Important OverDrive IP address change

This only applies to libraries using their ILS to authenticate patrons on Bridges.

You may currently be allowing 207.54.136.106, 207.54.137.114, and 207.54.137.115 through your firewall for OverDrive to connect with your ILS/LMS to authenticate users during the sign in process. If so, you need to update your firewall before October 10, 2022, to allow the following subnet: 134.195.60.0/24. This will ensure there is no disruption for your users. For now, please continue to allow 207.54.136.106, 207.54.137.114, and 207.54.137.115 through your firewall.

If your authentication service is hosted offsite by your ILS/LMS vendor, we recommend contacting them to confirm you are ready for the updated IP addresses.

Thank you for being a Bridges member library!
