REPORT OF THE AUDITOR OF STATE  
COUNTY ACCOUNTING DEPARTMENT

## COUNTY ACCOUNTING DEPARTMENT

This department was authorized and established by an act of the 35th General Assembly, providing for an examination of the transactions of all county officials, and providing a system of accounting to be used in the various offices. The duties of the administration of this act were placed in the office of the Auditor of State. Two propositions in connection with the administration of the county accounting law stand out prominently; first, a uniform system of accounting, and second, regularity and proper collection and disbursement of public funds.

Since the organization of the department, there has been a system of accounting provided for each office of the county that will care for any legal transaction of the official, with the least possible effort on his part, conducive to a clear understanding of the receipts and expenditures incurred in the performance of the official duties of his office.

A large majority of the officials have adopted and installed this system of accounting, but there are a few counties in which the officials refuse to be convinced of the advantages to be gained in the saving of time and effort, between the use of the state system and the system of old, used in their particular county.

Our examiners are putting forth untiring effort, constantly, to induce the officials in these backward counties to install the system; by demonstrating to them that time and labor can be conserved by so doing, and we are glad to report that progress is being made.

The problem of regularity and proper collection and expenditure of public funds has received our careful consideration and attention, and the officials of the various counties are now referring the questions of collections and disbursements in which they are in doubt to us for instructions as to procedure, necessitating our referring same to the Attorney General, in many instances, for a legal opinion which we, in turn, pass on to the officer, with the least possible delay. We are much gratified that the officials are making use of this department in this manner, as we would much rather counsel and advise in advance than be compelled to correct and criticize after the transactions are completed. We feel that our efforts along this line have been of material benefit to the

officials who have co-operated, and have been of immense benefit in enhancing the value of the department to the public.

We insist that our examiners render all assistance possible to the county officials whenever requested, to the end that all accounts be kept in the best possible manner and with the least confusion.

A great many errors in the transactions of county officials are discovered; caused, not by dishonesty, in the great majority of instances, but by errors and omissions. The following table shows the findings of our examiners for the years 1928 and 1929, as far as the examinations have been completed at the time of going to the printer. The examination of all counties for the year 1929 will not be completed until about January 1, 1931.
