STATE OF IOWA
1922

THIRTEENTH BIENNIAL REPORT

OF THE

BOARD OF CONTROL

OF

STATE INSTITUTIONS

For the Period Ending June 30, 1922

Published by
THE STATE OF IOWA
Des Moines

LETTER OF TRANSMITTAL

Honorable N. E. Kendall, Governor, and the General Assembly
of Iowa:

In compliance with the provisions of Section 2727-a12, supplement to the code of 1913, the Board of Control of State Institutions has the honor to present herewith its Thirteenth Biennial Report for the period ending June 30, 1922.

Respectfully submitted,

J. H. STRIEF, Chairman
A. M. McCOLL,
J. B. BUTLER

Board of Control of State Institutions, Des Moines, Iowa, November 15, 1922.

BOARD OF CONTROL OF STATE INSTITUTIONS

State House, Des Moines, Iowa

MEMBERS AND OFFICERS OF THE BOARD

J. H. STRIEF, Chairman.....Sioux City
A. M. McCOLL.....Woodward
J. B. BUTLER.....Fort Dodge
E. J. HINES, Secretary.....Anamosa

Office Force

H. F. LIEBKE.....State Architect
H. J. LIEBKE.....Draftsman
ANDREW OLSON.....Draftsman
H. L. SHROPSHIRE.....Purchasing Agent
R. R. BOVEY.....Accountant
J. F. BURKE.....Assistant Accountant
MILDRED RUFFNER.....Assistant Accountant
MABEL BRISTOL.....Statistician
GRACE BURLINGHAM.....Estimate Clerk
CELIA HAYES.....Parole Clerk
CORA E. BUNCE.....File Clerk
LILLIAN ROTHSCHILD.....Stenographer
ALICE COLLINSON.....Stenographer
ANNE SCARBROUGH.....Stenographer
LENOXA KIERNAN.....Stenographer
VERA POTTER.....Stenographer
ELIZABETH GEER.....Stenographer
O. D. SYKES.....Storekeeper and Clerk

M. N. Voldeng, M. D., Superintendent	
State Penitentiary.....	Fort Madison
T. P. Hollowell, Warden	
Men's Reformatory.....	Anamosa
J. N. Baumel, Warden	
Women's Reformatory.....	Rockwell City
Lena A. Beach, M. D., Superintendent	

REPORT OF THE BOARD OF CONTROL

GENERAL STATEMENT

The following changes occurred in the personnel of the board during the biennial period ending June 30, 1922:

W. D. Shecan completed the unexpired term of the late J. H. McConlogue, June 30, 1921.

J. B. Butler, of Fort Dodge, was selected by the Governor and the General Assembly to succeed him. Member Butler assumed the duties of office July 1, 1921.

The opening of the State Juvenile Home at Toledo, September 1, 1920, increased the number of institutions under the management and control of this board from fifteen, as shown in our previous report, to sixteen.

The State Hospital for Inebriates reported closed in the last report was on the 8th day of June, 1921, leased to the United States Government. The proceeds collected in rentals on buildings and land in connection with this institution will be referred to more in detail elsewhere in this report.

At the time this property was leased to the federal government an option to purchase within five years was given if the government so desired. This was accepted and the purchase price set at two hundred thousand dollars (\$200,000.00). The State Hospital for Inebriates for which the state had no further use passed into the hands of the government during June, 1922, to be used as a hospital for the care of disabled veterans of the World War.

The population of the institutions under control of this board increased greatly during the period just ended, especially at the penal institutions, which show a larger population than at any time since they were established.

POPULATION OF INSTITUTIONS

The average daily population of the several institutions under the control of the board since June 30, 1920, is shown by the following table:

Institutions	Male	Female	Total
Soldiers' Home.....	374	338	612
Soldiers' Orphans' Home.....	264	146	410
Juvenile Home.....	27	46	73
Institution for Feeble-minded Children.....	738	758	1,496
State Sanatorium.....	161	124	285
Training School for Boys.....	371	271	642
Training School for Girls.....	176	178	354
Mount Pleasant State Hospital (Insane).....	651	635	1,286
Independence State Hospital (Insane).....	627	544	1,171
Clarinda State Hospital (Insane).....	625	519	1,144
Cherokee State Hospital (Insane).....	671	661	1,332
State Hospital and Colony for Epileptics.....	173	172	345
Mount Pleasant State Hospital (Infirmary).....	4	5	9
Independence State Hospital (Infirmary).....	567	567	1,134
State Penitentiary.....	798	788	1,586
Men's Reformatory.....	71	71	142
Women's Reformatory.....			
Totals.....	6,067	5,830	11,897

Population at each institution at the end of the fiscal year, June 30, 1922, was as follows:

Institutions	Male	Female	Total
Soldiers' Home.....	312	277	589
Soldiers' Orphans' Home.....	264	137	401
Institution for Feeble-minded Children.....	738	759	1,497
State Sanatorium.....	119	123	242
Juvenile Home.....	74	62	136
Training School for Boys.....	362	262	624
Training School for Girls.....	176	178	354
Mount Pleasant State Hospital (Insane).....	674	649	1,323
Independence State Hospital (Insane).....	662	577	1,239
Clarinda State Hospital (Insane).....	707	599	1,306
Cherokee State Hospital (Insane).....	705	591	1,296
State Hospital and Colony for Epileptics.....	212	208	420
Mount Pleasant State Hospital (Infirmary).....	19	19	38
Independence State Hospital (Infirmary).....	34	34	68
State Penitentiary.....	792	752	1,544
Men's Reformatory.....	862	822	1,684
Women's Reformatory.....		112	112
Totals.....	6,558	4,950	11,508

APPOINTMENTS BY THE BOARD

During the biennial period just ending there were two changes in the executive heads of the institutions under the control of this board, and three reappointments.

In August, 1920, J. R. Perkins, who had been warden of the State Penitentiary at Fort Madison for almost five years, tendered his resignation. Major T. P. Hollowell, of Fort Madison, was selected by the board of control to fill the unexpired term of Warden Perkins and began his service for the state on August 16, 1920.

W. L. Kuser, who had been in the service of the state for twenty years as instructor, assistant superintendent and superintendent at

the Training School for Boys, tendered his resignation February 9, 1922, to accept a similar position with the State of Oregon. O. S. Von Krog, who had for several years been superintendent of schools at Iowa Falls, was selected to fill the unexpired term of Superintendent Kuser, and assumed the duties of office February 9, 1922.

Lena A. Beach, M. D., was reappointed as superintendent of the Women's Reformatory at Rockwell City May 1, 1922, for a term of four years.

Max E. Witte, M. D., was on May 1, 1922, reappointed as superintendent of the Clarinda State Hospital.

R. A. Stewart, M. D., who was appointed superintendent of the Independence State Hospital June 15, 1920, to complete the unexpired term of W. P. Crumbacker, deceased, was on May 1, 1922, reappointed for a term of four years.

INSTITUTION EXECUTIVE OFFICERS.

Chas. N. Martin.....	Inspector	Juvenile Home.....	Term indefinite

STATE AGENTS

During the last biennial period the state agents have been unusually active and the work has been highly satisfactory. The addition of two agents during the former period materially aided in the efficiency of the work.

Unusual conditions prevailed almost all of the time, making this work much more difficult. Proper homes were more difficult to

find. Agents found many applicants more desirous of securing wards for what they could temporarily earn for them, rather than for the purpose of giving them a permanent home, and more care had to be exercised in placing children in the homes. The activity and efficiency of all the agents and the interest manifested in their work is considered by the board to be responsible for the excellent results obtained.

The seven agents in charge of this work at the beginning of the period had 1380 children under their supervision. During the period they received 890, making a total of 2,270 children under the direct supervision of the state agents during the period. Of this number 1,184 were discharged, leaving 1,086 under the care of state agents on June 30, 1922.

During the two-year period 899 applications for children were received; 3,802 children were visited; and 1,126 homes were investigated. In doing this work the state agents traveled 230,276 miles, the total expense being \$14,644.81, which includes hotel bills and other items of expense in connection with this work.

The work of the state agents to be successful requires mature judgment, high character and a heart interest in the boys and girls. Results obtained certainly prove the efficiency of the state agent plan as a sure means of keeping down the population at the institutions which they represent.

During the period ending June 30, 1922, sixteen women were paroled from the Women's Reformatory, Rockwell City. They are also under the supervision of a state agent until discharged.

INSPECTOR OF COUNTY HOMES AND PRIVATE INSTITUTIONS

This work has been carried on extensively by Charles N. Martin, inspector in charge.

County homes and private institutions where insane persons are kept are visited semiannually by the inspector, who reports to the board of control any irregularities that may exist in connection with the care and treatment of patients.

The boards of supervisors of the various counties throughout the state, as well as the supervisors of privately owned institutions, have been very prompt in complying with suggestions and recommendations made by this department relative to bettering conditions at the institutions over which they have supervision.

We are grateful for their cooperation in this line of work.

STATE INSTITUTIONS UNDER THE CONTROL AND MANAGEMENT OF THE BOARD OF CONTROL OF STATE INSTITUTIONS. THE EXECUTIVE OFFICER OF EACH AND THE PROCEDURE WITH REFERENCE TO ADMISSIONS, PAROLES AND DISCHARGES

1. *Soldiers' Home, Marshalltown, B. C. Whitehill, Commandant.*

This home is for the care of soldiers and their wives. For admission apply directly to the commandant for application blanks. The applicant (unless he enlisted from Iowa) must have resided in the state three years continuously previous to the date of making application.

2. *Soldiers' Orphans' Home, Davenport, F. S. Treat, Superintendent.*

Children may be admitted by court commitment or by order of the board of supervisors of the county where the children have residence. This home is intended particularly for the care of soldiers' orphans, although other orphaned and destitute children are received and cared for. All children are subject to placement, and those who are not returned to their homes or the homes of relatives or friends, are placed as soon as suitable homes can be found for them by the state agents, where they remain under the agent's supervision until they are twenty-one years of age.

3. *State Juvenile Home, Toledo, A. E. Kepford, Superintendent.*

This institution is for dependent, neglected, delinquent, or destitute children and admission is by court commitment, or upon application to the board of supervisors in the county where the child resides. All admissions must be approved by the board of control. Children are received between the ages of four and fifteen years and are subject to placement when suitable homes are found for them by state agents under whose supervision the children remain until they are discharged, or are adopted by persons with whom they have been placed.

4. *Institution for Feeble-minded Children, Glenwood, George Mogridge, M. D., Superintendent.*

Admission to this institution is by court commitment as provided by chapter 356 of the acts of the thirty-eighth general assembly. There is no restriction as to age.

5. *State Sanatorium for the Treatment of Tuberculosis, Oakdale, H. V. Scarborough, M. D., Superintendent.*

Application for admission should be made to the superintendent of the sanatorium, who will furnish admission blanks. When the blanks are received, the applicant should carefully fill them in, especially the one calling for the report of the family or attending physician, and return the blanks to the superintendent. Upon receipt of the application blanks, if approved for admission, the superintendent will advise the applicant when he can be received.

6. *Training School for Boys, Eldora, O. S. Von Krog, Superintendent.*

7. *Training School for Girls, Mitchellville, Lucy M. Sickels, Superintendent.*

Commitments to the training schools are made by the juvenile or district courts. Boys and girls are received between the ages of ten and eighteen years. When they have completed their training they are placed in homes on parole, where they remain under the supervision of state agents until they are discharged or returned to the school.

8. *Mount Pleasant State Hospital, Mount Pleasant, M. C. Mackin, M. D., Superintendent.*

9. *Independence State Hospital, Independence, R. A. Stewart, M. D., Superintendent.*

10. *Clarinda State Hospital, Clarinda, Max E. Witte, M. D., Superintendent.*

11. *Cherokee State Hospital, Cherokee, George Donohoe, M. D., Superintendent.*

Commitments to hospitals for the insane are made by the commissioners of insanity in the county where the patient resides. The commission has three members. The law requires that the clerk of the district court of the county be one member, the other two members being appointed by the district judge, one of whom must be a practicing attorney and the other a physician.

Paroles are granted by the Board of Control of State Institutions upon recommendation of the superintendent of the hospital with the consent of the commissioners of insanity, and are for a period of one year, at which time if the patient has not been returned to the hospital, he is discharged or the parole is extended for a longer period.

When application is made for the discharge of a patient, the patient must return to the hospital to be examined, or may be examined by the commissioners of insanity or by a reputable physician. If examined by the commissioners of insanity, or physician, a statement of their findings must be sent to the superintendent of the hospital, and upon receipt by the superintendent, if favorable, he makes his recommendations to the board of control, which board discharges the patient as cured or not cured, as the case may be.

12. *State Hospital and Colony for Epileptics, Woodward, M. N. Voldeng, M. D., Superintendent.*

Patients may be admitted voluntarily, although commitment by the commissioners of insanity or the court in the county where the patient resides is much preferred. This institution was established especially for the care and treatment of epileptics, but on account of the overcrowded condition at the Institution for Feeble-minded Children, Glenwood, the thirty-ninth general assembly enacted a law which provides that feeble-minded may also be received. Procedure with reference to commitment of the feeble-minded is the same as at Glenwood. Paroles for epileptics are granted by the board of control upon application of relatives or friends with the recommendation of the superintendent and the consent of the commissioners or the court committing them.

13. *State Penitentiary, Fort Madison, T. P. Hollowell, Warden.*

14. *Men's Reformatory, Anamosa, J. N. Baumel, Warden.*

15. *Women's Reformatory, Rockwell City, Lena A. Beach, M. D., Superintendent.*

When persons convicted of crime are sentenced by judges of the various courts throughout the state, men between the ages of eighteen and thirty are usually sent to the Men's Reformatory. There is also a building for criminal insane at this institution. Persons sentenced to death, or life imprisonment, and the older class of criminals are committed to the State Penitentiary.

All females over sixteen years of age convicted in any court in this state, if imprisonment is imposed, may be committed to the Women's Reformatory; also girls between the ages of twelve and sixteen years when convicted of offenses punishable by life imprisonment, when so ordered by any court in the state.

Pardons from the penal institutions are granted only by the governor.

Paroles from the Men's Reformatory and the State Penitentiary are granted by the Board of Parole. Paroles from the Women's Reformatory are granted by the Board of Control of State Institutions.

The length of time persons serve before their cases are considered for parole depends largely upon the nature of the crime committed and the term of sentence.

MORE BUILDINGS REQUIRED

On account of the large increase in population at a number of the institutions under the control of this board, more buildings will be absolutely necessary. We wish especially to call your attention to the four hospitals for the insane, and the institutions caring for the feeble-minded at Glenwood and Woodward.

The thirty-ninth general assembly passed a law making it possible to receive feeble-minded persons at the State Hospital and Colony for Epileptics at Woodward, and about one hundred feeble-minded have been transferred from the Institution for Feeble-minded Children at Glenwood to Woodward.

Both of these institutions are filled to capacity with about three hundred applications on file, waiting for admission. The feeble-minded must be cared for and additional buildings should be provided.

IMPROVEMENTS AND REPAIRS

During the biennial period ending June 30, 1920, it was our aim to curtail as much as possible the building program which had been planned for a number of the institutions.

The cost of materials and labor which advanced greatly during the war period had not returned to normalcy. Conditions, however, changed somewhat with the beginning of this biennial period and we were able to proceed with our building program as outlined, a part of which has been completed at a very reasonable cost to the state, we believe.

Contractors were anxious for work which, together with the reduction in the price of materials, made it possible for us to accomplish in the period just ending that which was impossible with the appropriations we had during the previous period.

We wish to take up each institution separately and give some idea of the improvements made with the funds authorized by the general assembly for expenditure at the various institutions under our control, as follows:

SOLDIERS' HOME, MARSHALLTOWN

Special appropriations amounting to \$47,000.00 were made by the thirty-ninth general assembly for the home at Marshalltown. Of this amount \$45,000.00 was for contingent and repair fund and \$2,000.00 for lectures and amusements.

With the contingent and repair fund extensive repairs have been made to the buildings and grounds in connection with this institution, and plumbing has been renewed in many places.

A new brick garage has been erected for the ambulance and many of the buildings have been replastered and painted.

A new boiler, stoker and ash conveyer have been added to the power house equipment. All steam pipes have been changed, renewed and properly covered.

With the present equipment we do not anticipate any trouble in furnishing power and heat for all of the buildings at the home. Heating the buildings properly during the winter months has been one of our many problems. The porches in connection with the hospital building are in very bad condition at this time. The state architect has prepared plans and specifications for new porches in connection with this building and work on this needed improvement will begin in the near future.

The home is also in need of a water softener for the laundry. We are forced to use water directly from the city mains and whenever fire pressure is put on these mains it is impossible to use the water for several hours afterwards. A softener and filter would eliminate this trouble and enable the laundry to turn out clothes in a clean and presentable condition. The use of softeners and compounds is not only expensive, but very injurious to the clothes.

A coal bunker is also badly needed. Almost all of the coal received at the home has to be stored out of doors, which causes it to deteriorate very fast, especially during the summer months.

The greenhouse is in very bad condition and if not rebuilt will have to be completely overhauled.

On account of the many repairs that will have to be made, we believe that a contingent and repair fund sufficient to make these improvements and care for any unforeseen contingencies that might arise, should be allowed.

SOLDIERS' ORPHANS' HOME, DAVENPORT

The thirty-seventh general assembly authorized the expenditure of \$30,000.00 for a gymnasium building at the home.

On account of the high cost of materials we were unable to construct such a building within the appropriation until the beginning of this biennial period, at which time a contract was awarded and the work carried on to completion. It is a fine addition to the present group of buildings and adds greatly to the appearance of the institution.

The building proper is a one-story structure with full basement, in which is a large swimming pool. The main floor consists of one large room which is fully equipped for all indoor sports. A visit to the home will convince anyone that the boys and girls who are there because they have no homes of their own, greatly appreciate what the state has done for them, not only in the line of amusement, but also for the schooling and training they receive which makes it possible for them in later years to become useful citizens of the community in which they live.

Repairs at the home were light during the period just ending. A new roof was placed on the engine house and the coal shed enlarged. The total expenditures for these repairs amounted to approximately \$4,000.00.

STATE JUVENILE HOME, TOLEDO

The State Juvenile Home authorized and established by the thirty-eighth general assembly and reported under construction in our last biennial report, was completed during the summer and fall of 1920 and opened for the reception and care of dependent, neglected, delinquent or destitute children September 1st of the same year.

The home received its first resident October 14th and at the close of the biennium June 30, 1922, had admitted two hundred twenty-four children.

This home is filling a long-felt need throughout the state in caring for children who are on the border line of delinquency or incorrigibility who are not suitable cases for the training schools or the Soldiers' Orphans' Home.

The per capita cost of maintaining this institution during the first several months of its operation was quite high. Complaints were received from a number of the counties throughout the state relative to the amount charged back to them for the maintenance of the children received from their respective counties. The proportionate share of expense that had to be borne by the counties was one-half of the actual cost in operating and maintaining the institution in connection with the amount so charged. It must be remembered

that the expenses at an institution when first opened must start with zero. The overhead expense in operating the institution with reference to employees would be practically the same in caring for twenty-five children as it would be for two hundred. Since the population has increased the per capita cost has decreased until it now is practically the same as at similar institutions of the state that have been in operation for many years.

A part of the building program as authorized by the thirty-ninth general assembly has been carried out during the period just ended. Other improvements as authorized will be taken up in order and carried on to completion in the near future, for the appropriation as made, \$18,661.41, has been expended for the following buildings:

Superintendent's residence, dairy and horse barn, corn crib and wagon shed, hog house, cattle shed, poultry house and root cellar.

In addition to the above improvements, repairs to buildings, sewer and water lines have been made; cement walks have been laid to connect the main buildings and necessary laundry equipment has been installed.

For some time this home has been filled to its capacity and if the number of commitments continue in the future as in the past, more buildings will be needed to care for this class of children.

INSTITUTION FOR FEEBLEMINDED CHILDREN, GLENWOOD

The thirty-seventh general assembly appropriated \$6,000.00 for the erection of a building to be used for a bakery. This amount was found to be inadequate for the purpose for which the expenditure was authorized. In granting appropriations for this institution, the thirty-eighth general assembly authorized the expenditure of an additional \$35,000.00 to complete the building and purchase equipment necessary to operate it, making a total of \$41,000.00 to be expended. This building now houses several departments in addition to the bakeshop.

On January 20, 1921, a disastrous fire practically destroyed the industrial building and all the contents, causing a loss to the state of approximately \$35,000.00. The thirty-ninth general assembly authorized the expenditure of an amount sufficient to replace this building and equipment. The work has been completed and the building is now in use.

Other improvements at the Glenwood institution during the period just ending are the erecting of a new cold storage plant at a cost of \$5,800.00 and the equipping of the four boilers at the power plant with Palmer grates and Swift stokers. The installation of this

equipment together with other needed repairs to buildings and grounds caused the expenditure of approximately \$15,000.00.

STATE SANATORIUM FOR THE TREATMENT OF TUBERCULOSIS, OAKDALE

With the completion of the medical and laboratory building provided for by the last legislature, which was equipped for occupancy during March, 1922, it is possible to accommodate two hundred ninety patients. This building and equipment cost \$150,750.72 and is the most modern of its kind in the Middle West.

One of the cottages has been remodeled for the reception and care of children. While the number of applications made for the reception of children are few, we believe we should be prepared to receive them promptly.

Our state architect is now preparing plans and specifications for an addition to the hospital building, which was authorized by the thirty-ninth general assembly. The construction of this building will be started and carried on to completion at an early date, as it is urgently needed in caring for advanced cases.

With the appropriation made for tunnel and pipe connections, a tunnel two hundred feet long has been constructed to connect the main building with the tunnel to the heating plant. The unexpended balance in this fund will be used to connect the hospital addition, when completed, to the main heating plant.

At the present time the heating system is being changed from hot water to steam and a vacuum system will be installed which will make it possible to adequately heat all of the buildings at this institution.

The contingent and repair fund of \$30,000.00 has materially aided in making necessary repairs to buildings, which otherwise could not have been made. We believe that repairs made at the proper time save a much larger expenditure of funds later on.

The fund of \$1,000.00 authorized for chaplain, books and amusements was not sufficient to meet the needs in supplying the patients with proper reading matter and entertainment. During the next period, a larger appropriation should be made for this purpose.

The State Sanatorium is without proper quarters for the housing of married employes. In the past they have been quartered in cottages provided for patients, and in other buildings at the institution. We would recommend that several cottages be built especially for these employes. If this is done much of the space now occupied by employes could be utilized for patients.

EDUCATIONAL WORK

At the beginning of the fiscal year just closed, the board of control and the Iowa Tuberculosis Association entered into a joint arrangement for the publication of the "Campaign" to be issued monthly as a magazine of public health, with emphasis upon the prevention of tuberculosis. The board undertook to pay the cost of printing, this work to be done at the Men's Reformatory at Anamosa, and the Iowa Tuberculosis Association agreed to do the editorial work. The "Campaign" reaches monthly a mailing list of eight thousand of the most representative people of the state, including state and local officers of a number of organizations interested in public health, such as women's clubs, commercial organizations, farm bureaus, American Legion, teachers, physicians, libraries, ministers, health workers, nurses, newspapers, etc.

Many requests to be placed on the mailing list have come from state health officers and state health organizations and the National Tuberculosis Association has favorably commented on its contents. Iowa newspapers have frequently copied from it items of general interest relating to public health and tuberculosis. It has contained articles of interest to other departments of the state government, such as the Housing Commission, the State Board of Health, the Department of Public Instruction and the Bureau of Animal Husbandry. Its columns are open as a medium to other departments in matters relating to public health.

One issue was devoted almost entirely to the subject of public health nursing and almost all of the articles were contributed by the director of that division of the State Board of Health. Another special issue contained pictures of all the tuberculosis sanatoria in the state together with practical information regarding them.

During the fiscal year county tuberculosis clinics have been held in twenty-four counties of the state. Eight hundred twenty-two people have been examined for tuberculosis. This does not include nose and throat examinations nor examinations of children for general conditions. Clinics are usually preceded by a week or two of survey work, inspections or visits made by a staff nurse of the Iowa Tuberculosis Association or by the local public health nurse. The clinics perform a threefold purpose. They educate the public regarding the prevention of disease, emphasize the need of periodic medical examination, afford an opportunity for an examination which might not be available otherwise and serve as demonstration clinics for the benefit of local medical groups. They also serve to

detect any cases which ought to be under a physician's observation and care and serve in this way either to effect a cure before it is too late or to prevent the development of disease. Clinics are held on invitation of county medical societies and with the cooperation of the local public health association, Red Cross, visiting nurse association, or Christmas Seal committee.

The staff nurses and executive secretary of the Iowa Tuberculosis Association serve as agents without pay for the board of control and by this means the board is enabled to carry on an educational work.

The board purchased three moving picture films relating to tuberculosis, but of a popular narrative nature and these have been loaned to farm bureaus, Red Cross chapters and county health associations.

The cooperation between the Iowa Tuberculosis Association in its general state work and the Board of Control of State Institutions has been so close that it is difficult to separate the things accomplished, as many of the accomplishments could not have been realized without the assistance of both organizations.

The annual appropriation made by the state to the board of control as its special tuberculosis fund is \$5,000.00. This has been expended as follows:

Cost of printing the "Campaign" and postage.....	\$2,240.73
Films	238.37
Expense conducting clinics.....	1,683.12
Total.....	\$4,162.22

NOTE: The expense of holding clinics and the nursing service directly connected with them from July 1, 1921, to June 1, 1922, was \$6,431.38. Of this amount \$2,678.79 was contributed by local organizations, principally from Christmas Seal funds and partly from Red Cross funds, a portion of which was the result of former Christmas Seal sales; \$1,950.00 was spent by the board of control from its special fund and the deficit of \$2,702.59 was paid by the Iowa Tuberculosis Association from its share of Christmas Seal funds.

TRAINING SCHOOL FOR BOYS, ELDORA

During the biennial period expenditures for improvements and repairs have been light, not because such work was not necessary, but because the school did not have sufficient money in its contingent and repair fund to carry on this work extensively.

With the amount appropriated for this fund, however, we were able to take care of such items of repair as were necessary in the

preservation of the buildings and grounds, although much still remains to be done, both on the interior and the exterior, before the buildings will be in first-class condition.

The thirty-ninth general assembly made an appropriation for the purchase of steam boilers and equipment for the power plant. This improvement has not been made because the boilers could not be purchased and installed for the amount authorized.

We have been receiving through the State Highway Commission at Ames, without cost except for freight charges, a number of boilers that were used at the various army camps throughout the United States. These boilers are complete and in first-class condition. Two of these boilers have been shipped to Eldora but as they are of the low pressure type, the appropriation of \$7,500.00 made by the thirty-ninth general assembly will still be needed, as high pressure boilers are necessary for the power plant.

The appropriation of \$4,000.00 for mangle and laundry equipment remains unexpended with the exception of \$375.00 which was spent for machinery. The mangle and the remainder of the equipment will be purchased in the near future.

All other appropriations were expended as authorized, in whole or in part as necessity required.

TRAINING SCHOOL FOR GIRLS, MITCHELLVILLE

With the appropriations made for this institution for the biennial period just ended, many of the improvements as contemplated have been made. Others are in progress at this time and will be completed in the near future.

The work of remodeling two cottages for which an appropriation of \$20,000.00 was made is well under way, one of the buildings being nearly completed and work on the other one will be started at once. It is expected that these cottages will be ready for occupancy by November 1st.

The chapel, which was damaged by a wind-storm recently, has been repaired and placed in first-class condition. This expense was taken care of from the providential contingent fund.

The water supply at the training school has been inadequate for some time, making it necessary to connect with the Mitchellville city waterworks. The pumps, as well as all pipe lines, which have been in use have been removed and as soon as all necessary repairs are made they will be replaced. We hope the water supply will then be sufficient to meet the demands of the school.

A new boiler has been placed in the power plant, also a new engine and a new generator. The old engine, which has been in use for a number of years, has become badly worn and was practically beyond repair. Extensive repairs have also been made in connection with the heating plant. An ice plant of one-half ton capacity was installed at the school last year, but this proved to be inadequate for the needs of the institution, and the plant has been increased to a two-ton capacity.

The septic tank, which was very much in need of repairs, has been remodeled and resoldered. A hollow tile floor has been laid in the new root cellar, which was necessary for the preservation of vegetables for winter use.

MOUNT PLEASANT STATE HOSPITAL, MOUNT PLEASANT

Only two improvements with reference to buildings were made during the biennial period. The new laundry building and equipment for which the thirty-seventh general assembly appropriated \$30,000.00 has just been completed. On account of the high cost of materials and labor, it was impossible to construct this building within the appropriation as made until this year.

The remodeling of the building for the housing of employes has been completed. The amount expended for these two improvements was approximately \$45,000.00.

The new stokers were installed at a cost of \$4,390.00; also one new 500 horse power boiler and new grates at a cost of \$10,457.90.

The administration building was replastered and painted, as were several of the wards. New floors were laid in a number of the wards for female patients. Roofs on two buildings have been replaced and the foundation for the new blacksmith shop, for which an appropriation of \$3,000.00 was made, has been finished and the superstructure will be completed very soon. The first buildings at this hospital were erected sixty-four years ago and it is the oldest institution of its kind in the state. It requires constant repairs and improvements. In view of this fact, a liberal appropriation should be made for the contingent and repair fund by the fortieth general assembly, in order that all the buildings at this institution may be placed in first-class condition.

Women addicted to the excessive use of drugs and liquor are received at this institution for care and treatment. During this biennium eighteen patients have been committed by the various courts throughout the state, and of this number one-half are out on parole.

INDEPENDENCE STATE HOSPITAL, INDEPENDENCE

The hospital building for patients afflicted with tuberculosis, for which the thirty-seventh general assembly appropriated \$40,000.00, was not completed until during this period. The amount appropriated was not sufficient to erect such a building, and the thirty-ninth general assembly authorized the expenditure of an additional \$15,000.00, which made it possible to proceed with the work as outlined and carry it on to completion.

It is a two-story structure with full basement and is strictly fire-proof throughout. The addition of this hospital building, which will be ready for occupancy on or about July 1, 1922, will greatly relieve the overcrowded condition that has existed at Independence for some time past, and will enable the state to properly care for tubercular patients in a building by themselves, thus eliminating danger of transmitting this disease to other patients cared for in this hospital.

The work on drainage district No. 2 of Buchanan county is being completed under the supervision of the board of supervisors and the county engineer of Buchanan county. The thirty-seventh and thirty-ninth general assemblies appropriated \$10,000.00 for the state's portion of the cost of this drainage district. Notice filed in the office of the board by the county auditor of Buchanan county shows that the state's portion of this tax is \$9,462.13. While the expense to the state seems to be large, we believe that the land benefited will repay the state many times in productiveness.

The barn for young stock, for which the thirty-ninth general assembly appropriated \$3,500.00, has been completed. The material was purchased by the state and the building constructed by institution labor under the supervision of the head carpenter. This building was very much needed and has all the conveniences for caring for young stock.

The water supplied from the institution wells has for some years been inadequate for the needs of the Independence State Hospital and it was necessary to purchase a large quantity of water yearly from the town of Independence. This was quite expensive and the arrangement was not entirely satisfactory. To eliminate this expense and secure for the institution an adequate water supply, two additional wells have been drilled on the state's property, the total cost for this improvement approximating \$3,000.00. In years to come this will mean a very large saving to the state.

During the biennial period extensive repairs and improvements have been made to a number of buildings at this institution. Walls have been redecorated and hard wood floors laid in wards A, F, J, K, L, M, 1, 2, and 3. New linoleum has been laid in the halls of wards A, D, E, G, P, R, S, 1, 14, 15 and 16. Drinking fountains have been placed on a number of the wards. Steel doors were placed on ward 13, which is occupied by inebriates. A new mangle was installed in the laundry and many other repairs, both interior and exterior, have been made that were necessary for the preservation of the buildings.

Chapter 187 of the acts of the thirty-ninth general assembly provides for the commitment, detention, care and treatment of persons addicted to the excessive use of drugs and intoxicating liquors. Immediately after the passage of this act a ward was set aside and equipped at the Independence State Hospital for the reception and care of this class of patients. Since the opening of this ward eighty-seven male patients have been committed by various courts throughout the state. Approximately fifty per cent of these patients received at Independence have escaped. This is due to the fact that the ordinary hospital ward is not properly constructed to care for this class of patients, and we recommend that if male inebriates are to be received at this institution that a custodial building be erected in order that patients committed as provided in the above-mentioned chapter may be detained until the expiration of their sentence or until their release has been otherwise ordered either by parole or by discharge.

CLARINDA STATE HOSPITAL, CLARINDA

The thirty-ninth general assembly appropriated an additional \$15,000.00 to complete the hospital for tubercular cases at the Clarinda State Hospital, for which the thirty-seventh general assembly appropriated \$40,000.00. With the amount of money authorized to be expended for this purpose April 27, 1917, we were unable to build a hospital of sufficient size to care for all tubercular patients at this institution, but were able to erect a building large enough to care for all women patients.

With the unexpended balance of the appropriation of the thirty-seventh general assembly and the additional \$15,000.00 appropriated by the thirty-ninth general assembly we expect to construct a similar building for men patients, which when completed will enable us to give this class of patients the care and attention they should have, separate and apart from other patients who are free from this disease.

With the appropriation made by the thirty-seventh general assembly for a dairy barn, we were able to construct the main building and one wing at a cost of \$11,829.38. A sufficient amount should be appropriated to erect the other wing, which is needed to care for the large dairy herd at this institution.

Necessary repairs to buildings at the Clarinda State Hospital during the biennial period were as follows:

New tile floor and wainscoting have been placed in the bake shop. It was necessary to install a new oven in the bake shop. The old one had been in use for many years and was no longer suitable for the needs of the hospital with its present population.

Weather strips have been placed on all windows of the main hospital building. The windows had become loose in the frames which allowed much cold to enter. This improvement was considered absolutely necessary by the board and will mean quite a saving in coal in the heating of the main building.

The laboratory was refloored and a coal crusher installed in the power house.

The total cost of the last five items consisting of equipment and repair work amounts to \$11,899.20, all of which was paid from the contingent and repair fund appropriated for this institution.

CHEROKEE STATE HOSPITAL, CHEROKEE

Of the appropriations made for the Cherokee State Hospital, the following expenditures have been made:

Paving of the River-to-River road adjacent to the hospital grounds completed at a cost to the state of \$38,843.45.

The amount appropriated by the thirty-seventh and thirty-eighth general assemblies for a new water supply was used as contemplated. The project has been completed at a cost of approximately \$65,000.00.

Appropriations were made by the thirty-ninth general assembly for a new dairy barn, an abattoir and a root cellar. These buildings have been completed and are now in use.

The heating plant had not been working satisfactorily for some time, and some changes were made. Although one new boiler and a stoker were installed the trouble still existed. This plant is now being completely overhauled and we expect to have it in first-class condition in the very near future.

This institution being the latest in hospital buildings for the insane constructed in this state, repairs were not so expensive as at some of the older institutions.

STATE HOSPITAL AND COLONY FOR EPILEPTICS, WOODWARD

The thirty-seventh general assembly appropriated \$75,000.00 for two dining halls and kitchen, and \$20,000.00 for a cottage for tubercular patients. An appropriation of \$15,000.00 additional for dining halls and kitchen was made by the thirty-eighth general assembly. With these appropriations it was impossible to erect these new buildings, so it was decided by the board members to combine these three appropriations and erect a custodial building including all of the items mentioned in the above appropriations. This building was completed during the spring of 1921 and consists of four large open dormitories for tubercular patients, one kitchen and two large dining halls. In the erection of this building the entire amount of the above appropriations was used.

The water supply for which the thirty-eighth and thirty-ninth general assemblies appropriated \$82,000.00 has been completed. The pumping station is located on the Des Moines River about three miles from the hospital. The installation of this system, although it required an expenditure of a large amount of money, was considered absolutely necessary to insure the institution of a sufficient supply of pure water at all times. The plant has been in operation about two months and has proven satisfactory in every way. The total cost of this improvement, exclusive of land, was approximately \$75,455.57.

The new chapel and school building has been completed and will be ready for occupancy soon. This building was erected at a cost of \$31,366.23, which includes heating and plumbing.

The new horse barn, for which the thirty-seventh general assembly made an appropriation of \$6,000.00, was completed during this period; also the dairy barn and the root cellar for which appropriations totaling \$10,500.00 were made by the thirty-ninth general assembly. These two buildings last mentioned were combined, as the appropriations were insufficient to erect them separately, the basement being used for the root cellar and the main floor for stock.

Work has commenced on the employes' building, for which an appropriation of \$45,000.00 was made. This building will probably be ready for occupancy by November 1st.

The thirty-ninth general assembly created a department for feebleminded at this institution. With transfers made from Glenwood and commitments made by the various courts throughout the state, this department is now caring for more than one hundred feebleminded children.

STATE PENITENTIARY, FORT MADISON

The appropriations made by the thirty-ninth general assembly authorized an expenditure of \$100,000.00 for a new cell house and equipment.

Excavation for the foundation of a new building had just begun when a disastrous fire occurred inside the walls surrounding the penitentiary and destroyed the chair factory. On account of the large number of unfilled orders on hand and the increased demand for chairs, the board decided to rebuild the factory at once.

Convict labor is being used in the construction of the new cell house and the chair factory and in order to rush the factory building to completion at as early a date as possible, all available prison labor was placed on the rebuilding of the factory structure, which we expect to have completed in the very near future. We will proceed then with the work on the cell house in accordance with the plans and specifications for said building as prepared by our department architect.

A full and complete statement of the damage caused by the fire, showing loss in buildings and equipment, will be found elsewhere in this report.

Material was purchased for the construction of a silo in connection with the prison farm at a cost of \$785.00, to be erected with prison labor.

Six new boiler fronts were placed on the boilers in use at the power plant, for which \$1,152.00 was expended. New tile floors and wainscoting were placed in the dining room, which, together with other necessary repairs in and about the penitentiary, including a new oven for the bake shop, caused an expenditure of \$2,590.00.

MEN'S REFORMATORY, ANAMOSA

An appropriation of \$52,000.00 was made by the thirty-ninth general assembly for the purchase of two hundred sixty acres of land located east of the Men's Reformatory. This land, which has been leased by the reformatory for several years past, came into possession of the state March 1, 1921. With the \$8,000.00 authorized for new buildings, material and equipment were purchased for a machinery and storage house, hog house, slaughter house and two silos.

Convict labor was utilized in the construction of the buildings. All have been completed and are in use at this time. As at all of the other institutions under the control of this board, a certain

amount of repair work was necessary in order that the buildings be preserved and kept in first-class condition. New tile floors and wainscoting were placed in the kitchen and rotunda at a cost of \$3,900.00.

Repairs in the boiler room were quite extensive. Palmer forced draft burners were placed under five of the boilers in use, and two new stokers were installed, the total cost of both items being \$10,300.00. While expenditures on these boilers seem quite large, the equipment was considered absolutely necessary and since its installation the consumption of coal has been reduced approximately one-fourth, making it possible to use screenings, which cost the state from \$1.00 to \$1.50 per ton less than other coal. We might also state that screenings take a much less freight rate than other coal. The requirements in coal for the reformatory for one year are approximately 9,000 tons. If a saving of only \$1.00 per ton is made on the coal used, which is a conservative estimate, the equipment will almost pay for itself within one year.

WOMEN'S REFORMATORY, ROCKWELL CITY

The appropriations made by the thirty-ninth general assembly for the Women's Reformatory were not large. We asked for only \$12,000.00 to care for contingencies that might arise in connection with the institution and \$500.00 for entertainments and amusements for the inmates.

Approximately one-half of the amount so appropriated for contingencies and repairs has been expended for the following purposes, which were considered by the board as absolutely necessary in the operation of this institution.

Concrete root cellar necessary in the preservation of vegetables and fruit, \$3,925.00; one new well and equipment, \$1,818.00; eight new lattice steel cells in which to confine unruly prisoners, \$3,899.03; and several sheds for young stock costing \$1,375.00.

During this biennial period, with additional appropriations made by the thirty-seventh and thirty-eighth general assemblies we have completed the sewage disposal plant at an expenditure of \$10,233.43; also the pathological building at a total cost of approximately \$30,000.00.

A stone gateway has been erected at the entrance to the grounds which adds greatly to the general appearance of the institution. Grounds for croquet and basketball have been established for the amusement of the prisoners.

During the fall of 1921 a new granary was erected. This building has a capacity of twenty-seven hundred bushels of corn and fifteen hundred bushels of small grain. The institution was very much in need of a building of this kind to care for the produce raised on the farm.

INDUSTRIES

No new appropriations were granted by the thirty-ninth general assembly for establishing and maintaining the institution industries as large cash balances had accrued from the profits earned by the industrial departments, which were ample to pay all operating expense and purchase the materials needed after refunding the combined appropriations or entire invested capital in the chair and furniture industry, of \$152,500.00, and \$31,935.00 in the cooperage industry; a total amount of \$184,435.00 was returned to the general fund of the state from the earnings of these two industries.

The unexpected balances of appropriations made for the various industries were on June 30, 1922, as follows:

STATE PENITENTIARY AT FORT MADISON

Establishing and maintaining industries, thirty-seventh general assembly.....	\$36,724.12
Purchase of land and industries, thirty-seventh general assembly.....	13,160.50
Total.....	\$49,884.62

Other industrial funds on hand representing receipts from the sales of products of the chair and furniture industry, the cooperage industry and other industrial departments, are as follows:

MEN'S REFORMATORY AT ANAMOSA

Establishing and maintaining industries, thirty-sixth general assembly.....	\$ 46,148.49
---	--------------

STATE PENITENTIARY AT FORT MADISON

Establishing and maintaining industries, thirty-sixth general assembly.....	\$150,688.61
Establishing and maintaining industries, thirty-fifth general assembly.....	45,511.57
Total.....	\$242,348.67

The unexpended balances of the appropriations will be used in replacing the chair factory buildings which were destroyed by fire and

the industrial receipts are needed as cash working balances for the various industries.

These two years cover the period of industrial and financial depression following the war. It has been a period of adjustment. The conditions so trying to the farmers, manufacturers and other commercial enterprises had their effect upon the state owned industries.

We had a large stock of high-priced materials and manufactured articles on hand at the beginning of the period. Due to the drop in market prices of both materials and products it became necessary to adjust the inventories to the current market prices, which resulted in a large shrinkage in the liquid or current assets.

Considering these facts the individual departments have made a creditable showing during the period. Wages are paid to all prisoners working in the shops of the commercial industries, and are deposited to their individual credits in a local savings bank to be paid to them at the time of their release, or sent to their dependents.

There are now four commercial industries operated in connection with the Men's Reformatory and the State Penitentiary, and six industrial departments that manufacture articles for state use only.

The apron factory at the Men's Reformatory and the shirt factory at the State Penitentiary have not been in operation a sufficient length of time so that a detailed report can be made during this period.

The prices of articles produced by the industrial departments that manufacture goods for state institution use only, are fixed as low as possible, allowing only for cost of manufacture and the maintenance of the prisoners employed with a small margin of profit. Each institution or department purchasing goods is benefited in a financial way.

Profit and loss statements and balance sheets for the principal industries may be found in the financial section of this report.

CHAIR AND FURNITURE INDUSTRY AT FORT MADISON

We have during this period returned to the general fund of the state from the earnings of the chair and furniture industry, \$152,500.00. This amount represents the entire appropriated capital invested in the plant.

The cash working balance on hand June 30, 1922, was \$150,688.61. The factory has not been in operation during the entire two years, as a fire on March 2, 1922, entirely destroyed the plant at a time when the chair business was at its best during the two years.

Work was started at once on a new fireproof factory building and new machinery has been purchased. The factory will be in operation again about August 1st. The new factory will be capable of producing fifty dozen chairs per day.

The net sales during the time the factory was in operation this period were \$362,277.93 and 72,979 chairs were manufactured.

The prisoners received in wages \$13,702.41. About 200 men are employed in this industry.

COOPERAGE INDUSTRY AT ANAMOSA

As with the chair and furniture industry this factory has much more than paid for itself since it was established in 1915.

During this period \$31,935.00 was paid back to the general fund of the state, the entire amount that had been appropriated and invested in this plant, and had left in the fund a cash working balance of \$46,148.49 on June 30, 1922.

The net sales for the two-year period were \$243,337.23 and the profits and reserves earned since the last report aggregate \$17,476.05. About forty prisoners employed received as wages \$2,672.28.

Many creameries are putting up their butter in paper cartons and boxes, reducing the demand for tubs, which has not been so great during the last season.

PRINTING AND BINDING DEPARTMENT AT ANAMOSA

About thirty prisoners are employed in this department. In addition to the printing trade they are taught book-binding and ruling. No commercial printing is done. All printing and binding needed at the state institutions and for the office of the board of control is done by the prisoners in this shop. It is operated in connection with the Men's Reformatory. The sales during the period were \$28,232.86.

TAILORING DEPARTMENTS

The tailoring departments at the Men's Reformatory and the State Penitentiary manufacture and repair all clothing worn by the prisoners. Suits and overcoats of neat design and good workmanship are made and given to the prisoners upon their discharge.

Clothing for other state institutions is also manufactured in the shop at the Men's Reformatory. The net sales to institutions from July 1, 1920, to June 30, 1922, were \$56,572.88. About sixty-five prisoners are regularly employed in the two shops.

SHOE SHOPS

About thirty prisoners are kept employed making and repairing shoes for the inmates of the Men's Reformatory and the State Penitentiary, as a shoe shop is operated at both institutions and all shoes for prison use are made.

Repair work for other institutions is being done in the penitentiary shop at a considerable saving.

TIN SHOP

At the Men's Reformatory a tin shop is operated. A great deal of repair work is done at the institution and some of the tinware and galvanized ware used at the other state institutions is manufactured here. This provides work for from eight to ten prisoners. The sales to institutions were \$2,648.85.

DAIRY HERDS

Our institution dairy herds have during the last two years made very substantial gains in production. Although we have had forty less cows in the herds, the increase in milk over the last biennial period was 772,759 pounds.

A record is kept of the milk produced by each cow in the herd and only the most productive cows are allowed to remain in the herds, the least profitable ones being culled out and sold or fattened for beef.

The herds are of the Holstein breed. About one-third are pure bred and only the best pure-bred bulls head the herds.

In 1916 by a carefully tabulated record we found that the average production of milk per cow was 6,578 pounds per year. The record for the current year (1922) shows the average for each cow to be 8,555 pounds, an increase in six years of 1,977 pounds per cow per year.

All of the milk produced, except that from the farm at Clive, is consumed at the institutions and furnishes a wholesome diet for the inmates.

DAIRY REPORT FOR TWO YEARS ENDING AUGUST 31, 1922

Number of milch cows.....	756
Number of pounds of milk.....	12,537,003
Value of milk.....	\$337,750.65
Cost of feed.....	126,594.36
Net profit.....	\$211,156.29

MILK REPORT.

FARMS AND GARDENS

The state-owned land at the institutions under the board of control is now 12,111 acres. About 10,500 acres of this is good productive farm land, gardens and orchards. The balance of the land is taken up by the buildings, grounds and wood land.

The farms, although very productive and the yields of farm crops increased, show, as compared with the preceding two years, a reduction in profits because of the very low prices of farm products.

Vegetables of nearly every variety that can be grown profitably are raised in abundance for the tables during the summer and the root celled, with which each institution is provided, are filled for winter use.

Potatoes are raised for early use, but of late years have not been grown in large quantities, as Iowa soil is not adapted for the most successful cultivation of this crop. The raising of corn is much more satisfactory and profitable.

Silos have been built at each institution and we consider ensilage an excellent stock food at a minimum cost, making it possible for the institutions to raise and care for large herds of cattle.

The older institutions have good orchards, which provide an abundance of apples and many other fruits. Considerable canning of both fruit and vegetables is done in the institution kitchens and fresh apples are kept throughout the winter. Orchards have been started at the newer institutions which should be bearing soon.

The Iowa State College at Ames has given very helpful assistance and advice on the farms, in regard to dairy herds, orchards and gardens.

Inmate labor is utilized as much as possible on the farms and gardens, superintended by a capable farm manager. Only those patients who are able and desire to work are employed on the farms.

The additional purchases of land for the prison farms have been profitable and have provided more healthful employment for the inmates.

The last general assembly authorized the executive council to sell the state farm at Clive, the proceeds to be used in purchasing land adjoining the State Penitentiary at Fort Madison and the Men's Reformatory at Anamosa. In the meantime the land is being operated as an industry in connection with the Men's Reformatory, the work being done by prisoners from that institution.

The board of control the past year has tried the experiment of feeding and slaughtering cattle at almost all of the institutions in-

stead of buying the meat from the packers. This experiment has proven quite satisfactory, resulting in better beef, and has saved the state more than \$60,000.00 in this length of time.

The profits of the institution farms during the past two years are approximately \$300,000.00.

The total amount of products from the farms, orchards and gardens since the last report is as follows:

Farm products.....	\$ 569,281.73
Poultry yards.....	18,678.76
Live stock sold.....	148,429.92
Dressed meats.....	327,270.04
Garden products.....	185,229.76
Orchard and miscellaneous.....	74,742.87
Total.....	\$1,323,633.98
Total increase in value over last report.....	\$ 70,260.43

LIVE STOCK ON FARMS JUNE 30, 1922

	Number	Value

Poultry.....	14,386	8,452.35
Total.....		\$371,655.39
Decrease in value since last report.....		26,182.21

COAL

A comparison of the amount of coal purchased during the last ten or twelve years at the state institutions under our control shows very little increase in the tonnage consumed. Taking into consideration the new institutions, new buildings and new industries established and the greatly increased population, all of which requires increased consumption of fuel, we are now caring for more people in our institutions per ton of coal used than in 1912 or any of the intervening years.

Increased prices from year to year and increased freight rates have made it necessary to expend for coal a very large proportion of the support funds allotted for the institutions.

The following table shows the quantity and value of coal used at the several institutions for the two years ending June 30, 1922:

	Tons	Cost
Iowa coal.....	153,908	\$ 847,919.02
Illinois coal.....	38,341	248,208.98
Indiana coal.....	14,977	62,240.81
Miscellaneous coal.....	7,007	28,949.70
Total amount purchased in two years.....	214,233	\$1,187,318.51
Total amount consumed in two years.....	206,882	1,147,777.03
Increase in amount of coal consumed over previous biennial period.....	8,362	284,024.53

EXPENDITURE FOR ROADS

The following is a table showing the total expenditure of funds for state roads at state institutions under the direction of the board of control, for the biennial period ending June 30, 1922:

General maintenance and repairs.....	\$ 37,600.15
Ames road (Iowa State College).....	7,502.55
Cherokee roads.....	2,240.03
Cherokee paving fund.....	32,262.56
Council Bluffs roads.....	1,200.00
Council Bluffs paving fund.....	17,390.33
Davenport roads.....	150.00
Eldora roads.....	832.49
Iowa City roads (State University).....	18,276.94
Mount Pleasant roads.....	38.40
Rockwell City roads.....	526.27
Woodward roads.....	5,207.89
Total.....	\$113,247.61

LAND AT STATE INSTITUTIONS

Totals.....	15,111.59	\$2,479,042.15	283	\$56,100.00

COST OF OPERATING AND MAINTAINING INSTITUTIONS

Many of the commodities necessary in the operation and maintenance of the institutions under our control have reduced in price considerably during the past year, while other items remain practically at the same price. However, we are pleased to report that, although the population increased greatly, the cost per inmate has been reduced.

During the war period and immediately after we were compelled to increase wages paid to institution employes in order to secure competent help. Conditions have changed during the past year and help has been more plentiful, making it possible to reduce salaries to a level more in accord with what was paid prior to the time the before-mentioned increases were granted. The reduction individually has not been large, but as a total for the fifteen institutions it amounts to approximately \$9,600.00 per month.

UNUSED APPROPRIATIONS AND UNEXPENDED BALANCES RETURNED TO THE GENERAL REVENUE FUND OF THE STATE

During the biennial period just ending the Board of Control of State Institutions returned to the general revenue fund of the state \$321,453.70. Of this sum \$152,500.00 represents profit from the chair and furniture industry at the State Penitentiary, Fort Madison; \$31,935.00 represents receipts from the coeprage industry at the Men's Reformatory, Anamosa; and the remaining \$134,018.70 includes unused appropriations and unexpended balances remaining in funds after the purpose for which such appropriations were made had been accomplished.

STATE PROPERTY AT KNOXVILLE

We have received during this period from rentals and sales of equipment and miscellaneous farm produce from the state property at Knoxville, now leased by the United States government, the following amounts:

Rent of buildings.....	\$34,280.00
Rent of land.....	5,017.65
Sale of equipment.....	19,356.59
Other miscellaneous sales.....	6,438.23
Total receipts.....	\$64,992.50

Fifty thousand dollars of the funds credited to this institution have, during the period, been turned over to the general revenue fund of the state.

COAL ROYALTIES

The coal royalties collected during this period on coal mined under state lands at the fair grounds aggregate \$2,868.25.

The mines were in operation twenty-one months, having been closed for three months on account of the strike.

The total amount of royalties collected since the opening of the mine in 1919 is \$5,641.25, which has all been turned over to the general revenue fund of the state.

VISITATION OF INSTITUTIONS.

The following statement shows the visits made to different institutions during the biennial period ending June 30, 1922, giving date of each visit and by whom made:

SOLDIERS' HOME, MARSHALSTOWN.

July 28-30	Strief, McColl, Sheean	Oct. 29, 1921	McColl
