 User's Guide to Access

The following reference materials will be needed when retrieving information through ACCESS:

Index to the tables  
 Table descriptions and stratifiers  
 Summary code index  
 Record type index

## Index to the tables:

This index is a numeric listing of all the tables in the specific count (4th count Housing or Population). It lists, in numerical order, the titles of all the tables. This will give the user a general idea of what is contained in a table.

## Table Descriptions and Stratifiers:

These are the actual descriptions of the tabular data to be accessed. They are in the following form:

Z  
 697  
 .H84  
 U84  
 1970

Title \_\_\_\_\_  
 description of table  
 By: stratifier title 1    By: stratifier title 2    By: stratifier title 3  
 stratifier group 1 no. 1  
     stratifier group 2 no. 1  
     stratifier group 3 no. 1  
 .  
 .  
     stratifier group 3 no. n  
 stratifier group 2 no. 2  
     repeat stratifier group 3  
 .  
 .  
     stratifier group 2 no. n  
 stratifier group 1 no. 2  
     repeat stratifier group 2  
     repeat stratifier group 3  
 .  
 .  
     stratifier group 1 no. n

With exception of the title, everything above may or may not be contained in any one table. Some tables have only 1 or 2 stratifiers and some have none. From these tables, the user can get specific descriptions of data that will help him select information for his individual needs.

## Summary Code Index:

This is a listing of all the summary categories for the state of Iowa for 4th count Housing or Population, File C. It is used to further define the data selected for a specific table.

## Record Type Index:

This listing is used to subdivide the summary code designation into urban, rural nonfarm, rural farm, total and Spanish American subcategories.

The preparation of this report was financially aided through a Federal Grant from the Department of Housing and Urban Development, under the Comprehensive Planning Assistance Program authorized by Section 701 of the Housing Act of 1954, as amended.

STATE OF IOWA  
OFFICE FOR PLANNING AND PROGRAMMING  
523 EAST 12th STREET  
DES MOINES, IOWA 50319

ENTERING THE KEY:

1. Type 'OPCD.' to call program.
2. If data needed is from 4th count Housing code 'H4.'  
If data needed is from 4th count Population code 'P4.'
3. Code a user's key as follows:

/SC/RT/TN/ST1/ST2/ST3/

where:

SC=summary code as selected from the summary code index. This is a 1 to 4 digit number.

RT= record type as selected from the record type index. This is a 1 to 2 digit number that is dependent on a specific record type description and the table number. Be sure the record type selected has the desired table number included in it.

TN=a 1 to 3 digit table number as selected from the table descriptions.

ST1=code for the stratifier in stratifier group 1, as selected from the table descriptions and stratifiers, if there is one (1 to 2 digit number).

ST2=code for the stratifier in stratifier group 2 if there is one. (1 to 2 digit number)

ST3=code for the stratifier in stratifier group 3 if there is one. (1 to 2 digit number)

A summary code, record type and table number must appear in each key. If a stratifier is not needed for a table (that is, the stratifier does not exist for a table) that field in the key can be left off. However, the key fields must be separated by slashes and begin and end with a slash. Two consecutive slashes denote a zero key field.

(see examples at end of section)

The system will return to you the title of the table you selected and the data listed under it.

There is an option you can use to have blocks of data retrieved rather than only one data item. To do this, code a '0' in the last stratifier key field for the table. That is, if there are 3 stratifiers - code the 3rd as 0, if there are 2 stratifiers code the 2nd as a 0 and if there is 1 stratifier, code that as a 0. If there are no stratifiers for a table, there is only one data item for that particular table.

When you code a '0', a list of all data items under the last group of stratifiers will be returned to you. In some cases, not all of these can be put on a screen, in which case you will be given the first 18 data items of that stratifier group and a message that the table was truncated. (See examples at end of section).

Instructions on using the table descriptions and stratifiers:

1. From the index to the tables find the table number that most closely describes what information is needed.
2. Turn to that table in the listings (the tables are in numerical order).
3. Each table has one or all of the following:
  - a. Table title: in all tables with more than one data item (in all capital letters).
  - b. Table description: in all tables (underlined).
  - c. Stratifier titles: 'By:' followed by the title (underlined). There are up to 3 of these, if any, in a table.
  - d. Actual stratifiers: Each group is indented from previous line. The numbers beside the stratifiers are the numbers used to build the key.
4. Find the group of stratifiers that detail the data wanted and code the stratifiers that the data falls under (up to 3 of these - see example at end of user's guide).

## EXAMPLES

## 60 PLUMBING FACILITIES, PERSONS PER ROOM, TENURE, AND RACE OF HEAD

Count of Occupied UnitsBy: Tenure and Race of Head By: Plumbing Facilities By: Persons Per Room

1. Total occupied:
  1. With all plumbing facilities:
    1. 1.00 or less persons per room
    2. 1.01 - 1.50 persons per room
    3. 1.51 or more persons per room
  2. Lacking one or more plumbing facilities  
Repeat persons per room
2. Owner occupied:  
Same as Total occupied
3. Renter occupied:  
Same as Total occupied
4. Total Negro occupied:  
Same as Total occupied
5. Negro owner occupied:  
Same as Total occupied
6. Negro renter occupied:  
Same as Total occupied
7. Total Spanish American occupied:  
Same as Total occupied
8. Spanish American owner occupied:  
Same as Total occupied
9. Spanish American renter occupied:  
Same as Total occupied

## 65 100% HOUSING COUNT

- A. Suppose you want the count of housing units in Des Moines that don't have complete plumbing facilities and have 2 persons/room.
1. Look in the summary codes and find the code for Des Moines. It's 94, so code that in the key:  
/94/
  2. Next look in the record types and note that you want the urban count, so the code is either a 1 or 2 depending on which table you select.
  3. Find the title of the table that best describes the information. It's table 60 - PLUMBING FACILITIES, PERSONS, PER ROOM, TENURE, AND RACE OF HEAD. Note that tables 41-107 fall under record type 2 so code a 2 in the record type field:  
/94/2/
  4. Next code the table number found in the index:  
/94/2/60/
  5. Turn to table number 60 and note the choices of stratifiers. Of the 1st group of stratifiers (total occupied, owner occupied, renter occupied, etc.) suppose you want the count of total occupied, so you code a '1' for stratifier 1.  
/94/2/60/1/

Examples  
Page 2

6. You want the count to include only those houses that don't have complete plumbing facilities, so for the 2nd stratifier, code a '2' for 'lacking one or more plumbing facilities':  
/94/2/60/1/2/
  7. You also want only those housing units with 2 persons per room. Under the 3rd stratifier the 3rd category fits - 1.51 or more persons per room, so code a 3 in the last stratifier field.  
/94/2/60/1/2/3/
  8. This is your key. Enter OPCD.H4./94/2/60/1/2/3/ on the screen and wait for your results.
- B. Suppose on this table you want a count of all owner occupied units in Iowa with complete plumbing facilities, for each category of persons/room.
1. The summary code will change to 1 for Iowa, and the record type will remain the same, assuming you want the urban total. (For tables 1-107 only, urban, rural farm or rural nonfarm summaries are available)! The table number will also stay the same - so you have:  
/1/2/60/
  2. Now you want owner occupied, so as the 1st stratifier, code a 2.  
/1/2/60/2/
  3. You also want a count of units with all plumbing facilities, so as the 2nd stratifier, code a 1.  
/1/2/60/2/1/
  4. Since you want all of the items under persons per room printed, you may either code a '0' for the 3rd stratifier, or leave it off entirely.  
/1/2/60/2/1/0/ or /1/2/60/2/1/
  5. Your entry is:  
OPCD.H4./1/2/60/2/1/0/  
alternate codes = OPCD.H4./1/2/60/2/1/ or OPCD.H4./1/2/60/2/1//
- C. Now suppose you want a total count of all housing units for the state.
1. Note that the summary code for Iowa is 1, so code:  
/1/
  2. Next you need a record type. Since it is dependent upon the table number, you must look up the table first. You find in the index that table 65 is a 100% Housing Count, so go back to the record types and find that you can only code a 2, 4 or 6 which are urban, rural nonfarm or rural farm respectively. Since you want the total for the state, you must make 3 separate retrievals. First get the urban portion, so code a '2' for record type:  
/1/2/
  3. Now code the table number: /1/2/65/
  4. Turn to the table and since there are no stratifiers your key is complete. Code:  
OPCD.H4./1/2/65/
  5. From this you will get the 100% Housing Count for the urban portion of Iowa.

Examples  
Page 3

6. To get the rural nonfarm count, you only need to change the record type from '2' to '4'. So code: OPCD.H4./1/4/65/  
From this you are given the rural nonfarm portion.
7. Now to get the last part of the total, code a 6 for rural farm in the record type field: OPCD.H4./1/6/65/.
8. You now have the 3 parts of the 100% Housing Count. By adding them you have the total housing count for Iowa.

## FOOTNOTES

- 1/ This aggregate along with the relevant count of units will permit the computation of a mean value (e.g., average number of rooms, average number of persons per unit, average rent, etc.).
- 2/ Multiply the aggregate value by \$250 to obtain the true value. The tabulated value was scaled by a factor of \$250 for tally purposes.
- 3/ Value is tabulated for owner-occupied and vacant-for-sale-only one-family houses which are on a place of less than 10 acres and have no business or medical office on the property. Value is not tabulated for mobile homes, trailers, cooperatives, or condominiums.
- 4/ Units with "all plumbing facilities" have all of the following: hot piped water, flush toilet for this household only, and a bathtub or shower for this household only.
- 5/ Contract Rent is tabulated for all renter-occupied and vacant-for-rent units except one-family houses on a place of 10 acres or more. No cash rent one-family houses must be on a place of less than 10 acres.
- 6/ Gross Rent is tabulated for all renter-occupied units except one-family houses on a place of 10 acres or more. No cash rent one-family houses must be on a place of less than 10 acres.
- 7/ Direct Access is an entrance to a living quarters directly from outside the structure or through a common hall.
- 8/ Complete Kitchen Facilities are all of the following: a range or cook-stove for this household only, a sink with piped water for this household only, and a mechanical refrigerator for this household only.
- 9/ Lacking one or more of the following facilities: hot piped water, flush toilet for this household only, or bathtub or shower for this household only.

## FOOTNOTES

- 1/ Aggregates, along with the relevant counts of units, will permit the computation of mean values (e.g., average income, etc.). In all cases, a loss is tallied as negative income; and the unit receiving it, as a unit with income.
- 2/ This count is obtained by using the weight of the head of the family (or indicated parent).
- 3/ In computing deficit, negative incomes are treated as zero.
- 4/ All tallies concerning "poverty level" exclude inmates of institutions, members of the Armed Forces living in barracks, college students living in dormitories, and unrelated individuals under 14 years old. The term "poverty level" used in these tabulations refers to the Social Security Administration's poverty index. Families referred to as "Below Poverty Level" are those below a 1.00 ratio of family income to Poverty Level (See Item 82).
- 5/ Multiply the aggregate value by \$250 to obtain the true value. The tabulated value was scaled by a factor of \$250 for tally purposes. Value is tabulated for owner-occupied and vacant-for-sale-only one-family houses which are on a place of less than 10 acres and have no business or medical office on the property. Value is not tabulated for mobile homes, trailers, cooperatives, or condominiums.
- 6/ Gross rent is tabulated for all renter-occupied and vacant-for-rent units except one-family houses on a place of 10 acres or more. Does not include "Without payment of cash rent."
- 7/ "Worker" includes members of the Armed Forces.
- 8/ Any given unit may be tallied in more than one income category.
- 9/ Lacking one or more of the following facilities: hot piped water, flush toilet for this household only, or bathtub or shower for this household only.
