

NINETEENTH BIENNIAL REPORT

OF THE

IOWA INSTITUTION

FOR THE EDUCATION OF THE

DEAF AND DUMB

AT COUNCIL BLUFFS,

TO THE

GOVERNOR OF THE STATE,

FOR THE

Biennial Period Ending June 30, 1891.

PRINTED BY ORDER OF THE GENERAL ASSEMBLY.

DES MOINES:
G. H. RAGSDALE, STATE PRINTER.
1891.

OFFICERS AND TEACHERS.

BOARD OF TRUSTEES:

HON. LOUIS WEINSTEIN DES MOINES CO.
HON. C. S. RANCK JOHNSON CO.
HON. A. T. FLICKINGER POTTAWATTAMIE CO.

SUPERINTENDENT:

HENRY W. ROTHERT

OFFICERS:

MRS. HENRY W. ROTHERT MATRON.
ALEXANDER HARDIE BOOK-KEEPER.
J. J. KIES BOYS' SUPERVISOR.
MARTHA DINSDALE GIRL'S SUPERVISOR.
MRS. HELEN A. STEERE SMALL BOYS' SUPERVISOR.
MRS. M. E. BROWN NURSE.
F. W. BALLUFF ENGINEER.

EDUCATIONAL DEPARTMENT

UNDER MANAGEMENT OF G. L. WYCKOFF, PRINCIPAL.

EDWIN SOUTHWICK,	FLORENCE WILCOXSON,
CONRAD ZORBAUGH,	A. M. EWING,
FRANK C. HOLLOWAY,	M. K. STEVENSON,
C. SPRUIT,	FANNIE GLENN,
W. S. MARSHALL,	CALLIE SCHUFF,
HIRAM PHILLIPS,	MARGARET WATKINS,
JOHN W. BARRETT,	OLLIE TRACY,
FLORENCE CLEMENT	TEACHER OF DRAWING.
MARGARET HAMILTON	TEACHER OF ARTICULATION.
OLIVIE BRUNING	TEACHER OF ARTICULATION.

INDUSTRIAL DEPARTMENT:

UNDER MANAGEMENT OF HENRY W. ROTHERT, SUPERINTENDENT.

G. C. TAYLOR	Foreman of CARPENTERING.
ZACH. B. THOMPSON	Foreman of PRINTING.
L. W. POUND	Foreman of SHOEMAKING.
FRED. AUWERTER	Foreman of BAKING.
DAVID RICKABAUGH	Foreman of BROOM-MAKING.
ELMIRA MICKLE	Foreman of SEWING.
JANE WALKER	Foreman of IRONING.
	Foreman of COOKING SCHOOL.
J. J. KIES	Foreman of FAHM AND DAIRY.
FRANK KEMPER	Foreman of VEGETABLE GARDEN.
LUDWIG EDERER	Foreman of FLOWER GARDEN.

PHYSICAL CULTURE:

JOHN W. BARRETT TEACHER.

REPORT OF THE TRUSTEES,
IOWA INSTITUTION
FOR THE EDUCATION OF THE DEAF AND DUMB.

TO THE HON. HORACE BOIES, *Governor of Iowa*:

The undersigned, trustees for the Iowa Institution for the Education of the Deaf and Dumb, respectfully submit the following report for the biennial period ending June 30, 1891.

The term covered by this report has been one of continued prosperity. The average attendance has continued to be as large as in the previous term, and the purposes of the Institution have been carried out with gratifying success. The school has been well organized, with a full corps of competent teachers, who, under the efficient guidance of the principal, have labored excellently and well, as is evidenced by the number as well as high standing of the graduates of the Iowa Institution who have been admitted to the National Academy for the Deaf and Dumb at Washington, D. C. Commendable progress of the pupil has been noticeable in all departments during the two years past.

In regard to the material condition of the pupils, an equal satisfactory report can be made. The pupils have been well cared for, and pains have been taken to make the Institution a home to them in the fullest attainable meaning of the term. Especial attention has been paid to the sanitary conditions of the school, and to the physical development of the children, and in this respect a very high standard has been reached. The buildings and grounds have received attentive care, and are now in as good, clean and healthful condition as the means at hand permitted and painstaking management can make them. To the superintendent and matron, to whose constant efforts in behalf of the best interests of the children these gratifying results are due, the acknowledgments of the board of trustees are herewith expressed.

For a more detailed exhibit of the operations of the Institution, the progress of the school proper, and the manner in which the expenditures have been made, we respectfully refer to the attached reports

of the superintendent, the principal of the school and the treasurer, to which your attention is most respectfully invited.

The special appropriations made by the twenty-third General Assembly, with few exceptions, shown in the treasurer's report, have been fully expended in making the contemplated improvements, as follows:

An appropriation of \$2,000 was made for the improvement of the Industrial schools. This sum has been employed to put the workshops in better condition, and to purchase much needed machinery, tools, etc., as intended by the appropriation.

The appropriation of \$1,000 for a cooking school has been utilized for the purchase of appliances and the organization of this department.

The appropriation of \$2,000 for laundry and cistern has been used for the building of a large cistern and the purchase of laundry machinery.

For the necessary addition to the dining-room an appropriation of \$5,500 was asked for, and granted by the General Assembly. This amount was expended in accordance with the plans, but proved insufficient for the completion of the work, owing to the low estimates of the architect, and the board of trustees is obliged to ask for an additional appropriation of \$1,500 for the completion of the improvement.

The appropriation of \$1,000 for the construction of a new water main, from the reservoir to the buildings, has been expended for this purpose.

The front approach to the main building and fire-escape has been erected for the amount of \$1,500 appropriated for this purpose.

In addition to \$800 formerly appropriated, the last General Assembly granted a further sum of \$1,500, making a total available for the erection of a cow-barn and the purchase of the needed cattle of \$2,300. An excellent building has been erected and a superior herd of cows purchased, exhausting the appropriation.

A limited appropriation of \$1,500 was made for general repairs. This fund, which proved entirely insufficient for the numerous requirements upon it, has been fully expended for the purposes indicated.

An appropriation of \$1,500 for the erection of a new smoke-stack and the repair of the steam heating apparatus, was obtained, and deemed sufficient for the purpose intended. It was found, however that the steam heating appliances were in such disorder as to require the whole amount to put the buildings in proper shape for the winter, and consequently no work was done on the smoke-stack.

The appropriation of \$1,000 for painting, and of \$400 for the library, have been fully expended for the purposes indicated.

Closets have been placed in the main building, and the appropriation of \$1,500 for this purpose properly utilized.

A new sewer has been built, affording the needed drainage, for which purpose the appropriation of \$3,000 has been exhausted.

The vegetable cellar has been built, exhausting the appropriation for the purpose.

The appropriation for furniture, for the strengthening of the front walls, and for the gymnasium, have been properly used.

The vouchers and accounts for all these expenditures are on file.

The board of trustees, after careful and exhaustive examination of the needs of the Institution for the coming biennial period, finds the following amounts should be appropriated for the purposes named:

Coal bins and dry room	\$2,500 00
School house repairs, and school furniture	1,500 00
Steam heating and water pipes	1,500 00
Fencing	700 00
Library and binding	600 00
General repairs (\$1,500 per annum)	3,000 00
Electric light	2,500 00
Painting	3,000 00
Furniture	800 00
Horses, wagons and harness	1,000 00
New boiler, for Industrial schools	1,500 00
Completion of dining-room and additions	1,500 00
Artesian well and water supply	4,000 00
Resetting of boilers, pipe covering and exhaust heater	1,500 00
Smoke-stack	2,000 00
Repairs to elevator	500 00
Water heater and food cooker	400 00
Total	\$28,500 00

These estimates have been made after a thorough investigation of the condition of the buildings and the different departments, exact estimates having also been obtained. The different sums asked for are all for much needed and just purposes, and the reasons for asking them are more fully set forth in the report of the superintendent, to which attention is directed.

Respectfully submitted.

LOUIS WEINSTEIN,
C. S. RANCK,
A. T. FLICKINGER.

CENTER BUILDING OF INDUSTRIAL SCHOOLS.

This structure was erected in 1889 to meet the growing and urgent requirements of the Industrial Departments of the Institution. It adjoins the old shops or south wing on the north and is so placed and constructed that, should in the future necessities require it, a north wing can be attached thereto and thus form a complete and solid building for the accommodation of the practical training of all pupils assigned to the various trades taught. It is forty feet front and thirty-six feet wide and including basement, four stories high. The basement floor (provided with area spaces of six feet on west and north side, giving ample light and ventilation) is occupied by the broom-making department. It also contains the large steam cylinder press on which our weekly paper, *THE DEAF MUTE HAWKEYE*, is printed as well as job presses, cutting machines and incidental supplies and machinery for our printing office. The second floor is to be used for a manual training school and is at present a store room for finished work of the carpenter and cabinet department. There is also an office for the Superintendent on this floor. The third floor, sixteen feet high, is the compositors' room or the printing office proper. It is provided with all reasonable modern improvements and possibly is entitled to favorable comparison with any printing office of similar dimensions in the state. The fourth floor is to be used as a store room for supplies or as a place to receive the overflow of the room below. The entire building is lit by electric light controlled by switches on each floor, is heated by steam from boiler in adjacent building. It is covered by a tin roof and all its floors are of double thickness save basement floor which is of cement. It has fifty windows providing more than ample light and ventilation. It is one of the best, if not the best building, erected by the state on our premises.

SUPERINTENDENT'S REPORT.

SUPERINTENDENT'S REPORT.

OFFICE OF SUPERINTENDENT OF THE IOWA INSTITUTION
FOR THE EDUCATION OF THE DEAF AND DUMB, }
COUNCIL BLUFFS, IOWA.

To His Excellency, GOVERNOR HORACE BOIES:

In obedience to the organic law calling the Iowa Institution for the Education of the Deaf and Dumb into life, making it the duty of its superintendent to report to the governor of the state certain facts concerning said Institution, for his information and consideration, I have the honor to present the following as covering the biennial period extending from July 1st, 1889, to July 1st, 1891:

HEALTH.

It is with grateful recognition of an all wise Providence that we are permitted to report the general good health which has attended our children during the last biennial period. While disease and epidemics have at times been close neighbors, and threatening clouds of serious trouble have drifted towards us, we have been spared the sorrows of final dissolution, save in one case, the cause of which had its origin at the child's own home. Minor ailments incidental to childhood have occurred, but readily disappeared by proper treatment and kind nursing.

The erection of our hospital, the establishment of our new sewer system, the remodeling of our water closets, the improvement in drainage, the attention paid to ventilation and cleanliness, have all tended to raise the sanitary condition of our institution to a high standard, and we earnestly hope the future may be as free from serious sickness as the past.

COMPULSORY EDUCATION OF THE DEAF.

There is perhaps no class of children who would be as greatly benefited by an arbitrary law compelling their attendance at school during a certain period as the deaf. To them an education means more than to those who are blessed with the powers of hearing and speech.

And to the community in which they live their development by mental and practical training often assumes the importance of self preservation and freedom from annoyance and support.

That the ordinary deaf child is as susceptible to mental advancement, although by slow stages, and is as ready to acquire the habits of any handicraft calling forth only physical and mental exertion as his more fortunate brother or sister, is daily demonstrated in any and all of the schools erected and maintained for their especial benefit. Here in Iowa, with us, ample provisions have been and are being made to impart such instruction as will reach the standard of a general education, and in connection therewith offer opportunities to acquire such knowledge of a trade or a vocation in life by means of which they may become self supporting.

What better opportunity to them is available? What greater blessing to them could be offered? And yet, within the boundaries of our State children of this class can be found growing up in mental darkness, and living in ignorance of any remunerative pursuit. Parents, in some portions of our State are met who rely upon the muscle of the unfortunate child as so much animal power, using the same only for securing their penurious and greedy ends; disregarding the kindly requests of the officers and teachers of the school, ignoring the golden opportunities provided by a liberal State, insulting the God given laws of parentage, and inflicting upon a generous community an object of compassion and charity for support.

I submit whether such parents should not be brought under the restrictive influence of a compulsory law, and the attendance of their children at school, for a certain length of time be made not a matter of option with them.

SCHOOL HOUSE REPAIRS AND SCHOOL FURNITURE.

In a building containing twenty rooms, and occupied daily by nearly three hundred children, there arises constant demands for renewals and repairs.

Prompted by a spirit of economy the most urgent betterments have only from time to time been considered, and it now seems a proper and judicious request that this center of our Institution should receive a liberal recognition, in so far as a reasonable appropriation for the above stated purpose would warrant.

In this connection, and included in the appropriation, is to be mentioned school furniture, both in class rooms and study rooms, which to some extent must be renewed.

An appropriation of fifteen hundred dollars (\$1,500) is asked for.

COAL BINS AND STEAM ROOM.

The present storage room for coal is simply an excavation with wooden side protection to prevent the surrounding earth from caving in. The rotten and decaying wood should be replaced by brick foundation walls on which should be erected a superstructure providing ample room for the drying or steam room, which is at present confined to an inadequate space in one corner of the laundry. It is an absolute necessity, at certain times of the year, to provide and store a sufficient quantity of coal so as to be protected against snow blockades, strikes, or impassable roads, therefore this improvement is to be placed in the category of immediate necessities, the cost of which will be, according to estimates made, \$2,500.00.

STEAM HEATING AND WATER PIPES.

During the severe winter months, and from the peculiar location of buildings, directly exposed to the cold blasts of north-westerly winds, our children have been subjected to great discomfort and annoyance, and an extra amount of fuel required, at a loss to the state, from the fact that our steam heating plants have been improperly constructed, and have thus compelled an entire change in the system, so far as appropriations of former General Assemblies would permit.

While new boilers have been provided, and the center building and west wing have received the attention demanded, the east wing and the school house especially require remodelling so as to make our entire system economical, effective and beneficial.

Another fruitful cause for the reasonableness of this expenditure can be traced to the fact that the water of our artesian well has a peculiar affinity for iron, and when the plant was first erected the precaution of using galvanized pipe was, possibly from want of funds, ignored, and consequently corroded and leaky pipes, dangerous from the possibility of explosion by steam, or equally so by the chances of an overflow, flooding tunnels and cellars, are met with in all parts of the system.

The probable cost of this improvement is, by close calculation, placed at fifteen hundred dollars (\$1,500.00).

FENCING.

With the exception of a new fence on the east side of forty acres, erected to replace one destroyed by an overflow of Mosquito creek in June, 1890, there have been no permanent betterments made to any enclosures surrounding the 157 acres, the property of the State.

Temporary repairs have been made as a matter of self protection, but the present fences should either be replaced by new ones or permanently and substantially improved.

The greater portion of our grounds are bounded by three well travelled highways, and our vegetable gardens, our meadows and orchards, and our growing crops are greatly exposed to trespassers, either transients from abroad, or strangers nearer home.

Again, to be just to our neighbors, it is our bounden duty to properly confine on our own premises our herd of cows, our stock of hogs, and our several teams of horses.

We respectfully suggest that an appropriation of seven hundred dollars (\$700.00) be made for fencing.

LIBRARY AND BINDING.

Perhaps no appropriation granted by the liberality of the prior General Assemblies has been more appreciated and the results more enjoyed by our children than the money granted for purchasing books. From a collection of public documents, patent office reports and a few readable volumes our library has grown to be an influential helpmate towards securing for our pupils that general knowledge and information which is a part and parcel of their intellectual training.

Access to the Library and Reading Room is granted to the pupils at reasonable hours, and the interest manifested by them and the beneficial results discerned in them prompts the request for another appropriation of four hundred dollars (\$400) for this purpose.

There is an accumulation of valuable reading matter, especially to the deaf, in the shape of serial publications in pamphlet form, reports of sister institutions, magazines, as well as a number of good books needing rebinding, and we are constrained to ask for an appropriation of two hundred dollars (\$200) for rebinding.

ELECTRIC LIGHT.

Recognizing and bowing to the wisdom of the Twenty-second General Assembly in apportioning a limited amount of the public funds to this Institution for the purpose of electric lighting, we find at this time, after the addition of necessary buildings, our dynamo capacity inadequate for the needs of our growing family. The contingency of possible breakage is ever present, and consequent darkness could then only be removed after wearisome delay of tedious repair, save what reliance could be placed upon our dilapidated gas machine.

Another dynamo would not only give us the additional light needed, but would also protect us from the calamity above referred to, in case of accident.

In this connection we again beg to refer to the matter of economy in adding to our plant a storage battery. Electrical science has in its present advanced stage provided the means for accumulating and storing the so-called electric fluid, and no electric light system can be termed complete without its storage battery. Having ample power, as furnished by our new engine and boilers, with these additions secured, no further appropriations will be necessary for many years to come, and the cost of providing light to this Institution reduced to a minimum.

The probable outlay for this purpose will be twenty-five hundred dollars (\$2,500).

GENERAL REPAIRS.

The absence of any provision of law concerning or governing this Institution by virtue of which certain amounts of money are regularly placed to the credit of a REPAIR FUND, out of which to defray the expenses constantly arising, compels the necessity of referring to this fact in every report, and asking for a special appropriation to meet these contingencies.

Necessarily, with so large a family of children remaining under one roof, and in one locality for the greater part of the year, and uneducated in part as to appreciation of values, breakages will occur, damages to buildings and furniture happen, and many necessary appurtenances to so large an institution as ours destroyed. We should also take into consideration the ordinary wear and tear incident to the continued occupancy of our dining rooms, play rooms, study rooms, dormitories and hallways.

Some of our State Institutions have a provision in their organic act, or amendments thereto, creating and maintaining annually a repair fund. We have not, and would respectfully ask for an appropriation of fifteen hundred dollars (\$1,500) per annum for the biennial period.

PAINTING.

We would most respectfully represent that the present condition of the wood and brick work of the older buildings demands that immediate attention which will preserve them from ruin and decay.

While the tower to the main building and the inside doors and windows have been repainted by means of the money appropriated by the last General Assembly, the outside walls and frame work exposed

to the weather have not been retouched since the buildings were erected.

While the cost of this needed improvement will amount to a comparatively large sum, yet as a matter of business economy and prudential management we beg to recommend an appropriation of three thousand dollars (\$3,000).

FURNITURE.

Extending, as the people of Iowa no doubt will, a general and sincere invitation to all visitors, both American and Foreign, who will attend the Columbian Exposition to sojourn permanently or temporarily within the boundaries of our great and prosperous State, it is meet and proper for us to prepare for their reception and place our "house in order."

All our State Institutions will unquestionably receive a large share of the attention of these strangers, and favorable impressions will but add to the good reputations these Institutions already enjoy.

Our general household furniture (excepting that used by pupils exclusively) needs renewal and additions. The reasonable comfort of officers, teachers and visiting parents and strangers must be considered, and therefore we would ask an appropriation of eight hundred dollars (\$800) for this purpose.

HORSES, WAGONS AND HARNESS.

Situated as we are, three miles from any commercial market or railroad station, the constant, daily use of teams in transportation of merchandise, and in attending to the necessities of pupils, as well as obeying the proper requests of teachers, officers and employes, has caused a deterioration of this part of the state's property.

In addition thereto consideration must be taken of the fact that work incidental to cultivating our farm proportionally from year to year, diminishes the service as rendered by horses, wagons and harness.

It has been deemed best to call your attention to this matter, and respectfully request an appropriation of one thousand dollars (\$1,000) for this purpose.

NEW BOILER FOR INDUSTRIAL SCHOOLS.

By the liberality of preceding General Assemblies our Industrial Schools have been favorably recognized, and the advancement of the scholars in the last four years has been such as to demonstrate to the satisfaction of the management that the assistance thus rendered has been well spent.

There yet remains one important and absolutely necessary improvement. The boiler in the basement of the building supplying steam to the engine and heat to the various shops is pronounced by experts to be unsafe. We are compelled to lower the pressure to a minimum in order to avoid the possibility of a serious accident. We deem it, therefore, only necessary to call your attention to this fact as a warrant for our urgent request for an appropriation for fifteen hundred dollars (\$1,500) for a new boiler and placing same in position.

COMPLETION OF DINING ROOM AND ADDITIONS.

The building erected for the purpose of enlarging the pupils' dining room, and providing accommodations for offices, library, museum, reading room, gallery to chapel, and vault has been completed so as to serve its purpose with the exception of the gallery to the chapel, and rooms immediately in the rear thereof, and the upper story of same.

The appropriation economically and judiciously utilized was not sufficient to provide for the flooring, plastering, painting, heating and finishing of these desirable and intended additions, and in order to make them available, an outlay of fifteen hundred dollars (\$1,500) will be necessary.

We respectfully ask, in order to remove this incomplete state of the building, an appropriation of the above amount.

ARTESIAN WELL AND WATER SUPPLY.

The most serious question which has confronted us during the last biennial period, and which in its ever daily presence overshadows all anxious cares for the betterment and improvement of other departments and conditions, presents itself in the fact that the water supply, as gained from the Artesian well, has decreased to an amount below the needs of the Institution.

When the well was erected some eight years ago its capacity (from 40 to 50 gallons per minute) was more than ample to supply all demands of the then family of children. At the present time the flow is but 7½ gallons per minute, and alarmingly insufficient to meet the requirements of our increased necessities. Experts have been consulted, minor attempts by attaching a steam pump have been made and hopes entertained of a return of the former abundant flow. The absolute fact, however, remains that either the present well must be rebored or repiped, with some hope of success, or a new well erected. The urgent necessity of this matter cannot be over-estimated, when we consider that in addition to the dearth of water for general use, its

absence in our reservoir places the entire building at the mercy of any fire which might accidentally occur.

So important seems the consideration of this deplorable state of affairs that speedy action is respectfully recommended, by appropriating the sum of four thousand dollars (\$4,000) for said purpose, or so much thereof as may be necessary.

RESETTING OF BOILERS, PIPE COVERING AND EXHAUST HEATERS.

It has been a practice pursued in this Institution that where available funds would warrant, an immediate expenditure was made to save a larger outlay in the future.

This principle of proper business ways and prudent husbandship demands its application in utilizing what is produced, and preventing, as far as can be, any possible waste. The large radiating surface of our steam mains and pipes, passing through tunnels and hallways and exposed to cold air draughts, condenses the steam within so rapidly that by approximate calculation 20 per cent of this generated heat and power is lost. To obviate this and consequently reduce the consumption of fuel, it is recommended that all the steam pipes be protected by a non-conducting covering, the cost of which, as per estimate furnished, will amount to six hundred dollars (\$600).

The two boilers heating the School house should be reset with new grating, which improvement would necessitate the outlay of four hundred dollars (\$400), but would in a few years be returned to the State on account of the saving of coal.

All well regulated steam plants have attached thereto an exhaust heater, by means of which the exhaust steam is utilized in heating water, thus saving the large expenditure in securing the hot water so necessary in all the departments in the ordinary manner.

From the best advices at our command an exhaust heater can be purchased for five hundred dollars (\$500), making, therefore, the total appropriation asked for in the line of strict economy and saving fifteen hundred dollars (\$1,500.)

SMOKE STACK.

At the last General Assembly an appropriation was made for steam heating and repair of smoke stack.

Upon active work and close examination of steam heating in the west wing and central building, and consequent tearing out and changing by expert mechanics, there was found to be so much of defective pipe, and such utter disregard of the principles of heating and ventilation, that in order to make the work complete, the entire appropriation would be exhausted.

Again, temporary repairs of the smoke stack would but partially remedy the danger and trouble, and therefore the conclusion was reached to rely upon the wisdom of the incoming General Assembly.

We therefore respectfully suggest that an appropriation be made of two thousand dollars (\$2,000) to build a new stack in place of the present one, the capacity of which is inadequate, and the condition of which, ere long, may result in overthrow and dangerous accidents.

REPAIRS OF ELEVATOR.

The elevator leading to the hospital in the fifth story of the main building, and which affords easy access to the dormitories and trunk rooms in the intermediate stories below, has been and is of great usefulness to all. In fact without it, the arrangements and occupancy of the various parts of the building would not meet the requirements of the institution. The iron piston rods, two in number (two inches in diameter and thirty-two feet in length) are gradually succumbing to the corroding influences of the water, and must be replaced by some material such as bronze or brass, the tensile strength of which cannot be reduced by the influence above named, and would therefore remain permanently for years to come. The cost of these rods and replacing same in cylinder as offered by the manufacturer, will be five hundred dollars (\$500), for which an appropriation is asked.

WATER HEATER AND FEED COOKER FOR COW BARN.

The great distance between the new cow barn and steam boilers precludes the possibility of a hot water supply at the barn from this source. An independent system must be inaugurated which can be done at but comparatively small expense. A water heater located within safe distance to which can be attached a feed cooker for stock, is an indispensable addition to this permanent improvement, established two years ago. It is not necessary to dwell on the value and beneficial results to cattle and hogs arising from properly prepared food, which in the long winter months can only be done by means of the conveniences asked for.

The sum required will, according to inquiries made, amount to four hundred dollars (\$400).

AN ADDITIONAL STATE SCHOOL FOR THE DEAF.

Casting a retrospective glance over the years of the past, bearing in mind that progress in institutions of this character is always slow; recognizing the ever ready fostering care of the executive and legislative departments of the State, coupled with a full knowledge of our own satisfactory condition, we realize that we have reached that point

in our existence when we have no regrets for bygone days, and are in a position to enjoy the bright hopes of a prosperous future.

Would the incoming General Assembly in its wisdom and generosity recognize our needs as herein set forth, and gratify our sincere requests, as herein made, the realization of which would be experienced within the next biennial period, the Iowa Institution for the education of the Deaf and Dumb will be in the proud position of being favorably compared with the best in the land. Its appurtenances; its conveniences; its schools and its workshops will be ample for the accommodation of all who shall seek admission at its portals. And its standard, its influence and its blessings would be welcome to the most critical, and beneficial to the most unfortunate. This fact alone should be a convincing argument that no minor branch or division school located elsewhere in the state could serve a similar purpose, or be of equally as material benefit. Suicidal in part to this institution, prejudicial to the best interests of its would be beneficiaries, and costly to the state its life would be that of uselessness, and its existence of but short duration.

WORLD'S FAIR.

At the coming universal exposition to be held in Chicago, Illinois, Iowa presumably will be represented in a manner fitting to the proud position she occupies in the sisterhood of states, by the products of her fruitful soil, the evidences of her commercial wealth, the specimens of her artisan's studios, the fruits of her busy work shops, the treasures of her hidden mines, and grandest of all the results of her public school system. To this latter class this institution properly belongs. May we ask to be permitted to contribute our mite toward the general success, by exhibiting the beginning, progress and ending of our mental and practical training of these isolated children, creating thereby, perhaps, friendly comparisons with other similar schools, which may thus become welcome promptings of emulation and consequently sources of mutual benefit.

At the Iowa State Fair of 1890, this institution enjoyed the privilege of an exhibition of its art and industrial departments, which received the commendations of many and was honored by the award of a silver medal by the management.

It is with pardonable pride therefore that we express a readiness to appear before a larger audience, to assist in demonstrating Iowa's care for her unfortunates, and Iowa's liberality to her children.

CONCLUSION.

With reference to the school proper, the central and centralizing point of our system, under the direct charge and management of

Prof. G. L. Wyckoff, assisted by an able corps of seventeen instructors, I beg to refer to his report, annexed hereto.

In pursuance of law, I also submit a report of studies pursued and trades taught. I also append a financial statement of receipts and expenditures, and a list of all pupils attending school, with name, sex, age, residence, place of nativity and cause of deafness, as far as same can be ascertained.

Recognizing the ready and valuable authoritative direction of the Honorable Board of Trustees, and grateful to all officers, teachers and employes for their willing assistance, this report is hereby submitted to your kind and careful consideration.

HENRY W. ROTHERT, *Superintendent.*

OFFICERS AND TEACHERS.

The following is a list of the officers and teachers at the end of the biennial period with salaries paid each :

Henry W. Rothert, superintendent, resident.....	\$ 2,000.00 per annum.
G. L. Wyckoff, principal, non-resident.....	1,700.00 "
Edwin Southwick, teacher, non-resident.....	1,050.00 "
Conrad Zoarbaugh, teacher, non-resident.....	1,050.00 "
Frank C. Holloway, teacher, non-resident.....	1,150.00 "
C. Spruit, teacher, non-resident.....	1,250.00 "
W. S. Marshall, teacher, non-resident.....	1,250.00 "
Hiram Phillips, teacher, resident.....	1,150.00 "
John W. Barrett, teacher, resident.....	540.00 "
Florence Wilcoxson, teacher, resident.....	550.00 "
A. M. Ewing, teacher, resident.....	400.00 "
M. K. Stevenson, teacher, resident.....	350.00 "
Fannie Glenn, teacher, resident.....	400.00 "
Callie Schuff, teacher, resident.....	350.00 "
Margaret Watkins, teacher, resident.....	550.00 "
Ollie Tracy, teacher, resident.....	250.00 "
Florence Clement, teacher, resident.....	600.00 "
Margaret Hamilton, teacher, resident.....	550.00 "
Olive Bruning, teacher, resident.....	550.00 "
Mrs. Henry W. Rothert, matron, resident.....	600.00 "
Alexander Hardie, book-keeper, resident.....	65.00 per month.
J. J. Kies, boys' supervisor, resident.....	50.00 "
Martha Dinsdale, girls' supervisor, resident.....	40.00 "
Mrs. Helen A. Steere, small boys' supervisor, resident.....	30.00 "
Mrs. M. E. Brown, nurse, resident.....	20.00 "
F. W. Balluff, engineer, non-resident.....	85.00 "
Elmira Mickle, foreman of sewing department, resident.....	25.00 "
Annie Pool, foreman of ironing room, resident.....	18.50 "
G. C. Taylor, foreman of carpentering, non-resident.....	70.00 "
L. W. Pound, foreman of shoe-making, non-resident.....	50.00 "
Zach. B. Thompson, foreman of printing, resident.....	40.00 "
D. Reckabaugh, foreman of broom-making, resident.....	25.00 "

TRADES TAUGHT.

Attention is paid to the following practical Education of the children.

BOYS.

Printing.
Carpentering.
Shoemaking.
Broom-making,
Baking.
General Farming,
Flower Gardening.

GIRLS.

General Housework,
Plain Sewing,
Embroidering,
Dress Making,
Cooking.
Vegetable Gardening.

OUR SCHOOL HOUSE.

We take much pleasure in introducing to our readers a cut and short description of our school-house. It is built of brick, two stories high, besides a basement and attic, with a slate roof. The figure is that of a square with wings. The location is on a gentle rising eminence, at a distance of about fifteen rods from the main buildings. The first and second floors each have five school rooms on each side of a hall passing through each story. That makes twenty large sized, well ventilated recitation rooms, each of which is supplied with individual folding seat desks for the scholars, and heated by steam from our boiler house. Each school-room has a cloak room for the use of the scholars and a closet for the use of the teacher. The recitation rooms average 20x30 feet, and a blackboard 4½ feet wide extends around all the walls. Two sash in each window have square glass 2½x2½ feet — transoms of colored glass surmount each window, and serve as ventilators — transoms also surmount the doors of the recitation and cloak rooms and serve the same purpose. The location affords a view of landscape scenery across the Missouri to its banks on the Nebraska side, with Lake Manawa and the cities of Omaha and Council Bluffs in the distance.

PRINCIPAL'S REPORT.

PRINCIPAL'S REPORT.

To the Board of Trustees:

GENTLEMEN: The close of another biennial period brings with it the obligation to render to you a report of the operations of the Educational Department. A wise man has said: "Happy is the country that has no history," and as in the years now brought to a close no startling changes or wonderful events are to be recorded, we may safely suppose that they have not been the less profitable to those given into our charge. Substantial progress in all departments of the school has rewarded the faithful efforts of teachers and pupils.

The special problem in the instruction of the deaf, distinguishing this work more distinctly from other educational effort, lies in the mental condition of the child when received at the school. In the minds of most people who have not fully considered the subject, the instruction of the deaf differs from that of the normal child only in the means employed. No greater educational mistake than this could be made. In the scholastic training of the hearing child a certain amount of previous mental development and familiarity with language and facts immediately surrounding us is taken for granted. Upon this assumption the skillful teacher builds up a structure of information and mental strength. With the deaf, the foundation must be sought much deeper. The very beginnings of knowledge are founded upon a comprehension of language. Even a skillful trainer of animals will not undertake to secure results until he shall have given to the subject of his labors some understanding of language. A deaf child who has heard no spoken word is as though no word had ever been spoken. He has *no* language. Before he can take up the ordinary studies of the schools he must receive this great gift from God to man. The child at its mother's knee hears constantly repeated the commands which, by dint of connection with visible objects it finally comes to comprehend; so with all other forms of speech. It is only by many repetitions that a simple announcement comes to have meaning in the mind of a child. Little by little the language of the home and fireside is acquired,

until, at the age of six or seven, when the little one enters upon its first term in a public school, it has already absorbed all the essential elements of its native tongue. Mentally, the effect of language possessed has been vividly marked. The reflex as well as the direct influence upon his mentality has caused a tremendous quickening of powers. He is possessed of a momentum that can carry him to any height. The deaf child, on the other hand, has lacked all this powerful stimulus. Close shut within himself, he has remained an infant in mind while becoming a youth in stature. The skill and methods sufficient for his hearing brother and sister can accomplish nothing for him. He requires the services of a specialist, an expert—one who can open to him the world of thought heretofore closed by his dulled ears. He who would teach him must indeed be, in the best sense of the word a *teacher*.

The value of a teacher depends not upon scholarship, zeal, nor a knowledge of methods. These are indispensable, but they are only subordinate parts of the equipment of him who would stand forth as the architect of the young lives given into his hand to mould and form.

Perfect method, ripe scholarship and enthusiasm do not make the perfect school. These are, and perforce must be accepted for the great mass of the children of the state, but their development is more eagerly in the hands of parents and associates than in that of their teachers. The deaf, however, is what the teacher has made or has failed to make them. With them it is emphatically true that the real teaching force resides in the individuality of the teacher which the Lord has made, and not man, and which is worth more than all the methods laid down in all the books. The indispensable condition to the development of mind is the close contact with other minds, and methods are of value only as they assist in bringing about this intimate relation.

Hemmed in by barriers formerly considered so insurmountable that among ancient nations deaf mutes had no legal rights, their delivery from the thralldom of ignorance is difficult, indeed. It will therefore readily be seen that teachers capable of the task should not be classed or paid with those of public schools. This has come to be generally recognized, but perhaps not to the extent that justice and expediency demand. During the two years just past, we have, as in the years before, been compelled to admit that the State of Iowa, proud as she is of her educational record, has not held out such inducements to her teachers of the deaf as would suffice to keep them in her service. As compared with the schools for the deaf in other States I feel that we have in Iowa an institution that does not suffer by comparison, but we are still far from possible goal. To reach it or approach our

instructors must be of the best, and of the ripest experience. When they become efficient in our service we must be able to retain them. Since the date of my last report four of our number have handed in their resignations; one Miss Kennedy, to assume the higher obligations of married life, and three others — Mr. McDermid, Miss Garman and Miss Sutton, attracted by greater inducements elsewhere than we were able to offer. Iowa need not become merely a training school for other States, but in order to retain its own it must furnish adequate provisions for them. The fund from which our teachers are paid was established some years since when the number of pupils, and of course the number of teachers also, was smaller than now, so that I venture to hope that enlarged provision will be made by the next General Assembly.

The average attendance of pupils for the last two years has been slightly above 280. This is far below the number that should be enjoying the privileges of school. I have the best of reasons to suppose that were every deaf child of proper age and suitable condition within the state in attendance, our number would be nearly doubled. A law, properly guarded, should be passed, compelling parents of deaf children to place them under instruction. An illiterate hearing person is considered in some measure a menace to the state and society at large. An uneducated deaf mute is an irresponsible being, scarcely less to be dreaded or pitied than the wild beast. In no case can the responsibility for his condition be thrown upon himself. Parents and guardians are the only ones who can be blamed.

Another evil of great proportions might be greatly lessened by appropriate legislation. I allude to the short average length of time our children are with us in school.

Many are withdrawn after one or two years in the class rooms, and the average attendance of all who have left us within the last four years is, including graduates, but a trifle more than four years. It may be urged that this is equal to the average of the public schools of the State, which is indeed true, but it must be remembered that four years for a deaf child, beginning with no knowledge of language and having almost no understanding of the thousand and one things that the hearing child gets unconsciously, by absorption as it were, leaves him far behind his hearing brother in the power to compete in the race of life. Should he not be given not only the opportunity to learn but be compelled to accept it?

During the last two years the pupils of the school have been divided into sixteen regular classes. Fourteen of these classes have been taught chiefly through the medium of signs and written language. Two have been taught exclusively by speech and lip reading. Some

pupils of these classes have remnants of hearing, though too deaf to pursue the studies of the public schools in the ordinary way. These have had special attention in aural methods with intention to utilize and retain the hearing possessed. Some pupils from sign classes have also been given special drill in articulation so that now no method of instruction approved by the experience of the instructors of the deaf is neglected or discarded. Miss Clement, the special teacher of drawing, painting, wood carving and penmanship, has had no class separate from the regular classes of the school, but has given supplementary instruction in these branches to pupils drawn from other classes. I am happy to state that the result of her labors, as proved by the handiwork of her pupils, has once more established the wisdom of the special drill in this direction.

As I have said in the beginning of this report, the biennium as a whole has been one of steady progress, but there has been some drawbacks. The condition of the heating apparatus in the school house has been such that many times neither teachers nor pupils could work in the school rooms with comfort. There is no remedy for the existing condition except by the entire removal of the present appliances, and the substitution of a modern system, carefully gauged to the necessities of the case.

The present blackboards are unsuited to the uses to which we have to put them. We make much larger use of the blackboard than is made in public schools, and should have the best. In all similar schools in the country, and in the school for the feeble-minded at Glenwood, real slate stone boards are used. We should have the same. The first cost would be considerable, but that ought not to be considered.

The course of study has not been changed in any essential point since my last report. Some minor changes affecting methods more than matter have been made, but these need not be considered here. My aim in all things connected with the course has been to insist more upon thoroughness and accuracy in a few prime essentials of mind development rather than to fritter away the energies of pupils and teachers in obtaining a smattering of many things with a mastery of none.

In this, as in all other matters connected with my work, I have to thank you, gentlemen of the board, one and all, for cordial co-operation and generous support.

Respectfully submitted,

G. L. WYCKOFF, *Principal*

COURSE OF STUDY.

FIRST GRADE.

Language.—Names of objects in the school-room; names of members of the class; articles of household and kitchen furniture; articles of dress; parts of the body; days of the week, and the names of all things with which the pupils are presumably familiar may be taught. The article *the* is to be used before nouns in all cases where an article is demanded. Both singular and plural forms of nouns are to be taught. All the personal pronouns except the reflexives. The adjectives of number to ten, and simple adjectives of kind and quality, such as good, bad, rude, hot, cold, sick, well, as part of the copula. The prepositions on, into, of, from, off, to and with. Verbs describing simple actions in the past tense; the verb to be in past and present tense; a few verbs expressing emotions in the present tense; questions: Who? Where?

Let the greater part of the instructions be by topics, selecting only those with which the pupil is presumably familiar, as cooking, sewing, baking, washing, etc. Pay particular attention to sequence of events. No text-books.

SECOND GRADE.

Language.—Nouns, names of things seen or used in the ordinary work of the school, kitchen and dining-room, farm, barn and garden, with the verbs, adjectives and other parts of speech necessary in describing, in simple sentences, all of the operations of the same; the future tense, the words told, asked and said followed by a quotation, the infinitives of purpose, the indefinite numerals, such as some, many, several. Avoid the use of the habitual present tense and teach the actual present of a few verbs that do not form the actual present with *ing*.

Continue instruction by topics, as in first grade. Questions, the direct form: Whose? How many? Which? When?

Arithmetic.—All the fundamental operations with numbers below twenty, using actual quantities. Avoid all abstract numbers.

No text-books.

THIRD GRADE.

Language.—Trades and occupations, operations, tools and products of the same. All tenses of the verb except the past and future perfect, comparison of adjectives, adverbial phrases of time, as last night, next week, etc. Infinitive as object of the verb; the reflective pronouns. Journal. Questions.

Arithmetic.—The same as second grade, with larger numbers. Drill with figures.

Geography.—Local, with direction and distance. Map of school-room and surroundings.

No text-books.

FOURTH GRADE.

Language.—Trades and occupations continued, collective nouns, the infinitives after make, let, help, see; the potential mood, with may, must and can; also negatives. The conjunctions, either—or, neither nor, both—and, whether—or. Drill in infinitives. The words somebody, nobody, anybody, and comparison of adjectives. Journal, and picture descriptions. Questions requiring the passive voice in answer.

Arithmetic.—Mental and practical problems; notation and numeration, complete; United States money, complete.

Geography.—State, with special reference to lines of travel. Use sand-board.

No text-books.

FIFTH GRADE.

Language.—Special drill in use of auxiliary verbs, the passive voice, the present and perfect participle. The potential mood, complete; comparison of adjectives; natural history; stories. Journal.

Arithmetic.—Practical problems and drill exercises. Compound numbers begun.

Geography.—Exercises upon outline maps; descriptive lessons of principal countries.

History.—Stories by teacher.

No text-books.

SIXTH GRADE.

Language.—Special drill upon the connectives, the relative pronouns and the subjunctive mood. Narrative and descriptive composition. Journal.

Arithmetic.—Practical problems and drill exercises, Compound numbers continued.

Geography.—From maps and descriptive lessons prepared by teacher. Map drawing.

U. S. History.—Lessons prepared by teacher.

SEVENTH GRADE.

Language.—Special drill upon moods and tenses, participial and infinite constructions. Analysis of simple sentences by diagrams. Sentence building. Text book—Swinton's Language Primer.

Arithmetic.—Fractions completed.

Geography.—Completed. Text-book—The Electric.

U. S. History.—Colonial Period Completed.

EIGHTH GRADE.

Language.—Composition, new words and idioms; thorough review of connectives, tenses and participles. Analysis by diagram of all the complex sentence. Text-book—Swinton's Language Lessons.

Arithmetic.—Practical problems. Text-book—Felter's Intermediate.

U. S. History.—Swinton's Condensed completed.

Physical Geography.—Lessons prepared by teacher.

NINTH GRADE.

Language.—Composition; idioms; Construction Exercises including expansion and contraction of sentences; Analysis and parsing from diagrammed sentences; original sentences illustrating classification and use; Drill in using elements of the sentence.

Text-book.—Swinton's Language Lessons.

Arithmetic.—Percentage and interest, Text-book—Felters Advanced.

Physical Geography.—Warren's Completed.

History.—Text-book. Thalheimer's.

Civil Government.—Weekly lectures by teacher.

TENTH GRADE.

Language.—Swinton's Grammar, Kerl's Rhetoric. Idioms and punctuation.

Arithmetic.—Felter's Advanced Completed.

NEW COW BARN.

This structure was erected especially for our herd of Holstein Cows, forty in number. It is situated on the easterly side of our grounds near the fish pond. It is built of frame in modern style. The barn is 112 feet long, 38 feet wide and measures from ground to top of cupola 40 feet. The front two story annex is occupied below as harness room while the second story is intended for living room for the foreman in charge. It has all modern convenience, being provided with an ample supply of water from a drive well forcing same into a large receiving tank in second story from where it is distributed by pipes to all parts of the barn. A tile sewer with laterals reaches every part of the stable floor. The loft contains the hay and grain and food for horses and cattle. A large hallway or drive 10½ feet wide runs through the center on either side of which are located the horse stalls (ten in number) and the cow stalls (forty in number). Horse stalls are made of solid oak plank while the cows are fastened by Newton's patent cow tie, a device which render stanchions and partitions useless. The name of every animal in the barn is painted above the stall and in the rear of each cow slates have been fastened on the side wall upon which the daily results of milking are written, which being copied, gives a complete record of each animal. In the cow lot, but detached from the main building are wagon and buggy sheds, calf stalls, hay racks and corn cribs. As a whole, with all its appurtenances, it is a very commodious and complete structure.

HORSE BARN, CARRIAGE SHED AND TOOL HOUSE.

For the accommodation of the farm teams and placing under shelter the wagons and farm machinery this building was erected in 1882. It is forty feet long by thirty-seven feet wide. The lower or basement story is of brick, while the upper or second story is of frame. It is easy of access, and so constructed as to afford ample storage room in loft for hay and grain, while the stalls in first story will accommodate twelve horses. It has electric light both inside and outside and is in near proximity to both water station and hay scales. The Carriage Shed and Tool House are one-story frame structures erected for the purpose their names respectively imply. They are conveniently situated adjoining the Horse Barn, and afford the necessary accommodations for the protection of all the tools and the lighter vehicles and machinery belonging to the institution.

STATEMENT.

Showing Expenses During Biennial Period Ending June 30, 1891.

DATE.	WARRANT.	TO WHOM PAID.	ON WHAT ACCOUNT.	AMOUNT.

PUPILS' DINING ROOM AND CHAPEL.

This structure is situated immediately in rear of and adjoining to the main building. The entire lower floor, seventy by eighty-five feet, is assigned as a pupils' dining room. Access to this room is had by doors on the east and west side as well as by hall ways leading direct from boys' and girls' play rooms. It contains thirty-six tables, each table seating eight pupils. The same system of steam heat, gas and electric light prevails here as elsewhere. The chapel, in second floor, is seventy feet long and fifty feet wide and twenty-five feet high. It is furnished with three hundred chairs for the accommodation of the pupils. An elevated platform or stage covers the center of the south wall. A large gallery runs the entire width on north side of chapel room thus affording all facilities for a large convenient audience room. The space remaining between chapel and main building on second floor and above pupils' dining room, is divided into commodious rooms for library, reading room, museum, board room, superintendent's main office and book-keeper's office. A large hall way passes through the center while two pairs of large folding doors open into chapel so as to secure additional room for chapel purposes when occasions require it. Above these rooms and in rear of gallery, in the third story of the building, are four large sleeping apartments for officers of the institution. This new addition, viz., the enlargement of pupils' dining room, gallery, library, and offices and private rooms above was erected, in 1890, by provisions of the Twenty-third General Assembly and affords adequate accommodations for the purposes intended.

LAUNDRY AND KITCHEN.

Immediately in rear of pupils' dining room is situated the kitchen. It is a two story building containing, on first floor, two pantrys, steam room and kitchen proper. The floor is of cement and the ceiling of corrugated iron and walls plastered. Two dumb waiters lead from this floor to the floor above covering three rooms used respectively for helps' dining room, officers and teachers' dining room and superintendent's dining room. The laundry is a large two and one-half story building with basement or cellar below. Here are placed the five large boilers which supply the steam for heat and power. On first floor is the laundry proper divided into three rooms, receiving room, supply room and wash and steam room. A small engine runs the washers, wringers and mangel above. The second floor is the ironing department. Here is situated the ironing school where the girls under competent training are taught this important branch of household work. In the southwest corner of this building, a large room has been set apart for the Cooking School and supplied with stove, pantry and cooking utensils, a truthful copy of a well appointed kitchen.

LIST OF PUPILS IN ATTENDANCE IN THE BIENNIAL PERIOD
ENDING JUNE 30, 1891.

MALES.

NAMES.	POSTOFFICE.	COUNTY.	Age.	NATIVITY.	CAUSE OF DEAFNESS.

INTERIOR VIEW OF A BOYS' DORMITORY.

The boys have single bedsteads and sleep one in a bed. These iron bedsteads are of the latest and most approved pattern with woven spring wire mattress. The bed proper consists of one mattress, one protector, two sheets, one or two comforts, one spread and a feather pillow. There are twenty-two dormitory rooms, fourteen on fourth floor and eight on third floor, for the accommodation of the boys. These rooms are of various dimensions and the bedsteads are so arranged as not to crowd any one room to the discomfort of the pupils. A steam radiator in each room provides the necessary warmth in winter, and due attention has been and is being paid to proper ventilation. Small gas jets are kept burning in hallways, water closets and stairways during the entire night, while during the early hours of evening or morning electric light is furnished to every room. Window shades are provided to every dormitory, while some have inside blinds. Pupils are required to make their own beds under the supervision of an attendant.

INTERIOR VIEW OF A GIRLS' DORMITORY.

All girls' Dormitories are provided with double wooden bedsteads furnished with spring mattresses on which rests wool mattress covered with sheets, comforts and feather pillows. There are fifteen rooms assigned in third and fourth stories for girls' sleeping apartments. Like those on the boys' side, they have steam heat, electric light and gas and each window provided with shades. It has been the aim to make these Dormitories as homelike as possible. Each have the requisite number of chairs and tables, also portable wardrobes for the wearing apparel of the children. In order not to encumber the bed rooms, special trunk rooms are provided on each floor to which pupils have access under supervision of the supervisors. In each Dormitory, thermometers have been placed and a record thereof is made three times during the night by the Lady Night Watchman in charge and filed with the Superintendent every morning. Pictures and keepsakes sent by loving friends adorn the walls and are placed on the tables for the amusement and comfort of the pupils.

SOUTH WING OF INDUSTRIAL SCHOOLS.

This building was erected in 1875 and at that time considered ample to provide for the wants of the school. It is a good brick structure two stories with tin roof. It is eighty feet long and thirty feet wide, each floor divided into two large shops with hall and stairway in the center. The basement or cellar is occupied by boiler and engine room and paint shop. The ground floor south side is the carpenter shop proper, while the north room is the machinery hall in which are turning lathes, circular saws, board saws, mortice machines, etc. The second floor immediately above machinery hall is a room thirty by thirty-six devoted to the tailoring department. This is perhaps the best finished room in the entire building having oak floor, oak wainscoting and oak finish. The room south of this on second floor and immediately above the carpenter shop is used for the shoe shop. All necessary benches, tools and machinery are contained in this room to assist the pupil in securing a knowledge of the trade. Each floor has steam heating and electric light. The entire building is suitably arranged for the purposes for which it was built.

REPORT OF A. T. FLICKINGER, TREASURER OF THE IOWA INSTITUTION FOR THE EDUCATION OF THE DEAF AND DUMB.

For the biennial period ending June 30, 1891.

To His Excellency, HORACE BOIES, Governor of Iowa:

I, A. T. Flickinger, treasurer of the board of trustees of the Iowa institution for the education of the deaf and dumb herewith submit this, my report, of monies received and disbursed by me as such treasurer for the biennial period ending June 30, 1891, as follows:

A. T. FLICKINGER, *Treasurer.*

RULES.

TO BE OBSERVED BY OFFICERS, RESIDENT TEACHERS AND
EMPLOYEES.

ORDERED BY THE BOARD OF TRUSTEES.

IOWA INSTITUTION FOR THE EDUCATION OF THE DEAF AND DUMB, }
SUPERINTENDENT'S OFFICE, October 1, 1889. }

RULE 1. The hospitalities of the Institution can be extended only through the Superintendent and no courtesies as to meals or rooms can be offered by any one without first receiving that officer's consent. This is to apply to relatives, friends, parents and patrons.

RULE 2. A record shall be kept of all visitors and when meals or rooms are furnished the same shall be reported to the Board by the Superintendent.

RULE 3. The conveyances and horses belonging to the State are not to be used for private purposes or the accommodation of any one save in the discretion of the Superintendent. It being distinctly understood that no rights can be claimed appertaining thereto except for the purpose of attending church. In no case shall the Superintendent permit the service of teams for social or personal purposes if at such time the needs of the Institution or the benefit to the children demand their use.

RULE 4. All private rooms in the main building shall be subject to inspection for sanitary purposes by the Superintendent at such times as may be deemed proper by him and not less than once a month.

RULE 5. Meals shall be served promptly at the time stated in time tables and no one shall have the right to claim service at any or later time except in case of sickness.

RULE 6. Pupils are not servants, and where the service of any pupil, when not at school, for any regular work or assistance to officers, teachers, or employes is wanted, request must first be made at the office, permission obtained, and compensation agreed upon. Incidental service of scholars not included in above.

RULE 7. All lights in private rooms shall be extinguished at 10 P. M. Whenever this rule is not complied with unless suspended in individual cases by the Superintendent for good cause, the expenses thereby incurred shall be deducted at each monthly payment.

RULE 8. Whereas it is expected that each officer, teacher and employe will contribute his or her share in securing proper economy in light, heat and water supply, a strict attention to the rules governing the same will be enforced. When rooms are not in use, the lights, either electric or gas, must be extinguished, the radiators must be closed, and at all times a proper attention to closing of doors and windows by every one exacted. All will be held accountable for a useless waste of water.

RULE 9. All breakages and damages to furniture, apparatus or buildings, whether made by children or adults, shall be immediately thereafter reported at the office and whenever it shall be clearly shown that same has occurred through carelessness or negligence, the cost of repairing same shall be charged to the party guilty thereof.

RULE 10. The time of officers and employes belonging to the state for such hours as may be designated by the Superintendent or agreed upon, when entering service, and any absence from duty on account of personal business shall not be permitted unless by consent of Superintendent and then only for an urgent and important cause.

RULE 11. The Superintendent shall have the right to appoint or discharge. In all cases where an officer or employe desires to sever his or her official connection with the Institution, he or she shall give notice thereof to the Superintendent fifteen days prior thereto.

RULE 12. The clock in Superintendent's office shall be standard time and all clocks and watches must be governed thereby.

A proper recognition of, and a willing compliance with, above rules will insure a satisfactory and contented relationship with and among all parties concerned.

HENRY W. ROTHERT,
Superintendent.

TIME CARD.

MONDAY, TUESDAY, WEDNESDAY, THURSDAY, FRIDAY.—WHISTLE.
