Introduction

Content and Format

The 1991-92 edition of the Iowa Public Library Statistics includes information on income, expenditures, acquisitions, holdings and circulations, personnel, and output measures. Introductory and explanatory material and a county by county study are also included.

The 1991-92 edition presents data in the following formats:

- data from individual libraries
- state totals and averages
- graphs and maps

Analysis by Region is not included in this publication. Regional Libraries have access to their own statistical analysis.

A new feature of this edition is that library listings are by Size Code, alphabetically by city. Listing by Size Code allows each library to compare itself with other libraries in cities of similar size. Surveys from 502 libraries are included in this publication. A Table of Cities and Size Codes is included to assist users of the publication in locating any given library in the individual library tables.

The county study provides per capita studies of income, holdings and circulation for each county. The county study provides a true per capita because it includes the total population of the county. Map studies showing total circulation, total holdings, and total income are also included.

The second edition of In Service to Iowa emphasizes turnover rate, percent of the collection added, and percent of the collection withdrawn. These collection development indicators are included in the data for individual libraries. Turnover rate is listed under Circulation; % withdrawn is listed under Holdings; and % added is listed under Acquisitions in this edition of the Iowa Public Library Statistics.

National Data Collection

In FY93, Iowa once again received the Kepple award for timely and accurate library statistics from the Federal State Cooperative for Public Library Statistics (FSCS). Last year, we were one of four states which received the award. This year, 22 states were so honored. Our quality statistics are possible only through the team effort made by local libraries, Regional Libraries, and State Library staff. As Vice President of the FSCS Steering Committee, I am very pleased that Iowa's public library statistics continue to be of the highest quality.

The FY92 timetable for the Public Library Statistics is as follows:

4/15/92	General Information Survey mailed to public libraries
7/31/92	General Information Survey returned to Regional Libraries
10/31/92	General Information Surveys forwarded to the State Library
12/15/92	Printed tables available from data processing
1/8/93	Public Library Statistics sent to the printer
2/8/93	Public Library Statistics mailed to libraries
6/1/93	Iowa data sent in electronic format to the Federal State Cooperative System for Public Library Statistics.

Importance and Use of Public Library Statistics

At the local, regional, and state level, public library statistics are used for:

- comparative analysis with other libraries
- justification of budget requests
- tracking of inputs and outputs over time
- as part of planning and role setting
- evaluating grant and other programs

At the national level, the U.S. Congress recognized the need for more and better data to assist in the public debate on Education and the role of the public library nationwide with the passage of Public Law 100-297, the Hawkins-Stafford Elementary and Secondary School Improvement Act. As part of the Act, Congress established FSCS to collect and disseminate national public library data through a cooperative system involving State Libraries, the National Commission on Library and Information Science, and the National Center for Education Statistics.

The FSCS cooperative has collected and published national public library data since 1988. The definitions used in our General Information Survey are based on FSCS definitions.

This past year, FSCS also published rankings of the states in each of the 27 data elements. Iowa ranked 19th overall. Map studies of state rankings are included in this publication.

Explanatory Notes

Library Size Codes

Library Size Codes are based on the jurisdiction population of the city, i.e. the population of the city which the library was established to serve. Population figures are taken from the 1990 U.S. Census. County libraries have a separate designation.

Library Size Code	Population	Number of Libraries
A -	libraries serving less than 500 -	140
B -	libraries serving 500 - 999 -	131
C -	libraries serving 1,000 - 2,499 -	137
D -	libraries serving 2,500 - 4,999 -	49
E -	libraries serving 5,000 - 9,999 -	37
F -	libraries serving 10,000 - 24,999 -	13
G -	libraries serving 25,000 - 49,999 -	9
H -	libraries serving 50,000 and over -	8
I -	county libraries -	4
Total -		528

Regional Designation for Each Library

CE-Central
EC-East Central
NC-North Central
NE-Northeast

Acquisitions of Iowa Public Libraries, FY92

By Percentage of Total Materials Purchased

Other includes microforms and software

The Impact of Inflation on Book Purchasing, 1980-1992*

In 1980, \$100 purchased six \$18 books.

In 1992, inflation had reduced the purchasing power of \$100 to approximately \$45, which would purchase only three \$18 books.

*Based on the "Index of American Public Library Materials Expenditures" produced by the Library Research Center at the University of Illinois.

The library materials index is at 223 in 1991. In 1980, the index was at 100. Constant dollars is calculated by dividing the current dollars by the index. For 1992, \$100 divided by 2.23 equals \$44.84.

Library materials purchasing power has been reduced more than 50% over the last decade.
