there came 18; from No. 11, in which there had been an attendance of only 8 pupils, there came 18, and from the Harpersfield district, in which there had been an attendance of 14 pupils, there came 23. The number of pupils enrolled in this school was 107, with an average atterdance of 73.

"Having tried the new plan for a year, it is no longer an experiment, but an experience, with us; therefore, let us now candidly look at the results. First, I wish you to know what the patrons of the consolidated school think of the plan, and then to give you, as briefly as I can, some of my own observations. All the patrons of the school of subdistrict No. 10 of Madison, and in subdistrict No. 1 of Harpersfield, have signed a paper stating that they are well pleased with the plan and its results, and asking their respective boards to continue the plan another year. While there has been no canvass at Unionville, subdistrict No. 4, to ascertain what the people there think of the plan, yet, from what I have heard, I am confident that they are unanimous in its support. The foregoing represents the opinion of patrons who send 89 of the 107 pupils to this school. A large majority of the patrons in subdistrict No. 11, who send 18 of the 107 pupils to the school in question, have publicly expressed themselves as being dissatisfied with the plan, and that under it their children have not received the educational advantages which they ought to have received. Further comment is unnecessary.

"Following are some of the good results which have come under my personal observation:

- 1. A much larger per cent of enumerated pupils enrolled.
- 2. No tardiness among the transported pupils.
- Irregular attendance reduced, the per cent of attendance of transported pupils from two subdistricts being each 94 per cent, the highest in the township.
 - 4. Pupils can be better classified and graded.
 - 5. No wet feet or clothing, nor colds resulting therefrom.
- 6. No quarreling, improper language or improper conduct on the way to and from school.
- Pupils under the care of responsible persons from the time they leave home in the morning until they return at night.
- 8 Pupils can have the advantage of better schoolrooms, better beated, better ventilated and better supplied with apparatus, etc.
- 9. Pupils have the advantage of that interest, enthusiasm, and confidence which large classes always bring.
 - 10. Better teachers can be employed, hence better schools.
 - 11. The plan insures more thorough and complete supervision.
- 12. It is more economical. Under the new plan the cost of tuition per pupil on the basis of total enrollment has been reduced from \$16 to \$10.48; on the basis of average daily attendance, from \$26.66 to \$16.07. This statement is for the pupils in said subdistricts Nos. 10 and 11.
- 13. A trial of this plan of consolidating our schools has satisfied me that it is a step in the direction toward whatever advantages a well-graded and well-classified school of three or four teachers has over a school of one teacher with five to eight grades, and with about as much time for each recitation as is needed to properly assign the next lesson."

STATISTICS.

1896-1897.

Report September 30, 1897, general summary of statistics, of school districts, schools, teachers and scholars xxviii 8; of schoolhouses, apparatus, district libraries, trees, temperance instruction and teachers' fund xxviii 0; of schoolhouse and contingent funds xxviii 10; of county super-vision, examination of teachers, visitation of schools, appeals, compensation of county superinteedents, private schools and teachers' normal institutes, xxviii 11; permanent school fund xxviii 12; cost of schoolhouses xxviii 13; growth of the public schools xxviii 15; comparison for five years xxviii 15; introduction, interest in public education manifested, importance admitted, the public school a training ground for citizenship xxviii 17; growth of lows schools xxviii 18; statistics of growth by decades xxviii 17; academies and colleges established at an early day, Governor Locas' wise recommendations as to the township unit, relation of the new constitution to the promotion of education xxviii 20; increased trend towards free schools, 1816 to 1856, sentiments from messages of Governors

116

Hempstead and Grimes, as to the object of public schools, opinion of Horace Mann, foundation of magnificent school fund laid by James Harlan, first state superintendent, and Thomas H. Benton, Jr. xxviii 21; no free school system in the state during first ten years, Horace Mann, Amos Dean and F. E. Bissell appointed commissioners to revise school laws, disappearance of the rate bill, a free text-book law and compulsory attendance act needed, commission favored township system, law of 1858 favored independent city districts, xxviii 22; law of 1858 made possible the establishment of higher grades of schools, advantages of high schools, xxviii 23; law of 1862 establishing graded or union schools discussed, course of study in many high schools too heavy, suggestions relating to high schools xxviii 24; special preparation for the teacher's work, importance early recognized, normal schools established at Andrew and Oskaloosa, provisions for educating teachers in the high schools of each county, establishment of a normal department in the state university, importance of equipping teachers for public school work xxviii 25; the future of the school system dependent upon special preparation of teachers, state university fast taking rank with the best institutions, chair of pedagogy ably filled, state normal school succeeding in its usefulness, agricultural college sending out competent teachers, normal institutes are invaluable aids, xxviii 26; Iowa in comparison with neighboring states, our low standing as to teachers' salaries. leads in number of school buildings, fifth in property, third in total revenue xxviii 26; comparative table relating to salaries, buildings and value of property xxviii 27: comparative table showing receipts of school moneys xxviii 28; comparative statistics relating to higher education, teachers, property of universities and colleges, property of schools of technology xxviii 29; statistics of universities and colleges xxviii 30; of universities and colleges in Iowa xxviii 31; as to institutions exercising right to confer degrees in Iowa, Pennsylvania law relating to power of institutions to confer degrees, its application to Iowa institutions xxviii 33; state educational institutions, every cent expended upon them is well spent, increased growth of state calls for increased expenditures in supporting schools, money valuation returns for support of schools, Dr. Harris' opinion xxviii 34; arguments in favor of educating the wage earner, as to the erection of fire-proof schoolhouses, loss to the state university of its library by fire xxviii 35, 36; education, the result of original investigation and research, a more liberal policy demanded of the legislature for the state university xxviii 36; list of persons who have held the office of president of the university xxviii 37; the normal school commended, first board of trustees, early history xxviii 37; work accomplished, number of graduates each year since organization xxviii 38; summer terms, normal school should be in close touch with educational wants of the state xxviii 39; normal school library, large proportion of attendants from farms and country villages xxviii 40; agricultural college, establishment of a chair for training teachers commented upon xxviii 40; state board of examiners, primary certificates, certificates and diplomas issued in other states xxviii 41; state diploma defined, general directions xxviii 41; requirements of graduates of standard colleges xxviii 42; of candidates not college graduates, other candidates, dates fixed for examinations for state diplomas, state certificates, evidences of scholarship, writing of essays xxviii 43; writing of papers, testimonials and credentials, length of experience and value of credentials, program of examination, time schedule xxviii 44; suggestions, dates for examination for state certificates, preparation for examination xxviii 46; examination, branches xxviii 46, 47, 48; renewal of state certificates, holders xxviii 48, 49; examinations held by state board, certificates, diplomas xxviii 50; date of examinations, certificates, diplomas xxviii 51; certificates and diplomas issued since 1882, examination fees, expenses, summary, xxviii 52; expenses for biennial period xxviii 52; names of persons to whom state certificates were issued during biennial period xxviii 53; list of persons to whom state diplomas were issued during biennial period xxviii 64; text-books, resolution passed by Twenty-sixth General Assembly xxviii 65: impracticable to comply with certain provisions of the resolution xxviii 66; text-book law of Missouri and price of text-books xxviii 67, 68; of Callfornia xxviii 68, 69; of Indiana xxviii 69, 70; of Ohio xxviii 70; of Kansas xxviii 71, 72; prices of text-books in several counties in Iowa xxviii 73; cost of text-books in lowa as compared with other states xxviii 79; average prices xxviii 80; investigation shows the text-book law of Iowa one of the best yet devised, books not furnished other states for less money, price of text-hooks governed by the laws of trade, factors entering into the manufacture of books xxviii 81; inferior books should not be used though furnished free, directors may deal direct with publishers, prices must be uniform xxviii 82; improved text-books issued during the life of a contract should supplant the old edition without extra expense to pupils, objections to state uniformity, solution of the problem found in adoption of free textbooks, districts in twenty-nine counties furnish free text-books xxviii 82; letters from superintendents of schools which adopted free text-books xxviii 84; list of text-books selected by counties with contract prices xxviii 88; temperance instruction, provisions of the law seem to be complied with, difficulties in teaching the subject reviewed xxviii 90; summary of reports regarding temperance instruction xxviii 92: in memoriam, I. C. Gilchrist, J. W. McClellan, C. P. Rogers, xxviii 99; G. F. Magoun, J. M. De Armond, H. J. Coughlan, G. E. Hancorne xxviii 100; school extension, promotion of home reading among families, hold upon the pupil when he ceases to be a member, how to make the school an important factor in community life xxviii 101; the aim of school extension, the work not necessarily confined to large towns or cities, lowa should get richer returns for the vast sum expended in maintaining schools xxviii 102; public school libraries, their establishment urged by present superintendent and predecessors, circular of information regarding selection of books, the problem of proper teaching xxviii 103; districts reporting a library of two hundred and fifty volumes xxviii 104; the interest of mothers in the schools, marked interest displayed by mothers during last biennial period, in some parts of the state mothers hold meetings and visit schools, relation existing between mother and school discussed at a teachers' association meeting, circular of information sent out by state superintendent to mothers of the state xxviii 106; paper by Mrs. A. P. Hanchett relating to the mother's place assumed by the teacher xxviii 107; paper by Mrs. A. B. Shaw on same subject xxviii 109; appeal to mothers xxviii 109; training for citizenship, principle governing patriotic teaching, first great duty of the public school to train the child that he may discharge rightly all duties of American

citizenship xxviii 111; plan of teaching patriotism xxviii 112; supervision of rural schools, effectiveness of the work of a county superintendent depends upon the character of the office, women have uniformly filled the office of county superintendent with conscientious fidelity, xxviii 112: selection of a superintendent, law requires a superintendent to hold a first grade certificate, rules that should govern in selection of a superintendent xxviii 113; regret that the office must be political in its nature xxviii 114: superintendent should be a thinker, influence of a cultured superintendent xxviii 114: supervision of rural schools considered, the teacher's relation considered xxviii 116; educational spirit of the people most excellent xxviii 117; comparative number of normal schools, pressing need for competent teachers, a plea for a better comprehension of the child and its wants xxviii 118; aids to a solution of the problem xxviii 119; waste in school expenses xxviii 119; often the teachers cannot make an intelligent report, competency urged, as to the purchase of fuel and supplies, principal should know something of business methods, a more intelligent expenditure of funds demanded xxviii 121; circular to schools relalive to the centennial of the birth of Horace Mann xxviii 121; letter by President Gilchrist in relation to Mann's influence in preparation of school laws xxviii 122; comments upon the life of Mann xxviii 123; committee on rural schools, appointment, comments on report xxviii 124; rural school and the farm, farm should be made as attractive as the city and so keep the boy content at home xxviii 125; changing condition of farm life, influence which the boy or girl from the farm will exert in the future, how to make the knowledge obtained at school of use on the farm xxviii 126; extension work in rural schools, extracts from article by Prof. L. H. Bailey relating to xxviii 127; transportation of children to school, a number of states have made provisions for carrying children at public expense, revised code relating to instructing in and carrying children to other districts, schools maintained where a less number would answer a better purpose is money wasted xxviii 129; kindergartens have not vet taken the place in public schools which their importance demands, in many cases the kindergarten has departed from the spirit of its founder, its province is to prepare children for citizenship here and hereafter, it deserves more attention from leading educators, the ideal kindergarten teacher xxviii 130; George Howland defines the new education xxviii 131; child study, eminent scientific men are making a careful study of the child mind, the physical condition of the child considered xxviii 131: child study seeks the co-operation of the home xxviii 132; graded schools rank well with similar grades in other states xxviii 132; experience a safer guide than theory, departure from established landmarks should be made with great caution and only after mature thought, the object should not be to make room for new studies, but to teach with understanding those already in the course, knowledge which the child should possess on leaving school xxviii 123; independent analysis should be encouraged, reading in the schoolroom, interest governing promotion, arithmetic may mean more to one child than another xxviii 134; music and drawing defended, civics must have a place, problem of the American school is complex xxviii 135; high schools, less than 94 per cent of pupils who enter public schools remain to finish the eighth year, not the object of the grammar school to

fit the pupil for the high school, claim of the high school for existence at public expense, the property of the state must educate the children of the state xxviii 136; new code places the high school directly under care of the superintendent of public instruction, an inspector to visit high schools desirable, the high school is what the people demand, teachers often powerless to remove evils in the face of public opinion, the high schools are worth all they cost but reforms are needed xxviii 137; to what point should the high school curriculum extend tendency to build up a false standard of success before the pupils, moral questions should be kept constantly in mind by the true teacher xxviii 138; normal institutes, results have been such as to fully justify the wisdom of those who framed the law creating, changes are needed, conductors or instructors should hold a paper from state superintendent or board of examiners as to fitness xxviii 138; should not exclude instructors from other states, institute fund should be expended for the benefit of the teacher alone, teachers should not be assessed to support the institute, what constitutes a profitable institute, worth of competent instructors, xxviii 139; reasons for selection of a competent instructor, institute, should be lengthened or a spring term provided xxviii 140; graded normal institutes need reorganizing, a false idea of the purposes of the pormal institute prevails among teachers xxviii 141; regarded as exclusively for teachers, in the beginning it was regarded as a public educational revival xxviii 142; township organization, adoption of the township as the unit of organization would advance the educational interests, opinion of Horace Mann axviii 142; reason for indexing the reports axviii 143; school laws, principal new provisions in new code, it is hoped no attempt will be made by the Twenty-seventh General Assembly to change the new laws xxviii 144; thanks returned to Ira C. Kling xxviii 144; thanks to Lillian G. Goodwin, to the teachers and people of Iowa, a plea to fathers and mothers of the state xxviii 145; denominational colleges, paper by W. F. King, history of Iowa colleges xxviii 146; state institutions xxviii 148; Baptist, Christian xxviii 149; Congregational xxviii 150; Episcopalian, Friends, Lutheran xxviii 151; Methodist xxviii 152; Presbyterian xxviii 153; United Brethren, undenominational xxviii 154; statistics of seventeen leading colleges xxviii 155; conclusion xxviii 158; appendix, report of subcommittee on school maintenance, revenue, distribution, organization xxviii 161; report of subcommittee on supervision, as to character of supervisor, purpose of rural school supervision, results expected from intelligent supervision xxviii 163; report of subcommittee on supply of teachers, available agencies for improvement of teachers, conditions and needed changes xxviii 164; report of subcommittee on instruction and discipline, remedies for evils of rural school xxviii 164; special appropriations for small rural schools, concentration of the higher grades of pupils, school extension xxviil 165; conclusions of entire committee on rural school problem xxviii 166; school and the farm, paper by F. W. Parker xxviii 167; branches that should be taught and their relation to the farm xxviii 167; enrichment of the rural school course, paper by T. C. Chamberlin xxviii 174; landscape studies and their application xxviii 175, 177; of atmospheric phenomena, the study of plant life xxviii 178; transportation of pupils, paper by C. R. Skinner xxviii 180; paper on same subject, by A. W.

Edson, leading arguments in favor of the movement xxviii 181; objections and replies, experiments xxviii 182; extract from report on transportation by F. E. Morrison, extracts from report by J. R. Adams xxviii 183; good results from the system xxviii 184; statistics from school reports, 1896-7: of districts, schools and teachers xxviii Ap. 2, 42; of pupils, schoolhouses, apparatus, libraries, trees, and rooms in which effects of stimulants and narcotics are taught xxviii Ap, 3, 43; of finances, condition of teachers fund xxviii Ap. 9, 49; examination of teachers, certificates issued, rejected, experience, etc. xxviii Ap. 12, 52; visitation of schools, appeals, etc. xxviii Ap. 16, 56; summary of superintendent's work xxviii Ap. 18, 58; summary condition of schoolhouses xxviii Ap. 19, 69; teachers' normal institute, sessions, attendance, fund xxviii Ap. 20, 60.

SABBATH SCHOOLS, subject treated xv 138.
