IOWA HOSPITAL FOR THE INSANE, }  
CLARINDA, IOWA, September 27, 1889. }

*To his Excellency, WILLIAM LARRABEE, Governor of Iowa:*

SIR—I have the honor to transmit herewith the report of the Trustees of the Iowa Hospital for the Insane at Clarinda, for the biennial period ending June 30, 1889.

With this is also transmitted the report of the Superintendent and other subordinate officers. All of which is respectfully submitted.

Very respectfully,

L. B. RAYMOND,  
*Secretary.*

## TRUSTEES' REPORT.

IOWA HOSPITAL FOR THE INSANE, CLARINDA.

To HON. WILLIAM LARRABEE, *Governor of Iowa*:

The Trustees for the Hospital for the Insane at Clarinda herewith submit their biennial report, showing the condition of the institution from the time said Trustees took charge, on March 14, 1888, up to and including June 30, 1889.

Under the act of the Twenty-second General Assembly, the Board of Trustees, created by said act, was authorized to assume the duties of the Board of Commissioners; and the same general assembly made an appropriation of the sum of \$82,000 for the completion of the buildings then in course of construction, and the erection of the kitchen department, corridors connecting with the administration building, boilers and laundry machinery, electric light plant, sewerage, etc.; and also appropriated the sum of \$20,000 for furnishing hospital and equipping farm.

At the first meeting of the Board of Trustees, on the 14th day of March, 1888, E. J. Hartshorn was elected President; L. B. Raymond, Secretary, and L. E. Darrow, Treasurer. And that said Trustees, in the discharge of their duty, completed said buildings as provided for by the above named appropriations, and purchased the necessary furnishing for said Hospital and farm, as will hereafter appear by an itemized account, which is annexed and made a part hereof.

The expenditures on building account are fully set forth in the Supervising Architect's report.

For expenditures on account of appropriation of \$20,000 for furnishing hospital and equipping farm we submit the following itemized statement:

## STATEMENT OF FURNISHING ACCOUNT—CONTINUED.

Total	\$ 6,765.00
Expenditures	6,761.64
Balance on hand	\$ 3.36

The several amounts appropriated to finish and furnish the necessary buildings for the reception of patients have been economically expended, and within the appropriations made by the last General Assembly.

At the regular meeting of this Board, held April, 1888, Dr. P. W. Lewellen was elected Superintendent of the institution, to assume his duties on the first day of July thereafter; and at the same meeting, M. T. Butterfield was nominated for Steward, and his nomination confirmed by the Board. He was immediately assigned to duty as Assistant Superintendent of Construction and Overseer of the farm. At a future meeting, J. M. Aiken, M. D., was elected Assistant Physician, upon recommendation of the Superintendent, and Mrs. P. W. Lewellen, Matron: they to assume their duties on the first of December, 1888. On the 12th day of December there was sent to said institution, from Independence, ninety (90) male patients; and from Mt. Pleasant, one hundred and twenty-six (126), and from Mercy Hospital, at Davenport, six (6), making the number of inmates of the Hospital at that time two hundred and twenty-two (222) male patients. The Board has been unable to receive

any female patients, from the fact that only one cottage wing has been erected, as will be seen by the reports of the Supervising Architect, and Superintendent of Construction, and Superintendent of Hospital, which are accompanied herewith. It is of the utmost importance, owing to the overcrowded condition of the other Hospitals, that the necessary steps be taken by the next General Assembly to make an appropriation for the erection of another cottage wing, especially adapted to female patients.

It has been the purpose and desire of the Board to place the business management of the institution in the hands of the Steward, and they have labored to that end. But owing to the peculiar construction of the law relative to the government of Hospitals for the Insane in this State, they have, to a certain extent, been hampered in carrying out their desires in this respect.

There cannot be any question but that the duties imposed upon the Superintendent are of such a nature that he cannot give the institution suitable attention in the business department, and at the same time attend to the medical wants of the patients; and we would recommend that the incoming legislature pass a special act for the government of this institution, placing the sole charge of the business management in the hands of the Steward, thereby relieving the Superintendent of that responsibility, believing it to be for the best interests of the institution and the State. To this end, we would recommend that it also be provided that the Steward shall be elected directly by the Board of Trustees.

The work of construction has been well and faithfully done, under the supervision of the architects, Messrs. Foster & Liebbe, by direct supervision of William Foster, Esq.

The affairs of the farm have been as well administered as was possible under the circumstances.

We wish to make acknowledgements to the Superintendents of the Hospitals at Mt. Pleasant and Independence for their hearty co-operation and assistance in transferring to our institution the insane patients belonging to the district set apart to us.

The further imperative wants of the institution consist of a new boiler-house with engine-rooms, electric light plant rooms, smoke-stack, fan-rooms and water tank towers in connection therewith; also a chapel and amusement hall; an additional wing for female patients and connecting corridors; an additional electric light plant; for which will be needed the sum of \$291,000, together with \$20,000 for furnishing the same. For an itemized estimate of cost of these

various buildings and improvements, see Supervising Architect's report.

From the fact that the female departments in the Mt. Pleasant and Independence Hospitals are both overcrowded with inmates, the urgent necessity of building a wing for the accommodation of female patients is apparent: more particularly as we are unable at the present time to accommodate any females from our own district, and are compelled to send them to the other Hospitals.

We fully indorse the Superintendent's recommendation in reference to the improvement of the Hospital grounds, and think that \$1,000 per year, for the next two years at least, should be expended in grading around the building, setting out trees, making walks, drives, etc.

We have held the regular quarterly meetings, as required by law, and in addition thereto, two or more of our Board have visited the Hospital monthly; and we have endeavored to inform ourselves as thoroughly as possible of all that pertains to our duties. Different members of the Board have, since its organization, visited the Hospitals at Mt. Pleasant and Independence; also, the Wisconsin Hospital, near Madison, Wisconsin: the Government Hospital, at Washington, D. C.; the Hospital at Norristown, Pa., the Willard Hospital at Ovid, N. Y., and other similar institutions. Those of our Board who visited the Hospitals at Norristown, Pa., and Madison, Wis., were especially pleased with the manner in which those institutions are organized in reference to their business management, that department being under an entirely separate and distinct head from the medical. So far as we could judge, this system gives far more satisfactory results than the method of placing the entire responsibility of so extensive an institution upon one individual. Our recommendation elsewhere in reference to the management of this Hospital is in accordance with these views.

There is no grove upon the Hospital grounds suitable as an outdoor resort for patients in summer time; and as there is a tract of land immediately adjoining the grounds, on the south, that has a fine grove, we urge the necessity of an appropriation for its purchase, provided it can be obtained at a reasonable figure.

The buildings completed are excellent, both in plan and construction; and in this respect there is nothing to be desired; and we unhesitatingly recommend the completion of the institution according to the same general plan. They do credit to the Architects, Foster & Liebbe, and William Foster, Superintendent of Construction.

In the organization and opening of such an institution, there have been the usual unforeseen obstacles to contend with, and more or less friction to overcome; and if the Trustees, other officials and employes, have not succeeded fully up to their own expectations and those of the public, they trust to the generous forbearance of the people of the State to overlook such deficiencies as may be apparent.

Respectfully submitted,

E. J. HARTSHORN,  
J. D. M. HAMILTON,  
L. B. RAYMOND,  
ED. H. HUNTER,  
J. H. DUNLAP,

*Trustees.*

## SUPERINTENDENT'S REPORT.

*To the Board of Trustees of the Iowa Hospital for the Insane, at Clarinda:*

GENTLEMEN—In presenting this, my first report of this institution, I do so with a feeling of gratitude that this, our first six months of existence as a hospital, has been attended with a degree of success for which I had hardly dared to hope in the beginning. Commencing, as we did, under such adverse circumstances, owing to the unfinished condition of the building, the absence of many things overlooked in the furnishing, and which we found to be absolutely necessary to the safety and comfort of our patients, many things contributed to render the first few months very laborious, as well as entailing upon the management a great deal of care and anxiety. Some of these causes still exist.

Having so few single rooms, and but six wards, each of which was intended to accommodate thirty-four patients, but into which we are forced to place from forty-five to fifty, and being compelled to sleep so many in dormitories who have never before been trusted to do so, we feel in constant dread of accidents which might be prevented by better facilities and proper classification. However, we are glad to be able to say that no serious accident has yet been occasioned thereby. Too much credit cannot be given to those under whose immediate charge the patients were placed, and whose constant watchfulness and patient care alone under Providence has prevented any violence of a serious nature.

Our patients have enjoyed a fair degree of health, and seem generally contented, and grateful for the pleasant home and home comforts which we have been enabled to give them. Seeming to understand many of our disadvantages in starting, they have generally accepted the situation philosophically, and have made but little complaint, although the lack of amusements, and many of the comforts with which they were familiar in the older hospitals must have

been very noticeable. We have, as far as possible, tried to supply this want by special individual effort and kind personal attention, and have felt amply repaid by the evident appreciation of our efforts.

We opened the hospital December 15, 1888, with 222 male patients.

Received from Independence.....	90
Received from Mt. Pleasant.....	126
Received from Mercy Hospital.....	6

Since then we have received from various counties in the district fifty-two, making the total number admitted 274. Of this number twenty have been discharged. All were so much improved as to give a fair hope of entire recovery.

Of those who died, four died of progressive paralysis; three died of consumption; two died of epilepsy; one died of syphilitic disease of the brain; one died of peritonitis, so that of the whole number but one died from a disease which could be said to have been curable. But two of the number were recent cases, all except the two having been received from the other hospitals, where they had been for a long time. The most of our patients being chronic cases, I think you will agree with me that our per cent of recoveries is a fair average.

The district from which we receive patients is composed of the following counties: Adair, Adams, Audubon, Carroll, Cass, Clarke, Crawford, Decatur, Fremont, Greene, Guthrie, Harrison, Ida, Lucas, Mills, Monona, Montgomery, Page, Pottawattamie, Ringgold, Sac, Shelby, Taylor, Union, Wayne, Woodbury.

## RECREATION AND AMUSEMENTS.

We have tried in every way possible to give our patients diversion and exercise. Those who desire it have opportunity for light work about the building, in the garden, or on the farm, and while we do not insist upon it, we desire and encourage all who can to pass as many hours as possible and enjoyable to them, in some congenial outdoor work when the weather is favorable, knowing that all who can be induced to do so will be greatly benefited thereby, and all are encouraged to assist in the general work of the wards.

During the spring and summer months, whenever the weather will permit, all who are able spend the greater part of the day in a grove adjacent to the building, accompanied by their attendants,

where they play ball, swing, or pass the time in reading and talking, as they may choose. Much of the time there are not a half dozen left in the wards through the day, most of the wards being entirely vacant.

When the intense heat prevents outdoor exercise during the afternoon, all go out for a walk after supper, returning refreshed and ready for the night's rest. We find it with them, as with us, that exercise is a great promoter of sleep, and those who engage in active employment or exercise during the day seldom make any disturbance at night. The few who are not able to walk are frequently taken out for a ride, as are many others, especially the older persons. On the Fourth of July one hundred or more were taken to town for a ride; also a good dinner was served to all, both to patients and employes, and plenty of lemonade. After supper the city brass band came out and gave some good music, after which we had fire-works to enliven the scene until bedtime. All seemed to enjoy the day, and both officers and attendants enjoyed the privilege of thus contributing to the pleasure and happiness of those in their care.

On Christmas day all were served abundantly with turkey and mince-pie, and in the evening the Methodist choir came out and gave us a fine concert, which was gratefully received and appreciated by all.

Owing to our limited means and room, we have not had many entertainments of a public character. However, we have fitted up a room in the basement for chapel use, where services have been held regularly, with few exceptions, every Sabbath afternoon, at 3 o'clock, since the opening of the Hospital.

We feel under many obligations to the ministers of the different churches in Clarinda who have taken turns in coming out at this unseasonable hour, without charge, to preach, and conduct these religious exercises. They are: Rev. Collins, pastor of the M. E. Church; Rev. Smith, pastor of the Presbyterian Church; Rev. Pringle, pastor of the United Presbyterian Church; Rev. Reagan, pastor of the Christian Church; Rev. Myattway, pastor of the Baptist Church; Rev. Snook, pastor of the Universalist Church. We are also greatly indebted to the choirs of these respective churches, who invariably accompanied their ministers, who, with their trained voices and sweet songs, have contributed very much to the pleasure and enjoyment of these Sabbath exercises. They have the unqualified thanks of the patients, and all connected with the hospital.

May the blessings of Him, whose promise is that, "Even a cup of cold water given in His name shall not lose its reward," be theirs.

While laboring under so many disadvantages incident to starting a new hospital, we early realized the value of reading matter for our patients, which we had no means of supplying. With this want pressing upon us, we addressed to the editor of each publication in our hospital district, and a few others, a request for a copy of their paper each week. The response has been most generous and satisfactory, as will be seen by the following list of papers which are received regularly at the Hospital, some of them dailies:

1. Glenwood Opinion.
2. Adams County Gazette.
3. Page County Democrat. (Three copies.)
4. Murray News.

Now, almost every patient who has a residence in the district, has his home paper to read.

On Saturday afternoon the papers are carefully assorted for the patients, and the names written on them, and on Sunday morning

they are distributed in the wards, except the daily papers, which are usually given out through the week while they are fresh.

I wish here to record my heartfelt thanks for this, to me, personal favor for which I find it difficult to properly express my sense of obligation, coming as it did when the need was so great as to have become a burden of considerable magnitude. If those who have so kindly contributed these papers were to be present, even once, and witness the pleasure with which they are received, I am sure they would feel amply repaid for their trouble.

Some good reading matter has also been sent in by citizens of Clarinda, which was much appreciated.

#### THE BUILDING.

In the report of the architect will be found a concise report of our system of light, heat and sewerage. It is only necessary for me to add that these have been generally satisfactory from the first.

#### LIGHT.

Our electric light system so far has worked admirably, making a beautiful and perfect light, and is far superior, in my judgment, to any other system of lighting. It is difficult to estimate the cost definitely of lighting the building, but it is certainly cheaper and safer than gas, and far more convenient and satisfactory.

#### HEAT.

So far, the heating apparatus has worked well, although the unusually mild weather last winter scarcely offered a fair test. Having both direct and indirect radiation, we rarely needed to use both last winter, as we found the indirect radiation ordinarily ample.

#### SEWERAGE.

With the exception of a few minor details in the arrangement of the stool-rooms on the upper flat, which defect is now being remedied, this has given entire satisfaction.

Indeed, it is a matter of surprise that the complete system distributing water, steam and sewerage, has worked so perfectly from the very beginning. It is certainly evidence of a very great care on the part of the architect.

#### PRESENT NECESSITIES.

I would respectfully call your attention to the need of a good barn and comfortable stalls and sheds for the cows and other stock.

We have a good prospect for an abundant crop this season, and our 513 acres of good land ought to furnish us almost, if not everything, needed in the way of vegetables, grain, hay, etc., but our total lack of storage room will necessitate a great deal of waste unless timely attention is given to this matter. At present, our hay must all be stacked in the fields, likewise our wheat, oats and rye.

Our garden is doing well, and we expect to have an abundant supply of potatoes, turnips, cabbage, beets, onions, etc., for the year, but have no provision whatever for storing any of these things for safe keeping through the winter.

#### ICE-HOUSE.

An ice-house is also an absolute necessity. We were enabled last winter, by utilizing an old lime-house, to store probably one third of the amount of ice that we will need during the summer. When this fails, we will be compelled to buy, at a high price, a supply for the remainder of the season. This is of sufficient importance to commend your timely attention.

#### COLD STORAGE.

Another want of importance is a cold storage-room, in which to store butter, lard, eggs, etc., in sufficient quantities for two or three months' supply. A great saving could thus be accomplished in the purchase of these necessary supplies.

#### GREEN-HOUSE.

It will be impossible to keep flowering plants to any extent through the winter without a place especially adapted to the purpose. It will also be necessary to have some place to start early vegetables before they can be started in the garden. For this purpose we will need a green-house, and hope that a sufficient sum will be allowed for its construction.

#### IMPROVEMENT OF GROUNDS.

There has been practically nothing done yet in the way of improving the grounds. We should have at least \$1,000 per year for the next two years for this purpose. We have a beautiful location, and one that can be made very attractive without large expense.

We also need to plant a large amount of small fruits next spring, as these are very productive in this climate. The blackberries put out last year have made a fine growth and yielded fairly well this season.

#### CHAPEL AND AMUSEMENT HALL.

We have no place provided yet in which to hold chapel services, or entertainments of any kind. A room in the basement, capable of seating from fifty to seventy-five persons, has been utilized for holding religious services thus far, but it is difficult of access; damp and cold in winter, and altogether unfit for such use. A chapel and amusement hall is one of the most urgent necessities of this institution.

#### NECESSARY ADDITIONS TO THE WING.

As before stated, we have but six wards, and our patients being men of all classes and stages of insanity, their classification is made very difficult and unsatisfactory. And besides this unfavorable condition, our wards are now almost full, and will be crowded before the next meeting of the legislature.

There are also a number of patients at Mercy Hospital who belong to our district who cannot be accommodated here until we have more room. This will make it necessary to extend the male wing per original plan, and I earnestly advise you to ask of the coming legislature a sufficient appropriation for this purpose.

All authorities agree that a proper classification is of very great importance in the treatment of the insane. Until we have this necessary addition we cannot hope for a fair test of our methods of treatment. It is a matter of surprise that our patients have done so well, under such unfavorable conditions.

#### THE ADDITIONAL WING.

As our present accommodations permit us to receive only male patients, it will be apparent to all that at the earliest possible time the additional wing for the female insane of our district should be completed. At present each of the twenty-six counties comprising our district have to keep an account with two hospitals, and incur the extra expense and inconvenience of sending their female patients to a distant hospital. Besides this, there are many reasons why, in order to attain the best success, it is necessary to have both sexes in a hospital of this kind. Both patients and employes are

better contented. In all departments of domestic labor their help is needed, but more especially in the sewing-room and laundry.

Very few amusements can be kept up and the interest sustained without both sexes. For this reason we have to forego many of the amusements so common in the other Hospitals, such as dancing, literary and dramatic entertainments, etc.

As amusement and diversion are considered a very important part of the treatment of the insane, and the weekly dance considered a necessity at the other Hospitals, some of our disadvantages will be apparent.

We are also without any musical instruments, or games of any kind, except cards.

We should have about \$1,500 as soon as possible with which to purchase a couple of billiard tables, some musical instruments, pictures, and other furnishings for our wards.

In conclusion, I cannot sufficiently express my sense of obligation to my associate officers and attendants. I feel that for the success of the Hospital thus far the credit is largely due to their faithful and painstaking work.

Dr. Aikin, as assistant physician, has ably filled this important place with true loyalty and fidelity.

The Matron has had entire charge of the domestic concerns of the institution, and has been a valued assistant and advisor at all times.

The Supervisor, G. E. Parsells, has well and faithfully performed the many and varied duties of his office.

And as to the attendants, many of whom possess such admirable qualities and fitness for these trying positions as to make their services invaluable, I feel greatly indebted for their most faithful service.

Indeed, to all, both officers and other employes, I feel profoundly grateful for uniform kindness and conscientious work.

And to each of you, gentlemen, of the Board of Trustees, I would express my sincere thanks for the encouragement given in these six months of our existence as a Hospital, and hoping for a continuance of your cordial support.

Respectfully submitted,

P. W. LEWELLEN, *Superintendent.*

## MATRON'S REPORT.

*Garments made in the sewing-room from December 1st to July 1st.*

No. of spreads hemmed .....	336
No. of table-cloths hemmed .....	105
No. of napkins hemmed .....	72

Total .....	4,187

## GENERAL DIET.

## BREAD.

White bread, graham bread, corn bread and rye bread are made regularly by the baker, and frequently warm biscuit for breakfast for the wards.

## MEAT.

Veal, mutton, beef, fresh fish, codfish, liver, pork, eggs, etc., are provided for the wards.

## VEGETABLES.

Potatoes, cabbage, squash, onions, beets, green peas, string beans, turnips, carrots, parsnips, radishes, lettuce, corn and tomatoes, we have had in abundance in their season, and frequently pickles and catsup, or horse-radish.

Butter and syrup are always on the table.

Dried fruits, such as apples, peaches, prunes, berries, and green apple sauce, are served for supper in winter, but are frequently varied by fresh fruits in summer, such as strawberries, cherries, raspberries and blackberries.

Coffee is served to all for breakfast, and tea for supper.

A variety of delicacies are prepared for the sick, and for those not able to partake of the regular diet.

The whole household was supplied with turkey and mince pie on Christmas.

## EXHIBIT "A."

## Itemized Expenditures.

## REPORT OF ARCHITECT AND SUPERINTENDENT OF CONSTRUCTION.

GENTLEMEN—We herewith submit our report as Architects of the Hospital.

The appropriation made by the Twenty-second General Assembly was for building kitchen department, corridors connecting main building, boiler and laundry machinery, electric light plant, sewerage, pumping-works, and completing the building then unfinished, \$82,000.

Owing to our being unable to secure the right of way for sewerage the shortest way to the river, we were compelled to build it one half mile longer than originally intended, entailing an extra expense of about \$2,000; notwithstanding which, our buildings were all completed according to the original plans, at a cost of \$82,002.57; leaving an overdraft of \$2.57. We also have about \$700 worth of building material on hand.

We herewith attach an itemized report of all expenditures:

			\$ 89,002.57

## RECAPITULATION.

Credit appropriation	\$ 82,000.00
Expenditures	89,002.57
Overdraft	2.57

The buildings now completed consist of—

*First.* Administration building, which contains all the necessary offices and quarters for the Medical Staff, Steward, general officers, etc.

*Second.* The Supervisor's Department.

*Third.* One series of six wards for males, accommodating two hundred (200) patients.

*Fourth.* The Kitchen Department. This building is designed of sufficient capacity for a hospital accommodating one thousand (1,000) patients, and embraces the bakery, with all necessary storage-rooms, etc., and quarters for all the kitchen help.

For the present, however, the building is used for engine and boiler-room, electric light machinery, laundry, kitchen and bakery; necessarily making it very much crowded. With the addition of another wing, it will be necessary to commence the erection of the permanent boiler-house, to make room for additional boilers and machinery. This will allow us to vacate the rooms now occupied by those in the kitchen department, and give us the use of bakery and help's quarters, both of which are very much needed.

All the finished buildings are plain, but substantial, and are fire-proof throughout.

Agreeable to your instructions, we have prepared plans for the new buildings you ask appropriations for, viz.:

Boiler-house, engine-rooms, electric light room and smoke stack	\$ 61,200
Fan-room and water-tanks	6,800
Chapel and Amusement Hall	39,000
Additional wing for females	130,000
Water-closet and bath-room annex	8,000
Steam heating, including three boilers	15,000
Corridors connecting main building	6,600
Fans, engine and additions to electric light plant	5,000
Water tanks and pumps	3,500
Plumbing and water supply	1,300
Fan corridor (cold air) connections, with wings	6,000
Sewerage	1,600
Ice-house	2,500
Barns	4,500
Carriage and wagon sheds	1,000

Total	\$ 291,000
For furnishing new wing for females and out-buildings	20,000
Grand total	\$ 311,000

You are aware of the fluctuating state of markets for both building material and labor; but we believe the foregoing estimates are as close as it is possible to make them.

The boiler-house is a positive necessity, as the building in which boilers and machinery are now operated is very much crowded and entirely inadequate for the purpose; the smoke-stacks being but temporary, and will not last another year.

The cost of this building may seem high, but it must be remembered that it is built "fire-proof", and embraces room for the entire system of boilers, steam-heating and electric light plant, the engine-room, water-towers and fan-rooms; besides quarters for a number of the outside help. There is nothing about the building that can be dispensed with without serious detriment to the parts of Hospital already completed.

The "fans", which are indispensable, in order to secure perfect ventilation, have never been put in, owing to lack of room. This building provides for them.

The cost of Chapel and Amusement Hall may also seem large, but the basement is used for store-rooms, and the first story for attendants' and employes' quarters, necessarily making it a large building; yet the halls proper occupy but a small portion of the space.

These estimates will carry out the same policy as inaugurated by the first Board of Commissioners, viz.: plain and substantial, but strictly "fire-proof" construction.

Thanking your Board for the earnest support you have always given us, we are

Yours truly,

FOSTER & LIEBKE,  
*Architects.*

WILLIAM FOSTER,  
*Superintendent of Construction.*

## REPORT OF THE STEWARD.

### CURRENT EXPENSE FUND.

*Exhibit of Steward for period commencing December 15, 1888, ending June 30, 1889.*

#### RECEIPTS.
