, in the direction of the social subjects, as history, civics, and in the secondary school, economics.

At the beginning of the period under consideration not much was thought about these last named subjects, but in recent years the requirements of our modern life have apparently made it necessary to devote more time to subjects of this sort. At any rate, much more time is now being given to the subject of history and related branches than was done at the beginning of the period of which we speak. We believe now that in order to fit a young person for living in this time, it is better to give him some notion of what men have done and are doing than it is to deal too exclusively with the more remote subjects that at one time made up the

curriculum. This is one point in the enlargement of the scope of public school work. The development of the high school itself as a fixed part of the public school system has been a subject of great interest. At the beginning of the period of which we speak many people in Iowa, and people of good education, themselves opposed the introduction of the high school into the public school system. I remember very distinctly reading in an influential newspaper an editorial comment to the effect that the editor of that paper wished to be understood as opposing the teaching at public expense of the subjects contained in the high school curriculum. The point was that if parents wished their children to study these advanced subjects, including the "dead languages," advanced mathematics, and so on, that they should assume the expense of this instruction.

It was of no particular advantage to society, as a whole, that the general level of public school education should be brought up so as to include the high school course. Many people agreed with this editor. It is superfluous to say that a change in this respect has taken place. More money in proportion to pupils taught, has been spent in the secondary stages of public education in the last twenty years than has been spent in the support of the elementary schools and the question now is not whether we shall have in each community such a high school as we can decently maintain with our resources, but whether we can restrain communities from exceeding in their zeal what they are able to do well; because every community wants the best high school possible. In many cases, four-year high schools are maintained where two or three year schools would be better, but the point is that there has been a very distinct development in favor of the secondary or high school stage of public school education.

The development of work in the manual and household arts is a very distinct feature of this period. This, of course, has been general throughout the country and what has been done is due to the feeling in the minds of men and women that it is not only desirable to teach children the ordinary and even the advanced branches of learning that are usually held to be fit culture subjects, but that it is desirable to train them in the arts and crafts by which men gain a livelihood. It has been a rapidly developing thought in the minds of men that it is important and even necessary as a part of one's education to train him in the things that he must do in life, whether it be working with his hands or whether it be something else. There has been, therefore, a remarkable development of this idea in the public school as indicated by the introduction of work in manual training, domestic science, and all the household arts, indeed, in all of the activities that are necessary in the processes and employment of human life. It is not worth while to stop at this point to speak at length on the value of this development. Certainly so long as men are compelled to produce their food from the ground and to build houses to live in, it is worth while to encourage them to do all these things heretofore considered as common things and to do them as a part of their education elevating them to the place of first consideration or at least of equal consideration with other subjects of study. The movement has been in the direction indicated. It has been a good movement

and a community in these times which does not make some provision for the training of its children, or at least many of them, in the field just suggested, is sadly derelict in the discharge of the duty which it owes to its people in the matter of public education.

A recent development of importance is the introduction into the school system of the intermediate or junior high school. Within the last ten years there has grown up a definite feeling and out of this feeling a definite plan of work which has resulted, practically, in the organization of the public school system into an elementary school of six grades preceded by the kindergarten, the intermediate school embracing the seventh, eighth and ninth grades, and the high school including the tenth, eleventh, and twelfth.

It is a fact that has been long recognized that some features of advanced grammar school work and grammar school association do not seem to meet the requirements of developing children. In some way or other a child who reaches a certain period of life needs to have something done for him which has not been done for him before. I am thinking of this not so much as a matter of the course of study as I am thinking about it as a matter of the school life as a matter related to the activities and employments which can be carried on in the public school, and which seem in one way or another to enable the school to minister to the child's taste and inclination, in a better way than it is possible to do under the organization in which the seventh and eighth grades are conducted on the plan of organization which the children have followed from their childhood.

When the child comes to kindergarten from his mother's arms, he is treated as a child, and naturally so, he must be ministered to in the school much as he has been ministered to in the home. He is still a child. In his exercises and employments in the school, his childish tastes are appealed to and are gratified. As he goes on certain small parts of subjects of study are given to him to learn and as he grows older these become more and more complex, but are still within the scope of the power of a single person who officiates as his teacher. The teacher seems competent to manage him, to keep his mind employed, to keep him interested, and to keep him getting and reciting his lessons. The weight of opinion is that the child should owe his allegiance, and yield his obedience during these earlier years to one person rather than to a number of persons. There is a certain concentration of treatment which can be carried on by one teacher which is more effective in these lower grades than the work could be if carried on in the other way.

But by and by the child gets to be ten or eleven years old. His eyes are a little more widely open to the world in which he lives, he discriminates among people more accurately than he did before. He finds more people than he has known about before. He begins to have mroe definite opinions about things and particularly about school things, his likes and his dislikes become more pronounced and he begins to feel that he would like to do such things as his father does or the things that some older person does, that if the father has a society to which he belongs, that he should have a society to which he may belong. A desire for a new kind

of organization of which he may be a part develops The playthings of the kindergarten or the back yard interest him no more. He wishes to meet and associate with a larger number of boys and girls. His vision of life is an enlarged and an enlarging vision. The routine to which he has been subjected for a half dozen years, if it does not become irksome, becomes extremely commonplace and he would be delighted with a change. He needs to be stirred more deeply and so the change has been made in response to the nature and the need of the child.

In the department of higher education a change has taken place in the period under review. The attitude of the college and all institutions of higher learning on the subject of curriculum content has been greatly modified. A sufficient illustration of this fact is that whereas twenty-five years ago certain extended entrance requirements were made, particularly in the languages and mathematics, it has come about that many of these entrance requirements have been discarded or greatly changed. The college mainly wishes to know now that its candidate for entrance shall have faithfully completed a four-year course of study rather than that he shall have taken certain studies. There are some men engaged in the work of higher education in this state who recall that twenty years ago the State Teachers' Association maintained a committee which had for its main duty the exercise of a strong effort to draw up the high schools of the state in their curricula far enough to enable them to meet the entrance requirements laid down by these colleges in the subjects that I have named, but the unprejudiced observer of this whole procedure would say now that the institutions of higher learning have changed their attitude on this subject, and that instead of trying to impose requirements on secondary public schools, have modified their entrance requirements to meet the standards, whether high or low, which the public has set up in these schools. They are not saying much in these days about one year of Greek, and two years of Latin, and of solid geometry as college entrance requirements. This change is rather a notable one. The value of the change is not herein being discussed. The facts as the writer sees them are simply being recited. Further, there has been a change in the public mind touching the maintenance of institutions of higher learning by public expenditure.

The period in review has been the period of great development in state universities and agricultural colleges. Thirty years ago there were many people, and some of them had sufficient ability to secure election to legislatures, who utterly opposed the maintenance of schools or colleges of university grade at public expense. The writer has sat as a spectator in the house of representatives of the legislature of Iowa and listened to a member of that body speak at length against furnishing any appropriations to the university of this state, on the grounds just mentioned, to which was added a suspicion in the mind of the speaker affecting the moral and religious characters of the men who were teaching in this school.

The writer also remembers very distinctly as a boy that on one occasion an appropriation of $20,000 or $30,000 was secured from the state legislature for the promotion of the work at the University of Iowa, and

that this was a matter of so much note that the town in which the institution is located organized and carried through a great celebration. The buildings were illuminated and speeches were made and on the whole a great demonstration took place. At the present time in all institutions of this character, such an item as this that I have referred to could be added to or subtracted from an appropriation without being noticed.

The states, particularly those of the Middle West, are appropriating millions and millions of dollars to the development of these institutions of higher learning. It is not a question now whether an institution shall be supported at all, but only a question concerning the amount that can be secured for the purpose of developing the institution in the work of which we speak. As I have already intimated, I am simply pointing out the things that first present themselves in a hurried retrospect of this period.

I am giving them without much relation to one another and I have doubtless omitted other developments of equal or greater importance than those mentioned, but the foregoing are the things which I see in this hasty view. I have said nothing about the increase in the numbers of those who are profiting by the munificence of the state in organizing its public school system. Attendance is good, the compulsory law seems to be effective and institutions of higher learning are crowded to the doors, and all in all the recent years of the period under consideration have been years of satisfactory growth.

THE TEACHERS' PLACEMENT BUREAU

O. H. Longwell, Director.

The proper distribution of teachers has for many years been one of the perplexing problems that school people have had to deal with. School superintendents have found it difficult to secure just the teachers they needed to keep up the efficiency of their systems of schools.

On the other hand many teachers, after having prepared themselves to teach certain subjects, have found it difficult to secure positions to their liking and fitness.

During the war this situation became so acute that even the national government found it advisable to establish a teachers' bureau in Washington, D. C., to meet the demands of the country for suitable teachers to carry on the educational work of the states.

Several states, including Massachusetts, Minnesota and others, organized Teachers' Placement Bureaus to meet the demands for the proper distribution of teachers in their states.

Iowa was no exception to the rule. The teacher shortage became so great that school people everywhere felt that something must be done to relieve the situation.

The Thirty-eighth General Assembly of Iowa, feeling this pressure, enacted a law creating a Teachers' Placement Bureau as a department in the office of the State Superintendent of Public Instruction.

The following are the essential points of this law:

(b) "Any person having a certificate to teach in this state and who is deemed by this department to be a suitable person for teaching, shall on written application be entitled to enroll with the Superintendent of Public Instruction under such regulations as he may prescribe."

(c) "Upon request he shall furnish information to boards of education, superintendents, principals, and other proper authorities of public schools, desiring to employ teachers, and under such regulations as he may prescribe, furnish teachers enrolled with the information relative to vacancies in public schools; but no person connected with the office of the Superintendent of Public Instruction shall be held responsible or be understood to vouch for the fitness or success of any teacher who may secure a position through the agencies herein provided."

(e) "There is hereby appropriated from any funds in the state treasury not otherwise appropriated, the sum of two thousand five hundred dollars ($2,500.000) annually, for the purpose of carrying out the provisions of this act."

The bureau was organized early in July, 1919. During the fiscal year from July 1, 1919, to June 30, 1920, 1,258 teachers enrolled with the bureau, 1,108 were from Iowa and the remaining from other states. Four hundred seventy (470) Iowa school boards called on the bureau asking for 2,374 teachers, or 1,116 teachers more than enrolled with the bureau. The bureau was able therefore to furnish only about half the teachers called for by the school boards. This is accounted for mainly from the fact that many teachers did not know that the state maintained a free Teachers' Placement Bureau. Many teachers also wrote to inquire about the expense of registration with the bureau. They thought that there must be some expense connected with the registration, or their placement in schools.

The bureau met with enthusiastic approval at once of both school officers and teachers. It has furnished a free clearing house for all teachers and school boards of the state who wished to use it.

Many school boards have come to the office to select teachers from the records on file in the office. This, however, is not necessary for the bureau sends the same records right to the school boards to investigate that they would find here in the office.

The bureau has been thoroughly organized and is prepared to take care of all the teachers who wish to register with it and to furnish teachers to all school boards and officers that may call upon it for teachers.

The teachers enrolled with this bureau the past year have been saved a great amount. It has cost the state $2,800.00. The state legislature appropriated $2,500.00 and the Retrenchment and Reform Committee added $300.00 to this, making $2,800.00.

The bureau has been greatly hampered, however, for want of funds, and if the bureau is to be kept up to the present efficiency the appropriation for its maintenance must be greatly increased.

The enrollment of teachers is increasing rapidly as the work of the bureau is becoming better understood. School boards and school officers over the State are realizing that they can find here just the teachers they need.

The bureau has undoubtedly met all the reasonable expectations of the Legislature and the people of the State and it is confidently believed that the coming Legislature will provide all the funds needed for its efficient management.

IN MEMORIUM

COLLEGE AND UNIVERSITY

Laenas Gifford Weld—Born, Michigan, December 30, 1862. Died, Pullman, Ill., November 29, 1919. B.S. University of Iowa, 1883; A.M. 1886, LL.D. 1912. Married Harriet Magdalene Doane, Cresco, Iowa, 1887. Teacher Mathematics, Burlington, Iowa, High School, 1884-86; Assistant Professor, 1886-87, Acting Professor, 1887-89, Professor Mathematics and Astronomy and Head of Mathematics, 1889-1911, Dean Graduate College 1900-07; Director School of Applied Science, 1903-05, Dean College of Liberal Arts 1907-10, State University of Iowa; State Superintendent of Weights and Measures for Iowa, 1888-1911; Director, Pullman, Ill., Free School of Manual Training, 1911-19. Fellow A. A. A. S. 1904-09; Member American Archeological Institute; American Mathematics Society; American Historical Society; Phi Beta Kappa; Sigma XI; Phi Delta Theta. Author: Theory of Determinants; Determinants.

F. G. Birge—State Epidemiologist and Professor of Hygiene, State University of Iowa. Died at Iowa City, February 4, 1920, from pneumonia, following influenza. He was a son of President E. A. Birge, of the University of Wisconsin.

SUPERINTENDENTS AND PRINCIPALS.

C. M. Pinkerton—Aged 71, formerly superintendent of schools at Perry, Iowa, and manager of the Central Life Insurance Company in Oklahoma, died at Oklahoma City, February 8, 1920. After leaving Perry schools he became a resident of Des Moines, Iowa. He was an active member for many years of the Iowa State Teachers' Association and for ten years has lived in Oklahoma. He was the author of a book in the story form on teaching school.

Carlos M. Cole—Born, Durand, Illinois, February 22, 1872; died, Denver, Colorado, June 6, 1920. A.B. Grinnell, 1895; A.M. Colorado, 1915; LL.D. Denver University, 1916; Principal Atlantic, Iowa, High School, 1896-99; Superintendent Atlantic, Iowa, Schools, 1899-1907; Principal, Sioux City, Iowa, High School, 1908-10; Superintendent Colorado Springs, Colorado, Schools, 1910-15; Superintendent, Denver, Colorado, Schools, from July 1, 1915, to June 6, 1920.

Clarence A. Osborne—Superintendent of Schools of Mediapolis; died from pneumonia in February, after a brief illness. He was formerly for four years superintendent of schools of Hubbard, Iowa.

Luther F. Troutner—Died, February 1, 1920, at Hubbard, Iowa. He had been Superintendent of Schools at Rockford, Spirit Lake and Eagle Grove, but in recent years has been a clergyman in the Methodist Episcopal Church.

Blanche M. Massey—Principal Washington School, Albia, Iowa. Born Albia, Iowa, August 24, 1891. Died, Albia, Iowa, January 14, 1920. Educated in the schools of Albia. Taught at Hocking and Albia.

TEACHERS.

Mrs. Paul M. Adamson—(Leah J. Wheldon) Born, Stuben, Oneida County, New York, September 27, 1863. Died, Marshalltown, Iowa, January 3, 1920. Was a graduate of a New York State Normal School; for thirteen years taught regularly and later did supply work much of the time for 23 years.

Winifred Byrne—Born, Lewis, Iowa, October 13, 1882. Died, Atlantic, Iowa, November 19, 1919. M.Di. 1906, Iowa State Teachers College; A.B. 1912, State University of Iowa; Graduate Student, Columbia University. Preceptress, Corning Academy, Corning, Iowa; Principal high school, Tabor, Iowa; Teacher of English, high school, Pocatello, Idaho; Teacher of English, Hanford, California.

Laura Maude Conway—Born, Brooklyn, Iowa, 1892. Died, Ponca City, Okla., May 23, 1920. Home Economics graduate, Iowa State Teachers College, 1916. Taught in Larrabee School, Clermont, Iowa; two years in Department of Home Economics, Upper Iowa University; completed hospital course in Chicago; in Ponca, Nebraska, in hospital service at time of her death.

E. L. Coburn—Died at St. Louis, Mo., May 23, 1920. He was supervisor of music at St. Louis; had formerly been supervisor of music at Boone, Iowa. He died after three days' illness. He was to have been instructor in public school at Northwestern University the summer of 1920.

Bertha Darrow Smith—Des Moines, Iowa, died June 24, 1920, after four months' illness. She had been principal of three schools in Des Moines; Franklin, Garfield and Oak Park, and was one of the best known club women of the city. She had served as president of Chapter 2, P. E. O., of the Professional Women's Club and of the Principal's Club and had been Matron of Des Moines Chapter, Order of Eastern Star.

Martin B. Shaw—Died January 5, 1920, in his school room at Burlington, Iowa, at the age of seventy-six. He was for forty years an Iowa teacher.

James H. Welch—Belle Plaine, Iowa, died in Montana, October 1, 1919. Many years a teacher in Iowa; Superintendent of Rosebud Agency, Sioux Indian Boarding School, for ten years.

OTHER DEATHS REPORTED BUT NO DATA RECEIVED

Alma Jacobsen—Charter Oak, Iowa.
Abbie Cook—Manilla, Iowa.
Hazel Leise—Vail, Iowa.

Clay	D. M. Odle	1	1,800	Spencer
Clayton	Carl F. Becker	2	1,800	Elkader
	Viola I. Moran		600	
Clinton	C. E. Cozzens	1	2,500	Lyons
	Hazel A. Beall		900	
Crawford	F. N. Olry	3	3,000	Denison
	Anna Flynn		1,200	
Dallas	May A. Hills		1,500	Adel
	Jessie G. Hotchkiss		900	
Davis	H. C. Brown		1,500	Bloomfield
Decatur	Kate L. Hull		1,500	Leon
	Edna Brann		720	
Delaware	W. A. Ottilie		1,800	Manchester
	Pearl H. Reed		600	
Des Moines	Wm. A. Dunlavy		2,000	Burlington
	Doretta Schulze		600	
Dickinson	Frank S. Willey		1,500	Spirit Lake
	Margaret Fitzpatrick		720	
Dubuque	Joseph Flynn	1	1,800	Dubuque
	Grace G. Maloy		720	
Emmet	Marie Sorum		1,500	Estherville
Fayette	Norman J. Breckner		1,500	West Union
	Bernice I. Moore		800	
Floyd	Mary D. Korinke	2	1,500	Charles City
	Freida Westphal		750	
Franklin	Harry J. Henderson	3	1,800	Hampton
	Mrs. Vivian Van Houten		500	
Fremont	Edith M. Anderson		1,500	Sidney
	Maye Shannon		720	
Greene	H. C. Roelofsz	1	1,600	Jefferson
	Nellie Hopper		400	
Grundy	D. R. Earl	2	1,500	Grundy Center
	Mrs. D. R. Earl		750	
Guthrie	I. M. Boggs	1	1,500	Guthrie Center
Hamilton	E. F. Snow	3	1,500	Webster City
	Mrs. E. F. Snow		720	

County	Superintendent and deputy	Terms Served	Salary	Postoffice
Hancock	J. R. Baggs	3	1,500	Garner
	Emma Fogue		750	
Hardin	Blanche Stoddard	2	1,500	Eldora
	Mrs. Esther Gethman King		900	
Harrison	Marie E. Case		1,500	Logan
	Dorothy Case		720	
Henry	Carolyn Campbell	2	1,500	Mt. Pleasant
Howard	Mary M. Horn		1,500	Cresco
	Bertha M. Halweg		600	
Humboldt	Clarence Messer	9	1,500	Humboldt
	Marian Thomas		550	
Ida	Julia Jacob		1,500	Ida Grove
Iowa	Ida O'Brien		1,500	Marengo
	Sadie Morrison		900	
Jackson	E. R. Stoddard	4	2,000	Maquoketa
Jasper	Lucy E. Hall		1,500	Newton
	Laura Killduff		900	Clarkson
Jefferson	June Chidester	3	1,600	Fairfield
Johnson	N. E. Hessenius	1	2,000	Iowa City
	Helen Plough		1,000	
Jones	Kate Maurice	5	1,500	Anamosa
	Glada B. Miller		840	
Keokuk	H. S. McVicker	4	1,500	Sigourney
	Ruth Brolliar		780	
Kossuth	Wm. Shirley	2	2,000	Algona
	Mrs. Grace Shirley		900	
Lee	E. C. Lynn	5	2,000	Donnellson
	Esther Bentzinger		468	
Linn	Lulu B. Secrist		2,000	Marion
	Lola M. Cornelius		900	
Louisa	Myrtle Jamison		1,500	Wapello
	Mrs. Katherine Baker		450	
Lucas	Myrtle A. Dungan	3	1,500	Chariton
	Effie M. Dungan		750	
Lyon	E. T. Gilman	5	1,600	Rock Rapids
	Leona S. Gilman		600	
Madison	Carrie E. Ludlow	2	1,500	Winterset
Mahaska	A. J. Jones		1,800	Oskaloosa
	Nellie Wray		900	
Marion	Mrs. Mae Goldizen		1,500	Knoxville
	Mame Bridges		840	
Marshall	C. E. Shutt	1	1,800	Marshalltown
	Mrs. C. E. Shutt		600	
Mills	Geo. E. Masters	4	1,800	Glenwood
	Verda A. Wheeler		450	
Mitchell	Blanche McLaughlin		1,500	Osage
	Rena Selder Cornwwell		600	
Monona	Ella M. Gardner	3	1,500	Onawa
	Vera Norton		750	
Monroe	Myrta Harlow	5	1,500	Albia
Montgomery	Elizabeth Hugus	1	2,000	Red Oak
Muscatine	E. D. Bradley	2	2,000	Muscatine
	May Cronin		800	
O'Brien	I. J. Billingsly	4	1,800	Primghar
Osceola	Mary E. Deboos	3	1,800	Sibley
Page	Agnes Samuelson	1	1,500	Clarinda
	Blanche Walker		900	
Palo Alto	Florence Underwood		1,500	Emmetsburg
	Margaret Flood Fisher		750	
Plymouth	Erna H. Plath	1	1,750	Le Mars
	Barbara Gaynor		750	
Pocahontas	Grace D. Bradshaw	2	1,250	Pocahontas
	Grace A. Eaton		750	
Polk	Mrs. A. H. Hoffman		2,000	Des Moines
	Gladys Mathis		840	
Pottawattamie	Charlotte Dryden		1,500	Council Bluffs
	Dee F. Dryden		900	
Poweshiek	Estelle Coon	4	1,500	Brooklyn
Ringgold	Louise Askren	1	1,500	Mount Ayr
Sac	P. A. Lauterbach		1,900	Sac City
	Laura Hiersche		720	
Scott	Henry E. Ronge	4	2,500	Davenport
	Maude Moore		960

INSTITUTE FACULTIES.

ABSTRACT [E-1]—REPORTS OF COUNTY SUPERINTENDENTS. INSTITUTE FACULTIES—JULY 1, 1918, to JUNE 30, 1919. INSTRUCTORS AND LECTURERS.

Adair County—Mrs. Mina Whittum, Grace Rait, J. C. McGlade, Dr. Charles A. Payne, Jessie Field Shambaugh.

Adams County—Anna Lynam, J. C. McGlade, Bonnie Andrews, E. E. Lewis, P. C. Skornpinski, C. F. Pye, Dr. A. E. Kepford, Vard Worstelle.

Allamakee County—W. L. Peck, Hon. J. L. McBriem, Dr. Reemb Luebbers, Theresa Dansdill, Charles F. Pye, William F. Barr.

Appanoose County—Janet Wilson, Frederica Shattuck, L. C. Lord, Mrs. E. B. Wilson, Belle C. Scofield, W. B. Sandford, F. A. Welch.

Benton County—John E. Stout, H. R. Driggs, B. E. McProud, William F. Russell, Helen S. Hartley.

Black Hawk County—H. C. Moeller, Charles Fordyce, J. C. McGlade, P. E. McClenahan, Charles W. Kline, A. T. Hukill, Elsie A. Wygant, F. L. Mahannah.

Boone County—Gracia E. Tucker, Mrs. E. B. Wilson, Dean Russell, Holmes Cowper, Helen McHose, F. C. Ensign, Helen Hartley.

Bremer County—May E. Francis, M. G. Clark, Emma C. Moulton, P. E. McClenahan, Gertrude Tyrrell, W. H. Ray.

Buchanan County—A. E. Jewett, J. L. McBrien, Charles F. Pye, C. P. Colegrove, Effie Schueman, Lorena Bishop.

Butler County—E. B. Hodges, M. G. Clarke, C. H. Meyerholz, Miss Helen Hartley, H. R. Driggs.

Calhoun County—Jenette Lewis, Charles Fordyce, Lou Shepherd, C. C. Swain, Charles E. Barker.

Carroll County—George Galloway, F. C. Ensign, C. P. Colegrove, C. H. Tye, Anna Cordts, E. T. Housh.

Cass County—A. L. Boyer, C. E. Seashore, H. E. Bradford, Charles F. Pye, Mrs. Curtis, D. F. Dickerson.

Cedar County—Mildred Yule Phelps, Charles F. Pye, P. E. McClenahan, F. D. Joseph, R. A. Folk, Avis Trumbo, William F. Russell, C. C. Nutting, William W. Sweet.

Cerro Gordo County—Fred D. Cram, J. L. McBrien, C. E. Avis, Sara F. Rice, G. W. Spolm, Helen Hartley, C. A. Pye, Frank T. Vassey, James Rae.

Cherokee County—Margaret Montgomery, M. G. Clark, Miss Belle Schofield, H. C. Cummings, Charles H. Meyerholz, Gertrude Rodman.

Chickasaw County—Alf. O. Vaala, Dr. Charles Meyerholz, Dr. Ernest Horn, Theresa Dansdill, Harriet O. Kenyon, Edna Lowe, Grace Shaffer.

Clarke County—Bessie Hart, Prof. E. E. Lewis, Mrs. C. W. Hummell, Bonnie Andrews, J. W. Jarnagin, Frank D. Joseph.

Clay County—D. M. Odle, Hugh S. Buffum, Charles H. Meyerholz, J. R. McAnelly, Ida Fessenbeck.

Clayton County—Carl F. Becker, J. F. McBriem, R. W. Eaton, H. B. Smith, Mrs. Edith Curtis, Maud Marshall Klingland, Lucia Roggman, R. A. Folk.

Clinton County—C. E. Cozzens, P. E. McClenahan, Ernest Horn, Eulalie Turner, William Russell, Alison Aitchison.

Crawford County—F. N. Olry, C. A. Fullerton, Theresa Dansdill, C. P. Colegrove, E. Horn.

Dallas County—May A. Hills, F. C. Ensign, Supt. Del Manzo, Supt. Frank Linderman, G. W. Wilson, G. W. Stephens, A. C. Fuller, Jr., Mrs. W. Snider, L. Brenton.

Davis—H. C. Brown, Macy Campbell, W. F. Barr, Theresa Dansdill, G. H Brinegar, Helen Hartley.

Decatur—Kate L. Hull, O. E. Klingaman, A. C. Fuller, Jr., E. Grace Rait, W. A. Price.

Delaware County—W. A. Ottilie, J. L. McBrien, C. P. Colegrove, Effie Schuneman, Charles F. Pye, Alma C. Brown.

Des Moines County—Emma Watkins, C. W. Wassam, James Matheny, Charles Flint, Jeanette Kling, F. D. Joseph, P. E. McClenahan, Charles F. Pye, G. A. Brown, W. L. Sheetz.

Dickinson County—Frank S. Willey, C. E. Avis, C. A. Fullerton, Alice C. Wilson, O. R, Arrington, Charles Meyerholz.

Dubuque County—Joseph Flynn, C. A. Fullerton, Sara Rice, J. L. McBrien, H. F. Carson, Robert Parkinson, Margaret Lucas.

Emmet County—Marie Sorum, P. E. McClenahan, J. C. McGlade, H. C. Moeller, Edith Countryman, F. H. Sunderlin, Clara Moe.

Fayette County—N. J. Breckner, S. M. Johnson, Charles F. Pye, C. P. Colegrove, J. L. McBrien, Rev. M. C. Cleworth.

Floyd County—Mary D. Korinke, Claude F. Brown, Ella Ford Miller, A. E. Kepford, Sara F. Rice, J. L. McBrien, F. T. Vasey.

Franklin County—Harry J. Henderson, Mary Campbell, M. M. Miller, D. R. Eagle, R. D. Daugherty, H. L. Cecil, Helen S. Hartley, Charles F. Pye, D. R. Earle.

Fremont County—Edith M. Andersqn, C. A. Fulmer, John E. Stout, Mrs. Alberta Heald.

Greene County—H. C. Roelofsz, E. E. Lewis, F. A. Welch, Florence Grisier, T. B. Stewart, R. B. Hardin, C. H. Studebaker, Irene Hirsh, Eva Seevers, Ole O. Roe.

Grundy County—D. R. Earl, H. F. Carson, R. E. Eaton, C. A. Fullerton, C. A. Pye, A. E. Kepford, R. A. Folk, Nellie G. Warren.

Guthrie County—I. M. Boggs, Mrs. E. B. Wilson, Emma Watkins, Doris Wilkite, M. R. Fayram, Macy Campbell.

Hamilton County—E. F. Snow, B. W. Hoadley, J. C. McGlade, R. W. Eaton, C. F. Pye.

Hancock County—J. R. Baggs, O. T. Corson, C. A. Fullerton, A. C. Fuller, P. E. McClenahan.

Hardin County—Blanche Stoddard, Jeanette Hart, Monica Wild, I. F. Meyer, Ralph J. Reed.

Harrison County—Marie E. Case, Ella Ford Miller, J. C. McGlade, A. McMurray, M. C. Gallipin, Charles Cobb.

Henry County—Carolyn Campbell, Charles W. Flint, F. C. Ensign, Neale S. Knowles, Macy Campbell, Katherine Martin, H. F. Carson, W. F. Hanson.

Howard County—Mary M. Horn, Ernest Horn, Alison E. Aitchison, D. C. L. Robbins, J. P. Thomson, Eva Mayhuse, Charles F. Pye.

Humboldt County—Clarence Messer, P. E. McClenahan, Ida Fessenbeck, O. T. Corson, Nellie Warren.

Iowa—G. A. Yoakam, John R. Slacks, Dr. Edwin Starbuck, W. F. Barr, Josephine Larry, John E. Foster.

Jackson County—E. R. Stoddard, C. P. Colegrove, Mary D. Reed, R. A. Folk, Charles Pye, J. J. Kidder.

Jasper County—Lucy E. Hall, Carrie E. Milles, E. E. Lewis, H. P. Smith, F. C. Ensign, W. S. Booth, Ella Ford Miller, F. D. Joseph.

Jefferson County—June Chidister, Katherine Martin, C. W. Mountain, A. W. Crane, H. F. Carson, Macy Campbell, W. L. Manson, Charles Flint, Grace Behr, Mrs. J. D. Jackson, Neale Knowles.

Johnson County—N. E. Hessenius, H. E. Bradford, Arthur MacMurray, Howard Driggs, Emma Watkins, R. W. Eaton, D. E. Cloyd.

Jones County—Kate Maurice, Dr. Edwin Starbuck, Fred Clark, Mildred Beaman, Grace Fox, Cora Whitley, P. E. McClenahan, Mlle. Lenska, Irene Wheeler.

Lee County—E. C. Lynn, L. L. Caldwell, J. Adams Puffer, Clark A. Fulmer.

Linn County—Lulu B. Secrist, M. G. Clark, Mrs. E. B. Wilson, Mrs. M. B. Curtis, S. H. Clark, Glenn M. Merry, Dean McProud, Emma Watkins, Dr. A. E. Kepford, F. J. Hokin, H. C. Couch, Mary Gaston.

Louisa County—Myrtle Jamison, H. R. Pattengill, Fredrica Shattuck, Dr. Charles Meyerholz, Emma Watkins.

Lucas County—Myrtle A. Dungan, O. H. Benson, J. C. McGlade, C. A. Fullerton, Louise H. Campbell, I. N. Guernsey.

Madison County—Carrie E. Ludlow, J. C. McGlade, M. R. Fayram, P. E. McClenahan, Effie Schuneman.

Mahaska County—A. J. Jones, Jr., John E. Foster, J. E. Beattie, Ida Fessenbeck, Miss Schaffer, T. K. Gregg, W. A. Price, W. H. Hickok.

Marshall County—C. E. Shutt, Blanche Goudy, J. F. Powers, C. A. Fullerton, J. Adams Puffer.

Mills County—George E. Masters, M. G. Clark, C. H. Meyerholz, Wilbur E. Bender, E. Ruth Pyrtle.

Mitchell County—Blanche McLaughlin, Blanche Goudy, Estie Boddy, A. C Fuller, Jr., Mrs. J. H. Raymond, A. M. Vance.

Monona County—Ella M. Gardner, A. C. Fullerton, D. E. McProud, Mrs. E. B. Wilson, Alice Cusack.

Monroe County—Harry D. Kies, Louise Maulsby, F. T. Vasey, Ella Ford Miller, Louise Morris, R. A. Folk, J. C. McGlade, W. B. Sanford, Helen Hartley.

Montgomery County—Elizabeth Hugus, Dr. W. F. Russell, Dr. E. E. Lewis.

Muscatine County—E. D. Bradley, C. W. Wassam, Elizabeth Bowers, C. W. McFarlane, J. B. Withers, Caroline Grate, Amelia Phynsburger, J. Stanley Brown, S. O. Hartwell, P. E. McClenahan.

O'Brien County—J. J. Billingsly, O. F. Corson, John E. Foster, Blanche Goudy, S. H. Buntley, R. K. Farrar.

Osceola County—Mary E. DeBoos, Amalia Bergston, J. L. McBrien, R. W. Eaton, F. H. Chandler.

Page County—Agnes Samuelson, John E. Stout, C. A. Fulmer, Eva F. Anderson.

Palo Alto County—Florence Underwood, A. C. Fuller, C. A. Fulmer, H. C. Moeller, Helen Willard.

Plymouth County—Erna H. Plath, H. E. Bradford, W. H. Clemons, Fanny Foster, Ernest Horn, G. Galloway, Superintendent Cram, Hazel Henry.

Pocahontas County—Grace D. Bradshaw, C. P. Colegrove, J. C. McGlade, Macy Campbell, J. C. Stout.

Polk County—Mrs. A. H. Hoffmann, Z. C. Thornburg, Myrtle Dungan, Katherine Martin, Margaret McKee, Alfred Smith, Emma Moulton, R. C. Woolman, W. H. Bender, Macy Campbell, James F. Hosic.

Pottawattamie County—Charlotte Dryden, C. A. Fulmer, Martha Powell, Miss Hartley, Elizabeth Mullen, Dean Bradford, Rena Gilman, Charles F. Pye.

Poweshiek County—Estelle Coon, Glenn N. Merry, Jeanette Kling, Belle Scofield, H. P. Smith.

Ringgold County—Louise Askren, L. B. Shanewise, Belle Scofield, Avis Kurtzweil, J. A. Woodruff, W. B. Sandford.

Sac County—P. A. Lauterbach, H. P. Smith, F. C. Ensign, George Galloway, Macy Campbell, John N. Hays, Charles F. Pye.

Scott County—Henry E. Ronge, W. F. Barr, Bonnie Andrews, Charles F. Pye.

Sioux County—Charles H. Tye, Glenn Merry, Irene Hirsch, P. E. McClenahan, S. H. Buntley, I. M. Stubbart, Macy Campbell, George Kellogg, Fred Cram.

Story County—Maud Wakefield, Georgene Faulkner, Macy Campbell, John E Foster, Sara F. Rice, Warren E. Pollard, Jenna Strahan.

Tama County—Mary A. Richards, M. G. Clark, Dr. O. Holmes, Dean McProud, Glenn Merry, Emma Watkins, Mrs. Curtis, Annette Davidson.

Taylor County—Allie Nelson, Dr. Ernest Horn, Grace Rait, Dr. C. A. Fulmer.

Union County—William Bell, G. W. Samson, Peter Luteyn, Lenore Shanewise, C. E. Avis.

Van Buren County—H. B. Carroll, J. M. Stoke, A. T. S. Owen, J. C. Godbey, Harry Jaquiss, Mrs. Lydia Shull, Arthur Keister, Irene Hirsch, C. W. Wassam.

Wapello County—R. L. Gardner, C. W. Wassam, John E. Stout, Emma Watkins, D. R. Earl, H. P. Smith.

Washington County—Katherine Stichter, A. M. Wilson, Dr. E. D. Starbuck, Dr. C. W. Flint, Cora Mel Patton, Christine Schneider.

Wayne County—Ava Amenell, G. M. Wilson, Sara F. Rice, Ella Ford Miller, Charles F. Pye, Helen S. Hartley.

Webster County—Anna A. Johnson, W. H. Blakely, Ina A. Johnson, D. M. Kelley, D. R. Earl, C. C. Swain, Dr. C. E. Barker, Dr. Mossman, Dean William Russell, Dr. H. W. Shryock, F. C. Ensign.

Winnebago County—Jessie M. Parker, J. C. McGlade, Ella Ford Miller, H. E. Bradford, Charles M. Meyerholz, Nellie Warren.

Winneshiek County—H. E. Miller, A. C. Fuller, W. F. Barr, Supt. Carl Becker, R. W. Eaton, Prof. Carson, Hon. McBrien.

Woodbury County—H. H. Seerly, W. F. Russell, E. M. Blakesley, M. D. Gilbert, F. E. Percival, H. H. Hahn.

Worth County—O. L. Varland, Helen Hartley, Emmett Cable, W. F. Barr, Charles F. Pye, George W. Spohn, Peter Luteyn.

Wright County—Blanche Bock, G. N. Merry, Eulolie Turner, G. W. Walters, Margery Hilton.

INSTITUTE FACULTIES.

ABSTRACT [E-1]—REPORTS OF COUNTY SUPERINTENDENTS.

INSTITUTE FACULTIES—JULY 1, 1919 TO JUNE 30, 1920. INSTRUCTORS AND LECTURERS.

Adair County—Mrs. Mina Whittum, Frank E. Palmer, E. D. Starbuck, Mrs. Laura L. Thornburg, Elizabeth Myers, Sara F. Rice.

Adams County—Anna Lynam, Prof. E. J. Ashbaugh, J. C. McGlade, Dr. John E. Stout, Julia Utterback.

Allamakee County—W. L. Peck, Prof. H. E. Bradford, Dr. Roscoe Gilmore Stott.

Appanoose County—Janet Wilson, C. E. Avis, J. Adams Puffer, Charles Fordyce, Bertha E. Drown, Faye Rhodes.

Audubon County—Ella M. Stearns, Cora Mel Patton, Theresa Dansdill.

Benton County—Della H. Lutes, C. E. Avis, A. C. Fuller, Blanche Goudy, Wm. F. Russell, Macy Campbell, F. E. Palmer.

Black Hawk County—H. C. Moeller, Ernest Horn, M. G. Clark, C. W. Kline, H. D. Lee, F. L. Mahannah.

Boone County—Gracia E. Tucker, E. E. Lewis, Anna Cordts, May Francis, Geo. S. Dick, Ruth Keleher, Helen McHose, Georgene Faulkner, M. G. Clark P. E. McClenahan.

Bremer County—Grace E. Beebe, Dr. E. A. Winship, A. T. Hukill, S. S. Stockwell, Mary Reed, T. M. Clevenger, Mrs. Flora Smith.

Buchanan County—A. E. Jewett, G. W. Sampson, A. E. Winship, D. R. Earle, Amelia Bengston.

Buena Vista County—A. E. Harrison, Harry E. Bradford, C. A. Fulmer, Carrie Niedemeyer, P. E. McClenahan, F. C. Ensign, Earl V. Burdick, W. D. Cocking, P. A. Lauterbach.

Butler County—E. B. Hodges, E. Grace Rait, A. C. Fuller, Edwin Barlow Evans, Julia A. Robinson, C. F. Pye, Dr. Jeanette Throckmorton.

Calhoun County—Jenette Lewis, Jesse H. Newlon, Gertrude Greves Truax, Dr. Newton Wesley Gaines, Theresa Dansdill, Mary D. Reed.

Carroll County—George Galloway, Prof. J. C. McGlade, N. A. Hausel, A. H. Hoffman, Rose M. Parker, E. T. Housh, R. D. Barr, Dr. O. C. Morrison, Rolland Meyers, H. R. Brink.

Cass County—Jennie M. Ward, M. G. Clark, Mrs. Z. C. Thornburg, P. E. McClenahan, L. E. Gibson, Addie J. Maulsby, R. H. Sylvester.

Cedar County—Jane McCormick, Emma Watkins, Theresa Dansdill, H. C. Moeller, Charles Fordyce, W. W. Sweet. Avis Trumba.

Cerro Gordo County—Fred D. Cram, Grace Shields, E. E. Lewis, Blanche Goudy, Frank F. Vasey, James Rea, Katherine Scott.

Cherokee County—Margaret Montgomery, Hon. G. L. McBrien, E. Ruth Pyrtle, P. E. McClenahan, Miss Hastings, Mildred Oliver.

Chickasaw County—Alf O. Vaala, Dr. Charles Fordyce, H. C. Moeller, D. R. Earl, Theresa Dansdill, Grace Shaffer.

Clarke County—Bessie Hart, Ella Ford Miller, Mrs. C. W. Hummell, J. L. McBrien, Paul C. Shelley, Irving Hart, L. L. Caldwell.

Clay County—D. M. Odle, Charles Myerholz, Macy Campbell, J. R. McAnelly.

Clayton County—Carl F. Becker, H. E. Bradford, Theresa Dansdill, Mrs. A. H. Hoffman, Bess Everall, G. W. Hunt, Lucia Roggman, Mrs. Anna Palas.

Clinton County—C. E. Cozzens, Elliot R. Downing, William S. Gray, Katherine Martin, J. L. McBrien.

Crawford County—F. N. Olry, Ernest Horn, Hattie Moore Mitchell, Theresa Dansdill, C. A. Fullerton.

Dallas County—May A. Hills, C. A. Fulmer, Dean S. Weir, Mrs. Clara Watkins, Miss Emma Watkins, Dr. E. A. Schell, Superintendent Lindeman, Miss Whinery, Mrs. Ward Snider.

Davis County—H. C. Brown, Arthur MacMurray, Josephine Lary, E. B. Evans, G. H. Brinegar.

Decatur County—Kate L. Hull, Dr. Wm. F. Russell, Theresa Dansdill, Ira S. Condit, Arthur MacMurray, J. Adam Puffer, W. A. Price, Mida Bradley.

Delaware County—W. A. Ottilie, Dr. A. E. Winship, D. R. Earl, G. W. Sampson, H. C. Moeller, Dr. J. F. Hinkhouse, Anna Maud Earhart, Chas. F. Pye, Captain Waterman.

Des Moines County—Vail Cordell, E. E. Van Cleve, E. M. Sipple, Alta McIntire, R. H. Bracewell, W. A. Dunlavy.

Dickinson County—Frank S. Willey, S. H. Buntley, M. G. Clark, Edith Countryman, Mrs. E. B. Wilson, O. R. Arrington, R. A. Johnson, W. J. Knobbs, John R. Lange, Barton Morgan, Norman Norland.

Dubuque County—Joseph Flynn, L. D. Coffmann, Theresa Dansdill, F. G. Sampson, A. C. Fuller, Anna Jess, Payson Berg, Franz Otto.

Emmet County—Marie Sorum, M. R. Fayram, A. C. Fuller, C. E. Avis, Edith Countryman, Fred D. Cram, F. H. Sunderlin, Clare Moe.

Fayette County—N. J. Breckner, C. P. Colegrove, H. P. Smith, Mrs. Elizabeth P. Hunt, W. G. Clark, Emma Griesel, Chas. F. Pye, Theresa Dansdill, Agnes O'Brien, A. W. Moore.

Floyd County—Mary D. Korinke, C. A. Fullerton, Blanche Goudy, Claude F. Brown.

Franklin County—Harry J. Henderson, C. P. Colegrove, C. H. Myerholz, Ella Ford Miller, H. L. Cecil, B. W. Hoadley, M. M. Miller, Mrs. Blanche Bigger.

Fremont County—Edith M. Anderson, Jeanette Kling, C. A. Fulmer, M. G. Clarke, Irving H. Hart, L. V. Koos.

Greene County—H. C. Roelofsz, Irene Hirsch, E. E. Lewis, Dean W. F. Barr, R. A. Morris, C. A. Fullerton.

Grundy County—D. R. Earl, John E. Stout, N. W. Gaines, C. A. Fullerton, Effie Schueman, Zaroohi Merrobion.

Guthrie County—Mrs. Mary L. Boggs, J. C. McGlade, Macey Campbell, C. A. Fullerton, Mrs. Ella Ford Miller, C. E. Avis.

Hamilton County—E. F. Snow, J. E. Stout, J. L. McBrien, Anna D. Cordts.

Hancock County—Dr. Edwin T. Starbuck.

Hardin County—Blanche Stoddard, Jeanette Hart, F. J. Hokin, Grace Shields, J. W. Jarnagin, A. S. Keister, I. S. Meyer, Edgar R. Harlan.

Harrison County—Marie E. Cave, Ella Ford Miller, Richard Ernesti, Dean William Russell, Dean McProud, Charles S. Cobb.

Henry County—Carolyn Campbell, A. C. Fuller, Howard R. Driggs, Henry S. Curtis, E. J. Ashbaugh.

Howard County—Mira B. Buck, Wm. F. Russell, H. L. Eels, Lenore B. Shanewise, Mr. Bristol, C. F. Pye.

Humboldt County—Clarence Messer, J. C. McGlade John C. Foster, Ida Fesenbeck, Ernest Horn.

Ida County—J. C. McGlade, Sara Rice, H. C. Moeller, Mrs. Ella Ford Miller.

Iowa County—G. A. Yoarcam, R. A. Folk, Jeanette Kling, G. W. Samson, Ida Huglin.

Jackson County—E. R. Stoddard, J. C. McGlade, D. R. Earl, Wm. F. Russell, Chas. Meyerholz.

Jasper County—Lucy E. Hall, Dr. Ernest Horn, H. F. Smith, Carrie E. Miles, Blanche R. Smith, D. M. Kelly, Ella Ford Miller.

Jefferson County—June Chidester, P. E. McClenahan, Dr. Henry Curtis, A. C. Fuller, Mrs. Gertrude Lungren, Emma Watkins, Dr. Howard Driggs, E. J. Ashbaugh, C. F. Garrett, Dean MacDonald.

Johnson County—N. E. Hessenius, P. E. McClenahan, G. N. Merry, E. E. Lewis, Martha Powell, J. L. McBrien, Captain Waterman.

Jones County—Nellie V. Morey, Dr. F. C. Ensign, Prof. Macy Campbell, Eva May Luse, Anita Naomi Stevens, Laura P. Krebs, James H. Harris, Miss Park, Miss Wheeler, Captain Waterman.

Keokuk County—Harry S. McVicker, Peter Luteyn, W. Dean McKee, Hope Nunamaker, J. H. Beveridge, P. E. McClenahan.

Kossuth County—Wm. Shirley, J. F. Overmyer, Lucia Wallace, Minnie J. Coate, Anna D. Cordts, John E. Foster, Dean W. F. Barr, C. E. Avis.

Lee County—E. C. Lynn, H. E. Bradford, Cora Mel Patton, J. E. Ashbaugh, Capt. E. L. Waterman, Hon. J. L. McBrien.

Linn County—Lulu B. Secrist, Blanche Goudy, Superintendent Vasey, Dr. W. S. Gray, Dr. Henry Curtis, Emma Beenk, Alice Inskeep, Dr. Charles Fordyce, Prof. Risser Patty.

Louisa County—Myrtle Jamison, Dean Samuel Weir, J. C. McGlade, Irving H. Hart, Wm. A. Dunlavy, V. M. Harsha, Mayme Lee Evans, Maud Warren.

Lucas County—Myrtle A. Dungan, G. M. Clark, Macy Campbell, Emma Watkins, Paul Shelley, Ethel Simpson.

Lyon County—E. T. Gilman, J. L. McBrien, W. H. Clemmons, Grace G. Truax, Z. C. Thornburg, Rena Gilman, Roy W. Eaton.

Madison County—Carrie E. Ludlow, F. E. Ensign, A. C. Fuller, Jr., Macy Campbell.

Mahaska County—Erma L. Krout, P. E. McClenahan, J. C. McGlade, James M. Matheny, Blanche Goudy, E. L. Waterman.

Marion County—Mae Goldizen, J. E. Foster, Louise B. Weaver, Ernest Horn, Sarah Hollister, C. E. Fullerton, Mrs. F. E. Whitley, J. M. Davis.

Marshall County—C. E. Shutt, Blanche Goudy, A. Palmer, Mary Gregg, C. A. Fullerton.

Mills County—George E. Masters, M. G. Clark, I. H. Hart, L. V. Koos, C. A. Fulmer, Jeanette Kling, J. H. Beveridge.

Mitchell County—George H. Sawyer, Ralph Lewis, Fred A. Cram, Lenore Shanewise, Blanche Goudy, Victor H. Ries, Estie Boddy, M. Anita Yates, A. M. Vance.

Monona County—Ella M. Gardner, A. C. Fullerton, Macy Campbell, Carrie Neidemeyer, Theresa Dansdill, C. A. Fulmer.

Monroe County—Harry D. Kies, Blanche Goudy, Louise Morris, P. E. McClenahan, J. C. McGlade, A. E. Bennett.

Montgomery County—Elizabeth Hugus, J. H. Beveridge, Dr. C. A. Fulmer, Prof. I. H. Hart, Dr. Herbert Martin, Jeanette Kling, Dr. L. D. Coffman, Chas. F. Pye.

Muscatine County—E. D. Bradley, J. L. McBrien, May E. Francis, L. L. Caldwell, Elizabeth A. Bowers, Lucille Baker.

O'Brien County—J. J. Billingsly, C. W. Wassam, J. C. McGlade, Ora K. Smith, S. H. Buntley.

Osceola County—Mary E. De Boos, C. A. Fullerton, Dr. A. E. Winship, Dr. E. J. Ashbaugh.

Page County—Agnes Samuelson, C. A. Fulmer, Jeanette Kling, L. D. Coffman, I. H. Hart, Chas. F. Pye, Helen S. Hartley.

Palo Alto County—Florence Underwood, Cora Mel Patton, J. M. Matheny, C. I. Bixler, Helen Willard, Edith S. Countryman.

Plymouth County—S. T. Nevein, M. G. Clark, Effie Schuneman, J. E. Stout, N. W. Gaines, Dr. Charles Fordyce, Ruth M. O'Reilly.

Pocahontas County—Grace D. Bradshaw, Macy Campbell, J. C. McGlade, C. W. Wassam.

Polk County—Mrs. A. H. Hoffman, Z. C. Thornburg, E. E. Lewis, John E. Stout, C. F. McFarland, C. F. Becker, George Galloway, Dr. Ernest Horn, Grace Storm, Miss Hayden.

Pottawattamie County—Combined with Southwestern Iowa Teachers' Association.

Poweshiek County—Estelle Coon, H. A. Green, Edwin B. Evans, Theresa Wild, Eva M. Luse, Louis D. Hartson, Leslie I. Reed, Effie Schuneman.

Ringgold County—Louise Askren, J. Adams Puffer, Arthur MacMurray, I. S. Condit, W. T. Russell, Theresa Dansdill.

Sac County—P. A. Lauterbach, Z. C. Thornburg, M. R. Fayram, Charles H. Meyerholz, John R. Slacks, A. E. Harrison, Mrs. S. E. Hollister, Eva Kurtz.

Scott County—Henry E. Ronge, Macy Campbell, Chas. H. Meyerholz, E. Grace Rait, Elizabeth Burney.

Shelby County—Rose M. Parker, M. G. Clark, Mrs. C. W. Hummell, H. E. Bradford, Miss Andrews, Irma Gillette.

Sioux County—Chas. H. Tye, Macy Campbell, George Galloway, S. H. Buntley, Ethel R. Taylor, Irene Hirsh, Joe Whiting, I. M. Stubbart, George Kellogg, M. G. Clark, J. C. McGlade.

Story County—Maude Wakefield, A. Holmes, C. P. Colgrove, P. E. McClenahan, L. F. Stoddard, Mrs. S. E. Hollister, Miss Mullen, Helen Hartley, William Gray, W. F. Russell, C. E. Avis.

Tama County—Mary A. Richards, William Curtis, Charles Fordyce.

Taylor County—Allie Nelson, J. C. McGlade, Theresa Dansdill, M. G. Clark.

Union County—Nancy M. Bell, C. A. Fullerton, G. W. Samson, Lenora Shanewise, John Stout.

Van Buren County—H. B. Carroll, L. D. Hartson, Emma Watkins, E. B. Evans, John E. Foster, J. M. Stoke, A. T. S. Owen, J. C. Calhoun.

Wapello County—R. L. Gardner, J. L. McBrien, Edwin Starbuck, C. W. Wassam, Bonnie Andrews, Theresa Dansdill.

Warren County—Dr. Ernest Horn, Dr. Howard R. Driggs, Edith Whitcombe, D. R. Earl.

Washington County—Kathryn Z. Montgomery, Glen N. Merry, E. Grace Rait, Asa M. Royce, Geo. E. Masters, Chas. H. Meyerholz, P. E. McClenahan.

Wayne County—Ava Amenell, J. C. McGlade, L. L. Caldwell, Irene Hirsh, Mrs. A. H. Hoffman.

Webster County—Anna A. Johnson, Annie L. Gibson, Ida Huglin, C. W. Wassam, John E. Stout, C. Benson, Charles Flint, Elsie Wygant.

Winnebago County—Jessie M. Parker, J. C. McGlade, Glenn N. Merry, Harry E. Bradford, Emma Watkins.

Winneshiek County—H. E. Miller, Superintendent Shawky, Hon. Lee Driver, Mrs. Craswell, R. W. Eaton.

Woodbury County—Dr. C. A. Fulmer, Dr. E. Horn, Clara O. Wilson, Dr. F. E. Mossman, M. G. Clark, Theresa Dansdill.

Worth County—O. L. Varland, R. R. Lewis, Fred D. Cram, C. S. Robbins, Julius Boraas, C. E. Avis, Sofie Hammer, Professor Evans, Edith S. Countryman.

Wright County—Blanche Bock, C. W. Wassam, E. E. Evans, Sara F. Rice, Neal S. Knowles, C. H. Brown.
