INTRODUCTION

In 2013, a total of \$3.2 billion in Iowa income tax liability was reported by 2 million taxpayers for tax year 2012. The reported tax was based on \$107.0 billion in Iowa net income and \$81.0 billion in net taxable income. This report provides a summary of data obtained from 2012 tax returns as well as a review of the relevant features of Iowa tax law.

This report is organized into two major sections:

- An overview of information reported on 2012 returns including a description of Iowa's individual income tax structure and an analysis of filing patterns.
- Statistical appendices.
 - Appendix A provides data for all taxpayers.
 - Appendix B provides data for Iowa-resident taxpayers only.
 - Appendix C provides data for all taxpayers except that negative values for Iowa net income and tax liability are restricted to zero.¹
 - Appendix D provides data for Iowa-resident taxpayers only, with negative values for Iowa net income and tax liability restricted to zero.

OVERVIEW OF RELEVANT FEATURES OF TAX LAW – TAX YEAR 2012

The key features of the 2012 Iowa individual income tax structure are similar to those in the federal income tax structure and in other states with progressive tax rates. This section of the report highlights individual income tax law changes for 2012, fundamental features of the Iowa tax structure, and related items such as additional taxes, credits, and check-off programs. Table 2 provides information on these additional items, including descriptions and impacts. Supplemental information from the IA 148 Tax Credits Schedule can be found in the Annual Tax Credits Claims Report, published on the [Tax Credits Tracking and Analysis Program web page](#). Note that 2012 tax year claims data will be available in June 2015.

Tax Year 2012 Law Changes

Comparisons between the statistical data contained in this report and that contained in reports from prior years should be made with due consideration of the effects of tax law changes. Year to year increases or decreases in a given measure may arise from changes in law as well as demographic or economic trends. Important Iowa tax law changes applicable to tax year 2012 include the following:

- The income tax brackets in the rate schedule were indexed upward by 2.1 percent. The indexation is made each year to prevent taxpayers from incurring increased tax liabilities due to inflation.

¹ Taxpayers may report a negative Iowa net income if certain losses exceed positive sources of income. Taxpayers may also incur negative tax liability when the sum of refundable credits exceeds net tax liability. It is not possible for taxable income to be negative as any negative taxable income must be rounded to zero. These tables are shown for historical consistency; prior to tax year 2011 the annual statistical report only presented net income and tax liability with any negative values restricted to zero.

- The standard deduction for single filers and married couples filing separately was \$1,860; up from \$1,830 in tax year 2011. For all other filing statuses the standard deduction was \$4,590; up from \$4,500 the prior year.
- The phase-out of the tax on Social Security benefits continued in 2012. Taxpayers initially compute their taxable benefits (based on pre-1993 federal law) and reduce the calculation by a certain percentage. For tax year 2012, the exclusion percentage increased to 77% from 67%. The exclusion percentage will increase until the tax on Social Security benefits is completely phased out in tax year 2014.
- Iowa did not couple with the 50% bonus depreciation Internal Revenue Code change for tax year 2012.
- Iowa coupled with the following federal provisions for tax year 2012:
 - The 2012 section 179 asset expensing limit for Iowa is \$500,000, which is the same as the federal section 179 limit. The phase-out threshold is \$2 million.
 - Allow itemized deductions in full for high income taxpayers;
 - Allow election to deduct state sales and use tax as an itemized deduction in lieu of state income tax;
 - Allow deduction of educator expenses;
 - Allow tuition and fees deduction for higher education;
 - Allow tax free distribution from an IRA to certain charities for individuals 70½ and over;
 - Allow treatment of mortgage insurance premiums as qualified residence interest.
- Other changes to the Iowa individual income tax include the following:
 - Iowa allowed the exclusion of 50% of the capital gain from the sale of employer securities of an Iowa corporation to an Iowa-based employee stock ownership plan (ESOP), as long as the ESOP owned at least 30% of the outstanding employer securities after the sale.
 - Members of the armed forces, armed forces military reserve, and the national guard in an active duty status could exclude pay received from the federal government for military service performed.
 - An Iowa Geothermal Heat Pump Tax Credit was available equal to 20% of the federal residential energy tax credit for installations of geothermal energy systems for residential property located in Iowa.
 - An Iowa Solar Energy System Tax Credit was available equal to 50% of the federal tax credit for installations of solar energy systems located in Iowa for residential property up to \$3,000 and business property up to \$15,000 when an award had been issued by the Department.
 - Iowa did not allow any deduction for the federal small business health insurance tax credit that was not allowed as a deduction on the federal return.

Filing Requirements

For 2012, single taxpayers who were Iowa residents, under age 65, and had Iowa net income of \$9,000 or more were required to file an Iowa tax return. Iowa residents other than single filers who were under age 65 and had household Iowa net income of \$13,500 or more were also required to file an Iowa return. Single taxpayers with Iowa net income of \$5,000 or more who were claimed as a dependent on another person's return were required to file a return.

Nonresidents with \$1,000 or more in household net income from Iowa sources, taxpayers who were subject to the Iowa lump sum tax or the Iowa minimum tax, and military personnel who claimed Iowa as their legal residence were also required to file an Iowa return. Single taxpayers age 65 or over with Iowa net income of \$24,000 or more and married taxpayers with at least one spouse age 65 or over with Iowa net income of \$32,000 or more were required to file an Iowa return.

Filing Status

For many taxpayers, Iowa filing status was the same filing status as on the federal return. However, married taxpayers had the option of filing either jointly or separately on the Iowa return, no matter how they filed on the federal return. Married separate filing allowed taxpayers to be taxed as separate individuals in many cases at lower tax rates than on their combined income. Married couples were encouraged to compute their taxes both on their separate incomes and on their combined income and to file according to the method more beneficial to them.

Iowa allows the following filing statuses:

- Single – For unmarried, divorced, or legally separated taxpayers as of December 31, 2012.
- Married Filing Joint Return – For married couples as of December 31, 2012 who want to report income, deductions, and credits together in one column.
- Married Filing Separately on Combined Return – For married couples as of December 31, 2012 who want to report income, deductions, and credits separately in two columns (one column for each spouse). Taxpayers may have to prorate certain items between spouses, such as federal refunds or itemized deductions.
- Married Filing Separate Returns – For married couples who wish to file on separate returns.
- Head of Household – For taxpayers filing as head of household for federal income tax purposes.
- Qualifying Widow(er) with Dependent Child – For taxpayers meeting the federal filing requirements for qualifying widow(er).

For purposes of the statistical appendices to this report, the Single tables include the single, head of household, and qualifying widow(er) filing statuses. The Married Separate tables include married taxpayers filing separately on combined returns and married taxpayers filing separate returns. The Married Joint tables include the married joint filing status.

Gross Income

Gross income is all income from all sources and was reported on the IA 1040 Individual Income Tax Return or the IA 1040A Short Form. All Iowa taxpayers must report all income for the entire year unless it is specifically excluded by law, as is, for example, U.S. Treasury interest. Nonresidents and part-year residents are entitled to a credit for the amount of tax based on income earned outside of Iowa.

Net Income

Iowa net income is also referred to as adjusted gross income, or AGI, in this report. In 2012, it was calculated much like adjusted gross income before the net operating loss deduction reported on the 2012 federal return for federal income tax purposes. Alternatively, net income equals gross income less certain adjustments, some of which were the same as those allowed for federal purposes. These include adjustments for moving expenses, one half of self-employment tax, and payments of student loan interest. Iowa also offered a number of adjustments to income that were not allowed as federal adjustments. These include the subtraction of interest and dividends from federal securities; the addition of interest and dividends from certain state, municipal, and foreign securities; a partial pension/retirement income exclusion; a deduction for certain types of capital gains transactions; a 100% health and dental insurance premium deduction; and certain railroad retirement benefits. State refunds were not included in Iowa net income. In addition, Iowa calculated taxable Social Security benefits differently. Iowa adjustments to income are identified in 2013 Iowa Code, §422.7.

Net Taxable Income

To determine net taxable income, the following deductions from net income were allowed for 2012:

1. Iowa is one of three states that allowed the deduction of federal income taxes paid during the year less federal income tax refunds received during the year. However, refunds resulting from the Earned Income Tax Credit, Additional Child Tax Credit, First-Time Homebuyer Credit, Refundable Education Credit, and Adoption Tax Credit were not included.
2. The larger of the following amounts:
 - a. A standard deduction of \$1,860 for single filers and for each married individual filing separately. A standard deduction of \$4,590 for taxpayers who filed married using a joint return, head of household, or qualifying widow(er) with a dependent child.
 - b. Itemized deductions equal to the amount determined for federal income tax purposes less any amounts deducted for Iowa income tax payments. In addition, adoption expenses, expenses incurred for in-home care of a disabled relative, and additional mileage for charity were included as Iowa itemized deductions.

Net taxable income reported on 2012 Iowa returns was subject to the following rates and tax brackets (See Table 1):

Table 1. Iowa 2012 Tax Rate Schedule

Rate	Taxable Income			
0.36%	over	\$0	but not over	\$1,469
0.72%	over	\$1,469	but not over	\$2,938
2.43%	over	\$2,938	but not over	\$5,876
4.50%	over	\$5,876	but not over	\$13,221
6.12%	over	\$13,221	but not over	\$22,035
6.48%	over	\$22,035	but not over	\$29,380
6.80%	over	\$29,380	but not over	\$44,070
7.92%	over	\$44,070	but not over	\$66,105
8.98%	over	\$66,105		

Note: Taxpayers other than single filers have the option of subtracting \$13,500 (\$32,000 if age 65 or over) from their household Iowa net income (plus any pension exclusion and Social Security exclusion) and multiplying the difference by a flat rate of 8.98% to compute their alternate tax. Taxpayers may use this alternate tax calculation if it results in a lower tax liability than applying the progressive tax rates to net taxable income.

Personal and Dependent Credits

The following nonrefundable personal and dependent exemption credits were allowed for 2012:

1. A forty dollar credit was allowed for each individual filing a return. In addition, taxpayers who filed as a head of household were allowed an additional credit of forty dollars. Finally, an additional twenty dollar credit was allowed for individuals who at the end of the tax year were 65 years of age or over or blind.
2. A forty dollar credit was allowed for each dependent claimed on the federal tax return.

Nonresident and Part-Year Resident Credits

Individuals with Iowa-source income who were not full-year residents of Iowa were required to report their income, adjustments, and deductions from all sources. After computing tax on net taxable income from all sources, nonresidents and part-year residents were allowed a credit to reflect the ratio of non-Iowa-source income to total income. The credit is computed using the Schedule IA 126.

Out-of-State Tax Credit

Iowa residents and part-year residents received a refundable tax credit for income that was taxed by Iowa as well as another state or foreign country. The credit equaled the Iowa tax owed on this income, but could not exceed the tax that was imposed by the other state or country. The credit was computed using the Schedule IA 130; separate schedules were required for each state or country that imposed tax.

Additional Features of the Iowa Tax Structure (Additional Taxes, Tax Credits, and Check-offs)

The Iowa individual income tax structure includes several other features. These include additional taxes imposed on lump sum pension distributions and tax preference items. In addition, subject to local voter approval, surtaxes may be imposed by school districts and counties to provide additional funding for schools or to support emergency medical services. Iowa law also provides for a number of refundable and nonrefundable credits. Many of these exist to promote certain activities. Iowa also permits taxpayers to make contributions to certain programs through check-offs. More information on these additional taxes, credits, and check-off programs may be found in Table 2.

REVIEW OF 2012 TAX YEAR

Filing Status

The Iowa tax structure allows for six filing status options. The share of taxpayers by filing status (Chart 1A) and the share of tax liability by filing status (Chart 1B) are presented below (the head of household and qualifying widow(er) numbers are combined in this presentation). Taxpayers filing married separate on a combined return are counted as two individual taxpayers in this report.

Chart 1A. Percentage of Taxpayers by Filing Status

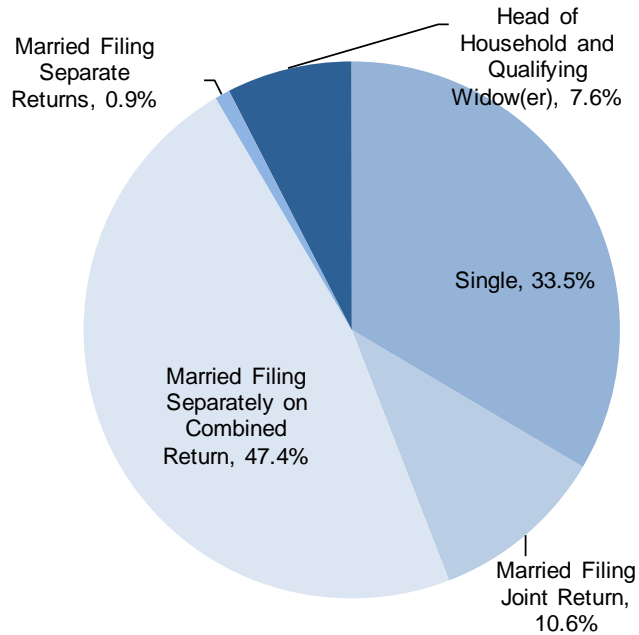

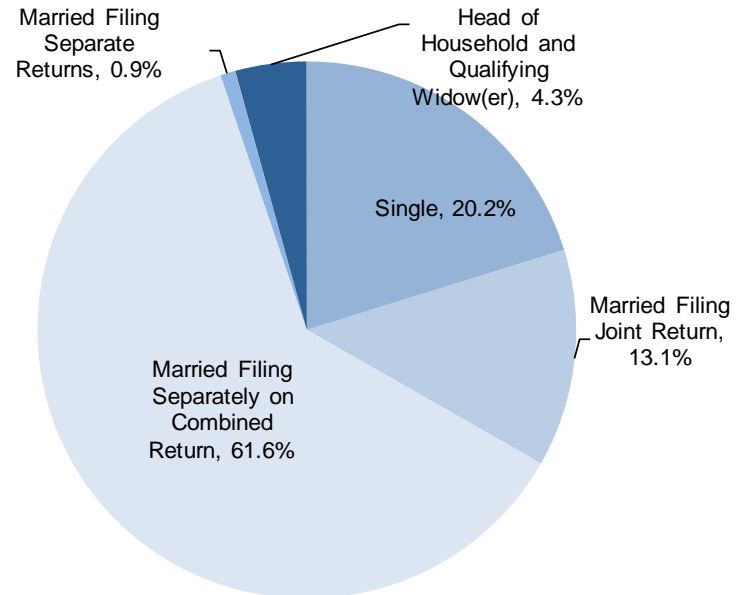

Chart 1B. Percentage of Tax Liability by Filing Status

Standard/Itemized Deductions	Approximately 48 percent of taxpayers utilized the Iowa standard deduction. The remaining filers itemized.
Federal Tax Deduction	For the 2012 tax year, a total of \$17.1 billion in net federal taxes were deducted from net income.
Additional Taxes	The special tax on lump sum distributions of pensions was paid by 200 individuals, totaling \$104,623 (see Table 2). The Iowa minimum tax was imposed, for the most part, on the same tax preference items and adjustments on which the federal Alternative Minimum Tax is imposed, and equaled the excess of the minimum tax calculation over the amount owed under the progressive rates or the alternate tax (less nonrefundable credits). The Iowa minimum tax was reported by 24,329 taxpayers and amounted to \$9.3 million. School District Surtax collections increased in 2012, with 290 districts out of 348 school districts receiving approximately \$115.0 million in revenue from this state-collected revenue source. In 2011, 291 districts imposed the surtax and received approximately \$103.4 million. One county (Appanoose) imposed a local surtax to fund emergency medical services. Appanoose County received approximately \$72,000 from this surtax in 2012.
Tax Credits	Table 2 documents the utilization of the tax credits allowed on the 2012 return where data are available. Excluding the exemption credits, the nonresident/part-year resident credits, and the out-of-state tax credit, \$207.2 million in credits were claimed on 2012 returns, compared with \$164.4 million in 2011.
Check-offs	Approximately 87,300 contributions totaled approximately \$422,500 for the five check-off line items provided on the 2012 tax return, (See Table 2). In 2011, there were approximately 88,800 contributions that totaled approximately \$418,500.

NOTES TO TABLE 2:

1. This credit is included among all other nonrefundable credits on line 53 of the 2012 Iowa 1040 tax form. Because the income tax return database only includes aggregate information from line 53, separate values for this credit could not be determined at the time this report was published. For 2012, total other nonrefundable credits were claimed by approximately 20,880 taxpayers and totaled \$129.4 million. Additional information on 2012 tax credit claims will be published in the Annual Tax Credits Claims Report in June 2015, based on analysis of the IA 148 Tax Credits Schedule.
2. This credit is included among all other refundable credits on line 66 of the 2012 Iowa 1040 tax form. Because the income tax return database only includes aggregate information from line 66, separate values for this credit could not be determined at the time this report was published. For 2011, total other refundable credits were claimed by approximately 1,690 taxpayers and totaled \$23.5 million. Additional information on 2012 tax credit claims will be published in the Annual Tax Credits Claims Report in June 2015, based on analysis of the IA 148 Tax Credits Schedule.

INCIDENCE BY ADJUSTED GROSS INCOME

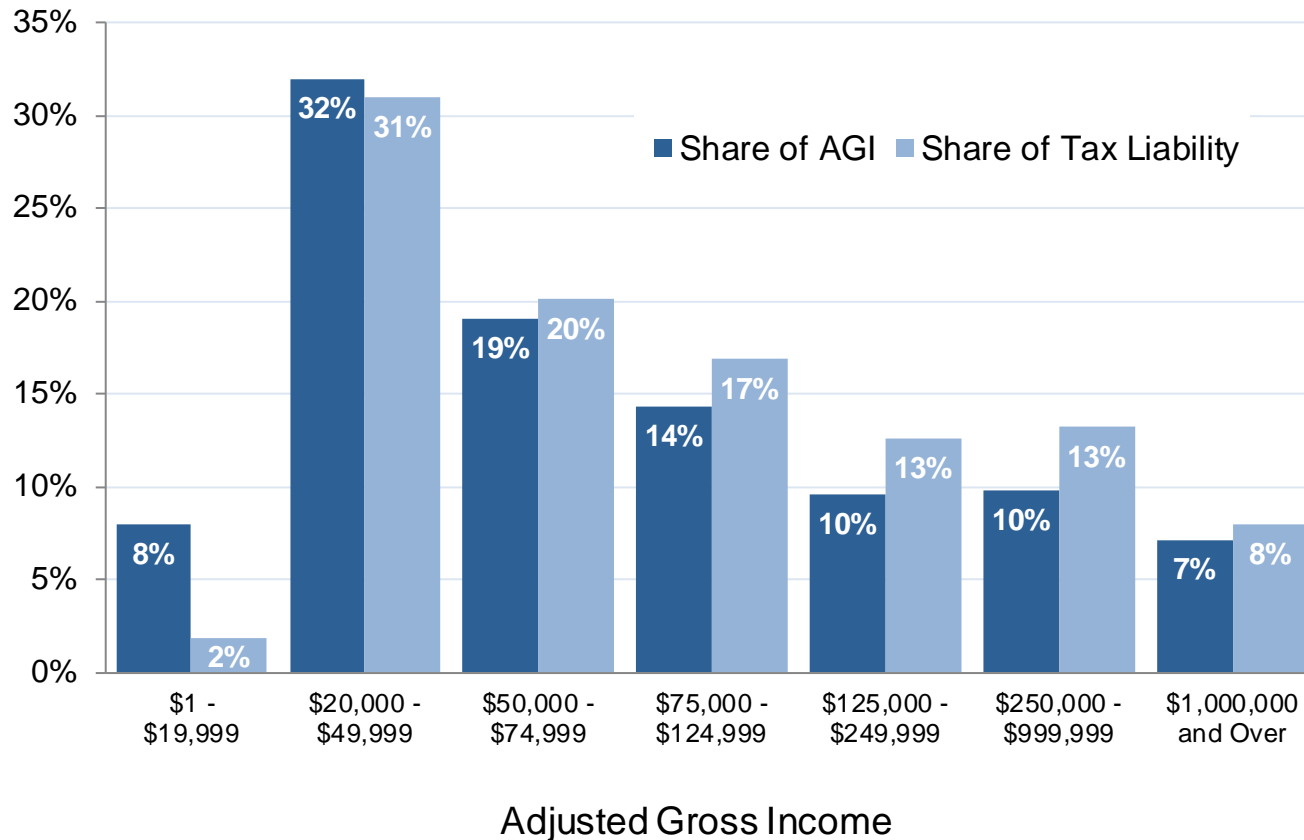

One measure of a state's income tax structure is tax incidence, which may be defined as the share of net income represented by tax liability. Table 3 presents incidence calculations both for all taxpayers and for Iowa-resident taxpayers only. Note that, for both groups, net income represents income from all sources after adjustments, whether within Iowa or outside of the state. Meanwhile, tax liability represents the tax on **Iowa-source** income only. (The nonresident/part-year resident credit eliminates any tax liability attributable to non-Iowa-source income.) For this reason, measures of incidence are overstated for nonresident and part-year resident taxpayers. While this distortion affects the incidence at nearly all income levels, the most significant abnormalities occur at the middle and upper income levels. The incidence computations based on all taxpayers (i.e., including nonresidents and part-year residents) are presented for consistency with certain data presented elsewhere in this report. Incidence calculations for Iowa-resident taxpayers more accurately depict tax liability as a share of net income.

Table 3. Tax Incidence by Adjusted Gross Income, All Taxpayers and Iowa Resident Taxpayers

Chart 2 provides additional data concerning the level of income tax progressivity. It concerns Iowa residents only. Chart 2 reflects the structure of the Iowa income tax, wherein higher statutory marginal tax rates apply to higher taxable incomes. The refundable Earned Income Tax Credit also reduces tax liability for the lowest-income taxpayers. The lowest income group, excluding those reporting negative AGI, reported 8% of income, but only 2% of tax liability. Taxpayers with AGI between \$20,000 and \$75,000, as well as those with AGI above \$1 million, reported aggregate tax liability approximately proportionate to their share of income. Taxpayers with AGI between \$75,000 and \$1 million reported 34% of income but 43% of tax liability.

Chart 2. Share of AGI and Tax Liability by Income Group for Resident Taxpayers

Note: Chart does not include taxes paid or income for individuals with AGI of less than \$1.

EFFECTIVE TAX RATES

In addition to tax incidence based on AGI, this report provides a brief overview of average effective rates for various groups of taxpayers. Here, the effective tax rate equals tax liability as a percentage of gross income rather than AGI since gross income is perhaps the best measure available from the tax return of ability to pay.

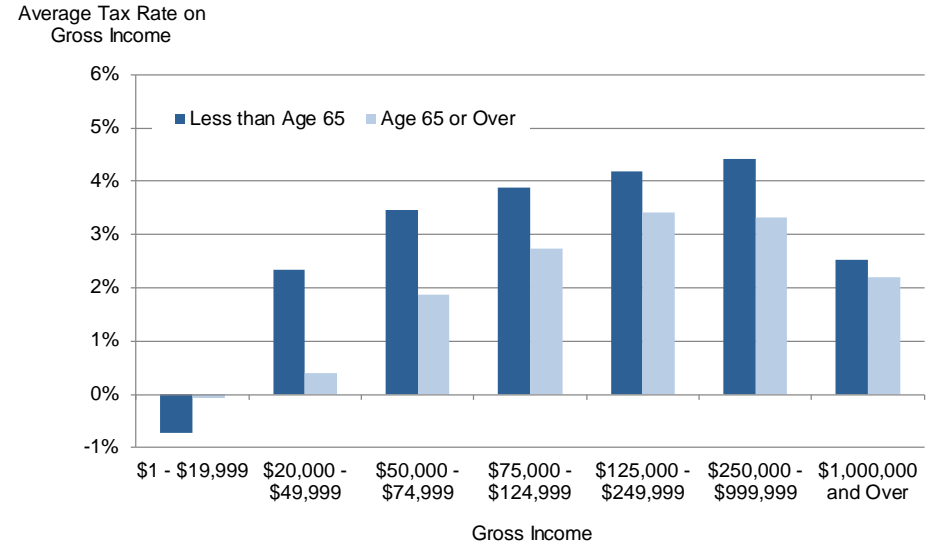

Chart 3 provides average effective tax rates by gross income category, filing status, and age group. Under a progressive income tax structure, as in Iowa, statutory marginal tax rates are higher for taxpayers with higher taxable incomes. Thus, average effective tax rates are generally higher for taxpayers with higher levels of gross income. Provisions such as the EITC, different standard deductions by filing status, and the ability for separate filing by married couples result in different average effective tax rates across filing statuses. Because Iowa exempts some pension income from taxable income, average effective rates are lower for taxpayers who were age 65 or over across all filing statuses. The overall average effective tax rate was 3.6 percent and ranged from 2.6 percent for taxpayers filing as head of household or qualifying widow(er) to 3.2 percent for single filers. Note that married taxpayers filing separately are counted as two taxpayers.

HISTORICAL TRENDS IN FILINGS, INCOME, AND TAX LIABILITY

Table 4 provides data for number of taxpayers, adjusted gross income (AGI), net taxable income, and tax liability for the last eight years. The table shows that over this period annual changes in the number of taxpayers have been modest. In general, changes in income have led to similar changes in net taxable income and tax liability. Changes to Iowa tax law can also affect growth in income and in tax liability over time. In addition, federal tax law has an effect on State tax liabilities. This is because taxpayers are allowed to deduct their net federal income tax payments from Iowa taxable income on their Iowa returns.

Note that it is possible for a taxpayer's AGI to be negative under certain circumstances, such as when capital losses exceed positive sources of income. Tax liability may also be negative, which occurs when refundable credits exceed the tax liability reported on line 59 of the Iowa 1040. Withholding and estimated payments are not tax credits, however, and cannot on their own lead to negative tax liability; they are simply methods of payment of taxes. Therefore many taxpayers receive a refund even though tax liability is positive. Historically, the Department's annual statistical reports restricted any AGI and tax liability values that were negative to zero. Beginning with the 2011 report, unrestricted values for AGI and tax liability were also presented.

Between tax years 2011 and 2012, total AGI increased by 24% and net taxable income increased by 27%. Tax liability increased by 15%. These dramatic increases were the largest annual increases for any of these measures since collection of data for this annual report began in 1990. They were the result of several factors. In part, the increases were the result of economic factors, including a rise in incomes after the sluggish growth of the previous four years, a period marked by recession. However, the increases also reflect a shift of reported income into the end of 2012 since, owing to events at the federal level, taxpayers faced uncertain tax rates in 2013 as well as increases in the tax rate on unearned income.

1. Taxpayers filing married separate on a combined return are counted as two individual taxpayers.
2. For tax years through 2010, sums for AGI and tax liability exclude negative values reported on returns. Beginning with tax year 2011, the annual statistical report presents sums for AGI and tax liability both excluding and including negative values. For comparability, Table 4 reports AGI and tax liability sums for tax year 2011 based on both calculations.

Note: It is possible for a taxpayer to report negative adjusted gross income or zero taxable income yet incur tax liability. This can occur when a taxpayer reports large federal refunds or faces lump sum or minimum tax liabilities. Conversely, a taxpayer may report high income yet owe no tax. This can happen when a taxpayer reports large federal tax deductions, itemized deductions, or tax credits. Among nonresidents who report high adjusted gross incomes, but little Iowa-source income, it is common for nonresident credits to largely offset or eliminate Iowa tax liabilities.

INDIVIDUAL INCOME TAX ABATEMENT

The Director of the Department of Revenue is provided the statutory authority to “abate any unpaid portion of assessed tax, interest or penalties which the Director determines is erroneous, illegal or excessive” (Section 421.60 (2) (i) Code of Iowa, 2014). Abatements apply to those cases in which the initial protest occurs after the 60 day appeal period has expired and in which the taxpayer produced records substantiating the taxpayer's claim to reduced tax liability. The following table summarizes the individual income tax abatements allowed in calendar year 2013.
